TABLES OF ABBREVIATIONS.

tr. translation or translated. By itself it means "English translation", or "translated into English by". Where a translation is into any other language, the language is stated.

tr., tract. tractate.
v. see (Lat. vide).
Ven. Venerable.

II.—ABBREVIATIONS OF TITLES.

Acta SS. Acta Sanctorum (Bollandists).
Ann. pont. cath. ... Battandier, Annuaire pontifical catholique.
Hast., Dict. of the Bible .... Hastings (ed.), A Dictionary of the Bible.
Kirchenlex. .... Wetzer and Welte, Kirchenlexicon.
P. C. .... Migne (ed.), Patres Graeci.
Vig., Dict. de la Bible. Vigouroux (ed.), Dictionnaire de la Bible.

Note I.—Large Roman numerals standing alone indicate volumes. Small Roman numerals standing alone indicate chapters. Arabic numerals standing alone indicate pages. In other cases the divisions are explicitly stated. Thus "Rashdall, Universities of Europe, I, ix" refers the reader to the ninth chapter of the first volume of that work; "I, p. ix" would indicate the ninth page of the preface of the same volume.

Note II.—Where St. Thomas (Aquinas) is cited without the name of any particular work the reference is always to "Summa Theologica" (not to "Summa Philosophiae"). The divisions of the "Summa Theol." are indicated by a system which may best be understood by the following example: "I-II, Q. vi, a. 7, ad 2um" refers the reader to the seventh article of the sixth question in the first part of the second part, in the response to the second objection.

Note III.—The abbreviations employed for the various books of the Bible are obvious. Ecclesiastes is indicated by Eccl., to distinguish it from Ecclesiastes (Eccles.). It should also be noted that I and II Kings in D. V. correspond to I and II Samuel in A. V.; and I and II Par. to I and II Chronicles. Where, in the spelling of a proper name, there is a marked difference between the D. V. and the A. V., the form found in the latter is added, in parentheses.

THE CATHOLIC ENCYCLOPEDIA

Diocese (Lat. diœcesis), the territory or churches subject to the jurisdiction of a bishop (q.v.).

I. Origin of Term.—Originally the term diocese (Gr. διοικεσία) signified management of a household, thence administration or government in general. This term was soon used in Roman law to designate the territory dependent for its administration upon a city (civitas). What in Latin was called ager, or territorium, namely a district subject to a city, was commonly known in the Roman East as a diœcesis. But as the Christian bishop generally resided in a civitas, the territory administered by him, being usually conterminous with the juridical territory of the city, came to be known ecclesiastically by its usual civil term, diocese.

This name was also given to the administrative subdivision of some provinces ruled by legates (legati) under the authority of the governor of the province. Finally, Diocletian designated by this name the twelve great divisions which he established in the empire, and over each of which he placed a vicarius (Paulus-Wissowa, Real-Encyclopädie der classischen Altertumswissenschaft, Stuttgart, 1903, V, 1, 716 sqq.). The original term for local groups of the faithful subject to a bishop was ἱστορία (church), and at a later date, παροικία, i.e. the neighbourhood (Lat. paroquia, parochia). The Apostolic Canons (xiv, xvi), and the Council of Nicaea in 325 (can. xvi) applied this latter term to the territory subject to a bishop. This term was retained in the East, where the Council of Constantinople (381) reserved the word diœcesis for the territory subject to a patriarch (can. ii). In the West also parochia was long used to designate an episcopal see. About 530 Leo IV, and about 1095 Urban II, still employed parochia to denote the territory subject to the jurisdiction of a bishop. Alexander III (1159–1181) designated under the name of parochiani the subjects of a bishop (c. 4, C. X. qu. 1; c. 10, C. IX, qu. 2; c. 9, X, De testibus, II. 29). On the other hand, the present meaning of the word diocese is met with in Africa at the end of the fourth century (c.e. 350, 51, C. X. vi, qu. 1), and afterwards in Spain, where the term parochiæ, occurring in the ninth canon of the Council of Antioch, held in 341, was translated by “diocese” (c. 2, C. IX, qu. 3). See also the ninth canon of the Synod of Toledo, in SS9 (Hefele, ad h. an. c. 6, C. X, qu. 3). This usage finally became general in the West, though diocese was sometimes used to indicate parishes in the present sense of the word (see Parish). In Gaul, the words terminus, territorium, civitas, pagus, are also met with.

II. Historical Origin.—It is impossible to determine what rules were followed at the origin of the Church in limiting the territory over which each bishop exercised his authority. Universality of ecclesiastical jurisdiction was a personal prerogative of the Apostles; their successors, the bishops, enjoyed only a jurisdiction limited to a certain territory: thus Ignatius was Bishop of Antioch, and Polycarp, of Smyrna. The first Christian communities, quite like the Jewish, were established in towns. The converts who lived in the neighbourhood naturally joined with the community of the town for the celebration of the Sacred Mysteries. Exact limitations of episcopal territory could not have engaged much attention at the beginning of Christianity; it would have been quite impracticable. As a matter of fact, the extent of the diocese was determined by the domain itself over which the bishop exercised his influence. It seems certain, on the other hand, that, in the East at any rate, by the middle of the third century each Christian community of any importance had become the residence of a bishop and constituted a diocese. There were bishops in the country districts as well as in the towns. The chiroepiscopi (τυχοεπισκόποι), or rural bishops, were bishops, it is generally thought, as well as those of the towns; though from about the second half of the third century their powers were little by little curtailed, and they were made dependent on the bishops of the towns. To this rule Egypt was an exception; Alexandria was for a long time the only see in Egypt. The number of Egyptian dioceses, however, multiplied rapidly during the third century, so that in 320 there were about a hundred bishops present at the Council of Alexandria. The number of dioceses was also quite large in some parts of the Western Church, i.e. in Southern Italy and in Africa. In other regions of Europe, either Christianity had as yet a small number of adherents, or the bishops reserved to themselves supreme authority over extensive districts. Thus, in this early period but few dioceses existed in Northern Italy, Gaul, Germany, Britain, and Spain. In the last, however, their number increased rapidly during the third century. The increase of the faithful in small towns and country districts soon made it necessary to determine exactly the limits of the territory of each church. The cities of the empire, with their clearly defined suburban districts, offered limits that were easily acceptable. From the fourth century on it was generally admitted that every city ought to have its bishop, and that his territory was bounded by that of the neighbouring city. This rule was stringently applied in the East. Although Innocent I declared in 415 that the Church was not bound to conform itself to all the civil divisions which the imperial government chose to introduce, the Council of Chalcedon ordered (451) that if a civitas were dismembered by imperial authority, the ecclesiastical organization ought also to be modified (can. xvii). In the West, the Council of Sardica (344) forbade in the sixth century the establishment of dioceses in towns not populous enough to render desirable their elevation to the dignity of episcopal residences. At the same time many Western sees included the territories of several civitates.

From the fourth century we have documentary evidence of the manner in which the dioceses were created. According to the Council of Sardica (can. vi),...
this belonged to the provincial synod; the Council of Carthage, in 407, demanded moreover the consent of the primate and of the bishop of the diocese to be divided (canons iv and v). The consent of the pope or the emperor was not called for. In 446, however, Pope Leo I ruled that dioceses should not be established except in large towns and populous centres (c. 4, Dist. Ixxii). In the same period the Apostolic See was active in the creation of dioceses in the Burgundian kingdom and in Italy. In the latter country many of the sees had no other metropolitan than the pope, and were therefore closely related to him. Even already is his role in the formation of the diocesan system in the northern countries newly converted to Christianity. After the first successes of St. Augustine in England, Gregory the Great provided for the establishment of two metropolitan sees, each of which included two dioceses. In Ireland, the diocesan system was introduced by St. Patrick, though the diocesan territory was usually coextensive with the tribal lands, and the system itself was soon peculiarly modified by the general extension of monachism (see IRELAND). In Scotland, however, the diocesan organization dates only from the twelfth century. The establishment of such dioceses was also due to the establishment of dioceses in that part of Germany which had been evangelized by St. Boniface. In the Frankish Empire the boundaries of the dioceses followed the older Gallo-Roman municipal system, though the Merovingian kings never hesitated to confirm the rights of provincial bishops. Thus, the creation of new dioceses was a matter of diocesan authority. The Gallo-Roman kings and their successors, the Western emperors, notably the Ottonian (936-1002), sought papal authority for the creation of new dioceses. Since the eleventh century it has been the rule that the Pope should ordinarily be consulted before a diocese be established as a matter of the Apostolic See. St. Peter Damian proclaimed (1059-60) this as a general principle (c. 1, Dist. xxii), and the same is affirmed in the well-known "Decretum" of Gregory VII (1073-1085). The papal decretals (see DIOCESAL CUSTOMS, PAPAL) consider the creation of a new diocese as one of the "causa majors," i.e., matters of special importance, reserved to the pope alone (c. X, De translatiis episcopi, I. 7; c. 1, X, De officio legis, I. 30) and of which he is the sole judge (c. 5, Extrav. communes, De significatione causa, 2). Ordinarily of a diocese is due here to the missionary or regional bishops, episcopi gentium, episcopi terreni episcopi in gentibus, still found in the eleventh century. They had no fixed territory or diocese, but were sent into a country or district for the purpose of evangelizing it. Each was a bishop in Germany, St. Augustine in England, and St. Wilibrord in the Netherlands. They were themselves the organizers of the diocese, after their apostolic labours had produced happy results. The bishops met with in some monasteries of Gaul in the earlier Middle Ages, probably in imitation of Irish conditions, had no administrative functions (see BELLUSHEIM, Gesch. d. kath. Kirche in Irland, I, 295-30, and LÖNING, below).

III. CREATION AND MODIFICATION OF DIOCESES.—We have noticed above that after the eleventh century the supreme pontiff reserved to himself the creation of dioceses. In the actual procedure, as already stated, all that touches the diocese is a causa major, i.e., one of those important matters in which the bishop possesses no authority whatever and which the pope reserves exclusively to himself. Since the episcopate is of Divine institution, the pope is obliged to consult in the Church, the Church, but the pope remains sole judge of the time and manner, and alone determines what flock shall be entrusted to each bishop. Generally speaking, the diocese is a territorial investment, but the bishop possesses authority only over certain classes of persons residing in the territory; this is principally the case in districts where both the Western and the Eastern Rite are followed. Whatever, therefore, pertains to the creation or suppression of dioceses, changes in their boundaries, and the like is within the pope's exclusive province. As a general rule, the task of consultation is done by the Congregation of the Consistory, by Propaganda when the question relates to territories subject to this congregation, and by the Congregation of Extraordinary Ecclesiastical Affairs when the establishment of a diocese is governed by concordats (q. v.), or when the civil powers of the country have the right to intervene in the creation. We shall take up successively (1) the creation of new dioceses; (2) the various modifications to which they are subject, included by canonsists under the term Inmunatio. (1) Creation of Dioceses.—Strictly speaking, it is only in missionary countries that there can be question of the creation of a diocese, either because the country was never converted to Christianity or because its ancient hierarchy was suppressed, owing to conquest by infidels or the progress of heresy. Regularly, before becoming a diocese, the territory is successively a mission, a prefecture Apostolic, and finally a vicariate Apostolic. The Congregation of the Propagation of the Faith makes a preliminary study of the question and passes judgment on the opportuneness of the creation of the diocese in question. It considers principally whether the number of Catholics, priests, and religious establishments, i.e. churches, chapels, schools, is sufficiently extensive to justify the creation of the diocese. These matters form the subject of a report to Propaganda, to which must be added the number of towns or settlements included in the territory. If there is a city suitable for the episcopal see, the fact is stated, also the financial resources at the disposal of the see. There is added, finally, a sketch, if possible accompanied by a map, indicating the territory of the future diocese. As a general rule, a diocese should not include districts whose inhabitants speak different languages or are subject to disintegration powers (see Instructions of Propaganda, 1786, in Collectanea S. C. de P. F., Rome, 1907, no. 643). Moreover, the general conditions for the creation of a diocese are the same as those required for dividing or "dismembering" a diocese. Of this we shall speak below.

(2) Modification (Inmunatio) of Dioceses.—Under this head come the division (dismemberatio) of dioceses, their union, suppression, and changes of their respective limits.

(a) Division or Dismemberment of a Diocese.—This is reserved to the Holy See. Since the pope is the supreme power in the Church, he is not bound to act in conformity with the canonical enactments which regulate the dismemberment of ecclesiastical benefices. The following rules, however, are those which the observer has observed, though he is free to deviate from them. First, to divide a diocese, a sufficient reason must exist (causa probis). The necessity, or at least the utility, of the division must be demonstrated. There is sufficient reason for the subdivision of a diocese if it be too extensive, or the number of the faithful too great, or the means of communication too difficult, to permit the bishop to administer the diocese properly. The benefit which would result to religion (incrementum cultus divini) may also be brought forward as a reason for the change. In the main, these reasons are summed up in the one: the hope of forwarding the interests of Catholicism. Dissections between inhabitants of the same diocese, or a fact that they belong to different nations, may also be considered a sufficient reason. Furthermore, the mere fact that the endowment of a diocese was very large—a case somewhat rare at the present day—formed a legitimate reason for its division.

The second condition is suitability of place (locus congruus). There should exist in the diocese to be cre-
ated a city or town suitable for the episcopal residence; the ancient discipline which rules that sees should be established only in important localities is still observed.

Third, a proper endowment (dona congruo) is requisite; the bishop should have at his disposal the resources necessary for his own maintenance and that of the ecclesiastics engaged in the general administration of the diocese, and for the establishment of a cathedral church, the expenses of Divine worship, and the general administration of the diocese. Formerly it was necessary that in part, at least, such an endowment should consist in lands; at present this is not always possible. It suffices if there is a prospect that the new bishop will be able to meet the necessary expenses. In some cases, the civil government grants a subsidy to the bishop; in other cases, he must depend on the liberality of the faithful and on a contribution from the parishes of the diocese, known as the 'cathedraeum.'

Fourth, generally for the division of a diocese the consent of the actual incumbent of the benefice is requisite; but the pope is not bound to observe this condition. John XXII ruled that the pope had the right to appoint the new bishop to the diocese, even against the opposition of the bishop (c. 5, Extrav. commun., De prebendis, III, 2). As a matter of fact, the pope asks the advice of the archbishop and of all the bishops of the ecclesiastical province in which the diocese to be divided is situated. Often, indeed, the division takes place on the request of the bishop himself.

Fifth, theoretically the consent of the civil power is not required; this would be contrary to the principles of the distinction and mutual independence of the ecclesiastical and civil authority. In many countries, however, the consent of the civil authority is indispensable, because the Government has pledged itself to endow the occupants of the episcopal see, or because concordats have regulated this matter, or because a suspicious government would not permit a bishop to administer the new diocese if it were created without civil intervention (see Rits, Conventiones de rebus ecclesiasticis, Rome, 1869, pp. 19 seq.). At present, the creation or division of a diocese is done by a pontifical Brief, forwarded by the Secretary of Briefs. As an example, we may mention the Brief of 11 March, 1904, which divided the Diocese of Providence and established the new Diocese of Fall River. The motive proffered for the division was the diocese remained religiously divided, and the major bonus animorum; the Bishop of Providence himself requested the division, and this request was approved by the Archbishop of Boston and by all the bishops of that ecclesiastical province. The examination of the question was submitted to Propaganda and to the Apostolic Delegate at Washington. The pope then created, motu proprio, the new diocese, indicated its official title in Latin and in English, and determined its boundaries, which correspond to political divisions, and, finally, fixed the revenues of the bishop. In the case before us these consist in a moderate cathedraeum to be determined by the bishop (discretio arbitrio episcoporum). According to the practice of Propaganda, all the priests who at the time of the division exercised the ministry in the dismembered territory belong to the clergy of the new diocese from the day of its creation (13 April, 1904, in Collectanea S. C. de P. F., new ed., no. 1751).

(b) Union of Dioceses.—As in the case of the division of a diocese, the union of several dioceses ought to be justified by motives of public utility, e.g. the small number of the faithful, the loss of resources. As in the division, the pope obtains the advice of persons familiar with the situation; sometimes he asks the advice of the Government, etc. It is a generally recognized principle in the union of benefices, that such union takes effect only after the death of the actual occupant of the see which is to be united to another; at least when he has not given his consent to this union. Though the pope is not bound by this rule, in practice it must be taken into account. The union of dioceses takes place in several ways. There is, first, the unio aequi principalis or aequale when the two dioceses are entrusted for the purpose of administration to a single bishop, but not otherwise; in other respects distinct; each of them has its own cathedral chapter, revenues, rights, and privileges, but the bishop of one see becomes the bishop of the other by the mere fact of appointment to one of the two. He cannot resign one without ipso facto resigning the other. This situation differs from that in which a bishop administers for a time, or even perpetually, another diocese; in this case there is no union between the two sees. It is in reality a case of plurality of ecclesiastical benefices; the bishop holds two distinct sees, and his nomination must take place according to the rules established for each of the two dioceses. On the contrary, in the case of two or more united dioceses, the election or designation of the candidate must take place by the agreement of those persons in both dioceses who possess the right of election or of designation. Moreover, in the case of united dioceses, the union is diminished and the special rules for each of the dioceses which are a residence of the bishop, e.g. that he shall reside in each diocese for a part of the year. If the pope makes no decision in this matter, the bishop may reside in the more important diocese, or in that which seems more convenient for the purposes of administration, or even in the diocese which he prefers as a residence. If the bishop resides in one of his dioceses he is considered as present in each of them for those judicial acts which demand his presence. He may also convocate his two separate diocesan synods for each of the two dioceses or only one for both of them. In other respects the administration of each diocese remains distinct. There are two classes of unequal unions of dioceses (uniones inaequalis): the unio subjectiva or per accessorium, seldom put into practice, and the unio per confusionem. In the former case, the one diocese retains all its rights and the other loses its rights, obtains those of the principal diocese, and thus becomes a dependency. When a diocese is thus united to another there can be no question of right of election or designation, because such a dependent diocese is conferred by the very fact that the principal diocese possesses a titular. But the administration of each diocese remains distinct and the titular of the principal diocese must assume all the obligations of the united diocese. The second kind of union (per confusionem) suppresses the two pre-existing dioceses in order to create a new one; the former dioceses simply cease to exist. To perpetuate the names of the former sees the new bishop sometimes assumes the titles of both, but in administration no account is taken of the fact that they were formerly separate sees. Such a union is equivalent to the suppression of the dioceses.

(c) Suppression of Dioceses.—Suppression of dioceses, properly so called, in a manner other than by union, takes place only in countries where the faithful and the clergy have been dispersed by persecution, the ancient dioceses becoming missions, prefectures, or vicariates Apostolic. This has occurred in the Orient, in England, the Netherlands. All changes of this nature are not regulated by canon law.

(d) Change of Boundaries.—This last mode of novatio is made by the Holy See, generally at the request of the bishops of the two neighbouring dioceses. Among the sufficient reasons for this measure are the small number of the faithful, the loss of resources, the difficulty of communication. In part, at least, the mountain or of a large river, disputes between the inhabitants of one part of the diocese, also the fact that they belong to different countries. Sometimes a re-settlement of the boundaries of two dioceses is necessary because the limits of each are not clearly defined. Such a settlement is made by a Brief, sometimes also
DIOCESE

by a simple decretum or decision of the Congregation of the
Consistory approved by the pope, without the formality of a Bull or Brief.

IV. DIFFERENT CLASSES OF DIOCESES.—There are
several kinds of dioceses. There are dioceses properly
so called and archdioceses (q. v.). The diocese is
therefore circumscription administrated by bishop; the archdiocese is placed under the jurisdic-
tion of an archbishop. Considered as a territorial cir-
cumscription, no difference exists between them; the
power of their pastors alone is different. Generally,
several dioceses are grouped in an ecclesiastical prov-
ince, ecclesiastical province subject to the authority of
an archbishop. Some, however, are said to be ex-
empt, i.e. from any archiepiscopal jurisdiction, and
are placed directly under the authority of the Holy
See. Such are the dioceses of the ecclesiastical prov-
ince of Rome, and several other dioceses or archdioc-
eses, especially in Italy, also in other countries.
The exempt archbishops are called titular archbishops, i.e.
they possess only the title of archbishop, have no suf-
fragan bishops, and administer a diocese. The term
“titular archbishop”, it is to be noted, is also applied
to bishops who do not administer a diocese, but who
have been appointed with the episcopal consecration a titular
archbishop. For the better understanding of this
it must be remembered that archdioceses and di-
oceses are divided into titular and residential. The
bishop of a residential see administers his diocese
personally. The bishop of a titular see, on the other
hand, possesses a titular bishop only. This is so,
because, these bishops have only an episcopal title; they
are not bound by any obligations to the faithful of the di-
oceses whose titles they bear. These were formerly called
bishops or archbishops in partibus infidelium, i.e. of
a diocese or archdiocese fallen into the power of infidels;
but since 1829, when they are called titular bishops of
archbishops. Such are the vicars Apostolic, auxiliary
bishops, administrators Apostolic, nuncius, Apostolic
delegates, etc. (see TITULAR BISHOP). Mention must
also be made of the suburbanicarian dioceses (dioceses
suburbicarian), i.e. the six dioceses situated in the im-
mediate neighbourhood of Rome and each of which is
administered by one of the six cardinal-bishops. These
form a special class of dioceses, the titulars or occupants
of which possess certain special rights and obligations
(see SUBURBICARIAN DIOCESES).

V. NOMINATION, TRANSFER, RENUNCIATION,
AND RESIGNATION OF A BISHOP.—The general rules rela-
ting to the nomination of a residential bishop will be
found in the article BISHOP. They are applicable
whenever there may have been the cause of the vacancy
of the diocese, except in the case of a contrary order of the
pope. The Church admits the possibility of the
renunciation of the perpetuity of ecclesiastical benefices.
Once invested with a see the bishop continues to hold it until
his death. There are, however, exceptions to this rule.
The bishop may be allowed by the pope to resign his
see when actuated by motives which do not spring
from personal convenience, but from concerns for the
public good. Some of these reasons are expressed in
the canon law; for instance, if a bishop has been guilty of
a grave crime (conscientia criminis), if he is in failing
health (debilitus corporis), if he has not the requisite
knowledge (defectus scientiae), if he meets with serious
disagreement from the faithful (malitia peccati), if he has
been a cause of public scandal (scandalum populii), if he
is irregular (irregularitas)—c. 10, X, De renuntia-
tione, I, 9; c. 18, X, De regularibus, III, 32. The
pope alone can accept this renunciation and judge of the
sufficiency of the alleged reasons. Pontifical authori-
ization is also necessary for an exchange of dioceses be-
tween two bishops, which is not allowed except for
grave reasons. The same principles apply to the transfer
(translatio) of a bishop from one diocese to another.
Canonical legislation compares with the indissoluble
marriage the bond which binds the bishop to his diocese.
This comparison, however, must not be
understood literally. The pope has the power to sever
the mystical bond which unites the bishop to his
church, in order to grant him another diocese or to
promote him to an archiepiscopal see. A bishop may
also be deposed from his functions for a grave crime.
In such a case the pope generally states his decision
of his own accord, and deposes him only upon refusal.
As the Holy See alone is competent to try
the crime of a bishop, it follows that the pope alone, or
the congregation to which he has committed the bishop's
trial (Congregation of Bishops and Regulars of the
Propaganda Fide), sometimes the authority of the metropolitan
bishop, can inflict a penalty or pronounce the declaratory sentence
required when the law inflicts deposition as the sanction of a
specified delinquency. Finally, the pope has always the
right, strictly speaking, to deprive a bishop of his
diocese, even if the latter is not guilty of crime; but for
this act there must be grave cause. After the conclu-
sion of the Concordat of 1801 (q. v.) with France, Pius
VII removed from their dioceses all the bishops of
France. It was, of course, a very extraordinary mea-
sure, but was justified by the gravity of the situation.

VI. ADMINISTRATION OF THE DIOCESE.—The bishop
is the general ruler of the diocese, but in the adminis-
tration he must conform to the general laws of the
Church (see BISHOP). According to the Council of
Trent he is bound to divide the territory of his diocese
into parishes, with ordinary jurisdiction (q. v.) for
their titulars (Sess. XXIV, c. xiii, De factis), unless
the bishop personally confines the jurisdiction of the
parishes or unless the Holy See has arranged the matter
otherwise (Third Plenary Council of Baltimore, nos.
31–33). The bishop needs also some auxiliary service
in the administration of a diocese. It is customary for
each diocese to possess a chapter (q. v.) of canons in
the cathedral church; they are the counsellors of the
bishop. The cathedral itself is the church where the
bishop has his seat (sede). The pope reserves to
himself the right of authorizing its establishment as
well as that of a chapter of canons. In many dioceses,
principally outside of Europe, the pope does not estab-
lish canons, but gives as auxiliaries to the bishop other
officials known as consultores cleri diocesani, i.e. the
most distinguished members of the diocesan clergy,
chosen by the bishop, often in concert with his clergy
or some members of it. The bishop is bound to ask
the advice of those counsellors, canons or consultants,
in those most important matters. The bishop, in some
cases, has the right to nullify episcopal action taken
without their consent. The consultores cleri diocesani,
however, possess but a consultative voice (Third Plen.
Council of Baltimore, nos. 17–22; Pien. Conc. American
Latina, no. 246.—See CONSULTORS, DIOCESE).
After the bishop, the principal authority in a diocese is
the vicar-general (vicarius generalis in spiritualibus);
he is the bishop's substitute in the administration of
the diocese. The office dates from the thirteenth cen-
tury. Originally the vicar-general was called the
"diocesan" (officinalis); even yet officinals and vicarius
generalis in spiritualibus are closely connected. Strictly
speaking, there should be in each diocese only one vicar-
general. In some countries, however, local custom
has authorized the appointment of several vicars-gen-
eral. The one specially charged with the canonical
lawsuits (jurisdiction contentiosa), e. g. with criminal
actions against ecclesiastics or with matrimonial cases,
is still known as the "official"; it must be noted that he
is none the less free to exercise the functions of vicar-
general in other departments of diocesan administra-
tion. A contrary custom prevails in certain dioceses
of Germany, where the "official" possesses only the
jurisdiction contentiosa, but not other ecclesiastical
common law. For the temporal administration of the
church the bishop may appoint an acononus, i.e. an
administrator. As such functions do not require
ecclesiastical jurisdiction, this administrator may be a
layman. The choice of a layman fully acquainted

* The Apostolic Delegation of Arabia also includes Egypt.
with the civil law of the country may sometimes offer many advantages (Second Plenary Council of Baltimore, no. 75). In certain very extensive dioceses the pope appoints a vicarius generalis in pontificiis, or auxiliary bishop, whose duty is to supply the place of the bishop, in the exercise of those functions of the sacred ministry which demand episcopal order. In the appointment of this bishop the pope is not bound to observe the special rules for the appointment of a residential bishop. These titular bishops possess no jurisdiction by right of their office; the diocesan bishop, if he can grant them, e.g., the powers of a vicar-general.

The common ecclesiastical law contains no enactments relating to the rights and powers of the chancellor, an official meet with in many dioceses (see DIACONAL CHANCERY). The Second Plenary Council of Baltimore (no. 74) advises the establishment of a chancellor in every diocese of the United States. The chancellor is specially charged with the affixing of the episcopal seal to all acts issued in the name of the bishop, in order to prove their authenticity. He appears also in the conduct of ecclesiastical lawsuits, e.g., in matrimonial causes. He is, in the absence of the bishop, the authorized signatory of the council, or of its acts. The chancellor is sometimes employed to vouch for the authenticity of the acts of the diocese. Because of the importance of his functions, the chancellor sometimes holds the office of vicar-general in spiritualibus. By episcopal chancery is sometimes understood the office where the written documents issued in the name of the bishop, and to which is appended the seal, are deposited corresponding to the administration of the diocese; sometimes also the term signifies the persons employed in the exercise of these functions. The term chancery or its equivalents is not exactly defined in the ordinary. It seems to have been in the twelfth century that a chancellor was appointed, as a rule, to supervise the acts of the diocese and to make them authentic by an episcopal seal (see CHANCERY).

The term ius orius, or ius episcopi, is the ecclesiastical chancery with the affairs of the diocese, and with the diocesan and metropolitan rights and powers. It is an essential part of the chancery, and it is exercised by the bishop himself or his chancellor. An assistant, who is called fiscal advocate (advocatus fiscalis), may be appointed to aid the officer.

The diocese was divided into a number of archdeaconries, each having a bishop by an archdeacon who possessed considerable authority in that part of the diocese placed under his jurisdiction. The Council of Trent restricted very much their authority, and since then the number of the archdeacon is gradually diminishing. It exists in the present day only as an honorary title, given to a member of the cathedral chapter (see ARCHDEACON). On the other hand, the ancient office of vicar foranei, decani rurales, or archipresbyteri still exists in the Church (see ARCHPRIEST; DEAN). The division of the diocese into deaneries is not obligatory, but in large dioceses the bishop usually entrusts to certain priests known as deans or vicars foranei the oversight of the clergy of a portion of his diocese, and generally delegates to them special jurisdictional powers (Third Plenary Council of Baltimore, no. 27-30). Finally, by means of the diocesan synod all the clergy participates in the general administration of the diocese. According to the common law, the bishop is bound to assemble a synod every year, to which he must convocate the vicar-general, the deans, the canons of the cathedral, and at least a certain number of parish priests. Here, however, custom and pontifical briefs have departed in some points from the general legislation. At this meeting all questions relating to the moral and the ecclesiastical discipline of the diocese are publicly discussed and settled. In the synod the bishop is the sole legislator; the members may, at the request of the bishop, give their advice, but they have only a deliberative voice in the choice of the examinatores dei diocesani, i.e. the ecclesiastics charged with the examination of candidates for the parishes (Third Plenary Council of Baltimore, nos. 23-26). It is because the diocesan statutes are generally elaborate and promulgated in a synod that they are sometimes known. In dioceses which possess the general laws of the Church and the enactments of national or plenary and provincial synods, the bishop may regulate by statutes that are often real ecclesiastical laws, the particular discipline of each diocese, or apply the general laws of the Church to the special needs of the diocese. Since the bishop alone possesses all the legislative power, it is not possible in a synod these diocesan statutes, he may modify them or add them on his own authority.

VII. VACANCY OF THE DIOCESE.—We have already explained how a diocese becomes vacant (see V above); here it will suffice to add a few words touching the appointments of the bishop during the vacancy. In dioceses where there is a coadjutor bishop with right of succession, the latter, by the fact of the vacancy of the diocesan bishop, becomes the residential bishop or ordinary (q.v.) of the diocese. Otherwise the government of the diocese during the vacancy belongs regularly to the chapter or college of canons. Each chapter must choose within eight days a vicar capitular, whose powers, although less extensive, are in kind like those of a bishop. The chapter does not fulfill its obligation, the archbishop appoints et officia a vicar capitular. In dioceses where a chapter does not exist, an administrator is appointed either by the bishop himself before his death, or, in case of his neglect, by the metropolitan or by the senior bishop of the province (see ADMINISTRATOR).

VIII. DIOCESAN SYSTEM OF THE CATHOLIC CHURCH.—The accompanying table of the diocesan system of the Church shows the state of the Church at present throughout the world: 9 patriarchates of the Latin, 6 of the Oriental Rites; 6 suburbanian dioceses; 163 (or 166 with the Patriarchates of Venice, Lisbon, and Goa, in reality archdioceses) archdioceses of the Latin, and 26 of the Oriental Rites; 975 dioceses of the Latin, and 52 of the Oriental Rites; 55 prefectures Apostolic of the Latin Rite; 12 Apostolic delegations; 21 abbeys or prelatures nullius dioceses, i.e. exempt from the jurisdiction of the diocesan or archdiocesan authority. Therefore there are also 80 titular archdioceses and 432 titular dioceses.

THOMAS, Vitus et nova disciplinae ecclesiae, etc. (Paris, 1861); Part I, II, III, nos. 51-59, 161; DONITZ, Gesch. des deutschen Kirchenrechts (Strassburg, 1878), I, 410; II, 129 sqq.; HARFORD, The Council of Trent, 1545-1563, 2 vols. (Leipzig, 1891); JURGENS, Vorlesungen über das kirchliche Recht (Leipzig, 1892); JOHNSON, History of the Catholic Church (London, 1905); ARTZ, Geschichte des Kirchenrechts (Freiburg, 1900); 231, 346, and bibliographical supplement (Bonn, 1903); SCHMIEER, Gesch. der kathol. Kirche in Schottland (Mainz, 1883); TRAUTGER, Kirchenrecht (Leipzig, 1885); JOHNSON, The Catholic Church in England (London, 1891); MÜLLER, Die Geschichte der Kirche in England (Leipzig, 1893); BAILLIERE, Gesch. der kathol. Kirche in Holland (Utrecht, 1894); MÜLLER, Die Geschichte der Kirche in Frankreich (Paris, 1895); MÜLLER, Die Geschichte der Kirche in Deutschland (Freiburg, 1901); and the multivolume works of BORCHARDT, Church History, in which are treated the history of all known Catholic dioceses to 1198, with names and regular dates of bishops; see GAMS, Series episcoporum ecclesiarum, I, 976-59, and his Appendix to the Catholic Encyclopedia, New York (1908), and the descriptive work of WERNER, Orbis terrae, Epistola (Freiburg, 1900). It is also due to him in the jurisdic-
Dioclea, a titular see of Phrygia in Asia Minor. Dioclea is mentioned by Ptolomy (V, ii, 23), where the former editions read Doka; this is probably the native name, which must have been hellenized at a later time; in the same way Dioclea in Dalmatia is most probably called Diocletianopolis. The autonym as well as the rights of Dioclea are proved by its coins struck in the reign of Elagabalus (Head, Hist. Num., 562). It figures in the “Syneodemus” of Hierocles, in Parthey, “Notitiae Episcopatum” (II, X, XIII), and in Gelzer, “Nova Tactica”, i.e. as late as the twelfth or thirteenth century, as a bishopric of Phrygia Caesarea, the metropolis of which was Laodicea. Only two bishops are known, in 431 and 451 (Lequien, Or. Christ., I, 823). An inscription found near Doghla, or Dola, in a village in the vilayet of Smyrna, shows that it must be the site of Dioclea, though there are no ruins.

S. PÉTRIDES.

Diocletian (Valerius Diocletianus), Roman Emperor and persecutor of the Church. He was born at Salona, a.d. 245; d. at Salona, a.d. 313. He entered the army and by his marked abilities attained the offices of Governor of Mesia, consult, and commander of the guards of the palace. In the Persian war, under Carus, he especially distinguished himself. When the son and successor of Carus, Numerian, was murdered, the choice of the army fell upon Diocletian, who immediately slew with his own hand the murderer Aper (17 Sept., 284). His career as emperor belongs to secular history. Here only a summary will be given. The reign of Diocletian (284-305) marked an era both in the military and political history of the empire. The triumph which he celebrated together with his colleague Maximian (20 Nov., 303) was the last triumph which Rome ever held. Britain, the Rhine, the Danube, and the Nile furnished trophies, but the proudest boast of the conqueror was that of Persia, the persistent enemy of Rome, had at last been subdued. Soon after his accession to power Diocletian realized that the empire was too unwieldy and too much exposed to attack to be safely ruled by a single head. Accordingly, he associated with himself Maximian, a bold but rude soldier, as Caesar, and afterwards as Augustus, 293. Later on, he further distributed his power by granting the inferior title of Caesar to two generals, Galerius and Constantius (292). He reserved for his own portion Thrace, Egypt, and Asia; Italy and Africa were Maximian’s provinces, while Galerius was stationed on the Danube, and Constantius had charge of Gaul, Spain, and Britain. But the supreme control remained in Diocletian’s hands. None of the rulers resident in Rome, and thus the way was prepared for the downfall of the imperial city. Moreover, Diocletian undermined the authority of the Senate, assumed the diadem, and introduced the severe ceremonial of the Persian court. After a prosperous reign of nearly twenty-one years, he abdicated the throne and retired to Salona, where he lived in magnificence seclusion until his death.

Diocletian’s name is associated with the last and most terrible of all the ten persecutions of the early Church. Nevertheless it is a fact that the Christians enjoyed peace and prosperity during the greater portion of his reign. Eusebius, who lived at this time, describes in glowing terms “the glory and the liberty which with the doctrine of piety was honoured”, and he extols the clemency of the emperor towards the Christian governors whom they appointed, and towards the Christian members of their households. He tells us that the rulers of the Church “were courted and honoured with the greatest subserviency by all the rulers and governors”. He speaks of the vast multitudes that flocked to the religion of Christ, and of the spacious and splendid churches erected in the place of the humber buildings of earlier days. At the same time he bewails the falling from ancient fervour “by reason of excessive liberty” (Hist. Eccl., VIII, i). In 305 Diocletian remained sole emperor, he would probably have allowed this toleration to continue undisturbed. It was his subordinate Galerius who first induced him to turn persecutor. These two rulers of the East, at a council held at Nicomedia in 302, resolved to suppress Christianity throughout the empire. The cathedral of Nicomedia was demolished (21 Feb., 303). An edict was issued “to tear down the churches to the foundations, and to destroy the Sacred Scriptures by fire; and commanding also that those who were in honourable stations should be degraded if they persevered in their adherence to Christianity” (Euseb., op. cit., VIII, ii). Three further edicts (303-304) marked successive stages in the severity of the persecution: the first ordering that the bishops, priests, and deacons should be imprisoned, the second that they should be tortured and compelled by every means to sacrifice; the third including the laity as well as the clergy. The atrocious cruelty with which these edicts were enforced, and the vast numbers of those who suffered for the Faith are attested by Eusebius and the Acts of the Martyrs. We read even of the massacre of the whole population of a town because they declared themselves Christians (Euseb., loc. cit., xi, xii; Lactant., “Div. Inst.”, V, xi). The abdication of Diocletian (1 May, 305) and the subsequent partition of the empire brought relief to many provinces. In the East, however, Galerius and Maximian held sway, the persecution continued to rage. Thus it will be seen that the so-called Diocletian persecution should be attributed to the influence of Galerius; it continued for seven years after Diocletian’s abdication. (See Persecutions.)

T. B. SCANNELL.

Diocletianopolis, a titular see of Palæstina Prima. This city is mentioned by Hierocles (Syneodemus, 719, 2), Georgius Cyprius (ed. Gelzer, 1012), and in some “Notitiae Episcopatum” as a suffragan of Caesarea. Its native name is unknown, and its site has not been identified. One bishop is known, Elias, in 359 (Lequien, Oriens Christianus, III, 460).

(2) Another Diocletianopolis was a suffragan see of Philippopolis in Thrace. Its site is unknown. Two bishops are mentioned, Cyrilus in 431, and Epictetus in 451 and 458. A third, Elias, in 555, is doubtful (Lequien, op. cit., I, 1161). (3) Still another Diocletianopolis was a suffragan of Trolemis in Thessalia Secunda (Parthey, Notit. Episc., I). This city is also mentioned by Hierocles (op. cit., 732, 3), and by...
Diodorus of Tarsus, date of birth uncertain; d. about A.D. 592. He was of noble family, probably of Antioch. St. Basil calls him a "nursing" or "counselor" of Tarsus, but whether this episcopate was at Antioch or at Tarsus is not known. He studied at Athens, and then embraced the monastic state. He became head of a monastery in or near Antioch, and St. Chrysostom was his disciple. When Antioch groaned under Arian bishops, he did not join the small party of irremovable heads. He accordingly asked to have written some of his works against the pagans as early as the reign of Julian, for that emperor declared that Diodorus had used the learning and eloquence of Athens against the immortal gods, who had punished him with sickness of the throat, emaciation, wrinkles, and a hard cough. In the persecution of Valens (368-78), Flavian and Diodorus, now priests, during the exile of Mecitus kept the Faith together, assembling them on the northern bank of the Orontes, when the Arian emperor did not permit Catholic worship within the city. Many times banished, Diodorus, in 370, made a visitation of St. Basil in Ararat, whether that saint had come to visit Mecitus. On the return of the latter to his flock, he made Diodorus Bishop of Tarsus and Metropolitan of Cilicia. Theodosius soon after, in a decree, named Diodorus and St. Pelagius of Laodicea as norms of orthodoxy for the whole East. Diodorus was at the Councils of Antioch in 379 and of Constantinople in 381. These men makes him responsible at the latter council for the proposal of Nestorius as bishop of that city, and represents him as one of the chief movers in the appointment of St. Flavian as successor to Mecitus, by which the unhappy schism at Antioch was prolonged.

Diodorus came to Antioch in 380 or later, when St. Chrysostom was already a priest. In a sermon he spoke of Chrysostom as "st. John the Baptist, the voice of the Church, the rod of Moses." Next day Chrysostom ascended the pulpit and declared that when the people had applauded, he had groaned; it was Diodorus, his father, who was John the Baptist; the Antiochenses could bear witness how he led without possession, having his food from alms, and persevering in prayer and preaching; like the Baptist he had taught on the other side of the river, often he had been imprisoned—nay, he had been often beheaded, at least in will, for the Faith. In another sermon he likens Diodorus to the martyrs: "See his mortified limbs, his face, having the form of a man, but the expression of an Angel!" (379) Diodorus in 375 asked Diodorus to disown a furtitious letter circulated in his name, permitting marriage with a deceased wife's sister. In the following year he criticizes the rhetorical style of the longer of two treatises sent him by Diodorus, but gives warm praise to the shorter. Diodorus's style is praised by Chrysostom, Theodoret, and Photius, but of his very numerous writings only a few unimportant fragments have been preserved, chiefly in Catena (q. v.). He wrote against some of the heresies and still more against heretical heathen philosophy. Photius gives a detailed summary of his writings, but some of the books are evidently very dull from a modern point of view. According to Lequien he composed commentaries on the whole Bible. St. Jerome says that these were imitations of those of Eusebius of Emesa, but less distinguished by secular learning. Diodorus rejected the allegorical interpretations of the Alexandrians, and adhered to the literal sense. In this he was followed by his disciple Theodore of Mopsuestia, and by Chrysostom in his unequalled expositions. The Antiochene School of which he was the leader was discredited by the subsequent heresies of Nestorius, of whom his disciple Theodore of Mopsuestia was the predecessor. Theodore wrote to extol Diodorus, but St. Cyril declared him a heretic. The dashing passages cited by Marius Mercator and Leontius seem, however, to belong to a work of Theodore, not of Diodorus; nor was the latter condemned when Theodore and his followers were condemned by the Fifth General Council (553). It seems certain that Diodorus went too far in his opposition to the (younger) Apollinaris of Laodicea, according to whom the rational soul in Christ was supplied by the Logos. Diodorus, in emphasizing the completeness of the Lord's person, appears to have asserted two hypotheses, not necessarily in a heretical sense. If the developments by Theodore throw a shade on the reputation of Diodorus, the praise of all his contemporaries and especially of his disciple Chrysostom tend more strongly to exculpate him. It will be best to look upon Diodorus as the innocent source of Nestorianism (q. v.) only in the sense that St. Cyril of Alexandria is admittedly the unwilling origin of Monophysitism through some incorrect expressions. Against this view are Jülicher [Theol. lit. Z. (1902), 29-50] and Frenk [in "Rev. hist. eccl." 1 (1902), 91-71; reprinted with improvements in "Kirchengesch. Abhandl." (Paderborn, 1907), 32-3]. The fragments of his Commentaries on the Old Testament are collected in Migne, P. G., XXXIII, from the Catena of Nicephorus and that published by V. Jiilicher [Analecta Hierosolimitana, 1878], also from Patrum Bibl., VI. A few more are found in Pitra, "Spicilegium Solesmenscense" (Paris, 1832), I. A long list of the lost works is in Fabricius, "Bibl. Gr." V, 24 (reprinted in Migne, loc. cit.). Some Syriac dogmatic fragments are in Lagarde, "Analecta Syriaca," 1855. Fragments of Pseudo-Justin Martyr have been attributed to Diodorus by Harnack ("Texte und Unters.,” N. F., VI, 1, 1901). For his life, see Tellenmont, "Mémoires," vol. VIII, and Vennerr in "Dict. d'Hist. Beaux," vol. XXXIII. Diodorus as an exegete in Theologie und Geschichte in "Bibl. H. Ch." 1860, 1862. An introduction to his work was by Tüxen in "Hastens, Dict. of the Bible," V, 500. The influence of Diodorus is described by the Antiochenes in the Th. Quaest. in "Dict. in Antiqu." 1861, 1862; Diodore de lausoria, Diodore de l'Orontes, Diodore de la Moria, Diodore de la Mitri in "Mémoires," nouv. série (1901), 1, 431; Iadem, École théol. d'Antioche in "Dict. des écol. cath.," II, 145 sqq., see also Diodore d'Égypte, École élamite d'Antioche in "École élamite d'Antioche," 1, 583 sqq. On the School of Antioch in general see bibliography of article Antioche by Leclercq in "Dict. d'Arch. eccl." (1870.)

John Chapman.

Diognetus, Epistle to (Epistola ad Diognetum).

This beautiful little apology for Christianity is cited by no ancient or medieval writer, and came down to us in a single MS., which is in Maggiolo in Strasbourg (1870). The identification of Diognetus with the teacher of Marcus Aurelius, who bore the same name, is at most plausible. The author's name is unknown, and the date is anywhere between the Apostles and the age of Constantine. It was clearly composed during a severe persecution. The manu-
DIONYSIUS

script attributed it with other writings to Justin Martyr; but that earnest philosopher and pious writer was quite incapable of the restrained eloquence, the smooth flow of thought, the limpid clearness of expression, which mark this epistle as one of the most perfect compositions of antiquity. The last two chapters (xi, xii) are florid and obscure, and bear no relation to the rest of the letter. They seem to be a fragment of a homily of later date. The writer of this addition describes himself as a “disciple of the Apostles”; and through a misunderstanding of these words the epistle has, since the eighteenth century, been classed with the writings of the Apostolic Fathers. The letter breaks off at the end of chapter x; it may have originally been much longer.

The writer addresses the “most excellent Diognetus”, a well-disposed pagan, who desires to know what is the religion of Christians. His worship is ridiculed, and it is shown that Jewish sacrifices and ceremonies cannot cause any pleasure to the only God and Creator of all. Christians are not a nation nor a sect, but are diffused throughout the world, though they are not of the world, but citizens of heaven; they are the sons of the invisible Creator, who sent His Child, by whom He made all things, to save man, after He has allowed man to find out his own weakness and proneness to sin and his incapacity to save himself. The last chapter is an exposition, “first” of the love of the Father, and “secondly” by the Son; but this is lost. The style is harmonious and simple. The writer is a practised master of classical eloquence, and a fervent Christian. There is no resemblance to the public apologies of the second century. A closer affinity is with the “Ad Donatum” of Justin, which is an inquiry addressed to a judge, on the Son; but this is lost. The style is harmonious and simple. The writer is a practised master of classical eloquence, and a fervent Christian. There is no resemblance to the public apologies of the second century. A closer affinity is with the “Ad Donatum” of Justin, which is an inquiry addressed to a judge, on the Son; but this is lost. The style is harmonious and simple. DIONYSIUS, a titular see in Arabia. This city, which figures in the “Synecdemos” of Hierocles (723, 3) and Georgius Cyprius (1072), is mentioned only in Parthey’s “Prima Notitia”, about 840, as a suffragan of Bostra. Lequien (Or. christ., II, 815) gives the names of three Greek bishops, Severus, consecrated at Nicea in 325, Epiphanius at Constantia in 381, and Maras at Chaledon in 451. Another, Peter, is known by an inscription (Waddington, Inscriptions... de Syrie, no. 2327). Fifteen or sixteen titular Latin bishops are known throughout the fifteenth century (Lequien, op. cit., III, 1909; Bubel, I, 272, II, 100). The last bishop is known by an inscription with Soada, now as Suweda, the chief town of a caza in the vilayet of Damascus, where many inscriptions have been found. Soada, though an important city, is not alluded to in ancient authors under this name; inscriptions prove that it was built by a “lord builder Dionysos” and that it was an episcopal see. Soada is an ancient city, though an important one.

References to all these writers will be found in Petrie, Apost.. ed. Funk. See also Bollaert, Geschichte der altchristl. Lit., I, and bibliography in Richardson, Biblioth. Synopsis, and Chrysologue, Bio-bibl. On the date of the Donatist and the Epiphanius of Harnack, Gesch der alt-chr. Lit., I, 757. The concluding chapters are attributed to Histories, Di Pauli in Theol. Quartalschrift, LXIII (1906), I, 28.

JOHN CHAPMAN.

DIONYSIUS, SAINT, POPE, date of birth unknown; d. 26 or 27 December, 268. During the pontificate of Pope Stephen (254-57) Dionysius appears as a presbyter of the Roman Church and as such took part in the controversies regarding Acacius and in the discussions over the validity of baptism (see Baptism under sub-title Rebaptism). This caused Bishop Dionysius of Alexandria to write him a letter on baptism in which he is described as an excellent and learned man (Eusebius, Hist. eccl., VII, vii). Later, in the time of Pope Sixtus II (257-84) the same Bishop of Alexandria presented to a jurisdiction of Dionysius a letter concerning Lucianus (ibid., VII, ix); who this Lucianus was is not known. After the martyrdom of Sixtus II (6 August, 258) the Roman See remained vacant for nearly a year, as the violence of the persecution made it impossible to elect a new head. It was not until the persecution had begun to subside that Dionysius was raised (22 July, 259) to the office of Bishop of Rome. Some months later the Emperor Gallienus issued his edict of toleration, which brought the persecution to an end and gave a legal existence to the Church (Eusebius, Hist. eccl., VII, xiii). Thus the Roman Church came again into possession of its buildings for worship, its cemeteries, and other properties, and Dionysius was able to bring its administration once more into order. About 260 Bishop Dionysius of Alexandria wrote his letter to Ammonius and Euphranor against the Galileans in which he expressed himself with inexactness as to the Logos and its relation to the God the Father (see Dionysius of Alexandria). Upon this an accusation against him was laid before Pope Dionysius who called a synod at Rome about 260 for the settlement of the matter. The pope issued, in his own name and that of the council, an important doctrinal letter in which, first, the errors of
doctrine of Sabellius was again condemned and, then, the false opinions of those were rejected who, like the Marcionites, in a similar manner separate the Divine monarchy into three entirely distinct hypostases, or who represent the Son of God as a created being, while others. The doctrine of Alexandria did in his passages in the Bible, such as Deut., xxxii, 6, Prov., xviii, 22, cannot be cited in support of false doctrines such as those. Along with this doctrinal epistle Pope Dionysius sent a separate letter to the Alexandrian Bishop in which the letter was called on to explain his views. This letter was called the "Apologia" (Athanasius, De sententia Dionysii, V, xiii, De deo perfecte Nicanor synodi, xxxvi). According to the ancient practice of the Roman church Dionysius also extended his care to the faithful of distant lands. When the Christians of Cappadocia were in great distress from the marauding incursions of the Goths, the pope addressed a consolatory letter to the Church of Cesarea and sent a large sum of money by messengers for the redemption of enslaved Christians (Basilius, Epist. lxxx, ed. Garnier). The great synod of Antioch which deposed Paul of Samosata sent a circular letter to Athanasius and Bishop Maximus of Alexandria concerning its proceedings (Eusebius, Hist. eccl., VII, xxx). After death the body of Dionysius was buried in the papal crypt in the catacomb of Callistus.

Dionysius, Saint, Bishop of Corinth about 170. The date is fixed by the fact that he wrote to Pope Soter (c. 170 to 176); Harnack gives 167 to 173-5. Eusebius placed his "floris" in the eleventh year of Marcus Aurelius (171). When Hegesippus was at Corinth in the time of Pope Anicetus, Primitius was bishop (about 150-5), while Bacthylus was Bishop of Corinth at the time of the Paschal controversy (about 190-8). Dionysius is only known to us through Eusebius, for St. Jerome (De viris ill. xxvii) has used no other authority. Eusebius knew a collection of seven of the "Catholic Letters to the Churches" of Dionysius, together with a letter to him from Primitius, Bishop of Gressus, and a private letter of spiritual advice to a holy named Chrysophrone, who had written to him.

Eusebius first mentions a letter to the Macedonians, teaching orthodoxy, and enjoying peace and union. A second was to the Athenians, stirring up their faith exhorting them to live according to the Gospel, since they were not far from apostasy. Dionysius spoke of the recent martyrdom of the bishop Publius (in the persecution of Marcus Aurelius), and says that Dionysius the Areopagite was the first Bishop of Athens. To the Nicomedeans he wrote against Marcionism. Writing to Cretans and the other decese of Crete, he praised the bishop, Philip, for the ascension to hisesy. To the Church of Antioch in Pontus he wrote at the instance of Bachelides and Epistius (otherwise unknown), mentioning the bishop's name as Palmas; he spoke in this letter of marriage and continence, and recommended the charitable treatment of those who had fallen away into sin and heresy. Writing to the Creations, he recommended their bishop, Primitius, not to lay the yoke of continence too heavily on the brethren, but to consider the weakness of most. Primitius replied, after polite words, that he hoped Dionysius would send strong meat next time, that people might not grow up on the milk of babies. This severe prelate is mentioned by Eusebius (IV, xxiv) as an ecclesiastical writer, and the historian praises the tone of his letter.

But the most important letter is that to the Romans, the only one from which extracts have been preserved.

Pope Soter had sent alma and a letter to the Corinthians:—"For this has been your custom from the beginning, to do good to all the brethren in many ways, and to send alms to many Churches in different cities, now relieving the poverty of those who asked aid, now as carrying the brethren the abundance which he has supplied, and by comforting with blessed words the brethren who came to him, as a father to his children." Again: "You also by this instruction have mingled together the Romans and Corinthians who are the planting of Peter and Paul. For they both came to our Corinth and planted us, and taught alike; and alike going to Italy and teaching there, were martyred at the same time." Again: "To-day we have kept the holy Lord's day, on which we have read your letter, which we shall ever possess to read and to be admired, even as the former one written to us through Clement." The testimony to the generosity of the Roman Church is carried on by the witness of Dionysius of Alexandria in the third century; and also in the Epistle to the Romans (ed. Kon:ilienaf^r}i). For this it is still was seen in his own day in the greatest persecution. The bishops of Rome and St. Paul, are the authorities which are of first-rate importance, and so is the mention of the Epistle of Clement and the public reading of it. The letter of the pope was written to his "dear brother"

Dionysius's own letters were evidently much prized, for in the last extract he says that he wrote them by request, and that they have been falsified ""of the apostles of the devil." No wonder, he adds, that the Scriptures are falsified by such persons.

The extracts are in Eusebius, Hist. Eccl., IV, xxiv, also II, xxv (Reuth, Religionsgeschichte). See Harnack, Gesch. der Alten Kirche, I, 290 (pp. 785 are mentioned two fragments attributed to Origen, Rome may be from Dionysius's letters to Romans; they will be found in Holl, Fragmenta sacrae ecclesiasticae, and in the Canar Perseverance (Leipzig, 1896); ed. ib., i, 313. Bardenhewer, Gesch. der altchristl. Lit. I, 532.

John Chapman.

Dionysius Exiguus, the surname Exiguus, or "The Little", adopted probably in self-deprecation and not because he was small of stature, flourished in the earlier part of the sixth century, dying before the year 541. According to his friend and fellow-student, Cassiodorus (De divinis Lectionibus, c. xviii), though born a Scythian, he was in character and language Roman and thorough Catholic, most learned in both tongues—i.e. Greek and Latin—and an accomplished Scripture scholar. Much of his life was spent in Rome, where he governed a monastery as abbot. His industry was great and he did good service in translating the standard works from Latin into Greek, notably the Life of St. Pachomius, the Instructions of St. Pachomius, the Instruction of St. Pachomius of Constantinople for the Armenians, the De opificio hominis of St. Gregory of Nyssa, the history of the discovery of the head of St. John the Baptist. The translation of St. Cyril of Alexandria's synodal letters against Nestorius, and other works long attributed to Dionysius, are now acknowledged to be earlier and are assigned to Marius Mercator.

Of great importance were the contributions of Dionysius to the science of canon law, the first beginnings of which in Western Christendom were due to him. His Collectio Dionysiana embraces (1) a collection of synodal decrees, of which he has left two editions:—

(a) "Codex canonum Ecclesiae Universalis".

This contains copies of the Roman synods and councils only in Greek and Latin, including those of the four ecclesiastical councils from Nicea (325) to Chalcedon (451).

(b) "Codex canonum ecclesiasticorum Romanorum". This is in Latin only: its contents agree generally with the other, but the Council of Ephesus (431) is omitted, while the so-called "Canons of the Apostles" and those of Sardica are included, as well as 138 canons of the
DI O N Y S I U S

African Council of Carthage (419).—(c) Of another bilingual version of Greek canons, undertaken at the instance of Pope Hormisdas, only the preface has been preserved. (2) A collection of papal Constitutions (Collectio decretorum Pontificum Romanorum) from Dionysius II (384–408).

In chronology Dionysius has left his mark conspicuously, for it was he who introduced the use of the Christian Era (see CHRONOLOGY) according to which dates are reckoned from the Incarnation, which he assigned to 25 March, in the year 754 from the foundation of Rome (A.D. 754). By this method of computation he intended to supersede the "Era of Diocletian" previously employed, being unwilling, as he tells us, that the name of an impious predecessor should be thus kept in memory. The Era of the Incarnation, often called the Dionysian Era, was soon much used in Italy and, to some extent, a little later in Spain; during the eighth and ninth centuries it was adopted in England. Charlemagne is said to have been the first Christian ruler to employ it officially. It was not until the tenth century that it was employed in the papal chancery (Lersch, Chronologie, Freiburg, 1899, p. 233). Dionysius directed "three attention to the calculation of the years which so greatly occupied the early Church." To this end he advocated the adoption of the Alexandrian Cycle of nineteen years, extending that of St. Cyril for a period of ninety-five years in advance. It was in this work that he adopted the Era of the Incarnation. His works are in P. L., LXXVII, and the testimonia Cassiodorus, ibid., LXX. See also MAASE, Quellen der Lit. des, auct. Römis. im Abendlande (Graz, 1870); BARDEHWEWER, Gesch. der älteren Lit. (Freiburg im Br., 1902).

JOHN GERARD.

Dionysius of Alexandria (bishop from 217-8 to 264-5), called "the Great" by Eusebius, St. Basil, and others, was undoubtedly, after St. Cyprian, the most eminent bishop of the third century. Like St. Cyprian he was less a great theologian than a great administrator. Like St. Cyprian his writings usually took the form of letters. Both saints were converts from paganism; both were engaged in the controver-
sies as to the restoration of those who had lapsed in the Decian persecution, about Novatian, and with regard to the iteration of heretical baptism; both corresponded with the popes of their day. Yet it is curious that neither mentions the name of the other. A study of the life of Dionysius has been attempted by Bardenhewer. For the rest we are dependent on the many citations by Eusebius, and, for one phase, to the works of his great successor St. Athanasius.

Dionysius was an old man when he died, so that his birth will fall about 190, or earlier. He is said to have been of distinguished parentage. He became a Chris-
tian when still young. At a later period, when he was warned by a priest of the danger he ran in studying the books of heretics, a vision—so he informs us—assured him that he was capable of proving all things, and that this faculty he had in fact been the cause of his conver-
sion. He studied under Origen. The latter was ban-
ished by Demetrius about 231, and Heraclea took place at the head of the catechetical school. On the death of Demetrius very soon afterwards, Heraclea became bishop, and Dionysius took the headship of the church. It is then that he retained this office even when he himself had succeeded Her-
aclea as bishop. In the last years of Philip, 249, although the emperor himself was reported to be a Christian, a riot at Alexandria, roused by a popular prophet and poet, had all the effect of a severe persecution. It is descri-
based by Dionysius in a letter to his fellow-

och. The mob first seized an old man named Metras, beat him with clubs when he would not deny his faith, pierced his eyes and face with reeds, dragged him out of the city, and stoned him. Then a woman named Quinta, who would not sacrifice, was drawn along the rough pavement by the feet, dashed against mill-
stones, scourged, and finally stoned in the same sub-
urb. The houses of the faithful were plundered. Not one, so far as the bishop knew, apostatized. The aged virgin, Apollonia, after her teeth had been knocked out, sprang of her own accord into the fire prepared for her rather than utter blasphemies. Serapa-
don had all his limbs broken, and was dragged from the upper story of his own house. It was impos-
able for any Christian to go into the streets, even at night, for the mob was shouting that all who would not blaspheme should be burnt. The riot was stopped by the civil war, but the new Emperor Decius insti-
tuted a legal persecution in January 250. Dionysius describes how at Carthage the Christians rushed to sacrifice, or at least to obtain false certificates of having done so. Similarly Dionysius tells us that at Alexandria many conformed through fear, others on account of official position, or persuaded by friends; some pale and trembling at their aer, others boldly as-
serting that they had never been Christians. Some endured imprisonment for a time; others abjured only at the sight of tortures; others held out until the tortures conquered their resolution. But there were noble in-
stances of constancy. Julian and Kronion were tortured through the city, and then thrown to death. A soldier, Bessus, who protected them from the insults of the people, was beheaded. Macar, a Libyan, was burnt alive. Epimachus and Alexander, after long imprisonment and many tortures, were also burnt, with four women. The virgin Ammonaria was long tortured. The aged Mercantia and Dio-

nysia, a mother of many children, suffered by the sword. Hieron, Ater, and Isidore, Egyptians, after many tortures were given to the flames. A boy of fifteen, Dioecorus, who stood firm under torture, was dismissed by the judge by a formal act, and was cut off by hunger, thirst, cold, sickness, robbers, or wild beasts. A bishop named Charmon escaped with his σύζυγος (wife?) to the Arabian mountain, and was no more heard of. Many were carried off as slaves by the Saracens and some of these were later ransomed for large sums.

Some of the lapsed had been readmitted to Christian fellowship by the martyrs. Dionysius urged upon Fabius, Bishop of Antioch, who was inclined to join Novatian, that it was right to respect this judgment delivered by blessed martyrs who "now seated with Christ, and had all his blood and treasures with him in the judgment." He adds the story of an old man, Sera-
pion, who after a long and blameless life had sacrificed, and could obtain absolution from no one. On his death-bed he sent his grandson to fetch a priest. The priest was ill, but he gave a particle of the Eucharist to the child, telling him to moisten it and place it in the old man's mouth. Sera-
pion received it with joy, and immediately expired. Sabinus, the prefect, sent a frumentarius (detective) to search for Dionysius directly the decree was published; he looked everywhere in Dionysius's own house, where the saint had quietly remained. On the fourth day he was inspired to depart, and he left at night, with his domestics and certain brethren. But it seems that he was soon made prisoner, for soldiers escorted the whole party to Ta-
posiris in the Marcots. A certain Timotheus, who had not been taken with the others, informed a passing
countryman, who carried the news to a wedding-feast he was attending. All instantly rose up and rushed to release the bishop. The soldiers took to flight, leaving their prisoners on their uncleaned litters. Dionysius, believing his rescuer to be robbers, held out his clothes to them, retaining only his tunic. They urged him to rise and fly. He begged them to leave him, declaring that they might as well cut off his head at once, as the soldiers would shortly do so. He let himself down on the ground on his back; but they seized him by the hands and feet and dragged him away, carrying him out of the little town, and setting him on an ass without a saddle. With two companions, Gaius and Peter, he remained in a desert place in Libya until the persecution ceased in 251. The whole Christian world was then thrown into confusion by the news that Novatian claimed the Bishopric of Rome in opposition to Pope Cornelius. Dionysius at once took the side of the latter, and it was largely by his influence that the whole East, after much disturbance, was brought in a few months into unity and harmony. Novatian wrote to him for support. His curt reply has been preserved entire: Novatian can easily prove the truth of his assertion that he was martyred; and he will by voluntarily retiring: he ought to have suffered martyrdom rather than divide the Church of God; indeed it would have been a particularly glorious martyrdom on behalf of the whole Church (such is the importance attached by Dionysius to a schism at Rome); if he should now persuade his followers the Roman Church to take the past will be forgotten; if not, let him save his own soul. St. Dionysius also wrote many letters on this question to Rome and to the East; some of these were treated on penance. He took a somewhat milder view than Cyprian, for he gave greater weight to the ancient and received arguments of the Roman Church, the author of the martyrdom, and refused forgiveness in the hour of death to none.

After the persecution the pestilence. Dionysius describes it more graphically than does St. Cyprian, and he reminds us of Thucydides and Defoe. The heathen thrust their dead into the throes of the bodies half dead into the streets; yet they suffered more than the Christians, whose heroic acts of mercy are recounted by their bishop. Many priests, deacons, and persons of merit died from succouring others, and this death, writes Dionysius, was in no way a martyrdom. The baptismal ceremony spread from Africa throughout the East. Dionysius was far from teaching, like Cyprian, that baptism by a heretic rather beforals than clearer; but he was impressed by the opinion of many bishops and some councils that repetition of such a baptism was necessary, and it appears that he besought Pope Stephen not to break off communion with the Churches of Asia on this account. He also wrote on the subject of Dionysius of Rome, who was not yet pope, and to a Roman named Pheilonem, both of whom had written to him. He knows seven letters from him on the subject, two being addressed to Pope Sixtus II. In one of these he asks advice in the case of a man who had received baptism a long time before from heretics, and now declared that it had been improperly performed. Dionysius had refused to renew the sacrament after the lapse of so many years even in the Holy Eucharist; he asked the pope's opinion. In this case it is evident that the difficulty was in the nature of the ceremonies used, not in the mere fact of their having been performed by heretics. We gather that Dionysius himself followed the Roman custom, either by the tradition of the Church, or else out of obedience to the decrees of Stephen. In 253 Origen died; he had not been at Alexandria for many years. But Dionysius had not forgotten his old master, and wrote a letter in his praise to Theoctemus of Cesarea.

An Egyptian bishop, Nepos, taught the Chiliastic error that there would be a reign of Christ upon earth for a thousand years, a period of eternal delights; he founded this doctrine upon the Apocalypse in a book entitled "Refutation of the Allegorizers." It was only after the death of Nepos that Dionysius found himself obliged to write two books "On the Promises" to counteract this error. He treats Nepos, and refutes his doctrine, as indeed the Church has done since, though it was taught by Papias, Justin, Irenæus, Victorinus of Pettau, and others. The diocese proper to Alexandria was still very large (though Heraclas is said to have instituted new bishoprics), and the Arsinoite nome formed a part of it. But the persecution was very severe in the villages, and St. Dionysius went in person to the villages, called together the priests and teachers, and for three days instructed them, refuting the arguments they drew from the book of Nepos. He was much edified by the docile spirit and love of truth which he found. At length Korakion, who had introduced the book and the doctrine, declared himself convinced. The chief interest of the incident is not in the picture it gives of ancient Church life and of the wisdom and gentleness of the bishop, but in the remarkable disquisition, which Dionysius appends, on the authenticity of the Apocalypse. It is a very striking example of "higher criticism", and for clearness, precision, and keenness and insight, is hardly to be surpassed. Some of the brethren, he tells us, in their zeal against Chaldean error, repudiated the Apocalypse altogether, and took it chapter by chapter to ridicule it, attributing the authorship of it to Cerinthus (as we know, St. Irenæus says he did some years before the apostles), and Dionysius treats it with reverence, and declares it to be full of hidden mysteries, and doubtless really by a man called John. (In a passage now lost, he showed that the book must be understood allegorically.) But he found it hard to believe that the writer could be the author of Zech. and that the Catholic Epistle, on account of the great contrast of character, style, and "what is called working out," shows that the one writer calls himself John, whereas the other only refers to himself by some periphrasis. He adds the famous remark, that "it is said that there are two tombs in Ephesus, both of which are called that of John." He demonstrates the close likeness between the Gospel and the Epistle, and points out the wholly different vocabulary of the Apocalypse; the latter is full of solemnities and barbarisms, whereas the former are in good Greek. This acute criticism was unfortunate in his time. It was the use of the frequent rejection of the Apocalypse in the Greek-speaking Churches, even as late as the Middle Ages. Dionysius's arguments appeared unanswerable to the liberal critics of the nineteenth century. Lately the swing of the pendulum has brought many, guided by Bousset, Harnack, and others, to be impressed rather than by the undeniable points of contact between the Gospel and the Apocalypse, than by the differences of style (which can be explained by a different scribe and interpreter, since the author of both books was certainly a Jew), so that even Loisy admits that the opinion of the reformed and liberal conservative scholars "no longer appears impossible." But it should be noted that the modern critics have added nothing to the judicious remarks of the third-century patriarch.

The Emperor Valerian, whose accession in 253, did not persecute until 257. In that year St. Cyprian was banished to Curibus, and St. Dionysius to Nepi, in the Marcicots, after being tried, together with one priest and two deacons, before Emilius, the prefect of Egypt. He himself relates the facts in his letter to the prefect, writing to defend himself against a certain Germanus, who had granted him permission to make this disgraceful flight. Cyprian suffered in 258, but Dionysius was spared, and returned to Alexandria directly toleration was decreed by Gallienus in 260. But not to peace, for in 261-2 the city was in a state of tumult little less dangerous than a persecution. The great
DIONYSIUS the Pseudo-Areopagitc.—By “Dionysius the Areopagite” is usually understood the judge of the Areopagus who, as related in Acts, xvii, 34, was converted to Christianity by the preaching of St. Paul, and according to Dionysius of Corinth (Eusebius, Hist. Eccl., IV, ii, 36, with Athenaeus, xvi, 465 B), was the first Bishop of Athens. Some time, however, two errors of far-reaching importance arose in connexion with this name. In the first place, a series of famous writings of a rather peculiar nature was ascribed to the Areopagite and, secondly, he was popularly identified with the holy martyr of Gaul, Dionysius (of Paris), the first Bishop of that city. It is not to take up directly the latter point: we shall concern ourselves here (1) with the person of the Pseudo-Areopagite; (2) with the classification, contents, and characteristics of his writings; (3) with their history and transmission; under this head the question as to the genuineness, origin, and gradual spread of these writings will be answered.

Deep obscurity still hovers about the person of the Pseudo-Areopagite. External evidence as to the time and place of his birth, his education, and later occupation is entirely wanting. Our only source of information regarding this problematic personality is the writings themselves. The clues furnished by the first appearance and by the character of the writings enable us to conclude that the author belongs at the very earliest to the latter half of the fifth century, and that, in all probability, he was a native of Syria. His thoughts, ideas, and phrases, have expressed a great familiarity with the works of the neo-Platonists, especially with Plotinus and Proclus. He is also thoroughly versed in the sacred books of the Old and the New Testament, and in the works of the Fathers as far as Cyril of Alexandria.

(Passages from the Areopagite writings are indicated by title and chapter. In this article D. D. N. stands for “De divina nominibus”; C. H. for “Celestis hierarchia”; E. H. for “Ecclesiastica hierarchia”; Th. M. for “Theologia mystica”, which are all found in Migne, P. G., vol. III.) In a letter to Polyarp (Ep. vii; P. G., III, 1050 A) and in “Ciel hier,” 3; P. G., III, 260 D) he intimates that he was formerly a pagan, and this seems quite probable, considering the peculiar character of his literary work.

But one should be more cautious in regard to certain other personal references, for instance that he was the teacher of the first Bishop of Athens, Dionysius wrote to the Church of Antioch on the subject, as he was obliged to decline the invitation to attend a synod there, on the score of his age and infirmities. He died soon afterwards.

St. Dionysius is in the Roman Martyrology on 17 Nov., but he is also intended, with the companions of the Declan mission, by the rubric in the Loisiine Martyrology on 3 Oct.: Dionysius, Faustus, Gaius, Peter, and Paul, Martyrs(). The same error is found in Greek menologies.

JOHN CHAPMAN.
and Mark, xv, 33; the latter refers to apoplyphic descriptions of the "Dormition of Mar." For the same purpose, i.e. to create the impression that the author belonged to the times of the Apostles and that he was acquainted with the Areopagite mentioned in the Acts, the passages are taken from the writings of Clement, Paul, Timothy, Titus, Justus, and Corpus, with whom he is supposed to be on intimate terms, figure in his writings.

The doctrinal attitude of the Pseudo-Areopagite is not clearly defined. A certain vagueness, which was perhaps intended, is characteristic of his Christology, especially in the question concerning the two natures in Christ. We may well surmise that he was not a stranger to the later, and rather modified, form of Monophysitism and that he belonged to that conciliatory group which sought, on the basis of the Henotic issue in 482 by the Emperor Zeno (Evagrius, Hist. Eccl., III, xiv), to reconcile the extremes of orthodoxy and heresy. This reserved, indefinite attitude of the author explains the remarkable fact that opposite factions claimed him as an adherent. As to his social rank, a careful comparison of certain details through his works shows that he belonged to the class of scholars who were known at the time as "schoiastic.

The writings themselves form a collection of four treatises and ten letters. The first treatise, which is also the most important in scope and content, presents in four chapters an exposition of the doctrine of the names. Setting out from the principle that the names of God are to be learned from Scripture only, and that they afford us but an imperfect knowledge of God, Dionysius discusses, among other topics, God's goodness, being, life, wisdom, power, and justice. The one underlying thought of the whole, recurring, so to say, again under different forms and phrases, is: God, the One Being (ο ίδα), transcending all quality and predication, all affirmation and negation, and all intellectual conception, by the very force of His love and goodness gives to beings outside Himself their countless gradations, unites them in the closest bonds (σύνοπλοιο), keeps each by His care and direction in its appointed sphere, and draws them again in an ascending order to Himself (εντοποιήσα). While he illustrates the inner life of the Trinity by metaphors of blossom and light applied to the Second and Third Persons (D. D. N., v, 7 in P. G., III, 712 B), Dionysius' presentation of all created things from God by the exaltation of being in the Godhead (ο ιδα), its outpouring and overflow (D. D. N., i, 9 in P. G., III, 909 C; cf. ii, 10 in P. G., III, 648 C; xii, 10 in P. G., III, 977 B), and as a flashing forth from the sun of the Deity (D. D. N., iv, 6 in P. G., III, 701 B; iv, 1 in P. G., III, 603 B), exactly according to their physical nature created things absorb more or less of the radiated light, which, however, grows weaker the farther it descends (D. D. N., xi, 2 in P. G., III, 592 A; 1 in P. G., III, 588 C). The mighty root sends forth a multitude of plants which, as it were, clasp them. In fact, all these things owe their origin and creation to the All-Ruling Deity (D. D. N., x, 1 in P. G., III, 936 D). Patterned upon the original of Divine love, righteousness, and peace, is the harmony that pervades the universe (D. D. N., chapters iv, viii, xii). All things tend to God, and in Him all are gathered and completed, just as the circle returns into itself (D. D. N., iv, 14 in P. G., III, 712 D), as the radii are joined in the centre, or as the numbers are contained in unity (D. D. N., v, 6 in P. G., III, 589 sq.). These and many similar expressions are given rise to frequent charges of Pantheism against the author. But in reality, he does not assert a necessary emanation of things from God, but admits a free creative act on the part of God (D. D. N., iv, 10 in P. G., III, 708 B; cf. i, iv, 1 in P. G., III, 177 C); still the echo of neo-Platonism is unmistakable.

The same thoughts, or their applications to certain orders of being, recur in his other writings. The second treatise develops in fifteen chapters the doctrine of the celestial hierarchy, comprising nine angelic choirs which are divided into closer groupings of three choirs each (triads). The names of the nine choirs are taken from the books of letters. In the case of the choirs, Paul, Timothy, Titus, Justus, and Corpus, with whom he is supposed to be on intimate terms, figure in his writings.

The third treatise is not continuous, but a continuous discussion of the hierarchical classifications and their purposes, and of the various departments of the Church and the Church, and which pictures Christ as its Head, holy and supreme, Dionysius treats of three sacraments (baptism, the Eucharist, extreme unction), of the three grades of the Teaching Church (bishops, priests, deacons), of three grades of the "Learning Church" (monks, people, and the class composed of catechumens, energumens, and penitents), and, lastly, of the burial of the dead (C. H., iii, 3; 6 in P. G., III, 436 sq.; vi in P. G., III, 529 sq.). The main purpose of the author is to disclose and turn to the uses of contemplation the deeper mystical meaning which underlies the sacred rites, ceremonies, institutions, and symbols. The fourth treatise is entitled "Mystical Theology", and presents in five chapters guiding principles concerning the mystical union with God, which is entirely beyond the compass of sensuous or intellectual perception (πνεύματα). The ten letters, four addressed to a monk, Paus, and six to a priest, Sopater, to the bishop, Polycarp, to a monk, Demophilus, to the bishop, Titus, and to the Apostle John, contain, in part, additional or supplementary remarks on the above-mentioned principal works, and in part, practical hints for dealing with sinners and unbelievers. Since in all these writings the same salient thoughts on philosophy and theology recur with the same striking peculiarities of expression and with manifold references, both formal and matter, from one work to another, the assumption is justified that they are all to be ascribed to the same author. The first appearance in the literary world the entire corpus of these writings was assembled as it is now. An eleventh letter to Apollonius, given in Migne, P. G., III, 1119, is a medieval forgery based on the seventh letter. Apocryphal, also, are a letter to Timothy and a second letter to Titus.

Dionysius would lead us to infer that he is the author of still other learned treatises, namely: "Theological Outlines" (D. D. N., ii, 3 in P. G., III, 640 B); "Sacred Hymns" (C. H., vii, 4 in P. G., III, 212 B); "Symbolic Theology" (C. H., v, 6 in P. G., III, 336 A), and treatises on "The Righteous Judgment of God" (D. D. N., not, 355 B); on "The Soul" (D. D. N., iv, 2 in P. G., III, 706 B); and on "The Objects of Intellect and Sense" (E. H., i, 2 in P. G., III, 373 B). No reliable trace, however, of any of these writings has ever been discovered, and in his references to them Dionysius is not uncontrollable as in
DIONYSIUS

his citations from Hierotheus. It may be asked if these are not fictions pure and simple, designed to strengthen the belief in the genuineness of the actually published works. This suspicion seems to be more warranted because of other discrepancies, e.g. when Dionysius' letter to Timothy, extols the latter as a "θεοτόκος, ἔξωθεν, ἄνωθεν λόγῳ", nevertheless seeks to instruct him in those sublime secret doctrines that are for bishops only (E. H. I. 5 in P. G. III. 377 A), doctrines, moreover, which, since the cessation of the Disciplina Arcani, had already been veiled public. Dionysius again quotes (D. D. N. III. 2 in P. G. III. 681 B; cf. E. H. IV. 2 in P. G. III. 476 B) that his writings are intended to serve as catechetical instruction for the newly-baptized. This is evidently another contradiction of his above-mentioned statement.

We may now turn to the history of the pseudo-Dionysian writings. This embraces a period of almost fifteen hundred years, and three distinct turning points in its course have divided it into as many distinct periods: first, the period of the gradual rise and settlement of the writings in Christian literature, dating back from the latter part of the fifth century to the Larraian Council, 449; second, the period of the highest and universally acknowledged authority, both in the Western and Eastern Church, lasting till the beginning of the fiftieth century; third, the period of a continual clash waged about their authenticity, begun by Laurencius Valla, and closing only within recent years. The writings were for fifteen years supposed to have made their first appearance, or rather to have been first noticed by Christian writers, in a few pseudo-epigraphical works which have now been proved to be the products of a much later period; as, for instance, in the following: Pseudo-Origenes, "Homilia in diversa sexa"; Pseudo-Athanasius, "Areopagite Antiochus duces", VII. vili; Pseudo-Hippolytus, against the heretic Beron; Pseudo-Chrysostom, "Sermon de pseudo-prophetis". Until quite recently more credence was given to other lines of evidence on which Franz Hippel endeavoured to support his entirely new thesis, to the effect that the author of the writings lived about the year 375 in Egypt, as Abbot of Rhinokorura. Hippel's attempts, however, at removing the textual difficulties, ἀλληλογραφία, εὔμνημα, proved to be unsuccessful. In fact, those very passages in which Hippel supposed that the Patristics had made use of the Areopagite (e.g. in Gregory of Nazianzus and Jerome) do not tell in favour of his hypothesis; on the contrary, they are much better explained if the converse be assumed, namely, that Pseudo-Dionysius drew from them. Hippel himself, convinced by the results of recent research, has abandoned this opinion. Other events also, both historical and literary, evidently exerted a marked influence on the Areopagite: (1) the Council of Chaledon (451), the Christological terminology of which was studiously followed by Dionysius; (2) the writings of the neo-Platonist Proclus (411-486), from whom Dionysius borrowed most of his ideas, chiefly as to the purpose of the Areopagite; (3) his introduction of the Credo into the liturgy of the Mass, which is alluded to in the "Ecclesiastical Hierarchies" (III. 2, in P. G. III. 425 C, and III. 7, in P. G. III. 430 C); cf. the explanation of Maximus in "the Proconsul", in his letter to Timonius of the Emperor Zeno (482), a formula of union designed for the bishops, clerics, monks, and faithful of the Orient, as a compromise between Monophysitism and orthodoxy. Both in spirit and tendency the Areopagite correspondence fully to the sense of the Henotic; and one might easily infer that they not only originated in the Orient, but that they were made further the purpose of the Henotic.

The result of the foregoing is that the first appearance of the pseudo-epigraphical writings cannot be placed earlier than the latter half, in fact at the close, of the fifth century.

Having ascertained a terminus post quem, it is possible by means of evidence taken from Dionysius himself to fix a terminus ante quem, thus narrowing to about thirty years the period within which these writings must have originated. The earliest reliable citations from the writings of Dionysius are from the end of the fifth and beginning of the sixth century. The first is by Severus, the head of a party of moderate Monophysitism named after him, and Patriarch of Antioch (512-518). In a letter addressed to a certain abbot, John (Mai, Script. vet. nov. coll. VII. 1, 71), he quotes in proof of his doctrine of the μνήμη τῶν ἁρμάτων in Christ the Dionysian Ep. iv (P. G. III. 1072 C), where a καὶ τινὰς βασιλείας ἐντύνεται is mentioned. Again, in the treatise "Adversus anathem. Juliani Halicarn." (Cod. Syr. Vet. 140, fol. 100 b), Severus cites a passage from D. D. N. ii. 9, P. G. III. 648 A (καὶ ἤτοι τὸ άγάλημα_οίσιν διακατορρέοντο, and returns once more to Ep. iv. In the Syrian "History of the Church" of Zacharias (ed. Ahrens-Krüger, 134-5) it is related that Severus, a man well-versed in the writings of Dionysius (Areop.), was present at the Synod of Tyre (513). Andreas, Bishop of Cessarea in Cappadocia, wrote (about 520) a commentary on the Apostle Paul, wherein he confines the period of the Areopagite four times and makes use of at least three of his works (Migne, P. G. CVI. 257, 305, 356, 780; cf. Diekamp in "Hist. Jahrb." XVIII, 1897, pp. 1-36). Like Severus, Zacharias Rhetor and, in all probability, also Andreas of Cappadoxes, inclined to Monophysitism (Diekamp, vii. 228, 230), was accustomed to quote the Areopagite as authority for the orthodox teaching (P. G. III. 795). So also Ephrem, Archbishop of Antioch (357-374), interprets in a right sense the well-known passage from D. D. N. i. 4, P. G. III. 529 A: "ἀπὸ πάντοτο Ἱεροσολύμων συνετεχθέν, δι' ἑξισορροπίαν καὶ συνετοῦσα σωτηρία αυτοῦ. Between the years 352-358, if not earlier, John of Scythopolis in Palestine wrote an interpretation of Dionysianus (Pitina, "Anakletus", 1901, 257, 270 sqq.) from an anti-Syrian standpoint. In Leontius of Byzantium (485-548) we have another important witness. This eminent champion of Catho- lice doctrine in at least four passages of his works builds on the μνήμη Δαυίδos (P. G. LXXV, 1213 A; 1288 C; 1304 D; Canisius-Basnage, "Thesaur. monum. eccles.", Antwerp, 1725, I. 571). Sergius of Resina in Mesopotamia, archiater and presbyter (d. 536), at an early date translated the works of Dionysius into Syriac. He admitted their genuineness, and for his defence also translated into Syriac the already current "Apologies" (Brit. Mus. cod. add. 1251 and 22370; cf. Zacharias Rhetor in Ahrens-Krüger, p. 208). He himself was a Monophysite.

By far the most important document in the case is the report given by Bishop Maximus of Moravia of the religious debate held at Constantinople in 533 between seven orthodox and seven Severian speakers (Har- douin, II. 1159 sqq.). The former had as leader and spokesman Hypatius, Bishop of Ephesus, who was thoroughly versed in the literature of the subject. On the second day the "Orientalis" (Severians) accused against the Council of Chaledon, that it had by a novel and erroneous expression **συνέτοσσα** three natures in Christ. Besides Cyril of Alexandria, Athanasius, Gregory Thaumaturgus, and Felix and Julius of Rome, they also quoted Dionysius the Areopagite as an exponent of the doctrine of one nature. Hypatius re-
DIONYSIUS

over to the Latin literature, is Liberatus of Carthage (Breviarium cause Nestor, et Eutych, ch. vi). Joanna Maladas, of Antioch, who died about 545, narrates, in his "Universal Chronicle", the conversion of the judge of the Areopagus through St. Paul (Acts, xvi, 32-34), and praises his inner spiritual life as a spiritual and antagonist of the Greeks (P. G., XVII, 381; cf. Krumbaher, Gesch. d. Byz. Lit., 3rd ed., p. 112 sq.). Another champion was Theodore, presbyter. Though it is difficult to locate his chronologically, he was, according to Le Nourry (P. G., III, 496), an "auctor antiquus" who flourished, at all events, before the Lateran Council in 649 and, as we learn from Photius (P. G., cIII, 44 sq.), undertook to defend the genuineness of the Areopagic writings. The repute, moreover, of these writings was enhanced in a marked degree by the following eminent churchmen: Eulogius, Patriarch of Alexandria (580-607), knew and quoted, among others, the D. D. N., viii, 2; verbatim (P. G., cIII, 1061; cf. Der Katholik, 1807, II, p. 95 sq.). From Eulogius we naturally pass to Pope Gregory the Great, with whom he enjoyed a close and honourable friendship. Gregory the Great (590-604), residing finally on Lake Trasimene, the thirty-four years of his pontificate, states we have been all the more valuable. Hereupon the Severians dropped this objection and turned to another.

The fact must, indeed, appear remarkable that these writings, though rejected outright by such an authority as Hesychius, were within little more than a century looked upon as genuine by Catholics, so that they could be used against the heretics during the Lateran Council in 649 (Hardouin, III, 600 sq.). How had this revision been brought about? As the following group will show, it was chiefly heterodox writers. Monophysites, Nestorians, and Monothelites, who during several decades appealed to the Areopagitica. But among Catholics also there were not a few who assumed the genuineness, and as some of these were persons of consequence, the way was gradually paved for the authorization of his writings in the above-mentioned council. To the group of Monophysites belonged: Thinform, deacon in Alexandria about 557 (Hardouin, III, 784, 883 sq., 1240 sq.); Cuthbert of Alexandria, about 540 (Hefele, LXXVI, 788, 813, 848); John Philoponus, an Alexandrian grammairian, about 546-549 (W. Reichardt, "Philoponus, de opificio mundi"); Petrus Callinicus, Monophysite Patriarch of Antioch, in the latter half of the sixth century, cited Dionysius in his polemic against the Patriarch Damascius of Alexandria (II, xii and xlvii; cf. Frothingham, op. cit., after Cod. Syr. Vat., 108, f. 282 sqq.). As examples of the Nestorian group may be mentioned Joseph Huzaja, a Syrian monk, teacher about 360 at the school of Nisibis (Assenmacher, Bibli. orient., vol. III, pt. I, p. 183) also Ischoreb, ca. 560 (Hardouin, III, 680 sqq.); Procopius "Buch der Synodien", p. 229 sqq.; and John of Apamea, a monk in one of the monasteries situated on the Orontes, belonging most probably to the sixth century (Cod. Syr. Vat., 34). The heads of the Monothelites, Sergius, Patriarch of Constantinople (610-638), Cyrus, Patriarch of Alexandria (630-641), Porphyrion, the successor of Cyrus in Constantinople (630-641), took as the starting point in their heresy the fourth letter of Dionysius to Caius, wherein they altered the oft-quoted formula, θεοσθεοσθεος into μια θεοσθεοσθεος.

To glance briefly at the Catholic group we find in the "Historia Euthymii", written about the middle of the sixth century, a passage taken, according to a citation of John Damascene (P. G., XCVI, 748), from D. D. N., i, 2, P. G., III, 682 D. παραθές δι’-εταρτοις.

Another witness, who at the same time lends his approbation to all these citations, and showed that Cyril never made the slightest use of them, though on various occasions they would have served his purpose admirably. He suspects that these falsifiers are Apollinarists. When the Severians rejoined that they could point out the philosophical writings of Cyril which the Donatists and Theodore the use made of such evidence, Hesychius persisted in the stand he had taken: "sed nunc videtur quoniam et in illis libris [Cylliri] heretici falsantes addiderunt eam.

The references to the archives at Alexandria had just as little weight with him, since Alexandria, with its libraries, had long been in the hands of the heretics. How could an interested party of the opposition be introduced as a witness? Hesychius refers again especially to Dionysius and successfully puts down the opposition: "illa enim testimonia quae vos Dionysii Areopagitis dicitis, unde potestis ostendere vera esse, sicut sparscimini? Si enim eius erat, non potes sine latere beatum Cyrillum. Quod autem de beato Cyrillo dico, quando et beatus Athanasius, si pro certo separent eius fuisset, ante omnin in Niceno concilio de consubstantiali Trinitate eadem testimonia protulisset adversus Aril diversa substantiae philosophiae. Indeed, as the last forty years of the life of the Father and the Son the Areopagitica has statements that leave no room for misinterpretation; and had these come from a disciple of the Apostles, they would have been all the more valuable. Hereupon the Severians dropped this objection and turned to another.

The fact must, indeed, appear remarkable that these writings, though rejected outright by such an authority as Hesychius, were within little more than a century looked upon as genuine by Catholics, so that they could be used against the heretics during the Lateran Council in 649 (Hardouin, III, 600 sq.). How had this revision been brought about? As the following group will show, it was chiefly heterodox writers. Monophysites, Nestorians, and Monothelites, who during several decades appealed to the Areopagitica. But among Catholics also there were not a few who assumed the genuineness, and as some of these were persons of consequence, the way was gradually paved for the authorization of his writings in the above-mentioned council. To the group of Monophysites belonged: Thinform, deacon in Alexandria about 557 (Hardouin, III, 784, 883 sq., 1240 sq.); Cuthbert of Alexandria, about 540 (Hefele, LXXVI, 788, 813, 848); John Philoponus, an Alexandrian grammairian, about 546-549 (W. Reichardt, "Philoponus, de opificio mundi"); Petrus Callinicus, Monophysite Patriarch of Antioch, in the latter half of the sixth century, cited Dionysius in his polemic against the Patriarch Damascius of Alexandria (II, xii and xlvii; cf. Frothingham, op. cit., after Cod. Syr. Vat., 108, f. 282 sqq.). As examples of the Nestorian group may be mentioned Joseph Huzaja, a Syrian monk, teacher about 360 at the school of Nisibis (Assenmacher, Bibli. orient., vol. III, pt. I, p. 183) also Ischoreb, ca. 560 (Hardouin, III, 680 sqq.); Procopius "Buch der Synodien", p. 229 sqq.; and John of Apamea, a monk in one of the monasteries situated on the Orontes, belonging most probably to the sixth century (Cod. Syr. Vat., 34). The heads of the Monothelites, Sergius, Patriarch of Constantinople (610-638), Cyrus, Patriarch of Alexandria (630-641), Porphyrion, the successor of Cyrus in Constantinople (630-641), took as the starting point in their heresy the fourth letter of Dionysius to Caius, wherein they altered the oft-quoted formula, θεοσθεοσθεος into μια θεοσθεοσθεος.

To glance briefly at the Catholic group we find in the "Historia Euthymii", written about the middle of the sixth century, a passage taken, according to a citation of John Damascene (P. G., XCVI, 748), from D. D. N., i, 2, P. G., III, 682 D. παραθές δι’-εταρτοις.

Another witness, who at the same time lends
DIONYSIUS

17

DIONYSIUS

authorization of the Areopagitics. A lover of theologico-mystical speculation, he showed an uncommon reverence for these writings, and by his glosses (P. G., IV), in which he explained dubious passages of Dionysius, in the orthodox sense, he contributed greatly towards the recognition of Dionysius in the Middle Ages. Another equally indefatigable champion of Dyonysianism was Anastasius, a monk from the monastery of Sinai, who in 640 began his chequered career as a wandering preacher. Not only in his “Guide” (μέτρητον), but also in the “Questions” and in the seventh book of the “Meditations on the Holy Apocalypse,” he unhesitatingly makes use of different passages from Dionysius (P. G., LXXXIX). By this time a point had been reached at which the official seal, so to speak, could be put upon the Dionysian writings. The Lateran Council of 649 solemnly rejected the Monothelite heresy (Hardouin, III, 609 sqq.). Pope Martin I quotes from the D. D. N., ii, 9; iv, 20 and 23; and the “Ep. ad Caecum”; speaks of the author as “beata memoria Dionysii,” “Dionysii egregius, sanctus, beatus,” and vigorously objects to the perversion of the text: una instead of mona dei et hominum. The influence which Maximus exerted by his personal appearance at the council and by his above-mentioned explanation of θεου τού παρθένου εἰκονος is easily recognized (“Dionysius duplicem [operationem] duplicae naturae compositivo sermone abusus est.” Hardouin, III, 787). Two of the testimonies of the Fathers which were read in this session are taken from Dionysius. Little wonder, then, that from thenceforth no doubt was expressed concerning the genuineness of the Areopagitics. Pope Agatho, in a dogmatic epistle directed to the Emperor Constantine (680) cites among other passages from the Fathers on the D. D. N., ii, 6. The Sixth Ecumenical Council of Constantineople (680) followed in the footsteps of the Lateran Synod, again defended “Ep. iv ad. Caecum” against the falsification of Pyrrhus, and rejected the meaning which the Monothelite Patriarch Macarius assigned to the passage (Hardouin, III, 1090, 1346, 1086). In the second Council of Nicaea (787) we find the “Celestial Hierarchy” of “dei firmon Dionysii” cited against the Iconoelasts (Hardouin, IV, 362). This finishes the first and darkest period in the history of the Areopagitics; and it may be summarized as follows. The Dyonysian writings appeared at the right time in the Monophysite controversies. The Severians made use of them first and were followed by the orthodox. After the religious debate at Constantinople in 533 witnesses for the genuineness of the Areopagitics began to increase among the different heretics. Despite the opposition of Hypatius, Dionysius did not altogether lose his authority even among Catholics, which was due chiefly to Leontius and Ephrem of Antioch. The number of orthodox Christians who defended him grew steadily, comprising high ecclesiastical dignitaries who had come from monasteries. Finally under the influence of Maximus. The Sixth Ecumenical Council (649) cited him as a competent witness against Monothelism.

As to the second period, universal recognition of the Areopagitic writings in the Middle Ages, we need not mourn the Greek Church, which is especially proud of him; but neither in the West was a voice raised in challenge down to the first half of the fifteenth century; on the contrary, his works were regarded as exceedingly valuable and even as sacred. It was believed that St. Paul, who had communicated his revelations to St. Peter in Athens, spoke through these writings (Histor. Blätter, CXXV, 1900, p. 541). As there is no doubt concerning the fact itself, a glance at the main divisions of the tradition may suffice. Rome received the original text of the Areopagita undoubtedly through Greek monks. The oppressions on the part of Islam during the sixth and seventh centuries compelled many Greek and Oriental monks to abandon their homes and settle in Italy. In Rome itself, a monastery for Greek monks was built under Stephen II and Paul I. It was also Paul I (757-767) who in 757 sent the writings of Dionysius, together with other books, to Pepin in France. Adrian I (772-795) also mentioned Dionysius as a testis praedicatarius in a letter accompanying the Latin translation of the Acts of the Nicanor Council (787) which he sent to Charlemagne. During the first half of the ninth century the facts concerning Dionysius are mainly grouped around the Abbé Hildegard of Saint-Denis at Paris. Through the latter the false idea that the Gallic martyr Dionysius of the third century, whose relics were preserved in the monastery of Saint-Denis, was identical with the Areopagite rose to an undoubted certainty, while the works ascribed to Dionysius gained in repute.

Through a legation from Constantinople, Michael II had sent several gifts to the Frankish Emperor Louis the Pious (827), and among them were the writings of the Areopagite, which gave particular joy and honour to Hildegard, the influential arch-chaplain of Louis. Hildegard knew well to have them translated into Latin and he himself wrote a life of the saint (P. L., CVI, 13 sq.). About the year 900 the works of Dionysius, translated into Greek, made a new Latin translation of the Areopagite, which became the main source from which the Middle Ages obtained a knowledge of Dionysius and his doctrines. The work was undertaken at the instance of Charlemagne, who sent to Matthaeus Scotus and enjoyed great influence (P. L., CXXII, 1026 sq.; cf. Traube, “Poet. lat. av. Carol.”, II, 520, 859 sq.). Compared with Hildegard’s, this second translation marks a decided step in advance. Scotus, with his keen dialectical skill and his soaring speculative mind, found in the Areopagite a kindred mind. Despite many errors of translation due to the obscurity of the Greek original, he was able to grasp the connections of thought and to penetrate the problems. As he accompanied his translations with explanatory notes and as, in his philosophical and theological writings, particularly in the work “De divisione naturae” (P. L., CXXII), he recurs again and again to Dionysius, it is readily seen how much he did towards securing recognition for the Areopagite.

The works of Dionysius, thus introduced into Western literature, were readily accepted by the medieval Scholastics. The great masters of the thirteenth century, in particular those of Paris, foremost among them the much-admired Hugh, based their teaching on the doctrine of Dionysius. Peter Lombard and the greatest Dominican and Franciscan scholars, Alexander of Hales, Albertus Magnus, Thomas Aquinas, Bonaventure, adopted his theses and arguments. Master poets, e.g. Dante, and historians, e.g. Otto of Freising, built on his foundations. Scholars as renowned as Robert Grosseteste of Lincoln and Vincent of Beauvais drew upon him freely. Popular religious books, such as the “Legenda aurea” of Giacomo da Varagine and the “Life of Mary” by Brother Philip, gave him a cordial welcome. The great mystics, Eckhart, Tauler, Suso, and others, entered the mysterious obscurity of the writings of Dionysius with a holy reverence. In rapid succession there appeared a number of translations: Latin translation by Johannes Sacramenius (1170), Robert de Grosseteste (about 1220), Thomas Vincentinus (1400), Ambrosius Camaldulensis (1436), Marsilius Feicinus (1492); in the sixteenth century those of Faber Stapulensis, Periornius, etc. Among others, St. Thomas of Aquin, Thomas of the Carthusian for its pious spirit and its masterly inclusion of all previous commentators.

It was reserved for the period of the Renaissance to break with the time-honoured tradition. True, some of the older Humanists, as Pico della Mirandola, Mar-
silius Ficinus, and the Englishman John Colet, were still convinced of the genuineness of the writings; but the keen and daring critic, Laurentius Valla (1407–1457), in his glosses to the New Testament, expressed his doubts quite openly and thereby gave the impulse, at first for the scholars, in the sixteenth and seventeenth centuries, in the entire scientific world, to take sides either with or against Dionysius. The consequence was the formation of two camps; among the adversaries were not only Protestants (Luther, Scolatus, Dalleus, etc.), but also prominent Catholic theologians (Beatus Rhenanus, Cajetan, Morinus, Sirentius, etc., and among the defenders of Dionysius were Baronius, Bellarmine, Lancelus, Corderius, Balloix, Delrio, de Rubeis, Lessius, Alexander Natalis, and others. The literary controversy assumed such dimensions and was carried on so vehemently that it can only be compared to the dispute concerning the Pseudo-Isidorian decrets and the Pseudo-Constantian donation. In the nineteenth century the general opinion inclined more and more towards the opposition; the Germans especially, Möller, Fessler, Dollinger, Hagenröther, Alzog, Fink, and others made no reserve of their denunciation of the authenticity of Dionysius. But professor Franz Hippler came forward and attempted to save the honour of Dionysius. He finds in Dionysius not a falsifier, but a prominent theologian of the fourth century who, through no fault of his own, but owing to the misinterpretation of some passages, caused the Aequiparte to be confused with the Areopagit. Many Catholic theologians and many Protestants as well, voiced their approval. Finally, in 1895 there appeared almost simultaneously two independent researches, by Hugo Koch and by Joseph Stiglmayr, both of whom started from the same point and arrived at the same goal. The conclusion reached was that extracted from the treatise of the neo-Platonist Proclus, "De malorum subsistentiis" (handed down in the Latin translation of Morbeka, Cousin ed., Paris, 1864), had been used by Dionysius in the treatise "De div. nom." (c. § 19–35). A careful analysis brought to light an astonishing agreement of both works in arrangement, sequence of thought, examples, figures, and expressions. It is easy to point out many parallelisms from other and later writings of Proclus, e. g. from his "Institutio theologica", "Theologia Platonica" and his commentary on Plato's "Parmenides", "Adeabades I", and "Timæus" (these five treatises were written after 462).

Accordingly, the long-standing problem seems to be solved in its most important phase. As a matter of fact this is the decision pronounced by the most competent judges, such as Bardenhewer, Ehrhard, Funk, Lehmann, Ritschl, Risse, J. J. Duchesne, Batifol; and the Protestant scholars of early Christian literature, Geiler, Harnack, Krüger, Bonnewitz. The chronology being thus determined, an explanation was readily found for the various objections hitherto alleged, viz. the silence of the earlier Fathers, the later dogmatic terminology, a developed monastic, ceremonial, and penitential system, the echo of neo-Platonicism, etc. On the other hand it sets at rest many hypotheses which had been advanced concerning the author and his times and various discussions—whether, e. g., a certain Apollinaris, or Syncellus, or Dionysius Alexandriaeus, or a bishop of Æthiopis, or a pagan hierophant was the writer.

A critical edition of the text of the Areopagit is urgently needed. The Justinian (1516), that of Basle (1589), of Paris (1602 and 1615), and lastly the principal edition of Antwerp (1654) by Corderius, S.J., who was frequently reprinted (Paris, 1654) and was included in the Migne collection (P.G., III and IV with Lat. trans. and additions), are insufficient because they make use of only a few of the numerous Greek manuscripts and take no account of the Syriac, Armenian, and Arabic translations. The following translations have thus far appeared in modern languages: English, by Lupton (London, 1869) and Parker (London, 1894), both of which contain only the "Caeciliae" and the "Eccles. Hier."; German, by Engelhardt (Sulzbach, 1823) and Storr, "Kirchliche Hierarchie" (Kempten, 1877); French, by Darboy (Paris, 1844) and lastly for the theological literature, by Ficinus, "De decr. pagani" (Mainz, 1495).

JOSEPH STIGLMAYR.
Dioscurus, Bishop of Alexandria (also written Dioxorus; Dioscorus from the analogy of Dioscori), date of birth unknown; d. at Gangra, in Asia Minor, 11 Sept., 434. He had been archdeacon under St. Cyril, whom he succeeded in 444. Soon afterwards Theodosius II had been converted to the orthodox faith, and Dioscurus, since 433, wrote him a polemic letter, in which he speaks of the report of Dioscurus's virtues and his modesty. In such a letter no contrary report would be mentioned, and we cannot infer much from these vague expressions. The peace established between John of Antioch and Cyril seems to have continued between their successors until 418, when Domnus, the successor and nephew of John, had to judge the case of Ibas, Bishop of Edessa, who was accused of heresy and many crimes by the Cyrilian party. Domnus acquitted Ibas. The Cyrilian monks of Osrhoene were furious, and betook themselves to Dioscurus as their natural protector. Dioscurus wrote to Domnus, complaining that he championed the Nestorian Ibas and Theodoret. Domnus and Theodoret both replied defending themselves, and showing their perfect orthodoxy. The accusers of Ibas went to the court at Constantinople, where the feeble Theodosius II was only too ready to listen to an expression of ecclesiastical quarrels. For this purpose they got him the Cyrilians obtained a decree against the Nestorians, and in particular against Irenaeus, who had befriended the Nestorians at the Council of Ephesus, where he was in authority as imperial representative; he was now deposed from the Bishopric of Tyre which he had accepted. Theodoret was forbidden to leave his Diocese of Cyprus. In September a new Bishop of Tyre was appointed, and the Patriarch Domnus, feeling that Dioscurus was about to triumph, wrote to Flavian of Constantinople in order to get his support. Alexandria had of old been the first see of the East and was now only surpassed in power by Constantinople. The Egyptian patriarch had vast civil and political influence, as well as an almost autocratic sway over a hundred bishops and a great army of monks, who were heart and soul devoted to the memory of Cyril, and rather fervent than discriminating in their orthodoxy. Constantinople had been granted the next dignity after Rome by the great Council of 381, and this humiliation of Alexandria had embittered the long-standing rivalry between the two sees. Antioch had always tended to support Constantinople, and Domnus was now ready to grant precedence to Flavian. Dioscurus, he said, knew that he, Domnus, was betraying the rights of Antioch and Alexandria in admitting the canon of 381, which had never been accepted by Alexandria or Rome. But Flavian was not a helpful ally, for he had neglected to obtain the favour of the emirchryssaphus, who was all-powerful at court. An unforeseen incident was now to set the world on a blaze. At a council held by Flavian in November of the same year, 418, Eusebius of Dorylaeum accused the archimandrite Eutyches of teaching one nature only in Christ. He was treated with all consideration, but his obstinacy made it unavoidable that he should be deposed and excommunicated. Now Eutyches was godfather to Chrysaphus, and “one nature” was precisely the unfortunate expression of St. Cyril, which his followers were already interpreting in a heretical sense. Eutyches was therefore at once banished to the province of Upper Syria. Being excommunicated by the Archimandrite and exiled, he had given his name to the Monophysite heresy, into which the whole Cyrilian party now plunged once for all.

The Cyrilians were further incensed by the failure of the scheme to attempt to contact Ibas. The emperor procured an order from the emperor, 25 Oct., 448, for a fresh trial. The bishops who met for this purpose at Tyre in Feb., 449, were obliged by the violence of the Eastern monks to transfer some of their sittings to Berytus. At the end of the month Ibas was excommunicated, though the emperor was known to be against him. Dioscurus and his party replied by an unexpected stroke; in March they induced the emperor to issue an invitation to all the greater bishops to attend with their suffragans a general council to be held at Ephesus in August. It was indeed unreasonable to desire any permanent settlement of existing contention, and they hoped to hinder the Emperor Leo I, warmly accepted the emperor's proposition, or rather order. Eutyches had written to him, pretending that he had appealed at the time of his condemnation, and promising to abide by his judgment. He wrote also to other bishops, and we still possessed by the Emperor Peter Chrysologus, Bishop of Ravenna, where the court of Valentinian III, the Western emperor, had its head-quarters. St. Peter tells him to await the decision of the pope, who alone can judge a case concerning the Faith. St. Leo at first complained that the matter had not at once been referred to him, then, on finding that a full account sent by St. Flavian had been accidently delayed, wrote a compendious explanation of the whole doctrine involved, and sent it to St. Flavian as a formal and authoritative decision of the question. He reproves Flavian's council for want of due respect to the Pope, and adds that the archimandrite may be restored if he repent. This letter, the most famous of all Christian antiquity, is known as “St. Leo's Tome.” He sent as legates to the council a bishop named Julius, a priest, Renatus (he died on the way), and the deacon Hilarius, afterwards pope. St. Leo expresses his regret that the shortness of the notice must prevent the presence of any other bishop of the West. It is probable that this difficulty had been anticipated by Dioscurus, who had answered an appeal from Eutyches, who had apparently been excommunicated by the emperor, and had received an appeal from Eutyches, who had apparently been excommunicated by the emperor. As his predecessor Peter had appointed a bishop for Constantinople, and as Theophilus had judged St. Chrysostom, so Dioscurus, with the air of a superior, actually declared Eutyches absolved and restored. In April Eutyches obtained a slight revision of the Acts of the council which had condemned him. In the same month the case of Ibas was again examined, by the emperor's order, this time at Edessa itself, and by a lay inquisitor, Chereas, the Governor of Osrhoene. The people received him with shouts of joy. No defence was heard. On the arrival of Chereas's report, which was already completed by the Emperor, it was decided to quiet down the matter by the presence of Ibas's most furious accuser, the monk Bar Tsouma (Barsumas), and other monks at the approaching council. In all this we see the influence of Dioscurus dominant. In March Theodosius had prohibited Theodoret from coming to the council. On 6 August he shows some fear that his order may be disregarded, in a letter in which he constitutes Dioscurus president of the synod.

The council met at Ephesus on 8 Aug., 449. It was to have been ecumenical in authority, but it was disturbed by Leo, a presbyter, and “The Robber Council” has been its title ever since. A full history of it would be out of place here (see Ephesus, Robber Council of). It is only necessary to say that the assembly was wholly dominated by Dioscurus. Flavian was not allowed to sit as a bishop, but was only to be a presbyter. Bishop of Ephesus. When St. Eutyches, Bishop of Ephesus, attempted to give Communion to Flavian's clergy, he was attacked by soldiers and monks of Eutyches, 300 in number, who cried out that Stephen was the enemy of the emperor, since he received the emperor's enemies. Eutyches was admitted to defend himself, but the emperor heard only so much of the report of the council which had condemned him were read in full. Not content with restoring Eutyches, Dioscurus proceeded to the deposition of Flavian. This bold measure could only be carried by terrorism. The soldiers and monks were brought into the council, and many
bishops were forced to sign a blank paper. The papal legate Hilarus uttered the protest Contra dictum, and saved himself by flight. Flavian and Eusebius of Doryleum (q. v.) appealed to the pope, and their letters, only lately discovered, were probably taken by Hilarus. The majority of the bishops, however, did not agree. St. Flavian was thrown into prison, and died in three days of the blows and ill usage he had received. The bishops who were present gave their testimony, when the Acts were publicly read at the Council of Chalcedon, to the violence used at Ephesus. No doubt they exaggerated somewhat, in order to procure their base compliance. But there were too many witnesses to allow them to falsify the whole affair; and we have also the witness of the letters of Hilarus, of Eusebius, and of Flavian, and the martyrology of the latter, to confirm the charges against Dioscurus.

No more was read at Chalcedon of the Acts. But at this point begin the Syriac Acts of the Robber Council, which tell us of the carrying out by Dioscurus of a thoroughgoing but short-sighted policy. The papal legates came no more to the council, and Domnus excused himself through illness. A few other bishops were now or escaped, from the original 128, and some nine new-comers raised the total to 110. The deposition of Ibas was voted with cries, such as "Let him be burnt in the midst of Antioch." The accused was not present, and no witnesses for the defence were heard. Daniel, Bishop of Heliopolis, was the only bishop of Ibas, was degraded. The ban of Tyre, already depoised, was anathematized. Then it was the turn of the leaders of the Antiochene party. Ibas had been accused of immorality and a misuse of ecclesiastical property, as well as of heresy: no such charges could be made against the great Theodoret; his character was unblemished, and his orthodoxy had been admitted by St. Cyril himself. Nevertheless his earlier writings, in which he had ineptly and with incorrect expressions attacked St. Cyril and defended Nestorius, were now raked up against him. None ventured to dissent from the sentence of deposition pronounced by Dioscurus, which ordered his writings to be burnt. If we may believe the Acts, Domnus, from his bed of real or feigned sickness, gave a general assent to all that the council had done. But this could not save him from the accusation of favouring Nestorians. He was deposed without a word of defence, and a new patriarch, Maximus, was set up in his place.

So ended the council. Dioscurus proceeded to Constantinople, and there made his own secretary, Anatolius, bishop of the city. One foe remained. Dioscurus had avoided reading the pope's letter to the Council of Ephesus, though he promised more than once to do so. He evidently could not then venture to contest the pope's ruling as to the Faith. But now, with his own creatures on the thrones of Antioch and Constantinople, and sure of the support of Chrysaphius, he stopped at Nicaea, and with ten bishops included an interdict against St. Leo himself. It would be vain to attribute all these acts to the desire of his own aggrandizement. Political motives could not have led him so far. He must have known that in attacking the pope he could have no help from the bishops of the West or from the Western emperor. It is clear that he was genuinely infuriated with his heresy, and was fighting in its interests with all his might.

The pope, on hearing the report of Hilarus, immediately annulled the Acts of the council, abjured all those whom it had excommunicated, and excommuni cated them. The father of the second emperor had taken part in it. He wrote to Theodosius II insisting on the necessity of a council to be held in Italy, under his own direction. The emperor, with the obstinacy of a weak man, supported the council, and paid no attention to the intervention of his sister, St. Pulcheria, nor to that of his colleague, Valentinian III, who, with his mother Galla Placidia, and his wife, the daughter of Theodosius, wrote to him at St. Leo's suggestion. The reasons given to the pope by Theodosius for his conduct are unknown, for his letters to Leo are lost. In June of July, 450, he died, falling from a horse on a journey to the diocese of Antioch. The pope succeeded by his sister Pulcheria, who took for her colleague and nominal husband the excellent general Marcian. St. Leo, now sure of the support of the rulers of the East, declared a council unnecessary; many bishops had already signed his Tome, and the excommunicands would do without difficulties. But the new emperor had already taken steps to carry out the pope's wishes, by a council not indeed in Italy, which was outside his jurisdiction, but in the immediate neighbourhood of Constantinople, where he could himself watch its proceedings and ensure its orthodoxy. St. Leo therefore agreed, and sent legates who this time were to preside.

The council, in the intention of both pope and emperor, was to accept and enforce the definition given long since from Rome. Anastolus was ready enough to please the emperor by signing the Tome; and at Pulcheria's request, he gave 101 out of 110, save St. Leo. The latter permitted the restoration to communion of those bishops who repented their conduct at the Robber Council, with the exception of Dioscurus and of the leaders of that synod, whose case he first reserved to the Apostolic See, and then committed to the council. The emperor ordered six hundred bishops made it the largest of ancient councils (see CHALCEDON, ECUMENICAL COUNCIL OF). The papal legates presided, supported by lay commissioners appointed by the emperor, who were in practice the real presidents, since the legates did not speak for the bishops. The first point raised was the position of Dioscurus. He had taken his seat, but the legates objected that he was on his trial. The commissioners asked for the charge against him to be formulated, and it was replied that he had held a council without the permission of the Apostolic See, a thing which had never been permitted. This statement was difficult to explain, before the discovery of the Syriac Acts; but we now know that Dioscurus had continued his would-be general council for many sessions after the papal legates had taken their departure. The commissioners ordered him to sit in the midst as accused. The sentence in this passage of the Acts is wrongly translated in the old Latin version; this was care lessly followed by Hefele, who thus led Bright into the error of supposing that the commissioners addressed to the legates a rebuke they meant in reality for Dioscurus.) The Alexandrian patriarch was now as much deserted by his own party as his victims had been deserted at Ephesus by their natural defenders. Some sixty bishops, Egyptian, Palestinian, and Illy rian, were on his side, but were afraid to say a word in his defence, though they raised a great commotion at the introduction into the assembly of Theodoret, who had been excluded from Leo's council, and who refused to accept it in Ephesus. The Acts of the first session of the Robber Council were read, continually interrupted by the disclaimers of the bishops. The leaders of that council, Juvenal of Jerusalem, Thalassium of Cæsarea, Maximus of Antioch, now declared that Flavian was orthodox; Anatolius had long since gone over to the winning side. Dioscurus alone stood his ground. He had at least no time-server, and he was a convinced heretic. After this session he refused to appear. At the second session (the third, according to the printed texts and Hefele, but the Ballerini are right in inverting the order), the emperor had taken part, and in the case of Dioscurus was continued. Petitions against him from Alexandria were read. In these he was accused of injustice and cruelty to the family of Cyril and of many other crimes, even against the emperor and the State. How much of this was true it is impossible to say, as
Dioscorus refused to appear or to make any defence. The accusations were dropped, and judgment must necessarily go against Dioscorus, if only for contempt of court. The bishops therefore repeatedly demanded that the legates should deliver judgment. Paulus, who came to denote the papal legate, realized the crimes of Dioscorus—he had absolved Eutyches contrary to the canons, even before the council; he was still transubstantiation when others asked for pardon; he had not had the pope’s letter read; he had coexcommunicated the pope; he had been three formally cited and had refused to appear. Therefore the holy and blessed Archbishop of older Rome, Leo, by us and the present most holy council, together with the thrice blessed and praiseworthy Peter the Apostle, who is the rock and base of the Catholic Church and the foundation of the orthodox Faith, has stripped him of the episcopal and of all sacerdotal dignity. Wherefore this most holy and great council will decree that which is in accordance with the canons against the aforesaid Dioscorus. All the bishops signified their agreement in a few words, and then all signed the papal sentence. A short notice of his deposition was sent to Dioscorus. It is this almost word for word from that sent to Nestorius by the Council of Ephesus twenty years before. With the rest of the council—its definition of the Faith imposed upon it by Pope Leo, its rehabilitation of Theodoret and of Ibas, etc.—we have nothing to do. Dioscorus affected to right the transubstantiation, saying that he should not be restored. But the council decreed that he was incapable of restoration, and wrote in this sense to the emperors, reciting his crimes. He was banished to Gangra in Paphlagonia, where he died three years later. The whole of Egypt revered him as the true representative of the Cyrillic tradition, and from this time forth the Patriarchate of Alexandria was lost to the Church. Dioscorus has been honoured in its as its teacher, and it has remained Eutychian to the present day.

The chief authority for the events which preceded the Robber Council (besides some letters of Theodoret) is the Syriac version of the Acts of that council, published from a codex of 335 in the Brit. Mus.; Secundum Syntomum Ephesinum neum excerpta quod ad rom pertinent ..., Perry ed. (Oxford, 1875); the second Syllaphon of Ephesus, from Syriac MSS., ed. by Perry (Oxford, 1875); German tr. by Bohn (1881), Verhandlungen der Kirchverseammlung zu Ephesos am 22. August CXXIX and XCI (Kiel, 1879); the best dissertation upon it is Martin, Le Pseudo-Synode connu dans l’histoire sous le nom de brandiegage d’Ephes, etude d’apres ses actes, en syriaque (Beitrage zur Geschichte des byzantinischen Rechts, 1877), and with the same in Rev. des Quat. Rel. 1876, 1877, 1878, 1879, 1880, 1881. Rivington has well noted the mistakes of Bright, but he has fallen into some himself, e.g., when he calls Dioscorus the nephew of St. Cyril or blames him for ignoring the so-called Constantinopolitan Creed.

The appeals of Flavian and Eusebius were first published by Amelain, San Leonis Magni et Ephesini (Rome, 1882), and Monte cassino, 1901, and with other documents in his Syllaphon, Casian. (Montecassino, 1893); also by Mommmen, in Neues Archiv der Gesellschaft für ältere deutsche Geschichtskunde, XI (1886). The older historians, who wrote before the discovery of the Syriac Acts, are antiquated as regards Dioscorus, including Befer (but we await the next volume of the new French edition by Leclerc), and Bright, with the exception of his posthumous The Fathers (London, 1869). For more recent literature see Chalcedon; a fragment of a letter of Dioscorus written to the Alexandrians is found in the Antiquities of Nicephorus Phocas, Syllog. Selv., IV, 380. A panegyric on Macarius of Tkhod, preserved in Coptic, is not genuine (published by Amelain, Mommmen), but at the time before the council, for the year 380. A panegyric on the emperor was written by F. N. Chali, Historie de Dioscore, by son disciple Théophile, in Journal Asiatique, IX (1836), i. 244. Coptic Life of the Emperor, 267. A letter to Dioscorus from St. Leo, 21 June, 440. Attmore, in his edition of the Syriac, says that the Bishops of the open, last, point of view, orders all ordinations of priests and deacons to be in the night between Saturday and Sunday, and that on festival days which are after a great concourse, the Sacrament is to be repeated as often as the basilica is filled, that none may be deprived of its devotion.

Diplomatics, Papal.—The word "diplomatics," following a Continental usage which long ago found recognition in Mabillon’s De Re Diplomatice, has of late come to denote a papal legate, realizing the crimes of Dioscorus—he had absolved Eutyches contrary to the canons, even before the council; he was still transubstantiation when others asked for pardon; he had not had the pope’s letter read; he had coexcommunicated the pope; he had been three formally cited and had refused to appear. Therefore the holy and blessed Archbishop of older Rome, Leo, by us and the present most holy council, together with the thrice blessed and praiseworthy Peter the Apostle, who is the rock and base of the Catholic Church and the foundation of the orthodox Faith, has stripped him of the episcopal and of all sacerdotal dignity. Wherefore this most holy and great council will decree that which is in accordance with the canons against the aforesaid Dioscorus. All the bishops signified their agreement in a few words, and then all signed the papal sentence. A short notice of his deposition was sent to Dioscorus. It is this almost word for word from that sent to Nestorius by the Council of Ephesus twenty years before. With the rest of the council—its definition of the Faith imposed upon it by Pope Leo, its rehabilitation of Theodoret and of Ibas, etc.—we have nothing to do. Dioscorus affected to right the transubstantiation, saying that he should not be restored. But the council decreed that he was incapable of restoration, and wrote in this sense to the emperors, reciting his crimes. He was banished to Gangra in Paphlagonia, where he died three years later. John Chapman.
Dom Ruinart. Seeing, however, that this pioneer work had not extended to any documents later than the thirteenth century and had taken no account of certain classes of papers, such as the ordinary letters of the popes and privileges of a more private character, two distinguished members of the Holy See, Dom Tassin and Dom Vaines, compiled a work in six large quarto volumes, with many facsimiles etc., known as the "Nouveau Traité de Diplomatique" (Paris, 1750-1765), which, though it marks but a small advance on Mabillon's own treatise, has been widely used, and has been presented in a more summary form by Dom Vaines and others.

With the exception of some useful works specially consecrated to particular countries (e.g. Maffei, "Italia diplomaica," Mantua, 1727, unclassified; and Muratori, "De Diplomatibus Antiquis," included in his "Antiquitates Italicae," 1740, vol. III.), as also the treatise of G. Marin on papyri documents (1 papiri diplomatici, Rome, 1805), no great advance was made in the science for a century and a half after Mabillon's death. The "Dictionnaire raisonné de diplomatique chretienne," by M. Quentin, which forms part of Migeon's "Encyclopédie," is a rather unskillful digest of older works, and the small "Eléments de paléographie" of de Wailly (2 vols., 1808) has little independent merit. But within the last fifty years immense progress has been made in all diplomatic knowledge, and not least of all in the study of papal diplomacy. The bibliography appended to the articles BULLS AND BRIEFS, in Bullarium, the reader will find references to the more important works. Amongst the pioneers of this revival the names of Léopold Delisle, the chief librarian of the Bibliothèque Nationale, Paris, and of M. de Mas-Latrie, professor at the Sorbonne, as well as that of Julius von Pflugk-Harttung, the editor of a magnificent series of facsimiles of papal Bulls, deserve to occupy a foremost place; but their work has been carried on in Germany and elsewhere, often by those who are not themselves Catholics. It must be obvious that the photographic reproduction of documents which can now be procured so easily and cheaply have enormously facilitated the process of minute comparison of documents which forms the basis of all palaeographic studies. Further, the improvement in the cataloguing and the extension of facilities under Pope Leo XIII in such great libraries as that of the Vatican, and the contents of such libraries have made their researches more accessible and have rendered possible such a calendar of early papal Bulls as has been appearing since 1926, being the result of the researches of Messrs. P. Kehr, A. Brackmann, and W. Wiederhold, in "Notizen über die Göttinger Gesellschaft der Wissenschaften". Of the series of papal regesta now being published by various scholars, especially by members of the Ecole Française de Rome, a sufficient account has been given in the second part of the Bullarium. Still greater progress in the study of diplomatics is no doubt to be looked for from the facilities afforded by the recently founded journal, "Jahrbuche für Urkundenforschung" (Leipzig, 1907), edited by Messrs. Karl Brandi, H. Bresslau, and M. Tangan, all acknowledged masters in this subject.

BISHOP.-The history of the Chancery is clearly only a study preparatory to the examination of the document itself. Secondly, we have the text of the document. As the business of the Chancery increased, and we note a marked tendency to adhere strictly to the forms prescribed by tradition. Various collections of these forms, of which the "Liber Diurnus" is one of the most ancient, were compiled at an early date. Many others will be found in the "Recueil général des formules" by de Rosière (Paris, 1861-1871), though these, like the series published by Zeuner (Formulae Merovingici et Karolinae Avi, Hanover, 1886), are mainly secular in character. After the text of the document, which of course varies according to its nature, and in which not merely the wording but also the rhythm (the so-called cursus) has often to be considered, attention must be paid (1) to the manner of dating, (2) to the signatures, (3) to the attestations of witnesses etc., (4) to the seals and the attachment of the seals, (5) to the material upon which it is written and to the manner of folding, and (6) to the handwriting. Under the head of handwriting the whole science of palaeography may be said to be involved.

All these matters fall within the scope of diplomatics, and all offer different tests for the authenticity of any given document. There are other details which often need to be considered, for example the Tironian (or handwritten) notes, which are not infrequently found in primitive Urkunden, both papal and imperial, and which have only begun of late years to be adequately investigated (see Tangi, "Die tironischen Noten" in "Archiv für Urkundenforschung," 1907, L, 173-190). A special section in any comprehensive study of diplomacy is likely to be devoted to spurious documents, of which, as already stated, the number is surprisingly great.

Besides the books referred to in the course of this article see the bibliography of the article Bullarium, and Bresslau's "Handbuch der Urkundenlehre" (Leipzig, 1888). I. One very useful work for the study of papal diplomacy is the "Practica Cantianarum," ed. SCHMITT-KALLENBERG (Munich, 1904), though confined to the working of the Chancery at the close of the fifteenth century, is valuable for the indirect light thrown on the course of the papal Bulls. Consult also the important works of E. Scharz in the "Studien und Unterrichts-Ordnungen von 1290-1500" (Innsbruck, 1894); Kranz, "Urkundensammlungen" (Munich, 1897), and Schmitz-Kallenberg's "Fortsetzungen der Diplomatik seit Mabillon" (Munich, 1897), though these last two books have little directly to do with papal documents. A. MEISTER's important work on the "Liber Diurnus" (Paderborn, 1912), the papal Chancery is hardly mentioned (see, however, the appendix). Finally, the best summary account of papal diplomacy is to be found in the section contributed by SCHMITT-KALLENBERG to the "Gründung der Geschichtswissenschaft" (Leipzig, 1906), vol. I, pp. 172-280.

HERBERT THURSTON.
IVORY DIPTYCH, X CENTURY THE LOUVRE
IVORY DIPTYCH (LEGEND OF S. DENIS), XIV CENTURY, MUSÉE DE CLUNY
 arose between profane and ecclesiastical (liturgical) diptychs, the former being frequently given as presents by high-placed persons. It was customary to commemorate in this way one's elevation to a public office or any event of personal importance, e.g. a marriage. The consuls, or bishops, of the fourteenth century, when they were to offer diptychs to their friends and even to the emperor. Those presented to the latter often had a border of gold and were quite large. Their tablets often exhibited on a central plate the portrait of the subject, surrounded by four other plates. The (undated) Barberini ivories at Louvre in this case were constructed and once served as an ecclesiastical diptych (see below). Some believe it to be the binding of a book offered to the emperor. Strzygowski holds it to be of Egyptian origin and thinks that the portrait is that of Constance the Great, defender of the Faith. The oldest dated consular diptych is that of Probus (406); it is kept in the treasury of the cathedral of Aosta, Piedmont. The latest is that of the Eastern consul, Basilius (541), one tablet of which is at the Uffizi Museum in Florence and the other at the Brera in Milan. The Theodosian Code (534) forbade the offering of ivory diptychs to any but the regular (i.e. not honorary) consuls. The tablet at the Mayer Museum in Liverpool, bearing the image of Marcus Aurelius (d. 180), is prior to this enactment. The consular diptychs are recognizable by their inscriptions or by the figure of the consul which they bear. Of the two groups of Boetius (487) at Avignon, and others of the same type, the consul is clad in a tunique (a kind of toga); he holds in his left hand the scipio (consular sceptre) and in his right the mappa circensis, or white cloth which he used to wave as a signal for the games in the circus. These games (ludi) or other liberal works offered to the pond by the consul were frequently represented on the tablets of the diptychs.

There is less certainty concerning the diptychs of official other than consuls, e.g. prebends, quasators, etc. The diptych of Rufius Probusianus V.C. (i.e. air clavisromanae) vicarius urbis Romae, in the Berlin Museum, is the most precious relic of this class, and probably dates from the end of the fourth century. Among the diptychs of private individuals that of Gallienus Concessor, discovered at Rome on the Esquiline, exhibits only the name of its owner. Others were richly ornamented and reproduced often some of the masterpieces of ancient art. Thus on a diptych in the Mayer Museum, Liverpool, are seen Asclepius and Telephorus, Hygieia, and Amor. The most beautiful of the profane diptychs was carved at the time of a marriage between the Symmachus and the Nicomachi (392 to 394, or 401). It represents on each leaf (one of which is at the South Kensington Museum and the other, in a very damaged condition, at Cluny) a woman performing a sacrifice. Many of the profane diptychs were preserved in the treasuries of the churches, where they were eventually used for liturgical purposes or enshrined in book-bindings or in goldsmith work. The diptych of Boetius at Brera bears, on the interior, some liturgical texts and religious paintings, attributed to the seventh century. The Ligii diptych of the consul Anastasius (517), one leaf of which is at Berlin and the other at South Kensington, bears an inscription of the prayer Communicantes from the Canon of the Mass. Another of the same consul (in the Bibliothèque Nationale, Paris) has a list of the bishops of Bourges. At the cathedral of Monza, Lombardy, a diptych represents the gift of consuls King David and St. Gregory the Great. It is perhaps an ancient compost, transformed in the eighth or ninth century; according to some it appears to be of ecclesiastical origin. Many carved diptychs reproduced purely religious subjects. On a diptych in the treasury of Rouen cathedral the figure of St. Paul is exactly the same as that on a sarcophagus in Gaul. A diptych leaf in the treasury of Tongres was evidently influenced by the carvings on the cathedra of St. Maximinus at Ravenna, and seems to have belonged to an ancient episcopal see. Certain diptychs with religious subjects, e.g. the Holy Sepulchre and the holy women at the Tomb of Christ (Diptychum), probably date from the fourth or fifth century. Diptych leaves divided into five compartments have generally served as a cover for copies of the Gospels. The diptychs, though often clumsily executed, are important for the history of sculpture, there being a number of them dated, and several being accurately dated. At different periods in the Middle Ages, numerous diptychs or triptychs of ivory were made, to serve as little devotional panels.

The liturgical use of diptychs offers considerable interest. In the early Christian ages it was customary to write on diptychs the names of those, living or dead, who were considered as members of the Church, a signal evidence of the doctrine of the Communion of Saints. Hence the terms “diptychs of the living” and “diptychs of the dead”. Such liturgical diptychs varied in shape and dimensions. Their use (sacra tabulae, tabulae, multiformes et diversae) is attested in the writings of St. Cyprian (third century) and by the history of St. John Chrysostom (fourth century), nor did they disappear from the churches until the twelfth century in the West and the fourteenth century in the East. In the ecclesiastical life of antiquity these diptychs had liturgical purposes. It is probable that the names of the baptized were written on diptychs, which were thus a kind of baptismal register. The “diptychs of the living” would include the names of the pope, bishops, and illustrious persons, both lay and ecclesiastical, of the benefactors of a church, and of those who offered the Holy Sacrifice. To these names were sometimes added those of the Blessed Virgin, of martyrs, and of other saints. From such diptychs came the first ecclesiastical calendars and the martyrology. The “diptychs of the dead” would include the names of persons otherwise qualified for inscription on the diptychs of the living, e.g. the bishops of the community (also other bishops), moreover priests and laitymen who had died in the odour of sanctity. It is to this kind of diptychs that the later necrologies owe their origin. Occasionally special diptychs were divided into two compartments, to contain each a name of a saint and a bishop; in this way arose at an early date the episcopal lists or catalogues of occupants of sees. Whatever their immediate purpose the liturgical diptychs admitted only the names of persons in communion with the Church; the names of heretics and of excommunicated members were never inserted. Exclusion from these lists was a grave ecclesiastical penalty; the highest dignity, episcopal or imperial, would not avail to save the offender from its infliction. The content of the diptychs was read out, either from the ambo (q. v.) or from the altar by a priest or a deacon. In this respect a variety of customs obtained in different churches and at different periods; sometimes the diptychs were simply laid on the altar during Mass, and when read publicly, such reading did not always occur at the same stage of the Mass. The order of which traces are now seen in the Roman Canon of the Mass shows at forty-two lines and the prayer Communicantes from the Canon of the Mass. Another of the same consul (in the Bibliothèque Nationale, Paris) has a list of the bishops of Bourges. At the cathedral of Monza, Lombardy, a diptych represents the gift of consuls King David and St. Gregory the Great. It is perhaps an ancient compost, transformed in the eighth or ninth century; according to some it appears to be of ecclesiastical origin. Many carved diptychs reproduced purely religious subjects. On a diptych in the treasury of Rouen cathedral the figure of St. Paul is exactly the same as that on a sarcophagus in Gaul. A diptych

In the direction of the Church's sacred activity, by which the Holy Ghost speaks through the sovereign pontiff and the bishops of the Church, the work of the private spiritual director must never be at variance with this infallible guidance. Therefore the Church has condemned the doctrines of Molinos, who taught that directors are independent of the bishops; that the Church does not judge about secret matters, and that God and the director alone enter into the inner conscience (Denzinger, Enchiridion, nos. 1132, 1153). Several of the most learned Fathers of the Church devoted much attention to spiritual direction, for instance, St. Jerome, who directed St. Paula and her daughter St. Eustochium; and some of them have left us learned treatises on ascetic theology. But while the hierarchy of the Church is Divinely appointed to guard the purity of faith and morals, the Holy Spirit, who inspires and animated the Church from the day of the Resurrection, is also with and within us. And if we may judge by the Holy Ghost, who through the Holy Spirit inspires and guides the Church, then the Church, being thus guarded, might be said to be infallible in matters of faith and morals. But again, the Church is not infallible in matters of doctrine, nor is the Church infallible in matters of prudence, nor is the Church infallible in matters of discipline.

V. Whoever the director may be, he will find the principal means of progress towards perfection to consist in the exercise of prayer (q. v.) and mortification (q. v.). But upon the special processes of these two means, spiritual guides have been led by the Holy Spirit in various directions. Different is the type for the solitary in the desert, the cenobite in the community, for a St. Louis or a Blanche of Castile in a palace, St. Frances of Rome in her family, or a St. Zita in her kitchen, for contemplative and for active religious orders and congregations. Another marked difference in the direction of soul is the presence or absence of the mystic element in the guidance of the soul; and as the soul is to be directed (see Mysticism). Mysticism involves peculiar modes of action by which the Holy Ghost illumines a soul in ways which transcend the normal use of the reasoning powers. The spiritual director who has such persons in charge needs not to make the same conclusions as he would make if he were dealing with persons who had not made such progress. Often, especially sad mistakes have been made by presumption and impudent zeal, for men of distinction in the Church have gone astray in this matter.

II. Still more frequently is spiritual direction required in the lives of Christians who aim at the attainment of perfection (see Perfection). All religious are obliged to do so by their profession; and many of the faithful, married and unmarried, who live amidst worldly cares aspire to such perfection as is attainable in their states of life. This striving after Christian perfection means the cultivation of certain virtues and watchfulness against faults and spiritual dangers. The knowledge of this constitutes the science of asceticism (q. v.). The spiritual director must be well versed in this science, as his advice is very necessary for such souls. For, as Cassian writes, "by no wise does the devil draw a monk headlong and bring him to death sooner than by persuading him to neglect the counsel of the Elders and trust to his own judgment and determination" (Conf. of John of Patmos).

III. Since, in teaching the Faith, the Holy Ghost speaks through the sovereign pontiff and the bishops of the Church, the work of the private spiritual director must never be at variance with this infallible guidance. Therefore the Church has condemned the doctrines of Molinos, who taught that directors are independent of the bishops; that the Church does not judge about secret matters, and that God and the director alone enter into the inner conscience (Denzinger, Enchiridion, nos. 1132, 1153). Several of the most learned Fathers of the Church devoted much attention to spiritual direction, for instance, St. Jerome, who directed St. Paula and her daughter St. Eustochium; and some of them have left us learned treatises on ascetic theology. But while the hierarchy of the Church is Divinely appointed to guard the purity of faith and morals, the Holy Spirit, who inspires and animated the Church from the day of the Resurrection, is also with and within us. And if we may judge by the Holy Ghost, who through the Holy Spirit inspires and guides the Church, then the Church, being thus guarded, might be said to be infallible in matters of faith and morals. But again, the Church is not infallible in matters of doctrine, nor is the Church infallible in matters of prudence, nor is the Church infallible in matters of discipline.

V. Whoever the director may be, he will find the principal means of progress towards perfection to consist in the exercise of prayer (q. v.) and mortification (q. v.). But upon the special processes of these two means, spiritual guides have been led by the Holy Spirit in various directions. Different is the type for the solitary in the desert, the cenobite in the community, for a St. Louis or a Blanche of Castile in a palace, St. Frances of Rome in her family, or a St. Zita in her kitchen, for contemplative and for active religious orders and congregations. Another marked difference in the direction of soul is the presence or absence of the mystic element in the guidance of the soul; and as the soul is to be directed (see Mysticism). Mysticism involves peculiar modes of action by which the Holy Ghost illumines a soul in ways which transcend the normal use of the reasoning powers. The spiritual director who has such persons in charge needs not to make the same conclusions as he would make if he were dealing with persons who had not made such progress. Often, especially sad mistakes have been made by presumption and impudent zeal, for men of distinction in the Church have gone astray in this matter.

II. Still more frequently is spiritual direction required in the lives of Christians who aim at the attainment of perfection (see Perfection). All religious are obliged to do so by their profession; and many of the faithful, married and unmarried, who live amidst worldly cares aspire to such perfection as is attainable in their states of life. This striving after Christian perfection means the cultivation of certain virtues and watchfulness against faults and spiritual dangers. The knowledge of this constitutes the science of asceticism (q. v.). The spiritual director must be well versed in this science, as his advice is very necessary for such souls. For, as Cassian writes, "by no wise does the devil draw a monk headlong and bring him to death sooner than by persuading him to neglect the counsel of the Elders and trust to his own judgment and determination" (Conf. of John of Patmos).

III. Since, in teaching the Faith, the Holy Ghost speaks through the sovereign pontiff and the bishops of the Church, the work of the private spiritual director must never be at variance with this infallible guidance. Therefore the Church has condemned the doctrines of Molinos, who taught that directors are independent of the bishops; that the Church does not judge about secret matters, and that God and the director alone enter into the inner conscience (Denzinger, Enchiridion, nos. 1132, 1153). Several of the most learned Fathers of the Church devoted much attention to spiritual direction, for instance, St. Jerome, who directed St. Paula and her daughter St. Eustochium; and some of them have left us learned treatises on ascetic theology. But while the hierarchy of the Church is Divinely appointed to guard the purity of faith and morals, the Holy Spirit, who inspires and animated the Church from the day of the Resurrection, is also with and within us. And if we may judge by the Holy Ghost, who through the Holy Spirit inspires and guides the Church, then the Church, being thus guarded, might be said to be infallible in matters of faith and morals. But again, the Church is not infallible in matters of doctrine, nor is the Church infallible in matters of prudence, nor is the Church infallible in matters of discipline.
the Sacrament of Penance." It also forbids them to refuse to their subjects an extraordinary confessor, especially in cases where the conscience of the persons so refused stands greatly in need of this privilege; as also "to take it on themselves to permit at their pleasure to approach the Holy Table, or sometimes to forbid them Holy Communion altogether." The pope abrogates all constitutions, usages, and customs so far as they tend to the contrary; and absolutely forbids such superiors as are here spoken of to induce in any way their subjects to make to them manifestations of conscience. His decree "Quemadmodum," with explanations, in the American Ecclesiastical Review, March, 1893.)

VII. Catholic literature is rich in works of ascetic and mystical theology; of which we mention a few below. But it must be noticed that such works cannot be recommended for the use of all readers indiscriminately. The higher the spiritual perfection aimed at, especially when mysticism enters into the case, the more caution should be used in selecting and consulting the guide-books, and the more danger there is that the direction given in them may be misapplied. Spiritual defects are much a matter for the personal supervision of an experienced living guide as is the practice of medicine; the latter deals with abnormal defects of the body, the former with the acquisition of uncommon perfection by the soul.

Directories, CATHOLIC.—The ecclesiastical sense of the word directory, as will be shown later, has become curiously confused with its secular use, but historically speaking the ecclesiastical sense is the earlier. Directory simply means guide, but in the later Middle Ages it came to be specially applied to guides for the recitation of the Mass. For example, in the early part of the fifteenth century one Clement Mayeston, probably following earlier foreign precedents, adopted the title "Directorium Sacrdotum" for his reorganized Sarum Ordinal. In this way the words "Directorium Sacrdotum" came to stand at the head of a number of books, some of them among the earliest products of the printing press in England, which were issued to instruct the clergy as to the form of Mass and Office to be followed from day to day throughout the year. This employment of the word directorium was by no means peculiar to England. To take one convenient example, though not the earliest that might be chosen, we find a very similar work published at Augsburg in 1501, which bears the title: "Index sive Directorium Missarum Horarumque secundum ritum chori Constantinensis diocesis dicendarum." As this title suffices to show, a directorium is or guide for the recitation of the Mass and Office, manifestly dealing with the needs of a particular diocese or group of dioceses, for as a rule each diocese has certain saints' days and feasts peculiar to itself, and these have all to be taken account of in regulating the Office, a single change often occasioning much disturbance by the necessity it creates of transferring coincident celestial events to other days. Out of the "Directorium Sacrdotum," which in England was often called the "Pye," and which seems to have come into almost general use about the time of the invention of printing, our present Directory, the "Ordo divini Officii recitandi Sacrdorum," has gradually developed. We may mention a few of the characteristics both of the actual and the ancient usage.

Actual Usage.—It is now the custom for every diocese, or, in cases where the calendar followed is substantially identical, for a group of dioceses belonging to the same province or country, to have a "Directorium," or "Ordo recitandi," printed each year for the use of all the clergy. It consists simply of a calendar for the year, in which, there are printed against each day concise directions concerning the Office and Mass to be said on that day. The calendar is usually provided with some indication of fast days, special indulgences, days of devotion, and other items of information which it may be convenient for the clergy to be reminded of as they occur. This Ordo is issued with the authority of the bishop or bishops concerned, and is binding upon the clergy under their jurisdiction. The religious orders have usually a Directory of their own, which, in the case of the larger orders, differs according to the country in which they are resident. For the secular clergy the calendar of the Roman Missal and Breviary, apart from special privilege, always forms the basis of the "Ordo recitandi." To this the feasts and saints' days are added, and, as the higher grade of these special celebrations often causes them to take precedence of those in the ordinary calendar, a certain amount of shifting and transposition is inevitable, even apart from the complications introduced by the movable feasts. All this has to be calculated and adapted to hand in accordance with the rules supplied by the general rubrics of the Missal and Breviary. Even so, the clergy of particular churches have further to provide for the celebration of their own pastoral or dedication feasts, and to make such other changes in the Ordo as these matters only affecting the clergy, it is apt to acquire a somewhat professional and exclusive character.

How long a separate and annual "Ordo recitandi" has been printed for the use of the English clergy it seems impossible to determine. Possibly Bishop Chaloner, Vicar Apostolic from 1741 to 1781, had something to do with its introduction. But in 1759 a Catholic London printer conceived the idea of translating the official "Directorium," or Ordo, issued for the clergy, and accordingly published in that year. "A Latin Directory or a help to find out and assist at Vespers, ... on Sundays and Holy Days." Strange to say, another Catholic printer, seemingly the publisher of the official Ordo, shortly afterwards, conceiving his privileges invaded, produced a rival publication: "The Laity's Directory or the Order of the (Catholic) Church Vestments and Rites," which was issued year by year for three-quarters of a century, gradually growing in size, but in 1837 it was supplanted by "The Catholic Directory," which since 1855 has been published in London by Messrs. Burns & Lambert, now Burns & Oates. The earliest numbers of the "Catholic Directory" contained nothing save an abbreviated translation of the clerical Verordtandi, but towards the end of the eighteenth century a list of the Catholic churches in London, advertisements of schools, obituary notices, important ecclesiastical announcements, and other miscellaneous matters began to be added, and at a still later date we find...
an index of the names and addresses of the Catholic clergy serving the missions in England and Scotland. This feature has been imitated in the "Irish Catholic Directory" and in the Catholic Directories of the United States. Hence the widespread idea that Catholic directories are so-called because they commonly form an address book for the church. It should be noted, however, that the ordinary calendar is peculiar to Scotland, and the examination of the early numbers of the "Laity's Directory" conclusively shows that it was only to the calendar with its indication of the daily Mass and Office that the name originally applied.

In the Middle Ages, and indeed almost down to the invention of printing, the books used in the service of the Church were much more divided up than they are at present. Instead of one book, our modern Breviary for example, containing the whole office, we find at least four books—the Psalterium, the Hymnarium, the Antiphonarium, and the Legendarium, or book of lessons, all in separate volumes. Rubrics or ritual directions were rarely written down in connexion with the text to which they belonged (we are speaking here of the Mass and Office, not of the services of rarer occurrence such as those in the Pontifical), but they were probably at first communicated by oral tradition only, and when they began to be fixed they took the form of a summation, as we find in the "Ordines Romani" of Hittorp and Mabillon. However, about the eleventh century there grew up a tendency towards greater elaboration and precision in rubrical directions for the services, and at the same time we notice the beginning of a more or less strongly marked division of these directions into two classes, which in the case of the Sarum Use are conveniently distinguished as the Customary and the Ordinal. Speaking generally, we may say that the former of these rubrical books contains the principles and the latter their application; the former determines those matters that are constant and primarily the duties of persons, the latter deals with the arrangements which vary from day to day and from year to year. It is out of the latter of these books, i.e., the Ordinal (often called Ordinarium and Liber Ordinarius), that the "Directorium" or "Pye", and eventually also our own modern "Ordo rectandi" were in due time evolved. These distinctions are not clear-cut. The process was a gradual one. But we may distinguish in the English and also in the Continental Ordinals two different stages. We have, first, the type of book in common use from the twelfth to the fifteenth century. It was represented by the "Sarum-Ordinary", edited by W. H. Frere, or the "Ordinaria of Leoun" edited by Chevalier. Here we have a great deal of miscellaneous information respecting feasts, the Office and Mass to be said upon them according to the changes necessitated by the occurrence of Easter and the shifting of the "Sunday" as we may call the "Ineptrica" the details of the service, e.g., of the lessons to be read and the commemorations to be made. The second stage took the form of an adaptation of this Ordinal for ready use, an adaptation with which, in the case of Sarum, the name of Clement Mayeston is prominently connected. This was the "Directorium Sacramenti" or the complete "Pye" (known in Latin as Pica Sarum), abbreviated editions of which were afterwards published in a form which allowed it to be bound up with the respective portions of the Breviary. The Idea of the "Pye" was to give as near as possible, the thirty-five possible combinations, five to each of the Dominical Letters, in which the fixed and movable elements of the ecclesiastical year admitted of, assigning a separate calendar to each, more or less corresponding to our present "Ordo rectandi". This arrangement was peculiar to England. One of the earliest printed books of the kind was that issued about 1475 for the Diocese of Constance, of which a rubricated copy is to be found in the British Museum. It is a small folio in size, of one hundred and twelve leaves, and after the ordinary calendar it supplies summary rules, under thirty-five heads, for drawing up the special calendar for each year according to the Golden Number and the Dominical Letter. Then the Ordo for each of the thirty-five possible combinations is set out in detail. The name most commonly given to these "Pyes" on the Continent is more rarely "Directorium Missae". For example, the title of such a book printed for the Diocese of Liège in 1492 runs: "In nomine Domini Amen... Incipit libri Ordinarius ostendens quod legatur et cantetur per totum annum circulum in ecclesiis leodiensi tam de seminariis quam de festis quos recipit divinis..." Such books were also provided for the religious orders. An "Ordinarium Ordinis Praemonstratensis" exists in manuscript at Jesus College, Cambridge, and an early printed one in the British Museum. When the use of printing became universal, the step from these rather copious directories, which served for all possible years, to a shorter guide of the type of our modern "Ordo recantandi", and intended only for one particular year, was a short and easy one. Since, however, such publications are useless after their purpose is once served, they are very liable to destruction, and it seems impossible to say how early in the year they may date the appearance of a new edition in this fashion. The fact that at the Council of Trent (Sess. XXIII, De Reform., cap. xviii) it was thought necessary to urge that ecclesiastical students should be trained in the understanding of the computus, by which they could determine the ordo rectandi for each year for themselves, seems to imply that such Ordas as we now possess were not in familiar use in the middle of the sixteenth century.

Modern Directories.—At the present day it may be said that in every part of the world not only is a printed Ordo provided for the clergy of every diocese and religious institute, but that almost everywhere some adaptation of this is available for the use of the laity. The earliest English attempt at anything of the sort seems to have been a little "Catholic Almanac", which appeared for three or four years in the reign of James II (see The Month, vol. CXI, 1908). But this was a mere calendar of feasts without any directions for the Office and Mass. In Ireland the work which at present appears under the title "The Irish Catholic Directory and Almanac for 1909", with a complete Directory in English" seems to have existed under various names since 1837 or earlier. It was first called "The Complete Catholic Directory" and "Sarum-Ordinary", and in 1854 "Battersby's Register", from the name of the publisher. For Scotland, though the Scottish missions are included in the "Catholic Directory" published in London, there is also a separate "Catholic Directory for the Clergy and Laity of Scotland" which began under a slightly different name in 1868. Catholic Directories also exist for the Australian and Canadian provinces, and occasionally for separate dioceses, e.g. the Diocese of Birmingham, England, possesses an "Official Directory" of its own. Attention may briefly be called, also, to two Roman handbooks of a character somewhat analogous to our Directories, which supply names and details regarding the Catholic hierarchy throughout the world and especially regarding the cardinals, the Roman Congregations and their personnel, the prelates and camerali, etc., in attendance upon the papal court. The first of these, called "Elenco del Censu dei Cardinali e della Corte Pontificia", was first published in 1716 and was long familiarly known as "Crasus" from the name of the publisher. Officially, the early numbers were simply called "Notizie per l'Anno 1716, etc." (see Moroni, Dizionario, XX, 20 sqq.). The other work, which is much better known in character, but which from its information, has appeared since 1895 under the title "Annuario Ecclesiastico". Finally we notice the
The United States.—These publications begin in the United States with an "Ordo Divini Officii Recitandi", published at Baltimore, in 1801, by John Hayes. It had none of the directory or almanac features. "The Catholic Laity's Directory to the Church Service with an Almanac for the year", an imitation of the English enterprise, was published in 1817. It was published in New York with the permission of the Right Rev. Bishop Connolly by Mathew Field, who was born in England of an Irish Catholic family and left there for New York in 1815. He died at Baltimore, 1832. His son, Joseph M. Field, was six years old when he arrived in New York, and became an influential and business-minded man. He died at Baltimore in 1856. Joseph's daughter, Kate Field, was later the well-known author and lecturer. Though both were baptised, neither was a profesed Catholic. This Field production, in addition to the ordinary almanac calendars, had a variety of pious and informative reading matter with an account of the churches, colleges, seminaries, and institutions of the United States. It made up a small 32mo book of sixty-eight pages. Among other things, it promised the preparation of a Catholic magazine which, however, was never started. The next effort in the same direction, and on practically the same lines, was also at New York, in 1822, by W. H. Creagh. It was edited by the Rev. Dr. John Power, rector of St. Peter's church, and says in the preface that it was "intended to accompany the Missal with a view to facilitate the use of the Liturgy". The contents include "the account of the Establishment of the Episcopacy in the United States"; "Present State of religion in the respective Dioceses"; "A short account of the present State of the Society of Jesus in the U. S. "; and obituaries of priests who had died from 1811 to 1821. This was the only number of this almanac.

In 1834 Fielding Lucas of Baltimore took up the idea and brought out "The Metropolitan Catholic Calendar and Laity's Directory" for that year, to be published annually. He said in it that he had "intended to present it in 1832 but from circumstances over which he had no control it has been delayed to the present period." It printed a list of the hierarchy and the priests of the several dioceses, with their stations. In this publication and its various successors the title Directory is used in its purely secular meaning, as the issues include ecclesiastical calendars, or Diocesan Annals. The last number of the series, 1845, was published at Baltimore, "prepared at much expense to exhibit at a glance the extent and relative situation of the different dioceses", with a table of comparative statistics, 1835 to 1845. A list of the clergy in England and Ireland was added in the volume for 1850. "Lucas Brothers" is the imprint on the almanac for 1856-57, and the Baltimore publication then ceased, to be taken up in 1858 by Edward Dunigan & Brother of New York, as "Dunigan's American Catholic Almanac and List of the Clergy". All general reading matter was omitted in this almanac, publication of which was stopped following the following: John Murphy & Co. of Baltimore, and there the compilation of the "Metropolitan Catholic Almanac". Owing to the Civil War no almanacs were printed during 1862 or 1863. In 1864 D. & J. Sadler of New York started "Sadler's Catholic Directory, Almanac and Ordo", which John Gilmary Shea compiled and edited for them. It made a volume of more than half that number of pages and gave lists of the clergy in the United States, Canada, Great Britain, Ireland, and Australasia, with diocesan statistics. This publication continued alone in the field until 1896, when Hoffman Brothers, a German family of publishers of Milwaukee, brought out "Hoffman's Catholic Directory", which Rev. James Fagan, a Milwaukee priest, compiled for them. In contents it was similar to the New York publication. This directory continued until 1896, when the Hoffman Company failed, and their plant was purchased by the Wiltzius Company, which has since continued the directory. The Sadler "Directory" ceased publication in 1895.

The Wiltzius "Catholic Directory, Almanac and Clergy List" has reports for all dioceses in the United States, Canada, Alaska, Cuba, Sandwich Islands, Porto Rico, Philippine Islands, Newfoundland, England, Ireland, Scotland, and Wales, and contains statistics of the Austro-Hungarian Monarchy, Belgium, Costa Rica, Guatemala, British Honduras, Nicaragua, San Salvador, German Empire, Japan, Luxemburg, the United States of Mexico, Netherlands, Norway, Oceania, South Africa, The United States of Brazil, Curacao, Dutch Guiana, Switzerland, and the West Indies. It contains also an alphabetical list of all clergymen in the United States and Canada, as well as a map of the ecclesiastical provinces in the United States. It gives a list of English-speaking confessor missions to the American colleges in Europe, and the leading Catholic societies; statistics of the Catholic Indian and Negro missions, and a list of Catholic newspapers and periodicals in the United States and Canada.

In the almanac for 1837 it is noted, concerning the statistics, that "the numbers marked with an asterisk are not given as strictly exact, though it is believed they approximate to the truth, and are as accurate as could be ascertained from the statements forwarded to the editor from the several dioceses." On the same topic "Hoffman's Directory" for 1890 says: "It is much to be regretted that the statistics are not more carefully kept. In every diocese there are parishes that fail to report and many diocesan reports statistics only partially, so that any general summary that can be made up at best is only an approximation."

Dealing with this long-standing and well-founded complaint of inaccurate Catholic statistics, the archbishops of the United States, at their annual meeting in 1907, resolved to co-operate with the United States Census Bureau in an effort to collect correct figures. Archbishop Glennon of St. Louis was appointed a special census official by the Government for this purpose and under his direction an enumeration of the Catholics of every parish in the United States was made. The figures thus obtained were used in the "Directory" for 1909. It is the first, therefore, of these publications giving statistics of population on which any reliance can be placed in respect to accuracy, as inserted a map of the United States.
Bishops of Quebec in the issue for 1908, in commemoration of the centenary celebrations. The Rev. Charles P. Beauchien edited the publication.

**Displaced (Lat. *dis*, without, and *cudaeus*, shoe), a term applied to those religious congregations of men and women, the members of which go entirely unshod or wear sandals, with or without other covering for the feet. These congregations are often distinguished on this account from other branches of the same order. The custom of going unshod was introduced into the West by St. Francis of Assisi for men and St. Clare for women. After the various modifications of the Rule of St. Francis, the Observantines adhered to the primitive custom of going unshod, and in this they were followed by the Minims and Capuchins. The Discalced Franciscans or Alcantarines, who prior to 1597 formed a distinct branch of the Franciscan Order went without footwear of any kind. The followers of St. Clare at first went barefoot, but later came to wear sandals and even shoes. The Colettines and Capuchin Sisters returned to the use of sandals. Sandals were also adopted by the Camaldolese monks of the Congregation of Monte Corvino (1522), the Carmelite Canons, the Poor Hermits of St. Jerome of the Congregation of Bl. Peter of Pisa, the Augustinians of Thomas of Jesus (1532), the Barefooted Servites (1593), the Discalced Carmelites (1568), the Prévôtés (1573), Trinitarians (1594), Mercedarians (1604), and the Passionists. **Discernment of Spirits.**—All moral conduct may be summed up in the rule: avoid evil and do good. In the language of Christian asceticism, *spirits*, in the broad sense, is the term applied to certain complex influences, capable of impelling the will, the ones toward good, the others toward evil; we have the worldly spirit of error, the spirit of race, the spirit of Christianity, etc. However, in the restricted sense, *spirits* indicate the various spiritual agents which, by their influences and movements, may influence the moral value of our acts. Here we shall speak only of this second kind. They are reduced to four, including, in a certain way, the human soul itself, because in consequence of the original Fall, its lower faculties are at variance with its superior powers. Consequence, that is to say, disturbances of the imagination and of the sensibility, thwart or pervert the operations of the intellect and will, by deterring the one from the true and the other from the good (Gen. viii, 21; James, i, 14). In opposition to our vitiated nature or, so to speak, to the flesh which drags us into sin, the Spirit of God acts within us. Hence, a supernatural help given to our intellect and will to lead us back to good and to the observance of the moral law (Rom., vii, 22-25). Besides these two spirits, the human and the Divine, in the actual order of Providence, two others must be observed. The Creator willed that there should be communication between angels and men, and as the angels are of two kinds (see *Angels*), good and bad, the latter try to win us over to their rebellion and the former endeavour to make us their companions in obedience. Hence four spirits lay siege to our liberty: the angelic and the Divine seeking the good and the human (in the limited sense, i.e., the human intellect): the diabolical its misery. In ordinary language they may, for brevity sake, be called simply the good and the evil spirit.

Discernment of spirits is the term given to the judgment whereby to determine from what spirit the im-
Disciple.—This term is commonly applied to one who is learning any art or science from one distinguished by his accomplishments. Though derived from the Latin discipulus, the English name conveys a meaning somewhat narrower than its Latin equivalent: disciple is opposed to master, as scholar to professor, whilst both disciple and scholar are included under the Latin disiculus. In the English versions of the Old Testament the word disciple occurs only once (Is., viii., 16); but the idea it conveys is to be met with in several other passages, as, for instance, when the Speaker of the book of Proverbs speaks of the "sons of the prophets" (IV K., ii, 7); the same seems, likewise, to be the meaning of the terms children and son in the Sapiential books (e.g. Prov., iv, i, 10; etc.). Much more frequently does the New Testament use the word disciple in the sense of pupil, adherent, one taught by the Master's word (Matt., xxii., viii, 31). So also, read of disciples of Moses (John, ix, 28), of the Pharisees (Matt., xxiii., 16; Mark, ii, 18; Luke, v, 33), of John the Baptist (Matt., x., 14; Luke, vii, 18; John, iii, 25). These, however, are only incidental applications, for the word is almost exclusively used of the Disciples of Jesus.

In the Four Gospels it is most especially applied to the Apostles, sometimes styled the "twelve disciples" (Matt., x., 1; xi., 1; xx, 17; xxvi., 20; the sixteenth verse of chapter xxvii., having reference to events subsequent to Christ's Passion, mentions only the "eleven"), at times merely called the "disciples" (Matt., xiv., 19; xv., 33, 36, etc.). The expression "his disciples" frequently has the same import. Occasionally the Evangelists give the word a broader sense and make it a synonym for believer (Matt., x., 42; xxvii., 57; John, iv., 1; ix., 27, 28, etc.). Besides the designation of "Apostle" and that of "believer" there is a third one, found in St. Luke, and perhaps also in the other Evangelists. St. Luke narrates (vi, 13) that Jesus "called unto him his disciples, and he chose twelve of them (whom also he named apostles)". The disciples in this context, are the followers who flocked around Christ, but a smaller body of His followers. They are commonly identified with the seventy-two (seventy, according to the received Greek text, although several Greek MSS. mention seventy-two, as does the Vulgate) referred to (Luke, x., 3) as having been chosen by Jesus. The names of these disciples are given in several lists (Chronicon Paschale, and Pseudo-Dorotheus in Migne, P. G., XCII, 521–524; 543–545; 1061–1065): but these lists are unfortunately worthless. Eusebius positively asserts that no such roll existed in his time, and mentions among the disciples only Barnabas, Simeon, Thomas, Matthias, Thaddeus, and James "the Lord's brother" (Hist. Eccl. I., xii). In the Acts of the Apostles the name disciple is exclusively used to designate the converts, the believers, both men and women (vi, 1, 2, 7; ix, 1, 10, 19; etc.; in reference to the latter connotation see in particular ix, ix, 19), even such as were only imperfectly instructed, like those found by St. Paul at Ephesus (Acts, xix, 1–5).

---

**Charles L. Souvey.**

Disciples of Christ, a sect founded in the United States of America by Alexander Campbell. Although the largest portion of his life and prodigiously active work was spent in the United States, Alexander Campbell was born, 12 Sept., 1788, in the County Antrim, Ireland. On his father's side he was of Scotch extraction; his mother, Jane Conrigeal, was of Huguenot descent. Both parents are reported to have been persons of deep piety and high literary culture. His father, after serving as minister to the Anti-Burgher Church in Aboyne and director of a prosperous academy at Richhill, emigrated to the United States and engaged in the off-attempted and ever futile effort "to unite all Christians as one communion on a purely scriptural basis", the hallucination of so many noble minds, the only outcome of which must always be, against the will of the Founder, to increase the discord and Christendom by the creation of a new sect.

On 12 June, 1812, with his wife, father, mother, and three others, Alexander was rebaptized by immersion. Nothing was left him now but to seek association with one or other of the numerous Baptist sects. This he did, but with the proviso that he should be allowed to preach and teach whatever he learned from the Holy Scriptures. The Baptists never took him cordially; and in 1817, after five years of herculean labours, his followers, whom he wished to be known by the appellation of "Disciples of Christ", but who were generally styled "Campbellites", numbered only one hundred and fifty persons. Campbell's mission as a messenger of peace was a failure; as time went on he developed a polemical nature, and became a sharp critic in speech and in writing of the weaknesses and vagaries of the Protestant sects. Only one did he come in direct contact with the Catholics, on the occasion of his five days' debate, in 1837, with Archbishop Purcell of Cincinnati, which excited great interest at the time but is now forgotten. His sixty volumes are of no interest. Campbell was twice married and was the father of twelve children.
He died at Bethany, West Virginia, where he had established a seminary, 4 March, 1848.

According to their census prepared in 1906 the sect then had 6175 ministers, 11,653 churches, and a membership of 1,253,394. It is strongest in the West and South, especially in Missouri, Indiana, Illinois, Kentucky, and Ohio having the largest bodies. J. H. Garrison, editor of their organ “The Christian Evangelist”, outlines (1906) the belief of his sect. According to their investigations of the New Testament the confession of faith made by Simon Peter, on which Jesus declared he would build His Church, namely “Thou art the Christ, the Son of the living God,” was the creed of Christianity and the essential faith, and that all those who would make this confession from the heart, being penitent of their past sins, were to be admitted by baptism into the membership of the early Church; that baptism in the early Church consisted of the burial of a penitent believer in water in the name of the Father, and of the Son, and of the Holy Spirit, and that only such were fit subjects for baptism; that the form of church government was congregational; that each congregation had its deacons and elders or bishops, the former to look after the temporal and the latter the spiritual interests of the church; that they preach weekly communion and consider it not as a sacrament but as a memorial feast. While they hold both New and Old Testaments to be equally inspired, both are not equally binding upon Christians. Accepting the Bible as an all-sufficient revelation of the Divine will, the sect employs all authoritative creeds and human grounds of fellowship.

Discipline, Ecclesiastical.—Etymologically the word discipline signifies the formation of one who places himself at school and under the direction of a master. All Christians are the disciples of Christ, desiring to form themselves at His school and to be guided by His teachings and precepts. He called Himself, and we, too, call Him, Our Master. Such, then, is evangelical discipline. However, in ecclesiastical language the word discipline has been invested with various meanings, which must be here enumerated and specified.

I. Meaning of Discipline.—All discipline may be considered first in its author, then in its subject, and finally in itself. In its author it is chiefly the method employed for the formation and adaptation of the precepts and directions to the end to be attained, which is the perfect conduct of subjects; in this sense discipline is said to be severe or mild. In those who receive it discipline is the more or less perfect conformity of acts to the directions and formation received; it is in this sense that discipline may be said to flourish in a monastery. Or, again, it is the obligation of subjects to conform their acts to precepts and directions, and is thus defined by Cardinal Cusanus: “Praeclarum astutorum facit consensum—’conduct conforming itself to faith’” (Inst. jur. publ. eccl. Bk. IV, n. 147). More frequently, however, discipline is considered objectively, that is, as being the precepts and measures for the practical guidance of subjects. Thus understood ecclesiastical discipline is the aggregate of laws and directions given by the Church to the faithful for their conduct both public and private. This is discipline in its widest acceptance, and includes natural and Divine as well as positive laws, and faith, worship, and morals; in a word, all that affects the conduct of Christians. But if we eliminate laws merely inspired by the Church as the exponent of natural or Divine law, there remain the laws and directions laid down and formulated by ecclesiastical authority for the guidance of the faithful; this is the restricted and more usual acceptance of the word discipline. Nevertheless, it must be understood that this distinction, however justified, is not made for the purpose of separating ecclesiastical laws into two clearly divided categories in so far as practice is concerned; the Church does not always make known to which class of laws she speaks in the name of the natural or Divine law, and with this corresponds the observance of laws by her subjects.

II. Object of Discipline.—Since ecclesiastical discipline should direct every Christian life, its object must differ according to the obligations incumbent on each individual. The first duty of a Christian is to believe; hence dogmatic discipline, by which the Church proposes what we should believe and so regulates our conduct that it shall not fail to assist our faith. Dogmatic discipline springs from the power of magisterium, i.e. the teaching office, in the exercise of which power the Church can proceed only by declaration; therefore it is ecclesiastical discipline only in a broad sense. The second duty of Christians is to observe the Commandments, hence moral discipline (disciplina morum). Strictly understood the latter does not depend much more upon the Church than the first; it is the natural discipline of the Christian. They proceed by the weekly observance of the Sacrament and superior to ecclesiastical law; however, the Church authoritatively proposes to us the moral law, she specifies and perfects it; hence it is that we generally call moral discipline whatsoever directs the Christian in those acts that have a moral value, including the observance of positive laws, both ecclesiastical and secular. Among the chief duties of a Christian the worship of God must be assigned a place apart. The rules to be observed in this worship, especially public worship, constitute liturgical discipline. This cannot be said to depend absolutely upon the Church, as it derives the essential part of its laws and rules of the Sacraments from Jesus Christ; however, for the greater part, liturgical discipline has been regulated by the Church and includes the rites of the Holy Sacraments, the administration of the Sacraments and of the sacramentals, and other ceremonies.

There still remain the obligations incumbent on the faithful considered individually, either on the members of different groups or classes of ecclesiastical society, or, finally, on those who are to any extent whatever depositaries of a portion of the authority. This is discipline properly so called, exterior discipline, established by the free legislation of the Church (not, of course, in a way absolutely independent of natural or Divine law, but outside of, yet akin to this law) for the good government of society and the sanctification of individuals. On individuals it imposes common precepts (the Commandments of the Church); then it states their mutual obligations, in conjugal society by matrimonial discipline, in larger societies by denominating relations with ecclesiastical superiors, parish priests, bishops, etc. Special classes also have their own particular discipline, there being clerical discipline for the clergy and religious or monastic discipline for the religious. The government of Christian society is in the hands of prelates and superiors, and is subject to a special discipline either for the conditions of their recruitment, for the determining of their privileges and duties, or for the manner in which they should fulfill their functions. We may include here the rules for the administration of temporal goods. Finally, any authority from which emanate those or which emanate which should have power to ratify the same by penal measures applicable to all transgressors; hence, another object of discipline is the imposing and inflicting of disciplinary sanctions. It must be noted, however, that the object of these measures is to ensure observance or to chastise infractions of the natural and Divine as well as of ecclesiastical laws.

III. Disciplinary Power of the Church.—It is evident, therefore, that the disciplinary power of the
Discipline is a phase, a practical application, of its power of jurisdiction, and includes the various forms of the latter, namely, legislative, administrative, judicial, and coercive power. As for the power of order (potestas ordinis), it is the basis of liturgical discipline by which its exercise is regulated. Moreover, the power of the Church is a society and, as such, it necessarily has the power of jurisdiction which it derives from Divine institution through the Apostolic succession, see Church. Disciplinary power is proved by the very fact of its exercise: it is an organic necessity in every society whose members it guides to its end by providing the will of action. Historically it can be shown that a disciplinary power has been exercised by the Church uninterruptedly, first by the Apostles and then by their successors. The Apostles in the first council at Jerusalem formulated rules for the conduct of the faithful (Acts, xv).

St. Paul gave moral advice to the Christians of Corinth on virginity, marriage, and the agape (1 Cor., vii, xi). The Pastoral Epistles of St. Paul are a veritable code of clerical discipline. The Church, moreover, has never ceased to represent herself as charged by Christ with the guidance of mankind in the way of eternal salvation. The Council of Trent enjoins the Church to manifest the power of the Sacraments in all that concerns liturgical discipline and Divine worship (Sess. XXI, c. ii): “In the administration of the sacraments, the substance of the latter remaining intact, the Church has always had power to establish or to modify whatever she considered most expedient for the utility of those who receive them, or best calculated to ensure respect for the sacraments themselves according to the various circumstances of time and place.” In fact, we need only to recall the numerous laws enacted by the Church in the course of centuries for the maintenance, development, or restoration of the moral and spiritual life of Christians.

V. Disciplinary Infallibility.—What connexion is there between the discipline of the Church and her infallibility? Is there a certain disciplinary infallibility? It does not appear that the question was ever discussed in the past by theologians unless apropos of the laws and the question of the modifications of religious orders. It has, however, found a place in all recent treatises on the Church (De Ecclesia). The authors of these treatises decide unanimously in favour of a negative and indirect rather than a positive and direct infallibility, inasmuch as in her general discipline, i.e. the common laws imposed on all the faithful, the Church can prescribe nothing that would be contrary to the natural or the Divine law, nor prohibit anything that the natural or the Divine law would expect. If well understood this thesis is undeniable; it amounts to saying that the Church does not and cannot impose practical directions contradictory of her moral teaching. It is quite clear that to inquire how far this infallibility extends, and to what extent, in her disciplinary activity, the Church makes use of the privilege of inerrancy granted her by Jesus Christ when she defines matters of fact and morals. Infallibility is directly related to the teaching office (magisterium), and although this office and the disciplinary power reside in the same ecclesiastical authorities, the disciplinary power does not necessarily depend directly on the teaching office. Teaching pertains to the order of truth; legislation to that of justice and prudence. Doubtless, in last analysis all disciplinary laws are based on certain fundamental truths, but as laws their purpose is neither to confirm nor to condemn these truths. It does not seem, therefore, that the Church needs any special privilege of infallibility to prevent her from enacting laws contradictory of her doctrine. To claim that disciplinary infallibility consists in regulating, without possibility of error, the adaptation of a general law to its end, is equivalent to the assertion of a (quite unnecessary) positive infallibility, which the incessant abrogation of laws would belie and which would be to the Church a burden and a hindrance rather than an advantage, since it would prevent her from observing the best. Moreover, this would make the application of laws to their end the object of a positive judgment of the Church; this would not only be useless but would become a perpetual obstacle to disciplinary reform.

From the disciplinary infallibility of the Church, correctly understood, as an indirect consequence of her doctrinal infallibility, it follows that she cannot be rightly accused of introducing into her discipline anything opposed to the Divine law; the most remarkable instance of this being the suppression of the chalice in the Communion of the laity. This has often been wrongly attacked as done by the Church with her discipline. This changes with time, grows old with the years, is rejuvenated, is subject to growth and decay. Though in its early days admirably vigorous, with time defects crept in. Later it overcame these defects and although along some lines its usefulness increased, in other ways its first splendour waned. That in its old age it languishes is evident from the leniency and indulgence which now seem absolutely necessary. Moreover, all things fairly considered, it will appear that old age is a higher stage than their defects and good qualities.” Were it necessary to exemplify the mutability of ecclesiastical discipline it would be perplexing indeed to make a choice. The ancient catechumeneate exists only in a few rites; the Latin Church no longer gives Communion to the laity under two kinds; the Church has undergone a profound evolution; matrimonial law is still subject to modifications; fasting is not what it formerly was; the use of censures in penal law is but the shadow of what it was in the Middle Ages. Many other examples will easily occur to the mind of the well-informed reader.
DISCIPLINE

kind] must be regarded as erroneous, and those who obstinately affirm it must be cast aside as heretics."

The opinion, generally admitted by theologians, that the Church is infallible in her approbation of religious orders, must be interpreted in the same sense; it means that in her regulation of life destined to provide for the practice of the evangelical counsels she cannot come into conflict with these counsels as received from Christ together with the rest of the Gospel revelation. (See Roman Congregations.)

T. Massin, Vetus et nova Ecclesiae disciplina (ed. Lyons, 1706), preface; J. J. Kellner in Kirchenlex., s.v.: Disciplina; all treatises on public ecclesiastical law, especially by Curatag, Inst. jur. publ. and canon, 1865, I, ch. 125, and II, ch. 315, which consist essentially in theological works, especially in Hunter, Theol. dogm. comp. (Hins Thatcher, 1875); I, thesis, viii, and Wilmers, De Christi Ecclesiae (Ratisbon, 1887), 480 sq.

A. Bouillon.

Discipline of the Secret (Lat. Disciplina Arcani; Ger. Arcandisciplinare), a theological term used to express the custom which prevailed in the earliest ages of the Church, by which the knowledge of the more intimate mysteries of the Christian religion was carefully kept from the heathen and even from those who were undergoing instruction in the Faith. The custom itself is beyond dispute, but the name for it is comparatively modern, and does not appear to have been used before the controversies of the seventeenth century, when special dissertations bearing the title "De disciplina arcani" were published both on the Protestant and the Catholic side.

The origin of the custom must be looked for in the recorded words of Christ: "Give not that which is holy to dogs; neither cast ye your pearls before swine; lest perhaps they trample them under their feet, and turn upon you, they tear you" (Matt., viii, 7), "The practice is so essentially vouchèd for by St. Paul's assurance that he had led the Corinthians "as . . . little ones in Christ", giving them "milk to drink, not meat", because they were not yet able to bear it (1 Cor., iii, 1-2).

With this passage we may compare also Heb., v. 12-14, where the same illustration is used, and it is declared that "solid food is for the perfect; for them who by custom have their senses exercised to the discerning of good and evil." Although the origin of the custom is thus to be traced back to the very beginnings of Christianity, it does not appear to have been so general, or to have been carried out with so much strictness in the earlier centuries as it was immediately after the persecutions had ceased. This may be due in part to the absence of detailed information with regard to the earlier period, but it is probable enough that the discipline was growing more strict all through the second and third centuries on account of the pressure of persecution, and that, when persecution was at last relaxed, the need for reserve was felt at first, while the Church was still surrounded by hostile paganism, to be increased rather than diminished. After the fifth or sixth century, when Christianity was thoroughly established and secure, the need of such a discipline was no longer felt, and it passed rapidly away. The practice of reserve (secreta disciplina) was exercised mainly in two directions, in dealing with catechumens, and with the heathen. It will be convenient to treat of these separately, as the reasons for the practice, and the mode in which it was carried out, differ somewhat in the two cases.

(1) Catechumenum. — It was desirable to bring learners slowly and by degrees to a full knowledge of the Faith. A convert from heathenism could not profitably be inculcated into the whole Catholic religion at once, and must be taught gradually. It would be necessary for him to learn first the great truth of the unity of God, and not until this had sunk deep into his heart could he safely be instructed concerning the Blessed Trinity. Otherwise tritheism would have been the inevitable result. So again, in times of persecution, it was necessary to be very careful about those who offered themselves for instruction, and who might be spies wishing to be instructed only that they might betray. The doctrines to which the reserve was more especially applied were those of the Holy Trinity and the sacrament of the Holy Eucharist. The Lord's Prayer too, was jealously guarded from the knowledge of all who were not fully instructed. With regard to the Holy Eucharist and the Lord's Prayer some relics of the practice still survive in the Church. The Mass of the Catechumens, that earliest portion of the Christian service to which learners and neophytes were admitted, and which consisted of prayers or readings from Holy Scripture and sometimes included a sermon, is still quite distinguishable, though the custom no longer survives in the Western Liturgy, as it does in the Eastern, of formally bidding the uninitiated to depart when the more solemn part of the service is about to begin. So also the custom of saying the Lord's Prayer in silence in all public services, except the latter part of the Mass, when catechumens would according to the ancient use no longer have been present, preserves its origin to this discipline.

The earliest formal custom for the custom seems to be Tertullian (Apol., vii): "Omnia mysteriorum silentii jubes adhibetur." Again, speaking of heretics, he complains bitterly that their discipline is lax in this respect, and that evil results have followed: "Among them it is doubtful who is a catechumen and who a heretic; all can come in and they hear side by side and pray together; even heathens, if any chance to come in. That is how they cast the dogs to the dogs, and their pearls, though to be sure they are not real ones, they fling to the swine." (Prescr. adv. Haer., xli). Other passages from the Fathers which may be cited are St. Basil (De Spiritu, 103): "They must not be told to the uninitiated"; St. Gregory Nazianzen (Oratio xi, in S. Bap.): "where he speaks of a difference of knowledge between those who are without and those who are within, and St. Cyril of Jerusalem, whose "Catechetical Discourses" are entirely built upon this principle, and who in his first discourse cautions his listeners not to tell what they have heard. "Should a catechumen ask what the teachers have said, tell nothing to a stranger; for we deliver to thee a mystery . . ." Let no man say to thee, What harm is there in what I also know? Let it out nothing; not that what is said is not worth telling, but that he that hears does not deserve to receive it. Thou wast once a catechumen, and then I told thee not what was coming. When thou hast come to experience the height of what is taught thee, thou wilt know that the catechumens are not worthy to hear them" (Cat., Lect. i, 12). St. Augustine and St. Chrysostom in like manner frequently stop short in their public addresses, and, after a more or less veiled reference to the mysteries, continue with: "The initiated will understand what I mean."
censure applied to all the sacraments, and no catechumen was ever allowed to be present at their celebration. St. Basil (De Spir. S. ad Amphilocho, xxvii) speaking of the sacraments says: “One must not circulate in writing the doctrine of mysteries which none but the initiated are allowed to see.” For his reference may be made to Theodoret (Epitom. Decret., xviii), St. Cyril of Alexandria (Contr. Julian., i), and St. Gregory Nazianzen (Orat. xi, de bapt.).

The discipline with respect to the Holy Eucharist of course requires no proof. It is involved in the very nature of the Missa Catechumenorum, and one can scarcely turn to any passage of the Fathers which deals with the subject in which the reticence to be observed is not expressly stated. Confirmation was never spoken of openly. St. Basil, in the treatise already quoted (De Spir. S., xxv, 11), says that no one has ever ventured to speak openly in writing of the holy oil of unction, and Innocent I, writing to the Bishop of Gubbio on the sacramental “form” of this ordinance answers: “I dare not speak the words, lest I should seem rather to betray a trust, than to respond to a request for information” (Epist., i, 3). Holy oil, for the same way were never given public. The Council of Laodicea forbade it definitely in its fifth canon. St. Chrysostom (Hom. xvi in II Cor.), in speaking of the practice of begging the prayers of the faithful for those who are to be ordained, says that those who understand co-operate with and assist to who do so. “For it is not lawful to reveal anything to those who are yet uninitiated.” So also St. Augustine (Tract xi, in Joann.): “If you say to a catechumen, Dost thou believe in Christ? he will answer, I do, and will sign himself with the Cross. . Let us ask him, Dost thou eat the Flesh of the Son of Man and drink the Blood of the Son of Man? He will not know what we mean, for Jesus has not trusted himself to him.”

The Heathen.—The evidence for the reserve of Christian writers when dealing with religious questions in books which might be accessible to the heathen is, naturally, to a large extent of a negative character, and therefore difficult to produce. Theodoret (Quest. xv in Num.) lays down the general principle in terms which are quite clear and unmistakable: “We speak in obscure terms concerning the Divine Mysteries, on account of the unintoxicated, but what we have withdrawn from the initiated, we reveal plainly.” That passage alone would suffice to refute the allegation not unfrequently made that the Discipline of the Secret was a confinement of the knowledge of the mysteries of the Faith to a chosen few, and was introduced in imitation of the heathen “mysteries.” On the contrary all Christians were taught the whole truth, there was no esoteric doctrine, but they were brought to full knowledge slowly, and precautions were taken, as was very necessary, to prevent heathens from learning anything of which they might make an evil use. A very striking example of the way in which the discipline was observed is found in the writings of St. Chrysostom. He writes to Pope Innocent I to say that in the course of a disturbance at Constantinople an act of irreverence had been committed, and “the blood of Christ had been spilt upon the ground.” In a letter to the reason for not speaking plainly. But Palladius, his biographer, speaking of the same incident in a book for general reading, says only, “They overturned the symbols” (Chrys. ad Inn., i, 3 p. G., L.I, 534; cf. Döllinger, “Lehre der Eucharistie,” 15). It is, no doubt, on this account that almost all the early apostles who are associated with Felix, Athanasius, Arnoldobius, Tatian, and Theophilus, are absolutely silent on the Holy Eucharist. Justin Martyr and to a less degree Tertullian are more outspoken; the frankness of the former has been unduly urged to prove the non-existence of this institution in the first half of the second century. So again, as Cardinal Newman has observed (Development, 27), both Minucius Felix and Arnobius in controversy with heathens deny absolutely that Christians used altars in their churches. The obvious meaning was that they did not use altars in the sense that the heathen sensibly understood it. For his reason may be seen as denying the teaching of the Epistle to the Hebrews, that, in a Christian sense, “we have an altar.”

The controversial importance of this subject in more recent times is, of course, obvious. The Catholics answered the accusation of Protestant writers, that their special doctrine could not be found in the writings of the early Fathers, by showing the existence of this practice of reserve. If it was forbidden to speak or write publicly of these doctrines, silence was completely accounted for. So again, if here and there in early writings terms were used which seemed to countenance Protestant teaching—as for instance by speaking of the Holy Eucharist as symbols—it became necessary always to examine whether these terms were not used intentionally to conceal the true doctrine from the unintoxicated, and whether the same writers did not, under other circumstances, use much more definite language. Protestant controversialists, therefore, endeavoured first of all to show that the practice had ever really existed, and then when they were driven from this position, they asserted that it was unknown to the earliest Christians, as shown by the freedom with which Justin Martyr speaks on the doctrine of the Holy Eucharist, and the great result of persecution. They alleged therefore that Catholics could not use it to account for the silence of any writer before the latter part of the second century at the earliest. To this Catholics responded that, although no doubt the practice may have been intensified through persecution, it goes back to the very beginnings of Christianity, and to Christ’s own words. Moreover it can be shown to have been in force before St. Justin’s time, and his action must be regarded as an exception, rendered necessary by the need for putting before the emperor an account of the Christian religion which should be true and full.

The monuments of the earliest centuries afford interesting examples of the principle of the Discipline of the Secret. Monuments which could be seen by all could only speak of the mysteries of religion under veiled symbols. So in the catacombs there is scarcely an instance of a painting of a subject which is directly Christian, although all spoke of Christian truth to those who were instructed in their meaning. Jewish subjects typical of Christian truths were commonly chosen, while the representation of Christ under the name and form of a fish (see Fish) made the allusion to the doctrine of the Holy Eucharist possible and plain. There is, for example, the famous Autun inscription (see Pecotrinius): “Take the fish, honey-sweet, of the redeemer of the saints, eat and drink holding the Fish in thy hands”; words which every Christian would understand at once, but which conveyed nothing to the heathen. The name of Abercius (q. v.) offers another notable instance.

The need for this reticence became less pressing after the fifth century, as Europe became Christianized and the discipline gradually passed away. We may, however, still see its effects in that they must not be entirely in the absurd misstatements contained in the Koran on the subject of the Blessed Trinity and the Holy Eucharist. This, perhaps, is almost the last instance which could be brought forward. Once the doctrines of the Church had been publicly set forth, any such indiscretion became impossible. It must be noted that in the second half of the first millennium the practice was practicable. For a refutation of the theory of G. Anrich (Das antike Mysterienwesen, 1894), that the primitive Christians borrowed this practice from the mysteries of Mithra, see Cumont, “The Mysteries of Mithra.” (London, 1903), 196–99.
De reconditá vet. Ecclei. theol. (Heimste, 1670); Schrollinger, Dissert. de Dioce. arc. (Venice, 1730); Lienhardt, De antiqu. litteris (Strassburg, 1825); Tolstoi, De use d. litteris (Cologne, 1836); Weiss, Die altkirchl. Pädagogik (1869); Marpigny, Diei. Newman, Arias, i., §. Among Protestant writers are: De Dioce. arc. in, vet. Ecclei. (Leona, 1853); Rotte, De Dioce. arc. (Heidelberg, 1841); Credner in Jenaer Literaturzeitung (1844); Bonwetsch, Uber Eiren, Eintr. u. Gewinnung d. Eiren in Zeitzeichen, fur kat. Theol. (1872), 203-299; cf. also Bingham, Antiq. Ecclei., and the Archiv für Liturg. De disziplin ciplina Martigny, revealed decently (1873), can be highly instructive. In these discussions have been held at the instigation of the civil authorities; for the Church has rarely yielded to any sort of pressure to the extent of venturing revealed truths. This attitude of opposition on the part of the Church is wise and intelligent. A champion of orthodoxy, possessed of all the qualifications essential to a public debater, is not easily to be found. Moreover, it seems highly improper to give the antagonists of the Church the opportunity to conceal mysteries of the institutions which should be spoken of with reverence. The fact that the Catholic party to the controversy is nearly always obliged to be on the defensive places him at a disadvantage before the public, who, as Demosthenes remarks, “listen eagerly to realizations and accusations.” At any rate, the Church of Revelation, cannot abridge her office and permit a jury of more or less competent individuals to decide upon the truths committed to her care.

St. Thomas (II-II, Q. x, a. 7) holds that it is lawful to dispute publicly with unbelievers, under certain conditions. To discuss as doubting the truth of the faith, is a sin; to discuss for the purpose of refuting error, is praiseworthy. At the same time the character of the audience must be considered. If they are well instructed and firm in their belief, there is no danger; if they are simple-minded, then, where they are solicited to abandon their own beliefs, the order of defence is needed, provided it can be undertaken by competent parties. But where the faithful are not exposed to such perverting influences, discussions of the sort are dangerous. It is not, then, surprising that the question of disputations with heretics has been made the subject of ecclesiastical legislation. By a decree of Alexander IV (1254-1261) inserted in “Sextus Decretalium”, Lib. V, c. ii, and still in force, all laymen are forbidden, under threat of excommunication, to dispute publicly or privately with heretics on the Catholic Faith. The text reads: “Inhibe qumque, qui vult cum aliquo, iuxta fide catholicae disputare. Qui vero contra fecerit, excommunicationis laqueo inocuatur.” (We furthermore forbid any lay person to engage in disputations, either private or public, concerning the Catholic Faith. Whoever shall act contrary to this decree, let him be bound in the fetters of excommunication.) This law, like all penal laws, must be very narrowly construed. The terms Catholic Faith and dispute have a technical signification. The former term refers to questions purely theological; the latter to disputations more or less formal, and engrossing the attention of theologians. The Church has no interest in such disputations, or in the polemics of the apologists. There are many laymen who have received no scientific theological training who can treat more intelligently than a priest. In modern life, it frequently happens that an O'Connell or a Montalembert must stand forward as a defender of Catholic interests upon occasions when a theologian would be out of place. But when there is a question of dogmatic or moral theology, every intelligent layman will concede the propriety of leaving the exposition and defence of it to the clergy. Hence the clergy are free to engage in public disputes on religion without due authorization. In the "Collectanea S. Cong. de Prop. Fide" (p. 102, n. 294) we find the following decree, issued 8 March, 1625: “The Sacred Congregation has ordered that public disputes shall not be held with heretics, because for the most part, either owing to their incorrigible audacity or to the applause of the audience, error prevails and the truth is crushed. But should it happen that such a discussion is unavoidable, notice must first be given to the S. Congregation, which, after weighing the circumstances of time and persons, will prescribe in detail what is to be done.” The Sacred Congregation enforced this decree with such vigour, that the custom of holding public disputes with heretics well-nigh fell into desuetude. [See the decree of 1631 regarding the missionaries in Constantinople; also the decrees of 1643 and 1662, the latter forbidding the General of the Jesuit Order to authorize such discussions (Collectanea, 1674, n. 302).]

That this legislation is still in force appears from the letter addressed to the bishops of Italy by Cardinal Rampolla in the name of the Cong. for Ecclesiastical Affairs (27 Jan., 1902) in which it is declared that disputes are subject to the prohibition of the Holy See regarding public disputes with heretics; and, in accordance with the decree of Propaganda, 7 Feb., 1645, such public disputations are not to be permitted unless there is hope of producing greater good and unless the conditions prescribed by theologians are fulfilled. The Holy See, it is added, holds that these discussions often produce no result at all or even result in harm, has frequently forbidden them and ordered ecclesiastical superiors to prevent them; whereas this cannot be done, care must be taken that the discussions are not held without the authorization of the Apostolic See; and that only those who are well qualified to secure the triumph of Christian truth shall take part therein. It is evident, then, that no Catholic priest is ever permitted to become the aggressor or to issue a challenge to such a debate. If he receives from the other party to the controversy a public challenge which he thinks it impossible, he must refer the case to his canonical superiors and be guided by their counsel. We thus reconcile two apparently contradictory utterances of the Apostles: for according to St. Peter (I Pet., iii, 15) you should be “ready always to satisfy every one that asketh you a reason of that hope which is in you”; while St. Paul admonishes Timothy (II Tim., ii, 14), “Contend not in words, for it is to no profit, but to the subverting of the hearers.”

HISTORIC DISPUTATIONS IN EARLY TIMES.—The disputes of St. Stephen and St. Paul, mentioned in the Acts of the Apostles, were carried on in a very elementary fashion of apologetics rather than of formal discussions. St. Justin’s “Dialogue with Tryphon” was, in all probability, a literary effort after the model of Plato’s dialogues. St. Augustine, the ablest disputant of all time, engaged in several set debates with Arians, Manicheans, Donatists, and Pelagians. An interesting summary of each of these great disputations is preserved among the saint’s works, and ought to be closely studied by those who are called to defend the Catholic cause. Of particular interest is the celebrated Conference of Carthage, convened by order of Emperor Honorius to finish the iniquitous heresies of the Donatists. It opened 1 June, 411, and lasted three days. The tribune Macellinus represented the emperor, and in the presence of 286 Catholic and 279 Donatist bishops, St. Augustine, as chief spokesman of the Catholics, so completely upset the sectarian arguments, that the victory was
awarded to the Catholics, many prominent members of the sect were converted, and Donatism was doomed to a lingering death. Another memorable disputation took place in Africa—a couple of centuries later (645) between St. Maximus, Abbot of Chrysopolis (Scutari) and his opponent Bish. Macarius of Thebes. Both bishops had been driven from Constantinople by popular violence. It was conducted with rare skill and ended with the temporary conversion of Pyrrhus to the orthodox faith.

During the Reformation Period.—At the outbreak of the Lutheran and Zwinglian revolution, tumultuous discussions ofgeloup subjects grew to be epidemic. Luther opened the revolt by inviting discussion upon his ninety-five theses, 31 Oct., 1517. Although ostensibly framed to furnish matter for an ordinary scholastic dispute, Luther did not seriously contemplate an oral debate; for several of his theses were at variance with Catholic doctrine and could not be discussed at a Catholic university. Instead, they were widely scattered throughout Europe, everywhere creating confusion. An opportunity of disseminating more openly his peculiar tenets regarding justification by faith alone, the slavery of the human will, and the sinfulness of good works was offered to Reformer by his order during a council held at Heidelberg in April, 1518, when he directed a debate on ninety-eight theological and forty philosophical theses in the presence of many professors, students, citizens, and courtiers. Though his novel theses were viewed with deep displeasure by the older heads, he was successful in winning over hearers, notably Brenz and the Dominican, Martin Bucer. Emboldened by the outcome of the Heidelberg Dispute, and having discovered that the road to success lay in captivating the young, the agitator made futile attempts at organizing disputes to advance the seats of higher learning; but his university would lend its halls to the dissemination of un-Catholic doctrines.

The imprudence of Dr. Eck, who had become involved in a literary contest with Carlstadt and had hastily challenged his adversary to a public debate, gave Luther his long-looked-for opportunity. With his customary energy, he took the direction of the intellectual duel, encouraged both antagonists to persevere, and arranged the details. The city of Leipzig was chosen as the scene. Although the faculty of the university entered a vigorous protest, and the Bishops of Mainz and Brandenburg denounced prohibition and an excommunication, the disputation took place under the aegis of Duke George of Saxony. The discontent of the Catholics was increased when they learned that Luther had secured permission to subjoin a controversy with Eck on the subject of papal supremacy. Eck came to Leipzig with one attendant; Luther and Carlstadt entered the city accompanied by an army of adherents, mostly students. The preliminaries were carefully arranged; after which, from 27 June to 4 July (1519) Eck and Carlstadt debated the subject of free will and our ability to cooperate with grace. Eck had the better part of the argument throughout, and forced his antagonist to make admissions which stultified the new Lutheran doctrine. Thereupon Luther himself came forward to assail the dogma of Roman supremacy by Divine right. Sweeping away the authority of decreats, councils, and Fathers, he discovered to his hearers, and possibly also to himself, how completely he had abandoned the basic principles of the Catholic religion.

There could no longer remain a doubt that a new Hus had arisen to scourge the Church. The debate on the primacy was succeeded by discussions of purgatory, indulgences, subscriptions, etc. On 14 and 15 July Carlstadt, regaining courage, resumed the debate on free will and good works. Finally, Duke George declared the disputation closed, and each of the contendents departed, as usual, claiming the victory.

Of the two universities, Erfurt and Paris, to which the final decision had been reserved, Erfurt declined to intervene and returned the documents; Paris sat in judgment upon Luther's writings, attaching to each of his opinions the proper theological censure. The most tangible outcome of this disputation was that the primacy of the See of Rome. In January it opened the doors of the Duke of Saxony, who had been driven from Constantinople by popular violence. It was conducted with rare skill and ended with the temporary conversion of Pyrrhus to the orthodox faith.

Finally, Duke George declared the disputation closed, and each of the contendents departed, as usual, claiming the victory.

Of the two universities, Erfurt and Paris, to which
eloquent and conciliatory address. He pictured the evils which had befallen Germany, "once the first of all nations in fidelity, religion, piety, and divine worship," and warned his hearers that "all the evils that shall come upon you and your people, if, by clinging stubbornly to preconceived notions, you prevent a real concord of opinion, will be ascribed to you as the author of them." On behalf of the Protestants, Melan- chaton returned "an intrepid answer"; he threw all the blame upon the Catholics, who refused to accept the new Gospel.

A great deal of time was spent in wrangling over points of oral; finally it was decided that Dr. Eck should be spokesman for the Catholics and Melanchaton for the Protestants. The debate began 11 Jan., 1541. A tactical blunder was committed in accepting the Augsburg Confession as the basis of the conference. That document had been drawn up to meet an emergency. It was apologetic and conciliatory, so worded as to persuade the young emperor that there was no radical difference between the Catholics and the Protestants. It admitted the spiritual jurisdiction of the bishops and tacitly acknowledged the supremacy of the pope by laying the ultimate appeal to be resolved by him. The truth was that many events had taken place in the ten intervening years. The bishops had been driven out of every Protestant territory in Germany; the Smalkald confederates had solemnly abjured the pope and solemnly professed of a council; each petty territorial prince had constituted had been made and accepted without any control. For all practical purposes the Augsburg Confession was as useless as the laws of Lycurgus. Moreover, as Dr. Eck pointed out, the Augsburg Confession of 1540 was a different document from the Confession of 1530, having been changed by Melanchaton and the council of canons. Had the theologians at Worms reached an agreement on every point of doctrine, the discord in Germany would have continued none the less; for the princes had not the remotest idea of giving up their lucrative dominion over their territorial churches. Eck and Melanchaton battled four days over the topic of original sin and its consequences, and a formula was drafted to which both parties agreed, the Protestants with a reservation.

At this point Granovella suspended the conference. On a point at Ratisbon, whether the emperor was summoned a diet, which he promised to attend in person. This diet, from which the emperor anticipated brilliant results, was called to order 5 April, 1541. As legate of the pope appeared Cardinal Contarini, assisted by the nuncio Morone. The inevitable Calvin was present, ostensibly to represent Lorraine in reality to foster discord in the interest of France. As collectors at the religious conference which met simultaneously, Charles appointed Eck, Pflug, and Gropper for the Catholic side, and Melanchaton, Bucer, and Pistorius for the Protestants. A document of mysterious origin, the "Ratisbon Book," was presented by Jochim of Brandenburg as the basis of agreement. This strange compilation, it developed later, was the result of secret conferences, held during the meeting at Worms, between the Protestants, Bucer and Capito, on one side, and the Lutheranizing (gropper) party, consisting of the emperor and the other. It consisted of twenty-three chapters, in which, by an ingenious phraseology, the attempt was made so to formulate the controverted doctrines that each party might find its own views therein expressed. How much Charles and Granovella had done in the translation is unknown; they certainly knew and approved of it. The "Book" had been submitted by the Elector of Brandenburg to the judgment of Luther and Melanchaton; and their contemptuous treatment of it augured ill for its success. When it was shown to the legate and Morone, the latter was for rejecting it summarily; Contarini, after making a score of emendations, notably emphasizing in Article 14 the dogma of Transubstantiation, declared that now "as a private person" he could accept it; but as legate he must consult with the Catholic theologians. Eck secured another promise of acceptance, which he explained by the dogma of justification. Thus emended, the "Book" was presented to the collectors by Granovella for consideration. The first four articles, treating of man before the fall, free will, the origin of sin, and original sin, were accepted. The battle began in earnest when the fifth article, on justification, was reached. After long and vehement debates, a formula was presented by Bucer and accepted by the majority, so worded as to be capable of bearing a Catholic and a Lutheran interpretation. Naturally, it was unsatisfactory to both parties. The Holy See condemned it and administered a severe rebuke to Contarini for not protesting against it. No greater success was attained as to the other articles of importance.

On 22 May the conference ended, and the emperor was informed as to the articles agreed upon and those on which agreement was impossible. Charles was sorely disappointed, but he was powerless to effect anything further. But many events had taken place in the ten intervening years. The wars had increased, and the remonstrance of Melanchaton had succeeded in breaking the dam. The emperor was left in the lurch at a moment of greatest need, fully conscious that the slightest event might decide the fate of the Reformation.
DISIBOD 37

Disibod, Saint, Irish bishop and patron of Disenberg (Disdobenberg), born c. 619; d. 8 July, 700. His life was written in 1170 by St. Hildegard, from her visions. St. Disibod journeyed to the Continent about the year 653, and settled in the valley of the Nahe, not far from Bingen. His labours continued during the latter half of the seventh century, and, to the end, though he led the life of a hermit, he was in a numerous community, which built bee-hive cells, in the Irish fashion, on the eastern slopes of the mountain. Before his death he had the happiness of seeing a church erected, served by a colony of monks following the Rule of St. Columba, and he was elected abbot-bishop, in 700, and died. His body was moved to the valley of the Altenburg, at Bingen, in 1170.

Disibod was a man of letters, and his fame has never been equalled. His book, the "Lives of the Saints," is one of the most famous in the monastic period. His other works include a "Life of St. Patrick," a "Life of St. Columba," and a "Life of St. Columbanus." He is said to have written over 150 works, of which only a few are extant.

His feast day is celebrated on 8 July.

Disparity of Worship (Disparitas Cultus), a concept introduced by the Church to reconcile or safeguard the sanctity of the Sacredness of Marriage. To effect this purpose a law was necessary that would debar Catholics from contracting marriage with persons unfit to receive the sacrament. The unfitness consists in (a) either non-reception of the Sacrament of Baptism, which is the door to the other six sacraments; or (b) in an unbelief in the sacramental character of marriage or in either or both of its essential properties (unity and indissolubility); or (c) in a profession of belief or unbelief that endangers the three ends and threefold substantial blessings or advantages of this "great sacrament" in Christ and the church. This unfitness, in whole or in part, is to be found in all persons who are not of the Catholic faith and worship. Disparity of worship, in a general way, signifies a difference of religion or worship between two persons. This state of disagreement may be understood to mean that one of the parties is a Catholic, and the other a non-Catholic. Consequent disparity occurs in the case of two pagans or unbaptized persons, one of whom, becoming a convert, is baptized in the Catholic faith and validly baptized in some Christian sect after marriage. The marriage is not affected by this consequent disparity of religion. Another case of consequent disparity of worship which does not militate against the marriage is that of two Catholics, one of whom after their union apostatizes, or turns infidel, Mohammedan, etc. Antecedent disparity is twofold: considered in its strict and proper sense it is called perfect disparity of worship,
or simply disparity of worship, and implies a different relation on the part of the contracting parties in the matter of an essential religious rite, to wit, the Sacra-
ment of Baptism. Viewed in a less strict, but still a pro-
cer, sense, it is named imperfect disparity of wor-
schip, a commonly mingled religion (mixtum religi-
hum, Uglia), which presupposes an equality as to the re-
ception of baptism, but denotes a diversity as to form
of belief and religious observance. Imperfect dis-
parity, or mixed religion, does not render void the
marriage of a Catholic with a baptized non-Catholic;
but, of course, it does make it (unless dispensation
indulged and granted) impossible for souls to be
salvific. However, such a marriage may be null and
void on account of another diriment impediment,
for instance, the non-Catholic recipient of
baptism is not a Christian, but a pseudocrani.

Disparity of worship, in its strict sense, and as
the subject of this article, is that diversity which exists
to two persons, one of whom has, and the other
has certainly not, received Christian baptism. This
disparity exists between a baptized Christian, whether
Catholic or non-Catholic, and a pagan, Moham-
medan, Jew, or even a catechumen (believer in
the Catholic Faith yet not baptized).

Imperfect disparity of worship, or mixed religion, might more strictly and aptly be named disparity
of faith, since faith is an internal act, and not baptism, is the point of difference; perfect disparity of
worship, on the contrary, might more aptly and properly be called disparity of baptism, for the reason
that the external act (bap-
tism), the internal act (faith, since faith is an internal
act), and not baptism, is the point of dissimilarity.

Disparity of worship has been
chosen as the basis of this diriment impediment for
a twofold reason: (1) it is an external ceremony, easy
of recognition and proof, and (2) it is a sacrament which
imprints an indelible character upon the soul of the
recipient, so as to present a personal religious condition
which is fixed and unchangeable. Personal faith, on
the contrary, viewed either as the internal assent of
the mind or as the outward profession of the internal
act, is subject to change and not always easy of
demonstration, and hence could not afford a certain
and indubitable foundation. The primary reason why
Catholics are debarred from intermarriage with
unbaptized persons is because the latter are not capable
of receiving the Sacrament of Matrimony, as baptism is
the door to all the other sacraments. Furthermore,
according to the more probable opinion of the Catholic
party who, with a dispensation, marries an
unbaptized person, does not receive the sacrament or the
concomitant graces (cf. Sanchez, Bk. II, disp.
viii, n. 2; Pirhing, Bk. IV, tit. i, n. 71; Schmalzgrue-
ber, Bk. IV, tit. i, n. 307; Billot, "De Ecclesia Sacra-
tismo,"pars posterior, 350 sqq.; Hurter, Bk. III,
n. 598; and Wernz, who examines the reasons for
the opposite opinion and answers them, "Jus Decret.",
IV, 63 sqq.). The Church has not decided this ques-
tion; hence the opinion of Dominicus de Soto (In IV
Sent., art. iii, 3d fem.), Perrone (II, 306), Rosset,
who holds that it is the more probable (De Sacr. Matri-
monii, I, 284 sqq.), and Tuenqueray (Synopsis Theol.
Dogmat., II, 618, n. 31), to wit, that the Catholic does
receive the sacrament, is tenable. The marriage,
according to both opinions, is certainly sacred (Leo
XIII, "Aeternum", 10 Feb., 1880) and indissoluble.

Intermarriage exists only in instances where the disparity is of such
nature that one of the contracting parties is, and the other
party is certainly not, baptized. Every bap-
tized person, Protestant as well as Catholic, is subject
to this qualifying and annihilating impediment, be-
cause the Church has given the Jurisdiction over
it to the Church. Under the name "Cath-
lie" are here included, besides practical Catholics,
children baptized as infants in the Catholic Church
but never reared or instructed in her teachings, Catho-
ils who have fallen away or apostatized from the
Catholic Faith and have joined other denomina-
tions or turned infidel. Once baptized always bap-
tized, and always subject to the laws of Christ and His
infallible Church, is axiomatic. Disparity of worship
embraces and renders null and void (no dispensation
having been granted) the marriage (a) of a Catholic
Christian, Jew, Mohammedan or infidel; and (b) of baptized
non-Catholics, e.g. heretics and schismatics, with unbaptized persons. It does
not extend to, or make void, the marriage (1) of two
certainly unbaptized persons, for, since they do not
belong to Christ by baptism, the Church has no juris-
diction over them; (2) of a Catholic with a baptized
Protestant, or schismatic, or apostate Catholic, or
Catholic turned infidel; (3) of baptized non-Catholics
with one another. Seeing that the parties in the
second and third classes have been baptized, it is evi-
dent that their marriages are outside the domain of
the diriment impediment, whose aim is to protect the
sacrament.

Difficulties as to the marriages of Catholics with
non-Catholics, and of non-Catholics with one another,
or with pagans or other unbaptized persons have in
these days multiplied, due either to absolute omission of baptism, or its careless and often in-
expedient administration even among the so-called Christian denominations.

Doubts about the administration (dubium facti) or valid administration (dubium juris) of
baptism in these sects are as a consequence frequent, and render complex the question whether or not disparity
of worship covers the marriage. The safe guide in this confusion is the axiom: a
Pentecostal baptism, as regards a marriage already, or about to
be, celebrated, is presumed to be valid if, after due in-
vestigation, the doubt is still insoluble or it is not
prudent (on account of delay, etc.) to remove it.
In this rule, so different from that governing baptism as a
necessary means for salvation, is based upon the principle that the right to marry yields but to the evi-
cence (not doubt) of the non-baptism. Accordingly,
disparity of worship invalidates the matrimonial
union of one doubly baptized with another cer-
tainly not baptized. The doubt may concern the act
of baptizing or the validity of the ceremony.
Investigation on these points must proceed in this manner:
search must be made of the ritual belonging to the
denomination of the party concerning whose baptism
there is doubt, and if the ritual teaches the necessity
of baptism and exposes the use of the valid matter
and form in its administration, and further, if the
parents are strict adherents and observers of their
religion, there is a certainty (sufficient for marriage)
that the baptism was valid. If the ritual prescribes
baptism with the necessary matter and form, but,
upon investigation, a serious doubt remains, the bapt-
ism is still considered valid. If, on the contrary, the
sect repudiates baptism, forbids infant-baptism, or
admits to baptism only adults of thirty years, or the
parents assert that they do not belong or wish to be
long to any sect or denomination, but are satisfied with
practicing the "Supreme Rite" by means of the simple
administered to the infant, rather than by any fixed form of worship, then there
is no certainty, not even a presumption, in favour of
the baptism in childhood. Should the parents be
careless and negligent in the observances of the sect of
which they are members, or belong to a denomination
which, whilst not rejecting baptism, yet does not ad-
mit its necessity, and in which, ordinarily, baptism is
not administered, then there is no presumption for or
against the baptism of their offspring, and each indi-
vidual case must be referred to Rome (Congreg. of the
Inquisition, 1 Aug., 1883).

Disparity of worship does not affect the marriage
of a Catholic or baptized non-Catholic with one whose
baptism, even after careful investigation concerning the
baptismal ceremony or its validity, remains doubtful.
Neither does it in any way influence the mar-
riage of two who, after diligent examination, are still
DISPARITY

39

considered doubtfully baptized. There is a difference of opinion among the jurists and theologians as to the influence of this diriment impediment upon the marriage of two doubtfully baptized, if after investigation it turns out for a certainty that one was certain, the modern common opinion is that the disparity of worship does not nullify this marriage. Gasparri gives as reason that the consuetudinary law never contemplated this case, and hence does not influence it (De Mariandino, I, nos. 597 and 601). Wenz (IV, 772, note) Gury Ballerini (II, 531), and others say that the marriage is valid, but give as reason the Church's dispensation, either special or general. Lehmkulli (II, 536) distinguishes and asserts that if a dispensation from the prohibitive impediment of "mixed religion" has been granted antecedent to the marriage, the union is valid; his reason, however, that the Church in dispensing with the prohibitive did implicitly dispense with the diriment impediment, seems to be at variance with a decree of the Holy Office (29 April, 1840, n. 2) which clearly states that the Holy See dispenses with the impediment of disparity of worship only in express terms. Where no dispensation has been granted, he holds that the marriage is null and therefore of the existing disparity of worship and must be revalidated. He recognises, however, as valid the marriage of the doubtfully baptized, if they had been considered and had considered themselves Catholics, and had followed Catholic practices, and afterwards it was discovered that one of them had not been a Catholic (loc. cit., in note 10).

ORIGIN OF THE IMPEDIMENT.—This impediment, inasmuch as it is diriment, is not enjoined by the natural, Divine, or written ecclesiastical law, but has been introduced by a universal custom and practice in the Eastern and Western Church since the twelfth century. The natural and Divine laws do, however, repudiate and prohibit such marriages as tend to frustrate the primary ends of marriage by exposing believers and their offspring to the loss of their Catholic faith, and this prohibition continues in force so long as the danger exists and no proportionately grave cause dictates the necessity of such marriage. The Mosaic Law (Deut., vii, 3) prohibits marriage between the Israelites and the Chanaanites, and even the Samaritans (who kept the Law and had the Book of Moses), on account of the heathenish ceremonies they observed. If the Jews might be kept from the service of the true God and cling to the worship of the false gods of their pagan wives. The Pauline injunctions (I Cor., vii, 39), "... let her marry to whom she will but only in the Lord" and (II Cor., vi, 14): "... bear not the yoke with [i.e. do not marry] unbelievers", do not, indeed, declare invalid the marriages of Christians with unbelievers, but certainly do earnestly forbid the faithful to marry unbelievers unless the ends of Christian marriage are safeguarded and grave and weighty reasons exist for the union. Certainly in the time of St. Paul and immediately afterwards the proportionate importance of this necessity would be proportionately greater for the Christian if Christianity was sufficiently grave cause for permitting such intermarriages with the hope of the conversion of the unbelieving partner.

With the development of the Church and its growth in numbers, opportunities for Christian marriage increased, proportionately grave reasons for mixed unions (unless in rare cases) ceased, and then the natural and Divine laws asserted their right to prohibit such marriages as tended to frustrate the ends of the matrimonial sacrament by exposing the Catholic to a weakening or loss of faith, the offspring to a lack of Christian education, and the family and the good name of that Christian love which is its very corner-stone. The Christian laity, as well as clergy, realized from sad experience and observation the ordinary tendency of mixed unions to a compromise or loss of faith on the part of the Catholic, and the un-Catholic bringing-up, or at least religious indifference, of the children, and, finally, injury to domestic peace and happiness by the constant exposure to disputes, and sometimes bitter quarrels, about the fundamental principles of Catholic Faith, and the consequent weakening, if not total extinction, of Christian life between husband and wife (St. Ambrose, De Abstinentia, Bk. 6, ch. 15), says: "There can be no unity of love where there is no unity of faith"). At different periods and in different countries (especially Spain and Gaul) particular councils inveighed against them, and although these canons were not strictly observed, and there were many mixed marriages in the days of Sts. Jerome (Lib. I in Jovinianum) and Augustine (Lib. de Fide et operibus, ch. xix), yet after the death of the latter, and especially from the seventh to the twelfth century, the detestation of them so increased, and the conviction that they were not Christian marriages, and therefore to be shunned and not contracted, grew so strong and general throughout the entire Church that as far back as the twelfth century it was a universal custom and practice which even had the force of a universal church law (Bellarmine, De Controversiis, III, De Sacramento Matrimonii, Bk. I, ch. xxiii; Benedict XIV, Constit. "Singulares nobis", paragraphs 9 and 10).

This impediment is binding on Christians of newly converted or even pagan countries, where there has been no such custom inasmuch as there have been no Catholics. The opinion of Lessius and others to the effect that marriage is clearly repudiated by Gregory XIII to the Christian missionaries of Japan to dispense with this impediment in the cases of newly converted Japanese Catholics. Many theologians and canonists say that there is one exception to the nullity of the law, and that is the instance of an emigrant Catholic family settled in a country without a single Catholic neighbour, forty or fifty days journey removed from the nearest Catholic, and unable on account of the distance or want of means to leave the country or procure a dispensation from the impediment, and thus compelled to remain their whole lives single or marry pagans (Santi-Leitner, IV, 74; Gasparri, De Matrimonio, I, 429). It does not seem that disparity of worship holds in a case of this kind; the ecclesiastical law under such circumstances does not bind a man so as to deprive him of his natural right to marriage (Wenz, Jura Decret., IV, 775, n. 37), holds the opposite opinion.

DISPENSATION FROM THE IMPEDIMENT.—The Church can dispense from this impediment, inasmuch as it is of ecclesiastical institution. It never does so unless for gravest reasons and upon the fulfillment of certain conditions and guarantees that safeguard, as far as possible, the ends of the Sacrament of Matrimony. The natural and Divine laws, before permitting mixed marriages, exact the removal of all danger to the faith of the Catholic and to the baptism and Catholic bringing-up of all of the children of the marriage. The Church cannot dispense with this necessary requirement, and, the better to ensure its presence, insists upon certain conditions and promises, which must be committed to writing and signed and, in some instances and countries, also sworn to, by the unbaptized party to the pact. The unbeliever promises faithfully to confess and to baptize, if he should become a Christian, his children, and to bring up both the children of this union in the Christian religion and education. The unbaptized party also promises to assist the children in their baptism and to permit them to be brought up in the Christian religion and education. The Church on her part grants the permission for the marriage. The promises on the part of the unbaptized party are: (1) that he (or she) will afford the Catholic partner full and perfect freedom to practise the Catholic Faith, and that he (or she) will abstain from saying or doing anything which will weaken or change the faith of the Catholic; (2) that he or she will not change his (or her) domicile to become a inhabitant of a pagan country, that he will not practise polygamy; (2) that he (or she) will permit all children of their union to be baptized and reared in the Catholic Faith and practice, and that he (or she) will do or say nothing calculated to lessen their faith or turn
then away from it or its practices. The Catholic petitioner for the dispensation must also give promise (usually also written, in order that the dispenser may have a moral certainty of the absence of danger to the substantial ends of the sacrament) that he (or she) will strictly attend to his (or her) personal religious duties and have all the children baptized and properly reared and trained in the Catholic doctrine and practice, and that by prayer and good example and other legitimate and prudent means he (or she) will constantly labor to bring about the conversion to the Catholic Faith of his (or her) unbaptized partner.

The promise to effect the conversion of the unbeliever is of special importance, although too frequently lost sight of. The conversion most assuredly eliminates the last vestige of possible perversion of the Catholic party, ensures the primary end of marriage, i.e. the bearing and rearing of children for the Church and heaven, and rounds out, by the perfect unity of the married couple in faith and Christian love, their marriage according to its great type, the union of Christ with the Church. Even with all these promises, written and sworn to as safeguards to Christian marriage, a dispensation cannot be licitly given unless a grave, proportionate risk to the great ends to be encountered, justifies the marriage.

This dispensation, in former days very rarely granted in Catholic countries, is now of more frequent occurrence, owing to the existence of "civil marriage" and the growing independence on the part of parents of their children's baptism. The rule of the Church was, and is, not to grant a dispensation from this impediment unless in provinces or countries where the Catholics are largely outnumbered by the non-baptized inhabitants. Rather than dispense, the Church prefers to convert the heathen and educate them. The Church will more willingly and readily grant dispensation from the diriment impediments of affinity and consanguinity, precisely for the reason that in the latter cases there is no danger to the faith of either Catholic or unbeliever, while in the case of the former, even though the marriages are licit and kept, there is always danger of religious indifference on the part of the Catholic parent, and especially of the children on account of the example of the non-baptized parent.

The pope alone summa juris can dispense with this impediment; bishops cannot. They, however, are delegated to do so, but in the pope's name and by virtue of his authorized delegated authority. Thus the bishops in pagan countries—China, Japan, Africa, etc.—and in countries where the unbaptized largely outnumber the Catholics, as England, United States, etc., have ample faculties in respect of this impediment. To-day the only case (and should there be danger in delay, it is not: see Formula T, 11 June, 1907) reserved to Rome in the faculties granted to bishops of the United States is that of a Catholic with an orthodox Jew, i.e., a circumcised follower of Judaism. The case of a Jew uncircumcised, or even circumcised if he has abandoned Judaism, is not reserved.

This delegated faculty to bishops is given only for a specified period of five years or for a certain number of cases and requires that the bishop in granting a dispensation must state that it was conceded by virtue of the delegations of specific date. Where the impediment is occult and there is danger in delay, bishops may dispense without express faculty of Rome, which in such cases is presumed to grant it. All bishops can (decree of Congreg. of Inquis., 20 Feb., 1888, and 1 March, 1888) dispense, and delegate that faculty to their respective, from the impediment of disparity of worship in the case of one who is in danger of death but is only civy married or lives in concubinage. The aforesaid promises cannot be omitted. The sick party must promise absolutely to observe the requirements of the natural and Divine laws, and to carry out the injunctions of the ecclesiastical law as far as possible (Collectanea S. C. de Prop. Fide, n. 2188). Bishops cannot dispense in instances where the ends, purposes, and substantial blessings of the sacrament are well protected, unless there also exists a grave and proportionately weighty reason. There are some cases of personal respect or some practical dangers, which are not very grave (Instruct. S. C. de Prop. Fide, 9 May, 1877). Should the bishop dispense without cause, the dispensation would be null and void. The pope's dispensation, in a similar case laboured under the same defect, would be valid. The reason of this difference is that the bishop cannot violate a law of his superior (in this instance the universal law), whereas the pope, who is supreme legislator, can dispense from universal ecclesiastical laws. He cannot, however, do so validly with the prohibition of the natural and Divine laws; hence he must have, before conceding the dispensation, a moral certainty that the practice of the Faith by the Catholic, and the Catholic baptism and rearing of the children, are amply protected.

The Holy See dispenses from this impediment only for the gravest reasons and only in express terms (Collectanea S. C. de Prop. Fide, n. 948, 2); hence a dispensation from mixed religion instead of disparity of worship would not suffice for the validity of the marriage.

All the European Governments (except Austria) ignore this impediment. The Austrian impediment is different from the ecclesiastical impediment. It rests in the profession of faith, and not in the baptism of the parties, and so far as concerns the Church, is civil impediment is more injurious than otherwise. According to the Austrian law, the marriage of a Catholic with a Jew, or other unbaptized party, is civilly invalid as long as the Catholic remains in the Catholic Church. Should the Catholic leave the Church, and announce that he (or she) holds no belief in any faith, the marriage with an unbaptized partner would be civilly valid. Unbaptized parties can, on the other hand, enter into civilly valid marriage with baptized Protestants. The Church in granting dispensation from disparity of worship, thus permitting the marriage of a Catholic and an unbaptized person, by that act dispenses also from all impediments of purely ecclesiastical institution, from which the unbaptized is exempt (except clandestinity; cf. "Praxia Curiae Romana"; "Ne Temere," 2 Aug., 1907); the Church declares it not a dispensation, but an exemption of the unbaptized may, on account of the indissolubility of the marriage, be communicated to the Catholic party (Congreg. of Inquis., 3 March, 1825). This dispensation never includes dispensation in any degree in the direct line nor in the first degree of the transverse line (Gasparri, op. cit., nos. 76 and 761). This impediment, which is public juris, can be invoked by any Catholic to annul a marriage contracted without the necessary dispensation. The burden of proof rests upon the challenger, who must clearly demonstrate that there was either no act of baptismal administration or that this act of administration which actually took place was certainly invalid. The usual canons of evidence are supplemented by special laws laid down for the demonstration of the ceremony or the validity of the baptism. The customary norm (c, iii, X, De fresby, non-lap., III, xliii) in case of practical Catholic does not govern the cases of non-Catholics or negligent Catholics. The rules prescribed by the Congreg. of the Inquisition (1 Aug., 1883, and 5 Feb., 1851) for the verification of the fact or non-fact of the baptism, as also of the validity of the act, must be strictly followed.
Dispensation (Lat. dispensatio), an act whereby in a particular case a lawful superior grants relaxation from an existing law. This article will treat: I. Dispensation in General; II. Matrimonial Dispensation: For dispensations from vows see Vows and Religious Orders; and from fasting and abstinence, Fast, ABSTINENCE.

I. Dispensation in General.—Dispensation differs from abrogation and derogation, inasmuch as the latter supress the law totally or in part, whereas a dispensation leaves it still in vigour; and from epieikeia, or a favourable interpretation of the purpose of the legislator, which supposes that he did not intend to include a particular case within the scope of his law, whereas by dispensation a superior withdraws from the power of the law or case which otherwise would fall under it. The raison d'être for dispensation lies in the nature of prudential administration, which often counsels the adapting of general legislation to the needs of a particular case by way of exception. This is peculiarly true of ecclesiastical administration. Owing to the universality of the Church, the adequate observance by all its members of a single code of laws would be very difficult. Moreover, the Divine purpose of the Church, the welfare of souls, obliges it to reconcile as far as possible the general interests of the community with the spiritual needs or even weaknesses of its individual members. Hence we find instances of dispensational laws from the very earliest centuries; such early instances, however, were meant rather to legitimize accomplished facts than to authorize beforehand the doing of certain things. Later on antecedent dispensations were frequently granted; as early as the eleventh century Yves of Chartres, among other canonists, outlined the theory on which they were based. With reference to matrimonial dispensations now common, we meet in the sixth and seventh centuries with a few examples of general dispensations granted to legitimize marriages already contracted, or prevent them about to be celebrated. But, however, until the second half of the eleventh century that we come upon papal dispensations affecting individual cases. The earliest examples relate to already existing unions; the first certain dispensation for a future marriage dates from the beginning of the thirteenth century. In the sixteenth century the Holy See began to give ample faculties to bishops and missionaries in distant lands; and in the seventeenth century such privileges were granted to other countries. Such was the origin of the ordinary faculties (see FACULTIES, CANONICAL) now granted to bishops.

Dispensation is a dispensation granted to the faithful to allow them to violate a law of the Church without impeding a vow, the pope remits the obligation resulting from the promise made to God, consequently also the impediment it raised against marriage. (d) A dispensation may be in fœno gratiatis, in formâ commissâ, or in formâ commissâ mixtâ. Those of the first class need no execution, but contain a dispensation which takes effect ipso facto by the union or by presentation of the parties. Those of the second class give jurisdiction to the person named as executor of the dispensation, if he should consider it advisable; they are, therefore, favours to be granted. Those of the third class command the executor to deliver the dispensation if he can verify the accuracy of the facts for which such dispensation is asked; they seem, therefore, a favour already granted. From the respective nature of each of these forms of dispensation result certain important consequences that affect delegation, obetion, and revocation in the matter of dispensations (see DELEGATION; OBSESSION; REVOCATION).

(2) The Dispensation Process.—In the very notion of dispensation that only the legislator, or his lawful successor, can of his own right grant a dispensation from the law. His subordinates can do so only in the measure that he permits. If such communication of ecclesiastical authority is made to an inferior by means of a delegate of an office he holds, his power, or right derived, is known as ordinary. If it is only given him by way of commission it is known as delegated power. When such delegation takes place through a permanent law, it is known as delegation by right of law. It is styled habitus, when, though given by a particular act of the superior, it is granted for a certain period of time or a certain number of cases. Finally, it is called particular if granted only for one case. When the power of dispensation is ordinary it may be delegated to another unless this be expressly forbidden. When it is delegated, as stated above, it may not be subdelegated or transferred; this be expressly permitted, except by the pope, however, for delegation ad universalem causarum, i.e. for all cases of a certain kind, and for delegation by the pope or the Roman Congregations. Even these exceptions do not cover delegations made because of some personal fitness of the delegate, nor those in which the latter receives, not actual jurisdiction to grant the dispensation, but an appointment to execute it, e.g. in the case of dispensations granted in formâ commissâ mixtâ (see above).

The power of dispensation rests in the following persons: (A) The Pope.—He cannot of his own right dispense from the Divine law (either natural or positive). When he does dispense, e.g. from vows, oaths, unconsummated marriages, he does so by derived power communicated to him as Vicar of Christ, and the limits of which he determines by his magisterium, or authoritative teaching power. There is some diversity of opinion as to the nature of the pope's dispensing power in this respect; it is generally held that it operates by way of indirect dispensation: that is, by virtue of his power over the wills of the faithful the pope, acting in the name of God, remits for them an obligation resulting from their delinquency and therewith the consequences that by natural or positive Divine law flowed from such obligation. The pope, of his own right, has full power to dispense from all ecclesiastical laws, whether universal or particular, even from the disciplinary decrees of ecumenical councils. Such authority is consequent on his primacy and the fullness of his immediate jurisdiction. A part of this power, however, he usually communicates to the Roman Congregations.

(B) The Bishop.—Of his ordinary right, the bishop can dispense from his own statutes and from those of his predecesors, even promulgating as it affects the law directly, by suspending its operation, or indirectly, by modifying the object of the law in such a way as to withdraw it from the latter's control. For instance, when a dispensation is granted from the matrimonial
Dispensation

42

Dispensation

tained by some authors, viz. that the bishop can grant all dispensations which the pope has not reserved to himself, cannot be admitted. But by derived right (either ordinary or delegated according to the terms of the grant) the bishop can dispense from those laws that expressly permit him to do so; and from those which he has received an indult to that effect. Moreover, by ordinary right, based on custom or the tacit consent of the Holy See, he may dispense: (a) in a case where recourse to the Holy See is difficult and where delay would entail serious danger; (b) in doubtful cases, especially when the doubt affects the existence of the dispensation or the sufficiency of the motives; (c) in cases of frequent occurrence but requiring dispensation, also in frequently occurring matters of minor importance; (d) in decrees of national and provincial councils, although he may not pronounce a general decree to the contrary; (e) in pontifical laws specially passed for his diocese. It should be always remembered that to fix the exact limit of these various powers legitimate custom and the interpretation of reputable authors must serve as guides. Superiors of exempt religious orders (see Exception) can grant to their subjects, individually, those dispensations from ecclesiastical laws which the bishop grants by his ordinary power. When there is question of the rules of their order they are bound to follow what is laid down in their constitutions (see Religious Orders).

(C) The Vicar-General.—He enjoys by virtue of his office the ordinary dispensing power of the bishop, also the delegated powers of the latter, i.e., those granted him not personally but as ordinary (according to present discipline, the pontifical faculties known as ordinary); exception is made, however, for those powers which require a special mandate like those of Chapter Licitae for dealing with irregularities and secret cases. The vicar capitular likewise has all the dispensing power which the bishop has of his own right, or which has been delegated to him as ordinary.

(D) Parish Priest.—By his own ordinary right, founded on custom, he may dispense (but only in particular cases, and for individuals separately, not for a community or congregation) from the observance of fasting, abstinence, and Holy Days. He can also dispense, within his own territory, from the observance of diocesan statutes when the latter permit him to do so; the terms of these statutes usually indicate the extent of such power, also whether it be ordinary or delegated. Dispensation being an act of jurisdiction, a superior can exercise it only over his own subjects, though as a general rule he can do so in their favour even outside his own territory. The bishop and the parish priest, except in circumstances governed by special enactments, acquire jurisdiction over a member of the faithful by reason of the domicile or quasi-domicile he or she has in a diocese or parish (see Domicile). Moreover, in their own territory they can use their dispensing power in respect of persons without fixed residence (provy), probably also in respect of travellers temporarily resident in such territory. As a general rule he who has power to dispense others from certain obligations can also dispense himself.

(C) Causes for Granting Dispensations.—A sufficient cause is always required in order that a dispensation may be both valid and licit when an inferior dispenses from a superior's law, but only for the licit of the act when a superior dispenses from his own law. Nevertheless, in this latter case a dispensation granted on the motive would not (in so far as not for some special reason, e.g., scandal, constituting a serious fault. One may be satisfied with a probably sufficient cause, or with a cause less than that, of itself and without any dispensation, would excuse from the law. It is always understood that a superior intends to grant only a licit dispensation. Therefore a dispensation is null when in the motives set forth for obtaining it a false statement is made which has influenced not only the causa impulsa, i.e., the reason inclining the superior more easily to grant it, but also the causa motus, i.e., the really determining reason for the grant in question. For this reason the information which should accompany the petition, in order that a dispensation be valid, see below apropos of oblation and subrogation in rescripts of dispensation. Consequently a false statement or the fraudulent withholding of information, i.e., done with the motive of deceiving the superior, totally annuls the dispensation, unless such statement bear on a point foreign to the matter in hand. But if made with no fraudulent intent, a false statement does not affect the grant unless the object of the statement be some circumstance which ought to have been expressed under pain of nullity, or unless it affects directly the motive cause as above described. Even then false statements do not always nullify the grant; for (a) when the dispensation is composed of several distinct and separable parts, that part or element alone is nullified on which the oblation or subrogation is founded; (b) when several adequately distinguished motive causes are set forth, the dispensation is null and void only when the oblation or subrogation in question affects them all. It is enough, moreover, that the accuracy of the facts be verified at the moment when the dispensation is granted. Therefore, in the case of dispensations ex gratia (or in forma gratiis), i.e., granting favours, the facts must be true when the dispensation is expedited: on the other hand, in the case of dispensations in forma commissae (and according to the more general opinion, in those in forma commissae mitis), the causes alleged must be verified only through the fact that it is actually executed.

(1) Form and Interpretation.—It is proper, generally speaking, that dispensations be asked for and granted in writing. Moreover, the Roman Congregations are forbidden, as a rule, to receive petitions for dispensations or to answer them by telegram. The execution of a dispensation made on receipt of telegraphic information that such dispensation had been granted would be null, unless such means of communication had been officially used by special authorization from the pope. Except when the interest of a third party is at stake, or the superior has expressed himself to the contrary, the dispensing power whether ordinary or delegated, ought to be strictly interpreted, since its object is the common good. But the actual dispensation (and the same holds true of the dispensing power given for a particular case) ought to be strictly interpreted unless it is a question of a dispensation authorized by the common law, or one granted motu proprio (by the superior spontaneously) to a whole community, or with a view to the public good. Again, that interpretation is lawful without which the dispensation would prove hurtful or useless to the beneficiary, also that which extends the benevolence of the dispensation to whatever is juridically connected with it.

(5) Cessation of Dispensations.—(a) A dispensation ceases when it is renounced by the person in whose favour it was granted. However, when the object of the dispensation is an obligation exclusively resulting from one's own will, e.g., a vow, such renunciation is not valid until accepted by the competent. Moreover, neither the non-use of a dispensation nor the fact of having obtained another dispensation incompatible with the former is, in itself, equivalent to a renunciation. Thus, if a girl had received a dispensation to marry Peter and another to marry Paul, she would remain free to marry either of them. A dispensation ceases when it is revoked after due notice to the recipient. The legislator can validly revoke a dispensation, even without cause, though in
the latter case it would be illicit to do so; but without a cause an inferior cannot revoke a dispensation, even validly. With a just cause, however, he can do so if he has dispensed by virtue of his general powers (ordinary or delegated); not so, however, when his authority has been merely to one particular case, since thereby his authority was exhausted. (d) Dispensations cease by the death of the superior when, the dispensation having been granted in foro commis- 
sis, the executor had not yet begun to execute it. But the grant holds good if given ex gratia (as a favour) and even, more probably, if granted in foro commissum. We believe a new pope is worse qualified to validate all favours granted in the immediately previous year by his predecessor and not yet availed of. (d) A conditional dispensation ceases on verification of the condition that renders it void, e.g. the death of the superior when the dispensation was granted with the clause ad beneplacitum nostrum (at our good pleasure). (e) A dispensation ceases by the adequate and total cessation of its motive causes, the dispensation thereupon ceasing to be legitimate. But the cessation of the influencing causes, or of a part of the motive causes, does not affect the dispensation. However, when the motive cause itself is complex, though complexly it is substantially one, it is rightly held to cease with the disappearance of one of its essential elements.

II. MATRIMONIAL DISPENSATIONS.—A matrimonial dispensation is the relaxation in a particular case of an impediment prohibiting or nullifying a marriage. It may be granted in any case, the following: (a) in favour of a marriage or to legitimize one already contracted; (b) in secret cases, or in public cases, or in both (see IMPEDMENTS OF MATRIMONY); (c) in foro interno only, or in foro externo (the latter includes also the former). Power of dispensing in foro interno is not always restricted to secret cases (such faculties, as stated above, are by no means identical. We shall classify the most important considerations in this very complex matter, under four heads: (1) general powers of dispensation; (2) particular indults of dispensation; (3) causes for dispensations; (4) costs of dispensations.

(1) General Powers of Dispensation.—(A) The Pope.—The pope cannot dispense from impediments founded on Divine law—except, as above described, in the case of sors, espousals, and non-consummated marriages, or valid and consummated marriages contracted before baptism (see NORMS ON MARRIAGE). In doubtful cases, however, he may decide authoritatively as to the objective value of the doubt. In respect of impediments arising from ecclesiastical law the pope has full dispensing power. Every such dispensation granted by him is valid, and when he acts from a sufficient motive it is also licit. He is not wont, however, out of consideration for the public welfare, to exercise this power personally, unless in very exceptional cases, where certain specific impediments are in question. Such cases are error, violence, Holy orders, disparity of worship, public conjugicide, consanguinity in the direct line or in the first degree (equal) of the collateral line, and the first degree of affinity (from lawful intercourse) in the direct line. As a rule the pope exercises his power of dispensation through the Roman Congregations and Tribunals.

Up to recent times the Pontifical was the most important channel for matrimonial dispensations when the impediment was public or about to become public within a short time. The Holy Office, however, had exclusive control in foro externo over all impediments connected with or juridically bearing on matters of faith, e.g. the dispensation of public order, Holy orders, etc. The dispensing power in foro interno lay with the Penitentiary, and in the case of pauperes or quasi-pauperes this same congregation had dispensing power over public impediments in foro externo. The Penitentiary held as pauperes for all countries outside of Italy those whose united capital, productive of a fixed revenue, did not exceed $370 lire (about 1050 dollars); and as quasi-pauperes, those whose capital did not exceed 9306 lire (about 1850 dollars). It likewise had the power of promulgating general indults affecting public impediments, as for instance the dispensation of marriage by the pope in the result of 15 Nov., 1890, which was valid with all dispensations, both in foro interno and in foro externo, for countries under its jurisdiction, as was the Congregation of Extraordinary Ecclesiastical Affairs for all countries depending on it, e.g. Russia, Latin America, and certain vicariates and prefectures Apostolic.

On 3 November, 1908, the duties of these various Congregations received important modifications in consequence of the Constitution "Sapienti," in which Pope Pius X reorganized the Roman Curia. Dispensating power from public impediments in the case of pauperes or quasi-pauperes was transferred from the Datary and the Penitentiary to a newly established Congregation known as the Congregatio de Disciplinis Sacramentorum. The Penitentiary retains dispensing power over occult impediments in foro interno only. The Holy Office retains its faculties, but res- tricted to cases under three heads: (1) disparity of worship; (2) mixta religio; (3) the Pauline Privilege [see DIVORCE IN MORAL THEOLOGY]. Propaganda remains the channel for securing dispensations for all countries under its jurisdiction, but as it is required for the sake of executive unity, to defer, in all matters concerning matrimonial dispensation to the various Congregations competent to act thereon, its functions is henceforth that of intermediary. It is to be remembered that in America, the United States, Canada and Newfoundland, and in Europe, the British Isles are now withdrawn from Propaganda, and placed under the common law of countries. These changes make the Congregation of Extraordinary Ecclesiastical Affairs lose all its powers; consequently the countries hitherto subject to it must address themselves either to the Holy Office or to the Congregatio de Disciplinis Sacramentorum according to the nature of the impediment.

It should be noted that the powers of a Congregation are suspended during the vacancy of the Holy See, except those of the Penitentiary in foro interno, which, during that time, are even increased. Though suspended, the powers of a Congregation may be used in cases of urgent necessity.

(B) The Diocesan Bishops.—We shall treat first of their fixed perpetual faculties, whether ordinary or delegated, afterwards of their habitual and temporary faculties. By virtue of their ordinary power (see JURISDICTION) bishops can dispense from those proh- ibited impediments of ecclesiastical law which are not reserved to the pope. The reserved impediments of this kind are espousals, the vow of perpetual chastity, and vows taken in diocesan religious institutes (see RELIGIOUS CONGREGATIONS), mixta religio, public display and solemn blessing at marriages within for- bidden times, the interdict or interdict laid on the marriage by the pope, or by the metropolitan in a case of appeal. The bishop may also dispense from ditimpt impediments after the following manner:

(a) By tacit consent of the Holy See he can dispense in foro interno from secret impediments from which the pope is wont to exercise his power in the three following cases: (1) in marriages already contracted and consummated, when urgent necessity arises (i.e. when the interested parties cannot be separated without scandal or endangering their souls, and there is no time to have recourse to the Holy See or to its delegate)—it is, mixta religio; (2) in marriages having taken place in lawful form before the Church, and that one of the contracting parties at least shall have been ignorant of the impediment; (2) in marriages about to be contracted and which are called embarrassing (perplexis cases, i.e. where everything
being ready a delay would be defamatory or would cause scandal; (3) when there is a serious doubt of fact as to the existence of an impediment; in this case the dispensation seems to hold good, even though in course of time the impediment becomes certain, and even public. In cases where the law is doubtful, it is likewise necessary, even if the bishop may, if he thinks proper, declare authentically the existence and sufficiency of such doubt. (b) By virtue of a decree of the Congregation of the Inquisition or Holy Office (20 February, 1888) diocesan bishops and other ordinaries (especially vicars Apostolic, administratores Apostolicæ, bishops within their territories, even an allocated territory, also vicars-general in spiritualibus, and vicars capitular) may dispense in very urgent (graviorimum) danger of death from all diriment impediments (secret or public) of ecclesiastical law, except priesthood and affinity (from lawful intercourse) in the direct line. However, they can use this privilege only in favour of persons actually living in real concubinage or united by a merely civil marriage, and only when there is no time for recourse to the Holy See. They may also legitimize the children of such unions, except those born of adultery or sarailege. In the decree of 1888, also included from time to time, was the question of diriment impediments. This decree permits therefore (at least until the Holy See shall have issued other instructions) to dispense, in the case of concubinage or civil marriage, from the presence of the priest and of the two witnesses required by the Decree “Ne temere” in the admission of marriages already licensed. Bishops do not agree as to whether bishops hold these faculties by virtue of their ordinary power or by general delegation of the law. It seems to us more probable that those just described under (a) belong to them as ordinaries, while those under (b) are delegated by the Vatican. In the former case, in order to subdelegate the latter they must be guided by the limits fixed by the decree of 1888 and its interpretation dated 9 June, 1889. That is, if it is a question of habitual delegation parish priests only should receive it, and only for cases where there is no time for recourse to the bishop.

Besides the fixed perpetual faculties, bishops also receive from the Holy See habitual temporary faculties for a certain period of time or for a limited number of cases. These faculties are granted by fixed form (formulis), from which the Holy See, from time to time, as occasion requires it, makes some slight modifications. (See Faculties, Canonical) These faculties call for a broad interpretation. Nevertheless it is well to bear in mind, when interpreting them, the actual legislation of the Congregation whereby they issue, so as not to extend their use beyond the places, persons, number of cases, and impediments laid down in a given indult. Faculties thus delegated to a bishop do not in any way restrict his ordinary faculties; nor (in so far as the faculties issued by one Congregation affect those granted by another. When several specifically different impediments occur in one and the same case, and one of them exceeds the bishop's powers, he may not dispense from any of them. Even when the bishop has faculties for each impediment taken separately he cannot (unless he possesses the faculty known as de crumulo) use his various faculties simultaneously in a case where all the impediments being public, one of them exceeds his ordinary faculties. It is not necessary for a bishop to delegate his faculties to his vicars-general; since 1897 they are always granted to the bishop as ordinary, therefore to the vicars-general also. With regard to other prelates a decree of the Holy Office (14 Dec., 1898) declares that for the future temporary faculties may be always subdelegated unless the indult expressly states the contrary. These faculties are valid from the date when they were granted in the Roman Curia. In actual practice they do not expire, as a rule, at the death of the pope nor of the bishop to whom they were given, but pass on to those who take his place (the vicar capitular, the administrator, or succeeding bishop). Faculties granted for a fixed period of time, or for a limited number of cases, cease when the period or number has been reached; but while awaiting their renewal the bishop, unless culpably neglecting it, may proceed provisionally. A bishop can use his habitual faculties only in favour of his own subjects. The matrimonial discipline of the Decree “Ne temere” (2 Aug., 1907) contemplates as such all persons having a true canonical domicile, or continuously resident for one year. Among them, also, viihi, who have no domicile anywhere and can claim no continuous stay of one month. When a matrimonial impediment is common to both parties the bishop, in dispensing his own subject, dispenses also the other.

(C) Vicars Capitular and Vicars-General.—A vicar capitular, or in his place a lawful administrator, enjoys all the dispensing powers possessed by the bishop in virtue of his ordinary jurisdiction or of delegation of the law; according to the actual discipline he enjoys even the habitual powers which have been granted the deceased bishop for a fixed period of time or for a limited number of cases, even if the indult should have been made out in the name of the bishop of N. Considering the actual praxis of the Holy See, the same is true of particular indults (see below). The vicar-general has by virtue of his appointment all the ordinary powers of the bishop over prohibit impediments, but requires a special mandate to give him common-law faculties for diriment impediments. As for habitual temporary faculties, since they are now addressed to the ordinary, they belong also ipso facto to the vicar-general while he holds that office. He can also use particular indults when they are addressed to the ordinary, and when they are not. He can address the bishop can always subdelegate him, unless the contrary be expressly stated in the indult.

(D) Parish Priests and Other Ecclesiastics.—A parish priest by common law can dispense only from an interdict laid on a marriage by him or by his predecessor. Some canonists of note accord him authority to dispense from secret impediments in what are called embarrassing (perplici) cases, i.e. when there is no time for recourse to the bishop, but with the obligation of subsequent submission of the cause to a suitable authority. A similar authority is attributed to them by other canonists. The case seems gravely probable, though the Penitentiary continues to grant it on the condition that his habitual faculties a special authority for such cases and restrict somewhat its use.

(2) Particular Indults of Dispensation.—When there is occasion to procure a dispensation that exceeds the powers of the ordinary, or when there are special reasons for direct recourse to the Holy See, procedure is by way of supplica (petition) and private rescript. The supplica need not necessarily be drawn up by the petitioner, nor even at his instance; it does not, however, become valid until he accepts it. Although, since the Constitution “Sedem,” and the faithful may have direct recourse to the Congregations, the supplica is usually forwarded through the ordinary (of the person's birthplace, or domicile, or, since the Decree “Ne temere,” residence of one of the petitioners), who transmits it to the proper Congregation either by letter or through his accredited agent; but if there is question of sacramental secrecy, it may continue to use them to the Penitentiary, or hand it to the bishop's agent under a sealed cover for transmission to the Penitentiary. The supplica ought to give the names (family and Christian) of the petitioners (except in secret cases), the name of the ordinary forwarding it, and the name of the priest to whom, in secret cases, the rescript must be sent; the age of the parties, especially in dispensations affecting consanguinity and affinity; their religion, at least
when one of them is not a Catholic; the nature, degree, and number of all impediments (if recourse is had to the Congregatio de Disciplinâ Sacramentorum or to the Holy Office in a public impediment, and to the Penitentiaria at the same time in a secret one, it is necessary to the latter should know of the public impediment and that recourse has been had to the competent Congregation). The supplica must, moreover, contain the causes set forth for granting the dispensation and other circumstances specified in the Propaganda Instruction of 9 May, 1877 (it is no longer necessary, either for the validity or legality of the dispensation, to observe the paragraph relating to the exception of course, even when probably this very thing had been alleged as the only reason for granting the dispensation). When there is question of consanguinity in the second degree bordering on the first, the supplica ought to be written by the bishop's own hand. He ought also to sign the declaration of poverty made by the petitioners when the dispensation is sought from the Penitentiaria in formâ pauperum; when he is in any way hindered from so doing he is bound to commission a priest to sign it in his name. A false declaration of poverty henceforth does not invalidate a dispensation. 

Moreover, the evidence of the facts alleged in the case must be given. For this reason, the statements are bound in conscience to reimburse any amount unduly withheld (regulation for the Roman Curia, 12 June, 1908). For further information on the many points already briefly described the reader is referred to the special canonical works, which, inasmuch as all necessary details must be expressed so as to avoid nullity. When a supplica is affected (in a material point) by obversion or subreption it becomes necessary to ask for a so-called "reformatory decree" in case the favour asked has not yet been granted by the Curia, or for the letter known as "Perinde ac valere". Except when the former has already been granted. If, after all this, a further material error is discovered, letters known as "Perinde ac valere super perinde ac valere" must be applied for. See Gasparri, "Tractatus de matrimonio" (2nd ed., Rome, 1892), I, no. 302.

Dispensation rescripts are generally drawn up in formâ commissâ missâ, i.e. they are entrusted to an executor who is thereby obliged to proceed to execute, if he finds that the reasons are as alleged (si vera sint eosquâs). Canonsists are divided as to whether rescripts in formâ commissâ missâ contain a favour granted that a dispensation may or must be granted on the request being actually made, and therefore the moment of the dispensation is considered to have taken place. The executor holds it as received practice that it suffices if the reasons alleged be actually true at the moment when the petition is presented. It is certain, however, that the executor required by the Penitentiaria rescripts may safely fulfill his mission even if the pope should die before he had begun to execute it. The executor named for public impediments is usually the ordinary who forwards the supplica and for secret impediments an approved confessor chosen by the petitioner. Except when the cardinal who has given the person delegated cannot validly execute a dispensation before he has seen the original of the rescript, therein it is usually prescribed that the reasons given by the petitioners must be verified. This verification, usually no longer a condition for valid execution, can be given in the case of public impediments, extra-judicially or by subdelegation. In foro interna it can be made by the confessor in the very act of hearing the confessions of the parties. Should the inquiry disclose no substantial error, the executor proclaims the dispensation, i.e. he makes known, usually in writing, especially if he acts on the initiative of one of the parties, that the impediment which debarred the parties to marry is no longer a barrier and that they are free to marry. The reason, however, is added which dispenses the petitioners if the rescript authorizes him, he also legitimizes the children. Although the executor may subdelegate the preparatory acts, he may not, unless the rescript expressly says so, subdelegate the actual execution of the decree, unless he subdelegates to another ordinary. When the impediment is common to, and known to, both parties, execution ought to be made for both; wherefore, in a case in foro interna, the confessor of one of the parties hands over the rescript, after he has executed it, to the confessor of the other. The executor who is thus set to observe with the full certificate of the decree, as some of them constitute conditions sine qua non for the validity of the dispensation. As a rule, these clauses affecting validity may be recognized by the conditional conjunction or adverb of exclusion with which they begin (e.g. dummodo, "provided that"; et non aliter, "in no other way" absolute). When, however, a clause only prescribes a thing already of obligation by law it has merely the force of a reminder. In this matter also it is well to pay attention to the stulos curiae, i.e. the legal dictum of the Roman Congregations and Tribunals, and to consult authors of repute.

(3) Causes for Granting Dispensations.—Following the principles laid down for dispensations in general, a matrimonial dispensation granted without sufficient cause, even by the pope himself, would be illicit; the more difficult and numerous are the impediments the more serious must be the motives for removing them. An unjustified dispensation, even if granted by the pope, is null and void, in a case affecting the Divine law; and if granted by other bishops or superiors in cases affecting ordinary ecclesiastical law. Moreover, as it is not possible that the pope wishes to act improperly, it follows that he has had the motives for removing the allegations to grant a dispensation, even in a matter of ordinary ecclesiastical law, such dispensation is invalid. Hence the necessity of distinguishing in dispensations between motive or determining causes (causa motiva) and impulsive or merely influencing causes (causa impulsive). If the former are not lacking, the dispensation is still more valid when the acts spontaneously (motus proprio) and "with certain knowledge", the presumption always is that a superior is acting from just motives. It may be remarked that if the pope refuses to grant a dispensation on a certain ground, an inferior prelate, properly authorized to dispense, may grant the dispensation in the same case on other grounds which in his judgment are sufficient. Canonists do not agree as to whether he can grant it on the identical ground by reason of his divergent appreciation of the latter's force. Among the sufficient causes for matrimonial dispensations we may mention twenty-four causes, i.e. classified and held as sufficient by the common law and canonical jurisprudence, and reasonable causes, i.e. not provided for nominally in the law, but deserving of equitable consideration in view of circumstances or particular cases. An Instruction issued by Propaganda (9 May, 1877) enumerates sixteen canonical causes. The "Formulary of the Dataria" (Rome, 1901) gives twenty-eight, which suffice, either alone or concurrently with others, and act as a norm for all sufficient causes. They are: smallness of place or places; smallness of time coupled with the fact that outside it a sufficient dowry cannot be had; lack of dowry; insufficiency of dowry for the bride; a larger dowry; an increase of dowry by one-third; cessation of family feuds; preservation of peace; conclusion of peace between princes or states; avoidance of lawsuits over an inheritance, dowry, or similar case; a public business transaction; the fact that a fiancée is an orphan; or the care of a family; the age of the fiancée over twenty-four; the difficulty of finding another partner; owing to the fewness of male acquaintance, or the difficulty the latter experience in coming to her; the hope of still living the faithful married life; the nature of a Catholic relation; the danger of a mixed marriage; the hope of converting a non-Catholic party; the keeping of property in a family; the preservation of an illustrious or honourable family; the excellence and merit of the parties; defamation to be avoided, or scandal pre-
vented; intercourse already having taken place between the petitioners, or rape; the danger of a civil marriage; of marriage before a Protestant minister; revalidation of a marriage that was null and void; finally, all reasonable causes judged such in the opinion of the pope (e.g. the public undulion), or special causes causing the petitioners and made known to the pope, i.e. motives which, owing to the social status of the petitioners, it is opportune should remain unexplained out of respect for their reputation. These various causes have been stated in their briefest terms. To reach their exact force, some qualifications are needed with the stipulations of the pertinent works of reputable authors, always avoiding anything like exaggerated formalism. This list of causes is by no means exhaustive; the Holy See, in granting a dispensation, will consider any weighty circumstances that render the dispensation really justifiable.

(3) Costs of Dispensations.—The Council of Trent (Nest. X. XIV, cap. V, De ref. matrim.) decreed that dispensations should be free of all charges. Diocesan chanceries are bound to conform to this law (many pontifical documents, and at times clauses in indulgences, remind them of it) and neither to exact nor accept any payment for the modest contribution to the church necessary expenses sanctioned by an Instruction approved by Innocent XI (8 Oct., 1678), and known as the Innocentian Tax (Tasa Innocentiana). Rosset holds that it is also lawful, when the diocese is poor, to demand some expenses as a condition for dispensation. Sometimes the Holy See grants a smaller freedom in this matter, but nearly always with the monition that all revenues from this source shall be employed for some good work, and not go to the diocesan curia as such. Henceforth every rescript requiring execution will state the sum which the diocesan curia is authorized to collect for its execution.

In the Roman Curia the expenses incurred by petitioners fall under four heads: (a) expenses (expense) of carriage (postage, etc.), also a fee to the accredited agent, when one has been employed. This fee is fixed by the Congregation in question; (b) a tax (tasa) to be used in defraying the expenses incurred by the Holy See in the organized administration of dispensations; (c) the componentium, or elenquatory fine to be paid to the Congregation and applied by it to pious uses; (d) an alms imposed on the petitioners and to be distributed by themselves in good works. The moneys paid under the first two heads do not affect, strictly speaking, the gratuity of the dispensation. They constitute a just compensation for the expenses the petitioners occasion the Curia. As for the componentium, besides the fact that they do not profit the pope nor the members of the Curia personally, but are employed in pious uses, they are justifiable, either as a fine for the faults which, as a rule, give occasion for the dispensation, or as a check to restrain a too great frequency of petitions often based on frivolous grounds. And if the Tridentine prohibition be still urged, it may be truly said that the pope has the right to abbreviate the decrees of councils, and is the best judge of the reasons that legitimate such abrogation. We may add that the custom of tax and componentium is neither uniform nor universal in the Roman Curia.

Dispersion of the Apostles (Lat. Divino Apostolorum), a feast in commemoration of the missionary work of the Twelve Apostles. It is celebrated as a double major on 15 July. The first vestige of this feast is found in the sequence composed for it by a certain Saeculare Godescale (d. 1009) in the diocese of the Haardt; he also introduced this feast at Aachen, when provost of the church of Our Lady. The sequence is authenticated by doubt (G. M. Drees, Hymnographia Latin., L. 399, Leipzig, 1907; Iden, Godescaulische Liturgies, ib., 1897). It is next mentioned by William Durandus, Bishop of Mende (Rationale Div. Off. 7.15), in the second half of the thirteenth century. Under the title, "Dimissio", "Dispersio", or "Divisio Apostolorum" it was universally celebrated in the northern countries of Europe, but unknown during the Middle Ages in Spain and Italy.

The object of the feast (so Godescale) is to commemorate the departure (dispersion) of the Apostles from Jerusalem for the various parts of the world, some fourteen years after the Ascension of Christ. According to Durandus some of his contemporaries honoured this feast with (apocryphal) the relics of the twelve (bodies) of St. Peter and St. Paul by St. Sylvester (Schnell, Bibl. ecl., 1591, 2. 2, 173 sq; M. Armellini, Chiese di Roma, 1891, 902 sq.). The feast is now kept with solemnity by modern missionary societies, in Germany and Poland, also in some English and French dioceses, and in the United States by the ecclesiastical provinces of St. Louis, Chicago, Milwaukee, Dubuque, and Santa Fé.

Dispersion of the Jews. See Diaspora.
Dissenters. See Nonconformists.

Dissentia, Abbey of, a Benedictine monastery in the Canton Grisons in eastern Switzerland, dedicated to Our Lady of Mercy. Tradition ascribes its foundation to Sts. Placid and Sigebert, in the year 614, but Mabillon places the date two years earlier. The history of the abbey has been somewhat chequered, but it has at times risen to positions of great importance and influence. It was destroyed by the Avars in 670, when its abbot and thirty monks suffered martyrdom, but was rebuilt by Charles Martel and Abbot Pirminius in 711. Charlemagne visited the abbey on his return journey from Rome in 800 and bestowed upon it many benefactions. Abbot Udalric I (1031–1055) was the first of its superiors to be the emperor, whose dignity was subsequently held by several other of its abbeys; many of them also became bishops of the neighbouring sees. In 1581 the abbey was honoured by a visit from St. Charles Borromeo. After enjoying independence for a thousand years it was incorporated into the newly formed Swiss Congregation in 1617, since which date it has, in common with the other five Benedictine abbeys of Switzerland, been subject to the jurisdiction of the president of that Congregation. In 1799 it was burned and plundered by the soldiers of Napoleon's army, when amongst other valuable treasures, a seventh century MS. chronicle of the abbey perished. The printing press that had been set up in 1729 was also destroyed at the same time, but much of the melted type and other metal was saved and from it were made the pipes of the organ of St. Martin's church at Dissentis, which is still in use. The abbey was rebuilt by Abbot Anselm Huonder, the last of its superiors to enjoy the rank and title of Prince of the Empire. During the nineteenth century the monastery greatly suffered from misfortunes of various kinds, and so great was the relaxation of discipline in consequence that its reputation was almost deserted of. Abbot Paul Kniker came from his abbey of St. Boniface at Munich to assist in restoring regular observance, but so little success attended his efforts that he left Dissentis in 1861 and returned to Munich as a simple monk. The abbey has, however, survived those evil times and is in a satisfactory and flourishing condition. Dom Benedict Prevoit, the eighthieth who has ruled over its fortunes, was abbott in 1905 of a community of between thirty and forty monks, who, among their other duties, served five public oratories and conducted successfully a gymnasia of nearly a hundred boys.

Dissidents in Poland. See POLAND.

Distraction (Lat. distractio, to draw away, hence to distract) is here considered in so far as it is wont to happen in time of prayer and in managing the sacraments. It hardly needs to be noted that the idea of mental prayer and mind-wandering are destructive of each other. So far as vocal prayer is concerned, the absence of natural prayers, if voluntary, will take its from its perfection and be morally reprehensible. Distractions, however, according to the commonly accepted teaching, do not rob prayer of its essential character. To be sure one must have had the intention to pray and therefore in the beginning some formal advercence; otherwise a man would not know what he was doing, and his prayer could not be described even as a human act. So long, however, as nothing is done outwardly which would be incompatible with any degree whatever of attention, in the case of prayer, the lack of explicit mental application does not, so to speak, invalidate prayer. In other words, it keeps its substantial value as prayer, although, of course, when that is the case, it is the dissipation of thought is wilful our addresses to the throne of mercy lose a great deal in efficacy and acceptability. This doctrine has an application for example in the case of those who are bound to recite the canonical Office and who are esteemed to have fulfilled their obligation substantially even though their distractions have been abundant and absorbing. Voluntary distractions, that is to say, what are not free from the mind to thoughts foreign to prayers, are sinful because of the obvious irreverence for God with Whom at such times we are assuming to hold intercourse. The guilt, however, is judged to be venial. In the administration of the sacraments their validity cannot be assailed merely because the one who confers them happens to be a man who is a man and who is a man. Provided he has the required intention and posits the essentials of the external rite proper to each sacrament, no matter how taken over he may be by outside reflections, his act is distinctly a human one and such its value cannot be impugned. Such a state of mind, however, when it is wilful, is sinful, but the guilt is not mortal unless one has thereby laid himself open to the danger of making a mistake in what is regarded as essential for the validity of the sacrament in question.

Joseph F. Delany.

Distributions (from Lat. distributio, canonically termed distributions quotidiana), are certain portions of the revenue of a church, distributed to the canons present at Divine service. There are many regulations concerning these distributions in the "Corpus Juris". The latest law on the subject is found in the decrees of the Council of Trent (Sess. XXII, cap. iii, De ref.), where it is ordained that bishops have power to set aside one-third of the revenues of officials and dignitaries of cathedral and collegiate chapters and convert this third into distributions for those who clearly and distinctly have been consecrated for temporary or permanent present every day at the service to which they are bound. Canons retired on account of their age retain their right to the distributions, as do also capitulars who have received coadjutors, and supernumerary canons who are waiting a regular stall in the chapter. To earn these distributions it is necessary only to chant the Office in common, according to the custom of the particular church to which the beneficiary belongs. A mere corporal presence, however, without mental application to the services performed, will not entitle one in conscience to these distributions. Annaux, Année-Wagner, Decl. du Droit Can. (Paris, 1901); Ferraris, Bull. Can. (Rome, 1899), iii, William H. W. Fanning.

District of Columbia. See WASHINGTON.
Dioecese which had been almost ruined by Giseler, the second Bishop of Merseburg, in his unholy ambition to become Archbishop of Magdeburg in 981. At the same time he fearlessly defended the canonical liberty of ecclesiastical elections against the encroachments of worldly powers.

While Bishop of Merseburg he composed his famous chronicle "Chronicon Thietmar", which comprises in eight books the reigns of the Saxon Emperors Henry I (called the Fowler), the three Ottos, and Henry II (the Saint). The first three books, covering the reigns of Henry I and the first two Ottos, are largely based on previous chronicles, most of which are still extant; the fourth book, comprising the reign of Otto III, contains much original matter; while the remaining four books, which describe the reign of Henry II to the year 1018, are the independent narrative of Thietmar. As councillor of the emperor and participant in many important political transactions, he was well equipped for writing a history of his times. The spirit of sincerity which pervades his chronicle is abundant compensation for the barbarous expressions which occasionally mar the literary style. The last four books, besides being the principal source for Saxon history during the reign of the holy emperors, contain valuable information, not to be found elsewhere, regarding the contemporary history and civilization of the Slavic tribes east of the river Elbe, especially the Poles and Hungarians. Thietmar's original manuscript, with corrections and additions made by himself, is still preserved at Dresden. A facsimile edition of it was prepared by L. Schmidt (Dresden, 1895). The chronicle was also published by Kurze in "Script. Ren. Germ." (Hanover, 1888), and by Lappenburg in "Mon. Germ. Hist.: Script. P. T. CXXXIX. 1081-1472". A German translation was made by Laurent (Berlin, 1848, and Leipzig, 1892).

**Dives** (Latin for rich).—The word is not used in the Bible as a proper noun; but in the Middle Ages it came to be employed as the name of the rich man in the parable. The rich man and Lazarus, Luke xvi. 19-31. It has often been thought that in this lesson on the use of riches Christ spoke of real persons and events. The "House of Dives" is still pointed out in Jerusalem; but, of course, if such a house ever existed, it must have long since disappeared.

**RENARD IN VIEUX, Dict. de la Bible, s. v. LAZARE: Commentaries on this passage of St. Luke.**

**W. S. Reilly.**

**Divination**, the seeking after knowledge of future or hidden things by inadequate means. The means being inadequate they must, therefore, be supplemented by some power which is represented all through history as coming from gods or evil spirits. Hence the secular word divination has a sinister signification. As prophecy is the lawful knowledge of the future, divination, its superstitious counterpart, is the unlawful. As magic aims to do, divination aims to know. Divination is practically as old as the human race. It is found in every age and country, among the Egyptians, Hindus, Romans, and Greeks; the tribes of Northern Asia had their shamanism, the indigenous aborigines of South America, the aboriginals of North America, — all recognized diviners and wizards. Everywhere divination flourished and nowhere, even to-day, is it completely neglected. Ciceró's words were, and apparently always will be, true, that there is no nation, civilized or barbarian, which does not believe that there are signs of future and persons who can interpret them. Cicero divided divination into natural and artificial. Natural (untaught, unskilled) in- cludes dreams, oracles, to which the diviners, in the ancient world, were constantly referring, when engaged in practical business. Cicero says that the practice of divination was a passive subject of inspiration, and the predictions were drawn from a power supposed to be then and there with him. Artificial (taught, studied) comprised all foretelling from signs found in nature or produced by man. Here the diviner was active, and the divination came apparently from his own skill and observation. This branch of divination is almost the same as the Chaldean or Mistic circle. Nathan and others were regarded as divine oracles. St. Thomas with respect to the invocation of demons: divination with express invocation of spirits, embracing dreams, oracles, oracles, oracles, and necromancy, and divination with tacit invocation through signs and movements observed in nature, such as stars, birds, fish, figures, etc., or through signs and arrangements produced by man, such as molten lead poured in water, casting of lots, etc. Dreams here mean these expressly prepared and prayed for with hope of intercourse with gods or the dead. Portents or prodigies are unusual and marvellous sights coming from a real power. Here we are considering artificial divination.

**Methods.**—The diversity of divinatory methods is very great. Secrètly an object or movement in the heavens, on the earth, or in the air or water escaped being metamorphosed into a message of futurity. Add to these the inventions of man, and there is a glimpse of the immense entanglement of superstitions in which pagan people grooped their way. They can, however, be grouped into three classes, as seen from St. Thomas's division. A detailed list has been given by Cicero, Clement of Alexandria in his "Stromata", and others of the Fathers. The first class, express invocation, come oneiricism or divination by dreams; necromancy, by so-called apparitions of the dead or spirit; apparitions of various kinds, which may be either external or in imagination, as Cajetan observes; Pythianism or by possessed persons, as the Delphic Pythianess; hydromancy, by signs in water; aero- mancy, by signs in air; geomancy, by signs in terrestrial substances (geomancy has also another meaning); auspices, by signs in the entrails of sacrificial victims, etc. The second class, tacit invocation and signs found ready-made in nature, embraces judicial or general astrology, pretended to by the nations, through the stars; augury, through the notes of birds, and later covering prediction through their mode of acting, feeling, flying, and also the neighing of horses and sneezing of men, etc.;—with us it comprises all foretelling by signs; oracles, when chance words are turned into signs; empiricism, when the lines of the hand are read; and many similar modes. The third class, tacit invocation and signs prepared by man, includes geomancy from points or lines on paper or pebbles thrown at random; divination of straws; throwing dice; cutting cards; letting a staff fall or measuring it with the finger; the "cage of ferrets"; they will, I will not"; opening a book at random, called Sortes Virgilianae, so much was that confused in this fashion by the Romans; etc. This last transferred to the Bible is still common in Germany and elsewhere. Homomancy is also used for purposes of divination.

**History.**—To attempt to trace the origin of divination is a waste of time, since, like religion it is universal and indigenous in one form or another. Some nations cultivated it to a higher degree than others, and their influence caused certain modes of divination to spread. Oracles, in practice, gained a wide reputation for occult power. Pre-eminent in history stand the Chaldeans as seers and astrologers, but the Egyptians and Chinese were also great adepts in elaborate mysterious rites. Which of them had priority within is still an open question, though the larger share
in the development of divination, especially in connection with celestial phenomena, is attributed to the Chaldeans, a vague term embracing here both Babylonians and Assyrians. In Greece from the earliest historic times are found diviners, some of whose methods came from the Persians and from the Egyptians, a people very versed in this art. While the Romans had modes of their own, their intercourse with Greece introduced new forms, and principally through these two nations they spread in the South and West of Europe. Before Christianity divination was practised everywhere according to rites native and foreign. In early days priest and diviner were one, and their power was very great. In Egypt the pharaoh was generally a priest; in fact, he had to be initiated into all the secrets of the sacerdotal class, and in Babylon and Assyria almost every movement of the monarch and his courtiers was regulated by forecasts of the official diviners and astrologers. The cuneiform inscriptions and the papyri are filled with magical formulae. Witness the two treatises, one on terrestrial and the other on celestial phenomena, compiled by Sargon several centuries before our era. In Greece, where more attention was paid to aerial signs, the diviners were held in high esteem and were treated at the public games. No man, who placed most reliance in divination by sacrifice, had official colleges of augurs and aruspices who by an adverse word could postpone the most important business. No war was undertaken, no colony sent out without consulting the gods, and at critical moments the most trivial occurrence, a sneeze or a cough, would be invested with meaning. Alongside all this official divining there were practised secret rites by all kinds of wizards, magicians, wise men, and witches. Chaldean soothsayers and strolling sybils spread everywhere telling fortunes for gain. Between the regulars and the irregulars, the latter being a very bitter feeling, and as the latter often invoked gods or demons regarded as hostile to the gods of the country, they were regarded as illicit and dangerous and were often punished and prohibited from exercising their art. From time to time in various countries the number and influence of the regular diviners were diminished on account of their pride and oppression, and no doubt at times they in turn may have adroitly mitigated the tyranny of rulers. With an increase of knowledge the fear and respect of the cultivated people for their magicians was so decreased that their authority suffered greatly and they became objects of contempt and satire. Cicero's "De Divinatione" is not so much a description of its various forms as a refutation of them; Horace and Juvenal launched many a keen arrow at diviners and their dupes, and Cato's saying is well known, that he wondered how two augurs could meet without laughing at each other. Rulers, however, retained them and honoured them publicly, the better to keep the people in subjection, and outside classical lands, workers of magic still held sway. Wherever Christianity went divination lost most of its old-time power, and in one form, the natural, ceased almost completely. The new religion forbade all kinds, and after some centuries it disappeared as an official system though it continued to have many adherents. The Fathers of the Church were its vigorous opponents. The tenets of Gnosticism gave it some strength, however, and Neo-Platonism won it some followers. Within the Church itself it proved so strong and attractive to her to new converts that synods forbade it and councils legislated against it. The Council of Ancyra (c. xxiv) in 314 decreed five years penance to consulters of diviners, and that of Laodicea (c. xxxvi), after the clergy to make amulets, and those who wore them to be driven out of the Church. A canon (xxxvi) of Orléans (511) excommunicates those who practised divination, auguries, or lots falsely called Sortes Sactorum (Bibliorum), i.e., deciding one's future conduct by the first passage found on opening a Bible. This method was evidently a great favourite, as a synod of Vannes (c. xvi) in 461 had forbidden it to clerics under pain of excommunication, and that of Agde (c. xliii) in 506 condemned it as against piety and faith. Sixtus IV. Sextus V. and the Fifth Council of Lateran likewise condemned divination. Governments have inflicted great severity. Constantius decreed the penalty of death for diviners. The authorities may have feared that some would-be prophets might endeavour to fulfill forcibly their predictions about the death of sovereigns. When the races of the North, which swept over the old Roman empire, it was only to be expected that some of their lesser superstitions should survive. All during the so-called Dark Ages divining arts managed to live in secret, but after the Crusades they were followed more openly. At the time of the Renaissance and again preceding the French Revolution, there was a marked growth of noxious methods. The latter part of the sixteenth century witnessed a strange revival, especially in the United States and England, of all sorts of superstitious, necromancy or spiritism being in the lead. Today the number of persons who believe in signs and omens to know the future is much greater than appears on the surface. They abound in communities where dogmatic Christianity is weak.

The natural cause of the rise of divination is not hard to discover. Man has a natural curiosity to know the future, and coupled with this is the desire of personal gain, or future, which is closely allied to the desire for eternal life. Some there is, therefore, in every age to lift the veil, at least partially. These attempts have at times produced results which cannot be explained on merely natural grounds, they are so disproportionate or foreign to the means employed. They cannot be regarded as the direct work of God, but, if anything, in the mind of man, as material cause; hence they must be attributed to created spirits, and since they are inconsistent with what we know of God, the spirits causing them must be evil. To put the question directly: can man know future events? Let St. Thomas answer: Substance. Future things can be known either in their causes or in themselves. Some causes always and necessarily produce their effects, and these effects can be foretold with certainty, as astronomers announce eclipses. Other causes bring forth their effects not always and necessarily, but they generally do so, and they can be foretold from their causes. We can only see them in themselves when they are actually present to our eyes. Only God alone, to whom all things are present in His eternity, can see them before they occur. Hence we read in Isaías (xli, 23), "Shew the things that are to come hereafter, and we shall know that ye are gods." Spirits can know better than men the effects to come from the second class of causes because their knowledge is broader, deeper, and more universal, and many occult powers of nature are known to them. Consequently they can foretell more events and more precisely, just as a physician who sees the causes cleaner can better diagnose than one who sees them in the unmodified state. The difference, of course, between the first and second classes of causes is due to the limitations of our knowledge. The multiplicity and complexity of causes prevent us from following their effects. Future contingent things, the effects of the third class, spirits cannot know better than men, need not in every instance be made to come to their decision. On the contrary, they may wisely conjecture about them because of their wide knowledge of human nature, their long experience, and their judgments based upon our thoughts as revealed to them by our words, countenances, or acts. Unless we wish to deny the value of
human testimony, it cannot be doubted that diviners foretold certain contingent things correctly and magicians produced at times superhuman effects. The very survival of divination for so many centuries would otherwise be inexplicable and its role in history an insoluble problem. On religious grounds, to the ancients divination and kindred arts were complete impostures to be contrasted with Scripture. In it we read laws forbidding magie, we have facts like the deeds of Janne and Membres before Pharaoh, and we have a declaration of God showing it possible for a sign or wonder to be foretold by false prophet and false diviner. But, except when God gave them knowledge, their ignorance of the future resulted in the well-known ambiguity of the oracles.

Attempts to give artificial divination a merely natural basis have not succeeded. Chrysippus (de Divinatione, ii, 60) spoke about a power in man to recognize and interpret signs, and Plutarch (de Oraculis) wrote on the special qualifications an augur should have and the nature of the signs; but a preternatural influence was recognized in the end. Some modes may have been natural in their origin, especially when men's superstitions were concurrence was complete without occult influence, but these must have been comparatively rare, for the client, if not always the seer, generally believed in supernatural assistance. That some analogy may be traced between artificial divination and witchcraft, an owl's vision of evil and sad events, the Athenians a welcome omen—and that to send a tooth to lose a friend, may readily be admitted, but to try to connect these with future contingent events would be to reason badly from a very slight analogy, just as to stab an image, to injure the person it represents, would be to mistake a horse's kick for a real one. Human instinct demanded a stronger foundation and found it in the belief in an intervention of some supernatural agency. Reason demands the same.

A corporeal sign is either an effect of the same cause of which it is a sign, as smoke of fire, or it proceeds from the same cause. But the signs of living creatures can be passed over by almost the same reasoning. From those who believed in fatalism, or pantheism, or that man, gods, and nature were all in close communion, or that animals and plants, men and gods, were the same, a belief in omens and auguries of all kinds might be expected (see Animism). Everywhere as a matter of fact, divination and sacrifice were so closely connected that no strict line could have been drawn in practice between divination and sacrifice. If we were to try answering all his questions, while the private wizards boasted of their 'familiar spirits'.

Theological Aspect.—From a theological standpoint divination supposes the existence of devils who have great natural powers and who, actuated by personal interest, or interested in God, ever seek to snare Him or to pervert the divine glory and to draw man into perdition, or at least to injure him bodily, mentally, and spiritually. Divination is not, as we have seen, foretelling what comes from necessity or what generally happens, or foretelling what God reveals or which can be discovered by human effort, but it is the supernatural knowledge of the future, i.e., arriving at it by inadequate or improper means. This knowledge is a prerogative of Divinity and so the seer is said to divine. Such knowledge may not be sought from the evil spirits except rarely in exorcisms. Yet every divination is from them either because they are expressly invoked or because they mix themselves up in these vain searchings after the future that they may entangle men in their snares. The demon is invoked tacitly when anyone tries to acquire information through means which he knows to be inadequate, ignorant of the means are incorrect and the promises of any Divinity or promise they are capable of producing the desired effect. Since the knowledge of futurity belongs to God alone, to ask him directly or indirectly from demons is to attribute to them a Divine perfection, and to ask their aid is to offer them the superabundances of worship; this is superstitious and seditious. But, except when God gave them knowledge, their ignorance of the future resulted in the well-known ambiguity of the oracles.

When the future is not in question the present, and the present and the past, but when all things are contingent, and if we have a knowledge of the future, we have not really knowledge of it, but only a probable knowledge. But when the future is in question, present possibility and past experience are both involved.
Hebrews fell into idolatry, divination, which always accompanied idolatry, revived and flourished, but all during their history it is evident that secretly and again more openly wrongful acts were used, and as a result condemnations were frequent (I K., xxvi, 27; II K., xi, 17). It should be borne in mind that their history is a very long one, and when we reflect how completely other nations were given over to all kinds of impious arts and silly observances we shall readily admit that the Hebrews were in comparison remarkably free from superstitions. When on these flourishing more strongly and permanently it was during the decay of faith and credence and following the time of Christ (see Jos. Ant. Jud., XX, i, viii, 6; Bell. Jud., VI, v, 2). The Talmud shows the downward tendency.

The various methods of divining and kinds of diviners are not always clearly distinguished in Scripture, the Hebrew words being differently interpreted and sometimes merely synonyms. The following list is based mainly upon Lesèr's article in Vigouroux's "Dict. de la Bible":—

1. Divination by consulting the Teraphim (תֶּרַפִּים), or household gods of which we first read in the time of Abraham and Laban (Gen., xxxi, 19). How they were consulted is not known. It was apparently a Chaldean form, as Laban came from that country. They are met with in Judges, xvii, 5; IV K., xxiii, 24, and elsewhere. They sometimes deceived their importers (Zech., x, 2).

2. The Horummin (חורים), a name translated by "interpreters" (Vulg. conjoctores) in the Douay version (Gen., xli, 8), but elsewhere (Dan., ii, 2) by "diviners" (Vulg. oriol) and other names, especially "Chaldeans".

3. The Hakamim (حكامim) are the wise men (Vulg. sapientes) of the Bible (Gen., xli, 8), a name given to those skilled in divination in Egypt, Iudæa (Abd., 8), Persia (Esth. i, 13), and Babylon (Jer., i, 35).

4. Qegom or Magom (מגומ, מג'ומ) designated divination in general and is always used in the Scripture in a bad sense except in Prov., xvi, 10. By it the witch of Endor raised up the dead Samuel (I K., xxviii, 8). "The king of Babylon stood in the high-way, at the head of two ways, seeking divination (qegom), shuffling arrows; he inquired of the idols (Baalim), and consulted envoys" (Esth., xxii, 21). The arrow bore the signs or names of towns, and the first name drawn was the one to be attacked. This was a Babylonian mode. The Arabs practised it so: three arrows were prepared and the first inscribed "The Lord wills it"; the second, "The Lord wills it not"; and the third was blank. If the blank came a new drawing followed until an inscribed arrow was taken. The last method mentioned in text quoted was auspicy (Vulg. exa consulti).

5. Nahold (נוחל) is soothsaying (Vulg. augurium) in the Bible (Num., xxiii, 23). The precise method signified by it is in dispute. The versions make it equivalent to divination by the flight of birds, but this mode, so common among the Greeks and Romans, was apparently not used by the Hebrews except towards the time of Christ. From its derivation, as commonly accepted, it would mean divination by sorpents, opened out on the other hand it is never used in sense in the Scriptures. Balaam's divination by animal sacrifices is so termed (Num., xxiv, 1) and also Joseph's (Gen., xlv, 5) which remains a vexed question in spite of Caluget's triumphant solution (Dict. of the Bible, III, p. 30) except the explanation of Gomorri later be accepted (Hummelauer, Com. in Gen., p. 561).

6. Mekeššheph (מְכֶשֶׁפ) is the magician (Vulg. maleficus) in Ex., vii, 11, and the wizard in Deut., xxviii, 10, who not only seeks the secrets of the future but works wonders. St. Paul mentions two of their leaders, Iannes and Mambres, and their modes are styled sorceries (Vulg. beneficia) in IV K., ix, 22 and (Vulg. maleficia) Micheas, v, 11.

7. The word 'obh (וה) signifies the spirit called and the person calling him, the necromancer. In Deut., xvii, 11, it is expressed by "seeking the truth from the dead" (the best known is connected with Endor) and elsewhere by Pythons (Is., viii, 19), divining spirits (I K., xxviii, 7). The Septuagint translates the words by "ventriloquist," because when the necromancers failed or wished to deceive the people they muttered as if from under the ground as though the client would call them in with a giber". (Cf. Is., xxix, 4). A bottle or skin water-bag is 'obh: the use of the word here may come from the diviner containing the spirit or being influenced by it.

8. The Yiddish word (ניב) were diviners whom we generally find connected with necromancers, and the two terms are perhaps practically synonymous (I K., xxviii, 3; IV K., xxi, 6; etc.)

9. Divining by Me'obn (עובנ) included apparently many methods: divination by chance words, as when Abraham's servant sought a wife for Isaac (Gen., xxiv, 14; I K., xiv, 9; III K., xx, 33); auguries (Is., x, 6); observers of dreams (Deut., xviii, 10), etc. There were also modes by consulting seers (Is., xvii, 17), astrology (Is., xlvii, 13), and by consulting the Elders (I K., xxix, 9).

In the N. T. diviners are not specifically mentioned except in Acts, xvi, 16, concerning the girl who had a daemoniacal spirit; but it is altogether likely that Simon Magus (Acts, viii, 9), Elymas (Acts, xiii, 6), and others (II Tim., iii, 13), including the possessors of the magical books burnt at Ephesus (Acts, xix, 19), practised divination and that it is included in the wonders by which Antichrist will seduce many (Apoc., xix, 20). Under the New Law all this is that of the witches because, placed on a higher plane than under the Old Dispensation, we are taught not to be solicitous for the morrow (Matt., vi, 34), but to trust Him perfectly. Who numbers the very hairs of our heads (Matt., x, 30). In divination, apart from the fraud of the Father of Lies, there was much merely human fraud and endless deception: the predictions were generally as vague and as worthless as modern fortune-telling, and the general result then as now favoured vice and injured virtue. (See Astrology.)

---

DIVINE

DIVINE, Society of (Societas Divinae Charitatis), founded at Maria-Martental near Kaisersesch, in 1903, by Joseph Tillmanns for the solution of the social question through the pursuit of agriculture and trades (printing, etc.) as well as by means of intellectual pursuits. The society consists of both priests and laymen.

TILLMANNS AND OXENHAM, Die wahre Lösung der sozialen Frage (Martental, 1905).

SISTERS OF DIVINE CHA RITY, founded at Besançon, in 1799, by a Vincentian Sister, and modelled on the Sisters of Mercy of St. Vincent de Paul. The motherhouse, originally at Naples, is now in Rome, and there are many filial establishments in Italy, in Malta, and
Gozzo. The sisters have charge of educational institutions, orphanages, hospitals, and insane asylums.

Daughters of Divine Charity, founded at Vienna, 21 November, 1808, by Franziska Lehner (d. 1894) on the Rule of St. Augustine, and approved by the Holy See in 1811, and definitively confirmed 22 July, 1891. The purpose of the congregation is to furnish girls without positions, shelter, care, and the means of obtaining a position, without compensation, likewise to care for servants no longer able to work. The sisters are also engaged in schools, orphan asylums, and kindergartens. The mother-house and novitiate are at Vienna; the congregation has 36 filial houses, 766 sisters, and 59 postulants.

F. M. Rodgers.

Divine Compassion, Institute of the, founded in the City of New York, U. S. A., by the Rt. Rev. Thomas Stanislaus Preston. On 8 September, 1809, Father Preston began a weekly gathering of the poor and abject children of the street in one of the most wretched quarters of the city; after this came the opening of a house for the reformation of young girls not yet hardened in vice, and the preservation of children and elder girls from the moral danger in which they lived. The foundress called it the House of the Holy Family and became its spiritual director. The work was fostered by many prominent Catholic ladies of New York, under the name of The Association for Befriending Children and Young Girls. Foremost among them was Mary C.D. Starr (in religion Mother Veronica; d. at White Plains, 9 Aug., 1904), who became the president of the association and devoted all her time and energies to this work of charity under the direction of Father Preston. Seeing the necessity of a religious community which should be trained to this work and perpetuate it, Father Preston compiled a rule of life for those who desired to devote their lives to it. The first draft was written 8 September, 1833, and was observed in its elemental form until 1846, when it was elaborated and obtained the informal approbation of the Archbishop of New York. The constitution, which was an enlargement of the rule, and represent the norm of living in the institute, were written gradually, as it developed, and reached their completion in 1869. On the 29th of September, 1900, both rule and constitutions received the express canonical approbation of Archbishop Rappoltswiler of New York. The object of the institute is (1) the reformation of erring girls; and (2) the training, religious, mental, and industrial of girls in moral danger from ignorance, indolence, or waywardness, or dangerous influences. The institute is composed of two classes, choir sisters and little (or lay) sisters. In addition to the House of the Holy Family the sisters are in charge of a training school for girls at White Plains, and a working-girls' home in New York City. The institute comprises about 40 sisters in charge of 215 girls.

Divine Office. See Office.

Divine Providence, Sisters of.—I. Sisters of Divine Providence of St. Vincent de Paul, founded at Molsheim, in the Diocese of Strasbourg, by Vicar Ludwig Kremp (1783). After the Revolution, the community reassembled at Bindernheim and, in 1807, received both ecclesiastical and civil approbation, the former from the Arch Bishop of Strasbourg, the latter from Napoleon I. In 1819 the mother-house was suitably located at Rappoltswiler, and in 1820 the institute received papal confirmation. The congregation has (1808) 1800 members, over 1200 of them teachers in 337 primary schools of Alsace. The sisters have over 44,000 children under instruction; they conduct boarding and day schools, orphan asylums, reformatory, a housekeeping school, a high school for girls, and a deaf and dumb institution. Attached to the novitiate are a teacher's seminary and practice school.

II. The Society of Divine Providence, founded, in 1842, at St. Mauritz near Münster by Eduard Micheils, chaplain and private secretary to Archbishop Droste von Vischerlinck, and definitively confirmed 22 July, 1891. The purpose of the congregation is to furnish girls without positions, shelter, care, and the means of obtaining a position, without compensation, likewise to care for servants no longer able to work. The sisters are also engaged in schools, orphan asylums, and kindergartens. The mother-house and novitiate are at Vienna; the congregation has 36 filial houses, 766 sisters, and 59 postulants.

F. M. Rodgers.

Divine Providence, Congregation of the Sisters of, founded in Lorraine, 1762, by the Venerable Jean-Martin Moye (b. 1730; d. 1793), priest of the
Diocese of Metz. Afterwards missionary to China, for the propagation of the faith, the ensuring of a Christian education to children, especially those of the rural population, for the care of the sick, and other works of mercy. Approved by the Bishop of Metz in 1762, and recommended to the solicitude of his clergy, within six years the congregation had exceeded the limits of his diocese and planted itself on the banks of the Vosges. Marie Morel was the first superior. Suppressed in 1792, the congregation was re-established after the Revolution; in 1810 the Rules and Constitutions were confirmed by Pope Pius VII. The mother-house general is at St.-Jean-de-Bassel, in the Diocese of Metz, Lorraine, with establishments in Lorraine, Alsace, Belgium, and the United States. There are about 400 sisters in the Diocese of Metz, and 300 in the Diocese of Strasbourg, who direct schools, boarding schools, industrial schools, domestic economy institutes, hospitals, etc. At St.-Jean-de-Bassel there is a normal institute devoted exclusively to the training of the young teachers of the congregation, generally 185 in number, and connected with this institute is a model school, all under supervision of the education department of the German Imperial Government. In Belgium there are about 100 sisters. At Prop, near Tournai, they direct a normal school and a boarding school. Elsewhere they have charge of schools and kindergartens.

The unpublished Annals of Congregations: Directoire des Sœurs de la Providence (St-Germain-en-Laye 1859) was published in 1911 under the title: La vie d'une sœur (Metz, 1901); MARCHAL. Vie de M. F. de Moye (Paris, 1872).

Sisters of Divine Providence, of Kentucky, incorporated American provincial house at Mt. St. Martin's convent, Newport, Kentucky. Mother Anna Houliné, superior general (d. 1908) of the congregation succeeded in placing the sisters of St.-Jean-de-Bassel in the foremost ranks of teachers in Alsace-Lorraine, and then, like Moye, longed to see them labour for the Christian education of youth in America, where she rightly judged the labourers to be few. In 1888 Bishop Maes of Covington, Kentucky, visited the mother-house general at St.-Jean-de-Bassel, and arranged to have the sisters introduced into his diocese. Accordingly, in August, 1889, three sisters arrived in Covington and took up residence in one of the historical mansions of northern Kentucky, now known as Mt. St. Martin's convent. This Oregon, U.S.A. branch of the American province has now a new convent, the work of which has caused the building of a new convent. In October, 1908, a considerable estate was acquired at Melbourne, Kentucky, the site of a new St. Ann's Convent, where it is designed to erect the new provincial house. Mother Anna visited the American Province in 1892. There are 215 sisters; until 1903 occasional small colonies were added from the mother-house general; about one-third of the subjects are American. At Mt. St. Martin's convent are the novitiate and normal school for the province. Teaching is the primary object of the sisters. They conduct an academy and a preparatory and preparatory school, a grammar school, an infant asylum, a home for French emigrant and working girls, and a home for the aged. The sisters are working in the dioceses of Covington, Providence, and Cleveland, and the archdioceses of New York, Baltimore, and Cincinnati. Sister M. Camillus.

VI. SISTERS OF DIVINE PROVIDENCE, founded at Castroville, Texas, U. S. A., 1868, by Sister St. Andrew from the mother-house at St.-Jean-de-Bassel, Lorraine, at the instance of Bishop Dubuis of Galveston. In 1896 the mother-house was transferred to San Antonio, Texas. The Constitutions were approved by Pope Leo X, 28 May, 1907. The sisters have charge (1898) of 67 schools and academies in Texas, Louisiana, and Oklahoma. Mother Mary Florenc.

VII. SISTERS OF DIVINE PROVIDENCE, St. Andrew, founded at Hambourg-la-Forteresse, in 1806, by Father Anton Gapp, "for the Christian instruction of children in the primary schools and higher schools for girls". The congregation received the authorization of the French Government in 1826, and the mother-house was established at Forbach, Lorraine, but in 1839 was removed to Peltre. Destroyed in 1870 by the Prussians, it was rebuilt after the close of the Franco-Prussian War. The congregation has now in Lorraine 138 institutions, among them 7 higher schools for girls, 20 trade and several housekeeping schools, and 9 hospitals. In Belgium they have 35 foundations. There are altogether 900 sisters, who teach 17,000 children in Lorraine and 4000 in Belgium.

Hillpuchen, Die Orden und Kongregationen (Paderborn, 1908), III; 1925 in Kirchenlex., s. v. Verkehrung.

Divine Redeemer, daughters of the mother-house at Oedenburg, Hungary; founded in 1863 from the Daughters of the Divine Saviour of Vienna. This congregation has 37 filial houses and 300 sisters, who conduct schools of all kinds and care for the sick.

Divine Saviour, society of the, founded at Rome, 8 Dec., 1881, by Johann Baptist Jordan (b. 1848 at Cartwel in Breisgau), elected superior general as Father Francis Mary of the Cross. The original name, Society of Catholic Instruction, was changed some years after its foundation to the present title. The first papal approbation was given by the "Divitum laudis" of 27 May, 1905. The founder impressed on his congregation, in addition to the vows of poverty, chastity, and obedience, a fourth of apostolic mission work. The rules and constitutions are based largely on those of the Society of Jesus. The habit is black with a white veil, and the scapular is black, the four knots of which are tied to remind the wearer of his four vows. In tropical countries the habit is white and the cincture is red. On 13 Dec., 1889, the newly erected Prefecture Apostolic of Assam was placed in charge of the society, which has now 7 principal and 32 dependent stations, served by 13 missionaries, aided by 12 native catechists. The Fathers have published many books in the Khasi dialect, and since September, 1906, a periodical, "Ka ing Khristan". At Luchau, near Bregenz, a German college was established 15 Sept., 1908; in the same year a station was founded at Corvallis, Oregon, U.S.A.; in 1896 several members began work in Brazil. At present (1908) missions are given in thirteen languages from the various centres. The Salvatorians have foundations in Italy, Sicily, Austria, Poland, Moravia, Galicia, Hungary, Germany, Switzerland, Belgium, England, the United States, Brazil, and Colombia. The congregation numbers 400 members, 175 priests, the rest scholastics, lay brothers, and novices, in 35 foundations, of which 28 are Marian Colleges and 7 mission centres.

Among the periodicals issued by the society, in addition to the "Apostol-Kalender" (in German and Hungarian), are the "Nuntius Romanus", "II Missionario" (in German "Der Missionar", since 1907 "Illustrate Monatshefte fürs christl. Haus"; also in Polish), "L'amico dei fanciulli" (in German "Mamma für Kinder"; also in Polish), and the "Savoirianische Mitteilung und Post" (Gentile and Kolarz), containing reports of the work of the society. Connected with the society are a Third Order for lay men and women; the "Academia litteratorum", the members of which cooperate with the fathers in the advancement of Catholic knowledge and literature; the Angel Societies, founded 1884, for children under fourteen, which has as its organ "L'amico dei fanciulli", and a membership of 40,000.

Sisters of the Divine Saviour, founded 8 Dec., 1888, by Father Jordan, to supplement the work of the Salvatorian Fathers, and placed under the Third Rule of St. Francis. The mother-house is in Rome and
there are stations in Assam (where the sisters conduct 6 orphan asylums), Austria, Hungary, Belgium, Switzerland, Italy, Sicily, British Burma, and in the United States. They conduct orphan asylums, kindergartens, and schools, and visit the sick in their homes. The congregation numbers about 200.

Daughters of the Divine Saviour, mother-house at Vienna, a branch of the Niederbrunn Sisters of the Most Holy Saviour, established 1857. The congregation has over 1200 sisters, choir and lay, who care for the sick in hospitals and in their homes, and conduct schools for girls, primary and grammar schools, kindergartens, and schools, etc. The sisters have 72 houses in the Dioceses of Vienna, St. Pölten, Seekau, Koniggratz, Brunn, Gran, Raab, and Parenzo-Pola.

Hülewein, Order und Kongregationen (Paderborn, 1908).

Divine Word, Society of the (Societas Verbi Divini), the first German Catholic missionary society established. It was founded in 1875 during the period of the Kulturkampf at Steyl, near Tegelen, Holland, by a priest, Rev. Arnold Janssen (d. 15 January, 1909), for the propagation of the Catholic religion among pagan nations. It is composed of priests and lay brothers. On completion of their professional studies the students make a two years' novitiate, at the end of which they take the ordinary vows binding for three years. Before ordination the members of the society make perpetual vows. The coadjutor brothers renew their vows every three years for nine years, when they take perpetual vows. The first congregation of the society was established in 1882 in Southern Shantung, China, a district containing 158 Catholics and about 10,000,000 pagans. According to the statistics of 1906-07, this mission numbered 35,378 Catholics, 36,367 catechumens, 1 seminary with 64 Chinese seminarians, 46 European priests, 12 Chinese priests, 12 coadjutor brothers of the society, 3 teaching brothers, and 19 nuns. The second mission founded was in Togo, West Africa, in 1891. There were there then only a hundred Catholics in the district. In 1906 the mission had a prefect Apostolic, 31 priests, 12 coadjutor brothers, 149 nuns, 53 native teachers, and 48 mission stations. There were nearly 3000 children attending the schools; the Catholics numbered 3000. The third mission was in German New Guinea. It is a comparatively new colony. Dangerous fevers are common. The natives (Negritos) are all savages, recognizing no form of authority, having no fixed customs, or administration of justice. The greatest difficulty experienced by the missionaries is the incredible number of languages. Thus in the entire mission district, 452 sq. m., probably more than a hundred languages are spoken. The first Catholic missionaries arrived in German New Guinea in August, 1896. At the close of 1906, there were in the mission a prefect Apostolic, 16 European priests, 13 coadjutor brothers, 18 nuns, 1000 native Catholics, and 400 children in the schools.

In the Argentine Republic the society numbers 51 priests, 31 coadjutor brothers, and 41 nuns. They have charge of colleges, seminaries, and of 12 parishes in the four Dioceses of Buenos Ayres, La Plata, Santa Fe, and Paraná. Part of the mission district, 1000 sq. m., is occupied by the famous Jesuit Reductions of Paraguay. The mission was established in 1808. In Brazil there are 39 priests, 14 coadjutor brothers, and 13 nuns. The society also has a mission in the United States, at Shermerville Techay, Cook Co., Illinois. There are 13 priests and 27 coadjutor brothers in charge of a technical school, and 30 nuns who conduct a home for the aged. In Europe the society has six houses or colleges with 126 priests, 546 coadjutor brothers, and 1059 students for the society. The training convent for the nuns has 231 members. The colleges in Europe are: (1) St. Michael, at Steyl near Tegelen, Holland, founded 8 Sept., 1875, with here 47 priests, 314 coadjutor brothers, and 282 students for the society. (2) Heiligenkreuz (Holy Cross) near Neisse, Silesia, founded 24 Oct., 1892. There are 23 priests, 84 coadjutor brothers, and 241 students. (3) St. Wendel, in the Diocese of Trier, with 18 priests, 68 coadjutor brothers, and 183 students. (4) St. Gabriel, near Vienna, established 4 Oct., 1889. There are 26 priests, 370 novices and students of philosophy and theology, and 80 coadjutor brothers. (5) St. Raphael, Rome, with 5 priests and one coadjutor brother. (6) Bischofsheiden, near Salzburg in Austria, established 17 Aug., 1874.

Nuns.—The Society of the Servants of the Holy Ghost (Societas Servorum Spiritus Sancti) was founded in 1889, at Steyl, Holland, by the Rev. Arnold Janssen. It numbers about 300 nuns who help the fathers in their missions, chiefly by teaching.

Divinity of Christ. See Jesus Christ.

Divisch, Procopius, Premonstratensian, b. at Svinenberg, Bohemia, 26 March, 1698; d. at Prenditz, Moravia, 21 December, 1765. He was christened Weneciusa, but took the name of Procopius when he became a religious. He began his studies at the Znaym Gymnasium and later entered the cloister school of the Premonstratensians at Bruck, Styria. In 1726 he was ordained and soon after became professor of philosophy at the school. His lectures on physics were illustrated by numerous interesting experiments. He received the doctorate in theology at Salzburg in 1753, his thesis being: Tractatus de Dei unitate sub inscriptione A 8 18. In 1758 he took charge of the little parish of Prenditz near Znaym. Here he had sufficient leisure for work and experiment in his favourite subjects, hydrostatics, electricity, constructing the necessary instruments himself. His fame soon spread abroad, and he was called to Vienna to repeat his electrical experiments to the Emperor Francis and the Empress Maria Theresa. He was one of the first to apply electricity in the treatment of disease. In 1750, prior to the publication of the French translation of Franklin's letters to Collinson (1751), he knew of the discharging property of pointed rods and applied his knowledge to the performances of curious tricks. The first lightning-rod was erected by Divisch at Prenditz, in 1754, before Franklin's suggestions were known and before they had been carried out elsewhere. Divisch's device is quite different from that proposed by the Philadelphian. He petitioned the emperor in 1755 to put up similar rods all over the country and thus protect the land from lightning. This proposal was rejected on the advice of the mathematicians of Vienna. He also constructed the Denyor (Denis, "Divine", d'or, "of gold"), a musical instrument, imitating strings, and producing mechanical effects. His theories are expounded in his published work, Theoretischer Tractat oder die längst verlangte Theorie von der meteorologischen Elektricität (Tübingen, 1765; Frankfort, 1768; Bohemen in Prague, 1769).

Divorce.—This subject will be treated here under two distinct heads: I. in Moral Theology; II. in Civil Jurisprudence.

I. in Moral Theology.—The term divorce (divortium, from divortere, divortere, "to separate") was
employed in pagan Rome for the mutual separation of married people. Etymologically the word does not indicate whether this mutual separation included the dissolution of the marriage bond, and in fact the word is used by the Church and in ecclesiastical law in this and other significations. Hence we distinguish between *divortium plenum* or *perfectum* (absolute divorce), which implies the dissolution of the marriage bond, and *divortium imperfectum* (limited divorce), which leaves the marriage bond intact and implies only the cessation of common life (separation from bed and board, or in addition the separation of dwelling place). In civil law divorce means the dissolution of the marriage bond; *divortium imperfectum* is called separation (*séparation de corps*).

The Catholic doctrine on divorce may be summed up in the following propositions: A. In Christian marriage, which implies the restoration, by Christ Himself, of marriage to its original indissolubility, there can never be an absolute divorce, at least after the marriage has been consummated; B. Non-Christian marriage can be dissolved by absolute divorce under certain circumstances in favour of the Faith; C. Christian marriage before consummation can be dissolved by solemn profession in a religious order, or by an act of papal authority; D. Separation from bed and board ( *divortium imperfectum*) is allowed for various causes, especially in the case of adultery or lapse into infidelity or heresy on the part of husband or wife, or other causes which shall explain in every case the indissolubility of marriage (cf. Matt., xix, 9; Luke, xvi, 18). In like manner, St. Paul: "To them that are married, not I but the Lord commandeth, that the wife depart not from her husband. And if she depart, that she remain unmarried, or be reconciled to her husband. And let not the husband put away his wife except she do peccate; and in the case of adultery or members; and if anyone shall put away his wife, he may not remarry, neither may she marry another, until she be reconciled to her husband. And if she depart, and marry another, he shall not marry her, except she be reconciled to her husband."

A. *In Christian marriage*, which implies the restoration, by Christ Himself, of marriage to its original indissolubility, there can never be an absolute divorce, at least after the marriage has been consummated.

1. *The Original Indissolubility of Marriage and Its Restoration by Christ*.—The indissolubility of marriage was ordained by Christ Himself according to the testimony of the Apostles and Evangelists: "Whosoever shall put away his wife and marry another, committeth adultery against her. And if the wife shall put away her husband, and be married to another, she committeth adultery" (Matt., xix, 11, 12).—*Cf. Matt., xix, 9; Luke, xvi, 18.* In like manner, St. Paul: "To them that are married, not I but the Lord commandeth, that the wife depart not from her husband. And if she depart, that she remain unmarried, or be reconciled to her husband. And let not the husband put away his wife except she do peccate; and in the case of adultery or members; and if anyone shall put away his wife, he may not remarry, neither may she marry another, until she be reconciled to her husband. And if she depart, and marry another, he shall not marry her, except she be reconciled to her husband."

2. *Divorce among the Israelites*.—In spite of the Divine law of the indissolubility of marriage, in the course of time divorce, in the sense of complete dissolution of marriage, became prevalent to a greater or less extent among all nations. Moses found this custom among the people of Israel. As lawgiver, he ordained in the name of God (Deut., xxiv, 1): "If a man take a wife, and have her, and she find not favour in his eyes, for some uncleaness: he shall write a bill of divorce, and shall give it in her hand, and send her out of his house." The rest of the passage shows that this divorce was understood as justifying the wife in her marriage with another husband, and to be a complete annulment of the first marriage. Some regard it only as a freedom from penalty, so that in reality the remarriage of the divorced wife was not allowed, and was adultery, because the bond of the first marriage had not been dissolved. This former opinion was held by the humanist and canonist Peter Lombard (IV Sent., del. xxxii, 3), St. Bona-venture (IV Sent., del. xxxii, art. 3, Q. 1), and others. Others again, however, believe that there was a real permission, a dispensation granted by God, as otherwise the practice sanctioned in the law would have been inequitable. They quote the following passage from the Old Testament: "Moreover, (Christ loc. cit.) seems to have rendered illicit what was illicit in the beginning, but what had really been allowed later, even though it was allowed "by reason of the hardness of your heart" (St. Thomas, III, Suppl., Q. lvii, a. 3, B.; Bellarmine, "Controverses de matrim.", I, xvii; Sanchez, "De matrim.", 1, disp. 4, 251, in which several works of the Turin professor, J. N. Nuyts, and a series of propositions defended by him were condemned, as is expressly said, "de Apostolice sedis festivegium", 22 August,
12; etc.). This second opinion maintains and must
maintain that the expression “for some uncleanness” (in Hebrew דֶּרֶךְ צְנָעִים) does not mean any slight cause, but a serious one, which is the usual and customary
expression against the purpose of marriage or marital fidelity. A separation at will, and for slight reasons, at the pleasure
of the husband, is against the primary
principles of the natural moral law, and is not subject to
Divine dispensation in such a way that it could be made licit in every case. There are serious causes governed by
Divine law. This, indeed, does not correspond perfectly
with the secondary purposes of marriage, but on that
account it is subject to Divine dispensation, since the
inconvenience to be feared from such a separation can be
corrected or avoided by Divine Providence. In the
time of Christ there was an acute controversy between the
recent, lax school of Hillel and the strict, conservative school of Shammai about the meaning of the phrase דֶּרֶךְ צְנָעִים. Hence the question with which the Pharisees tempted Our Lord: “Is it lawful to put away a wife for every cause?” The
wife of frivouls reasons had already been sharply
denounced by God through the Prophets Microchus (ii, 9) and Malachias (ii, 14), but in later days it became
very prevalent. Christ abolished entirely the
permission which Moses had granted, even though this permission was strictly limited. He allowed a similar
to the דֶּרֶךְ צְנָעִים as reason for putting away the
wife, but not for the dissolution of the marriage bond.

3. The Dogmatic Basis and Practical Application of
the Complete Indissolubility of Consummated Marriage
within the Catholic Church.—(a) Its Foundation in Scripture. The doctrine of divorce (divortium perfectum) in Christian marriage is expressed in the words quoted above (Mark, x; Luke, xvi; I Cor., vii). The words in St. Matthew’s Gospel (xix, 9), “except it be for fornication”, has, however, given rise to the question whether the putting-away of the wife and the
dissolution of the marriage bond were not allowed on account of adultery. The Catholic Church and Catholic
theology have always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
teaching and the inerrancy of Sacred Scripture, the
explanation in Matthew must be explained as the more
deliberate of the understanding of the unforeseen adultery without the dissolution of the marriage bond. Such a dismissal is not excluded by the parallel
texts in Mark and Luke, while Paul (I Cor., vii, 11) clearly indicates the possibility of such a
dismissal: “And if she depart, that she remain
unmarried, or be reconciled to her husband”. Gram-
marically, the clause in St. Matthew may modify one
member of the sentence (that which refers to the putting-
away of the wife) without applying to the following
member (the remarriage of the other), though we
must admit that the construction is a little harsh. If
it be so, however, given rise to the question whether the putting-away of the wife and the dissolution of the marriage bond were not allowed on account of adultery. The Catholic Church and Catholic
theology have always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
teaching and the inerrancy of Sacred Scripture, the
explanation in Matthew must be explained as the more
deliberate of the understanding of the unforeseen adultery without the dissolution of the marriage bond. Such a dismissal is not excluded by the parallel
texts in Mark and Luke, while Paul (I Cor., vii, 11) clearly indicates the possibility of such a
dismissal: “And if she depart, that she remain
unmarried, or be reconciled to her husband”. Gram-
marically, the clause in St. Matthew may modify one
member of the sentence (that which refers to the putting-
away of the wife) without applying to the following
member (the remarriage of the other), though we
must admit that the construction is a little harsh. If
it be so, however, given rise to the question whether the putting-away of the wife and the dissolution of the marriage bond were not allowed on account of adultery. The Catholic Church and Catholic
theology have always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
teaching and the inerrancy of Sacred Scripture, the
explanation in Matthew must be explained as the more
deliberate of the understanding of the unforeseen adultery without the dissolution of the marriage bond. Such a dismissal is not excluded by the parallel
texts in Mark and Luke, while Paul (I Cor., vii, 11) clearly indicates the possibility of such a
dismissal: “And if she depart, that she remain
unmarried, or be reconciled to her husband”. Gram-
marically, the clause in St. Matthew may modify one
member of the sentence (that which refers to the putting-
away of the wife) without applying to the following
member (the remarriage of the other), though we
must admit that the construction is a little harsh. If
it be so, however, given rise to the question whether the putting-away of the wife and the dissolution of the marriage bond were not allowed on account of adultery. The Catholic Church and Catholic
theology have always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
teaching and the inerrancy of Sacred Scripture, the
explanation in Matthew must be explained as the more
deliberate of the understanding of the unforeseen adultery without the dissolution of the marriage bond. Such a dismissal is not excluded by the parallel
texts in Mark and Luke, while Paul (I Cor., vii, 11) clearly indicates the possibility of such a
dismissal: “And if she depart, that she remain
unmarried, or be reconciled to her husband”. Gram-
marically, the clause in St. Matthew may modify one
member of the sentence (that which refers to the putting-
away of the wife) without applying to the following
member (the remarriage of the other), though we
must admit that the construction is a little harsh. If
it be so, however, given rise to the question whether the putting-away of the wife and the dissolution of the marriage bond were not allowed on account of adultery. The Catholic Church and Catholic
theology have always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
theology has always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
theology has always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
theology has always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
theology has always maintained that by such an
explanation St. Matthew would be made to contradict St. Paul, and Paul and St. Matthew, as is clearly indicated by these latter words, would have been brought into
error with regard to the real doctrine of Christ. As this is
inconsistent both with the infallibility of the Apostolic
we are not allowed even to marry, although we put our wives away"; Clement of Alexandria (d. 217), “Strom.,” II, xxi (P. G., VIII, 1096), mentions the ordinance of Holy Scripture in the following words: "You shall not put away your wife except for fornication and [Holy Scripture] considers as adultery a remarriage while the other of the separated persons survives." Similar expressions are found in the course of the following centuries both in the Latin and in the Greek Fathers, e. g. St. Basil of Caesarea, “Epist. can. ii,” “Ad Amphilochemum,” can. xlvii (I. G. c. XLI, 752); St. Ambrose, “in Luc.” VIII, v. 18 sqq. (P. L. XV, 1855); St. Jerome, Epist. iv (ad Amand.), n. 3 (P. L., XXII, 562); St. Augustin, “De adulterinis conjugibus,” iv (P. L., XL, 472), etc., etc. The occurrence of passages in some Fathers, even among those just quoted, which treat the husband more mildly in case of adultery, or seem to allow him a new marriage after the infidelity of his spouse, does not prove that these expressions are to be understood of the permissibility of a new marriage, for the lesser cannot be an exemption from punishment by civil law. Or if they refer to a command on the part of the Church, the new marriage is supposed to take place after the death of the wife who was dismissed. This permission was mentioned, not without reason, as a concession for the intercourse, because at some periods the Canon laws in regard to the guilty party forbade forever any further marriage (cf. can. vii of the Council of Compiègne, 757). It is well known that the civil law, even of the Christian emperors, permitted in several cases a new marriage after the separation of the wife. Hence, without contradicting himself, Basil could say of the husband, "He is not condemned," and "He is considered excusable" (Ep. clxxviii, can. ix, and Ep. cxxix, can. xxi, in P. G., XXXII, 678, 721), because he is speaking distinctly of the milder treatment of the husband than of the wife with regard to the canonical penance imposed for adultery. St. Epiphanius, who is especially reproached with teaching that the husband who had put away his wife because of adultery or another crime was allowed by Divine law to marry another (Heres., lix, 4, in P. G., XI, 1024), is speaking in reality of a second marriage after the death of the dead wife, and, whilst he has granted, though either of the parties be unfaithful, the possibility of such a second marriage is allowed, but is less honourable, still he makes the exception in regard to this last part in favour of one who had long been separated from his first wife. The other Fathers of the following centuries, in whose works ambiguous or obscure expressions may be found, are to be explained in like manner.

The practice of the faithful was not indeed always in perfect accord with the doctrine of the Church. On account of defective morality, there are to be found regulations of particular synods which permitted unjustifiable concessions. However, the synods of all centuries, and more clearly still the decretals of the popes, have constantly declared that divorce which annulled the marriage and permitted remarriage was never allowed. The Synod of Elvira (A. D. 300) maintains, and whilst the laws of the marriage bond, even in the case of adultery, Canon ix decreed: "A faithful woman who has left an adulterous husband and is marrying another who is faithful, let her be prohibited from marrying; if she has married, let her not receive communion until the man to whom she has left shall have lived less ill than she should make this an imperative necessity" (Labbe, “Concilia,” II, 7). The Synod of Arles (344) speaks indeed of counselling, as far as possible, that the young men who had dismissed their wives for adultery should take no second wife (ut, in quantum possit, consilium eis detur); but it declares at the same time the illicit character of such a second marriage, because it says of these husbands, "They are forbidden to marry" (prohibentur nubere, Labbe, II, 472). The same declaration is to be found in the Second Council of Mileve (416), canon x (Labbe, IV, 331); the Council of Alexandria (467), canon x (Labbe, VII, 554); and the Council of Friuli (Forum Juli), in northern Italy (791), canon x (Labbe, IX, 46). All of these teach distinctly that the marriage bond remains even in case of dismissal for adultery, and that new marriage is therefore forbidden to them who are adulterers on both sides."

Compare also with “Epist. ad Vict. Rothom.”, xiii, 15 (P. L., XX, 479). "In respect to all cases the rule is kept that whoever marries another man, while her husband is alive, must be held to be an adulteress, and must be granted no leave to do penance unless one of the parties be dead. The impediment of absolute divorce during the entire life of married people could not be expressed more forcibly than by declaring that the permission to perform public penance must be refused to women who remarried, as to a public sinner, because this penance presupposed the cessation of sin, and to remain in a second marriage was to continue in sin.

Besides the adultery of one of the married parties, the laws of the empire recognized other reasons for which marriage might be dissolved, and remarriage permitted, for instance, protracted absence as a prisoner of war, or the decay of religious life by virtue of the spouses. In these cases, also, the popes pronounced decidedly for the indissolubility of marriage, e. g. Innocent I, “Epist. ad Probum”, in P. L., XX, 602; Leo I, “Epist. ad Nicolatum Aquil.”, in P. L., LIV, 1136; Gregory I, “Epist. ad Urbeam Abb.”, in P. L., LXXVII, 893, and “Epist. ad Hadrianum Notar.”, in P. L., LXXVII, 1169. This last passage, which is found in the “Decretum” of Gratian (C. xxvii, Q. ii, c. xxi), is as follows: "Although the civil law provides that, for the sake of conversion (i. e. for the purpose of choosing the religious life), a marriage may be dissolved, the parties in general must, if it be not against the Divine law, to have done." That the indissolubility of marriage admits of no exception is indicated by Pope Zacharias in his letter of 5 January, 747, to Pepin and the Frankish bishops, for in chapter vii he ordains "by Apostolic authority," in answer to the questions that had been proposed to him: "If any layman shall put away his own wife and marry another, or if he shall marry a woman who has been put away by another man, let him be deprived of communion" (Monum. Germ. Hist.: Epist. III: Epist. Merovingii et Karolini aevi, I (Berlin, 1892), 482.

(c) Laxer Admissions and their Correction.—

Whilst the popes constantly rejected absolute divorce in all cases, we find some of the Frankish synods of the eighth century which allowed it in certain acute cases. In this regard the Councils of Verberie (752) and Compiegne (753), especially the last, pass judgment on the first council is undoubtedly erroneous (Labbe, VIII, 407). In this can it is laid down that if a man must go abroad, and his wife, out of attachment to home and relatives, will not go with him, she must remain unmarried so long as the husband is alive. If he then returns and she refuses to rejoin him, she is held to be the blameworthy woman, a second marriage is allowed to the husband: "If he has no hope of returning to his own country, if he cannot abstain, he can receive another wife with a penance." So deeply was the pre-Christian custom of the people engraven in their hearts that it was believed allowance should be
made for it to some degree. Canon v seems also to grant the unauthorized permission for a second marriage. It treats of the case in which the wife, with the help of other men, seeks to murder her husband, and he escapes from the plot by killing her accomplices in self-defense, such a husband might be allowed to take another wife: "That husband can put away that wife, and, if he will, let him take another. But let that woman who made the plot undergo a penance and remain without hope of marriage." Some explain this canonic to mean that the husband might marry again after the death of his first wife, but that the crime of the wife who had conspired forever to murder. This is in agreement with the penitential discipline of the age, because the crime in question was punished by life-long canonical penance, and hence permanent exclusion from married life.

In its thirteenth canon (according to Labbe, VIII, 432; others call it the sixteenth), the Council of Compiègne gives a somewhat ambiguous decision and may seem to allow absolute divorce. It says that a man who has dismissed his wife in order that she might choose the religious life, or take the veil, can marry a second wife; for the former has carried out her resolution. Nevertheless, the intended object of the state of Christian perfection seems to imply that this canon must be limited to a marriage that has not been consummated. Hence it gives the correct Catholic doctrine, of which we shall speak below. This must also be the meaning of Labbe, VIII, 432, and others, canon xxviii, which allows the dissolution of a marriage between a leper and a healthy woman, so that the woman is authorized to enter upon a new marriage, unless we suppose that there here is question of the diriment impediment of impotence. If these canons were really intended in all cases, then they are contrary to the general doctrine of the Church. Other canons, in which separation and second marriage are allowed, refer undoubtedly to the diriment impediments of affinity and spiritual relationship, or to marriage contracted in error by persons one of whom is free and the other not free. Such a husband is allowed to take another wife, and another wife might be allowed. The following cases are mentioned in several of these Penitential Books: adultery, slavery as punishment for crime, imprisonment in war, willful desertion without hope of reunion, etc. (Schmitz, II, 129 sqq.). Then, Penitential Books had indeed no official character, but they influenced for a time the ecclesiastical practice in these countries. However, their influence did not last long. In the first decades of the ninth century, the Church began to proceed energetically against them (cf. the Synod of Chalons, in the year 813, canon xxxviii; Labbe, IX, 367). They were not completely suppressed at once, especially as a general decay of Christian morality took place in the tenth and early part of the eleventh century. Towards the end of the eleventh century, however, every concession to the laity in general, as regards divorce, had been completely swept away. The complete indissolubility of Christian marriage had become so firmly fixed in the juridical conscience that the authentic collections of church laws, the Decretals of the twelfth century, do not even see the necessity of expressly declaring it, but simply suppose it, in other juridical decisions, as a matter of course and beyond discussion. This is shown in the entire series of cases in IV, Decretal, xiv. In all cases, whether the cause be criminal plotting, adultery, loss of faith, or anything else, the bond of marriage is regarded as absolutely indissoluble and entrance upon a second marriage as impossible.

(d) Dogmatic Decision on the Indissolubility of Marriage.—The Council of Trent was the first to make a dogmatic decision on this question. This took place in Session XXIV, canon v: "If anyone shall say that the bond of matrimony can be dissolved for the cause of such a surplusity as, under pretense of mere desertion; let him be anathema." And in canon vii: "If anyone shall say that the Church has erred in having taught, and in teaching that, according to the teaching of the Gospel and the Apostles, the bond of matrimony cannot be dissolved, and that neither party—no, not even the innocent, who has given up his unchaste act of adultery—can obtain another marriage while the other lives, and that he, or she, commits adultery who puts away an adulterous wife, or husband, and marries another; let him be anathema." The decree defines directly the infallibility of the church doctrine in regard to the indissolubility of marriage, even in the case of adultery, but indirectly the decree defines the indissolubility of marriage. Doubts have been expressed here and there about the dogmatic character of this definition (cf. Sasse, "De Sacramentis," II, 426). But Leo XIII, in his encyclical "Aeterni Patris," 10 June, 1879, and "Aeterni patris," 1890, excommunicates all the condemned by the Council of Trent "the baneful heresy." The acceptance of this indissolubility of marriage as an article of faith defined by the Council of Trent is demanded in the creed by which Orientalists must make their profession of faith. The formula prescribed by Urban VIII contains the following section: "Also, that the bond of the Sacrament of Marriage is indissoluble; and that, although a separation of persons be made between the parties, for adultery, desertion, or other causes, yet it is not lawful and in no way contrary to the law of God, to contract another marriage, and to join another bond of matrimony, which might be very much offended, according to the testimony of the Venetian ambassadors, if the anathema had been directed against them, whereas they would find it easier to accept the decree that the Roman Church was not guilty of error in her strict adherence to the law (Pallavicini, "Hist. Conc. Trid.," XXII, iv).

(e) Development of the Doctrine on Divorce outside of the Catholic Church. —In the Greek Church, and the other Oriental Churches in general, the practice, and finally even the doctrine, of the indissolubility of the marriage bond became more and more lax. Zhihman (Das Eherecht der orientalischen Kirchen, 729 sqq.) testifies that the Greek and Oriental Churches separated from Rome permit in their official ecclesiastical documents the dissolution of marriage, not merely on account of adultery, but also of those occasions and actions the effect of which might be regarded as similar to natural death or to adultery, or which justify the dissolution of the marriage bond in consequence of a well-founded supposition of death or adultery. Such reasons are, first, high treason; second, criminal attacks on life; third, frivolous conduct giving rise to suspicion of adultery; fourth, the act of a person of willful and stubborn infidelity, as the mother of baptism; sixth, prolonged disappearance; seventh, incurable lunacy rendering cohabitation impossible; eighth, entrance of one party into a religious order with the permission of the other party.

Among the sects that appeared at the time of the Reformation in the sixteenth century, there can hardly be question of any development of church law about divorce. Jurisdiction in matrimonial affairs was relegated, on principle, to the civil law, and only the blessing of marriage was assigned to the Church. It is true
that the interpretation of the so-called ecclesiastical officials, their approbation or disapprobation of the civil marriage laws, might find expression in certain cases should they refuse to bless an intended marriage of people who had been divorced when the reason for the divorce was to be too much opposed to the teachings of Scripture. It is not surprising that in this respect the tendency should have been downwards, when we remember that in the various sects of Protestantism the growth of liberalism has advanced even to the denial of Christ [Dr. F. Albert, Verbrechen und Strafen als Eheverbrechen und nach evang. Kirchenrecht (in Stutz, Kirchen. Abhandlungen. Stuttgart, 1903), I, IV]

1. Declaration of Nullity.—The declaration of nullity must be carefully distinguished from divorce proper. It can be called divorce only in a very improper sense, because it presupposes that there is and has been no marriage. However, as there is question of an alleged marriage and of a union which is not considered by the public as a true marriage, we can understand why a previous ecclesiastical judgment should be required, declaring the presence of a diriment impediment and the consequent invalidity of a supposed marriage, before the persons in question might be free to separate or to enter upon a new union. It is only when the invalidity of a marriage becomes publicly known, and further cohabitation gives scandal, or when other important reasons render a prompt separation of domicile necessary or advisable, that such a separation should take place at once, to be made effective by a later judicial sentence. When the invalidity of a marriage is publicly known, official procedure is necessary, and the ecclesiastical process of nullification must be introduced. In the case of impediments which refer exclusively to the rights of the husband and wife, and which can be removed by their own consent, only the one of them whose right is in question is permitted to impugn the marriage by complaint before the ecclesiastical court, provided it is desired to maintain this right. Such cases are the impediments of fear or violence, of essential error, of impotence on the part of the husband, which is not fully established, and failure to comply with some fixed condition. In cases of the other possible impediments, every Catholic, even a stranger, may enter a complaint of nullity if he can bring proofs of such nullity. The only plaintiffs excluded are those who, on account of private advantage, were unwilling to declare the invalidity of the marriage before its dissolution by death, or who knew the impediment when the banns of marriage were proclaimed and culpably kept silence. Of course it is allowed to the married parties to disprove the reasons alleged by strangers against their marriage (Wernz, "Jus decreetalum", IV, n. 743).

That separation and remarriage of the separated parties may not take place merely on account of private convictions of the invalidity of a supposed marriage, but only in consequence of an ecclesiastical judgment was taught by Alexander III and Innocent III in IV Decretal., xix, 3, and II Decretal., xiii, 13. In the earlier centuries the summary decision of the bishops sufficed; at present the Constitution of Benedict XIV, "De miseratione", 3 November, 1714, must be followed. This prescribes that in matrimonial cases the minister of the matrimonial tie (defensor matrimonii) must be appointed. If the decision is for the validity of the marriage, there need be no appeal in the second instance. The parties can be satisfied with the first decision and continue in married life. If the decision is for the invalidity of the marriage, an appeal must be made, and sometimes even a second appeal to the court of third instance, so that it is only after two concordant decisions on the invalidity of the marriage in question that it can be regarded as invalid, and the parties are allowed to proceed to another marriage. (Cf. III Conc. plen. Baltim., App. 262 sqq.; Conc. Americ. latin., II, n. 16; Laurentius, "Instit. juris eoc.", 2nd ed., n. 696 sqq.; Wernz, "Jus decreetal.", IV, n. 741 sqq.) Sometimes, however, in missionary countries, Apostolic prefects are permitted to give summary decision of cases in which two concordant opinions of approved theologians or canons were pronounced on the invalidity of the marriage in question.

Moreover, in cases of evident nullity, because of a manifest impediment of blood-relationship or affinity, of previous marriage, of the absence of form, of lack of baptism on the part of one party, a second sentence of nullity is no longer demanded (Deer, of the Holy Office, 5 June, 1904, Acta S. Sedis, XXVII, 141; also Deer. of the Holy Office, 27 March, 1901, Acta S. Sedis, XXXIII, 756). The court of first instance in the process of nullification is the episcopal court of the diocese, of second instance the metropolitan court, of third instance the Roman See. Sometimes, however, Rome designates for the third instance a metropolitan see of the country in question (Laurentius, above, 697, not. 6). No one, however, is prohibited from immediate application in the first instance to the Holy See. Custom reserves to the Holy See matrimonial cases of reigning princes.

In the Decreetals of new marriage is treated under the title "De Divortiis". But it is important that these matters should be carefully distinguished from one another. The lack of exact distinction between the expressions "declaration of invalidity" and "divorce", and the different treatment of invalid marriages at different periods, may lead to a misinterpretation of ecclesiastical decisions. Decisions of particular Churches are too easily regarded as dissolutions of valid marriages, where in fact they were only declarations of nullity; and even papal decisions, like those of Gregory VII, were communicated to St. Boniface and Alexander III, by the bishops of the Roman Church, and were in the first place carried on by some writers as permissions granted by the popes to the Frankish Churches to dissolve a valid marriage in certain cases. The decision of Gregory II, in the year 726, was embodied in the collection of Gratian (C. xxvi, Q. vii, c. xvii), and printed in "Mons C. Hist.", III, Epist. (Epist. Merovingici et Carolin. I), p. 276; the decision of Alexander III is given in the Decretals as pars decia, i.e., a part of the papal letter (IV Decretal., xx, 2) left out in the Decretal itself. In both cases there was question of a declaration of the nullity of a marriage which was invalid from the very beginning because of antecedent impotence. A certain concession to the Frankish Churches was, however, made in these cases. According to Roman custom such supposed husband and wife were not separated, but were bound to live together as brother and sister. In the Frankish Churches, however, a separation was pronounced and permission to contract another marriage was allowed to the one not afflicted with absolute impotence. This custom Alexander III granted to the Frankish Churches for the future. If, therefore, the union in question is spoken of as a lepulta conjunctio, or even as a legitima matrimonium, this is done only on account of the external form of the marriage contract. That in such cases a diriment impediment according to the natural law was present, and an actual marriage was impossible, was well understood by the pope. He says this expressly in the part of his letter that has been embodied in the Decretals of IV Decretal., xx, 2. (Cf. Nagmüller, "Die Ehe Heinrichs II" in the tibingen "Theol. Quartalschr.", LXXXVII, 1905, 31 sqq.). That in similar cases decision has been given sometimes for separation and sometimes against it, need excite no surprise, for even at the present day, the ecclesiastical title of the wife is not settled (cf. controversy in "The American Eccle. Review", XXVIII, 51 sqq.).

B. Non-Christian Marriage Can Be Dissolved by Absolute Divorce under Certain Circumstances in Favour of the Faith.
1. The Pauline Privilege.—The Magna Charta in favour of Christian faith is contained in the words of the Apostle, I Cor., vii, 12-13: "If any brother hath a wife that believeth not, and she consent to dwell with him, let him not put her away. And if any woman have a husband that believeth not, and he consent to dwell with her, let her not put away her husband. For the unbelieving husband is sanctified by the believing wife, and the unbelieving wife is sanctified by the believing husband: otherwise your children should be unclean; but now they are holy. But if the unbeliever depart, let him depart. For a man not brought up in the law is under no necessity, and the Lord will open a way for him to depart. But God hath called us in peace." (On the interpretation of these words see Cornely on I Cor., 175 sqq.) The exegetical controversy, as to whether these words are dependent on the preceding sentence, "For to the rest I speak, not the Lord," or whether that sentence refers to the one preceding it, is of no importance in this question. In the first supposition, we should seem to have here an ordinance which is not immediately Divine, but was established by the Apostle through the power of Christ. In the second supposition, it may be an immediately Divine party will be decided.

These words of the Apostle tell us that in all cases when one of the married parties has received the Christian Faith, and the other remains an infidel and is not willing to live in peace with the Christian, the believer is not bound but is free. The Apostle does not insist expressly and formally that the marriage bond has been dissolved, but, if it were not at least the power of the Christian to dissolve the previous bond and to enter upon another marriage, the words would not have their full truth. Hence the Church has understood the words in this sense, and at the same time has fixed more exactly how and under what conditions this so-called Pauline privilege may be exercised. Innocent III declares authoritatively (IV Decretal, xii, 7, in cap. "Quanto") that the convert is justified in entering upon another marriage if he will, provided the non-Christian is unwilling either to live with the convert or to cohabit with him. But the reason given is not that the convert would be excluded from the grace of the Divine name or be an incentive to mortal sin:

"Si enim alter infidelium conjunxit ad fidem convertatur, altero vel nullo modo, vel non sines blasphemiam divini nominis, vel ut eum pertractat ad mortalem pecorum et cadentiam volente: qui relinquitor, unde a sacrificio, si volunt, si velut ad casum intelligimus, quandam Apostolus: Sis infidelis discedi, etc., et non minimam in quo quid dictur: Contumelia creditoris solus jus matrimonii eum qui relinquitor. According to the Church's interpretation and practice, the dissolution of the marriage that was contracted before conversion is not effected by the separation of the married parties, but only when a new marriage is contracted by the Christian party because of this privilege. The Holy Office says this expressly in the decree of 6 August, 1739, ad 2: "Then only may the voice of the matrimonial bond with an infidel be understood to be loosed when the convert spouse proceeds to another marriage with a believer" (Collectan. S. Congr. de Prop. F., n. 1312). The manner of obtaining this right to enter upon a new marriage is fixed by the Church under penalty of invalidity, and consists in a demand (interpellation) made of the non-Christian party whether he or she be willing to live with the other in peace or not. If this interpellation is not possible, an Apostolic dispensation ab interpellationibus must be obtained (Collectan. n. 1323). If the spouse that remains in infidelity agrees to live in peace, but later refuses contrary to this agreement by abusing the Christian religion, or tempting the Christian to infidelity, or preventing the children from being educated in the Christian Faith, or becomes a temptation for the Christian to commit any mortal sin, the latter regains the right to proceed to a new marriage after any lapse of time. This consequence which follows from the very nature of the privilege was expressly declared by the Holy Office in the decree of 27 September, 1845, and was confirmed by Pius IX (Collectan. n. 1337; Ballerini-Palmieri, "Opus theol. Mor.", 3d ed., VI, n. 488). If, however, the non-Christian party refuses after careful deliberation, then, as a result of this refusal, permission may be granted to the Christian party to enter upon a new marriage and thereby to dissolve the previous one. This procedure, allowed by Sixtus V, received the confirmation of direction under Leo XIII by the decree of the Holy Office, 29 November, 1882 (Collectan., n. 1338, ad 3).

The Pauline privilege is said to be in favour of the Christian Faith, but the meaning of the privilege and the right in such cases to absolute divorce is not exactly defined thereby. Doubt might arise in regard to catchlumens, and also in regard to such a divorce of a Christian denomination but not to the Roman Catholic Church. The solution of these doubts is contained in the following proposition: the Pauline privilege is attached to baptism. That the privilege is granted to nobody before the actual reception of baptism is beyond question from the decree of the Sacred Congregation of Propaganda, 16 January, 1803 (Collectan., n. 1319), and also from the decree of the Holy Office, 13 March, 1901 (Acta S. Sedis, XXXIII, 550). Even the interpellation of the non-Christian party must be postponed until after the reception of baptism. It requires a papal dispensation to proceed to such an interpellation validly before baptism (Cf. Instructio S. Officii, under the authorization of Pius IX, 3 June, 1874, in Collectan., n. 1357). It is also certain that the dissoluteness here in question is not limited to the marriages of pagans, but to all marriages of unbaptized persons, even though they should belong to some non-Catholic Christian denomination (Acta S. Sedis, loc. cit.). Whether, however, the privilege is so joined to baptism that it belongs to Christian adherents of a non-Catholic denomination when they pass by the reception of baptism is a question disputed by theologians. Some theologians of repute assert that the privilege is granted in this case, and that a practical decision to this effect has been made by a Roman Congregation, according to the testimony of Konings, Theol. mor., II, 394 (New York, 1878). (Cf. Palmieri, "De matrim. christ.," th. xxvii, p. 224; Tarquini in "Archiv für kath. Kirchenrecht," L, 224 sqq.; Wernz, "Jus decretal.," IV, n. 702, not. 50; Giuseppe, "De matrimonio," II, n. 1331; Ballerini-Palmieri, "Opus theol. mor.," Collectan., VI, 157, sqq.). Even in the early ages, the Venerable Bede and St. Augustine seem to have understood the passage from St. Paul (1 Cor.) in this sense.

2. The Papal Authority to Dissolve a Non-Christian Marriage.—From the ecclesiastical decisions that have been already quoted, it is clear that the Church
has at least the authority of explaining the Pauline
privilege, of limiting, and extending it. This would
give rise to no difficulties if the Pauline privilege, as
expressed in I Cor. vii. 15, were an immediate Aposto-
lic ordinance and only mediately Divine, inasmuch
as it had been granted to the power in general in a
case of necessity to dissolve in favour of the
marriage contracted in infidelity. For the entire
Apostolic power passed to the supreme head of the
Church, and as the Apostle could determine fixed
rules and conditions for the dissolution of the mar-
rriages in question, the power would have precisely the
same scope and effect as an ordinance of the Church.
Moreover, if the successors of St. Peter should ever
be granted the power of granting a divorce,
There is no such provision and the question will be
referred to the Church; and, in any case, the Church
has not settled the dispute. For, even if the privilege as
promulgated by St. Paul was of immediate Divine right,
the Church's power to make at least modifications in
case of necessity can readily be explained because such
a power belongs to her without a doubt in other matters
that are of Divine right. The first opinion seems
to have been held in the fourteenth century by eminent
scholars like P. de Palude and de Tudeschis, and in
the fourteenth century by St. Antoninus; in recent times
it is defended by Gasparri, Rossi, Fahrner, and others.
The second opinion is held by Paulus, Peronne, etc.
However, in spite of the disagreement in regard to the
Pauline privilege, the defenders of both opinions agree
that there is another method for the dissolution of the
marriage of infidels when one of the parties receives
baptism, namely, by papal authority. This power is
indeed not admitted by all theologians. Even Lam-
bertini (who later became Pope Benedict XIV) doubted it when he was secre-
ty of the Congregation of the Council, in the causa Florentina, in
the year 1726. But earlier papal decisions, as well as
the actual decision in this very case, leave no room for
doubt that the pope attribute to themselves this
power and act accordingly.

If the Pauline privilege alone be applied, it will fol-
low that when a pagan is converted who has been liv-
ing in polygamy, he can be permitted to choose any
one of his wives who may be willing to receive bap-
tism, provided his first wife is unwilling to live with
him in peace or, under the circumstances, to be con-
verted to the Faith. Hence the Roman Congregations based on the Pauline privilege
always include the phrase nisi prima voluerit converti.
Now several of the pope have at times granted per-
mission to whole nations to choose any of the sev-
eral wives, without adding the clause “unless the
first be willing to be converted.” This was done for
India by St. Pius V, 2 August, 1571, in the Constitu-
tion “Romani Pontificis.” Urban VIII, 20 October,
1626, and 17 September, 1627, did the same for the
South American nations, and expressly declares: “Con-
sidering that such pagan marriages are not so firm that
in case of necessity they cannot be dissolved.” Similarly,
Gregory XIII, 25 January, 1585 (cf. Ballerini-
Palmieri, “Opus theol. mor.”, 3d ed., VI, nn. 444, 451,
452). The theological proof of this papal authority is
easy for those who, as has been said, regard the Pauli-
ne privilege as an immediate Apostolic ordinance.
For it is then expressly testified by Holy Scripture
that the Apostolic authority, hence also the papal au-
thority, can allow in favour of the Faith the dissolution
of marriage contracted in infidelity. The method of
procedure and the precise application in various cases
would naturally be committed to the bishops of
Apostolic authority. The only question is whether the
Pauline privilege is an immediate Divine determina-
tion of the case in which marriage may be dissolved,
prove the papal authority in another way. Since it
follows from I Cor., vii, 15, that marriage contracted in
infidelity is not absolutely indissoluble according to
Divine right, it follows from the general power of
loosing which was granted to the successor of St. Peter,
Matt., xvi, 19—“Whosoever thou shalt loose on
earth, it shall be loosed also in heaven”—that this
power extends also to our present matter. Moreover,
the successors of St. Peter are the interpreters of their power.
Whenever the exercise of an authority that has not hitherto been clearly recog-
nized occurs, not merely on one occasion but fre-
quently, there can be no more doubt that such au-
thority is rightfully exercised. Now this is precisely
what took place in the grants of Pius V, Gregory XIII,
and Urban VIII for the vast territories of India, the
West Indies, etc.
3. The Dissolution of Marriage Contracted in Infid-
ernity by Profession in a Religious Order.—When the
document explained above, which now is practically
admitted beyond doubt, has been established, the
question, whether a marriage contracted in infidelity
can be dissolved by the religious profession of the
converted party, is not very important. It is so to be
understood that the baptized party may choose the
religious life, even against the will of the one still un-
converted, and, in consequence of this, the former
can enter upon a new marriage. According to the
document we have just explained, it is clear that the pope,
at least in single cases, can permit this. Whether, ac-
cording to a general law, and by immediate Divine
ordinance, without the intervention of the pope, this
privilege belongs to the baptized party, is somewhat
connected with another question, viz., for what reason
Christian (i.e. sacramental) marriage, not yet con-
summated, can be dissolved by religious profession.
This leads us to the third proposition about this sub-
ject of divorce.
5. Christian Marriage before Consumption Can Be
Dissolved by Solemn Profession in a Religious Order, or
by an Act of Papal Authority.
1. Dissolution by Solemn Profession.—The fact that
religious profession causes the dissolution of the mar-
rriage bond, provided the marriage has not been con-
summated, is distinctly taught in the Extrav. Joan,
XXII (tit. VI, cap. unico.), and was solemnly defined
by the Council of Trent (Sess. XXIV, can. vi).
The reason why this dissolution takes place is a theo-
logical question. The definition reads: “If anyone shall say
that a marriage contracted, but not consummated, is
dissolved by the solemn profession of the religious
order, whether of one of the parties to the marriage, let him be
anathema.” The expression, by the solemn profession,
is important. Neither the mere entrance into a reli-
ger order, nor life in the novitiate, nor the so-called
profession of simple vows, even though, they be for
life, as is customary in modern congregations, is capa-
bile of dissolving a previous marriage. The simple
vows which are pronounced in the Society of Jesus,
either as vows of scholastics or as vows of formed
coadjutors, do not dissolve a marriage which has been
consummated and not yet consummated, though they
cause a divergent impediment in regard to any future
marriage. The question as to how and for what rea-
son such marriage is dissolved by solemn religious pro-
fession is answered by some by pointing to an im-
mediate Divine right, as if God himself had so ordained
immediately. Others, however, object that the power
which the Church has received from God, and
its ordinance. The first opinion is defended by
Dominic Soto, Thomas Sanchez, Benedict XIV, Perrone,
Rosset, Palmieri, and others; the second by Henry de
Segusia (commonly called Hostiensis), Suarez, Lay-
mann, Fugger, the Wurzburg theologians, Gasparri,
Latantius, Fahrner, and others. The tradition of the
Christian Church for centuries bears witness that Christian marriage before consumma-
tion has not the same indissolubility as a consummated
marriage. Scholars, however, are not unanimous
DIVORCE

about the limits of its dissolubility. Many facts from the lives of the saints, of St. Thecla, St. Cecilia, St. Alexius, and others, such for example as are narrated by Gregory the Great (Dialog. xiv, in P. L., XXXII) and by the Venerable Bede (Hist Angl., i, p. 175, note), prove the universal Christian conviction that, even after marriage had been contracted, it was free for either of the married parties to separate from the other in order to choose a life of evangelical perfection. Now this would be a violation of the right of the other spouse if in such circumstances the marriage bond were not dissolved. But at least could not easily be dissolved under certain conditions, and thereby the right granted to the other to enter upon another marriage. The precise conditions under which this dissolution of the marriage bond actually took place, and still takes place, can only be decided with certainty by the authentic declaration of the Church. Such a declaration was made by Alexander III, according to III Decretal, xxxii, 2: "After a lawfully accorded consent affecting the present, it is allowed to one of the parties, even against the will of the other, to choose a monastery (just as certain saints have been called from marriage), provided that the state of evangelical perfection be not placed between them; and it is allowed to the one who is left to proceed to a second marriage." A similar declaration was made by Innocent III, op. cit., cap. xiv. From this latter declaration we learn that religious profession alone has this effect, and that therefore those who wished to practise a life of high perfection in any other manner could be obliged by the other spouse either actually to choose the religious state or else to consummate the marriage. Under earlier ecclesiastical conditions, no long delay was imposed upon the other party before entering another marriage, because religious profession might be made without a long novitiate. The introduction of a novitiate of at least one year by the Council of Trent, and the time of three years prescribed by Pius IX and Leo XIII for simple vows before the solemn profession, and the general restriction of solemn profession by the establishment of simple profession, which does not dissolve the marriage bond, have rendered difficult the dissolution of unconsummated marriage by religious profession. So that now it seems practically necessary that if one of the married parties should choose the state of evangelical perfection before the consummation of the marriage, the marriage bond should be dissolved by papal authority.

2. Dissolution by the Pope of Marriage not yet Consummated.—The pope's authority as supreme head of the Church to dissolve Christian marriage not yet consummated is proved on the one hand from the words of Christ to Peter, Matt., xvi, 19 (see above, under B 2), and on the other, from the dissolubility of such a marriage by religious profession, inasmuch as such profession must be solemn, for according to the declaration of Boniface VIII (III Novi Decretal, xxv, xvi), solemn vows as such depend entirely upon the ordinance of the Church—"voti solemnitas ex soli constitutioe ecclesiastica inventa." Hence it follows without a doubt that the dissolution of a marriage by solemn profession could never take place without the exercise of the Church's authority. Now for reasons of common morality and also of the teaching of the Church, it is impossible to assert that such a dissolution according to a general law, a fortiori she can do this in single cases—not indeed arbitrarily, but for grave reasons—because this power has been granted by God to dispense in matters of Divine right, and a delegated authority may not be exercised without a sufficient reason. (cf. Wernz, "Jus decretal," IV, n. 698, not. 30). The actual exercise of this power on the part of the popes, which has become constant and general, is a further proof of its propriety and its actual existence. Clear instances occur during the pontificates of Martin V (1417-31) and Eugenius IV (1431-47). St. Antoninus tells us that he had seen several Bulls of these popes which granted such a dispensation or a dissolution of a marriage that had not been consummated, so that thereafter they might proceed to a new marriage (Summa theol., III, tit. i, c. xxi). We can find traces of such a practice even in the pontificate of Gregory the Great, Decretal of Alexander III, namely, IV Decretal, xiii, 2, seems, according to a probable interpretation, to refer to a possible concession of such a dissolution. Perhaps the decision of Gregory II to St. Boniface, in 726 (see above under A 4), might possibly be explained in the same sense, though it is very uncertain, for it seems to refer neither to the dissolution of a case of marriage, as some supposed, nor to the dissolution of a real marriage that had not been consummated, but rather to a declaration of invalidity. For several centuries the exercise of this power of dissolving such marriages has belonged to the ordinary functions of the Holy see, and is exclusively papal, for the work of the Roman Congregations in such cases is only preparatory. However, exceptional instances occur when it has been delegated to bishops (Wernz, op. cit., n. 698, not. 41). The judicial procedure in such cases was exactly prescribed by Benedict XIV in his Bull of 1741 (section 15), obligatory on the whole Latin Church. Any uncertainty about this ecclesiastical power (cf. Fehörer, Geschichte des Unauflöslichkeits-prinzips, p. 170 sqq.) was removed by this Bull; for this power did not belong to the Church, but the Bull itself was to be understood and carried out as a rule and institution against all good morals. It is, however, inconceivable that the pope could issue a general prescription that would contain an attack on morality and could formally sanction bigamy in certain cases. Several of the older ecclesiastics, especially those of Bologna, brought forward some special reasons which are supposed to justify the dissolution of a marriage before consummation. If they wished to justify the right of dissolution by private authority, then they erred. If they intended to speak of a dissolution that could be granted by the Church, that is, by its supreme head, and the permission for a new marriage, then they had merely collected the cases in which such a dissolution might take place in virtue of the papal authority just spoken of, but they had not given a new title to such dissolution. Some held the erroneous opinion that the false marriage was to be dissolved, because they regarded such a union as no real marriage, but simpliciter betrothal, and therefore they treated it according to the juridical principle in regard to betrothal. This theory of marriage, however, was not opposed by the Church, but has long disappeared from theological schools; nothing does it deserve any consideration at present, because it is in conflict with established Catholic dogmas.

D. Limited Divorce, or Separation from Bed and Board (Divortium Imperfectum) is allowed for various causes, especially in the case of adultery or lapse into infidelity or heresy on the part of husband or wife.

Separation of marriage, dissolved by the marriage bond intact is mentioned by St. Paul, I Cor., iv: "If she depart, that she remain unmarried, or be reconciled to her husband." From the very nature of the case it follows that occasions may arise when further cohabitation is impossible or even unseemly and morally impossible. If such circumstances do not bring about a dissolution of the marriage bond, at least a cessation of married life must be permitted. Hence it is that the Council of Trent, immediately after its definition of the indissolubility of the marriage bond, on "in case of adultery, added another canon (Sess. XXIV, c. viii): "If anyone shall say that the Church err, she, for many causes, comes to a separation of husband and wife in respect to bed and dwelling-place for a definite or an indefinite period, let him be anathema." The cessation of married life in common may have different degrees. There
can be the mere cessation of married life (separatio quoad torum), or a complete separation as regards dwelling-place (separatio quoad cohabitationem). Each of these may be permanent or temporary. Temporary abstinence from married life, or separatio a toro, may be by mutual parting consent from higher religious motives, not, however, if such continuing for the occasion of moral danger to either of the parties. Should such danger threaten either, it would become their duty to resume married life. The Apostle speaks of this in I Cor., vii; "Defraud not one another, except, perhaps, by consent, for a time, that you may give yourselves to prayer; and return together again, lest Satan tempt you for your incontinency."

1. The Choice of Evangelical Perfection.—For a permanent separation on account of entrance into the state of Christian perfection, i.e. entrance into religious life on the part of the wife or of the husband, or by the reception of Holy orders on the part of the husband, there is required not only mutual consent, but also some arrangement on the part of ecclesiastical authority, according to the laws about such cases. This holds in regard to the reception of the major orders immediately after the consummation of marriage, even before the separation takes it to be obtained for religious life, it holds only after consummated marriage. For, as we have said above, by the religious marriage which has not yet been consummated can be dissolved, and on that account newly-married parties have the right to a delay of two months to consider the nature of the state of their separation, during which the consummation of the marriage may be refused (St. Alphonsus, "Theol. mor.", VI, n. 938). In case the marriage is not dissolved, the reception of Holy orders or religious profession cannot take place before provision has been made for a continent life on the part of the other party. In accordance with the judgment of the diocesan bishop, he or she must enter either a religious order, or, if age and other circumstances remove all suspicion and all danger of incontinency, at least take a private vow of perpetual chastity. In no case can it ever be allowed that the husband who should receive Holy orders might dwell in the same house with the wife bound only by a private vow (cf. Laurentius, "Instit. jur. eccl.", 2nd ed., n. 694).

2. Adultery of One of the Parties.—Cause for the cessation of complete community of life, which in itself is not incurable, is given to the innocent party by the adultery of the spouse. In order, however, that this right may exist, the adultery must be, first, proven; second, not attributable to the other spouse either entirely or as accomplice; third, not alreadycondoned; fourth, not, as it were, compensated by the adultery of the other party (cf. IV Decretal., xiii, 6, and xiv, 4, 5; Wernz, "Jus decretor.", IV, n. 707 sq; St. Alphonsus, VI, n. 960). If the innocent party is certain of the sin of the other, he or she has a right immediately to refuse the continuation of married life. If the crime is manifest, then the innocent party is justified in leaving at once the guilty one, or in dismissing him or her from the house. If, however, the crime is not known, or not proved with certainty, then complete separation can follow only after a judicial investigation and a judicial decision, which must be made by ecclesiastical authority (IV Decretal., xix, 4, 5; i, 9; Wernz, "Jus decretor.", IV, n. 711). All sexual intercourse outside of married life is regarded as equivalent to adultery in justifying complete separation, even the unnatural sins of sodomy and bestiality. As proof of the crime may be alleged what are called suspiciones vehementes. In the first centuries of the Church, there was no commandment imposed on the innocent party, to separate from the party guilty of adultery. There never, however, was any such general legislation. The duty, however, of separation was founded partly on the canonical penance imposed for adultery that was publicly known (and this penance was incompatible with marital life), and partly on the duty of avoiding scandal, as continued living with a husband or wife addicted to adultery might seem to be a scandalous approval of this criminal life. For this latter reason, even nowadays, circumstances may arise making the dismissal of the guilty party a duty (cf. St. Alphonsus, VI, n. 963 sq). Commonly, however, at least for a single violation, there is no duty of separation; still less is there any duty of permanent separation; in fact, charity may in certain cases demand that after a temporary separation the contrite party might be invited or admitted to a renewal of the matrimony. There is, however, never any obligation of justice to receive again the guilty party. The most that some theologians recognize is an obligation of justice when the party originally innocent has meanwhile become guilty of the same crime. The innocent party always retains the right in justice to recall or to demand the return of the guilty party. If the innocent husband or wife wishes to give up this right forever, then he or she can enter a religious order, or he may receive Holy orders, without the necessity of consent on the part of the guilty wife or husband who has been dismissed, or without any further composition being imposed upon this party (III Decretal., xxxii, 10; Wernz, op. cit., n. 710, not. 126; St. Alphonsus, VI, n. 960).

3. Heresy or Defection from the Faith.—Next to adultery, a reason for separation almost equivalent to it is defection from the Faith, whether by the rejection of Christianity or by heresy (IV Decretal., xix, 6, 7). However, there are some important differences to be noted:

(a) In the case of adultery, a single action, if proven, is enough for permanent separation, but in the case of incontinency or heresy, a certain persistence in the sin is required (cf. St. Thomas, IV Sent., dist. xxxv, Q. i, a. 1), such for example as adhesion to a non-Catholic denomination.

(b) An ecclesiastical sentence is necessary in this case for the right of permanent separation. If this has not been obtained, the innocent party is bound to receive the guilty party after conversion and reconciliation with the Church. This is expressly decided by IV Decretal., xix, 6. When, however, the right to permanent separation has been granted, the innocent party can proceed at once to the religious life or receive Holy orders, and thereby render it impossible to return to married life. It need hardly be mentioned that infidelity or heresy, as such, gives no just cause for separation of any kind, if it existed before the marriage was contracted, and if a dispensation from the impediment of disparity of worship between a baptized and a non-baptized person has been granted, or if a valid marriage, even without ecclesiastical dispensation, has taken place between a Catholic and a baptized non-Catholic. In such cases, passage from one denomination to another does not give a reason for separation.

4. Danger to Body or Soul.—Besides these special cases of separation founded on ecclesiastical law, many other cases may arise, which, of their nature, justify temporary separation. They are summed up under the general notion of "danger to body or soul" (periculum corporis aut animum). There must, of course, be question of an approximate danger of great
harm, because this very important right of the other party may not be set aside, or even partially limited, for trivial reasons. The reasons for a temporary separation are as various as the evils which may be inflicted. To judge the gravity correctly, reasonable consideration is demanded from the courts of the nature, character, and duration of the danger to the soul, which is given as a reason for separation, almost always supposes a crime on the part of the other party. It consists in temptation to some mortal sin, either to the denial of the Catholic Faith, or the neglect of the proper education of the children, or to other grievous sin and violation of the moral law. Dangerous solicitation, or pressure, or intimidation, or threats inflicted either by, or with the consent of, one party, or silent approbation to induce the other to a grievous violation of duty would give justification—and even the obligation, if the danger were great— to proceed to separation, which should last as long as the danger exists. Such a reason as this might later on justify a separation in the case of a mixed marriage. Danger to the body, which is a further reason for a separation, means any great danger to life or health, as well as other intolerable conditions, without danger, plotting against one's life, ill-treatment which in the circumstances should be regarded as gross, well-grounded fear of dangerous contagion, insanity, serious and constant quarrelling, etc. It is to be noted that in every case there must be a very serious evil to justify separation from a civil marriage. Otherwise, such a divorce was prevalent and borne with Christian patience. Great crimes of one party, provided they are not against marital fidelity, or do not include any incentive to sin on the part of the other, do not, according to Catholic law, of themselves give any right to separation, neither do punish- ments which might be inflicted on one party. The consequence of such crimes, even when this punishment is joined with dishonour. The Catholic view of this matter is directly opposed to the non-Catholic, which, as we have seen above under A. 3. (6), permits in such cases the dissolution of the marriage bond.

Private authority, i.e. without previous application to an ecclesiastical court and its decision, a temporary separation may take place when delay would bring danger. The church law does not allow a separation in other cases (Wenz, "Jus Decret.", P. n. 74.; St. Alphonsus, "Theol. mor.", VI, n. 751), although there are exceptions, i.e. for separation, the non-ob servance of the Church's regulations can more easily be overlooked. Separation because of the mere decision of a civil judge is never allowed to Catholics. (Cf. III Conc. Pien. Polt., tit. IV, c. ii.)

II. In Civil Jurisprudence.—Divorce is defined in civil jurisprudence as "the dissolution or partial suspension by law of the marriage relation" (Bouvier's Law Dictionary). Strictly speaking, there is but one form of absolute divorce, known, under the name divinitis matrimonii, of the church, and vinulum matrimonii, i.e. from the marriage tie. In the states where it is administered this form of divorce puts an end legally to the marriage relation. There is, however, a limited form of divorce which is, more accurately speaking, a suspension, either for a time or indefinite, of the marriage relation, and is known as divorce a mensah et toro, or from bed and board. In addition, in some states courts grant decrees declaring marriages absolutely void, ab initio, i.e. from the beginning. Such marriages never having been valid, the parties cannot be said to have been divorced; however, proceedings for nullity are frequently provided for under divorce statutes.

Pre-Christian Divorce Legislation among the Hebrews, Greeks, and Romans.—Before the adoption of Christianity as the state religion of the Roman Empire, it would appear that divorce in some form existed among some ancient people. In European civilization is derived. Among the Hebrews the law of divorce was at least 2500 years old. In Athens, but the party suing had to appeal to the magistrate, state the grounds of complaint, and submit to his judgment; if the wife was the prosecutor, she was obliged to appear in person. The lxx customs of the Spartans made divorce rare. Among the Romans the law of Divorces permitted divorce to men, but refused it to women. Adultery, poisoning of children, and falsification or counterfeiting of keys, were sufficient grounds. While divorce was so far free that there was no one authorized by the civil power to oppose it, this freedom was restrained by the moral feeling of the people and their respect for the marriage bond. It was necessary to consult the family council and there was fear of the authority of the censors. There were three forms of marriage among the Romans: the coniubium, which was celebrated with certain highly religious ceremonies peculiar to that form of the marriage contract; the pietas, which was affected by a simulated purchase (coemptio), a much more simple ceremony; and the usus or prescription, where, after living with her husband for one year without being absent for three days, the woman came, as in the other forms of marriage, in manus marit., that is to say, under the control of her husband. No instance of divorce is known before A. D. 520 or 523.

It is thought that this was the first instance of divorce under the Roman Republic, but it would seem probable that it was the first divorce for the special purpose of retaining the wife's dowry (dote). This is the suggestion of some who point out that the divorce of Antonius took place in 87 B.C., and states that other proof exists that in much earlier times divorce was properly established and strictly ordained by laws. He quotes also from Cicero (Phil., II, 28) where he says jokingly of Antonius, who had dismissed his wife Cynisca under the same formalities as those of divorce, "that he commanded her to have her own property according to the Twelve Tables; he took away her keys and drove her out."

The causes for divorce on the part of the woman were capital offences, adultery, and drinking. After the Punic wars the number of divorces reached scandalous proportions. P. Sulpicius Severus, Tiberius Antony, Augustus, and Titus all put away their wives. Under Augustus an effort was made to curb the licence of divorce. In the interest of publicity, that emperor made it necessary for the party seeking
a divorce to make his declaration in the presence of seven witnesses, all Roman citizens of full age. Divorce remained, however, a private legal act. Women could obtain divorce without any fault of their husbands. Under the Roman law of the early imperial period, the marriage pronouncement, first, between parties whose marriage engagement had not been legally contracted; second, where parties were separated when the contract of espousals had been made but not consummated by actual marriage. This was known as repudium. Divorciem was a separation of persons already married, and included divorce a mensd et toro and a vinculo matrimonii.

Imperial Christian Legislation.—In 331 Constantine the Great restricted the causes for divorce to three on the part of the man, viz., if he was a murderer, a poiser, or a robber of graves; and three on the part of the woman, viz., if she was an adulteress, a poisoner, or a corruptor of youth. Among soldiers an absence of four years was sufficient to entitle the petitioner to a divorce. This edict was ratified by Theodosius the Great and Honorius. Under Justinian several reasons for divorce were added, and liberty of divorce by mutual consent was restored by his law of 20 January, A.D. 528. No provision was made in the Roman law until after a lapse of 340 years, when Leo the Philosopher (886-912) made a collection of laws known as the "Libri Basilici," from which he excluded the edicts of Justin.

In the Christianized Church, according as Catholic doctrine penetrated more profoundly the medieval life, the laws of European nations were gradually accommodated to its demands. In this way, for example, the teaching of the Council of Trent (1563), which anathematized the error that marriage could so far be dissolved by divorce that it was lawful to marry again, was universally accepted among the nations adhering to the Catholic Church. This council, however, introduced thereby no essential change in the divorce law of the Church. Originally, under the common law of England, there was no jurisdiction on the subject of divorce, and in the ecclesiastical courts they had jurisdiction in all matters relating to marriage and divorce, the restitution of conjugal rights, suits for limited divorce and for annulment of marriage. This followed from the Catholic doctrine that marriage, being a sacrament, could not be dissolved; for the same reason any question relative to its validity or to a suspension of conjugal relations must necessarily pertain to the ecclesiastical courts. The ecclesiastical law of England, though originating differently from the other branches of the common law and distinguished by special rules, was part of the unwritten law of the State, just as what are technically called the common law, the law of admiralty, and equity.

The Protestant Reformers rejected the sacramental theory of marriage, and agreed that absolute divorce should be granted for adultery and for malicious desertion, and that the innocent party might then remarry. As they also rejected the jurisdiction of the ecclesiastical courts it was for some time a question among them whether marriage was dissolved ipso facto by the commission of one of these offences, or whether it was necessary to have the dissolution declared by public authority. Luther taught that the parish priest as the proper tribunal. Appeals were sometimes taken to the prince or sovereign. Gradually "consistorium courts" were created, of both lay and ecclesiastical members, under sanction of the civil power. In England under Henry VIII., after his separation from the Catholic Church, divorce remained practically unchanged. An effort was made in the time of Edward VI. to secure the adoption of a new code of ecclesiastical laws, drafted mainly by Cranmer, under which separation a mensd et toro was not recognized and complete divorce was granted in cases of extreme conjugal faithlessness; in cases of conjugal desertion or cruelty; in cases where a husband not guilty of desertion of his wife, had been several years absent from her, provided there was reason to believe him dead; and in cases of such violent hatred as rendered it in the highest degree improbable that the husband and wife would survive their animosities and again love one another. Divorce was denied when both parties were guilty of unfaithfulness, and when only one was guilty the innocent party might marry again. The ecclesiastical court was to decide all questions concerning those cases. It is said by Howse and (Hist. of Institutions, p. 80) that the principles of this code, known as the "Reformatio Legum," were carried out in practice, though not enacted into law. Head ald that "according to the ancient form of judgment divorce was probably still pronounced only a mensa et thoro; but whatever the shape of the decrees, there is strong evidence that from about 1548 to 1602, except for the short period of Mary's reign, 'the community, in cases of adultery, relied upon them as justifying a second act of matrimony.' He says also that throughout nearly the whole of Elizabeth's reign new marriages were freely contracted after obtaining divorce from unfaithful partners. However, in 1602 the Star Chamber pronounced a marriage invalid which had been contracted after separation from bed and board by the decree of an ecclesiastical judge (Foljambe's case, 3 Salk. 193).

Following this decision the canon law was administered in the English spiritual courts with such rigor that it required an Act of Parliament to permit a remarriage after divorce. In the tenth year of James I. (1613) an Act was passed to restrain remarriage by one party while the other was alive, excepting, however, that the divorce had been pronounced by ecclesiastical courts. There were some cases where, after sentences had been pronounced by an ecclesiastical court, a second marriage was upheld, but the decisions are generally to the effect that a perfect marriage cannot be dissolved excepting by death. Oughton says (tit. 215) that the marriage tie once perfected cannot be dissolved by man, but only by natural death. The parties may be separated, but they remain man and wife. The Puritans of England strongly advocated the right of divorce, but without effect: and until 1857 there was no English statute which permitted the granting of a decree of absolute divorce by any court, the only jurisdiction being vested in Parliament. Precedents of divorce by Parliament strictly so called are not found earlier than 1698, but it came to be understood that if a divorce a mensd had been granted by the spiritual court, a divorce would be granted by Parliament absolutely dissolving the marriage, though only for the cause of adultery on the part of the wife. By the Act of 1857 the entire jurisdiction in matrimonial questions was transferred to a new civil court for divorce and matrimonial causes, and since the Judicature Act of 1873 this jurisdiction has been vested in the probate, divorce, and admiralty division of the High Court of Justice. Its power is restricted, however, to England alone. The principles upon which divorce legislation may be based and which may be traced in the legislation of those countries that permit divorce are recommended by Bishop (Marriage, Divorce and Separation, § 40, ed. of 1891) as follows:

"Matrimony is a natural right, to be forfeited only by some wrongful act. Therefore the government should permit every suitable person to be the husband or wife of another, unless the law relieves those duties of the matrimonial relation; and when it is in good faith entered into, and one of the parties without the other's fault so far fails in those duties as practically to frustrate his ends, the government should provide some means whereby, the failure being estab-
lished and shown to be permanent, the innocent party may be freed from the mere legal bond of what has in fact ceased to be marriage, and left at liberty to form another alliance. The guilty party would have no claim to be protected in a second marriage; and whether it should be permitted to him or not, rests upon him, not of right with him, but of public expediency, upon which there is considerable diversity of opinion."

Modern European Legislation.—A full collection of laws and statistics relating to marriage and divorce in European countries will be found in the report of the U. S. Commissioner of Labor, Carroll D. Wright, for 1880. It is therein stated that “prior to 1868 the ecclesiastical courts had in most of the countries named more or less complete jurisdiction over matrimonial causes, but the civil courts have now exclusive jurisdiction over such matters in all of them.” In Austria-Hungary absolute divorce is not allowed to members of the Catholic Church. Prior to 1 January, 1876, all the cantons of Switzerland had their own peculiar laws of divorce, but subsequent to that date a general law governing the subject was established. In Germany perpetual or limited divorce was abolished throughout the empire, and the causes for such separation were made causes for absolute divorce. In Hungary divorce has been legal for Protestants since 1786 and for Hebrews since 1863. The laws of their respective churches apply to their adherents for almost all of the countries named, as to Greeks. Questions of divorce or validity of marriage among Protestants are subject to the jurisdiction of the civil courts. Excepting for Protestants and Hebrews, the ecclesiastical courts of other bodies have jurisdiction. In case of mixed marriage the court of the subject’s jurisdiction jurisdiction. In Italy, Spain, and Portugal, still Catholic countries, no absolute divorce is permitted. In Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, Mexico, and Cuba, limited divorce alone is permitted.

The following causes in Austria and in Hungary for absolute divorce are typical: In Austria, adultery; commission of a crime punishable by five years imprisonment; malicious abandonment or non-appearance after one year’s solicitation where the absentee’s residence is known; assault endangering life or health; refusal to endure unconquerable aversion, on account of which both parties demand a divorce. In the latter case a limited divorce or separation from bed and board must first be obtained. In Belgium, where the husband is at least twenty-five years of age and the wife twenty-one, and the parties have been married two years or longer, divorce may be obtained by mutual consent on certain terms and conditions, but must be approved by the courts. In France divorce was introduced by the law of 1792. This law was modified in 1798 and in 1803 (Code Napoleon), was subsequently abrogated in 1816, and reintroduced in 1851; the grounds of divorce being adultery of either party; excesses, cruelty, grave injury inflicted by one spouse on the other; condemnation to infamous penalty of either of the spouses; mutual and persevering agreement of the parties to separate, if said consent is expressed and established as prescribed. By recent legislation, however, the lapse of a fixed period of time, a decree of separation can be changed into a judgment of divorce on the application of either of the parties. (Civil Code, Sec. 307.) In the German Empire perpetual judicial separations have been abolished, and all subject to the empire, without regard to their religious status may apply to the house of the laws of divorce which exist in their respective states. In Prussia there are seven causes known as major causes for divorce and six as minor causes. Among the major causes are: insanity, disorderly conduct or mode of living, refusal of maintenance or support by the husband. It may be noted that in the divorce laws of European states there exists much similarity as regards the causes for divorce. In Scotland divorce is granted for adultery, for desertion, the former since 1560; the latter since 1573. The injured party has the right to choose either a judicial separation or an absolute divorce. In Ireland the civil courts have no jurisdiction to grant decrees of absolute divorce. In Canada exclusive authority was conferred upon the Parliament by the British North America Act of 1867 (Sec. 91). At that time courts of divorce existed in Nova Scotia, New Brunswick, Prince Edward Island, and British Columbia, and they still continue to exercise their functions. Excepting in Prince Edward Island, the divorce courts appear to have been modelled upon the English court of divorce and matrimonial causes. A court of divorce and alimony was established in Prince Edward Island as early as 1836. In the other provinces of Canada no divorce court has ever been constituted and divorces are granted only by special Act of Parliament. The courts of Quebec can grant separation de corps under the English divorce court practice and annul marriage on the ground of impotence.

In Australia, at the time of the formation of the Commonwealth, there were divorce courts in all the constituent states. Under the Constitution (Act 63–64, Vict., ch. xi, part V, Sec. 51), power was granted to the Parliament of the Commonwealth of Australia, comprising the states of New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia, with respect to divorce and matrimonial causes and in relation to parental rights and the custody and guardianship of infants. The object of this subsection is stated to have been to avoid "the great mistake made by the framers of the Constitution of the United States of America, who left the question to the states to deal with as they respectively thought proper" and "to provide for uniformity in the law of divorce" (Quick and Garran, Aust. Const., pp. 262–609). The local statutes in the various states still prevail, however, with the right of appeal to the High Court with respect to judgments of the Supreme Court of a state (Act of 1903, 2 Com. 148, p. 149). In New South Wales, which is a part of the Australian Commonwealth, divorce is allowed for adultery on the part of the wife, and adultery with certain aggravating circumstances, or with cruelty, on the part of the husband. (New Zealand Statutes, Vol. I, p. 229.)

Divorce in the United States.—Colonial Period (1607–1787).—At the time of the settlement of the various colonies which subsequently declared their independence of Great Britain, there were no ecclesiastical courts; as in England, therefore, the practice of separation and matrimonial causes and in relation to parental rights and the custody and guardianship of infants. There are many instances of legislative divorces granted in the New England colonies, all being divorces a vinculo. Adultery and desertion were sufficient reasons, though male adultery would require additional circumstances. In the Southern colonies there was no court having jurisdiction to grant divorce, though in some of them an appeal for alimony would be considered in a court of equity. Under the Dutch government of New York divorce jurisdiction was exercised by the courts for absolute, as well as for limited, separation; but when the English took possession of the colony, this jurisdiction was no longer recognized. In Pennsylvania under "The Great Law of 1682" divorce was authorized for adultery. The legislature also granted di-
 divorces. In New Jersey there was no divorce jurisdiction granted the courts. It may be said, therefore, that outside of New England during the colonial period there was no such thing as a judicial divorce. From 1787–1906.—The Constitution of the United States does not grant the Federal Government power over the subject of divorce. In this matter, therefore, Congress can legislate only for the District of Columbia and for the territories. The organic acts creating the territories give power to their legislatures over all "rightful subjects of legislation not inconsistent with the constitution or laws of the United States"; special and general divorce laws are, therefore, within the power of territorial legislatures, but by the Act of 30 July, 1886, all special divorce acts have been expressly forbidden. The various states of the Union succeeded to the full sovereign rights exercised by the Parliament of England over all subjects relating to marriage and divorce, but in the absence of special divorce statutes, there being no tribunal having jurisdiction, the law would remain the same as in the colonies prior to the Revolution. However, all states of the Union have adopted divorce statutes, except Virginia, Carolina, and New Hampshire, and have clothed their courts with full jurisdiction to administer relief. In most of the states and territories divorces a vinculo and a mensa et toro are provided for, and in some of the states courts of equity take jurisdiction over special proceedings for a decree of nullity of marriage. In some states a marriage contract, however, decreed to be null and void is expressly forbidden. The causes for which a decree may be granted vary from the single cause of adultery on the part of either husband or wife (law of New York and the District of Columbia) to nine separate causes in the State of Washington, the last being known as the "menses et toro", which proved to be another cause deemed by the court sufficient, provided that the court shall be satisfied that the parties can no longer live together. In most of the states there is no restriction upon the parties remarrying after divorce, though in some, as in New York, the court may forbid the guilty party to remarry during the lifetime of the innocent, and in others, as in Pennsylvania, marriage of the guilty party with a paramour during the lifetime of the innocent party is null and void.

Great uncertainty as to the effect of the divorce statutes of the different states has arisen where relief has been sought by a party whose domicile is in one state and residence of a different state from that in which the proceeding was brought. While it is a fundamental principle that the courts of any state have entire control over the citizens of that state in divorce proceedings, a different question arises where the husband is a resident of one state and the wife of another. The English doctrine that the domicile of the husband is that of the wife, irrespective of where she may actually be living during coverture, does not prevail in the United States. For the purposes of a divorce proceeding the wife may have a domicile separate from that of her husband. In consequence of this result of American law it has frequently happened that actions for divorce have been initiated and carried to a conclusion without the respondent receiving any actual notice of the proceeding. This is made possible by processes not being used by the party where the domicile of the defendant is located. The remedy is by publication, where actual service cannot be had upon a respondent by reason of absence from the state. While decrees granted in accordance with the statutes of any particular state are valid in that state, there is no power to enforce a recognition of their validity in other states, and frequently happens that a divorce may be valid in one state and invalid in another; the children of a second marriage legitimate in one state and illegitimate in another; the property rights of the former husband and wife terminated in one state and in full force in another. The Constitution of the United States (Art. IV, Sec. 1) provides that "full faith and credit shall be given in each state to the public acts, records and judicial proceedings of every other state, and the Congress may by general laws prescribe the manner in which such acts, records and proceedings shall be proved, and the effect thereof." However, it does not require the recognition of a divorce where one of the parties is not a citizen of the state that has granted the decree. Thus in a case where a husband abandoned his wife without justifiable cause, and removed to another state and acquired a domicile in the same, and the wife remained in the matrimonial domicile, since her domicile did not follow that of her husband when he sued for a divorce in the state of his new domicile, and a decree was rendered upon a merely constructive service of process, it was held by the Supreme Court of the United States that the court of the husband’s domicile did not acquire such jurisdiction over the wife as would entitle a decree to obligatory enforcement in the state of her domicile, though the state in which the decree was rendered had power to enforce it within its borders, and the state of the wife’s domicile had the power to give the decree effect, because the parties could not mutually consummate it; because the parties could not mutually dissolve it; because an act of God incapacitating one to discharge his duties will not release it; because there is no accepted performance of the act that will end it; because a minor of marriageable age can no more rescind it than an adult; because it is not dissolved by failure of the original consideration; because no suit for damages will lie for the non-fulfillment of its duties; because legislation may annul it at pleasure; and because none of its other elements are those of contract but are all of status. (1, Marriage and Divorce, § 46.)

It was also perceived that a suit for divorce is not an act on a contract, but is a proceeding sui generis founded on the violation of duty enjoined by law and resembling more an act of tort than of contract. The law looks upon marriage as a permanent status, to be ended only by the death of one of the parties, a promise of competent persons to marry at their pleasure requiring a marriage licence merely to attest their competency. To change this status by divorce it is necessary to satisfy the court that the purpose of the marriage relation has been ended by the fault of the guilty party, and that greater injury will follow from marriage with another than from terminating it. Therefore, in theory, the divorce statutes embrace only such causes as are recognized as being of such a nature as to defeat the ends for which the marriage was entered into. In the great majority of the United States six causes are set up in this category: (1) adultery, (2) bigamy, (3) conviction of crime in certain classes of cases, (4) intolerable cruelty, (5) wilful desertion for two years, (6) habitual drunkenness. These are recognized as just causes, either for absolute divorce or for divorce a mensa et toro. The following consequences also result to a lawful marriage that upon their being made to appear, the courts will decree such marriages null and void, in some jurisdictions under a separate proceeding for nullity, and in others under the form of a proceeding for divorce. These causes are (1) impotence, (2) consanguinity and affinity properly lim-
DIVORCE

DIVORCE

ited, (3) existing marriage, (4) fraud, force, or coercion, (5) insanity unknown to the other party.

The growth of divorce in the United States under the general divorce laws has been unprecedented, and exceeds in number those of any other modern nation, excepting France. It was urged for the first time in

the United States by Carroll D. Wright, Commissioner of Labor, in 1889, that the total number of divorces for a period of twenty years, from 1867 to 1887, to be 328,716, an increase of 157 per cent, while the increase in population for the same period was 60 per cent. The Census Bulletin upon marriage and divorce, 1886, the United

States, states that by the Department of Labor and Commerce under authority of an Act of Congress, in 1908, shows that the total number of divorces for the entire country from 1887 to 1906 inclusive was 915,025.

For the earlier investigation covering the twenty years, from 1867 to 1886 inclusive, the number reported was 297,307, or hardly more than one-third of the number reported in the second twenty years.

At the beginning of the forty-year period covered by the two investigations, divorces occurred at the rate of 10,000 a year. At the end of that period the annual number was about 60,000. This increase has

been considered to be connected with the increase in population. An increase of 30 per cent in population between the years 1870 to 1890, was accompanied by an increase of 79 per cent in the number of divorces granted. In the next decade, 1890 to 1900, the population increased 25 per cent and divorces 70 per cent. In the following decade, 1900 to 1910, an increase of 21 per cent in population was accompanied by an increase of 66 per cent in the number of divorces.

In the six years from 1900 to 1906, population, as estimated, increased 10.5 per cent and divorces 25 per cent. This increase of divorces in the forty-year period that divorces were increasing about three times as fast as the population, while in the first decade, 1870 to 1880, they increased only about two and two-thirds as fast.

The divorce rate per 100,000 population increased from 29 in 1870 to 82 in 1900. In the former year there was one divorce for every 3,411 persons and in the latter year one for every 1,218. The rate per 100,

000 married population was 81 in the year 1870 and 200 in the year 1900. This comparison indicates that divorce is at present two and one-half times as common, compared with married population, as it was forty years ago. Divorce rates appear to be much higher in the United States than in any of the foreign countries for which statistics relating to this subject have been obtained. Two-thirds of the total number of divorces granted in the twenty-year period covered by this investigation were granted to the wife. The most common single ground for divorce is desertion. This accounts for 38.9 per cent of all divorces (period 1887 to 1906), 49.4 per cent or almost one-half of those granted to the husband, and 33.5 per cent or one-third of those granted to the wife. The next most

important ground of divorce is, for habitual adultery, and for wives, cruelty. Of the divorces granted to husbands (1887 to 1906), 28.8 per cent were for adultery, and of those granted to wives 27.5 per cent were for cruelty. Only 10 per cent of the divorces granted to husbands were for adultery of the husband, and 10.5 per cent of divorces granted to husbands were for cruelty on the part of the wife. Drunkenness was the ground for divorce in 3.3 per cent of the cases for which the wife brought suit, and in 1.1 per cent of the cases in which the suit was brought by the husband. In Pennsylvania, drunkenness was reported as an indirect or contributory cause for divorce in 5 per cent of the divorces granted to the husband, and in 18 per cent of the divorces granted to the wife, and appeared as a direct or indirect cause in 19.5 per cent of all divorces, and 26.3 per cent of those granted to wives, and 6.1 per cent of those granted to husbands. Only 15 per cent of the divorces were returned as contested and probably in many of these cases the contesting was hardly more than a formality. Alimony was demanded in 18 per cent of the divorces granted to the wife and was granted in 12.7 per cent. The proportion of husbands who were granted the property was 22 per cent and the proportion obtaining it was 2 per cent. The average duration of marriages terminated by divorce is about ten years. Sixty per cent or three-fifths last less than ten years and forty per cent last longer. Of the di-

vorce couples known to have been married in the United States 88.5 per cent were married in the same state in which they were divorced. Of the divorced couples known to have been married in foreign countries 38.9 per cent were married in Canada, 12.7 per cent in England, 16.1 per cent in Germany and 1.9 per cent in Ireland. Children were reported in 39.8 per cent of the total number of divorced cases. The proportion is much larger for divorces granted to the wife than for divorces granted to the husband; children being present in 46.8 per cent of the former class of divorces and 26 per cent of the latter. A reason suggested for this is that the children are usually claimed by the court on the ground of love. Therefore, divorce does not imply separation from her children, while to the husband it involves a severance of the parental as well as the marital relation. In Canada during 1900 there were eleven divorces; in 1901 nineteen. In England there were 284 in 1902, as compared with 477 in 1901. In France at the same time there were about 10,000 annually, and in France 21,933, with a tendency towards a rapid increase. Among the Japanese there are about 100,000 divorces per annum. It is estimated that about fifty per cent of divorced couples have children, and it is urged "that consideration of the interest of the children should be a first concern in stimulating restrictive legislation". It has been stated that three-quarters of the boys in two reformatories, one in Ohio and one in Illinois, come from families broken up by death or divorce "mainly by divorce" (The Divorce Question in New Hampshire, Rev. W. Stanley Emery).

Divorce Congress of 1906.—A well concerted effort was made in 1906, upon the initiative of the State of Pennsylvania, to secure uniform legislation by the various states and territories of the Union so as to eliminate as far as possible fraudulent proceedings for the purpose of divorce. It resulted in the Constitutional Provisions of Washington, where all of the states, excepting Nevada, Mississippi, and South Carolina, were represented, in addition to the District of Columbia and the territory of New Mexico. The outcome of this congress was the adoption of a form of statute designed to overcome flagrant evils arising from lack of uniformity, and also from inherent objections to various existing methods of procedure. A summary of these points will show how far the existing statutes were considered to need amendment. Having in mind the evils that have arisen from migratory divorce (that is, where the plaintiff has obtained a residence for the purpose of divorce in another) the congress recommended that all suits for divorce should be brought and prosecuted only in the state where one of the parties has a bona fide residence; that when the courts are given cognizance of suits where the plaintiff was domiciled in a foreign jurisdiction at the time the cause of complaint arose, relief should not be granted unless the cause be included among those recognized in the foreign domicile, and the same rule should apply in the case of the defendant. At least two years residence should be required of one of the parties before jurisdiction should be assumed. The defendant should be given every opportunity to appear and make defence, and one accused as co-respondent should be permitted to defend in the same suit. Hearings and trials should always be before the court and not before a delegated representative of it, and in
all uncontested cases, and in any other case where in the judgment of the court it is wise, a disinterested attorney should be assigned to defend the cause. No decree should be granted on affirmative proof aside from the admission of the respondent. A decree dissolved may in some cases remarry in either party should not become operative until the lapse of a reasonable time after hearing or trial upon the merits of the case. If an inhabitant of one state should go into another state or territory to obtain a divorce for a cause which occurred in the matrimonial domicile, or for a cause which would not authorize divorce by the laws of that domicile, such divorce should have no force or effect in the state of the domicile. Fraud or collusion in obtaining or attempting to obtain divorces should be made a statutory crime. The legitimacy of children born during coverture, except in the case of bigamous marriages, should not be affected by divorce of the parents. On the subject of causes each state should legislate for its own citizens and the common sentiment of that state should be properly expressed by the enumeration of causes in its own statute. Those heretofore given are recognized as representing the view of the great majority as covering offenses against the marital contract of such a character as to so seriously disturb the peace of the marital relation. The congress expressed the hope that the number of causes for divorce would be reduced rather than increased and declared its opinion that in such jurisdictions as New York and the District of Columbia, where the only cause of divorce is called for, it is recommended that where conviction of crime is made a cause, it must be followed by imprisonment for two years, but no absolute divorce should be granted for insanity, and that desertion should not be a cause unless it has persisted in for at least two years. Practically the same causes for divorce are set forth in Delaware and New Jersey. The provisions of this statute have already been adopted in Delaware and New Jersey and are under consideration (1908) in other states. While the reforms thus suggested will not put an end to what is known as the divorce evil, it is believed that they will have the effect of safeguarding trials and abating fraud upon the courts.

Philosophical thinkers recognize the fact that the prevalence of divorce in the United States arises from two causes. The first of these causes is the gradual growth in the attitude of society towards women in the recognition of their individual rights to their own property, and of their capacity to earn their own living in many vocations heretofore closed to them. The legal fiction that the identity of the woman was merged in that of her husband has given place to a growing recognition of her individuality in all relations of life. This has weakened the dependence of women upon their husbands for support and has affected the concept of the family relation. The theory of the Protestant leaders of the sixteenth century, that marriage is but a civil contract, devoid of sacramental character, has been strengthened by the vicissitudes of modern life, while the facility with which divorces can be obtained has tended to a constant increase of their number. Marriage, not being accounted a sacrament by non-Catholic Christians, is entered into with greater ease than a contract of far less moment affecting property alone. The knowledge that in case of disagreement the parties may obtain a divorce no doubt has its effect. The second cause is the gradual increase and development of irreligion and materialism among non-Catholic members of the community. Leaders of the Protestant Churches in the United States have been alarmed at the progress of divorce, and have been employing in their various denominations to adopt such regulations as would restrict it to flagrant cases or abolish it entirely. It is evident that the prevalence of divorce is an indication of an unsound condition of society. Those who now endeavour to reform the civil statutes in the interest of honest trials, may succeed in abating some of the evils flowing from lax methods of administering the divorce statutes in some of the states, and in obtaining restrictive legislation in all of them, but it is not probable that the moral situation will be stopped until the majority of the people of the civilized nations return to the supernatural sanction of marriage and "that it is a sacramental union, productive of the graces necessary to bear with one another's shortcomings; an indissoluble union as that of soul and body, which can be dissolved only in death. This means a return to the Catholic view of marriage and this return also removes the national evil of divorces." (See Marriage; Woman; Parents; also the articles on the various states and countries for divorce legislation.)

THOMAS L. D. BUCKLER, Cathedral of Christ the King, New York, N. Y.

WALTER GEORGE SMITH.

DIXON, JOSEPH, Archbishop of Armagh, Ireland, b. at Coalisland, Co. Tyrone, in 1806; d. at Armagh, 29 April, 1866. Having entered Maynooth College at the age of sixteen he was ordained priest in 1829. In 1834 he was appointed to the chair of Sacred Scripture and Hebrew, a post he worthily occupied for the next eighteen years. His class had an average of 200 students, amongst whom was John McEvilly, afterwards Archbishop of Tuam and a distinguished writer on scriptural subjects. Dr. Dixon's professorship was complicated by his "Introduction to the Sacred Scriptures", a work highly praised by Cardinal Wiseman and which was very much needed at the time. The first edition appeared in 1827 and a second in 1875. As Primate of Armagh he held an important synod in 1854, at which all the bishops of the northern province were present. The synod was notable for the introduction of the Liturgy of St. Vincent de Paul (1855), who opened a house in Drogheda; the Marist Fathers (1861) who opened a college and novitiate in Dundalk, and the Vincentian Fathers who were placed in charge of the ecclesiastical seminary the same year. The primate was a staunch and fearless defender of the rights of the Holy See and at a public meeting in Drogheda denounced Napoleon III for complicity in the acts of the Italian revolutionists. His speech and subsequent letter to the "Free-man's Journal" created a great sensation and the em- ployer made them a subject of complaint to Pius IX. The primate was the organizer of the Irish Brigade in the papal service. 

AMBROSE COLEMAN.

Dlugosz (Lat. LONGINTUS), JAN, an eminent medieval Polish historian, b. at Bresznica, 1415; d. 19 May, 1480, at Cracow. He was one of the twelve sons born to John and Beata. He received his primary education in Nowy Korczyn, then entered the Seminary of Cracow, where he studied literature and philosophy. He was ordained priest in 1440, and appointed secretary of Cardinal Zbigniew Oleśnicki, Bishop of Cracow. Later he became a prelate of the cathedral and preacher for the children of the Polish King,
Casimir IV, Jagiellończyk. He was employed as the ambassador of the Polish king to different foreign countries, and especially to Bohemia and Hungary, where he settled political disturbances. His ecclesiastical superiors sent him as their representative to I. V. IV, and as delegate to the Council of Basle. He declined the Archbishor of Prague, but shortly before his death was appointed Archbishop of Lemberg. Dlugosz expended his great income for religious and philanthropic purposes; he founded both churches and monasteries, also built for the maintenance of poor scholars.

The most beautiful church which he founded, and beneath which he was buried, is in Cracow, and is called Na Skale (meaning, "Upon Rock", as the church was built on an enormous rock). As a Polish historian he outranks all who preceded him. He was not content to repeat the statements made by other chroniclers, but examined for himself the oldest Polish, Bohemian, Hungarian, Ruthenian, and German documents, in order to understand the church thoroughly he studied, in his old age, several foreign languages. His works offer abundant and reliable material not only for Polish, but also for general, history. Dlugosz paid least attention to the beauty of style than to veracity of statement, and wrote in a philosophic manner, as one who saw the action and purposes of Providence in all historical events. His great history of Poland (Historia Poloniae in twelve volumes) was composed by order of his friend and master Cardinal Dusznicki. The works of Dlugosz were first published incompletely in 1614, and fully in 1711. The best edition is that in fourteen volumes by M. Casimir Kozłowski: "Joanna Dlugosz Senioris (Cracoviensis Opera Omnia)" (Cracow, 1863-87). It includes his herialc work "Benedicta Prutenorum", also his "Life of St. Stanislaus", "Life of St. Kinga", lives of many Polish bishops (Seeof Wroclaw, Posen, Plock, Cracow, etc.), "Liber beneficiorum diocesis Cracoviensis", "Lites ac res gestae inter Polonos ordinemque Cruciferorum", "Annales seu cronica inediti regni Poloniae"

CARO, J. Lomianska (Cieszyn), Die politische Geschichte der unteren Mittelkönige (Leipzig, 1873); BRUCKNER, Dieceze Literaturfonds (Warsaw, 1900). JOHN GODRYTZ.

Dobeneck. See Cochleus.

Dobmayer, Marian, a distinguished Benedictine theologian, b. 24 Oct., 1753, at Schwandorf, Bavaria; d. 21 Dec., 1805, at Amberg, Bavaria. He first entered the Society of Jesus, and after its suppression in 1816, joined the Benedictines in the monastery of Weissenau, Diocese of Bamberg, where he was professed in 1775, and in 1778 ordained priest. He was subsequently professor of philosophy at Neuburg, Bavaria (1781-87), of dogmatic theology and ecclesiastical history at Amberg (1787-94), and of dogmatic theology and patrology at the University of Ingolstadt (1794-91). On the reorganization of the latter school in 1799 he returned to his monastery of Weissenau, where he remained until its secularization. He then retired to Amberg, where he taught theology until his death. In 1780 he published at Amberg a "Con spectus Theologicum Dogmaticum". His chief work is the "Systema Theologicum Catholicae", edited after his death by Th. P. Senestrey in eight volumes (Salzburg, 1807-19). The work is very learned and devoid of all harshness in its controversial parts.

Dobrizhoffer, Martin, missionary, b. in Graz, Styria, 7 Sept., 1717; d. in Vienna, 17 July, 1791. He became a Jesuit in 1736, and twelve years later set out for the missions of South America, where he laboured among the Guaranis and the Abipones for eighteen years. On the expulsion of the Jesuits from the Spanish possessions in 1767, he returned to his native land. The Empress Maria Theresa frequently sent for Dobrizhoffer that she might hear his adventures from his own lips; and she is said to have taken great pleasure in his reported conversion of a whole tribe to the Christian religion. In the preface to the author of a work in three volumes entitled "Historia de Abiponibus, equestri bellicosae Paraguainae natione" etc. (Vienna, 1783-1801), a German translation of which, by Professor Kell, of the University of Freiburg, was published in Vienna the same year. This book is of great ethnological value. In the preface he says, "A seven years residence in the four colonies of the Abipones has afforded me opportunities of closely observing the manners, customs, superstititions, military discipline, sacrifices inflicted and received, political and economical regulations, together with the vicissitudes of the colonies" He further decides that what he learned amongst the Paraguayans in the course of eighteen years, what he himself beheld in the colonies of the Indians and the Spaniards, in frequent and long journeys, through woods, mountains, plains and vast rivers, he sets forth, if not in an elegant and brilliant narrative, certainly in a candid and an accurate manner. He was, in the course of the work, Dobrizhoffer frequently taken occasion to refuse and expose the erroneous statements of other writers respecting the Jesuits in Paraguay, and the malicious calumnies by which the ruin of their institutions in that country was unhappily effected. The English translation of Sir Arthur Wilson's "The Equestrian People of Paraguay" (London, 1822), commonly ascribed to Southey, is the work of Sara Coleridge, daughter of Samuel Taylor Coleridge, who judged it a performance "unsurpassed for pure and English by anything I have read," and long since Dobrizhoffer in 1773 was appointed preacher to the Court in Vienna, a post which he held till his death.

DOCETÆ (Gr. δοκεται), a heretical sect dating back to Apostolic times. Their name is derived from the Greek "appearance" or "semblance" of Christ. They taught that Christ only "appeared" or "seemed" to be a man, to have been born, to have lived and suffered. Some denied the reality of Christ's human nature altogether, some only the reality of His human body or of His birth or death. The word Docetæ, which is best rendered by "Illusionists", first occurs in a letter of Serapion, Bishop of Antioch (190-203) to the Church at Rhio, where troubles had arisen about the public reading of the apocryphal Gospel of Peter. Serapion at first unsuspectingly allowed, but soon after forbade, this, saying that he had borrowed a copy from the sect who called themselves "Docetæ". He suspected a connexion with Marcion and found in this Gospel "some additions to the right teaching of the Saviour". A fragment of this apocryphon was discovered in 1886 and contained three passages which savoured strongly of illusionism. The name further occurs in Clement Alex. (i. 210), Strom. I, xiii, vii, xvii, where these sectaries are mentioned together with the Haemites as instances of heresies being named after their own special error. The heresy itself, however, is much older, as it is combat in the New Testament. Clement mentions a certain Julius Caiusin and the "bouros ekeges", the "founder of illusionism". This name is also known also to St. Jerome and Theodoret; and Caiusin is said to be a disciple of Valentinian, but nothing more is known of him. The idea of the unreality of Christ's human nature was held by the oldest Gnostic sects and
cannot therefore have originated with Ctesias. As Clement distinguished the Docetæ from other Gnostic sects, he probably knew some sectaries the sum-total of whose errors consisted in this illusion theory; but Docetism, as far as at present known, was always an accomplishment of Gnosticism. For later of Manichæanism the Docetæ described by Hippolytus (Philos. VIII. i-iv. X, xii) are likewise a Gnostic sect; these perhaps extended their illusion theory to all material substances.

Docetism is not properly a Christian heresy at all, as it did not arise in the Church from the misunderstanding of a dogma by the faithful, but rather came from without. Gnostics starting from the principle of antagonism between matter and spirit, and making all salvation consist in becoming free from the bondage of matter and returning as pure spirit to the Supreme Spirit, could not possibly accept the sentence, "the Word was made Flesh," in a literal sense. In order to borrow from Christianity the doctrine of a Saviour who was Son of the Good God, they were forced to modify the doctrine of the Incarnation. Their embarrassment with this dogma caused many very remarkable and inconsistent ideas. The dwelling of an Aeon in a body which was indeed real but was not his own, others denying the actual objective existence of any body or humanity at all; others allowing a "psychic," not a "hylic" or really material body; others believing in a real, yet not human body; others denying that reality of the body but not the reality of the birth from a woman, or the reality of the passion and death on the cross. Christ only seemed to suffer, either because he ingeniously and miraculously substituted some one else to bear the pain, or because the whole occurrence on Calvary was a visual delusion. Simon Magus first spoke of a "putative" passion of Christ and blasphemously asserted that it was really he, Simon himself, who underwent these apparent sufferings. "As the angels governed this world badly because each angel coveted the principality for himself, he [Simon] came to improve matters, and was transfigured and rendered like unto the Virtues and Powers and Angels, so that he appeared amongst men as man though he was no man and was believed to have suffered in Judea though he had not suffered" (passum in Judæo putatum cum non esset passus—Irenæus, Adv. Haer. I, xii). The mendacity and the speech of the angels stamps this passage as a piece of Gnosticism. Soon after a Syrian Gnostic of Antioch, Saturninus or Saturinus (about 125) made Christ the chief of the Aeons, but tried to show that the Saviour was unborn (ἀνεμφατος) and without body (ἄσωμα) and without form (ἀπειθεος) and only apparently (παρασιρα) seen as man (Irenæus, Adv. Haer. XXIV, ii).

Another Syrian Gnostic, Cerdó, who came to Rome under Pope Hyginus (137) and became the master of Marcion, taught that "Christ, the Son of the Highest God, appeared without birth from the Virgin, yea with a body, and on earth in human nature, for matter not being the creation of the Highest God but of the Demiurge, Christ could have none of it. This is clearly brought out by Tertullian in his polemic against Marcion. According to this heresiarch (140) Christ, without passing through the womb of Mary and endowed with only a putative body, suddenly came from heaven to Capharnaum in the thirteenth year of Tiberius; and Tertullian remarks: "All these tricks about a putative corporeality Marcion has adopted lest the truth of Christ's birth should be argued from the reality of human nature that Christ should be vindicated as the work of the Creator [Demiurge] and be shown to have human flesh even as he had human birth" (Adv. Marc. III, xi). Tertullian further states that Marcion's chief disciple, Apelles, slightly modified his master's system, accepting indeed the truth of Christ's flesh, but strenuously denying the truth of His birth. He contended that Christ had an astral body made of superior substance, and he compared the Incarnation to the appearance of the angel to Abraham. This, Tertullian sarcastically remarks, is getting from the frying-pan into the fire, de calcaris in carbonarius, palam the Egyptian attempted to substitute his system still more closely to Christian doctrine by admitting not merely the reality of the Saviour's body but even a seeming birth, saying that the Saviour's body passed through Mary as through a channel (θρόνον καθέσι, though he took nothing from her but had a body from above. This approach to orthodoxy, however, was only apparent, for Valentinus distinguished between Christ and Jesus. Christ and the Holy Ghost were emanations from the Aeon Nous; and from all Aeons together proceeded Jesus the Saviour, who became united with the Messias of the Demiurge.

In the East, Marinos and the school of Bardesanes, though not Bardesanes himself, held similar views with regard to Christ's astral body and seeming birth. In the West, Polycarp reduced Docetism to absurdity by saying that Christ was indeed a real man, but His substance was a combination of the pneumatic and the psychic (spiritual and ethereal). The pneumatic He received from Achamoth or Wisdom, the psychic from the Demiurge; His psychic nature enabled him to suffer and feel pain, though He possessed nothing of a material or human kind (Irenæus, Adv. Haer., I, xii, iv). As the Docetæ objected to the reality of the birth, so from the first they particularly objected to the reality of the passion. Hence the clumsy attempts at substitution of another victim by Basilides and others. According to Basilides, Christ seemed to be a man and to perform miracles. It was not, however, Christ who suffered but Simon of Cyrene, who was constrained to carry the cross and was mistakenly crucified in Christ's stead. Simon having received Jesus' form, Jesus assumed Simon's and thustood by and laughed. Simon was crucified and Jesus returned to his father (Irenæus, Adv. Haer. I, xxiv). According to some apocrypha it was Judas, not Simon the Cyrenian, who was thus substituted. Hippolytus describes a Gnostic sect who took the name of Docetæ, though for what reason is not apparent, especially as their semblance theory was the same as that of Gnosticism. Their views were in close affinity to those of the Valentinians. The principal Being is, so to speak, the seed of a fig-tree, small in size but infinite in power; from it proceed three Aeons, tree, leaves, fruit, which, multiplied with the perfect number ten, become thirty. These thirty Aeons together fructify one of themselves, from whom proceeds the Virgin-Saviour, a perfect representation of the Highest God. The Saviour's task is to hinder further transference of souls from body to body, which is the work of the Great Archon, the Creator of the world. The Saviour enters the world unnoticed, unrecognised, hidden, obscure. An angel announced the glad tidings to Mary. He was born and did all the things that are written of him in the Gospels. But in baptism he received the figure and seal of another body besides that born of the Virgin. The object of this was that when the Archon perceives the peculiar and peculiar figment of flesh to the death of the cross, the soul of Jesus—that soul which had been nourished in the body born of the Virgin—might strip off that body and nail it to the accursed tree. In the pneumatic body received at baptism Jesus could triumph over the Archon he had eluded.

This heresy, which destroyed the very meaning and purpose of the Incarnation, was combated even by the Apostles. Possibly St. Paul's statement that in Christ dwelt the fulness of the Godhead corporaliter (Col. i, 19, ii. 9) has some reference to Docetic errors. Beyond doubt St. John (I John, i, 1-3; iv, 1-3; I 1
Doceticism. See DOCETISM.

Doceticism, a titular see of Asia Minor. This city, as appears from its coins where the inhabitants are called Macedonenses, must have been founded by Antigonos Dokimos. Its name is written Dokimeion, Dokimia, Domokiana, later Dokimion. It was famous for its marble-quarries, and is now identified with Isteia Kara Assar, a village north-east of Afion Kara Hisar, in the district of Boruza. On this site have been found Christian inscriptions, later than Constantine. Docimism was a suffragan of SYNNAEA in Phrygia Salutaris. Six or seven bishops are known, from 344 to St. Lequin (Or. Christ., I, 553); another bishop is mentioned in an inscription.

Texta, Description de l'Asie Mineure, I, 149; LEAKE, Asia Minor, 94; RAMSAY, Cities and Bishops of Phrygia, passim and 784; DOEL, E. L., Geschicht und Geschichte der Gnosis (Halle, 1883), II, 290. For Doceticism in Bulletin de correspondent helvétique (1860), XXIV, 179. S. PETRIDES.

Doctor (Lat. doctor, to teach), the title of an authorized teacher. In this general sense the term occurs in the O. T.; the "doctors" are mentioned with the "princes and ancients" (Deut., xxix, 10: xxxi, 28), and Azariah prophesies (II Paral., xv, 3) that "many days shall pass in Israel, without the true God, and without a priest a teacher, and without the law" (verse 4 et aliae loca), ut sit docetum. It was the duty of these doctors to expound the law, and they performed it at the time of Christ, who was found in the temple "in the midst of the doctors" (St. Luke, ii, 46). Another meeting of Our Lord with the "doctors of the law" is recorded in St. Luke, vi, 17. The later Jewish teachers also received the title (doctor gentium, doctor misERICORSIS, et aliae loca); the duty of these doctors to expound the law, and they performed it at the time of Christ, who was found in the temple "in the midst of the doctors" (St. Luke, ii, 46). Another meeting of Our Lord with the "doctors of the law" is recorded in St. Luke, vi, 17. The later Jewish teachers also received the title (doctor gentium, doctor misERICORSIS, et aliae loca); the duty of these doctors to expound the law, and they performed it at the time of Christ, who was found in the temple "in the midst of the doctors" (St. Luke, ii, 46).

During the first half of the twelfth century, the title Doctor acquired a more special significance, though it still implied personal excellence rather than official position. The "Four Doctors" who succeeded Innocent at Bologna were the distinguished jurists, Martinus (d. before 1160), Bulgarus (d. 1166), Ilduo (d. 1165), and Jacobus (d. 1175). But when the doctors formed a collegium they prescribed conditions on which other persons might become members of the teaching body, and thus laid the foundation of the system of academic degrees. The doctorate was first granted in civil law (doctores legum), later in canon law (doctores decretorum), and, during the thirteenth century, in medicine, grammar, logic, and philosophy. The doctorate in music was conferred at Oxford and Cambridge in the fourteenth century. For graduate degrees in arts the doctor was more generally employed than doctor, but for a long time these titles were synonymous.

The English universities, adopting the usage of Paris, at first designated teachers of law as doctors, and pro-
fessors of theology as masters; but in the course of time the former title was given to all the superior faculties, and the latter was reserved for grammar and arts. In Germany, doctor and magister were interchangeable (Kaufmann, "Geschichte", etc., II, 268 sqq.). Though the master was conferred as a separate degree, a trace of the medieval practice is still found in the diploma which styles its recipient "Doctor of Philosophy and Master of Arts".

Bologna at first conferred only the doctorate, but Paris and the English universities very soon introduced the preparatory degree of baccalaureate and licentiate. Later, it is true, the licentiate was granted in the Italian university also at the first examination (privata); but this merely implied permission to proceed to the second, more formal, examination (publica) in which the licentia docendi was given. At Paris, the licentiate meant a real authorization to teach, besides being a pre-requisite for admission to the final examination (incepto) at which the doctorate was conferred. There was a corresponding difference in the length of the course for the degree. Bologna required six years of study for the doctorate in canon law, or eight for those who undertook a licentiate and a doctorate in civil law; the student might begin his course at the age of fourteen and become a doctor at twenty or twenty-one. At Paris the statutes drawn up in 1215 by the Cardinal Legate Robert de Courcy provided that no one should lecture in theology as a master unless he was thirty years of age, had studied for eight years, and taken a five-year course in theology. According to Denifle (Universitaten, 100-102), the eight years meant three years in arts and five years in theology. (Cf. Rushdall, "Universities", I, 462 sqq.) At Oxford, candidates who had already taken the M.A. degree were required to study theology seven years more for the licentiate. In medicine, M.A. candidates had a six-years' course for the doctorate. For the subjects required in these courses see University. (Cf. Rushdall, op. cit., II, 452 sqq.)

In regard to examinations there seems to have been considerable leniency: at times they were reduced to mere formalities, at other times they were dispensed with. The degree was awarded by the chancellor on the advice of the regent masters of the faculty as to the candidate's fitness. The ceremony of inception was conducted by a regent; it consisted in the traditional public taking of the cap, the raising of the hand, and the kiss of fellowship. At Paris, however, the degree in theology was conferred by the chancellor himself, who placed the biretta upon the candidate's head with the words, "Incipisti in nomine Patris et Fili et Spiritus Sancti. Amen." Then followed a disputation (addeo) in which the chancellor, the masters, and one of the bachelors took part. It was customary also to hold, on the evening before inception, an elaborate disputation known as vesperia (see, for details, "Carthularium", II, App., p. 693).

Among the various disputes, that in theology was most frequent. It was no uncommon thing for those who had received the degree in the other faculties to take additional courses for the S.T.D. In the German universities, for instance, licentiates in law or medicine might become bachelors in theology after five years of theological study; they were therefore obliged to pursue the course prescribed for the other candidates. Conversely, theologians were sometimes permitted to follow courses in civil law and medicine. This privilege was granted to Bologna by Clement V (10 March, 1310) for a period of ten years but it applied only to ecclesiastical persons who were priests or superiors of religious orders elected. It was renewed twice by John XXII (1317 and 1330) but when the university (1343-44) petitioned for an indefinite extension of the privilege, Clement VI refused. Innocent VI, however, renewed it (30 June, 1360) for ten years (Denifle, op. cit., 209)

The chief significance of the doctorate lay in the fact that it authorized the recipient to teach everywhere without undergoing further examination—jus ubique docendi. This prerogative developed gradually out of the licentia docendi which the degree itself implied; i.e., the right to teach was no longer reserved by the doctorate. But as the older universities, Bologna, Paris, and Oxford, grew in importance and attracted students from all parts, the idea naturally spread that their graduates had the right to teach everywhere. Subsequently, this authorization was expressly granted to newly founded universities: by Gregory IX to Toulouse (1233), and by Alexander IV to Salamanca (1255). It was long, however, before the universities came to a mutual recognition of their degrees. Paris held tenaciously to its rights; Oxford was more liberal, but would not permit a Parisian doctor to teach merely on the strength of his degree. The doctors themselves were not always anxious to exercise their prerogative; the teaching devolved in large measure upon the bachelors, and the masters were classified as regents (those who taught) and as non-regents, who were content with the prestige implied by the title without the responsibility of teaching.

The essence of the degree of Doctor of Laws, as fixed by the medieval universities, is preserved in modern academic usage; the degree implies a qualification to teach. It has, however, undergone various modifications which are due partly to the development of the universities and partly to the changes in educational theory and practice. The degree, Doctor of Laws, is often conferred as an honorary title. The doctorate in theology, or divinity, has been retained by Catholic institutions as a degree to be given either after a course of study and an examination or as a distinction (honores causa); while the tendency among non-Catholic universities is to confer it only as an honorary degree. Of late the doctorate in philosophy has attained great importance, and its value has been enhanced as the result of stricter requirements. For this and for the other doctorates, research is now generally considered the principal qualification, and in consequence the candidate's work is becoming more specialized.

The influence of the Holy See, in regard to the doctorate, especially in theology, has been exerted in various ways, e.g., by authorizing universities to confer the degree, by prescribing through papal legates the conditions for obtaining it, and by regulating those abuses, notably laxity of requirements, which crept in from time to time. The historical details will be found in the article University. Legislation concerning the ecclesiastical side of the subject may be summarized as follows:

1. The power of creating doctors belongs to the pope; but he may, and often does, delegate it to universities, seminaries, and other institutions of learning. Charters granted by civil authority are valid; but to obtain canonical recognition, doctorates in theology and canon law must be conferred in virtue of pontifical authorization.

2. The candidate for the degree must be a baptized Christian and must subscribe to the profession of faith formulated by Pius IV. As a rule, only priests receive the doctorate in theology and canon law. It is not, however, necessary that the recipient should be in Sacred orders. Laymen as well as priests are allowed to appear as advocates before the Roman tribunals (Rota, Signatura) and they are required to have the doctorate at least in canon law (Cont. "Sapienti consilio", 29 June, 1908).

3. The doctoral biretta, or four-cornered cap, may be worn on academic occasions, but not in choir (Cong. of Rites, "In Venusina", 1844, and reply to the Archbishop of Santiago de Chile, 6 Sept., 1895); the ring may be worn at all times except at Mass and other ecclesiastical functions (Cong. of Rites, 12 Feb., 1902).

4. The Council of Trent (Sess. XXII, c. ii, "de
Ref.'decreed that a bishop must be either doctor or licentiate in theology or in canon law; if a religious, he should have proper testimonials from his superiors. It enacted the same requirement for the archdeacon (Sess. XXIV, c. xii, "de Ref."). Regarding the vicar capitular and the penitentiary, it prescribed that they should either have the degree or be otherwise well qualified. The Congregation of Studies recently decided (7 March, 1908) that the penitentiary and theologian of the cathedral chapter, if not already doctors, must receive the degree within a year. The Cong. of Conc. (Decret. Hors Consilio," 20 June, 1908) prescribes the doctorate in theology and canon law for the officials of the Rota and Signatura. It has been a matter of controversy whether the vicar-general is obliged to be a doctor, and whether the Tridentine decree concerning the archdeacon is still in force. For the divergent opinions, see Card. Gennari, "Quotestiones Canonicae" (Rome, 1908), pp. 272-293. The whole tenor of ecclesiastical legislation has been in favour of requirements which secure scientific qualifications in those who are appointed to official positions in the Church.

DOCTORS, SURNAMES OF FAMOUS. It was customary in the Middle Ages to designate the more celebrated among the doctors by certain epithets or surnames which were supposed to express their characteristic excellence or dignity. This was especially the case with the doctors in law and theology. The following list exhibits the principal surnames with the dates of death.

Doctors in Theology—

- Abstractionum—Francis Mayron, O.F.M., 1325 or 1327.
- Accutitates—Sixtus IV, 1484.
- Acutus—Gabriel Vasquez, S.J., 1604.
- Amoenus—Robert Conton, O.F.M., 1340.
- Angelicus—St. Thomas Aquinas, O.P., 1274.
- Area testamenti—St. Anthony of Padua, 1311.
- Authenticus—Gregory of Rimini, O.S.A., 1538.
- Acerrarum et philosophicorum—Urbansus, O.S.B., 1403.
- Beatus et fundatissimus—Egidius of Colonna, O.S.A., 1316.
- Bonus—Walter Brinkley, O.F.M., 1310.
- Christianus—Nicholas of Cusa, 1464.
- Clavis—Louis of Montesinos, 1621.
- Clarus or subtilis—Denis of Citeaux, 15th cent.
- Collectivus—Landolfo Canacciolo, O.F.M., 1351.
- Colloquium doctorum—William of Champeaux, O.S.B., 1121.
- Contradictionum—Johann Wessel, 1489.
- Doctor doctorum, Scholasticus—Anselm of Laon, 1117.
- Dulciflavus—Antonio Andreas, O.F.M., 1320.
- Ecclesiasticus—Denys the Carthusian, 1471.
- Emoens—St. John of Matha, O. Trin., 1213.
- Emperiorum theologus—Laurent Gervais, O.P., 1483.
- Excellentissimus—Antonio Corsetti, 1503.
- Eremitus—Francisco Suarez, S.J., 1617.
- Facundus—Petrus Aureolus, O.F.M., 1322.
- Famosissimus—Petrus Alberti, O.S.B., 1426.
- Fabricius—Bertrand de la Nar, O.F.M., 1334.
- Fetatis—Francis of Canida, O.F.M., 15th cent.
- Fls mundi—Maurice O'Febhly, O.F.M., Abp. of Tuam, 1513.
- Fundamentalis—Jeanne Faber of Bordeaux, 1530.
- Fundatissimus—see Beatus.

Doctors in Law—

- Fundatus—William Ware, O.F.M., 1270.
- Illibatus—Alexander Alamanieus, O.F.M., 15th cent.
- Illuminatus—Francis Mayron, O.F.M., 1325-27.
- Raymond Lully, O.F.M., 1315.
- Illuminatus et sublimis—Joannes Tauler, O.P., 1361.
- Illustratus—Franciscus Picenus, O.F.M., 14th cent.
- Illustris—Adam of Marisco, O.F.M., 1308.
- Inclitus—William Mackelfield, O.P., 1300.
- Ingeniosissimus—Andrew of Newcastle, O.F.M., 1309.

- Inter Aristotelicos Aristotelesissimus—Hayno of Faversham, O.F.M., 1241.
- Invincibilis—Petrus Thomas, O.F.M., 14th cent.
- Irreptagibilis—Alexander of Hales, O.F.M., 1215.
- Magister Sententiarum—Peter Lombard, 1164.
- Magnus—Albertus Magnus, O.P., 1250; Gilbert of Citeaux, O.Cist., 1280.
- Marianus—St. Anselm of Canterbury, O.S.B., 1109.
- Melleflusus—St. Bernard, O.Cist., 1153.
- Mirabilis—Antonio Perez, S.J., 1649; Roger Bacon, O.F.M., 1291.
- Moralis—Carried Eudo, O.F.M., 1349.
- Notabilis—Pierre de l'He, O.F.M., 14th cent.
- Ordinatissimus—Johannes of Bassolis, O.F.M., c. 1347.
- Oratioetissimus et sufficiens—Petrus de Aquila, O.F.M., 1344.
- Paraniessis—Guillaume de Perpignan, O.Carm., 1342.
- Planus et utilis—Nicholas of Lyre, O.F.M., 1340.
- Paschalibus—Peter of Kaiserlautern, O.Prem., 1330.
- Prachtissimus—Thomas Netter (of Walden), O.Carm., 1431.
- Profundissimus—Paul of Venice, O.S.A., 1425.
- Gabriel Bie, Can. Reg., 1460; Juan Alfonso Curiel, O.S.B., 1609.
- Profundus—Thomas Bradwardine, 1349.
- Refugialisus—Alexander V, 1110.
- Resolutissimus—Durandus of Saint-Pourçain, O.P., 1334.
- Resolutus—John Bacon, O.Carm., 1346.
- Scholasticus—Peter Abelard, 1112; Gilbert de la Porée, 1154; Peter Lombard, 1164; Peter of Poitiers, 1220; Hugh of Newcastile, O.F.M., 1322.
- Sediocorius—St. Bonaventure, O.F.M., 1274.
- Singularis et singularibus—William of Occam, O.F.M., 1347 or 1359.
- Solennis—Henry of Ghent, 1293.
- Solidus, Cospout—Richard of Middleton, O.F.M., 1300.
- Speculatus—James of Viterbo, O.S.A., 1307.
- Sublimis—Francis de Barcione, O.Carm., 1372.
- Jean Courcet-Cuisse, 1425.
- Subtilis—Duns Scotus, O.F.M., 1308.
- Subtilissimus—Peter of Manutius, 14th cent.
- Sustentatorius—Francis of Accoli, c. 1344.
- Universale—Alanus of Lille, 1202; Gilbert, Bishop of London, 1134.
- Venerabilis et Christianissimus—Jean Gerson, 1429.
- Venerandus—Geoffroy de Fontibus, O.F.M., 1240.
- Vita Arbor—Johannes Wallensis, O.F.M., 1300.

Doctors in Law—

- Aristotelis anima—Johannes Doninus, O.F.M., 1359.
- Doctor a doctoribus—Antonius Francisceus, 1528.
- Fons canonicus—Johannes Andrea, 1348.
- Fons juris utriusque—Henry of Susa (Ostia), 1287-91.
- Lucerno juris—Baldus of Ubaldis, 1400.
- Lucerno juris posticipi—Nicholas Tedesci, O.S.B., 1415.
- Lumen juris—Clement IV, 1268.
- Lumen legum—Irnerius, 13th cent.
THE MADONNA AND DOCTORS OF THE CHURCH—MORETTO

STÄDL ART INSTITUTE, FRANKPORT

ST. AMBROSE
ST. GREGORY

ST. AUGUSTINE
ST. JEROME
DOCTOR Angelicus. See Thomas Aquinas, Saint.

DOCTOR of the Law. See LAW; SCRIBE.

DOCTORS of the Church (Lat. Doctores Ecclesiae).—Certain ecclesiastical writers have received this title on account of the great advantage the whole Church has derived from their doctrine. In the Western Church four eminent Fathers of the Church attained this honour in the early Middle Ages: St. Gregory the Great, St. Ambrose, St. Augustine, and St. Jerome. The "four Doctors" became a commonplace among the Scholastics, and a decree of Boniface VIII (1298) ordered that these feasts be kept as doubles in the whole Church is contained in his sixth book of Decretals (cap. "Gloriosus", de reliqua, et vener. sanctorum, in Sexto, III, 22). In the Eastern Church three Doctors were pre-eminent: Chrysostom, Basil, and Gregory Nazianzen. The feasts of these three saints were made obligatory throughout the Eastern Church by Leo VI, the Wise, the deposer of Photius. A common feast was later instituted in their honour on 30 January, called "the feast of the three Hierarchs". In the Menæa for that day it is related that the three Doctors appeared in a dream to John, Bishop of Euchaita, and commanded him to institute a festival in their honour, in order to put a stop to the rivalry of their votaries and panegyrist. This was under Alexius Comnenus (1081-1188; see "Aeta SS."); 11 June, under St. Basil, c. xxxviii.), but sermons for the feast are attributed in MSS. to Cosmas Vestitor, who flourished in the tenth century. The three are as common in Eastern as in Western. Durandus (I, 3) remarks that Doctors should be represented with books in their hands. In the West analogy led to the veneration of four Eastern Doctors, St. Athanasius being very properly added to the three hierarchs.

To these great names others have subsequently been added. The requisite conditions are enumerated as three: eminis doctrina, insigne vitae sanctitas, Ecclesia declaratio (i.e. eminent learning, a high degree of sanctity, and proclamation by the Church). Benedict XIV explains the third as a declaration by the Church, officially, either by its Acts, or by an Act that general councils have acclaimed the writings of certain Doctors; no council has actually conferred the title of Doctor of the Church. In practice the procedure consists in extending to the Universal Church the use of the Office and Mass of a saint in which the title of Doctor is applied to him. The decree is issued by the Congregation of Sacred Rites and approved by the pope, after a careful examination, if necessary, of the saint's writings. It is not in any way an ex cathedra decision, nor does it even amount to a declaration that no error is to be found in the teaching of the Doctor; it is, indeed, well known that the majority of them are not wholly immune from error. No martyr has ever been included in the list, since the Church and the Mass are for Confessors. Hence, as Benedict XIV points out, St. Ignatius, St. Ireneus, and St. Cyprian are not called Doctors of the Church.

DOCTRINE

The proper Mass of Doctors has the Introit "In medio" borrowed from that of the Theologus per excellence, St. John the Evangelist, together with special prayers and Gregorian chant. The Credo is said. The principal peculiarity of the Office is the antiphon to the Magnificat at both Vespers, "O Doctor optimize", and it is further by this antiphon that the bishop or any other priest whose feast is celebrated is to be a Doctor (S. R. C., 7 Sept., 1754). In fact, St. John Damascene has a Mass of his own, while Athanasius, Basil, Leo, and Cyril of Jerusalem have not the Gospel of Doctors, and several have not the collect. The feasts of the four Latin Doctors were not added until the fourteenth century, when St. Thomas Aquinas was declared a Doctor by the Dominican St. Pius V in his new edition of the Breviary (1558), in which the feasts of the four Greek Doctors were also raised to the rank of doubles. The Franciscan Sixtus V (1588) added St. Bonaventure. St. Anselm was added by Clement XI (1720), St. Isidore by Innocent XIII (1721). St. Peter Chrysologus by Benedict XIII (1723), St. Leo I (a well-deserved but belated honour) by Benedict XIV (1754), St. Peter Damian by Leo XII (1828), St. Bernard by Pius VII (1830). Pius IX gave (1851) the honour to St. Hilary and to two more modern saints, Alphonsus Liguori (1787) and Francis de Sales (1857). Pius IX (1869) has added to the venerable list of Doctors, St. Isidore of Seville, St. Bede to England and to all Benedictines. St. Lander of Seville and St. Fulgentius are kept as Doctors in Spain, and the former by Benedictines also, as they were in earlier times claimed as a monk. St. Idefonseus has the Introit "In medio" in the same order (for the same reason) and in Spain, without the rank of Doctor.

Doctrinarians. See BUS, CÉSAR DE; VENERABLE.

Doctrine, Christian. — Taken in the sense of "the act of teaching" and "the knowledge imparted by teaching", this term is synonymous with catechesis and catechism. "A doctrine is, in the Vulgate, the word doctrina, are often used in the N.T., especially in the Pastoral Epistles. As we might expect, the Apostle insists upon "doctrine" as one of the most important duties of a bishop (1 Tim., iv, 13, 16; v, 17; 1 Tim., iv, 2, etc.)."

The word σαρκικὸς means instruction by word of mouth, especially by questioning and answering. Though it may apply to any subject-matter, it is commonly used for instruction in the elements of religion, especially preparation for initiation into Christianity. The word and others of the same origin occur in St. Paul's Gospel: "They have no light and see not the true light, because their minds are darkened, and being excluded from the life of God, are in the darkness. (John 1:1): 14). In the Acts, xviii, 25, Apollo is described as "[sarxv]nidos, edoctos, edoctos] in the way of the Lord". St. Paul uses the word twice: "I had rather speak five words with
my understanding, I may instruct (καταχωρίζων, instruc-
tion) others also (1 Cor., xiv, 19); and "Let him that is
instructed (καταχωρίζων, qui cathchēzetur) in
the word, communicate to him that instructeth (τῷ κατα-
χωρίζοντι, et qui cathchēzet) him, in all good things
(Col., vi, 6). Hence the word, with its technical mean-
ing, was in the instruction (κατάκτομον), and is applied both to the act of
instructing and the subject-matter of the instruction. The word
catechumen was also formerly used for the act of
instructing ("To say ay, and no, to these particulars, is more than to answer in a catechism"—As You Like It, act i, sc. i). And we are told that it was still used in the
church, but it is now more properly applied to the little printed
book in which the questions and answers are contained.
The subject will be treated in this article under the
title of the catechumen. I. History of Catechetics; II. Prac-
tical Catechetics; III. Modern Catechisms.

I. History of Catechetics. (1) Oral instruction by
means of questions and answers has occupied a
prominent place in the scholastic methods of the moral
and religious teachers of all countries and of all ages. The
Socratic dialogues will occur to every one as brilliant
examples. But many centuries before Socrates' day
the method was practised among the Jews (Exod.
xii, 26; Deut., vi, 7, 20, etc.). They had three forms of
catechizing: domestic, conducted by the head of the
family for the benefit of his children and servants;
secular, by teachers in schools; and ecclesiastical,
by priests and Levites in the Temple and the syna-
gogues. Proselytes were carefully instructed before
being admitted to become members of the Hebrew
faith. The regular instruction of children began when
they were twelve years old. Thus we read of Christ
"in the temple, sitting in the midst of the doctors
(οδηγούμενοι), hearing them, and asking them questions.
And all that heard him were astonished at his wisdom,
and his answers" (Luke, ii, 46, 47). During His public
life He frequently made use of the catechetical method
to impart instruction: "What think ye of Christ? Whose son
is he?" "Whom do men say that the son of
man is?" "Whom do you say that I am?" etc. In
His final charge to His Apostles He said: "Teach
ye (μαθηταίας, make disciples, or scholars) all
nations; . . . teaching (διδάσκαλος, instructing) or
them to observe all things whatsoever I have com-
manded you" (Matt., xxviii, 19). And after this
instruction they were to initiate them into the Church,
"teaching them in the name of the Father, and of the
Son, and of the Holy Ghost" (ibid.).

(2) In obedience to Christ's command, St. Peter,
"standing up with the eleven," declared to the Jews
on Pentecost day, and proved to them from the Scrip-
tures that Jesus, whom they had crucified, was "Lord
and Christ." When they had been convinced of this
truth, and had compunction in their heart for their
crime, they asked, "What shall we do?" And Peter
answered, "Do penance, and be baptized . . . in
the name of Jesus Christ, for the remission of your
sins." "And with many other words did he testify and
exhort, showing by the acts of the Spirit the power of
the first catechetical instruction given by the Apostles.
It is both doctrinal and moral—the hearers are
to believe and to repent. This twofold element is also
contained in St. Peter's second discourse after healing
the lame man in the Temple (Acts, iii). St. Stephen
went further, and brings out that belief in Jesus as the
Christ (Messias) meant the ending of the Old Covenant
and the coming in of a New (Acts, vi, vii). St. Philip
the Deacon preached "of the kingdom of God, in the
name of Jesus Christ;" and the Samaritans were
"baptized, both men and women" (Acts, vii). Fur-
thermore, St. Peter and St. John came from Jerusalem
and "prayed for them, that they might receive the
Holy Ghost;" and doubtless declared to them the
doctrine of that Holy Spirit (ibid.). The same deacon's
discourse to the eunuch deals with the proof from Scrip-
ture, and notably Isaiah (liii, 7), that "Jesus Christ
is the Son of God," and the necessity of baptism. No
mention is made of penance or repentance, as the
eunuch was a just man anxious to do God's will. So,
too, Cornelius, "a religious man, and fearing God
with his house, giving much alms to the people, and
always praying to God, that he might receive a good
spiritual instruction; according to St. Peter speaks to him
of Jesus Christ who is "lord of all . . . Jesus of Nazareth;
how God anointed him with the Holy Ghost, and with
power, who went about doing good, and healing all
who were oppressed by the devil, for God was with
him. And we are told that all things were done in Der-
branch the land of the Jews and in Jerusalem, whom they
killed, hanging him upon a tree. His God raised up
the third day, and gave him to be made manifest . . .
even to us who did eat and drink with him after he
arose again from the dead; and he commanded us to
preach to the people, and to testify that it is he who
was appointed by God, to be judge of the living and of
the dead. To him all the prophets do testify, that
by his name all receive remission of sins, who believe
in him" (Acts, x). In this discourse we have the chief
articles of the Creed: the Trinity (God, Jesus Christ
"Lord and Christ," the Holy Ghost, the Incarnation,
Resurrection, and Redemption of Our Lord; His coming
to judge the living and the dead, and the remission of
sins. These are also the subjects of St. Paul's discourses,
though, of course, in addressing the pagans. Whether
peasants at Lystra or philosophers at Athens, he deals
with the fundamental truths of the existence and
attributes of God (Acts, xii, xiv, xvii). As he himself
summed up the matter, he taught "publicly, and from
house to house, testifying both to Jews and Gentiles
penance towards God, and faith in (δε) our Lord
Jesus Christ" (Acts, xx). We find also that though
Apologia was "instructing" (διδάσκαλος) the people, the Lord,
Priscilla and Aquila "explained to him the way of the
Lord more diligently" (διδάσκαλος, Acts, xii.—See Apostles' Creed).

(3) The materials for describing the catechetical
Teaching of the ages immediately succeeding the
Apostles are scanty. The books of the New Testa-
mament were available, and all that would be needed
would be to supplement these. Thus, in the Didache
we find little but moral instruction; but it is clear
that those to whom it is addressed must have already
received some knowledge of what they were to be
baptized. Later on we find more explicit dogmatic teach-
ing, for instance, in St. Justin's Apology, and in the
writings of Clement of Alexandria. Still, even this is
not much more advanced than what we have seen
above as taught by St. Peter, except that Justin
delves on the Creation and proves the Divinity of
Christ, the Logos and only-begotten Son of the
Father.

(4) In the ages of persecution it became necessary
to exercise great caution in admitting persons to
membership in the Church. The danger of falling away,
or even of betrayal, must be guarded against by a
twofold doctrinal and moral training. Hence the in-
stitution of the catechumenate and the Discipline of the
Secret. The work of the Apologists had been to
remove prejudices against Christianity, and to
set forth its doctrines and practices in such a way as
to appeal to the fair-minded pagan. If anyone
were moved to embrace the true religion, he was not at
once admitted, as in the days of the Church. At
first he was treated as an inquirer, and only the funda-
mental doctrines were communicated to him. As
soon as he had given proof of his knowledge and fitness
he was admitted to the catechumenate proper, and
was further instructed. After some years spent in this
stage he was promoted to the rank of a catechume-
nus, i.e., those ready for baptism. As might be
expected, he was now instructed more especially in
the rites for this purpose. Even when he had been
initiated, his instruction was not yet at an end. During the week after Easter, while the grace of first fervour was still upon him, the various rites and mysteries in which he had just participated were more fully explained to him.

When considering the catechetical writings of the Fathers we must bear in mind the distinction of these different grades. When addressing a mere inquirer they would naturally be more guarded and less explicit than if they had to do with one who had passed through the catechumenate. Sometimes, indeed, the language was so chosen that it conveyed only half the truth, and the catechumen, who had not yet understood the whole. The distinction between the elementary and advanced instruction is noted by St. Paul: "As unto little ones in Christ. I gave you milk, not meat; for you were not able as yet." (I Cor. iii. 2).

For our present purpose it will be best to take as typical examples of catechesis in the patristic times the works of St. Cyril of Jerusalem (315-386) and St. Augustine (351-430), merely noting by the way the work done by St. Ambrose (the instructor of St. Augustine) and St. Gregory of Nyssa ("The Catechetical Oration"). Ed. J. H. Stawley (1903). We have from St. Cyril twenty-four catechetical discourses, forming together a complete course of moral and doctrinal instruction. In the first of these, called the "Pro-catechesis", he sets forth the greatness and efficacy of the grace of initiation into the Church. The "Catecheses" proper (numbered i to xvii) are divided into two parts, i.e., repeating the "Pro-catechesis"; and treating of sin and repentance, baptism, the principal doctrines of the Christian religion, and the nature and origin of faith; vii-xviii, setting forth, article by article, the baptismal Creed of the Church of Jerusalem. The "Pro-catechesis"! and the discourses were intended for the instruction of the hearers. During Lent, in immediate preparation for reception into the Church. The remaining discourses (xix-xxiv), called the "Catecheses Mystagogiae", were delivered during Easter week to those who had been baptized at Easter; and these, though much shorter than the others, treat clearly and openly of baptism, confirmation, and the Holy Eucharist, the veil of secrecy being now removed. This is not the place to point out how completely in accord with Catholic teaching are the doctrines of St. Cyril (see CILYOF JERUSALEM: TRANSUBSTANTIATION, and what valuable instruction is required of the deacon of the Liturgy in his day. In studying these "Catecheses" we should bear in mind that they were intended for grown-up persons; hence they are not couched in the simple language which we have to use in our instructions to children. They resemble, rather, the instruction given to converts, for which purpose they are still of great use. The same remark applies to all the catechetical writings of the Fathers.

St. Augustine's treatise "De Catechizandis Rudioibus" deals with both the theory and the practice of catechizing. It is divided into twenty-seven chapters: i-xiv theory, xv-xxvii practice. This short work, written about the year 400, shows that the great Doctor did not disdain to devote most careful attention to the work of instructing those who wished to learn the rudiments of the Faith. It could be well borne in mind that we may have to use words of encouragement, pointing out that we must judge of our discourses not by their effect upon ourselves, but by their effect upon our hearers. The story may be familiar enough to us, who go on repeating it over and over again, but it is not so to those who are listening to it for the first time. Bearing this in mind, the catechist should put himself in the position of the hearer, and speak as though he were telling something new. Hilaritas, a bright and cheerful manner, must be one of the chief qualifications of an instructor. "Gomorrah is a fruitful giver" applies to the giving of the word as well as to the giving of wealth. He should so speak that the hearer hearing should believe, believing should hope, and hoping should love (Quidquid narras ita narre, ut illi cuil loqueris audiendo credat, credendo speret, sperans amet-i.e., the Sermo dicendi erat, quod haec per annum vidit spiritualiter, quod per annum visum seculo est). But the fear of God, "for it seldom, or rather never, happens that anyone wishes to become a Christian without being moved thereto by some fear of God". If he comes from some worldly motive he may be only pretending, though a mere pretender may sometimes be turned into a genuine convert by our efforts. Hence, continues the holy Doctor, it is of great importance to ascertain the state of mind and the motives of those who come to us. If we are satisfied that they have received a Divine call, we have a good opening for instruction on the care of God for us. We shall be shown through the story of God's dealings with men, from the time when He made all things even to our own days; showing especially that the Old Testament was a preparation for the New, and the New a fulfilment of the Old (in veteri testamento est occultatio novi, in novo testamento est manifestatio veteris). This is a fact which is developed greatly by the author in the "De Civitate Dei". After we have finished our story we should go on to exultate in the resurrection of the body—a doctrine as much ridiculed in St. Augustine's day as it was in St. Paul's day, and as it is in ours. Then should come the account to be rendered at the last judgment, and the reward and the punishment of the wicked. The convert should be put on his guard against the dangers and difficulties in trying to lead a good life, especially those arising from scandals within as well as without the Church. Finally, he should be reminded that the grace of his conversion is not due either to his merits or to ours, but to the goodness of God. So far the saint has been speaking of persons of little or no education. In chap. vii he goes on to deal with those who are well educated, and are already acquainted with the Scriptures and other Catholic writings. We must have before us some form of instruction, and this should be imparted in such a way as to let them see that we are aware of their knowledge of the Faith. Doubtless St. Augustine had in mind his own ease, when he presented himself to be received into the Church by St. Ambrose. We note, too, the wisdom of this piece of advice, especially when we have to deal with Anglican converts. But though less instruction is needed in such cases, continues the holy Doctor, we may rightly inquire into the causes which have induced these persons to wish to become Christians; and in particular as to the books which have influenced them. If these are the Scriptures or other Catholic books we should praise and recommend them; but if these are heretical we should point out wherein they have distorted the true faith. Throughout our instruction we should speak with modesty, but also with authority, that he to whom we are speaking may experience that we have some form of humility rather than pride or contempt. Humility is also the principal virtue to be urged upon that intermediate class of converts who have received some education but not of the higher sort. These are disposed to scoff at Christian writings, and even at the Scriptures for their impiety. It is only the fear of God who is made to see that it is the matter rather than the language which is of importance; it is more profitable to listen to a true discourse than to one which is eloquent. The whole of this chapter should be taken to heart by many who join the Church nowadays. After dealing
with these different classes of inquirers, the saint devotes less than five lengthy chapters (x to xiv) to the causes of weariness (the opposite of 

hilaritas) and the remedies for it. This portion is perhaps the most valuable of the whole treatise, at least from a practical point of view. Only St. Augustine’s advice as to the remedies can be given here. We must bring ourselves down to the level of the lowest of our hearers, even as Christ humbled Himself and took upon Himself “the form of a servant.” We must vary the subjects, and we must increase in earnestness of manner so as to move even the greatest influence on catecheties. If it seems to you that the talk is ours, we should reflect, as already pointed out, that the instruction, though not up to our ideal, may be exactly suited to our hearer and entirely fresh and new to him; in any case the experience may be useful as a trial to our humility. Other occupations may be pleasanter, but we cannot say that they are certainly more profitable: for duty should come first, and we should submit to God’s will and not try to make Him suit us. After laying down these precepts, St. Augustine goes on to give a short catechetical instruction as an example of what he has been inculcating. It is supposed to be addressed to an one type of inquirer, neither grossly ignorant nor highly educated (xvi to xxv), and might well be used at the present day. What specially strikes one in reading it is the admirable way in which the saint brings out the prophetic and typical character of the Old-Testament narrative, and insinuates gradually all the articles of the Creed without seeming to reveal them. The sketch of Christ’s life and passion, and the doctrine of the Church and the sacraments are also noteworthy. The discourse ends with an earnest exhortation to perseverance. This short work has exercised the greatest influence on catechetics. In all ages of the Church it has been adopted as a textbook.

(5) When all fear of persecution had passed away, and the empire had become almost entirely Christian, the need for a prolonged period of trial and instruction no longer existed. About the same time the Saxon people, being instructed about the administration of baptism to infants. In such cases instruction was, of course, impossible, though traces of it are still to be seen in the rite of infant baptism, where the godparents are put through a sort of catechery. There is of the child’s life, was taught its religion both at home and at the services in church. This instruction was necessarily more simple than that formerly given to grown-up catechumens, and gradually came to be what we now understand by catechetical instruction. Meanwhile, however, the barbarian invaders were being brought into the Church, and in their case the instruction had to be of an elementary character. The missionaries had to go back to the methods of the Apostles and content themselves with exacting a renunciation of idolatry and a profession of belief in the great truths of Christian doctrine. Patrick in Ireland, St. Remigius among the Franks, St. Augustine in England, St. Boniface in Germany. We should bear in mind that in those ages religious instruction did not cease with baptism. Sermons were far more common than in our day, and the Bishop spoke rather as a catechist than as a preacher. We may take the practice among the Anglo-Saxons as typical of what was done in other countries. Among the duties incumbent on the parish priest the first was to instruct his flock in the doctrines and duties of Christianity; and to expound, from among those the sermon rested upon the pages of their common life, as for instance their ten commandments; to take care that all could repeat and understand the Lord’s Prayer and the Creed; to expound in English on Sundays the portion of Scripture proper to the Mass of the day, and to preach, or, if he were unable to preach, to read at least from a book some lesson of instruction” (Lingard, “Anglo-Saxon Church”, c. iv). The laws enacting these duties will be found in Thorpe, “Ecclesiastical Institutes”, i, 378; ii, 33, 34, 84, 191.

(6) It is the custom with non-Catholic writers to assert that during the Middle Ages, “the Ages of Faith”, religious instruction was entirely neglected, and that the Protestant Reformers were the first to restore the practice of the Early Church. In the “Dict. de théol. cath.”, s. v. “Catéchisme”, and in Bareille, “Le Catéchisme Romain”, Introd., pp. 36 sqq., will be found long lists of authors showing these assertions. We must here content ourselves with stating what was done in England. Abbot Gasquet has thoroughly gone into the subject, and declares that “in pre-Reformation days the people were well instructed in their faith by priests who faithfully discharged their plain duty in their regard” (Old English Bible and other Essays, p. 180). In proof of this he quotes the constitutions of John Peckham, Archbishop of Canterbury (1281), in which it is enjoined that every priest shall explain to his people in English, and without any elaborate subtleties (ulsterique obscurae conceptuales subtletates), four times in the year, the Creed, the Ten Commandments, the two precepts of the Gospel (viz. love of God and man), the seven deadly sins, the seven chief virtues (theological and cardinal), and the seven sacraments. In these constitutions is contained a brief instruction on all these heads, “lest anyone should excuse himself on the ground of ignorance of these things which all the ministers of the Church are bound to know”. This legislation, after all, was nothing but an instruction on a practice dating from Saxon days, as we have already seen. Moreover, it is constantly referred to in subsequent synods and in collections of canon law. One of Peckham’s predecessors, St. Edmund Rich (1241-1240), was not only a man of great learning, but also a zealous teacher of Christian doctrine among the people. He wrote familiar instructions on prayer, the seven deadly sins, the Commandments, and the sacraments. Cardinal Thoresby, Archbishop of York, published in 1557 a catechism in Latin and English, the “Lay Folks Catechism”, for the purpose of carrying out Peckham’s Constitutions, and it is based on Peckham’s instruction. The two, with the English translation in rude verse, have been reprinted by the Early English Text Society. As the child grew older, the Visitations and Visitation of the Church, and the Visitations and Visitations of the People (Gasquet, op. cit., pp. 191). The part which pictures, statues, relics, paintings, and especially miracle plays took in the religious instruction of the people must not be forgotten. All of these provided an extensive knowledge of sacred history and an astonishing skill in conversing the moral and moral lessons. It is enough to refer to Ruskin’s “Bible of Amiens”, and to the Townley, Chester, and Coventry miracle plays. (Cf. Bareille, op. cit., pp. 12 sqq.)
The invention of printing and the revival of learning naturally had great influence on catechetical instruction. The first great name to be mentioned, though it belongs to a slightly earlier period, is that of John Gerson (1363-1429). He realized that the neglected reform of the Church should be undertaken by the instruction of the young; and though he was chancellor of the University of Paris he devoted himself to this work. He composed a sort of little catechism entitled "The A B C of Simple Folk". To enable the clergy to catechize he also composed the "Opus Tripartitum de Praeceptis Decalogi, de Confessione, et de Baptismo". In 1540, Close, the author of the "Catechismus Romanus" (1363-1429) was printed in many hundreds of thousands; if the name Canisius came to be synonymous with Catechism (Bareille, op. cit., p. 61).

The Catechism of the Council of Trent ("Catechismus Romanus") is not a catechism in the ordinary sense of the word. It is rather a manual of instruction for the clergy ("Catechismus Romanus") and he briefly expounded the Creed, the Commandments of God, the sins to be mentioned in confession, and the art of dying well. This was printed many times and was translated into French. It was the forerunner of the Catechism of the Council of Trent. In the year 1570, before Luther was born, a German catechism, "Christenspiegel" (the Christian's Mirror), written by Dederich, was printed, and at once became very popular. Two other catechisms, "The Soul's Guide" and "The Consolation of the Soul", were printed a little later and issued in many editions. In 1558 Calvin composed his famous "Enchiridion", which was really the third edition of his smaller catechism, was published in 1559, and speedily ran through a number of editions; it is still used in Germany and in other Protestant countries. In 1556 Calvin composed a Catechism in French, which was considered the first of that kind to be composed in French. It was translated into Italian, French, German, and Polish. Brought out under such conditions (1566), the authority of this catechism is higher than that of any other, but is, of course, not on a level with that of the canons and decrees of a council. As to its value Cardinal Newman's estimate may be gathered from these words: "I cannot praise it with less truth. Le formulaire, d'instruire les enfans en la chrestienté, fait en maniere de dialogue où le ministre interroge et l'enfant répond". He candidly admits that it was always the custom in the Church to instruct children in this way. Of course he takes care to introduce the chief points of his heresy: the certainty of salvation, the imposibility of losing justice (righteousness), and the justification of children independently of baptism. It is noteworthy that as regards the Eucharist he teaches that we receive not merely a sign, but Jesus Christ Himself "really and effectually by faith in substantial union and accordance". In England the first Book of Common Prayer (1549) contained a catechism with a brief explanation of the Commandments and the Lord's Prayer. The explanation of the sacraments was not added until the year 1604. If this catechism be compared with that of Cardinal Thoresby, mentioned above, it will be seen that the instruction given to Protestant children in the middle of the sixteenth century was far inferior to that given in pre-Reformation days. In 1647 the Westminster Assembly of Divines drew up the Presbyterian "Larger" and "Smaller" Catechisms. On the Catholic side St. Peter Canisius published three catechisms, or rather one catechism in three forms: major (1555), minor (1558), and minus (1556). Taking as his foundation Ecclus., i, 33; he divides his treatment into two great parts: wisdom and justice. In the first he deals with Faith (the Catechism of the Lord's Prayer and the Commandments). This has been described by the present writer. In the second he deals without avoiding evil (sin and the remission of sin) and doing good (prayer, fasting and almsgiving, the cardinal virtues, the gifts and fruits of the Holy Ghost, the beatitudes, the evangelical counsels, and the Four Last Things). To obtain a perfect endowment of spiritual virtue, he considers that the sacraments are necessary, and hence he places the treatment of the sacraments between the two parts. After the Council of Trent (1563) Canisius added a chapter on the Fall and Justification. The form of the three books is that of questions and answers, some of the latter being as long as four or five pages. In striking contrast to the Protestant catechisms, the tone throughout is calm, and there is an absence of controversial bitterness. The success of Canisius' catechisms was enormous. They were translated into every language in Europe, and were printed in many hundreds of thousands; if the name Canisius came to be synonymous with Catechism (Bareille, op. cit., p. 61).

Cardinal Bellarmine's Catechism was ordered by Clement VIII to be used in the Papal States, and was recommended for use throughout the world. It appeared in two forms: "Dottrina Cristiana Breve" (1597) and "Dichiarazione púr Copiosa della Dottrina Cristiana" (1598). The first is for scholars, the second for teachers; in the first the teacher asks the questions and the scholar replies, whereas in the second the teacher reverses the order. The first, which is meant to be learnt by heart, contains eleven chapters and ninety-five questions, and is arranged in the following order: the Calling of the Christian and the Sign of the Cross; the Creed, the Lord's Prayer, and the Hail Mary; the Commandments of God, the Commandments of the Church, the Commandments of the Societies; the Sacraments, the Theological and Cardinal Virtues, the Gifts of the Holy Ghost, the Works of Mercy, the Sacraments, the Last Things, and the Rosary. It is an improvement on Canisius' catechisms, and hence it was recommended at the Vatican Council to serve as a model for the projected universal catechism.
Appendix of the Fall of Man and Justification. Translated into English (by Fr. Garnet) at St. Omer for John Heigham. With permission of Superiors: 1822.

A Catechism of Christian Doctrine, in fifteen conferences. Paris: 1826, 2nd ed., 1859. The author was Thomas White, alias Blacklow, of Lisbon and Douai. The most important, by Gillow and Hurst, of London, 1793, and Dublin, 1828; the author was Henry Turberville, a Douai priest. There was also a smaller edition, "An Abstract of the Douay Catechism. For the use of children and ignorant people. London, printed in the year 1858; it was reprinted many times, and continued in use until the Douai students came to England.

In 1825, the Franciscan Florence O'Conor published an Irish catechism at Louvain, entitled "Mirror of a Christian Life". This, like the catechisms of Hessey (Louvain, 1808) and Stapleton (Brussels, 1830), was written for the benefit of the Irish troops serving in the Netherlands. In the same century another of the descendants of the Franciscan order, Father Francis Molloy, a native of the County Meath, Ireland, and at the time professor of theology in St. Isidore's College, Rome, published a catechism in Irish under the title "Lucerna Fidelium". We should also mention Andrew Donlevy's "The Catholic Christian Doctrine by way of question and answer. Paris, 1742". This was in English and Irish on opposite pages. "The Poor Man's Catechism or the Christian Doctrine explained with short admonitions", 1st ed., 1752; it was edited by the Rev. George Bishop. The author's name does not appear. A later work tells who he was: "The Poor Man's Controversy. By J. Mannock, O. S. B., the author of the Poor Man's Catechism", 1769.

Dr. James Butler, Archbishop of Cashel, published his catechism in 1775, and it was soon adopted by many Irish bishops for their dioceses. An account of it was given by Archbishop Walsh in this "Irish Eccel. Record", Jan., 1892. In 1787 Bishop Challoner published "The Catholic Christian instructed in the Sacraments, Sacrifice, Ceremonies, and Observances of the Church by way of question and answer. By R. C. London, 1777." The following year Bishop Challoner published "An Abriggement of Christian Doctrine, with a short Daily Exercise", "corrected by the late Bp. Challoner", 1783. Bishop Hay's admirable works: "The Sincere Christian instructed in the Faith of Christ from the Written Word" (1781); "The Devout Christian instructed in the Faith of Christ" (1783); and the "Pious Christian" are catechisms on a large scale in the form of question and answer.

During the eighteenth century catechetical instruction received a fresh impulse from Pope Benedict XIII, who issued (1725) three ordinances prescribing in detail the methods: division into small classes and special preparation for confession under the oversight of the rational-tic tendencies in the pedagogical movement of the century, Clement XIII uttered a protest in 1761. Pius VI wrote (1787) to the Bishops, proposing for their use a catechism in Arabic prepared by the Propaganda. In Germany the "Pastoral Instruction" issued by Raymond Anton, Bishop of Eichstätt (1768; new ed. Freiburg, 1902) emphasized the need and indicated the method of instruction (Tt. XIV, Cap. V). Prominent among the writers on the subject were Franz Neumayr, S. J., in his "Rhetorica catechetica" (1769); M. I. Schmidt, "Katechisten", and J. R. Lemer, "Vorlesungen über die Katholische Katechistik" (Vienna, 1774).

In France, during the same century, great activity was shown, especially by the bishops, in publishing catechisms. Each diocese had its own textbook, but though occasional attempts were made at uniformity, they were not successful. Several catechisms composed by individuals other than the bishops were put on the Index (see Migne, "Catechismes", Paris, 1842). The French original of "An Abriggement of the Quebec Catechism" (Quebec, 1817) appeared in Paris (1782) and Quebec (1792).

The pedagogical activity of the nineteenth century naturally exerted an influence upon religious instruction. German writers of the first rank were Overberg (d. 1826), Salzer (d. 1832), Gruber (d. 1835), and Hirscher (d. 1863), all of whom advocated the psychological method and the curricular preparation of teaching. Deharb's "Catechisme" (1847) was translated between 1853 and 1860 into thirteen languages, and his "Erklärungen des Katechismus" (1857-61) has passed through numerous editions. In France, Napoleon (1806) imposed upon all the churches of the empire uniformity in the matter of catechisms and, in spite of the opposition of Pius VII, published the "Imperial Catechism", containing a chapter on duties towards the emperor. This was replaced after the fall of the empire by a large number of diocesan catechisms which again led to various plans for securing uniformity. Dupanloup, one of the foremost critics, advocated the "Catechisme chrétien" in 1865. At the time of the Vatican Council (1869-70) the question of having a single universal catechism was discussed. There was great diversity of opinion among the Fathers, and consequently the discussion led to no result (see Martin, "Les travaux du concile du Vatican", pp. 113-115). The arguments for and against the project will be examined when we come to speak of catechisms in the third part of this article. The most important event in the recent history of catechetics has been the publication of the Encyclical "Acerbo nimis" on his doctrine of Christ (15 April, 1870). In this document Pope X advocates the most religious crisis to the widespread ignorance of Divine truth, and lays down strict regulations concerning the duty of catechizing (see below). For the purpose of discussing the best methods of carrying out these orders a number of catechetical congresses have been held: e.g., at Munich, 1905 and 1907; Vienna, 1905 and 1908; Salzburg, 1906; Lucerne, 1907; Paris, 1908, etc. At these gatherings scientific, yet practical, lectures were delivered, demonstrations were given of actual catechizing in school, and an interesting feature was the publication of much literature and a large list.

Two periodicals have likewise appeared: "Katachtische Blätter" (Munich) and "Christlich-pädagogische Blätter" (Vienna).

In the United States, the few priests who in the early days toiled in this vast field were so overburdened with work that they could not produce original textbooks for religious instruction; they caused to be reprinted, with slight alterations, books commonly used in Europe. Others were composed in the manner described by Dr. England, first Bishop of Charleston, who, in 1821, published a catechism which, he wrote, had had much labor and care, containing from various sources and adding several parts which I consider necessary to be explicitly dwelt upon under the peculiar circumstances of my diocese. The first to edit a catechism, so far as is known, was the Jesuit Father Robert Molyneux, an Englishman by birth and a man of extensive learning, who, till 1809, laboured among the Catholics in Maryland and Pennsylvania. Copies of this work are not known to exist now, but, in letters to Bishop Carroll, Father Molyneux mentions two catechisms which he issued—one in 1785, "a spelling primer for children with a Catholic catechism attached". In 1788 a catechism was published in New York which in all likelihood was a reprint of "Butler's Catechism" mentioned above. Bishop Hay's "Abridgment of Christian Doctrine" (152 pp.) appeared in Philadelphia in 1800; another edition (143 pp.) in 1803.
and one with some alterations in the language in Baltimore in 1809 (108 pp.). Many editions were published of the catechism entitled "A Short Abridgement of Christian Doctrine, Newly Revised for the Use of the Catholic Church in the United States of America". The entire book is from 36 to 48 pages. One edition, with title page torn, bears on the last page the record: "Bought September 14, 1794." The Philadelphia edition of 1796 is styled the thirteenth edition; that of Baltimore, 1798, the seventeenth. Whether all these editions were printed in America, or some of the earlier ones in Europe, cannot be ascertained.

This "Short Abridgement of Christian Doctrine," approved by Archbishop Carroll, was generally used throughout the United States until about 1821. In that year Bishop England published his catechism for his own diocese, and in 1825 appeared the "Catechism of the Diocese of Bardstown," recommended as a class-book by Bishop Flaget of Bardstown, Kentucky. The author of the latter catechism was Jean-Baptiste David, coadjutor of Bishop Flaget. It comprised the "First or Small Catechism for Little Children" (13 pp.), and "Second Catechism" (149 pp.). The English was criticized by Archbishop Marshael and others. Still more defective and inexact in language was the catechism of Bishop Conwell of Philadelphia, and, at the request of the archbishop, the author suppressed the book. An old English catechism, the "Abridged of Christian Doctrine," by Hennepin, and Berville, first published at Douai in 1649, was reprinted in New York in 1833. Whereas this edition preserved the quaint old language of the original, another edition of the same book appeared in Philadelphia, as "revised by the Right Rev. James Doyle and prescribed by him for the united dioceses of Kildare and Leighlin" (Ireland). In the New England States the "Boston Catechism" was used for a long time, the "Short Abridgement of Christian Doctrine," newly revised and augmented and authorized by Bishop Fenwick of Boston. But the catechisms which were used most exclusively during several decades were Butler's "Larger Catechism" and "Abridged Catechism." In 1788 Samuel Campbell, New York, published "A Catechism for the Instruction of Children. The Seventh Edition with Additions, Revised and Corrected by the Author." This seems to be the first full-size edition of this catechism (1852) appointed by the Provincial Council of Canada (1851) prescribed it for the English-speaking Catholics of the Dominion. Some other American catechisms may be briefly mentioned: the so-called "Dubuque Catechism" by Father Hattenberger; the Small and the Larger Catechism of the Jesuit missionary, Father Weigner (1866); and the French catechism, the Redemptorist Father Muller (1874). For more extensively used than these was the English translation of Deharbe. From 1869 numerous editions of the small, medium, and large catechisms, with various minor revisions, were published in the United States. An entirely new and much improved edition was issued in New York in 1901.

Repeated efforts have been made in the United States towards an arrangement by which a uniform textbook of Christian Doctrine might be used by all Catholics. Early as 1829, the First Provincial Council of Baltimore decreed: "A catechism shall be written which is better adapted to the circumstances of this Province; it shall give the Christian Doctrine as explained in Cardinal Bellarmine's Catechism, and when approved by the Holy See, it shall be published for the common use of Catholics" (Deer. xxxiii). The clause recommending Bellarmine's Catechism as a model was added at the special request of the Congregation of Propaganda. It may be mentioned here that Bellarmine's "Small Catechism," Italian text with English translation, was published at Boston, in 1853. The wish of the bishops was not carried out, and the First and Second Plenary Councils of Baltimore (1852 and 1866) repeated the decree of 1829. In the Third Plenary Council (1884) many bishops were in favour of "revised" editions of Butler's Catechism, but finally the matter was given into the hands of a committee of six bishops. At last, in 1885, was issued "A Catechism of Christian Doctrine, Prepared and Enjoined by Order of the Third Council of Baltimore." Although the council had desired a catechism "perfect in every respect" (Acta et Deer., p. 219), theologians and teachers criticized several points (Nelles, "Commentaria," II, 205, 1858). Soon various editions came forth with additions of word-meanings, explanatory notes, some even with different arrangements, so that there is now a considerable diversity in the books that go by the name of Catechism of the Council of Baltimore. Besides, in the meantime, a few new catechisms have been published, "one or two a decided improvement" (the Council Catechism) (Messer, "Spirago's Method," p. 553). Among the recent catechisms are the two of Father Faerber, the large and small catechisms of Father Groenings, S. J., and the "Holy Family Series" by Father and Mother Butler, of the Diocese of Boston (1902). The three graded catechisms of this series give on the left page the questions and answers, on the right the "Reading Lesson," dealing in fuller, and connected, form with the matter contained in the questions and answers. Some very practical questions and answers, appropriate hymns, and pictorial illustrations) mark the "Text-books for Parochial and Sunday Schools," edited since 1898 by Father Yorks. These last two series to some extent depart from the traditional method and indicate a new movement in catechetical teaching. A more radical change in the style of the catechism, namely the complete abandonment of the question-and-answer method, has recently been proposed (see below, under II and III of this article, and "Am. Eccle. Rev.," 1907: Jan. and Feb., 1908). The First Plenary Council of Balti-
more (1854) decreed that the catechism to be issued by its order should be translated into the languages of those parishes in which religious instruction is given in any other than the English tongue. But the translation of the council catechism met with little favour. Another regulation, however, enacted in the same decree of the council (1866) was gradually carried into effect. The bishops assembled expressed an earnest desire that in schools where English was not used the Christian Doctrine should be taught not only in the foreign tongue there used, but also in English. Undoubtedly this was the true provision. For the young people in the second or third generation find it difficult to understand the native language of their parents; hearing discussions or attacks on their religion, they are hardly able to answer if they have not learnt the catechism in English. Moreover, after leaving school many young people have to live among people who do not understand English. The bishops assembled expressed an earnest desire that in places where there is no congregation of their own nationality; if they have not been taught religion in English they are tempted not to attend sermons, they feel embarrassed in going to confession, and thus may gradually drift away from the Church. In order to obviate these dangers, various catechisms (Deharbe,
Faerber, Groenings, etc.) have been published with German and English texts on opposite pages. Similarly, there are Polish-English, Bohemian-English, and other editions with double text. In most Italian schools catechism is taught chiefly in English, and only the children in every parish would receive a change of language in catechetical teaching. The introduction of the English language in the United States was done early, but it would be equally injudicious to artificially retard the natural development. The slow but steady tendency is towards the gradual adoption of the English language in preaching and teaching catechism, and it seems but reasonable to think that some day there will be only English in the schools of the Catholic Church in the United States. The English language is the language of the United States, but it is in its external form and language.

A number of German immigrants entered Pennsylvania about 1700, a considerable portion of them being Catholics. In 1750 the German Catholics in Philadelphia outnumbered those of the English tongue, and in 1789 they opened the church of the Holy Trinity, the first exclusively national church in the United States. Since 1741 German Jesuits have ministered to the spiritual needs of their countrymen, and Catholic schools have been established in the Pennsylvania settlements. It was natural that in such a place the example should introduce the Catechism of Canisius, which for centuries had been universally used throughout Germany. The best known American edition of this famous catechism is that printed in Philadelphia, in 1810: "Catholischer Catechismus, worin die Katholische Lehre in der form und Geordnung dieser fünf Hauptbegriffe: V. P. F. von Canisius, aus der Gesellschaft Jesu, erklärt wird." The author or editor of this book was Adam Britt, pastor of the Holy Trinity Church, Philadelphia, who died at Conecuh (1822) as a member of the Society of Jesus. During several decades the Catechism of Canisius was the one used by the German Catholics in the United States. The Redemptorists came to this country in 1833 and soon had charge of flourishing German parishes in nearly all the more important cities. The Venerable John N. Neumann, afterwards Bishop of Philadelphia, wrote while pastor of the Redemptorist house at Pittsburgh, about the year 1846, a small and a large catechism. These texts, also known as the "Redemptorist Catechisms," had a wide circulation, whereas those written later by Father Weininger, S. J., and Father Muller, C. Ss. R., never became popular. The second half of the nineteenth century may be called the era of Deharse's Catechism. In 1850 the "Katholischer Katechismus der Lehrbegriffe" was issued in Cincinnati, which by this time had become a centre of German Catholic population with flourishing parochial schools. Bishop Purell declares in the preface that the German catechisms previously published were not reprinted, but that this "Regensburg [Ratisbon] Catechism, long in use in Germany," was to be the only one in his diocese. Although the name of the author was not given, it was in reality Father Deharse's "Large Catechism." Since that time numerous editions of the different catechisms of Deharse appeared with various adaptations and modifications, and for nearly fifty years Deharse reigned supreme. This supremacy has been challenged within the last two decades. Father Muller, C. Ss. R., in the preface to his catechism, severely criticized Deharse's as a book "which it is difficult for children to learn and to understand." Father Faerber, who devoted forty years to catechetical instruction, produced in 1895 a textbook which commends itself by its simplicity and clearness, although the critics, who charged it with incompleteness and a certain lack of accuracy, were not altogether wrong. Almost contemporaneously with Father Faerber's book appeared an excellent, thoroughly revised, edition of Deharse's texts, from which many defects had been expunged. Finally, in 1900, Father Groenings, S. J., published two catechisms, a small and a large one.

Development of Catechizing after the Council of Trent.
—Mindful that the work of catechizing was more important than the issue of catechisms, the Council of Trent decreed that "the bishops shall take care that on at least the Lord's day and other festivals the children shall be removed from the schools to hear the catechisms of the faith and obedience to God and their parents" (Sess. IV, De Ref., c. iv.). In 1560 the Confraternity of Christian Doctrine was founded in Rome by a Jesuit, and was approved by St. Pius V in 1571. St. Charles Borromeo in his provincial synods laid down excellent rules for teaching: every Christian was to know the Lord's Prayer, the Hail Mary, the Creed, and the Ten Commandments; confessors were ordered to examine their penitents as to their knowledge of these formularies (V Proc. Concil., 1579). He also established schools in the villages, in addition to increasing the number in the towns. Besides the renewed activity of the older orders, the Jesuits, the Barnabites, and the Clerks Regular of Pious Schools (Piarists), who devoted themselves to the education of the young, took special care of the religious instruction of those entrusted to them. In this connexion three names are especially worthy of mention. St. Vincent de Paul, St. Ignatius of Loyola, and St. Francis de Sales. One of St. Francis's first acts as a bishop was to organize catechetical instruction throughout his diocese, and he himself took his turn with his canons in this holy work. St. Vincent founded his congregation of Priests of the Mission for the purpose of instructing the poor, especially in the villages. The missionaries were to teach the catechism twice a day during each mission. In his own parish of Châtillon he established the Confraternity for the Assistance of the Poor, and one of the duties of the members was to instruct as far as to give material aid. So, too, the Sisters of Charity not only took care of the sick and the poor but also taught the children. M. Olier, both in the seminary and in the parish of Saint-Sulpice, laid special stress on the work of catechizing. The method which he introduced will be described in the second part of this article. The Brothers of the Christian Schools, founded by St. Jean-Baptiste de la Salle, devoted themselves especially to religious as well as secular instruction. Finding that the very poor were unable to attend school on weekdays, the saintly founder introduced secular lessons on Sundays. This work was given in Protestant England.

II. Practical Catechetics.—Catechizing (catechesis), as we have seen, is instruction which is at once religious, elementary, and oral.

Catechizing is a religious work not simply because it treats of religious subjects, but because its end or object is religious. The teacher should endeavour to influence the child's heart and will, and not be content with putting a certain amount of religious knowledge into its head; for, as Aristotle would say, the end of catechizing is not knowledge, but practice. Knowledge, indeed, there must be, and the more of it the better in this age of widespread secular education, but the knowledge must lead to action. Both teacher and child must realize that they are engaged in a religious work, and not in one of the ordinary lessons of the day. It is the neglect to realize this that is responsible for the little effect produced by long and elaborate teaching. Religious knowledge comes to be looked upon by the child merely as a branch of other knowledge, and having as little to do with conduct as the study of vulgar fractions. "When the child is fighting its way through the temptations of the world, it will have to draw far more largely on its stock of pieté than on its store of knowledge." (Pius IX, "Sunday Schools, Catechism?)." "The work of a teacher in the Church will be directed chiefly to this, that the faithful earnestly desire 'to know Jesus Christ and Him crucified,' and that they be firmly convinced and with
the innermost piety and devotion of heart believe, that 'there is no other name under heaven given to men whereby we must be saved,' for He is the propitiation for our sins. But as in this do we know that we have known Him, if we keep His commandments, the Apostolate is intimately connected with the foregoing, is to show that life is not to be spent in ease and sloth, but that we 'ought to walk even as He walked,' and with all earnestness 'pursue justice, godliness, faith, charity, mildness;' for He 'gave Himself for us that He might redeem us from all iniquity, and purify unto Himself a people to be His own, having taken nothing works;' which things the Apostle commands pastors to 'speak and exhort.' But as our Lord and Saviour has not only declared, but has also shown by His own example, that the Law and the Prophets depend on love, and as also, according to the confirmation of the Apostle, 'the end of the commandments and the fulfilment of the Law is charity, no one can doubt that this, as a paramount duty, should be attended to with the utmost assiduity, that the faithful people be excited to a love of the infinite goodness of God towards us; that, inflamed with a sort of divine ardour, they may be powerfully attracted to the supreme and perfect good, to seek to whom 'true happiness' (Catech. of the Council of Trent, Pref., x).

The persons concerned in catechizing (teachers and taught) and the times and places for catechizing can hardly be treated apart. But it will be best to begin with the persons. The duty of providing suitable religious instruction for children must be laid on parents, and their parents, who this they may fulfill either by teaching them themselves or by entrusting them to others. Next to the natural parents the godparents have this duty. The parish priest should remind both the parents and godparents of their obligation; and he, too, as the spiritual father of those entrusted to his care, is bound to instruct them. In Pius X's Encyclical Letter on the teaching of Christian doctrine it is enacted "(1) that all parish priests, and in general, all those entrusted with the care of souls, shall on every Sunday and fast day throughout the year, without exception, give boys and girls an hour's instruction from the catechism on those things which every one must believe and do in order to be saved; (2) at stated times during the year they shall prepare boys and girls by continued instruction, lasting several days, to receive the sacraments of penance and Holy Communion; (3) they shall likewise and with special care on all the weekdays in Lent, and if necessary on other days after the feast of Easter, prepare boys and girls by suitable instruction and exhortations to make their first Communion in a holy manner; (4) in each and every parish the society, commonly called the Confraternity of Christian Doctrine, shall be canonically erected; through this the parish priests, especially in the places where there is a scarcity of priests, will have lay helpers for the catechistical instruction in pious lay persons who will devote themselves to the office of teaching." In countries where there are Catholic schools religious instruction is given on weekdays either before or after the secular instruction. As is well known, for the sake of this privilege the faithful have contributed enormous sums of money to build and support schools. Where this is the case the difficulty is lessened. Nevertheless, if the civil Council of Westminster warns the pastor not to make over this duty of catechizing "so far to others, however good or religious they may be, as not to visit the schools frequently and instil into the tender minds of youth the principles of true faith and piety." We see, however, that the work of giving religious instruction belongs to the parents, to priests with the care of souls, to the teachers in Catholic schools, and to other lay helpers.

Turning now to those who are to be taught, we may consider first the young and then those who are grown up. The young may be divided into those who are receiving elementary education (primary scholars) and those who are more advanced (secondary scholars). Although in many dioceses the scholars are arranged in classes corresponding to the secular classes, it is possible for us to consider them separately. We may consider the instruction given in the catechism divided into three groups: those who have not been to confession; those who have been to confession but have not made their first Communion; and those who have made their first Communion. In the case of the first group the instruction must be of the most rudimentary kind; but, as already pointed out, this does not mean that the little ones should not be taught the first part of some catechism; they should have the Creed and the Commandments, the Our Father and the Hail Mary, explained to them, together with the forgiveness of sin by the Sacraments of Baptism and Penance. The principal events in the life of Christ will be found to be an ever-interesting subject for them. How far it is wise to talk to them about Creation and the Fall, the Deluge and the stories of the early patriarchs, may be a matter of discussion among teachers. In any case great care should be taken not to give them any notions which they may afterwards have to oppose. It is of importance that the children in the simplest language something about the services of the Church, for they are now beginning to be present at these. Any one who has charge of them there, or, better still, who will recall his own early memories, will understand what a hardship it is to a child to be told that a Mass is a holy Mass. The second group (those preparing for first Communion) will of course be able to receive more advanced instruction in each of the four branches mentioned above, with special reference to the Holy Eucharist. In instructing both groups the subjects should be taught dogmatically, that is, with a view to having the children to the latter's faith rather than to their reasoning powers. The After-communion instruction of elementary scholars will be almost similar to the instruction given to younger secondary scholars, and will consist in imparting wider and deeper knowledge and insisting more upon proofs. When they grow up their difficulty will be not only the observance of the law, but the reason of it. They will ask not only, What must I believe and do? but also, Why must I believe it or do it? Hence the importance of thorough instruction in the authority of the Church, Scripture texts, and also appeals to right reason. This brings us to the subject of catechizing grown-up persons. Pius X goes on to speak of this matter, after laying down the regulations for the young: "In these days adults not less than the young stand in need of religious instruction. All parish priests, and others having the care of souls, in addition to the homily on the Gospel delivered at the parochial Mass on all days of obligation, shall explain the catechism for the faithful in an easy style, suited to the intelligence of their hearers, at such time of the day as they may deem most convenient for the people, but not during the hour in which the children are taught. In this instruction they shall make use of the Catechism of the Council of Trent; and they shall order it that the whole matter of the Creed, the Sacraments, the Decalogue, the Lord's Prayer, and the Precepts of the Church shall be treated in the space of four years or five years."

The subjects to be treated of are laid down by Pius X: "As the things divinely revealed are so many and so various that it is no easy task either to acquire a knowledge of them, or, having acquired that knowledge, to retain them in the memory, . . . our preachers have very wisely divided this study into a simple and methodical scheme of saving doctrine to these four distinct heads: the Apostles' Creed; the Sacraments; the Ten Commandments; and the Lord's Prayer. In the doctrine of the Creed are contained all things which are to be held according to the discipline of the Catholic Faith,
The doctrine of the Seven Sacraments comprehends the signs and as it were the instruments of grace by which we may... the Decalogue is laid down whatever has reference to the Law, 'the end whereof is charity.' Finally, in the Lord's Prayer is contained whatever... and a matter of observation by a Christian man" (ib., xii.). It must be borne in mind that catechetical instruction should be elementary; but this of course is a relative term, according as the pupil is an adult or a child. This difference has been dealt with above in speaking of the persons concerned in catechizing. It may be pointed out here, however, that elementary knowledge is not the same as partial knowledge. Even young children should be taught something of each of the four divisions mentioned above, viz., that they have to believe in God and to do God's will, and to obtain His grace by means of prayer and the sacraments. Further instruction will consist in developing each of these heads. Besides what is ordinarily understood by Christian doctrine, catechizing should treat of Christian history and Christian worship. Christian history will include the story of the Old Testament, the New Testament, and the Church. Christian worship will include the Church's calendar (the festivals and fasts) and her services and devotion. These—doctrine, history, and worship—are not altogether distinct, and may often be best taught together. For example, the second article of the Creed may be brought out the doctrine of the Incarnation, the beautiful story of Christ's birth and childhood, and the meaning and the services of Advent and Christmas. The Bible history and the history of the Church will afford countless instances bearing on the various doctrines and heroes of the doctrinal part of the catechism, and the virtues and contrary views of the practical part.

The question of catechetical methods is difficult and has given rise to much controversy. Father Furniss long ago, in his "Sunday School or Catechism?" and Bishop Bellord later on, in his "Religious Education and its Failures," passed a wholesale condemnation on our present method, and attributed to it the falling away of so many Catholics from the Faith. "The chief cause of the 'leakage' is the imperfection of our systems of religious instruction. Those methods seem to be antiquated, injudicious, wasteful, sometimes positively injurious to the cause" (Bp. Bellord, op. cit., p. 7). Part of the blame is laid upon catechizing, and part upon the catechisms. Of the latter we shall speak presently. Again, the blame is twofold and is not altogether consistent. The children are declared not to know their religion, or, knowing it quite well, not to put it into practice. In either case they are of course lost to the Church when they grow up. Both the bishop and the Redemptorist complain that religious instruction is made a task, and so fails either to be learnt at all, or, if it be learnt, it is learnt in such a way as to make it hateful to the children and to have no bearing on his conduct in after-life. Both are especially severe on the attempt to make the children learn by heart. The bishop quotes number of experienced missionary priests who share his views. It seems to us that, in considering the methods of catechizing, we have to bear in mind two very evident facts. In some countries religious instruction forms part of the daily curriculum, and is mainly given on weekdays by trained teachers. Where this is the case it is not difficult to secure that the children shall learn by heart some official textbook. With this as a foundation the priest (who will by no means restrict his labours to Sunday work) will be able to explain and illustrate and enforce what they have learnt by heart. The teachers' business will be chiefly to put the catechism into the child's head; the priest must get it into the child's heart. Very different is the view of Father Furniss and Bishop Bellord are dealing with. Where the priest has to get together on a Sunday, or one day in the week, a number of children of all ages, who are not obliged to be present; and when he has to depend upon the assistance of lay persons who have no training in teaching method it is obvious that he should do his best to make the instruction as simple, as interesting, and as devotional as possible. As in other branches of instruction we may follow either the analytical or the synthetical method. In the former we take a textbook, a catechism, and explain it word for word to the scholar and make him commit it to memory. The book is of prime importance; the teacher occupies quite a secondary place. Though it might convey a wrong impression to call this the Protestant method, yet it is in exactly in accordance with the Protestant system of religious teaching generally. The written, printed words (Bible or Catechism) are the basis of this method. If the synthetical method, on the other hand, puts the teacher in the forefront. The scholars are bidden to look up to him and listen to his voice, and receive his words on his authority. "Faith cometh by hearing." After they have thoroughly learnt their lesson in this way, a book may be the written word explained to them and committed to memory, as containing in a fixed form the substance of what they have received by word of mouth. Whatever may be said of the relative advantages of the two methods in the teaching of secular subjects, there can be no doubt that the synthetic method is the proper one in catechetical instruction. The office of catechizing belongs to the Church's magisterium (teaching authority), and so is best exercised by the living voice. "The lips of the priest shall keep knowledge, and they shall seek the law at his mouth" (Mal. ii, 7).

(a) The Subjunctive Method of catechizing is celebrated throughout the world, and has produced wonderful fruits wherever it has been employed. We cannot, therefore, do better than give a short account of it here.

The whole catechism consists of three principal exercises and three principal facts. The facts are: (1) the recitation of the letter of the catechism, with an easy explanation of it by way of question and answer; (2) the instruction; (3) the reading of the Gospel and the homily. The secondary exercises are: (1) the admonitions from the head catechist; (2) the hymns; (3) prayers. These should be interspersed with the former. The duration fixed by St. Francis de Sales for a complete catechism is two hours. The place should be the church, but in a separate chapel rather than in the body of the church. Great importance is attached to the "game of the good mark" (le jeu du bon point) and the analogous "game of the bad mark." The catechist is to select the child who has answered best in the first part (the questioning on the catechism), and putting him a series of short, clear, and definite questions upon the matter in hand, and doing this as a sort of challenge to the child. The other children are roused to interest at the notion of a contest between the catechist and one of themselves, and this gives occasion for a better understanding of the subject under treatment. If the child is considered to have won, he receives a small card of reward (le bon point). "For the success of the game of the bon point it is important to put the cards beforehand and to write down the questions which are to be put to the children and the answers. These should be made to write out a short account of the instruction given after the questioning. These analyses should be corrected by the teacher, and a mark ("fair", "good", "very good")
DOCTRINE

should be attached to each. In order to secure regular attendance, registers should be carefully kept, and rewards (pictures, medals, etc.) should be given to those who have not missed a catechism. Treats and feasts should also be given. The spirit of emulation should be encouraged both by attendance and by answering and analyses. Various minor offices should be conferred upon the best children. Punishment should very seldom be resorted to.

Though the Sulpician method insists upon a thorough knowledge of the letter of the catechism, it is clear that the teacher is of paramount importance rather than the book. Indeed, the success or failure of the catechism may be said to depend entirely upon him. It is he who has to do the questioning and give the instruction and the homily on the Gospel. Unless he can keep the attention of the children fixed upon him, he is bound to fail. Hence, the greatest care should be taken in selecting and training the catechists. These are sometimes seminarians or nuns, but lay persons must often be taken. By far the larger portion of "The Method of Saint Sulpice" is devoted to the instruction of the catechists (cap. iv, "Of the instruction of the children"; cap. v, "Of the sanctification of the catechism"; vi, "Of the necessity of making the catechism pleasant to the children, and some means for attaining this object"; cap. viii, "How to turn the catechism into exercises of emulation"; cap. vii, "How to maintain good order and ensure the success of the catechisms".)

So far the "Method" has dealt with the catechisms generally. Next comes the division of the catechisms. These are four in number: the Little Catechism, the First-Communion Catechism, the Weekday Catechism, and the Catechism of Perseverance. The Weekday Catechism is the only one which requires any explanation. A certain time before the period of first Communion a list is made out of such children as are to be admitted to the Holy Table, and these are prepared by more frequent exercises, held on weekdays as well as on Sundays. As a rule, only children who have attended for twelve months are admitted to the weekday catechisms, and the usual age is twelve years. The weekday catechism is held on two days of the week and for about three months. The order is much the same as that of the Sunday catechism, except that the Gospel and the homily are omitted. The catechism is examined twice during the weekday catechisms: the first time about the middle of the course; the second, a week before the retreat. Those who have often been absent without cause or who have answered badly, or whose conduct has been unsatisfactory, are rejected.

A complete account of the method will be found in "The Method of Saint Sulpice" (Tr.), and also in "The Ministry of Catechising" (Tr.) by Mgr. Dupanloup.

(b) The Munich Method.—In 1898 Dr. A. Weber, editor of the "Katechetische Blätter" of Munich, urged the adoption of the Hart- Zeller system of teaching Christian doctrine. This system requires, "first, a division of the catechetical matter into strict methodical units, so that those questions are co-ordinated which are essentially one. Secondly, it insists on a methodical following of the three essential steps, viz., Presentation, Explanation, and Application— with a short Preparation before Presentation, then Combination after Explanation, as more or less non-essential points. It therefore never begins with the catechetical questions, but always with an objective Presentation—in the form of a story from life or the Bible, a cauliflower, a bluebell picture, a general picture, a special picture, a picture of the liturgy, church history, or the lives of the saints, or some such objective lesson. Out of this objective lesson only will the catechetical concepts be evolved and abstracted, then combined into the catechism answer and formally applied to life. These catechists aim at capturing the child's interest from the start and preserving his good-will and attention throughout." (Amer. Eccl. Rev., March, 1908, p. 342). "Preparation turns the attention of the pupil in a definite direction. The pupil hears the lesson-aim in a few well-chosen words. At this stage of the process, the pupil's ideas are also corrected and made clearer. Presentation gives an object-lesson. If at all possible, use one such object only. There are sound psychological reasons for this, although it becomes occasionally useful to employ several. Explanation might also be called concept-formation. Out of the objective lesson are here constructed, or evolved, the catechetical concepts. From the concrete objective presentation we here pass to the general concept. Combination gathers all the ideas derived from the lesson into the text of the catechism. Application finally strengthens and deepens the truths we have gathered and variously widens them for purposes of life. We can here insert further examples, give additional motives, apply the lessons to the actual life of the child, train the child in judging his own moral conduct, and end with some particular resolution, or an appropriate prayer, song, hymn, or quotation." (Amer. Eccl. Rev., April, 1908, p. 465).

In Munich, too, there is an excellent lesson on "Sin," drawn up on the lines of the Munich Method. Further information will be found in Weber's "Die Münchener katechetische Methode" and Götter's "Der Münchener Katechetische Kurs," 1905.

III. MODERN CATECHISMS.—When speaking of the history of catechetics we saw that, though the method was originally and properly oral, the custom soon set in of giving the catechism in a short manual of elementary religious instruction, usually by means of questions and answers. A catechism is of the greatest use both to the teacher and the scholar. To the teacher it is a guide as to the subjects to be taught, the order of dealing with them,
and the choice of words in which the instruction should be conveyed; above all, it is the best means of securing uniformity and correctness of doctrinal and moral teaching. The use which the teacher should make of it must be understood in connexion with what has been said about the method of catechizing. The scholastical a catechism gives in a brief form a summary of what the teacher has been imparting to him; and by committing it to memory he can be sure that he has grasped the substance of his lesson. As already observed, this is not a difficult matter where there are Catholic schools under trained expert teachers accustomed to instructing the children where the teaching has to be done in evening or Sunday schools by inexperienced persons, and the scholars are not under the same control as in the day schools, the portions to be committed to memory must be reduced to a minimum.

A good catechism should conform strictly to the definition given above. That is to say, it should be elementary, not a learned treatise of dogmatic, moral, and ascetical theology; and it should be simple in language, avoiding technical expressions as far as consistent with accuracy. Should the form of question and answer be maintained? No. It is not an interesting form for grown-up persons; but children prefer it because it lets them know exactly what they are likely to be asked. Moreover, this form keeps up the idea of a teacher and a disciple, and so is most in conformity with the fundamental notion of catechizing. What form should the answers take? Each should be an exact and unambiguous statement—i.e. a matter of disagreement among the best teachers. It would seem that the decision depends on the character of the different languages and nations; some of them making extensive use of the affirmative and negative particles, while others reply in the interrogative form. Scholars of today, like those of Dublin, in his instructions for the revision of the catechism, recommended "the introduction of short reading lessons, one to be appended to each chapter of the catechism. These reading lessons should deal, in some what fuller form, with the matter dealt with in the questions and answers of the catechism. The insertion of such lessons would make it possible to omit without loss many questions the answers to which now impose a heavy burden on the memory of the children... If these lessons are written with care and skill, and in a style attractive as well as simple, the children will have them learned by heart, from the mere fact of repeatedly reading them, and without any formal effort at committing them to memory" (Irish Eccl. Record, Jan., 1892). An excellent means of assisting the memory is the use of pictures. These should be selected with the greatest care; they should be accurate as well as artistic. The catechism used in Venice when Pius X. was patriarch was illustrated.

As there are three stages of catechetical instruction, there should be three catechisms corresponding with these. The first should be very short and simple, but should give the little child some information about all four parts of religious knowledge. The second catechism, for those preparing for first Communion, should embody, word for word, without the slightest change, all the questions and answers of the first catechism. Further questions and answers, dealing with a more extensive knowledge, should be added in their turn. Each stage should have special reference to the sacraments, more particularly the Holy Eucharist. The third catechism, for those who have made their first Communion, should in like manner embody the contents of the first and second catechisms, and add instruction belonging to the third stage mentioned above. For scholars beyond the elementary stages this third catechism may be used, with additions not in the form of question and answer but necessarily to be learnt by heart. The great idea running through all the catechisms should be that the later ones should grow out of the earlier ones, and that the children should not be confused by differently worded answers to the same questions. Thus, the answer to the questions: What is charity? What is a sacrament? should be exactly the same in all the catechisms. Further instruction can be given to the scholastical a catechism gives in a brief form a summary of what the teacher has been imparting to him; and by committing it to memory he can be sure that he has grasped the substance of his lesson. As already observed, this is not a difficult matter where there are Catholic schools under trained expert teachers accustomed to instructing the children where the teaching has to be done in evening or Sunday schools by inexperienced persons, and the scholars are not under the same control as in the day schools, the portions to be committed to memory must be reduced to a minimum.

It was mentioned in the historical portion of this article that at the time of the Vatican Council a proposal was made for the introduction of a uniform catechism for use throughout the Church. As no decision was not carried out, we may here discuss the advantages and disadvantages of a universal catechism. There can be no doubt that the present system of allowing each bishop to draw up a catechism for use in his diocese is open to strong objection. Happily, in these days there is no difficulty on the head of diversity of doctrine. The difficulty arises rather from the importance attached to learning the catechism by heart. People do not nowadays remain stationary in the neighborhood in which they were born. Their children, in passing from one diocese to another, are obliged to unlearn the teaching of one country (the most difficult process) and learn the different wording of another. Even where all the dioceses of a province or country have the same catechism the difficulty arises in passing into a new province or country. A single catechism for universal use would prevent all such waste of time and confusion; besides being a strong bond of union between the nations. At the same time it must be recognized that the conditions of the Church vary considerably in the different countries. In a Catholic country, for instance, it is not necessary to touch upon controversial questions, whereas in non-Catholic countries these are merely discussed. This will possibly be the case with regard to the introduction of texts in the actual words of the Holy Scriptures. Thus, in the Valladolid Catechism there is not a single quotation from the Old or New Testament except the Our Father and the first part of the Hail Mary—and even of these the source is not mentioned. The Commandments are not given in the words of Scripture. There is no attempt to prove any doctrine; everything is stated dogmatically on the authority of the Church. A catechism on these lines is clearly unsuited for children living among Protestants. As already pointed out, the introduction of new catechisms made their first Communion should embrace proof as well as statement. The Fathers of the Vatican Council recognized the difficulty, and endeavoured to meet it by a compromise. A new catechism, based upon Bellarmine's Catechism and other catechisms of approved value, was to be drawn up in Latin, and was to be translated into the different vernaculars with the authority of the bishops, who were empowered to make such additions as they might think fit; but these additions were to be kept quite distinct from the text itself. The unhappy events of the latter part of the year 1870 prevented this proposal from being carried out.

(a) The present pontiff, Pius X., has prescribed a catechism for use in the Diocese of Rome and in its ecclesiastical province, and has expressed a desire that it should be adopted throughout Italy. It has been translated into English, French, Spanish, and German, and a movement has begun with a view to extending its use to other countries besides Italy, especially to Spain, where the conditions are similar. (See "Irish Eccl. Record", March, 1906, p. 221; "Amer. Eccl. Rev.", Nov., 1906). This catechism consists of two parts, or rather two distinct books: one for "lower classes" and one for "higher classes". The term "lowest class catechism", is meant for those who have not made their first Communion; the second, or "Longer Catechism", is meant for those who have already been through the other. Both are constructed on the same lines: an introduc-
tory portion, and then five sections treating in turn of the Creed, Prayer, the Commandments, the Sacraments, the Virtues, etc. The "Longer Catechism" contains, in addition, in catechetical form, an instruction of Our Lord, the Blessed Virgin, and the Saints, and a short "History of Religion" (the Old Testament, the New Testament, and the Church) in the form of a narrative. But though the two catechisms are on the same main lines, they have very little connexion with each other. Hardly any of the questions and answers are the same; so that a knowledge of the wording of one is of little use, but rather an obstacle, in learning the second. It is worthy of note that, though texts of Scripture are not quoted, the second catechism contains a large number of questions and answers relating to the Holy Scriptures, among others the following: "Is the reading of the Bible necessary to all Christians?"-"The reading of the Bible is not necessary to all Christians, because they are taught by the Church; still, the reading of it is very useful and recommended to all." Many of the answers in the second catechism are much longer than those in other catechisms. The catechism itself, without the lengthy instruction on the first page of the "History of Religion," fills more than 200 pages in Bishop Byrne's translation.

(b) Throughout Great Britain only one catechism is officially in use. It was drawn up by a committee appointed by the Second Provincial Council of Westminster, and is based on the Douay-Catholic version. It has undergone several revisions, the last of these being for the purpose of eliminating the particles yes and no, and making all the answers distinct categorically. It is remarkable for its frequent appeal to proofs from Holy Scripture. Though it has been subject to many attacks, it is justly considered to be a clear and logical statement of Catholic belief and practice, fitted to the needs of both children and grown-up persons seeking instruction. Perhaps it has this latter class too much in view, and hence it is sometimes wanting in simplicity. The omission of yes and no and the avoidance of pronouns in the answers have been carried to a pedantic excess. Besides this ordinary catechism there is a smaller catechism, for younger children, which goes over the whole ground in a more elementary form; it is to some extent free from the objection just mentioned; but this advantage of some verbal differences is at the same time a disadvantage, in that the answers of the two catechisms are not always a rigid repetition of the words of the question. Various important improvements have been suggested by Archbishop Walsh (see "Irish Ecc. Record", Jan., 1892, and following numbers). There is also a smaller edition of the Maynooth Catechism. The manuals used in the advanced classes in the Higher Forms have much the same form as those used in Great Britain, together with the "Companion to the Catechism" (Gill). Religious instruction is general.

(For the United States, see above under HISTORY OF CATECHISMS.)

d) The First Provincial Council of Quebec (1852) ordered two catechisms for use in Canada: Butler's Catechism for those speaking English, and a new French catechism for those speaking French. The latter is called "The Quebec Catechism," and is also issued in an abridged form.

e) In Australia the Maynooth Catechism is generally used. But the bishops in the Plenary Council of 1885 decreed that a new catechism should be drawn up for use throughout Australia.

From this enumeration it will be seen how far we are from having any uniform catechism for the English-speaking peoples. In France and in Europe, we find that in France, Germany, and Spain different catechisms are in use in the different dioceses. In the German-speaking provinces of Austria there is one single catechism for all the dioceses, approved by the whole episcopate in 1894. It is issued in three forms: small, middle, and large. All are arranged on exactly the same lines: a short introduction, Faith and the Apostles' Creed, Hope and Prayer, Charity and the Commandments, Grace and the Sacraments, Justification and the Last Things. The middle catechism contains all the questions and answers of the small, with many added, and some of the same questions with fuller answers. The large catechism makes further additions. The small catechism has no texts from Scripture; the other two contain many texts, usually placed in notes at the foot of the page. The chief difference between the middle and large catechisms is that the latter deals more with reasons and proofs, and consequently gives a greater number of Scripture texts. Austria is, therefore, better off than most countries in the matter of the catechism. She has none of the difficulties arising from a multiplicity of manuals, and her single textbook is in the three stages as described above as the ideal for all countries. Schuster's excellent Bible History is also in universal use, and is arranged by means of different type and signs so as to be accommodated to the three stages of the catechism. Religious training in Austria has, however, been severely criticized by Dr. Pichler, a high authority in that country. He considers the catechism as cumbersome, the work of a good theologian but a poor catechist; he advocates the compilation of a new Bible History on the lines of Knecht's manual; and he advocates the adoption of inductive methods. See "Unser Religionsunterricht, seine Mängel und deren Ursachen".

One of the best of the German catechisms is that of the Diocese of Augsburg, mainly the work of Kinsel and Hauser, and published in 1901. It is on the lines of Deharbe, but much simplified, and copiously illustrated. The new Hungarian catechism (1907), which is issued in three editions: one for the first and second grade of elementary schools, one for the remaining four grades, and one for the high schools. Bishop Malachy of Transylvania has had the direction of the work. Poland has not been behind in re-forming her catechetical teaching. A catechism has just been drawn up for the fourth, fifth, and sixth grades by Bishop Likowski and Valentine Gadowski. The answers to be learnt by heart are limited to forty in each year, and are short and simple. Each is followed by a fairly long explanation. This catechism contains 216 illustrations.
It should be noted that all Continental reformers have dropped the idea of making the answers theologically complete. The subsequent explanations supply what may be wanting. The answers are complete sentences, Yes and No being seldom used by themselves, and the order of the words in the answers follows that in the questions.

On catechizing, Methods, etc.: DE FAVNGNE, Method of Catechizing, tr. by E. WALSH, 2d ed. (London, 1907); WALSH, A Manual of Instruction on the Christian Doctrine, chs. 7, 8 (New York, 1901); J. DE GAECHE, Catechizing, 2d ed. (London, 1895); HOWE, The Catechist or Headings and Suggestions for the Explanation of the Catechism (Newcastle-on-Tyne, 1905); SLOAN, The Young School Teacher's Guide to Success (New York, 1907); Amer. Rev., July 1, Jan., May, 1908; WEBER, Die Minderdie Katholische (München, 1899), 2, 1, 5 (1906).

Catechism, Manuals, etc.—It would not be possible to give anything like a complete list of these. We shall content ourselves with mentioning a few of the best known in use in England.

There are many Bible histories in use, but none of them officially recommended, though published with scriptural authority. The Children's Bible for Home and School Use (in small elementary work of which nearly a million and a half have been printed; it is capable of improvement) (London, 1872); FORMBY, Picturesque Bible and Church History Stories, including Old Testament History, the Life of Christ, and Church History (London, 1917); KEIGHT, Bible Commentary for Schools (ed. GLAS); FREIX, DeSCRIPTIO IESOU (London, 1804); WESMANN, Readings from the Old Testament, New Testament, Sacraments, etc. (London, 1877); RICHARDS, Manual of Scripture History (London, 1899); WESMANN, The Catechism, An Aid to the intelligent knowledge of the Catechism (London, 1890); POWER, Catechetical, Doctrinal, Moral, Historical, and Liturgical (5th ed., Dublin, 1909); ANTHONY, MACCLER, A Catechism of the Catechism of the Catholic Church (London, 1901).

Doctrines, Development of. See Revelation.

Doctrine of Addai (Lat. Dogma Addai), a Syrian document which relates the legend of the conversion of Parthia. It begins with the story of the letter sent by Abgar to Christ (see ABGAR) and the reply of the latter, with some variations from the account drawn by Eusebius (Hist. Eccl., i, xiii) from the Edessean archives. The reply was not a letter, as Eusebius says, but a verbal message, together with a portrait of Christ (see EUSEBIUS). In the ascension of Thomas sent Addai, one of the seventy-two disciples, to Abgar. Addai (Thaddeus in Eusebius) healed the king of his sickness, and preached before him, relating the discovery of the True Cross by Pontonius, wife of the Emperor Claudius: this, with all that follows, is later than Eusebius, being founded on the story of St. Helena. Addai then preaches to the people, who are converted. The heathen altars are thrown down, and the people are baptized. King Abgar induces the Emperor Tiberius to chastise the Jews for having crucified the Saviour. Christ appears to the king, and makes deacons and priests. On his death-bed he appoints Agadd his successor, ordains the deacon Palut priest, and gives his last admonitions. He was buried in the sepulchre of the king's ancestors. Many years after his death, Agadd, who ordained holy orders for the first time, was martyred as he taught in the church by a rebellion of his son. Agadd's successor, Palut, was obliged to go to Antioch in order to get episcopal consecration, which he received from Serapion, Bishop of Antioch, who "himself also received the hand from Zephyrion, Bishop of the city of Rome, from the succession of the hand of the priesthood of Simon Cephas, which he received from our Lord, who was then Bishop of Rome twenty-five years, in the days of the Caeur, who reigned there thirteen years" (evidently Nero is meant, who reigned from October, 54, to June, 68). The anxiety of the writer to connect the Edessene succession with Rome is interesting; its derivation from the Petrine See of Antioch does not suffice him.

The doctrine of the book is not unorthodox, though some expressions might be understood in an Apollinarian sense. The mention of Holy Scripture must be noticed: "They read in the Old Testament and the New, and the Prophets, and the Acts of the Apostles, every day they meditated on them," "a large number of people assembled day by day and came to the prayer of the service, and to [the reading] of the Old and New Testament, of the Diatessaron"; "But the Law and the Prophets and the Gospel, which ye read every day before the people, and the Epistles of Paul, which Simon Peter sent us from the city of Rome, and the Acts of the twelve Apostles, which John, the son of Zebedee, sent us from Ephesus, these books read ye in the Churches of Christ, and with these read not any other, as there is not any other in which the truth that ye hold is written, except these books, which retain you in the faith to which ye have been called." The canon therefore excludes the Apocalypse and all the Catholic Epistles; in this it agrees with Aphraates, Theodore of Mopsuestia, the Syriac stichometrical list of Cod. Sin. 10 (in Mrs. Lewis's Catalogue of Sinai MSS.), and probably the Church, indeed, never accepted the Apocalypse and the four shorter 'catholic' Epistles; the three longer were admitted at all events later than 400, at an uncertain date. The Diatessaron was employed by the Syriac Church from its composition by Tatian c. 160 until it was proscribed by the famous Bishop of Edessa, Rabbbula (d. 435).

We seem to find firm historical ground in the statement that Paulus was consecrated bishop by Serapion, who was Bishop of Antioch c. 191-212 and really a deputy or papacy of Pope Zephyrion. But this shows that Addai, who made Paulus bishop, was not a priest of the seventy-two Disciples of Christ. The first Christian King of Edessa was in reality Abgar IX (179-214) who was converted soon after 201, and this date tallies with that of Paulus. It is possible that Paulus was the first Bishop of Edessa; but it is surely more likely that there was already a Church and a bishop under the pagan kings in so important a city. An early date for the Abgar legend is sometimes based upon the promise in the message of Christ: "Thy city shall be blessed, and no enemy shall again become master of it for ever." It is argued that this could not have been invented after the sackings of the city of Edessa in 116; but the writer might have passed over this event after a century and a half. The confusion of dates can hardly have arisen before the latter half of the third century, and the Edessean Acts used by Euse-
DOCTRINE

The "Doctrine of Addai" is yet later. The finding of the Cross must be dated some time later than St. Helena; the miraculous picture of Christ was not seen by the Abbess, either when she visited Edessa c. 385. Hence the date of the work may be c. 400.

The "Doctrine of Addai" was first published in Syriac in a fragmentary form by Cureton, "Ancient Syriac documents" (London, 1864, a posthumous work), with a translation; another translation in "Ante-Nicene Chr. Libr.," XX. The full Syriac text was published with a translation (London, 1876). An Armenian version and (separately) a Persian translation, by the Mechtitar Father Leo Alishan, "Labounia, Lette d’Adbgar" (Venice, 1868).

The literature of the subject (including the Addai legend, the finding of the Cross, the Greek legend in the Acta Thaddaei, and the origins of the Church of Edessa) is very large. The following works may be especially mentioned: L. Chabert, Die edessischen Abgaberegeluntersuchungen (Bruenick, 1886); Tischendorf, Les origines de l’Eglise d’Edesse et de la legende d’Adbgar (1878); M. della Pietra, L’Eglise d’Edesse et des epitaphe syriennes (transl. from Revue des rev. sc. Paris, 1889); Burkitt, Early Eastern Christianity (London, 1904); Nestle, Die synopische Cron (Berlin, 1889); on the picture of Christ, von Dobschütz, Christusbilder (Leipzig, 1899). Further references will be found in Buskitt, Gesell, der altchristl. Lit., I, 435; Chevalier, Repertoire, v. v. Adbgar.

Dogma.—I. Definition.—The word dogma (Gr. δόγμα, from δοέειμι) signifies, in the writings of the ancient classical authors, sometimes, an opinion or that which seems true to a person; sometimes, the public or private doctrines of a person or a school. As a public, distinctive philosophical doctrine, of a particular school of philosophers (cf. Cic. Ac., ii, 9); and sometimes, a public decree or ordinance, as δόγμα ποιοτάτα. In Sacred Scripture it is used, at one time, in the sense of a decree or edict of the civil authority, as in Luke, ii, 1: "And it came to pass, that in those days there went out a decree [edictum, δόγμα] from Caesar Augustus." (Acts, xvii, 7; Esther, iii, 3); at another time, in the sense of an ordinance of the Mosaic Law, as in Exh., ii, 15: "Making void the law of commandments contained in decrees" (δόγμαις)—and again, it is used of the ordinances decreed of the Apostolic Council in Jerusalem: "And as they passed through the cities, they delivered unto them the decrees [dogmata] for to keep, that were decreed by the apostles and ancients who were at Jerusalem." (Acts, xvi, 4). Among the early Fathers the usage was prevalent of designating as dogmas the doctrines and moral precepts taught or promulgated by the Saviour or by the Apostles; and a distinction was sometimes made between Divine, Apostolical, and ecclesiastical dogmas, according as a doctrine was conceived as having been taught by Christ, or by the Apostles, or as having been delivered to the faithful by the Church. But according to a long-standing usage a dogma is now understood to be a truth appertaining to faith or morals, revealed by God, transmitted from the Apostles in the Scriptures or by tradition, and proposed by the Church for the acceptance of the faithful. It might be described briefly as a revealed truth defined by the Church; but private revelations do not constitute dogmas, and some theologians confine the word defined to doctrines solemnly defined by the pope or by a general council, while a revealed truth becomes a dogma when proposed by the Church through her ordinary magisterium or teaching office. A dogma therefore implies a twofold relation: to Divine revelation and to the authoritative teaching of the Church.

Theologians distinguish three classes of revealed truths: truths formally and explicitly revealed; truths revealed formally, but only implicitly; and truths only virtually revealed. A truth is said to be formally revealed, when the speaker or revealer really means to convey that truth by his language, to guarantee it by the authority of his word. The revelation is formal and explicit, when made in clear express terms. It is formal and explicit only, when it is defined, or in the strict sense, when it is defined with absolute certainty, or when the rules of interpretation must be carefully employed to determine the meaning of the revelation. And a truth is said to be revealed only virtually, when it is not formally got by the word of this revealer, but is inferred from something formally revealed. Now truths formally and explicitly revealed by God are certain dogmas in the strict sense when they are proposed or defined by the Church. Such are the articles of the Apostles’ Creed. Similarly, truths revealed by God formally, but only implicitly, are dogmas in the strict sense when proposed or defined by the Church. Such, for example, are the doctrines of Transubstantiation (q. v.), papal infallibility (q. v.), the Immaculate Conception (q. v.), some of the Church’s teaching about the Saviour, the sacraments, etc. All doctrines defined by the Church as being contained in revelation are understood to be formally revealed, explicitly or implicitly. It is a dogma of faith that the Church is infallible in defining those two classes of revealed truths; and the deliberate denial of one of these dogmas certainly involves the sin of heresy. There is a diversity of opinion about virtually revealed truths, which has its roots in a diversity of opinion about the material object of faith (see Faith). It is enough to say here that, according to some theologians, virtually revealed truths belong to the material object of faith and become dogmas in the strict sense when defined or proposed by the Church; and according to others, they do not belong to the material object of faith prior to their definition, but become strict dogmas when defined; and, according to others, they do not belong to the material object of Divine faith at all, nor become dogmas in the strict sense when defined, but may be called mediately-Divine or ecclesiastical dogmas. In the hypothesis that virtually revealed conclusions do not belong to the material object of faith, it has not been defined that the Church is infallible in defining these truths; the infallibility of the Church, however, in relation to these truths is a doctrine of the Church theologically certain, which cannot lawfully be denied; and though the denial of an ecclesiastical dogma would not be heresy in the strict sense, it could entail the surrender of the bond of faith and expulsion from the Church by the Church’s anathema or excommunication.

II. Divisions.—The divisions of dogmas follow the lines of the divisions of faith. Dogmas can be (1) general or special; (2) material or formal; (3) pure or mixed; (4) symbolic or non-symbolic; (5) they can differ according to their various degrees of necessity.—

(1) General dogmas are a part of the revelation meant for mankind and transmitted from the Apostles; while special dogmas are the truths revealed in private revelations. Special dogmas, therefor, strictly speaking, dogmas at all; they are not revealed truths transmitted from the Apostles; nor are they defined or proposed by the Church for the acceptance of the faithful generally.—(2) Dogmas are called material (or Divine) when they are the objects of faith and the origin of faith; when abstraction is made from their definition by the Church, when they are considered only as revealed; and they are called formal (or Catholic, or “in relation to us"), when they are considered both as revealed and defined. Again, it is evident that material dogmas are not dogmas in the strict sense, when abstraction is made from their definition by the Church, when they are considered only as revealed; and they are called formal (or Catholic, or “in relation to us"), when they are considered both as revealed and defined. (3) Pure dogmas are those which can be known only from revelation, as the Trinity (q. v.), Incarnation (q. v.), etc. Mixed dogmas are truths which can be known from revelation or from philosophical reasoning, as the existence and attributes of God.
Both classes are dogmas in the strict sense, when considered as revealed and defined.—(4) Dogmas contained in the symbols or creeds of the Church are called symbolic; the remainder are non-symbolic. Hence all the articles of the Apostles' Creed are dogmatic. Symbolic dogmas are rational and technically real truths of faith, though an ordinary dogma is sometimes spoken of as an article of faith. (5) Finally, there are dogmas of faith in which is absolutely necessary as a means to salvation, while faith in others is rendered necessary only by divine precept; and some dogmas must be explicitly known and believed, while others are not.

III. OBJECTIVE CHARACTER OF DOGMATIC TRUTH; INTELLECTUAL BELIEF IN DOGMA.—As a dogma is a revealed truth, the intellectual character and objective reality of dogma depend on the intellectual character and objective truth of Divine revelation. We will here apply to dogma the conclusions developed at greater length under the heading of revelation (q.v.). Are dogmas, considered merely as truths revealed by God, real objective truths addressed to the human mind? Are we bound to believe them with the mind? Should we admit the distinction between fundamental and non-fundamental dogmas?

(1) Rationalists deny the existence of Divine supernatural revelation, and consequently of religious dogmas. A certain school of mystics has taught that what Christ inaugurated in the world was "a new life." The "Modernist" theory of reason by its results calls for a treatment of the three different shades of opinion among Modernists. There are no such, apparently, any intellectual value to dogma (cf. Le Roy, "Dogme et Critique").

Dogmas, like revelation, they say, is expressed in terms of action. Thus when the Son of God is said "to have come down from heaven," according to theologians He did not come down, as bodies descend as angels are conceived to pass from place to place, but the hypostatic union is described in terms of action. So when we profess our faith in God the Father, we mean, according to M. Le Roy, that we have to act towards God as sons, but not the fatherhood of God, nor the other dogmas of faith, such as the Trinity, the Incarnation, the Resurrection of Christ, etc. imply of necessity any objective intellectual conception of fatherhood, Trinity, Resurrection, etc., or convey any idea to the human mind. Revelation, they say, began as a consciousness of right and wrong; and the evolution or development of revelation was the progressive development of the religious sense until it reached its highest level, thus far, in the modern liberal and democratic State. Then, according to these writers, the dogmas of faith, considered as dogmas, have no meaning for the mind; we need not believe them mentally; we may reject them; it is enough if we employ them as guides for our actions. (See Modernism.)

Over against this doctrine the Church teaches that God has made a revelation to the human mind. There are no doubt, relative Divine attributes, and some of the dogmas of faith may be expressed under the symbolism of action, but they also convey to the human mind a meaning distinct from action. The fatherhood of God He would act towards His children towards a father; but it also conveys to the mind definite analogical conceptions of our God and Creator.

There are truths, such as the Trinity, the Resurrection of Christ, His Ascension, etc., which are absolute objective facts, and which could be believed even if their practical consequences were ignored or were deemed of little value. The dogmas of the Church, such as the existence of God, the Trinity, the Incarnation, the Resurrection of Christ, the sacraments, a future judgment, etc., have an objective reality and are facts as really and truly as it is a fact that Augustus was Emperor of the Romans, and that George Washington was first President of the United States.

(2) Abstracting from the Church's definition, we are bound to render to God the homage of our assent to revealed truths as satisfied with His word. He has spoken. Even atheists admit, hypothetically, that if there be an infinite Being distinct from the world, we should pay Him the homage of believing His Divine word.

(3) Hence it is not permissible to distinguish revealed truths as fundamental and non-fundamental in the sense that some truths, though known to have been revealed by God, may be lawfully denied. While we should believe, at least implicitly, every truth attested by the word of God, we are free to admit that some are in themselves more important than others, more necessary than others, and that an explicit knowledge of some is necessary while an implicit faith in others is sufficient.

IV. DOGMA AND THE CHURCH.—Revealed truths become formally dogmas when defined or proposed by the Church. There is considerable hostility, in modern times, to dogmatic religion when considered as a body of truths defined by the Church, and still more when considered as defined by the Pope. The theory of dogma which is here expounded depends for its acceptance on the doctrine of the infallible teaching office of the Church and of the Roman pontiff. It will be sufficient to notice the following points: (1) the reasonableness of the definition of dogmas; (2) the immutability of dogma; (3) the necessity for Church unity of belief in dogma; (4) the incoherences which are alleged to be associated with the definition of dogmas.

(1) Against the theory of interpretation of Scripture by private judgment, Catholics regard as absolutely unacceptable the view that God revealed a body of truths to the world and appointed no official teacher of revealed truth, no authoritative judge of controversy: this view is as unreasonable as would be the notion that the civil legislature makes laws, and then commits to individual private judgment the right and the duty of interpreting the laws and deciding controversies.

The Church and the supreme pontiff are endowed by God with the privilege of infallibility in discharge of the duty of universal teacher in the sphere of faith and morals; hence we have an infallible testimony that the dogmas defined and delivered to us by the Church are the truths contained in Divine revelation.

(2) The dogmas of the Church are immutable. Modernists hold that religious dogmas, as such, have no intellectual meaning, that we are not bound to believe them mentally, that they may be all false, that it is sufficient if we use them as guides to action; and accordingly they teach that dogmas are not immutable, that they should be changed when the spirit of the age is opposed to them, when they lose their value as rules for a liberal religious life. But in the Catholic tradition that Divine revelation is acting on the human mind and expresses real objective truth, dogmas are immutable Divine truths. It is an immutable truth for all time that Augustus was Emperor of Rome and George Washington first President of the United States. According to Catholic belief, these are and will be for all time immutable truths: that if there are three Persons in God, that Christ died for us, that He arose from the dead, that He founded the Church, that He instituted the sacraments. We may distinguish between the truths themselves and the language in which they are expressed. The full meaning of certain revealed truths has been only gradually brought out; the truths themselves will always remain the same, but we can always learn what meaning was attached to particular words in the past.
(3) We are bound to believe revealed truths irrespective of their definition by the Church, if we are satisfied that God has revealed them. When they are propounded or defined by the Church, and thus become dogmas, we are bound to believe them in order to maintain the bond of faith.

(4) Finally, Catholics do not admit that, as is sometimes alleged, dogmas are the arbitrary creations of ecclesiastical authority, that they are multiplied at will, that they are devices for keeping the ignorant in subjection, that they are obstacles to conversions. Some of these are points of controversy which cannot be settled without reference to more fundamental questions. Dogmatic definitions would be arbitrary if there were no Divinely instituted infallible teaching office in the Church; but if, as Catholics maintain, God has established in His Church an infallible office, dogmatic definitions cannot be considered arbitrary. The same Divine Providence which preserves the Church from error will preserve her from inordinate multiplication of dogmas. She cannot define arbitrarily. We need only observe the life of the Church or of the Roman pontiffs to see that dogmas are not multiplied arbitrarily. And dogmatic definitions are but the authentic interpretation and declaration of the meaning of Divine revelation, they cannot be considered devices for keeping the ignorant in subjection, or reasonable obstacles to conversions; on the contrary, the authoritative definition of truth and error is the surest safeguard of the truth. It is the Church, the Church, the Church, that is the bulwark of the truth.

V. DOGMA AND RELIGION.—It is sometimes charged that in the Catholic Church, in consequence of its dogmas, religious life consists merely in speculative beliefs and external sacramental formalities. It is a strange charge, arising from ignorance of the very nature of Catholic life. Religious life in conventional and monastic establishments is surely not a merely external formality. The external religious exercises of the ordinary Catholic layman, such as public prayer, confession, Holy Communion, etc., suppose careful and serious internal self-examination and self-regulation, and various other acts of internal religion. We need only observe the public, civic life of Catholics, their philanthropic works, their schools, hospitals, orphanages, charitable organizations, to be convinced that dogmatic religion does not convey the atomism of "formalities." On the contrary, in non-Catholic Christians, bodies a general decay of supernatural Christian life follows the dissolution of dogmatic religion. Were the dogmatic system of the Catholic Church, with its authoritative infallible head, done away with, the various systems of private judgment would not save the world from re-lapsing into and following pagan ideals. Dogmatic belief is not the be-all and end-all of Catholic life; but the Catholic serves God, honours the Trinity, loves Christ, obeys the Church, frequents the sacraments, assists at Mass, observes the Commandments, becomes the be-all and end-all of "formalities." On the contrary, in non-Catholic Christians, a general decay of supernatural Christian life follows the dissolution of dogmatic religion. Were the dogmatic system of the Catholic Church, with its authoritative infallible head, done away with, the various systems of private judgment would not save the world from re-lapsing into and following pagan ideals. Dogmatic belief is not the be-all and end-all of Catholic life; but the Catholic serves God, honours the Trinity, loves Christ, obeys the Church, frequents the sacraments, assists at Mass, observes the Commandments, becomes the be-all and end-all of "formalities." On the contrary, in non-Catholic Christians, a general decay of supernatural Christian life follows the dissolution of dogmatic religion. Were the dogmatic system of the Catholic Church, with its authoritative infallible head, done away with, the various systems of private judgment would not save the world from re-lapsing into and following pagan ideals.

VI. DOGMA AND SCIENCE.—But, it is objected, dogma checks investigation, antagonizes independence of thought, and makes scientific theology impossible. This difficulty may be supposed to be put by Protestants or by unbelievers. We will consider it from both points of view.

(1) Beyond scientific investigation and freedom of thought. Dogma, by no means, antagonizes independence of thought, and makes scientific theology impossible. This difficulty may be supposed to be put by Protestants or by unbelievers. We will consider it from both points of view.

DANIEL COGHILAN.
Dogmatic Facts.—(1) Definition.—By a dogmatic fact, in wider sense, is meant any fact connected with a dogma and on which the application of the dogma to a particular case depends. The following questions involve dogmatic facts in the wider sense: Is Pius X, for instance, the legally and truly elected and recognized by the Universal Church? This is connected with dogma, for it is a dogma of faith that every pontiff duly elected and recognized by the Universal Church is a successor of Peter. Again, Was this or that council ecumenical? This, too, is connected with dogma, for the ocumenal council is the one in which infallibility and jurisdiction over the Universal Church. The question also whether canonized saints really died in the odour of sanctity is connected with dogma, for every one who dies in the odour of sanctity is saved. In the stricter sense the term dogmatic fact is confined to books and spoken discourses, and its meaning will be explained by a reference to the condemnation by Innocent X of five propositions taken from the posthumous book of Jansenius, entitled “Augustinus.” It might be asked, for example, whether the pope could define that Jansenius was really the author of the book entitled “Augustinus.” It is conceded that Jansenius, and its condemned doctrine was not taught in the “Augustinus.” This brings us to what are called “particular facts of doctrine.” Thus it is a fact that God exists, and that there are three Persons in God; here the same thing is fact and dogma. The Jansenists admitted, for instance, that the pope is competent to deal with particular facts of doctrine, but not to determine the meaning of a book. The controversy was then carried to the meaning of the book. Now it is conceded that the pope cannot define the purely personal, subjective, perhaps, perhaps, literal meaning, which an author might attach to his words. But the pope, in certain cases, can determine the meaning of a book judged by the general laws of interpretation. And when a book or propositions from a book are condemned, “in the sense of the author,” they are condemned in the context of the particular doctrine; the pope or propositions would be understood when interpreted according to the ordinary laws of language. The same formula may be condemned in one author and not in another, because, interpreted by the context and general argument of the author, it may be unorthodox in one case and not in the other. In the strict sense, therefore, a dogmatic fact may be defined as “the orthodox or heterodox meaning of a book or proposition”; or as “a fact that is so connected with dogma that a knowledge of the fact is necessary for teaching and conserving sound doctrine.” When we say that a book contains unorthodox doctrine, we convey that a certain doctrine is contained in the book and that the doctrine is unorthodox; here we have close connexion between fact and dogma.

(2) The Church and Dogmatic Facts.—Jansenists distinguished between “fact” and “dogma.” They held that the Church is infallible in defining revealed truth and in condemning errors opposed to revealed truth; but that the Church was not infallible in defining facts which are not contained in Divine revelation, and consequently that the Church was not infallible in declaring that a particular doctrine, in a particular sense, was contained in the “Augustinus” of Jansenius. This would confine the infallible teaching of the Church to mere abstract doctrines, a view that cannot be accepted. Theologians are unanimous in teaching that the Church, or the pope, is infallible, not only in defining what is formally contained in Divine revelation, but also in defining virtually revealed truths, or generally in all definitions and condemnations which are necessary for safe-guarding the body of revealed truth. Whether it is to be regarded as a defined doctrine, as a doctrine de fide, that the Church is infallible in defining facts about which the Church is infallible in defining the Church is infallible in defining dogmatically the Catholic Church. The reason of this difference of opinion will appear below (3). The Church, in all ages, has exercised the right of pronouncing with authority on dogmatic facts; and this right is essential to her teaching office. She has always claimed the right of defining whether the doctrine of a writer is orthodox, heretical, or not. The doctrine is contained in her writings, in her decrees, or in her discourses. We can scarcely imagine a theory like that of the Jansenists advanced within the sphere of the civil authority. We can scarcely conceive it to be held that a judge and a jury may pronounce on an abstract proposition of libel, but cannot find that a particular paragraph in a book or newspaper is libellous in the sense in which it is written. If the Church could not define the orthodox or unorthodox sense of books, sermons, conferences, and discourses generally, she might still be inadequate to the task of defining doctrine, but she could not fulfill her task as practical teacher of human faith, nor protect her children from actual concrete dangers to their faith and morals.

(3) Faith and Dogmatic Facts.—The more extreme Jansenists, distinguishing between dogma and fact, maintain that the doctrine is the proper object of faith but that to the definition of fact only respectful silence is due. They refused to subscribe the formula of the condemnation of Jansenism, or would subscribe only with a qualification, on the ground that subscription implied internal assent and acquiescence. The less extreme party, though limiting the Church’s infallibility to the question of dogma, thought that the formula might be signed absolutely and without qualification, on the ground that, by general usage, subscription to such a formula implied assent to the doctrine. As regards the other dogmas, they held that there was nothing to prevent the church from defining dogmatic facts, but that the definition of dogmatic facts demand real internal assent; though about the nature of the assent and its relation to faith theologians are not unanimous. Some theologians hold that definitions of dogmatic facts, and especially of dogmatic facts in the “Augustinus” sense of the term, are believed by Divine faith. For instance, the dogmatic proposition that Peter is the “successor of Peter,” is formally revealed. Then, say these theologians, the proposition, “Pius X has been duly elected pope,” only shows that Pius X is included in the general revealed proposition that “every pope duly elected is the successor of Peter.” And they conclude that the proposition, “Pius X is successor to Peter,” is a formally revealed proposition; that it is believed by Divine faith; that it is a doctrine of faith, de fide; that the Church, or the pope, is infallible in defining such doctrines. Other theologians hold that the definitions of dogmatic facts, or the wider and stricter sense of dogmatic facts, are received, not by Divine faith, but by ecclesiastical faith, which some call mediate Divine faith. They hold that in such syllogisms as this: “Every duly elected pontiff is Peter’s successor; but Pius X, for example, is a duly elected pontiff; therefore he is a successor of Peter,” the conclusion is not formally revealed by God, but is inferred from a revealed and an unrevealed proposition, and that consequently it is believed, not by Divine, but by ecclesiastical faith. It would then also be held that it has not been formally defined de fide that the Church is infallible in the definition of dogmatic facts, but only de fide that the Church is infallibly to be theologically certain that the Church is infallible in these definitions; and this infallibility cannot lawfully be questioned. That all are bound to give internal assent to Church definitions of dogmatic
facts is evident from the correlative duties of teacher and persons taught. As it belongs to the duty of supreme pastor to define the meaning of a book or proposition, correlative it is the duty of the subjects who are taught to accept this meaning. (See Dogma, Faith, Infallibility, Jansenism.)

Dolbeau, Jean, Recollect friar, b. in the Province of Anjou, France, 12 March, 1586; d. at Orleans, 9 June, 1652. He entered the order at the age of nineteen at Balmette, near Angers, and was one of the four Recollects who were the first missionaries of Canada. He landed at Quebec in May, 1615, and celebrated the first Mass ever said there. He became missionary provincial of the mission in 1618 and preached the first jubilee accorded to Canada. This zealous missionary built the first monastery of the Recollects at Quebec in 1620. He returned to France in 1625, taking with him a young Indian boy who was later baptized at Angers. Endowed with many striking qualities, Father Dolbeau was remarkable for extraordinary spiritual insight and profound humility. He was successively master of novices, guardian, definitor, and provincial delegate at the general chapter of the order held in Spain in 1633. He died in the forty-seventh year of his religious life.

Biographical notices, seventeenth Century MSS. (Public Library, Orleans; Sagard, Hist. du Canada (Paris, 1858), ed. Trois (1860); Leclercq, Premier établissement de la foi dans la Nouvelle France (Paris, 1691); Sheu Tr., (New York, 1881).

Ogebic M. Jouve.

Dolci, Carlo, painter, b. in Florence, Italy, 25 May, 1616; d. 17 January, 1666. The grandson of a painter, he seems to have inherited a talent for art. He studied under D. Vignali, and when only eleven years old he attracted attention by the excellence of his work, notably a figure of Saint John and a head of the infant Jesus. The precocious youth made a carefully-finished picture of his mother, and thereafter he was kept busy filling the numerous commissions he received in Florence, a city he seldom left during his long life, which he devoted to art. Dolci was one of the few masters whose pictures were eagerly sought for by his countrymen during his lifetime. He was very pious and painted religious works exclusively. It is recorded that in every Passion week he painted a picture of the Saviour. He limited his brush to heads—usually of Christ and the Virgin—and seldom undertook a large-sized canvas. He is celebrated for the soft, gentle, and tender expression of his faces, the transparency of his colour, the excellent management of chiarosuro, and the careful and ivory-like finish of his pictures. The simplicity and tranquility on the faces of his paintings of Christ and the Virgin seem little short of inspired. Hinds calls him mawkish and affected; but Dolci was the last of the Florentine School, the last real “master of the Renaissance”, and as decadent sweetness permeated all Italian art, his pictures but reflected the dominant character of the close of the seventeenth century. Patient and slow, he painted pictures that are perfectly finished in every detail. His masterpiece (1646) is “St. Andrew praying before his Crucifixion” (Pitti Gallery, Florence). It is one of the few works where his figures, always well drawn and standing out in beautiful relief, are life-size. Next in excellence to this is the “St. John writing his Gospel” (Berlin). His “Mater Dolorosa” called “Madonna del Dito” (of the thumb) is known throughout the civilized world because of its many reproductions. In 1662 Dolci saw with chagrin Giordano accomplish in a few hours what would have taken him weeks, and it is said he was thereupon seized with melancholy which ultimately led to his death. Loma, Mancini, Mariani, and Agnese Dolci (his daughter) were a few of his pupils and imitators. Contemporary copyists have filed European collections with spurious Dolcis. Agnese Dolci, who died the same year as her father, not only made marvellous copies of the master’s pictures, but was herself an excellent painter. Her “Consecration of the Bread and Wine” is in the Louvre. Other works by him are: “Virgin and Child”, National Gallery, London; “The Saviour seated with Saints”, Florence; “Madonna and Child”, Borghese Gallery, Rome.

Dolche, a titular see of Commagene (Augusto-Euphratesia). It was a small city on the road from Germanicia to Zeugma (Ptolemy, V, 15, 10; Itiner. Anton., 184, 189, 191, 194; Tab. Peutinger), famous for its temple of Zeus Dolichenus; it struck its own coins from Marcus Aurelius to Caracalla. The ruins stand at Tell Dulk, three miles northwest of Antab, in the vilayet of Aleppo. Dolche was at an early date an
episcopal see suffragan of Hierapolis (Mabbough, Membidj). Leqien (18) (Christ, II, 937) mentions eight Greek bishops: Archelaus, present at Nicea in 325, and at Antioch in 341, Olympius at Sarada in 344; Cyril at Seleucia in 359; Maris at Constantinople in 358; Abbas, a Nestorian, in 382, deposed in 434; Athanasius, bishop of Alexandria. The see of Theodoret, present at Antioch in 441 and at Chalcedon in 451; Philoxenus, a nephew of the celebrated Philoxenus of Hierapolis, deposed as a Severian in 518, reinstalled in 533 (Brooks, The Sixth Book of the Select Letters of Severus, London, 1904, II, 50, 90, 100, 102). The see figured in the Episcopatum ed. Parthey, about 840. At a later time Doliche took the place of Hierapolis as metropolis (Vailhé, in Echos d'Orient, X, 94 sqq. and 367 sqq.). For a list of fourteen Jacobite Bishops of Doliche (eighth to ninth century), see "Revue de l'Orient chrétien", VI, 195.

Döllinger, Johann Joseph Ignaz von, historian and theologian, b. at Bamberg, Bavaria, 28 February, 1799; d. at Munich, 10 January, 1890.

Family and Education.—Döllinger's father was a professor of medicine in the University of Bamberg, and his son was influenced, in an unusual degree, by the family traditions and his whole environment. The medical faculty of the University of Bamberg owed its foundation to his grandfather, whose son, the father of Ignaz (as Döllinger was usually called), became a professor of medicine in the same university in 1794, but in 1803 was called to Würzburg. It was only natural that amid surroundings predominantly academic the youthful Ignaz should acquire a strong love of books, the best of which were then written in Latin. Before his return to Bamberg in 1805, however, he was able to acquire a knowledge of Italian. A Benedictine monk taught him English privately, and he learned Spanish at the university. His orderly acquisition of learning and the full development of all his rich gifts would have led to extraordinary achievements. He had also sufficient means to satisfy any reasonable wishes for foreign travel and the purchase of books. All these circumstances, doubtless, combined to render his mind particularly receptive; and, at the same time, the multitude of impressions daily made on the young student led him to outline a plan of studies by far too comprehensive.

On entering the University of Würzburg at the age of sixteen, he took up at once history, philosophy, philology, and the natural sciences. In this choice there is already evident a certain mental irregularity, the more remarkable if we recall what he said, two years later, apropos of his choice of a vocation, viz., that, "no professor in the faculty of philosophy had been able to attract him to his particular science." The conversion of such men as Eckhart, Werner, Schlegel, Stölbner, and Winkelmann turned his thoughts to theology, which he took up in 1818, but without abandoning botany, mineralogy, and entomology, to which studies he continued for many years to devote considerable time. We quote from Friedrich Schlegel's following noteworthy utterance of Döllinger: "To most other students theology was only a means to the end, the end, the choice of a vocation only the means." During his studies he seldom attended the regular lectures on theology, but he was assiduous at the lectures in the faculty of philosophy and law; privately, however, he read many works on theology. In botanical studies were better regulated when in 1820 he entered the ecclesiastical seminary at Bamberg and followed the theological courses given at the lyceum. The year and a half spent in this manner made up, but not sufficiently, for the previous lack of a systematic training in theology.

He was ordained priest 22 April, 1822, spent the summer at his home, and in November, was appointed chaplain at Marktseifeld in Middle Franconia. Despite the profound grasp of dogma and moral theology that his works at times exhibit, his career gives evidence enough that he never took the pains to round out satisfactorily his preparation for the duties of his vocation in theology. The elder Döllinger had hoped to see his son follow an academic career and opposed his choice of the priesthood; among the reasons for his opposition was the conviction, openly expressed (and then prevalent enough among the German clergy), that for philosophical reasons he was not fitted for the first place in theology.

Career.—Döllinger's father soon obtained (November, 1823) for him a place as professor of canon law and church history in the lyceum of Aschaffenburg. It was here that in 1826 he published his first work, "Die Eucharistie in den drei ersten Jahrhunderten," an eloquent and solid treatise, still much appreciated. It obtained for him from the theological faculty of the Bavarian University of Landshut the title of Doctor of Theology in absentia. In the same year he was called to Munich as professor extraordinary of canon law and church history, and in 1827 was made professor of canon law by the king. In 1830 the king gave him a canonry in the royal chapel (Hofkollegiatstift) of St. Cajetan at Munich, and on 1 January, 1847, he was made mitred provost or head of that body of canons. In the same year he was dismissed from his chair, in punishment of his protest as representative of the university in the collective letter of the Bavarian bishops: to which he had been appointed in 1844, against the dismissal of several university professors. But in 1848 he was chosen representative to the Frankfort Parliament and remained in attendance until the middle of 1849. Then followed (24 Dec., 1849) according to some authorities 1 Jan., 1850) his dismissal, of which his father, then archbishop of Munich, had informed him on 18 April, 1847, when Archbishop von Scherr publicly excommunicated him. Thereupon he laid down his ecclesiastical charges, recognized the binding force of his excommunication and, though he held his professorship another year, taught only a course of modern history. In 1860 King Louis II of Bavaria had appointed him royal councillor, and maintained him in his office as provost of St. Cajetan, even after his excommunication; practically, this meant only the continuance to him of the revenue of the position. Döllinger received in 1877 another evidence of the royal favour, when, on the death of his colleague, von Liebig, he was named by the king to the presidency of the Royal Bavarian Academy of Sciences and general conservator of the scientific collections of the State. As early as 1857 he had been made member extraordinary of the Academy, in 1843 a regular member, and from 1860 was secretary of its historical section.

Many attempts were made, by ecclesiastics and laymen, to induce Döllinger to return to the Church. The personal conviction of the latter may be read in his correspondence (ed. by Friedrich, Munich, 1899-1901) with Archbishop Stechele and Monsignor Ruffo-Seilla. In 1886 and 1887 both of these prelates together with Bishop von Hefele of Rottenburg besought Döllinger to abandon his Old-Catholic attitude and be reconciled with the Church. In response to the archbishop contained these words: "ought I (in obedience to your suggestion) to appear before the Eternal Judge, my conscience burdened with a double perjury?" At the end of his letter to the nuncio he said: "I think that what I have written so far will suffice to make clear to you that with such convictions one may stand even on the threshold of eternity in a condition of peace and spiritual calm." He died aged ninety-one, still outside the communion of the Church.

Life and Writings.—It was at Munich that Döllinger began his life-work. Formally, he was pro-
DOLLINGER

fessor of canon law and ecclesiastical history, but was soon burdened with the teaching of dogma and New-Testament exegesis, a task to which a weaker or inferior mind would not have proved equal. He declined, in 1821, a call to Breslau, although King Louis I was eager to have him out of Brandenburg; he also rejected a later call to Freiburg in the Breisgau. He was offered, in 1839, a professorship at an English college, but preferred to remain in Munich. To facilitate the coming of Johann Adam Mohler from Tübingen to Munich (1835), he gave over to him the courses of ecclesiastical history. New-Testament exegesis, and when Mohler died (12 April, 1838) he collected a number of essays of this great theologian which for the most part were already in print, but were widely scattered, and published them in two volumes (1839) under the title of "Gesammelte Schriften und Aufsätze". While Mohler taught at Munich, Dollinger lectured on the history of dogma ("Historische Dogmatik"). At the request of Abel, Minister of the Interior, Dollinger began, in 1838, a course of lectures in the Faculty of Philosophy on the philosophy of religion in opposition to the teaching of the honorary professor Von Baader, the theologian, and of Schelling. He continued, however, his lectures on dogma and ecclesiastical history. From November, 1846, to February, 1848, Bavarian public affairs were disturbed by the royal attachment to Lola Montez, a Spanish ballerina; the Abel ministry was dismissed, and professors Lasaulx, Moy, Phillips, Hofler, and Deutinger either dismissed or removed. Dollinger, finally, as stated above, was removed from his office. After his restoration in 1850 he continued to the end as professor of church history. In 1862 he was made Knight of the Order of Maximilian for science and art.

Apart from his aforesaid offices of canon and professor he held but one other ecclesiastical office in Munich. After the conflict concerning mixed marriages (1832), he was made defender matrimonii in the matrimonial court of first instance, later in that of second instance, which office he held until 1862. His circle of friends was from the beginning quite extensive; the physicians and professors of the natural sciences who frequented his father's house were themselves men of distinction. As a student he formed the acquaintance of the poet, Graf von Platen, and of Victor Aimé Huber. Later, Platen wished to study with Dollinger, and visited him twice at Marktscheinfeld. In the evening of the same day he met Prince Alexander von Hohenlohe (q. v.), of whose miraculous cures he said later: "Cures there were; but such as often happen in the history of the Church; the deep stirring of the emotions suffices easily enough to explain them", a remark that fails to account for the presence of deep emotions in the absent sick. On a visit to Platen at Erlangen, in 1822, he met Pfaff, Schubert, and Schelling, the last a friend of his. In his early days at Munich he was much in the company of the above-mentioned philosopher, Franz von Baader. When, in 1827, the famous Joseph Görres came to Munich as professor of history, there formed about him at once a sympathetic circle of scholars, among them the youthful Dollinger. Dollinger's relations with Lamennais, more particularly with Count Montalembert, gave occasion in 1832 to a visit to Paris in the Bavarian General Consul's house and his friends. Lamennais at that time contemplated the establishment at Munich of a house of studies for young Frenchmen ("École des études allemandes"), who might thus come under the influence of Görres, Baader, and others, and on their return to France stand manfully for the sanity and realism of the Church. In the mean time Dollinger had met Andreas Röss, the founder (1821) of "Der Katholik" (still published at Mainz), who in 1828 was rector of the ecclesiastical seminary at Strasbourg as well as professor of dogma and homiletics; with Dollinger he projected various literary enterprises which, through pressure of other work, were never realized.

At this time Monsignor Wiseman, later Cardinal, and Archbishop of Westminster, then professor at the Roman University (Sapienza) and rector of the English College, saw the necessity of strengthening Catholicism in the development of its new opportunities in England, and for this reason was minded to effect closer relations with the learned clergy of Germany. Dollinger seemed to him the proper mediator; he therefore visited Munich in 1835, made the acquaintance of the distinguished professor, and spoke with him of the plans. Wiseman, already well known in Europe by his "Hortus Syracusae", aroused in Dollinger so deep an interest, that the next year the latter visited England. His biographer, Friedrich, describes the result of this visit as follows: "Dollinger had a life-long hatred of bureaucracy both in Church and State; the large independence, therefore, of English public life delighted him and filled him with an admiration that was often excessive. Thereafter he remained always in close touch with England, kept constantly in his home, and at considerable sacrifice, a number of young English students, and directed the studies of others whom he could not keep under his own roof." In 1850 the youthful Sir John Emerich Edward Acton (q. v.) entered his house as a student, to become later his intimate friend. Later, as John Lord Acton and Regius Professor of modern history at Cambridge, he remained in close touch with the Old Catholics, though he never formally severed his connexion with the Church. We do not as yet know details of the progress accurate knowledge concerning Acton's share in the work known as "Letters from Rome" concerning the Vatican Council (Romische Briefe vom Konzil), published by Dollinger in the Augsburg "Allgemeine Zeitung".

As a rule Dollinger observed with his pupils a strict academic dignity and reserve; among the few whom he treated as intimate friends Acton was easily the foremost. Among those who in this early period exerted the greatest influence over Dollinger was Karl Ernest Jäcke, founder and editor (since 1832) of the Berlin "Politische Wochenblätter", confidant of Metternich, and a frequent visitor to the Bavarian capital. In 1838 came the foundation of the "Historisch-politishe Blätter" by Guido Gorres, Phillips, and Jäcke; the new organ soon greatly augmented the influence of Görres and his circle of friends, the most loyal and earnest of whom at this time was Dollinger.

The dispute over the question of mixed marriages in Prussia, known as the Kolzer Streit (1831), followed close upon that in Bavaria (1831); both were fought out dramatically, and brought Dollinger and his Munich friends to the front as vigorous defenders of the holy rights of the Church. The first estrangement of Dollinger from Görres and his friends came about through the publication of an important manual of canon law by Phillips (from 1834 to 1847 professor of canon law at Munich). To Dollinger it seemed that the latter emphasized excessively the extent of the papal pre-

DOLLINGER

rogative. Nevertheless, he continued for a decade to collaborate on the "Historisch-politische Blätter"; it was only slowly and almost imperceptibly that the change in his opinions came about. Gradually, owing to his opposition to the Jesuits and particularly to the Roman Curia, he sought to seek new friends and form全新的 circles. As member of the Frankfort Parliament (1818) he sat with the Right, among men like Radwitz, Liehnowski, Schwerin, Vincke, and others; he also belonged to the Club "Zum steinernen Haus."

The change that had come about in Döllinger's view during the preceding years may best be made clear by the fact that his colleagues in Frankfort obtained his consent to the following plan. General von Radwitz, in the name of the Catholic deputies, was to make this declaration in Parliament: "The orders, including the Jesuit Order, are not a part of the living organism of the Catholic Church; the Jesuit Order is no wise necessary in Germany; the German episcopate and the German clergy do not need its help to fulfil their obligations; German learning [die deutsche Wissenschaft] needs no aid of this nature. The possible advantages for the Catholic Church accruing from the cooperation of the Jesuit Order would be given up to the disadvantage and disservice of the Church, and its presence would create. If it were proposed to introduce the Jesuits into any German State, moved by the higher interests of the Catholic Church, we would protest most decidedly against the execution of any such plan."

The relations of Döllinger with the German episcopate were frequent, particularly after the meeting of the German and Austrian prelates at Würzburg (22 Oct. to 16 Nov., 1818). His report concerning the national Church and national synods, as submitted to this national assembly, aroused deep interest, was received with approval in many episcopal circles, and assured him the leadership in the acute ecclesiastico-political discussions then impending. Between 1822 and 1854 he visited Northern and Central Italy, and in 1857 Rome. Apart from his learned researches on these occasions, he profited by these journeys to strengthen his existing relations with numerous Italians, ecclesiastics and laymen, also to make new acquaintance and friendships. While Döllinger sought in every way to retain the favour of King Maximilian II, the cleft between him and his former friends as well as his own past continued to trouble him. For a while the famous professor seemed to stand almost alone, particularly after the stormy scenes of the Munich Congress of Catholic savants (28 Sept. to 1 Oct., 1863). Daniel Bonfantius von Haneberg, Abbot of St. Boniface in Munich, opened this Congress of eighty-four members, mostly German theologians, on which occasion Döllinger delivered his famous discourse, "Die Vergangenheit und Gegenwart der katholischen Theologie" (The Past and Present of Catholic Theology). Many of those present, among them Haneberg, saw with sorrow that they could not follow Döllinger along the new path he was taking. He held no longer in his writings the universal idea of Catholicism as a world-religion; in its place, nourished by the court atmosphere he loved so well, arose a strictly nationalistic concept of the Catholic Church. All ecclesiastical measures he henceforth opposed from the narrow angle of Gallicanism, and ridiculed in anonymous articles and other writings. He was in daily communion with the principal Bavarian statesmen, and amid these relations conceived an idea of the Church's office which in the end could not be other than un-Catholic. It may be noted here that his intimacy with the philosopher Johann Huber, a disciple of Schelling, had attracted attention long before this. Nevertheless (and it was a sign of the strong tension of those days and the mental tempest of many) a number of German bishops still held to Döllinger, although they had long since parted company with Joseph Hubert Reinken, professor of church history at Breslau and later first bishop of the Old Catholics. It was not until 18 July, 1870, when the dogma of Papal Infallibility was proclaimed at Rome, that there was a sharp division in the ranks of German Catholics. This compelled Döllinger henceforth to ally himself with the leaders of the Kulturkampf and the Old Catholics, as also among anti-Catholic statesmen and princes.

Döllinger, as is well known, wrote much and admirably, and his writings exhibit, with a rare fidelity, every phase of his mental conflict. He was still a young writer when his profound learning and brilliant diction, coupled with an unusual breadth and rapidity in the critical treatment of whatever historical thesis lay before him, earned him an international reputation. He lacked, however, the methodical training necessary for the scientific editing of original texts and documents, in which respect his deficiencies were occasionally too evident. He was not content with bare investigation of the facts and problems of Christian antiquity, or of medieval and modern history, but sought always a satisfactory solution for the difficulties that confronted the student. His diction was always charming, whether the subject were one demanding a strictly scientific treatment or one requiring a rapid style called for by the pressing, but ephemeral, needs of the hour. He was likewise skilful as a public speaker, not only when delivering a carefully prepared discourse, but also when called on for an extemporaneous address. A typical example of his ability in this respect was his extempore discourse in St. Paul's Church, Frankfort, on Church and State, apropos of Article III of the fundamental articles (Grundrechte) of the Constitution: several of the best speakers had preceded him, and, in order to closely follow their line of thought, his whole address had to be extemporized; nevertheless, it was admitted by all that, both in form and logic, his address was by far the best delivered on that occasion. The admiration of his students, no doubt, was due in great measure to the beautiful diction in which he was wont to dress the facts of history. The writings of Döllinger may be divided into purely scientific and political or ecclesiastico-political. They exhibit for the most part, however, a mutual interdependence and often complete one another. To avoid repetition, it seems better to follow the chronological order. It is worthy of note that when writing anonymously, his tone was considerably bolder and even violent; writing over his own name he usually avoided such extremes. His first work (1826), "Die Eucharistie in den drei ersten Jahrhunderten", has already been mentioned. In 1828 he published the first volumes of Hortig's "Kirchengeschichte", from the Reformation to the end of the eighteenth century. He also wrote frequently at this time for "Eos", a new review founded by his friends, Baader and Görres; most of the articles dealt with contemporary subjects. According to Friedrich he also prepared "Ümriss zu Dante's Paradies von P. von Cornelius", i.e. an introduction to Dante's Divine Comedy. His journalistic activity, however, was far from pleasing to the ministerial councillor, Joseph Freiherr von Hombay, a somewhat erratic, but influential, person, who so influenced the king that he wished Döllinger well out of Bavaria, as has been seen in the case of his call to Breslau. In these years, also, he defended with vigour the matrimonial legislation of the Church, in connexion with the "Mixed Marriages" conflict (1831) in the Upper House of the Bavarian Parliament, and he was author of an anonymous work "Über die gemischten Ehen", at the same time he suggested as a means of avoiding all conflict, that the civil marriage be separated from the religious ceremony. Meanwhile he continued to collect the material for his scientific works. In 1833 and 1835 respectively he published the first and second parts of his "Handbuch der Kirch-
engeschichte" (to the end of the seventh century). The next year (1836) he brought out the first volume, and in 1838 the first half of the second volume of his "Lerubrh der Kirchengeschichte" (to the end of the fifteenth century). The essay "Muhammeds Religion, eine historische Betrachtung" was read before the Munich Academy about the aforesaid work on mixed marriages; early in 1838 he published his "Beurtheilung der Darlegung des geheimen Rathes Bunsen: eine Stimme zum Frieden". A long controversy with Professor Thiersch followed this entrance of Döllinger into the Prussian conflict over mixed marriages (Kölner Stimmen); his articles were printed in the Augsburg "Allgemeine Zeitung", and are apparently his earliest contributions to the journal in which thirty-one years later he was to consummate his apostasy. Karl von Abel, Minister of the Interior, now asked him to publish a popular "Weltgeschichte", or universal history, from the Catholic point of view, also a manual of religion (Religionslehrebuch) for the gymnasium or high-schools; he began these works, but, feeling himself unsuited to their composition, persuaded the minister to relieve him from the undertaking. Lateron, he undertook to explain his failure in the Pius IX demanding an explanation, however, seemed impossible, and may be looked on as either a meaningless piece of malice or a case of self-deception.

A royal order (1838) that compelled all soldiers to genuflect before the Blessed Sacrament was soon the cause of much friction; in 1843 the matter came before the Upper House, where representatives of the non-Catholic soldiers protested against the measure as contrary to liberty of conscience. Döllinger defended the king and the Government in an anonymous work entitled: "Die Frage der Kniebeugung der Protestanten von der religiösen und staatsrechtlichen Seite erläutert", wherein he treated the question from both the religious and political point of view; this was followed by a long controversy with the Protestant deputy, Harless. In the meantime he was chosen by the University of Vienna as its representative in the Bavarian Parliament, where he protested against the admission of the Jews and defended the emancipation of the Jews, both of which acts drew upon him the enmity of many.

During this political agitation, and while Lola Montez still held the king infatuated, appeared the first volume of his great work "Die Reformation, ihre unterlassenen und ihre Wirkungen und ihre Wirkungen des lutherischen Bekenntnisses", i.e. on the origin, development, and consequences of the Reformation in Lutheran circles; the second volume appeared in 1847, the third in 1848. A second edition of the first volume was printed in 1851. This work unfortunately remained incomplete; Friedrich says that Döllinger's friends prevented him from publishing the corresponding three volumes, i.e. an account of the conditions within the Catholic Church in the same period. This work long exercised a powerful influence and still retains its value. Johannes Janssen (q. v.) was inspired by it to make the exhaustive studies which he did so much to destroy the traditional legends that so long did duty as a history of the Reformation.

The foolish attempt of some zealots to have the temporal power of the pope proclaimed a dogma (Doplatunierung des Kirchenstaates) excited Döllinger to an extraordinary degree. He began firmly persuaded that theological science could be saved only by the German Catholic Church, not by the Catholic Church in Germany. By theological science he meant chiefly historical theology. All other ecclesiastical interests seemed to this great scholar quite subordinate. This work itself is the foundation of the education of seminaries, later quite pronounced, was another result of this mental attitude, the trend of which he revealed on various occasions at the Frankfort Parliament, and in the above-mentioned report (1848) of the Würzburg meeting of the German and Austrian bishops. Gradually he came to be looked upon as a Gallican, nor was this because of his frequently expressed and strong dislike of the Jesuits. Many persons, among them the best and most loyal supporters of the Church, looked henceforth with a certain anxiety on the course of Döllinger. It could even be said that he was the Pope. Munich admired him unreservedly. On the other hand, throughout the ranks of the German and Austrian clergy there was still only a mediocre theological knowledge, the legacy of an earlier period of infidelity and rationalism, and the concept of Catholic doctrine had not been disseminated widely from the true ecclesiastical ideal of both.

To understand fully the profound changes working in the mind of Döllinger during the critical years from 1847 to 1852, it is well to recall his discourses at the general meetings of the "Katholischer Verein" in Ratisbon (1849) and Linz (1850), also those in the Upper House of the Bavarian Parliament in St. Paul's at Frankfort, and at the meetings of the German hierarchy at Würzburg (1849) and Freising (1850). To some extent, also, disappointment was responsible for his new mental attitude; his friends and admirers had tried in vain to obtain for him a cardinal. It is worthy of note that about 1856 the author of the work on the Reformation began gradually to modify his views to such an extent that eventually (in 1859) he wrote a panegyric on Protestantism.

The Greek patristic text entitled "Philosophoumena, or Refutation of all Heresies", discovered in 1842 and edited by Miller (Oxford, 1851), at once fascinated Döllinger, and he devoted to its study all the rich powers of his erudition, critical skill, and insight. In 1853 he published the result of his labours in "Hippolytus und Katholikum", etc., a study of the Roman Church from 200 to 250, in reply to the interpretations of the "Philosophoumena" published by Bunsen, Wordsworth, Baur, and Gieseler. Despite the contrary arguments of De Rossi, Döllinger's opinion has prevailed, and it is now generally acknowledged that Hippolytus is the author of the work in question. Döllinger's essay in the "Historisch-Politische Blätter" (1853) entitled "Betrachtungen über die Frage der Kaiserkrönung", considerations on the imperial coronation, contributed not a little to the driving Napoleon out of Germany. Concerning the definition of the dogma of the Immaculate Conception Döllinger exhibited a prejudiced mind and a rather superficial historical grasp of the question; the defects in his theological equipment were here most noticeable. Indeed, he was much less concerned with the doctrine itself than with the person who wished to proclaim it as a dogma of faith. It was also his first open protest against a pope who was soon to proclaim that Papal Infallibility which seemed to Döllinger an utterly intolerable doctrine, from his view-point of exaggerated esteem for historical theology.

The year 1857 was marked by the appearance of his "Heidenthum und Judenthum, Vorhalle des Christenthums" (Heathenism and Judaism, the Vestible of Christianity), the first part of his long contemplated history of the Church; the second part appeared in 1869 (2nd ed., 1869) as "Christenthum und Kirche in der Zeit der Grundlegung", dealing with the Apostolic period. The work, as he had planned, was never completed. Most of the abundant material he had collected for an exhaustive history of the papacy was afterwards utilized in an ephemeral journal called "Papst, Kaiser, und Kirche", in which he had done so, it is possible that he would have come into conflict with the Holy See much sooner than he did.

In 1861 some of the principal ladies of Munich requested him to deliver a series of public discourses on...
the Temporal Power; to this he acceded with pleasure, and the discourses given in the royal Odeum were followed with deep attention by crowded audiences. His utterances, however, were so imprudent and so clearly inspired by Liberalism that in the midst of one of them the papal nuncio, Monsignor Chigi, arose with impressing effect and left the hall. The impulse given by these discourses on the Catholic world was painful in the extreme. Döblinger was himself deeply troubled by the agitation aroused; to justify himself in some measure, also to strengthen his position, now seriously compromised, he composed in great haste and published the same day, 

"Die Veränderungen der Kirchen, Papstthum und Kirchenstaat". It seems incredible that the opinions and judgments one reads in this work are really Döblinger's own; the reader is haunted by the suspicion that he has before him a remarkable mixture of Byzantinism and hypocrisy.

The Catholic academic circles of Germany were in the meantime deeply agitated by the discussions incident to the renaissance of Scholasticism (see Neo-Scholasticism) in theology and philosophy, and those over the merits of the episcopal seminaries as against the theological faculties of the universities for the education of candidates for the priesthood. There were excesses on both sides that intensified the situation, whereupon it seemed to many that an academical congress would be a helpful measure. An assembly of Catholic scholars met in 1863 at Munich, before which, as already stated, Döblinger delivered (28 September) his "Einige Erwägungen über die Gegenwart der Katholischen Theologie" (The Past and Present of Catholic Theology). His views, as expressed on this occasion, were calculated to irritate and embitter his opponents, and a reconciliation seemed farther away than before. Shortly afterwards, in the thirteenth number of the episcopal Syllabus of 8 December (see Quanta Curæ), certain opinions of Döblinger were condemned.

It was unfortunate, but not surprising, therefore, that the "Papstfabeln des Mittelalters", medieval fables about the popes (Munich, 1863, 2nd ed., 1866), received no impartial appreciation from his opponents; the pages (131–55) on the Monothelism of Pope Honorius were considered particularly offensive. From this period to the publication of the "Janus" letters, the pen of Döblinger produced mostly anonymous articles, in which his approaching apostasy was disclosed; but his scholar it was not. He had also been brought up to the plan of a universal German biography, the present "Allgemeine deutsche Biographie". Though it was finally von Ranke who induced the Munich Academy to undertake the now practically finished work which, unfortunately, still shows frequent traces of partisanship, it was Döblinger's ardour and insistence that first moved the Academy to consider the proposition. There is even yet a very widespread conviction, and it was believed by the great Christian archaeologist De Rossi, who was quite accurately informed on all the details of the Vatican Council, that Döblinger would scarcely have left the Church if he had been invited to take an honourable share in the preliminary work for the council. Nor does this seem at all improbable to those who understand his character. It is, in any case, very regrettable that on the one hand the influence of Cardinal Reusch in Munich has outweighed that of Cardinal Schwarzenberg, and on the other many rejoiced that the world-renowned scholar had not bent his neck under the yoke of Rome.

Döblinger had definitely severed connexion with the Church. Three weeks later (18 April, 1871) both Döblinger and Friedrich were publicly declared excommunicate. The action of the archbishop, under the circumstances unavoidable, aroused much feeling; the one side it was hailed as a decisive step that ended a situation growing more and more scandalous, the other rejoiced that the world-renowned scholar had not bent his neck under the yoke of Rome. This marked the rise of the sect of the Old Catholics. At Pentecost of the same year (1871) a declaration was published, chiefly the work of Döblinger, setting forth the need of an ecclesiastical organisation. Döblinger also signed a petition to the Government asking for one of the churches of Munich. Hitherto the opposition of this party to the Church had been mostly of a philosophico-historical character, and the dominant statesmen of the time could turn it to little practical account. It was now the hour for a number of pan-Catholic tendencies of the governments of the period. Prince Bismarck's plan of a National German Catholic Church, as independent of Rome as it was possible to
make it (foreshadowed by Dollinger in 1849), corresponded now with the wishes of the apostate Catholics, henceforth governed absolutely by the canonist von Schulte (see OLD CATHOLICS). The first assembly of these opponents of the Vatican Council was held at Munich on 22-24 Sept., 1871. On the suggestion of von Schulte, and despite the opposition and warnings of Dollinger, it was decided to establish the "Old Catholic Church". Henceforth Dollinger followed a policy of vacillation, avoiding on the one hand any formal relationship to the new Church, on the other, fearing to commit himself by a public act of dissension. The "New Church" lacked distinction and was very personally distasteful to him; in public, however, though with measured reserve, he defended it. Henceforth formally excommunicated from the Catholic Church, he recognized the validity and legality of that act; at the same time he held it beneath his dignity to submit to the jurisdiction of Bishop Reinkens, for whom the Old Catholics had obtained concession from the Jansenists in Holland. He stood, therefore, between the two covenants, and looked with almost a calmness that the most insignificant members of the new sect considered him, more or less, an Intimate adherent and a sharer of their trials.

The next seven years he spent in purifying his conscience, or, in his own words, in a process of internal excommunication. In 1887 he published a series of essays, his academic discourses, and the work "Ungeburchte Berichte und Tagebücher zur Geschichte des Konzils von Trient", an unedited account, and a series of historical and theological essays on the work "Ein ungedruckten Berichten und Tagebücher zur Geschichte des Konzils von Trient", unedited reports and dairies used for a history of the Council of Trent (1876). In 1887 he edited, with Reusch, the autobiography of Belkarrane up to 15 June, 1613, in Gnosis; with Reusch he also published (1889-90) in two volumes "Geschichte der Moralstreitigkeiten in der römisch-katholischen Kirche seit dem sechszehnten Jahrhundert", mit Beiträgen zur Geschichte und Charakteristik des Jesuitenordens", or a history of the moral-theological discussions in the Roman Catholic Church since the sixteenth century, including studies on the history and characteristics of the Jesuit Order. About the same time he published in two volumes his "Beiträge zur Keng misogynie des Mittelalters"; after his death appeared (1891) the third volume of his "Beiträge zur Keng misogynie des Mittelalters".

He retained to the end a remarkable physical and mental strength. Though his latest writings met with a kindly reception in scientific circles, they were not considered as superior in merit, either from the viewpoint of scientific criticism or as historical narrative. Seldom has it been so clearly proven that whenever a man turns completely from a glorious and honourable past, however stormy, his fate is irrevocably sealed.

Paul Maria Baumgarten.

Dolman, Charles, publisher and bookseller, b. at Monmouth, England, 20 Sept., 1807; d. in Paris, 31 December, 1863. He was the only son of Charles Dolman, a surgeon of Monmouth, and Mary Frances his wife, daughter of Thomas Booker, a Catholic publisher in London. Educated at St. John's College, Oxford, where he was first a student of theology, then of music, and afterwards of mathematics, he was engaged in the printing and publishing business, and became a Catholic. He was afterwards for some time resident in Paris, and lived in the house of a Catholic family. His father had married, to go to London. When Joseph Booker died in 1837, he was induced to carry on the business with his aunt, Mary Booker, and his cousin, Thomas Booker. In 1840 the name of the firm was changed to Booker & Dolman, and finally the business was continued under the name of Dolman & Booker. The publisher of periodical literature began when in 1838 he brought out a new series of "The Catholic Magazine", which up to that time had been known as "The Edinburgh Catholic Magazine", in contradiction to "The Catholic Magazine", a much older publication which had gone out of existence in 1835. Dolman's publication was discontinued in June, 1841, but his name had become so widely known that in March, 1845, he brought out a new periodical called "Dolman's Magazine and Monthly Miscellany of Criticism". This was at first under the sole management of its publisher, but later the Rev. Edward Price succeeded him. Like the others it was short-lived and in 1849 it was merged with "The Catholic Weekly and Monthly Orthodox", under the title of "The Weekly Register". It first appeared under the new name, 4 August, 1849, published by Thomas Booker. From the name was dropped the "periodicals" and devoted himself solely to works that had never before been brought out by the Catholic press. His many efforts to raise the standard of the Catholic press ended in failure. Disheartened by his ill-success and broken down in health, he retired to his country seat, where he died in 1863. He was survived by his only son, the Rev. Charles Vincent Dolman, of Hereford, Canon of Newport.

Thomas Gaffney Taffape.

Dolores Mission (or Mission San Francisco de Asis de los Dolores), in point of time the sixth in the chain of twenty-one California Indian Missions, formally opened 9 Oct., 1776. The date intended for the celebration was 4 Oct., the feast of St. Francis of Assisi, but owing to the absence of the military command of the neighboring presidio, which had been established on 17 Sept., the feast of the Stigmata of St. Francis, the formal founding was delayed. The first Mass or on near the site was celebrated in a tent by Father Francesco Palou, on the feast of the Apostles Peter and Paul, 29 June, and on 28 July the first Mass was offered up in the church. Father Palou on the title pages of the mission records gives 1 August as the day of foundation. The early missionaries, however, always celebrated the 4th of October as the patronal feast of the mission. The appellation "Dolores" was added because the mission was established on a stream which Father Pedro Font, O.F.M., and Captain Juan Bautista de Anza had discovered on 28 March, 1776, and in honour of the Blessed Virgin had called Arroyo de Nuestra Señora de los Dolores. In all official documents, reports, and in the records, however, the mission bears no other name than San Francisco de Asis; but after 1824, when the Mission San Francisco Solano was established at Sonoma, to avoid confusion it was popularly called Dolores, that is to say, the mission on the Dolores. The founders of the mission were Father Francisco Palou, the historian, and Father Pedro Benito Cambon. The other missionaries stationed here in the course of time were the Franciscan Fathers Tomás de la Peña, Miguel Giribet, Vincente de Santa María, Matías Noriega, Norberto de Santiago, Diego García, Faustino de Solís, Antonio Danti, Martín de Landau, Diego de Noboa, Manuel Fernández, José de Espí, Ramón Antelló, Bartolomé, Juan Sainz, Vincenzo Oliva, Juan Cabot, Bartolomé Ordás, José Altamira, Tomás Estébane, Lorenzo Quijós, José Guiterres, José Mercado, José Real, Miguel Muro. The Rev. Prudencio Santillán, the first secular priest, took charge in 1846.

The cornerstone of the present church, the oldest
building in San Francisco, and which survived the earthquake of 1906 practically without damage, was laid in 1782 and finished with a thatched roof. In 1793 tiles replaced the thatch. The mission buildings as usual were erected in the form of a square. The church stood in the south-east corner fronting the east wing of the square contained the rooms of the missionaries, two of whom were always there until about June, 1828, the shops of the carpenters, smiths, saddlers, rooms for melting tallow and making soap, for agricultural implements, for spinning wool and weaving coarse fabrics. There were twenty looms in constant operation, and two mills moved by mule-power ground the grain. Most of the neophytes were engaged in agriculture and stock-raising. Owing to the barren nature of the soil and the high winds in the neighbourhood, sowing and planting was done ten or twelve miles down the peninsula. The stock also grazed far away from the mission. About one hundred yards from the church stood the neophyte village, composed of eight rows of one-story dwellings. The girls lived at the mission proper under the care of a matron (see California Missions). A school was in operation in 1818. The highest number of Indians living at the mission was reached in 1820, when 1,278 were living there which is about the number of Indians who lived in the mission in 1800. The number fluctuated a great deal. The last baptism of an Indian occurred on 24 June, 1777. From that date till October, 1845, when the last Franciscan departed, 7,200 names entered into the baptismal record, about 900 of which represented white people. The stock also grazed far away from the mission. During the same period 530 deaths occurred, and 2,156 marriages were blessed; about eighty of the latter were those of white couples. From 1785 to the end of 1832, for which period we have the reports, the mission raised 120,000 bushels of wheat, 70,226 bushels of barley, 18,260 bushels of corn, 14,386 bushels of beans, 72,986 bushels of peas, and 905 bushels of lentils and garbanzos or horse beans. The largest number of animals owned by the mission was as follows: cattle, 11,340 head in 1809; sheep, 11,324 in 1814; goats, 65 in 1786; horses, 1,250 in 1787; mules, 45 in 1813.

Records of Mission San Francisco, Ms.; Archives of Mission Santa Barbara, Ms.;_FONT_Durot at Berkeley University, Ms. (Berkeley, Cal.); _PALOU, Noticia (San Francisco, 1874), III, IV; PALOU, _Vida del Fray Junipero Serra_, Mexico 1857; BANKROFT, _History of California_ (San Francisco, 1886), I, V; ENGELHARDT, _The Franciscans in California_ (Harper Springs, Mich., 1897).

Dolores Mission, San Francisco

Dolphins on the Baleria Latoria Tombstone

Dolphins (Lat. delphinus). — The use of the dolphin as a Christian symbol is connected with the general ideas underlying the more general use of the fish (q. v.). The particular idea is that of swiftness and celerity symbolizing the desire with which Christians, which are represented as being sharers in the nature of Christ the true Fish, should seek after the knowledge of Christ. Hence the representation is generally of two dolphins tending towards the sacred monogram or some other emblem of Christ. In other cases the particular idea is that of love and tenderness. Aringhi (Roma Subterr., II, 327) gives an example of a dolphin with a heart, and other instances have some such motto as PIGNUS AMORIS HABES (i.e. thou hast a pledge of love). It is sometimes used as an emblem of merely conjugal love or funeral mourning, though an anchor the dolphin occurs frequently on early Christian rings, representing the attachment of the Christian to Christ crucified. Speaking generally, the dolphin is the symbol of the individual Christian, rather than of Christ Himself, though in some instances the anchor seems to have been used as a representation of Christ upon the Cross. _Masoch, De Orig. et Ant. Chr., III; Mastino_ _dus Ant. Chr., s. v.; Smith and Cheetham, ed., _Dict. of Christian Antq., s. v.; see especially Wilpert, Le Pictore delle Catacombe Romane_ (Freiburg, 1903; and DALTON, _Catalogue of Early Christian Antiques_ etc. in the British Museum (London, 1901).

ARTHUR S. BARNES.

Dom. See Benedictine Order.

Dome (Lat. domus, a house), an architectural term often used synonymously with cupola. Strictly speaking, it signifies the external part of a spherical or polygonal covering of a building, of which the cupola (q. v.) is the inner structure, but in general usage dome means the entire covering. It is also loosely used, as in the German Dom and the French _Dome_, to designate a cathedral, or, at times, to signify some other building of importance. A dome may be of any material, wood, stone, metal, earthenware, or it may be built of a single mass or of a double or even triple series of concentric coverings. The dome is a roof, the base of which is a circle, an ellipse, or a polygon, and its vertical section a curved line, concave towards the interior. Hence domes are called circular, elliptical or polygonal, according to the figure of the base. The most usual form is the spherical, in which case its plan is a circle, the section a segment of a circle. Domes are sometimes semi-elliptical, pointed, or formed in curves of contrary flexure, bell-shaped, etc. Except in the earlier period of the development of the dome, the interior and exterior forms were not often alike, and, in the space between a staircase to the lantern was generally made.

Domes are of two kinds, simple and compound. In the simple dome, the dome and the pendentives are in one, and the height is only a little greater than that of an intersecting vault formed by semicircular arches. The dome over the central part of the tomb of Galla Placidia, at Ravena, and those over some of the aisles of Saint Sophia, Constantinople, are of this description. In the compound dome two methods were followed. In both methods a greater height is obtained, and the compound dome was consequently the one used on all important buildings of the later period. In one, the dome starts directly from the top of the circle formed by the pendentives; in the other, a cylindrical wall or "drum" intervenes between the pendentives and the dome, and the height is considerably increased. In churches with domes without drums, the windows are in the dome itself immediately above the springing; otherwise, they are in the drum, and the surface of the dome is generally unbroken. At
the monastery of St. Luke, Phocis, Greece, are two churches of the eleventh century, side by side, the smaller of which has a drum with windows in it, whereas the larger church has no drum, and the windows are in the dome. The drum is universal in all domed churches of the Renaissance, at which period it received special treatment and became a most important feature. Many of these drums are not circular in plan externally, but are many-sided, and the angles are often enriched by marble shafts, etc. The carrying-up of the walls vertically is a good expedient constructionally, as it provides weight above the haunches of the dome and helps to neutralize its thrusts. In the churches of the second period, at Constantinople, Salonica, Athens, and other parts of Greece, in which the true drum occurs, it is of considerable height and is generally eight-sided. Windows come at each side, and over the windows are arches which cut into the dome itself.

A primitive form of the dome and the barrel vault is of great antiquity. In some districts men were compelled to build in stone or brick or mud, because there was no wood, as in Assyria; in other districts they had not the tools to work wood. In all such cases some form of dome or tunnel vault had to be devised for shelter. In tracing the growth of the dome in historical times, it has been regarded as an outcome of the architecture of the Eastern Empire, because it was at Constantinople and in the Byzantine provinces that it was first employed in ecclesiastical structures. But it was the Romans who in reality developed the use of the dome, as of all other applications of the semicircular arch. From Rome it was carried to Constantinople and from the same source to different parts of the Western Empire. In Eastern Christendom the dome became the dominant factor in church design, whether a single dome, as at Saint Sophia, Constantinople (built, 532–537), or a central dome encircled by other domes, as at St. Mark's, Venice, or a row of domes, as at Angoulême. The plan and domes of Angoulême are reproduced in the new Catholic cathedral at Westminster. The Roman dome was a hemisphere supported by a circular wall. Its finest example was the Pantheon, Rome. Equally characteristic, though smaller, examples abound, e.g. at Rome, the temple of Minerva Medica, the tomb of Constantia, now the church of Santa Costanza, etc. Viollet-le-Duc in writing of the dome of the Pantheon says, "This majestic cupola is the widest, the most beautiful, the best constructed, and most stable of all the great domes of the world." The inside diameter of the dome is 142 feet. Previous to the building of the Pantheon in its present domical form, during the reign of Hadrian about A.D. 123, the history of the dome is for the most part a blank.

The primitive Eastern dome seems to have been on a very small scale, and to have been used for subordinate purposes only. It was a common architectural feature in ancient Egypt and Mesopotamia. In later times the dome was largely employed in architecture by the Persian Sassanide, Mohammediands, and the Byzantines. From the first domed churches built for Christian worship sprang Byzantine architecture and its offshoots. The builder of the earliest domed church of any magnitude was Constantine; its locality the famous city of Antioch in Syria. The problem of the Christian domed church, so far at least as its interior is concerned, received in Saint Sophia its full solution. The dome is the prevailing conception of Byzantine architecture, and M. Choisy, in his "Art de bâtir chez les Byzantins," traces the influence of this domical construction on Greek architecture and shows how from their fusion the architecture of the Eastern Empire became possible. Domes were now, from the time of the construction of Saint Sophia, placed over square apartments, their bases being brought to a circle by means of pendentives, whereas, in Roman architecture, domes as a rule were placed over a circular apartment. The grouping of small domes round a large central one was very effective, and one of the peculiarities of Byzantine churches was that the dome had no additional outer covering. The dome was rarely used by medieval builders except when under oriental influence, hence it was practically confined to Spain and Italy. The dome of the cathedral at Pisa, the first model of the Tuscan style of architecture, was begun in the eleventh century, and in the thirteenth was founded the cathedral at Florence. Its dome equals in size that of St. Peter's at Rome, and was its model. During the Italian Renaissance, domed construction became again of the first importance, possibly on account of its classical precedent, and it is interesting to note that the Pantheon became once more the starting-point of a new development which culminated in the domes of St. Peter's, Rome, and St. Paul's, London.

The substructure of the dome of St. Peter's is a round drum, which serves as a stylobate and lifts it above the surrounding roofs. On this stands the ringwall of the drum, decorated with a Corinthian order and carrying an attic; on this sits the oval mass of the noblest dome in the world. The drum, fifty feet high, is pierced by sixteen square-headed windows. The enormous thickness of the stylobate allows an outside offset to receive the buttresses which are set between the windows, in the shape of spurwalls with engaged columns at the corners, over which the entablature is broken. The curve of the dome is of extraordinary beauty. Between its ribs, corresponding to the buttresses below, are three diminishing tiers of small dormer windows. The lantern above, with an Ionic order, repeats the arrangement of windows and buttresses in the drum below, and is surmounted by a Latin cross rising 438 feet above the pavement. The foremost Renaissance church in Florence is the church of the Annunziata, and is remarkable for a fine dome carried on a drum resting directly on the ground. To the latest time of the Renaissance in Venice belongs the picturesque domed church of Santa Maria della Salute. The two finest domes in France are those of the Hôtel des Invalides and the Panthéon (formerly the church of Sainte-Geneviève) at Paris. Domes built in the early part of the twelfth century are to be found at Valencia, Zámbra, Salamanca, Clermont, Le Puy, Cahors. They are also found in Faitou, Périgord, and Auvergne; at Aachen, Cologne, Antwerp, and along the banks of the Rhine; at Aosta, Pavia, Como, Parma, Piacenza, Verona, Milan, etc. There are, besides, the bulbous domes of Russia and the flattened cupolas of the Saracens. The dome became the lantern in English Gothic, and the octagon of Ely cathedral is said to be
the only true Gothic dome in existence. The central octagon of the Houses of Parliament, London, is the best specimen of a modern Gothic dome. Arab domes are mostly of the pointed form such as are derived from the rotation of the Gothic arch or bulbous, the section being a horse-shoe arch. Very beautiful examples are seen in the buildings known as the tombs of the caliphs at Cairo. Among the finest examples of domed buildings in the East are the Tombs of Mohammedan sultans in the south of India and at Agra. The largest dome in America is that of the Capitol at Washington. It is built of iron.

THOMAS H. POOLE.

DOMENECH, EMANUEL-HENRI-DIEUDONNÉ, Abbé, missionary and author, b. at Lyons, France, 4 November 1826; d. in France, June 3, 1886. In the spring of 1846, before completing his seminary studies and when not yet twenty years of age, he left France in response to an urgent appeal for missionaries to help develop the Church in the wilds of Texas, then rapidly filling up with American and European immigrants. He went first to St. Louis, where he spent two years completing his theological course, studying English and German, and gathering knowledge of missionary requirements. In May, 1848, he was assigned to duty at the new German settlement of Castroville in Texas, from which he was transferred later to Brownsville. The war with Mexico was just concluded; raiding bands of Mexicans and rangers were ravaging on both sides of the Rio Grande, while outlaws from the border States and almost equally lawless discharged soldiers filled the new towns, and hostile Indians hovered constantly in the background. A cholera epidemic added its horrors. Nevertheless, the young priest went bravely to work with such energy that he soon became an efficient power for good throughout all Southern Texas. In 1850 he visited Europe and was received by the pope. Returning to Texas, he continued in the mission field two years longer, when he returned to France with health broken and was appointed titular canon of Montpellier. When the French troops were dispatched to Mexico in 1861 he was selected to accompany the expedition as almoner to the army and chaplain to the Emperor Maximilian. After the return to France he devoted his remaining years to European travel, study, and writing, and the exercise of his ecclesiastical functions. In 1882-3 he again visited America.

St. Jerome (Detail) Doménichino, Vatican

Among his numerous works dealing with travel, history, and theology, may be noted: "Jour d'un missionnaire au Texas et au Mexique" (Paris, 1857); "Voyage dans les solitude américaines" (Paris, 1858); "Histoire du jansénisme"; "Histoire du Mexique" (Paris, 1868). His principal works have appeared also in English translation. In regard to his much-controversed "Manuscrit pictographique américain" (Paris, 1860), an examination of the supposed Indian pictographs leaves no doubt that in this case the unsuspecting missionary was grossly deceived.

Consult his own works, with introductions; also Petenöt, Le livre des sauvages (Brussels, 1861).

JAMES MOONEY.

Doménichino, properly Domenico Zampieri, an Italian painter, b. in Bologna, 21 Oct., 1581; d. in Naples, 16 April, 1641. He began his art studies in the school of Calvaert, but being ill-treated there, his father, a poor shoemaker, placed him in the Carracci Academy, where Guido Reni and Al- bani were also students. He was a tall, thoughtful, plodding youth whom his companions called the 'Ox', a nickname also borne by his master Ludovico. He took the prize for drawing in the Carracci Academy, gaining thereby both fame and hatred. Stimulated by success, he studied unremittingly, particularly the expression of the human face, so that Bellori says he could delineate the soul.

His student days over, he first visited Parma and Modena to study Correggio, and then went to Rome, where his earliest friend and patron, Cardinal Agueci, commissioned him to decorate his palace. In Rome he assisted the Carracci with their frescoes in the palace of Cardinal Farnese, who became such an admirer of Doménichino that he had him execute many of the pictures in the Basilian Abbey of Grotta Ferrata. Doménichino's best frescoes are in this church. With Guido he painted, for Cardinal Borghese, in S. Gregorio; for Cardinal Aldobrandini he executed ten frescoes at Villa Frascati; for Cardinal Montalto he decorated S. Andrea della Valle; and for Cardinal Bandini he painted four pictures for S. Silvestro which rank among his best productions.

He immortalized his name by painting (1614) for the altar of S. Girolamo della Carità, the "Communion of St. Jerome", a copy of which, in mosaic, is in S. Pietro's. This is one of the great pictures of the world and was considered second only to Raphael's "Transfiguration". He received about fifty dollars for it. Napoleon took it to Paris but the Allies returned it. Jealousy of Doménichino long accumulating now burst forth, and he was accused of copying his master-piece from Agostino Carracci. Weary of attacks, the

THE VATICAN, ROME
artist went to Bologna but later returned to Rome, where Pope Gregory XV made him painter and architect of the Apostolic Camera (pontifical treasury). In 1630 he settled in Naples and there opened a school, but was assassinated, as in Rome, by envious artists (chiefly of Naples), who disapproved of his paintings. Mental suffering, perhaps poison, hastened his death. Domenichino, although not a master of great originality and inspiration, was a prominent figure in the Bolognese School. Potent in fresco he also excelled in decorative landscapes; his colour was warm and harmonious; his style simple, his chiaroscuro superbly managed, and his subordinate groups and accessories well adjusted and of great interest. The most famous masters of the burin engraved his works, which are: “Portrait of Cardinal Aguichi”, Uffizi, Florence; “Life of St. Nius” (fresco) in Grottina Ferrata near Rome; “Condensation of Adam and Eve”, Louvre, Paris; “St. George and the Dragon”, National Gallery, London; “St. John”, Hermitage, St. Petersburg.

**Domesday Book** is the name given to the record of the great survey of England made by order of William the Conqueror in 1085-86. The name first occurs in the famous “Dialogus de Scaccario”, a treatise compiled about 1176 by Richard Fitznigel, which states that the English called the book of the survey “Domeslei”, or “Day of Judgment”, because the inquiry was one which none could escape, and because the verdict of this matter as to the holding of the land was final and without appeal. Certain it is that the native English resented William’s inquisition. “It is shame to tell”, wrote the chronicler, “what he thought it no shame for him to do. Ox, nor swine, nor swine was left that was not set down upon his writ.” The returns give full information about the land of England, its ownership both in 1085 and in the time of King Edward, its extent, nature, value, cultivators, and villains. The survey embraced all England except the northernmost counties. The results are set down in concise and orderly fashion in two books called the “Exon Domesday”. Another volume, containing a more detailed account of Wilts, Dorset, Somerset, Devon, and Cornwall, is called the “Exon Domesday”, as it is in the keeping of the cathedral chapter of Exeter.

The chief interest of the Domesday Book for us here lies in the light which it throws upon church matters. As Professor Maitland has pointed out, a comparison of Domesday with our earliest charters shows not only that the Church held lands of considerable, sometimes of vast, extent, but that she had obtained these lands by free grant from kings or underking during the Saxon period. We find, for example, that four ministers, Worcester, Evesham, Pershore, and Westminster, were lords of seven-twelfths of the soil of Worcestershire, and that the Church of Worcester alone was lord of one-quarter of that shire besides other holdings elsewhere. It is probable, however, that this did not imply absolute ownership, but only superiority and a right to certain services (Maitland, “Domesday Book and Beyond”, pp. 206-42). This must be borne in mind when we see it stated, and so far correctly, on the statute first occurring in 1066 that the Church represented twenty-five per cent of the assessment of the country in 1066 and twenty-six and one-half per cent of its cultivated area in 1086. These lands were in any case very unequally distributed, the proportion of church land being much greater in the South than in the North. The record does not enable us to tell clearly how far the parochial system had developed, and though in Norfolk and Suffolk all the churches seem to have been previously, amounting to 243 in the former, and 364 in the latter, county, the same care to note the churches was obviously not exercised in the West of England. Much church property seems to have been of the nature of a tenancy held from the king upon condition of some service to be rendered, often a rent in kind. Thus we read; “Alwin the priest holds the sixth part of a hide”, at Turvey, Beds, “and held it tempore regis Edwardi”, and could do what he liked; King William afterwards gave it to him in alms, on condition that he should celebrate two feria masses [feriae missae] for the souls of the King and Queen twice a week.” Valuable as is the information which the Domesday Book supplies, many questions suggested by it remain obscure and are still keenly debated. A face-simile of the whole record was brought out some years ago by photography, and at the end of the eighteenth century an edition was printed in type specially cast to represent the contractions of the original manuscript.

The most convenient introduction to the subject is BALLARD, The Domesday Inquest (London, 1896). The student may be referred to MAITLAND, Domesday Book and Beyond (new ed., London, 1907); to ROUND, Feudal England (London, 1895); and to ETYON, Domesday Studies. But there are many minor essays dealing with questions of local interest.

**Domestic Prelate.** See **Prelate**.

**Domicile** (Lat. *jus domicilii*, right of habitation, residence).—The canon law has no independent and original theory of domicile; both the canon law and all modern civil codes borrowed this theory from the Roman law; the canon law, however, extended and perfected the Roman theory by adding thereto that of quasi-domicile. For centuries ecclesiastical legislation contained no special provision in regard to domicile, adapting itself quite unreservedly on this point both to Roman and Barbarian law. It was only in the thirteenth century, after the revival at Bologna of the study of Roman law, that legislae and then the canonists, returned to the Roman theory, introducing it first into the schools and then into practice. Not that the Church had “canonized” it, so to speak, this particular point of Roman law more than others, but civil law, being more ancient, formed a basis for canon law, which accepted it, at least in so far
as it was not at variance with later decrees of pontifical law. So true is this that there exists no document in which the theory of domicile has been completely and officially expounded by an ecclesiastical legislator.

II. Rome AN Law.—We must therefore revert to Roman law, which established domicile as the extension or communication of a pre-existent legal status of individuals—origin (origo, jus originis). In the theory of the Roman lawyers each man belongs to his municipality, to his city, where, as he contributes his share to the expenses and taxes, so he has a right to the corresponding advantages. Children naturally follow their father's condition and belong likewise to the city, even though born at a distance. Such is the Roman origo, quite akin to what we call nationality, except that the origo relates to the restricted locality of one's birth, and nationality to one's native land. Hence it is birth, the legal birthplace, that determines one's origo, i.e., not the actual site of birth but the place where each one should have been born, the municipality to which the father belonged (L. 1. ff. Ad municip.). Let us now suppose a man settled for a long time in a city which is not his native city. Partly in return for the taxes he pays, and partly to exercise his civic duties, he is granted the status of a real citizen, without loss, however, of his own origo or municipal right. Such then, is the primitive concept of domicile in Roman law: the communication to a man, born in one municipality but residing permanently in another, of the civic rights and duties of the citizens who are natives of the locality. To become as one of the latter, the stranger must create for himself a domicile, and it was this that necessarily led jurists to define domicile and the conditions upon which it could be acquired. Hence the celebrated definition of domicile given by Emperor Diocletian and lustertius (L. 7, C. de incol.): “It is certain that each one has his domicile in the place where he has established his home and business and has his possessions; a residence which he does not intend to abandon, unless called elsewhere, from which he departs only as a traveller and by returning to which he ceases to be a traveller.” The juridical element constitutive of domicile is the intention, the will definitively to settle oneself in a place, this being deduced from the circumstances and especially the conditions of installation. It implies indefinite stability, not perpetuity in the restricted sense of the word, but the abrogation of the right to change domicile. Another domicile may at any time be acquired on the same conditions as the first; it is lost when the intention of abandoning it is coupled with the fact of desertion. Since, therefore, domicile conferred the same rights as origo, its importance became gradually more and more marked.

We can now better understand the words that so often recur in Roman law and have been adopted by canonists: those who belong to a municipality by birth are citizens (civiti); those who come from elsewhere, but have become its members by domicile are inhabitants (incolae), though these terms are used almost synonymously by jurists and canonists; those who have spent a sufficient time there without, however, acquiring a domicile, are strangers (iugiti) to the Empire, and to them canonists concede a quasi-domicile. Finally, those who make but a passing sojourn there are transients (perigrini; cf. L. 239, de Verb. sign.). To these categories canonists have added one which the Roman origo, being permanent, could not recognize, namely the wanderers (vaghi), who have fixed residence only on the day when they abandon one domicile, have not as yet acquired another.

II. Development of "Domicile" in Canon Law.

—In the troublous times that prevailed after the Barbarian invasions, the domicile of Roman law was lost sight of, and even the word itself disappeared from the juridical language of the time. However, this does not mean that persons inhabiting certain limited districts had wholly ceased to be connected with local authority, whether civil or religious, nor that all acts were wholly regulated exclusively, after the barbarian concept, by a personal code. The personal status of habitation could not, it is true, be ignored, but it no longer served for a theory of domicile. The medieval ecclesiastical canons say that each Catholic (fidelis) should pay his tithes in the church where he was baptized and that his obsequies should be held where he pays his tithes and belongs. Hence the mention of domicile.

The Roman theory was again restored to honour by the glossarists of the Bolognese School, especially by Accursius in the beginning of the thirteenth century. Whether it was because they mistook the real meaning of origo or desired to explain it in a way that suited the customs of their time, they interpreted it as a sort of domicile resulting from one's birthplace, and if one was born there per accidens, from the place of one's father's birth. Except for this inaccuracy, the Roman theory was well expounded. Moreover, according to the favourite principles of their time, the glossarists brought into the doctrine of domicile the double constitutive element of domicile (or, properly speaking, of acquired domicile): the material element (corpus, i.e., habitation), and the juridical or formal element (animus), i.e., the intention to remain in this habitation indefinitely. Although they did not contribute directly to this revival of domicile, canonists nevertheless adopted it and it was definitively admitted in the gloss of "Liber Sextus" (cc. 2 and 3, de sepult.). They applied these rules to the acts of Christian life: baptism, passional, communion, viaticum, confession, extreme unction, funerals, interments, etc., and also to ordinary transactions. The actual canonical rules on domicile are about the same.

In the meantime almost the only development of canon law in this matter has been the creation of the quasi-domicile theory, foreign alike to Roman and modern civil law. As its name implies, quasi-domicile is closely patterned on domicile and consists in a sojourn in some one place during a sufficient length of time. Not only does it not call for abandonment of the real domicile, but can co-exist with the latter and even supposes the intention of returning thither. It was evident that the ordinary acts of the Christian life, which, rights and obligations of a part, might be confined to permanent residents only; hence the necessity of assimilating to such residents those who sojourn in the place for a certain length of time. The canonists soon concluded that whoever has a quasi-domicile in a place may receive there the sacraments and perform there legitimately all the acts of the Christian life without forfeiting any of his rights in the place of his real domicile; he may even thus become subject to the judicial authority of his place of quasi-domicile. The only restrictions are, as we shall see, for ordinaries and, to a certain extent, for funerals. For a long time, however, the theory remained vague and indeterminate. Authors could scarcely agree as to precisely what was meant by the "sufficient length" of time (non breve tempus) required for quasi-domicile, and they hesitated to pronounce on the various positions concerning the reasons for a sojourn and the degree in which they could create presumption of an intention to acquire quasi-domicile. Strictly speaking, the question was really important only in regard to those marriages whose validity depended on the existence of a quasi-domicile in countries where the Tridentine decree "Tamesis" had been published; in this way, as we shall see below, new legal questions arose.

The quasi-domicile theory was not definitively settled until the appearance of the Instruction of the Holy Office addressed to the Bishops of England and the United States, 7 June, 1867, in which quasi-domicile is
Domicile

105

Domicile

patterned as closely as possible on domicile. Like the latter, it is made up of the double element of fact and right, i.e., of residence and the intention of abiding in it for a sufficient length of time, this time being clearly stated as a period covering more than six months—per maiorem anni portem. As soon as these two conditions coexist, quasi-domicile is acquired and immediately involves the legal use of rights and competencies resulting therefrom. (See below for a recent restriction in regard to marriage.) Finally, quasi-domicile is lost by the simultaneous cessation of both its constitutive elements, i.e., by the abandonment of residence without any intention of returning to it. Sufficient to add to that in this matter the canon law, yielding to custom, tends easily to adapt itself to the provisions of civil law, e.g., as regards the legal domicile of minors, wards, and other analogous provisions.

III. PRESENT LAW.—From the preceding explanation there results a very important conclusion which throws a strong light on canonical legislation concerning domicile and which we must now set forth. It is this: the law does not deal with domicile for its own sake, but rather on account of its consequences; in other words, on account of the personal rights and obligations attached thereto.

It is acquired when, according to the case in point, e.g., marriage, ordination, judicial competency. Keeping therefore in view the legal consequences of domicile and its various forms it may be defined as a stable residence which entails submission to local authority and permits the exercise of acts for which this authority is competent.

To this definition the laws and their commentators confine themselves, without touching on the legal effects of domicile. As we have already seen, domicile, properly so called, is the place one inhabits indefinitely (locus perpetua habitationis), such perpetuity being quite compatible with more or less severe restrictions. It matters not whether one be the owner or simply the occupant of the house in which one dwells or whether one owns more or less property in the locality. The place of one's domicile is not the house wherein one resides but the territorial district in which the house or home stands. This district is usually the smallest territory possessing a distinct, self-governing organization. All authors agree that, from a civil viewpoint, the municipality is the place of domicile and, canonically considered, the territorial division in which one resides, e.g., mission or station. It is in the municipality that the acts and rights of civil life are exercised, and the parish of the Christian life. Strictly speaking one cannot acquire domicile in a ward or hamlet or in any territorial division which does not form a self-governing group. Of course there are certain acts that do not depend, or that no longer depend, on local authority; in this sense, it is possible to speak of domicile in a diocese when it is question e.g., of ordination, or of domicile in a province apropos of the competency of a tribunal. But these exceptions are merely apparent; that one has a certain status within a given diocese. The canon law has never recognized as domicile an unstable residence in different parts of a diocese, without intent to establish oneself in some particular parish. Canon law (c. 2, de sepult. in VI, like Roman law (L. 5, 7, 27, Ad munip.), allows a double domicile, provided there be in each an equally morally equal installation; the most ordinary example of this being a winter domicile in the city and a summer domicile in the country. There are three kinds of domicile: domicile of origin, domicile of residence or acquired domicile, and necessary or legal domicile of origin or application of the Roman origo, is that assigned to each individual by his place of nativity unless he be accidentally born outside of the place where his father dwells; practically it is the paternal domicile for legitimate and the maternal domicile for illegitimate children. Again, in reference to the spiritual life, domicile of nativity is the place where adults and abandoned children are baptized. The domicile of residence or acquired domicile is that of one's own choice, the place where one establishes a residence for an indefinite period. It is acquired by the fact of material residence joined to the intention of there remaining as long as one has no reason for settling elsewhere; this intention being manifested either by an express declaration or by circumstances. Once acquired, domicile subsists, despite more or less prolonged absences, until one leaves it with the intention of not returning for an indefinite period.

Finally, the domicile that is imposed by law; for prisoners or exiles it is their prison or place of banishment; for a wife it is the domicile of the husband which she retains even after becoming a widow; for children under age it is that of the parents who have authority over them; for wards it is that of their guardians; lastly, for whoever exercises a perpetual charge, e.g., a bishop, canon, or parish priest, etc., it is the place where he discharges his functions.

Quasi-domicile is of one kind only, namely of residence and choice and cannot be acquired in any other way. This is domicile itself and is deduced mainly from such reasons as to justify a sojourn of at least six months, e.g., the pursuit of studies, or even for an indefinite period, as in the case of domestics. Quasi-domicile is presumed, especially for marriage, after a month's sojourn according to the Constitution "Pacis abhinc annis" of Benedict XIV, 10 March, 1758; but this presumption yields to contrary proof, except however when it is transformed into a presumption juris de jure, which admits of no contrary proof; such is the case for the United States in virtue of the induct of 6 May, 1866, granted at the request of the Consistory of 1884 (Acta et Decreta, p. cix) and extended to the Diocese of Paris, 20 May, 1905. This being so, quasi-residents are regarded as subjects of the local authority just as are permanent residents, being therefore parishioners bound by local laws and possessing the same rights as residents, with this difference, that, if they so choose, they may go and use their rights in their own domicile. They can, therefore, apply to the local parish priest, as to their own parish priest, not only for those sacraments administered to every one who presents himself, e.g., Holy Eucharist and penance, but also for the baptism of their children, for first Communion, paschal Communion, Viaticum, and extreme unction. Their nuptials may also be solemnized in his presence and, except when they have chosen to be buried elsewhere, their funerals should take place from the parish church of their quasi-domicile. Finally, the quasi-domicile permits of their legitimate citation before a judge competent for the locality.

As regards marriage, the quasi-domicile affects its validity in parishes subject to the decree "Tametsi" until the decree "Ne temere" of 2 August, 1907, rendered the competency of the priest in some parishes extradiocesan, so that all marriages contracted in his presence, within his parochial territory, are valid; for a licit marriage, however, one of the two betrothed must have dwelt within the parish for at least a month.

On the other hand those who have neither a domicile nor a quasi-domicile in a parish are only there as transients (peregrini), are not counted as parishioners; the parish priest is not their pastor and they should respect the pastoral rights of their own parish priest at least in so far as possible. The restrictions of former times, it is true, have been greatly lessened and now are at present no obstacle to obtaining parochial rights for annual confession, paschal Communion or the Viaticum. Something, however, still remains: for marriage transients must ask the delegation or authorization of the parish priest of their domi-
The ducal (regularly of the bride) if the contracting parties have not already sojourned for a month within the parish where they seek to contract marriage; funerals also belong to the parish priest of the domicile, i.e. if the interested parties desire to, and can transport to his parish church the body of the deceased, in most events the parish priest may demand the parochial dues known as quarta funeraria. Generally speaking, transients (peregrini) are not subjects of the local ecclesiastical authority, they are not held to the observance of local laws except inasmuch as these affect public order, nor do they become subjects of the local justice, however.

As to the domicile requisite for ordination there are special rules formulated by Innocent XII, in his Constitution “Speculatorum”, 4 November, 1694. The candidate for orders depends upon a bishop, first by reason of his origin, that is to say, of the place where his father had a domicile at the time of his son's birth; second by reason of his own acquired domicile. But the conditions which this domicile must satisfy are rather severe: the candidate must have already resided in the diocese for ten years or else have transported most of his movable goods to a house in which he has resided for three years; moreover, he must firmly settle under oath his intention of definitively establishing himself in the diocese. This is a qualified domicile, the conditions of which must not be extended to other cases.

A. BOUDINON.

**DOMINIC**

Saint, founder of the Order of Preachers, commonly known as the Dominican Order; b. at Calaroga, in Old Castile, c. 1170; d. 6 August, 1221.

His parents, Felix Guzman and Joanna of Azu, undoubtedly belonged to the nobility of Spain, though probably neither was connected with the reigning house of Castile, as some of the saint's biographers assert. Of Felix Guzman, personally, little is known, except that he was in every sense the worthy head of a family of saints. To nobility of blood Joanna of Azu added a nobility of soul which so enshrined her in the private pantheon of the family that she was solemnly canonized by Leo XII. The example of such parents was not without its effect upon their children. Not only Saint Dominic but also his brothers, Antonio and Manes, were distinguished for their extraordinary sanctity. Antonio, the eldest, became a secular priest and, having distributed his patrimony to the poor, entered a hospital where he spent his life ministering to the sick. Manes, following in the footsteps of Dominic, became a Friar Preacher, and was beatified by Gregory XVI.

The birth and infancy of the saint were attended by many marvels forecasting his heroic sanctity and great achievements in the cause of religion. From his seventh to his fourteenth year he pursued his elementary studies under the tutelage of his maternal uncle, the archpriest of Gualdiaz, not far distant from Calaroga. In 1184 Saint Dominic entered the University of Palencia. Here he remained for ten years prosecuting his studies with such arduous and success that throughout the ephemeral existence of that institution he was held up to the admiration of his schoolmen as all that a student should be. Amid the frivolities and dissipations of a university city, the life of the future saint was characterized by a seriousness of purpose and an austerity of manner which singled him out as one from whom great things might be expected in the future. But more than once he proved that under this austere exterior he carried a heart as tender as a woman's. On one occasion he sold his books, annotated with his own hand, to retrieve the starving poor of Palencia. His biographer and contemporary, Bartholomew of Trent, states that twice he tried to sell himself into slavery to obtain money for the liberation of those who were held in servitude by the Moors. These facts are worthy of mention in view of the cruel and satirical attacks to which some non-Catholic writers have endeavored to foist upon one of the most charitable of men. Concerning the date of his ordination his biographers are silent; nor is there anything from which that date can be inferred with any degree of certainty. According to the deposition of Brother Stephen, a fellow of Lombardy, given in the process of canonization, Saint Dominic was still a student at Palencia when Don Martin de Bazan, the Bishop of Osma, called him to membership in the cathedral chapter for the purpose of assisting in its reform. The bishop realized the importance to his plan of reform of having constantly before his canons the example of one of Dominic's eminent holiness. Nor was he disappointed in the result. In recognition of the part he had taken in converting its members into canons regular, Dominic was appointed sub-prior of the reformed chapter. On the accession of Don Alonzo, brother of the Saint, to the chair of Osma in 1201, Dominic became superior of the chapter with the title of prior. As a canon of Osma, he spent nine years of his life hidden in God and rapt in contemplation, scarcely passing beyond the confines of the chapter house.

In 1203 Alfonso IX, King of Castile, deputed the Bishop of Osma to demand from the Lord of the Marches, presumably a Danish prince, the hand of his daughter on behalf of the king's son, Prince Ferdinand. For his companion on this embassy Don Diego chose Saint Dominic. Passing through Toulouse on the pursuit of their mission, they beheld with amazement and sorrow the work of spiritual ruin wrought by the Albigensian heresy. It was in the contemplation of this scene that Dominic first conceived the idea of founding an order for the purpose of combating heresy and spreading the light of the Gospel by preaching to the ends of the then known world. Their mission having ended successfully, Diego and Dominic were dispatched on a second embassy, accompanied by a splendid retinue, to escort the betrothed princess to Castile. This mission, however, was brought to a close by the death of the young woman in question. The two companions went where they would, and they set out for Rome, arriving there towards the end of 1204. The purpose of this journey was to enable Diego to resign his bishopric that he might devote himself to the conversion of unbelievers in distant lands. Innocent III, however, refused to approve this project, and instead sent the bishop and his companion to Languedoc to join forces with the Cistercians, to whom he had entrusted the crusade against the Albigensians. The scene that confronted them on their arrival in Languedoc was not one of encouraging one. The Cistercians, on account of their worldly manner of living, made little or no headway against the Albigensians. They had entered upon their work with considerable pomp, attended by a brilliant retinue, and well provided with the comforts of life. To this display of worldliness the leaders of the heretics opposed a rigid asceticism which commanded the respect and admiration of their followers. Diego and Dominic quickly saw that the failure of the Cistercian apostolate was due to the monks' indulgent habits, and finally prevailed upon them to adopt a more austere manner of life. The result was at once apparent in a greatly increased number of converts. Theological disputes played a prominent part in the propaganda of the heretics. Dominic and his companion, therefore, lost no time in engaging their opponents in this kind of theological exposition. Whenever the opportunity
offered, they accepted the gage of battle. The thorough training that the saint had received at Palencia now proved of inestimable value to him in his encounters with the heretics. Unable to refute his arguments or counteract the influence of his preaching, they protected the women of their country from the repeated insults and threats of physical violence. With Prouille for his head-quarters, he laboured by turns in Faujoux, Montpellier, Servian, Béziers, and Carcassonne. Early in his apostolate around Prouille the saint realized the necessity of an institution that would protect the women of that country from the influence of the heretics. Many of them had already embraced Albigenianism and were its most active propagandists. These women erected convents, to which the children of the Catholic nobility were often sent—for want of something better—to receive an education, and, in effect, if not on purpose, to be tainted with the spirit of heresy. It was needful, too, that women converted from heresy should be safeguarded against the evil influence of their own homes. To supply these deficiencies, Saint Dominic, with the permission of Foulques, Bishop of Toulouse, established a convent at Prouille in 1206. To this convent and afterwards to that of Saint Sixtus, at Rome, he gave the rule and constitutions which have ever since guided the nuns of the Second Order of Saint Dominic.

The year 1208 opens a new epoch in the eventful life of the founder. On 15 January of that year Pierre de Castelnau, one of the Catholic legates, was assassinated. This abominable crime precipitated the crusade under Simon de Montfort, which led to the temporary subjugation of the heretics. Saint Dominic participated in the stirring scenes that followed, but always on the side of heresy, wielding the arms of the spirit, while others wrought death and desolation with the sword. Some historians assert that during the sack of Béziers, Dominic appeared in the streets of that city, cross in hand, interceding for the lives of the women and children, the aged and the infirm. This testimony, however, is based on documents which Touron regards as certainly apocryphal. The testimony of the most reliable historians tends to prove that the saint was neither in the city nor in its vicinity when Béziers was sacked by the crusaders. We find him generally during this period following the Catholic army, reviving religion and reconciling the factions that had caused the retreat of the crusaders. In September, 1209, that Saint Dominic first came in contact with Simon de Montfort and formed with him that intimate friendship which was to last till the death of the brave crusader under the walls of Toulouse (23 June, 1218). We find him by the side of de Montfort at the siege of Lavaur in 1211, and again in 1212, at the capture of La Penne d'Ajen. In the latter part of 1212 he was at Pamiers labouring, at the invitation of de Montfort, for the restoration of religion and morality. Lastly, just before the battle of Muret, 12 September, 1213, the saint is again found in the council that preceded the battle. During the progress of the conflict, he knelt before the altar in the church of Saint-Jacques, praying for the triumph of the Catholic arms. So remarkable was the victory of the crusaders at Muret that Simon de Montfort regarded it as altogether miraculous, and piously attributed it to the prayers of Saint Dominic. In gratitude to God for this decisive victory, the crusader erected a chapel in the church of Saint-Jacques, which he dedicated, it is said, to Our Lady of the miracles wrought there. It would appear, therefore, that the devotion of the French (v. e.), which tradition says was revealed to Saint Dominic, had come into general use about this time. To this period, too, has been ascribed the foundation of the Inquisition by Saint Dominic, and his appointment as the first Inquisitor. As both these much controverted questions will receive special treatment elsewhere in this work, it will suffice for our present purpose to note that the Inquisition was in full operation in 1198, or seven years before the saint took part in the apostolate in Languedoc, and while in the region of the heretics there was for a certain time identified with the operations of the Inquisition, it was only in the capacity of a theologian passing upon the orthodoxy of the accused (see Inquisition, Spanish). Whatever influence he may have had with the judges of that much maligned institution was always employed on the side of mercy and forbearance, as witness the classic case of Ponce Roger.

In the meantime, the saint's increasing reputation for heroic sanctity, apostolic zeal, and profound learning caused him to be much sought after as a candidate for various bishoprics. Three distinct efforts were made to raise him to the episcopate. In July, 1212, the chapter of Béziers chose him for their bishop. Again, the canons of Saint-Lizier wished him to succeed Garcia de l'Orte as Bishop of Comminges. Lastly, in 1215 an effort was made by Garcias de l'Orte himself, who had been transferred from Comminges to Auch, to make him Bishop of Navarre. But Saint Dominic absolutely refused all episcopal honours, saying that he would rather take flight in the night, with nothing but his staff, than accept the episcopate. From Muret Dominic returned to Carcassonne, where he resumed his preaching and missionary success. It was not till 1214 that he returned to Toulouse. In the meantime the influence of his preaching and the eminent holiness of his life had drawn around him a little band of devoted disciples eager to follow wherever he might lead. Saint Dominic had never foreseen the great things that had been accomplished, and the order of the Rosary, which he had founded for his religious community, might have been absorbed. The order of the Rosary was canonically established in 1264. In the meantime the saint became the spiritual father of the community, and his influence extended over the whole world. The next year Pierre Seilla, a wealthy citizen of Toulouse, who had placed himself under the direction of Saint Dominic, put at their disposal his own commodious dwelling. In this way the first convent of the Order of Preachers was founded on 25 April, 1215. But they dwelt here only a year when Foulques established them in the church of Saint Romanus. Though the little community had proved amply the need of its mission and the efficiency of its service to the Church, it was far from satisfying the full purpose of its founder. It was at best but a diocesan congregation, and Saint Dominic had dreamed of a world-order that would carry its apostolate to the ends of the earth. But, unknown to the saint, events were shaping themselves for the realization of his hopes. In November, 1215, an ecumenical council was to meet at Rome to deliberate on the improvement of morals, the extinction of heresy, and the strengthening of the faith. This was certainly the mission Saint Dominic had determined on for his order. With the Bishop of Toulouse, he was present at the deliberations of this council. From the very first session it seemed that events conspired to bring to a conclusion plans to a success of the Rosary. The council not only arraigned the bishops for their neglect of preaching. In canons x they were directed to delegate capable men to preach the word of God to the people. Under these circumstances it would reasonably appear that Dominic's request for the confirmation of an order designed to carry out the mandates of the council would be joy-
fully granted. But while the council was anxious that these reforms should be put into effect as speedily as possible, it was at the same time opposed to the institution of any new religious orders, and had legislated to that effect in no uncertain terms. Moreover, papal bulls had always been looked upon as primarily a function of the episcopate. To bestow this office on an unknown and untried body of simple priests seemed too original and too bold in its conception to appeal to the conservative prelates who influenced the deliberations of the council. When, therefore, his petition for the approbation of his infant institute was refused, it could not have been wholly unexpected by Saint Dominic.

Returning to Languedoc at the close of the council in December, 1215, the founder gathered about him his little band of followers and informed them of the wish of the council that there should be no new rules for religious orders. Thereupon they adopted the ancient rule of Saint Augustine, which, on account of its generality, would easily lend itself to any form they might wish to give it. This done, Saint Dominic again appeared before the pope in the month of August, 1216, and again solicited the confirmation of his order. The pope, bending his ear and observation, gave his consent. December, 1216, the Bull of confirmation was issued.

Saint Dominic spent the following Lent preaching in various churches in Rome, and before the pope and the papal court. It was at this time that he received the order and title of Master of the Sacred Palace, or Pope's Tribunal, as it is called, by the pope. This office has been held uninterrupted by members of the order from the founder's time to the present day. On 15 August, 1217, he gathered the brethren about him at Prouille to deliberate on the affairs of the order. He had determined upon the heroic plan of distributing his little band of followers over all Europe. The result proved the wisdom of an act so wise, to the eye of human prudence at least, seemed little short of suicidal. To facilitate the spread of the order, Honorius III, on 11 Feb., 1218, addressed a Bull to all bishops, abbots, and priors requesting their favour on behalf of the Order of Preachers. By another Bull, dated 3 Dec., 1218, Honorius III bestowed upon the order the church of Saint Sixtus in Rome. Here, amid the tombs of the Appian Way, was founded the first monastery of the order in Rome. Shortly after taking possession of Saint Sixtus, at the invitation of Honorius, Saint Dominic began the somewhat difficult task of restoring the pristine observance of religious discipline among the various Roman communities of women. In a comparatively short time the work was accomplished, to the great satisfaction of the pope. His own career at the University of Palencia, and the practical use to which he had put it in his encounters with the Albigensians, as well as his keen appreciation of the needs of the time, convinced the saint that to ensure the highest efficiency in the work of the apostolate, his followers should be afforded the best educational advantages obtainable. It was for this reason that on the occasion of the dispersion of the brethren at Prouille he dispatched Matthew of France and two companions to Paris. A foundation was made in the vicinity of the University of Paris, and the friars took possession in October, 1217. Matthew of France was appointed superior and Michael de Fabra placed in charge of the studies with the title of Lecturer. On 6 August of the following year, Jean de Barastre, dean of Saint-Quentin and professor of theology, bestowed on the community the hospice of Saint-Jacques, which he had built for his own use. Having effected a footing at the University of Paris, Saint Dominic and his brethren, next determined upon a settlement at the University of Bologna. Bertrand of Garriga, who had been summoned from Paris, and John of Navarre, set out from Rome, with letters from Pope Honorius, to make the desired foundation. On their arrival at Bologna, the church of Santa Maria della Mascarella was placed at their disposal. So rapidly did the Roman community of Saint Sixtus grow that the need of more commodious quarters soon became urgent. Honorius, who seemed to delight in furthering the order and furthering its interests to the utmost of his power, met the emergency by bestowing on Saint Dominic the basilica of Santa Sabina.

Towards the end of 1218, having appointed Reginald of Orleans his vicar in Italy, the saint, accompanied by several of his brethren, set out for Spain. Bologna, Prouille, Toulouse, and Fanjeaux were visited on the way. From Prouille two of the brethren were sent to establish a convent at Lyons. Segovia was reached just before Christmas. In February of the following year he founded the first monastery of the order in Spain. Turning southward, he established a convent for women at Madrid, similar to the one at Prouille. It is quite probable that on this journey he personally presided over the erection of a convent in connexion with his alma mater, the University of Palencia. At the invitation of the Bishop of Barcelona, a house of the order was established in that city.

Again bending his steps towards Rome he recrossed the Pyrenees and visited the foundations at Toulouse and Paris. During his stay in the latter place he caused houses to be erected at Limoges, Metz, Reims, Poitiers, and Orleans, which in a short time became centres of Dominican activity. From Paris he sailed for Naples in 1219, and established his house at Sorrento. His arrival at the papal court was the signal for the showing of new favours on the order. Notable among these marks of esteem were many complimentary letters addressed by Honorius to all those who had assisted the Fathers in their various foundations. In March of this same year Honorius, through his representatives, bestowed upon the order the church of San Eustorgio in Milan. At the same time a foundation at Viterbo was authorized. On his return to Rome, towards the end of 1219, Dominic sent letters to all the convents anew, promising the first general council of the order, to be held at Bologna on the feast of the following Pentecost. Shortly before, Honorius III, by a special Brief, had conferred upon the founder the title of Master General, which till then he had held only by tacit consent. At the very first session of the chapter in the following spring the saint startled his brethren by offering his resignation as master general. It is needless to say the resignation was not accepted and the founder remained at the head of the institute till the end of his life.

Soon after the close of the chapter of Bologna, Honorius III addressed letters to the abbey of San Vittorio at Sillia, and to the prior of the convent of Saint Sabina at Aquila, ordering that several of their religious be deputed to begin, under the leadership of Saint Dominic, a preaching crusade in Lombardy, where heresy had developed alarming proportions. For some reason or other the plan of the pope was not carried out. The promised support failing, Dominic, with a little band of his own brethren, threw himself into the field, and, as the event proved, spent himself in an effort to bring back the heretics to their allegiance to the Church. It is said that 100,000 unbelievers were converted by the preaching and the miracles of the saint. According to Laënnec, Saint Dominic set down his preaching in Lombardy that the saint instituted the Militia of Jesus Christ, or the third order, as it is commonly called, consisting of men and women living in the world, to protect the rights and property of the
DOMINIC

Church. Towards the end of 1221 Saint Dominic returned to Rome for the sixth and last time. Here he received many new and valuable concessions for the order. In January, February, and March of 1221 three consecutive Bulls were issued commending the one and predating the Church. The thirtieth of May, 1221, found him again at Bologna presiding over the second general chapter of the order. At the close of the chapter he set out for Venice to visit Cardinal Ugolino, to whom he was especially indebted for many substantial acts of kindness. He had scarcely returned to Bologna when a fatal illness attacked him. He died after three weeks of illness, the third of which he bore with heroic patience. In a Bull dated at Spoleto, 13 July, 1234, Gregory IX made his cult obligatory throughout the Church.

The life of St. Dominic was one of tireless effort in the service of God. While he journeyed from place to place he prayed and preached almost uninteruptedly. His penances were of such a nature as to cause the brethren, who accidentally discovered them, to fear the effect upon his life. While his charity was boundless he never permitted it to interfere with the stern sense of duty that guided every action of his life. If he abominated the evil and labored against the exaltation of false and heretical tenets, he was far more moved by love for God and hatred of sin than those whom he laboured. He never failed to distinguish between sin and the sinner. It is not to be wondered at, therefore, if this athlete of Christ, who had conquered himself before attempting to conquer any else, was more than once chosen to show forth the power of God. The failure of the fire at Fanjeaux to consume the dissertation he had employed against the heretics, and which was thrice thrown into the flames; the raising to life of Napoleon Orsini; the appearance of the angels in the reign of Sixtus in response to his prayers, and but a few of the supernatural happenings by which God was pleased to attest the eminent holiness of His servant. We are not surprised, therefore, that, after signing the Bull of canonization on 13 July, 1234, Gregory IX declared that he no more doubted the saintliness of Saint Dominic than he did that of Saint Peter and Saint Paul.

JOHN B. O’CONNOR.

DOMINICAL, Rule of Saint. See PREACHERS, ORDER OF.

DOMINICAL LETTER, a device adopted from the Romans by the old chroniclers to aid them in finding the day of the week corresponding to any given date, and indirectly to facilitate the adjustment of the "Proprium de Tempore" to the "Proprium Sanc- torum" when constructing the ecclesiastical calendar for any year. In the Church of movable and immovable feasts (see CALENDAR, CHRISTIAN), has from an early period taken upon herself, as a special charge to regulate the measure- ment of time. To secure uniformity in the observance of feasts and fasts, she began, even in the patris- tic age, to supply a computus, or system of reckoning, by which the relation of the solar and lunar years might be accommodated and the celebration of Easter determined. Naturally she adopted the astronomical methods then available, and these methods and the terminology belonging to them, having become tradi- tional, were perpetuated, almost as a matter of routine, after the reform of the calendar, in the prolegomena to the Breviary and Missal.

The Romans were accustomed to divide the year into nundinums, periods of eight days; and in their marble fasts, or calendars, of which numerous specimens of the first eight centuries are extant, the month was marked by a to denote the days of each which each period was composed. When the Eastern seven-day period, or week, was introduced, in the time of Augustus, the first seven letters of the alphabet were employed in the same way to indicate the days of this new division of time. In fact, fragmentary calendars on marble still survive in which both a cycle of eight letters—A to H—indicating nundinae, and a cycle of seven letters—A to G—indicating weeks, are used side by side (see "Corpus Inscriptionum Latinae", 2 nd ed., I, 220).

The same peculiarity occurs in the Philocalian Calen- der of A.D. 556, but this, as a calendar, is not attesta- ted by the Christians, and in their calendars the days of the month from 1 January to 31 December were marked with a continuous recurring cycle of seven letters: A, B, C, D, E, F, G. A was always set against 1 January, B against 2 January, C against 3 January, and so on. Thus F fell to 6 January, G to 7 January, A again recurred on 8 January, and also conse- quently, on 15 January, 22 January, and 29 January.

Continuing in this way, 30 January was marked with a B, 31 January with a C, and 1 February with a D. Supposing this to be carried through the ordinary year (i.e. not a leap year), it will be found that a D corresponds to 1 March, G to 1 April, B to 1 May, E to 1 June, G to 1 July, C to 1 August, F to 1 September, A to 1 October, D to 1 November, and F to 1 December—a result which Durandus recalled in the following dictum—

Alta Domat Dominus, Gratias Beata Equerentes Contemnit Ictos, Augebit Dona Fidei.

Now, as a moment’s reflection shows, if 1 January is a Sunday, all the days marked by A will also be Sundays; if 1 January is a Saturday, Sunday will fall on 2 January, which is the day after A. If a leap year, B will be Sundays; if 1 January is a Monday, then Sunday will not come until 7 January, a G, and all the days marked by G will be Sundays. This being explained, the Dominical Letter of any year is defined to be that letter of the cycle, A, B, C, D, E, F, G, which corresponds to the day upon which the first Sunday (and every subsequent Sunday) falls.

It is plain, however, that when leap year occurs, a complication is introduced. February has then twenty-nine days. According to the Anglican and civil calendars this extra day is added to the end of the month; according to the Catholic ecclesiastical calendar February 24 is counted twice. But in either case 1 March is then one day later in the week than 1 February, or, in other words, for the rest of the year the Sundays come a day earlier than they would in a common year. This is expressed by saying that the leap year has two Dominical Letters, the second being the letter which precedes that with which the year started. For example, 1 January, 1907, was a Tues- day; the first Sunday fell on 6 January, or an F. F was, therefore, the Dominical Letter for 1907. The first of January, 1908, was a Wednesday, the first Sun- day fell on 5 January, and E was the Dominical Let- ter, but as 1908 was leap year, its Sundays after Feb- ruary came a day sooner than in the normal year and were D's. The year 1908, therefore, had a double Dominical Letter, E-D. In 1909, 1 January is a Fri- day and the Dominical Letter is C. In 1910 and 1911,
I January falls respectively on Saturday and Sunday and the Dominical Letters are B and A.

This, of course, is all very simple, but the advantage of the device lies, like that of an algebraic expression, in its being a mere symbol adaptable to any year. By constructing a table of letters and days of the year, A always being set against 1 January, we can at once see the relation between the days of the week and the day of any month, if we know the Dominical Letter. This may always be found by the following rule of De Morgan's, which gives the Dominical Letter for any year, or the second Dominical Letter if it be leap year.

II. Take the quotient found by dividing the given year by 4 (neglecting the remainder).

III. Take 10 from the centesimal figures of the given year if that can be done.

IV. Take the quotient of III divided by 4 (neglecting the remainder).

V. From the sum of I, II, and IV, subtract the product III \times \frac{10}{4}.

VI. Find the remainder of V by 7: this is the number of the Dominical Letter, supposing A, B, C, D, E, F, G to be equivalent respectively to 0, 1, 2, 3, 4, 5, 6.

For example, to find the Dominical Letter of the year 1913:

\(\begin{align*}
(I, I, IV) & = 1914 + 478 + 0 = 2392. \\
(II, III) & = 19 - 16 = 3. \\
(V) & = 2392 - 3 = 2389. \\
\text{remainder} & = 2.
\end{align*}\)

Therefore the Dominical Letter is E.

But the Dominical Letter had another very practical use in the days before the "Ordo divini officii recitandi" was printed annually and when, consequently, a priest had only to turn to the "Ordo" for himself (see Ducange, Criticon). As will be seen in the articles Easter and Easter Controversy, Easter Sunday may be as early as 22 March or as late as 25 April, and there are consequently thirty-five possible days on which it may fall. It is also evident that each Dominical Letter allows five possible dates for Easter Sunday. Thus in a year whose Dominical Letter is A (i.e. when 1 January is a Sunday), Easter must be either on 26 March, 2 April, 9 April, 16 April, or 23 April, for these are all the Sundays within the defined limits. But according as Easter falls on one or another of these Sundays we shall get a different calendar, and hence there are five possible calendars for years whose Dominical Letter is A. Similarly, there are five possible calendars for years whose Dominical Letter is B, five for C, and so on, thirty-five possible combinations in all. Now, advantage was taken of this principle in the arrangement of the old Pye or directorium which preceded our present "Ordo". The thirty-five possible calendars were all included therein and numbered, respectively, primum A, secundum A, tertium A, etc.; primum B, secundum B, etc. Hence for anyone wishing to use the Pye the first thing to determine was the Dominical Letter of the given year, and then he could use the means of the Golden Number or the Epact, and by the aid of a simple table, to find which of the five possible calendars assigned to that Dominical Letter belonged to the year in question. Such a table as that just referred to, but adapted to the reformed calendar and in more convenient shape, will be found at the beginning of every Brevarian and Missal under the heading, "Tabula Paschalis nova reformata."

The Dominical Letter does not seem to have been familiar to Bede in his "De Temporum Ratione", but in its place he adopts a similar device of seven numbers which calls "cancelaciones" (De Temp. Rat., cap. iii). This was of Greek origin. The Concurrents are numbers denoting the day of the week on which 21 March falls in the successive years of the solar cycle, 1 standing for Sunday, 2 (feria secunda) for Monday,
and about the Hayna River, as well as the remarkable salubrity of the country of the Ozamas, on the south coast, Isabella, which had been found unhealthy, was abandoned. At the mouth of the Ozama River and on its left bank, Bartolomé Colón began the settlement of New Isabella, which was not long afterwards replaced by San Domingo, on the opposite bank. Thus, the present capital of the Dominican Republic, they gradually spread over the eastern end of Hispaniola, creating a claim of occupation which Spain recognized in the Treaty of Ryswick (1697). It was in April, 1655, that an English force, conveyed thither on the fleet commanded by Admiral Penn, was driven ashore, after effecting a landing about thirty miles west of the capital. The natural resources of Hispaniola still enriched Spain, and the mint at Concepción de la Vega continued to coin gold from the Hayna. After the Peace of Ryswick, Hispaniola might almost have been forgotten if an English cabinet-maker had not (about the year 1760) discovered the value of mahogany. The demand, at first created by a shipment from Jamaica, was largely supplied by the Spanish island.

The French Revolution reacted upon Hispaniola. The whites and mulattos of San Domingo, under Spanish leaders, attempted to restore the old regime in the French colony, but in 1795 all Hispaniola was ceded to France. The Spanish authorities transferred San Domingo to the representative of the French Republic, who was the mulatto General Toussaint L’Ouverture. Until the Treaty of Paris (1814) the French whites, the white and coloured partisans of Spain, the blacks of Haiti, and, now and then, a British expeditionary force fought for supremacy in San Domingo. The treacherous capture of L’Ouverture and his mysterious death in prison at Besançon, in 1803, were followed by a general massacre of the whites in Haiti in March, 1804. The Haitian blacks now compelled the submission of San Domingo to the authority of their first president, Dessalines. At last, in 1814, the Treaty of Paris restored to Spain her oldest possession in the New World.

Actual Conditions.—Out of the political chaos, which had lasted for more than half a century, arose the present Dominican Republic. Its constitution was proclaimed 18 November, 1844, and its first president was Pedro Santana; it was recognized by France in 1848, and by Great Britain in 1850. An attempt to restore Spanish rule, in 1861, in defiance of the Monroe Doctrine, ended with a final Spanish evacuation in 1865. In 1897 the foreign debt of the republic had reached the amount of more than $21,000,000; the interest on which was supposed to be secured by customs receipts; following a default of interest (1 April, 1899), the Government of the United States interfered to obtain an equitable settlement, and its efforts led to the convention of 1905 (ratified 1907), by which an agent, always a citizen of the United States, is to be permanently empowered to act as general receiver of the Dominican customs in the interest of the foreign bondholders. Since 9 June, 1905, all lands owned by the Dominican Government have been open for settlement, free for ten years, and after that at a rent of 5 cents per acre. Although there can be little doubt that the national resources of the republic still include large quantities of gold, silver, and copper ore,
and even iron, the actual products are only vegetable sugar (183,734 acres under cultivation in 1906); tobacco (nearly 15,000,000 lbs. of leaf exported annually); coffee. The actual timber output is insignificant. In 1905 the total length of railroad was 112 miles.

The constitution of the Dominican Republic is said to be modelled on that of Venezuela; the president, elected for four years, is assisted by a council of ministers, the legislature is a single chamber elected by popular vote in twenty-four departments. The supreme court of the republic (a president and four judges) is appointed by the national congress, its "minister fiscal", however, being appointed by the chief executive; for courts of first instance, the republic is divided into eleven judicial districts, each presided over by an alcalde. By the terms of the constitution education is gratuitous and compulsory.

The ancient city of San Domingo (population, 16,000) is still the seat of the civil government, as well as that of the archbishop, who, however, no longer has any suffragans. The relations between Church and State are (1908) very cordial. The constitution of the Republic, in which religious liberty is an article, guarantees to the Church freedom of action, which, nevertheless, is curtailed by the law providing that the civil solemnization of marriages must precede the canonical. The municipal cemeteries are consecrated in accordance with the Church's requirements, though in some important centres of population there are non-Catholic cemeteries besides. In the Dominican Republic (with which the Archdiocese of San Domingo is coextensive) there are 600,000 Catholics, upwards of 1000 Protestants, and very few Jews, while the Masonic lodges number about thirteen. The total number of parishes is 56, each with its own church, in addition to which there are 13 chapels and 82 mission stations. The (ecclesiastical) Conciliar seminary, at the capital, is under the care of the Eudist Fathers (Congregation of Jesus and Mary), who also administer the cathedral parish. Another college under ecclesiastical control is that of San Sebastian in La Vega. A diocesan congregation of religious women numbers 30 members, distributed among four houses; these sisters, who have charge of a hospital, care for orphan children and the infirm aged.

**Dominicans.** See **Preachers, Order of.**

**Dominici, Giovanni, Blessed (Banchini or Baccini was his family name), Cardinal, statesman, and writer, b. at Florence, 1536; d. at Buda, 10 July, 1620.** He entered the Dominican Order at Santa Maria Novella in 1572; after having been cured through the intercession of St. Catherine of Siena, of an impediment of speech for which he had been refused admission to the order two years before. On his return from Paris, where he completed his theological studies, he laboured as professor and preacher for twelve years at Venice. With the sanction of the master general, Blessed Raymond of Capua, he established convents of strict observance of his order at Venice (1391) and Fiesole (1406), and founded the convent of Corpus Christi at Venice for the Dominican Nuns. He was also the author of a history of Venice to the close of 1406 in which Gregory XII was elected; the following year the pope, whose confessor and counsellor he was, appointed him Archbishop of Ragusa, created him cardinal in 1408 and sent him as ambassador to Hungary, to secure the adhesion of Sigismund to the pope. At the Council Constance Dominici read the voluntary resignation which Gregory XII had adopted, on his advice, as the surest means of ending the schism. Martin V appointed him legate to Bohemia on 19 July, 1418, but he accomplished little with the followers of Hus, owing to the smallness of the Venetian embassy. He was declared blessed by Gregory XVI in 1832 and his feast is observed 1 October. Dominici was not only a prolific writer on spiritual subjects but also a graceful poet, as his many vernacular hymns, or Laudi, show. His Regola del governo di cura familiare, written between 1401 and 1406, is a valuable pedagogical work (edited by Salvi, Florence, 1890) which treats, in four books, of the faculties of the soul, the powers and senses of the body, the uses of earthly goods, and the education of children. This last book has been translated into German by Rosler (Herder's Bibliothek der Katholischen Pädagogik, VII, Freiburg, 1894). His work, Cuncta Notetis (see Echard, O. P., Lebenslauf des Texte in the fifteenth century with an introduction, Paris, 1908) in reply to a letter of Nicola di Piero Salutati, is the most important treatise of that day on the study of the pagan authors. Dominici does not flitly commend classical studies, but strenuously opposes the paganizing humanism of the day. See Thomas of Aquino.

**Dominic of Prussia, a Carthusian monk and ascetical writer, b. in Poland, 1382; d. at the monastery of St. Alban near Trier, 1461.** According to the account he wrote of himself his first teacher was the parish priest, a pious Dominic; later he was a student at the University of Cracow where he was noted for his intelligence. Falling into bad habits he led a vagabond life until twenty-five years of age, when he remedied through the influence of Adolf of Essen, prior of the Carthusian monastery of St. Alban, near Trier. Dominic now became a Carthusian, entered the monastery in 1409. His monastic life was one of severe penance and religious fervour. The spiritual favours he received were numerous, and many visions are ascribed to him. Among the positions he filled were those of master of novices at Mainz and of the monastery of St. Alban, where he died. As an author he composed seventeen treatises, which have been preserved in various libraries. In the "Libri duo experimentalum" he relates the events of his own life; the "Tractus de Contemptu mundi", "Remedium tentationum", "De vera obedientia", and "Sonus epithalami" he prepared during his solitary retreats. A further work is his "Letters of Direction".

Dominic of Prussia is frequently mentioned in the
discussions as to the origin of the Rosary, and what has been improperly called "the Carthusian Rosary" is ascribed to him. To the one hundred and fifty Ave Marias which in those days formed the "Psalter of Mary" he had the thought of adding meditations on the life of Our Lord, and of Jesus Mother. And in his time the Ave Maria terminated with the words: "Fructus ventris tui, Jesus", he joined to each a sentence to recall to mind the mystery, such as "quem Angelo nuntiante de Sancto Spiritu concepisti", "quae concepto, in montana ad Elisabeth ivisti", etc. Both Dominic and his friend Adam sought to spread the use of the Rosary in the Carthusian Order, and among the laity. For these reasons it is held by some authors that the "Psalter" of Dominic was the form, or one of the original forms, from which the present Rosary developed.

AMBROSE MOGUEL.

Dominic of the Mother of God (called in secular life DOMENICO BARBERI), a member of the Passionist Congregation and theologian, b. near Viterbo, Italy, 22 June, 1792; d. near Reading, England, 27 August, 1849. His parents were peasants and died while Dominic was still a small boy. There were six children, and Dominic, the youngest child, was adopted by his maternal uncle, Bartolomeo Paeci. As a boy he was employed to take care of sheep, and when he grew older he did farm work. He was taught his letters by a kind Capuchin priest, and learned to read from a country lad of his own age; although he read all the books he could obtain, he had no regular education until he entered the Congregation of the Passion. He was deeply religious from childhood, felt himself distinctly called to join the institute he entered, and believed that God, by a special manifestation, had told him that he was destined to announce the Gospel truth and to bring back stray sheep to the way of salvation.

He was received into the Congregation of the Passion in 1814, and ordained priest, 1 March, 1818. After completing the regular course of studies, he taught philosophy and theology to the students of the congregation asector for a period of ten years. He then taught in Italy the offices of rector, provincial consultant, and provincial, and fulfilled the duties of these positions with ability. At the same time he constantly gave missions and retreats. He founded the first Passionist Retreat in Belgium at Ere near Tournai in 1840; in 1842, after twenty-eight years of effort, he established the Passionists in England, at Aston Hall, Staffordshire. During the seven years of his missionary life in England he established three houses of the congregation. He died at a small railway station near Reading and was buried under the high altar of St. Anne's Retreat. Among the notable converts whom he received into the Church may be mentioned John Dobree Dalgarno, John Henry Newman, and Newman's two companions, E. S. Bowles and Richard Stanton, all of whom were afterwards distinguished Oratorians. The reception in 1845 of Newman and his friends marked perhaps the greatest happiness of his life. In 1846 Father Dominic received the Hon. George Spencer, in religion Father Ignatius of St. Paul, into the Congregation of the Passion.

Among Father Dominic's works are: courses of philosophy and moral theology, a volume on the Passions of Our Lord; a work on the Sorrows of the Blessed Virgin, "Divina Parainfisa"; a refutation of de Lamennais; three series of sermons; various controversial and ascetical works. In 1841 he addressed a Latin letter to the professors of Oxford in which he answered the objections and explained the difficulties of Anglicans. An English translation of the letter is given in the appendix to the life of Father Dominic by Father Pius Devine.

De la Vie de l'Abbe Domenico, par PADRE FILIPPO (1860); LUCCA DI SAN GIUSEPPE (Genoa, 1873); English, by PATE DE VINE (London, 1886); CAMM, Father Dominic and the Conversion of England in Catholic Truth Society publications (1890); further Father Dominic's letters and correspondence concerning his mission to England are published as a supplement to the 3d vol. of the Oratorian life of St. Paul of the Cross (London, 1858).

ARTHUR DEVINE.

Dominus, MANCO ANTONIO DE, a Dalmatian ecclesiastic, apostate, and man of science, b. on the island of Arbo, off the coast of Dalmatia, in 1596; d. in the Castle of Sant' Angelo, Rome, September, 1624. Educated at the Illyrian College at Loreto and at the University of Padua, he entered the Society of Jesus and taught mathematics, logic, and rhetoric at Padua and Brescia. In 1596, when the Jesuits wrote, he was, through imperial influence, appointed Bishop of Zengg (Segna, Seng) and Modrus in Dalmatia (Aug., 1600), and transferred (Nov., 1602) to the archiepiscopal See of Spalato. He sided with Venice, in whose territory his see was situated, during the quarrel between the Paul V and the Emperor. That fact, combined with a correspondence with Fra Paolo Sarpi and conflicts with his clergy and fellow-bishops which culminated in the loss of an important financial case in the Roman Curia, led to the resignation of his office in favour of a relative and his retirement to Venice. Threatened by the Inquisition he prepared to apostatize, entered into communication with the English ambassador to Venice, Sir Henry Wotton, and having been assured of a welcome, left for England in 1616. On his way there, he published at Heidelberg an attack on Rome: "Briegge del Cristiano naufragio", afterwards reprinted in England. He was received with open arms by James I, who quartered him upon Archbishop Abbot of Canterbury, called on the other bishops to pay him a pension, and granted him precedence after the Archbishops of Canterbury and of York. By the Jesuits, he wrote a number of anti-Roman sermons, published his often reprinted chief work, "De Republica Ecclesiastica contra Primatum Papae" (Vol. I, 1617; vol. II, 1620, London; Vol. III, 1622, Hanover), and took part, as assistant, in the consecration of George Montaigne as Bishop of London, 14 Dec., 1617, and the same year, James I made him Dean of Windsor and granted him the Mastership of the Savoy.

In 1619 De Dominus published in London the first edition of Fra Paolo Sarpi's "History of the Council of Trent"; the work appeared in Italian, with an antit Roman title page and letter dedicatory to James I. His vanity, avarice, and irascibility, however, soon lost him his English friends; the projected Spanish marriage of Prince Charles made him anxious about the security of his position in England, and the election of Gregory XV (9 Feb., 1621) finished him with his hopes, he returned to Rome, 1622. Eventually he was allowed to depart, but his chest of hoarded money were seized by the king's men, and only restored in response to a piteous personal appeal to the king. Once out of England his attacks upon the English Church were as violent as had been those on the See of Rome, and in "Sui Reditus ex Anglia Consilium" (Paris, 1623) he repeated all he had written in his "Contra Profesiones" (London, 1616), declaring that he had deliberately lied in all that he had said against Rome. After a stay of six months in Brussels, he proceeded to Rome, where he lived on a pension assigned him by the
pope. On the death of Gregory XV (8 July, 1623) the pension ceased, and irritation loosened his tongue. Coming into conflict with the Inquisition, he was declared a relapsed heretic, was confined to the Castle of Sant’ Angelo, and there died a natural death. His cause, however, continued after his death, his heresy declared manifest, and his body burned together with his works on 21 Dec., 1624.

In 1711 he published, at Venice, a scientific work entitled: ‘Tractatus de radiis visus et lucis in vitris, perspectivis et iride’, in which, according to Newton, he was the first to develop the theory of the rainbow, by his attention to the fact that in each rainbow the light undergoes two refractions and an immediate reflection. His claim to that distinction is, however, disputed in favour of Descartes.

Edward Myers.

Dominus ac Redemptor. See Society of Jesus.

Domitian, Titus Flavius Domitians, Roman emperor and persecutor of the Church, son of Vespasian and younger brother and successor of Titus; b. 21 Oct., A.D. 51, and reigned from 81 to 96. In spite of his private vices he set himself up as a reformer of morals and religion. He was the first of the emperors to derive from his lifetime by assuming the title of “Lord and God”. After the revolt of Saturninus (95) he organized a series of bloodythirsty proscriptions against all the wealthy and noble families. A conspiracy, in which his wife joined, was formed against him, and he was murdered, 18 Sept., 96.

When the acts of Nero’s reign were reversed after his death, an exception was made to the persecution of the Christians (Tertullian, Ad Nat., I, 7). The Jewish revolt brought upon them fresh unpopularity, and the subsequent destruction of the Holy City deprived them of the last shreds of protection afforded them by being confounded with the Jews. Hence Domitian, in his attack upon the aristocratic party found little difficulty in condemning such as were Christians. To observe Jewish practices was no longer lawful; to reject the national religion, without being able to plead the excuse of being a Jew, was atheism. On one count or the other, as Jews or as atheists, the Christians were liable to punishment. Amongst these martyrs in this second persecution were Domitian’s cousin, Flavius Clemens, the consul, and M. Acilius Glabrio who had also been consul. Flavia Domitilla, the wife of Flavius, was banished to Pandataria. But the persecution was not confined to such noble victims. We read of many others who suffered death or the loss of their goods (Dio Cassius, LXVII, iv). The book of the Apocalypse was written in the midst of this storm, when many of the Christians had already perished and more were to follow them (St. Irenaeus,

The text is a continuation of information about Domitian, focusing on his reign as an emperor, the persecution of Christians, and the historical context of the time. It also mentions the writing of the Apocalypse during this period.
DOMITILLA

Adv. Hares., V, xxx.). Rome, "the great Babylon","was drunk with the blood of the saints and with the blood of the martyrs of Jesus" (Apoc., xvi, 5, 6; ii, 10, 13; vi, 11; xiii, 15; xx, 4). It would seem that participation in the feasts held in honour of the divinity of Christ was made the test for the Christians of the East. Those who did not adore the "image of the beast" were slain. The writer joins to his sharp denunciation of the persecutors' words of encouragement for the faithful by foretelling the downfall of the great harlot "who made drunk the earth with the wine of her whoredom", and steeped her robe in their blood. St. Clement's Epistle to the Corinthians was also written about this time; here, while the terrible trials of the Christians are spoken of, we do not find the same denunciation of the persecutors. The Roman Church continued loyal to the empire, and sent up its prayers to God that He would direct the rulers and magnates in the exercise of the power committed to their hands ( Clem., Ep. ad Cor., i; cxi; cf. St. Paul, Rom., xiii, 1; I Pet., ii, 13). Before the end of his reign Domitian ceased to persecute. (See PERSECUTIONS.)

T. B. SCANNELL.

DOMITIOPOLIS, a titular see of Lusia in Asia Minor. The former name of this city is unknown; it was called Domitioopolis or Dometiopolis after L. Domitius Athenobarbus (Ramsay, in Revue numismatique, 1894, 168 sqq.). Ptolemy (V, vi) places it in Cilicia, according to Constantine Porphyrogennetos (De themat., i, 15) it was one of the ten cities of the Lusorian Decapolis (cf. Georgius Cyprius, ed. Gelzer, S2). It figures in Parthey's "Notitiae episcopatum", I and III, and in Gelzer's "Nova Tactea", 1618, as a suffragan of Seleucia. Leqquen (Oriens christ., ii, 162) mentions five bishops, from 451 to 579. Domitiopolis is to-day Dindebol, a village on the Ermenek Su, in the vilayet of Adana (cf. Sterrett, in Papers of the American School, Athens, III, 80).

S. PETRIDES.

DOMNUS, Pope. See DONUS.

DOMNUS APOLSTOLICUS (DOMINUS APOLSTOLICUS), a title applied to the pope, which was in most frequent use between the sixth and the eleventh centuries. The pope is styled Apostolicus because he occupies an Apostolic see, that is, one founded by an Apostle, as were those of Ephesus, Philippi, Corinth, etc. (cf. Terentiian, De prescript., xxxvi). Rome being the only Apostolic Church of the West, Series apostolica meant simply the Roman See, and Domnus Apostolico the Bishop of Rome. In Gaul, however, as early as the fifth century the expression series apostolica was applied to any episcopal see, bishopship being successor of the Apostles (cf. Sidonius Apollinaris, Epv., lib. VI, i, etc.). By the sixth century the term was in general use, and many letters from the Merovingian kings are addressed Domnus sanctis et apostolico sedis dignissimis. Thus the bishops of Gaul were given the title of Domnus Apostolico (cf. Venantius Fortunatus, "Vita S. Mart."); IV; "Formulae Marculii", II, xxxix, xlix, xlix). Many examples are also found in wills and deeds (e.g. P. L., LXXX, 1281, 1314, etc.) and one occurs in a letter of introduction given by Charlemagne to St. Boniface (Epp. Boniface, xi). However, in the Acts of Charlemagne the councils held during this time, even outside the Frankish Empire, as in England, the term Domnus Apostolico, in its exact usage, meant simply the pope. Perhaps the only example of it found in Greek authors is in the second letter of Theodore the Studite to Leo III, ενω τον επισκόπων. Long before this, however, the word Apostolicus alone had been employed to designate the pope. Probably the earliest example is in the list of popes compiled at the time of Pope Vigilus (d. 555), which begins "Incipit nomina Apostoliceorum" (P.L., LXXXVIII, 1405). The expression recurs frequently in documents of the Carolingian kings, as well as in Anglo-Saxon writings. Clude of Turin gives a curious explanation—Apostolicus. At the Council of Reims held in 1019 the Bishop of Compostella was excommunicated "quia contra fas abhí vendicaret culmen apostolici nominis" (because he wrongly claimed for himself the prestige of the Apostolic name), thinking himself the successor of St. James the Greater, and it was therefore laid down "quod solus Romanus Pontifex universalis Ecclesiae Primas esset et Apostolico" (that only the pontiff of the Roman See was primate of the universal Church and Apostolicus). To-day the title is found only in the Litany of the Saints. There are also the expressions apostolicius (pontificate) and the ablative absolute apostolivente (during the pontificate of). It is to be noted that in ecclesiastical usage the abbreviated form dominus signifies a human ruler as against Domnus, the Divine Lord. Thus at meals monastic grace was asked from the superior in the phrase Jibe Domnus benefideare, i.e.: "Be pleased sir to give the blessing."

DONAHOE, PATRICK, publisher, b. at Munnery, County Cavan, Ireland, 17 March, 1811; d. at Boston, U. S. A., 18 March, 1901. He emigrated to Boston when ten years of age with his parents, and at fourteen was apprenticed to a printer. He worked on "The Jesuit" when that paper was started by Bishop Fenwick in 1832, and after the bishop relinquished its ownership, he carried it on for some time with H. L. Devereaux under the new title of "The Literary and Catholic Sentinel". In 1836 he began the publication of "The Pilot", a weekly paper devoted to Irish American and Catholic interests, which in succeeding years became the organ of Catholic opinion in New England, and had a widespread circulation all over the United States. He established in connexion with it a publishing and book-selling house from which were issued a large number of Catholic books. Later he organized a bank. All his ventures proved successful and the wealth he acquired was generously given to advance Catholic interests. The great Boston fire of 1872 destroyed his publishing plant. Another fire the following year and injudicious loans to friends made him lose so much more that his bank failed in 1876. Archbishop Williams purchased "The Pilot" to help to pay the depositors of the bank, and Mr. Donahoe then started a monthly "Donahoe's Magazine" and an exchange and passenger agency. In 1881 he was able to buy back "The Pilot" and devoted his remaining years to its management. During the Civil War he actively interested himself in the organization of the Irish regiments that volunteered from New England. In 1893 the University of Notre Dame gave him the64 Culture Medal for signal services to American Catholic progress.

Pilot (Boston), 23 March, 1901 and files; LEAHY, Hist. Cath. Ch. in New England States (Boston, 1890), 1; DONAHOE'S MONTHLY, edited by THOMAS F. MEEHAN.

DONAHUE, PATRICK JAMES. See WHEELING.

DONATELLO (DONATO DI NICOLÒ DI BETTO BARDI), one of the great Tuscan sculptors of the Renaissance, b. at Florence, c. 1396; d. there, 13 Dec., 1466. He was the son of Niccolò di Betto Bardi, and was early apprenticed to a goldsmith to learn design. At the age of seventeen he accompanied his friend Brunellesco to Rome, and the two youths devoted themselves to drawing and to making excavations in their pursuit of the antique. Half the week they spent chiselling
for a livelihood. Brunellesco's occupation was architecture; Donatello, though understanding the interrelation of the two arts, always, whether in conjunction with Brunellesco or, as later, with Michelozzo, made sculpture paramount. It is hard to place his work chronologically. While still a mere boy, he contributed an equestrian statue of Cosimo de' Medici in Florence. On his return from Rome to Florence he was engaged for years on the statues for Giotto's belfry and the buildings then in progress. For the Campanile he did "The Baptist", "Jeremias", "Habakkuk", a group representing Abraham and Isaac, and the famous "David" called the "Zuccone" (Baldinucci states that the sculpture is said to have himself cried to it, "Why don't you speak?"; for the Duomo, "St. John the Evangelist" and "The Singing-gallery"; for Or San Michele, "St. Peter" and "St. Mark", and the "St. George", which he executed at the order of the Guild of Armourers—Donatello's most ideal and perfect work. The socle-relief of "St. George and the Dragon and the King of Cappadocia's Daughter" is absolutely Greek in simplicity and plastic beauty. Other fine reliefs are the bronze doors for the sacristy of San Lorenzo; the medallions for the ceiling; and the "Annunciation" in the same church, with its noble figure of the Blessed Virgin and the angels. In the Loggia de' Lanzi is the somewhat ill-proportioned group of "Judith and Holophernes". The marble "David" in the Bargello, uniting the delicacy of the adolescent "Baptist" of Casa Martelli with a classic fashion of wreath-bound hair, seems a link between two of the phases in Donatello's development. Pure Renaissance and yet conceived in the antique spirit are the "Amorino" (Cupid) and the bronze "David" of the National Museum, Florence. Both are instinct with life and the potent vitality of youth, jubilant or contained. Pope John XXIII, a personal friend of the sculptor, died in Florence, 1419. Donatello made his tomb, a recumbent portrait-statue in the baptistery. In the Duomo of Siena he performed the same office for Bishop Pecchi. In Siena also he made several rare statuettes and reliefs for the christening-fount of San Giovanni. At Prato, for the open-air pulpit of the Duomo, he carved the casement with groups of playing children (putti). He is believed to have been in Rome again in 1433. A tabernacle of the Blessed Virgin in St. Peter's is said to be by Donatello, and also the tombstone of Giovanni Crivelli in Santa Maria in Ara Coeli. In 1443 he went to Padua to see the choir-galery, and remained there for ten years. First he carved his "Christ on the Cross", the head a marvel of workmanship and expression; then statuettes of the Blessed Virgin, St. Francis of Assisi, St. Anthony, and other saints; also a long series of reliefs for the high altar. While in Padua Donatello was commissioned to make a monument to the Venetian Condottiere (General) Gattamelata (Erasmio de' Narni), and he blocked out the first great equestrian statue since classic times. The last known statue of Donatello is "St. Louis of Toulouse" in the inns near Santa Croce.

Donatello became bedridden in his latter years, and some of his works were completed by his pupils. Piero de' Medici provided for him. Donatello had always been lavish with his fellow-workers and assistants, and took no thought for himself. His character, above all, this head he enjoyed certain privileges; thus, even before the traditio, or investiture, or handing over, of a donation to a church or a religious institution, the latter acquired real rights to the same (L. 23, C. De sacrosanctis ecclesiis, I. 2). Moreover, the inqnonatio or declaration of the gift before the public authority was required only for donations equivalent in value to 500 solidi (near twenty-six hundred dollars American); it was extended to all donations (L. 34, 36, C. De donationibus, VIII, 53). Finally, bishops, priests, and deacons yet under parental power were allowed to dis-
pose freely, even in favour of the Church, of property acquired by them after ordination [L. 33 (64) C. De episcopis et clericis, I, 3]. The Franks, long quite unaccustomed to dispose of their property by will, were on the other hand generous in donations, especially post mortem, similar to the Roman law in donations in view of death but carrying with them the renunciation on the donor's part of his right of revocation; other Frankish donations to the Church reserved the usufruct. The institution known as preavis ecclesiastica was quite favourable to the granting of donations. At the request of the donor the Church granted him the right of the donation subject for five years, for his life, or even a use transferable to the heirs of the first occupant. Synods of this epoch assert to some extent the validity of pious donations even when the legal requisites had not been observed, though as a rule they were not omitted. Generally speaking, the consent of the civil authority (princeps) was not indispensable for the acquisition of property by religious corporations. The restrictions known as the "right of amortization" (see Mortmain) are of later date, and are the outcome of theories elaborated in the Middle Ages but carried to their logical issue in the modern civil legislation (of Continental countries) concerning biens de mainmorte, or property held by inalienable tenure, i. e. the property of religious corporations, they being perpetual. The Church does not accept such legislation; nevertheless the faithful may act accordingly in order to secure to their donations the protection of the law.

**CANONICAL LEGISLATION.**—Donations are valid and obligatory when made by persons capable of disposing of their property and accepted by the administrators of ecclesiastical institutions. No other formality is required, neither notarial act nor authorization of the civil power. The declaration before the public authority, required by Roman law, is not obligatory in canon law. Nor are the faithful obliged to heed the restrictions which are placed by some modern civil codes in the way of a free disposition of their property. On the other hand the donation must be accepted by the donee; it is not true, as some have maintained, that every donation for works of religion (ad pecus cousae) implies a vow, i. e. an act in itself obligatory independent of the acceptance of the donee. If the administrators of an ecclesiastical institution refuse to accept a donation, that institution can always obtain in law a restitution in integrum, whereby it is again put in a condition to accept the refused donation. The canonical motives for the revocation or diminution of a donation are the birth of children to the donor and the donatio inofficiosa, or excessive generosity on the latter's part, whereby he diminishes the share of inheritance that legitimately belongs to his children. In both cases, however, the donation is valid in canon law to the degree in which it respects the legitimate share of the donor's children. It is worthy of note that while ecclesiastical and religious establishments may give alms, they are bound in the matter of genuine donations by the provisions of canon law concerning the alienation of ecclesiastical property.

**CIVIL LEGISLATION.**—In most European countries the civil authority restricts in three ways the right of the Church to accept donations: (1) by imposing the forms and conditions that the civil codes prescribe for donations; (2) by reserving to itself the right of saying what institutions shall have civil personality and be thereby authorized to acquire property; (3) by accepting the approval of the civil authority, at least for important donations. Austria recognizes a juridical personality not on the grounds which are charged with the maintenance of public worship, but also, through easily granted approval, in religious associations of any kind. The so-called amortization laws (against the traditional inalienability of tenure on the part of religious corporations) have so far remained only a threat, though the Government reserves the right to establish such legislation. Religious communities, however, are required to make known to the civil authorities all their acquisitions of property. In Germany, even after the promulgation of the Civil Code (1896), the legislation varies from State to State. In all, however, property rights are recognized by the law in only those ecclesiastical institutions that are recognized by the State. As a rule, donations must be authorized by the civil power if they exceed the value of five thousand Marks (1250 pounds sterling) though in some states this figure is doubled. In Prussia civil authorization is requisite for all acquisition of real property by a diocese, a chapter, or any ecclesiastical institution. In Italy every donation must be approved by the civil authority, and only the institutions recognized by the State are allowed to acquire property; note, however, that simple benefices (see Benefice) and religious orders cannot acquire this latter privilege. With few exceptions, ecclesiastical institutions in Italy are not allowed to invest in any other form of property than Government securities and the local civil institutions or worship-associations, are recognized by the State as civil entities for the conduct of public worship; it is well known, however, that Pius X forbade the Catholics of France to form such associations. That country, it is true, recognizes the civil personality of licit associations organized for a non-lucrative purpose, but declares illicit every religious congregation not approved by a special law. At the same time, it refuses to approve the religious congregations which have sought this approval, and is gradually suppressing all those which were formerly approved. (See PROPERTY, ECCLESIASTICAL.)

A. Van Hove.

**Donation (in Civil Jurisprudence), the gratuitous transfer, or gift (Lat. donatio), of ownership of property. The Latin word munus also signified a gift, but "a gift on some special occasion such as births or marriages" (Roby, Roman Private Law, Cambridge, 1902, I, 86). The person transferring ownership by donation is termed the donor, the person to whom the transfer is made, the donee. In contemplation of law donation is "based upon the fundamental right every one has of disposing of his property as he wills" (125 New York Court of Appeals, 1904, P797), a right, however, deemed from ancient times an appropriate subject for legal regulation and restraint (see Johns, Babylonian and Assyrian Laws, etc., New York, 1904, XXI). Donation requires the consent not only of the donor to transfer the ownership, but also of the donee to accept it and assume it, "I cannot," as Pothier (Treatise on Obligations, 4), "by the mere act of my own mind transfer another to a right in my goods, without a concurrent intent on his part to accept it." Donations are usually classified as (1)
inter vivos (among the living) and (2) mortis causa (in view of death).

(1) Inter vivos.—Sir William Blackstone explains (in his Commentaries, II, 441) that in English law mutual consent to give and to accept is not a gift, but is an agreement to contract void of all consideration. Yet delivery and acceptance being added to the ineffectual consent, the transaction becomes an irrevocable transfer by donation inter vivos, regarded in law as an executed contract, just as if the preliminary consents had constituted an effectual “act in the law” (see Pollock, Principles of Contract, New York, 1906, 274). It is to this “contract void” remarks Charles, “that no transfer is made perfect by delivery, and every grant, are executed contracts, for they are founded on the mutual consent of the parties in reference to a right or interest passing between them.” (Commentaries on American Law, II, 437; and Milton (Paradise Lost, XII, 67) says:

He gave us only over beast, fish, fowl, his dominion absolute; that right we hold by his donation.

According to English law, writing under seal, known as a deed, so far transfers personal property without actual delivery that ownership rests upon execution of the deed, and the donation is irrevocable until discharged by the donee (J. W. Smith, The Law of Contracts, 36, Philadelphia, 1885). Not only movable things, defined in English law as personal property, but land (real estate) may be the subject of this donation (24 Vermont Reports, 301; 115 New York Court of Appeals Reports, 305). The legislation of the Emperor Justinian abolished requirements which by Roman law had previously been necessary to perfect a donation, and thenceforth, by force of this legislation, the donor’s informal agreement to give, bound him to make delivery. Donations, were, however, rendered revocable by the same legislation for a failure to comply with their conditions, and also for gross ingratitude (Leage, Roman Private Law, London, 1906, 145). The English law “controls,” to quote Chancellor Kent, “gifts when made to the prejudice of existing creditors” (Commentaries, II, 440); and a donation may be avoided if the donor “were under any legal incapacity . . . or if he were drawn in, circumvented or imposed upon by false pretences, bribery or surprise” (Blackstone, Commentaries, II, 441). But English law does not annul donations for ingratitude nor for various other causes mentioned in the Roman law. English law “does not,” according to Chancellor Kent, “indulge in these refinements” (op. cit.). Donations between husband and wife were contrary to the policy of the Roman law which permitted donatio propter nuptias before marriage only (Leage, op. cit., 95). By English common law there accrued to a husband full ownership of his wife’s personal property, and possession for their joint lives of her real property. And because English law deemed husband and wife one person (Bishop, Commentaries on the Law of Married Women, Boston, 1873, I, 251), a gift of personal property from husband to wife was “impossible according to the old and technical common law” (ibid., 730). But the commentator adds that “it is otherwise in equity” (ibid., 731). By the French Code Civil, donations inter vivos, designated entre vifs, are recognized; but they are subjected to many restrictions.

(2) Mortis Causa.—A donation of this kind is made when a person “in his last sickness,” to quote Blackstone (Commentaries, II, 514), “apprehending his dissolution near, delivers or causes to be delivered to another the possession of any personal goods . . . to which he has been entitled as his deceased . . .” The same donation may also be made in presence of any other impending peril of death. The “Institutes” of Justinian cite a classic example: se et apud Homerun Telenachus donat Pirro (II, VI). This donation differs strikingly from donation inter vivos in not being absolute, but conditional on the donor failing to recover from the sickness or to escape the peril; also in being dependent on his not having exercised the right which remains to him, of revoking the donation. The transfer is thus perfected by death only. Roman law permitted such donations between husband and wife because these were donations quae conferatur in tempus soluti matrimonii (Pothier, Pandecte Justinianee, XXIV, t, i, xix). Nor were donations of this kind from husband to wife forbidden by the English common law (24 Vermont Reports, 300). As the danger in view of which the donation is made be actually present, therefore a transfer from an owner “not terrified by fear of any present peril, but moved by the general consideration of man’s mortality”, cannot be sustained as a donation mortis causa. A transfer of ownership of real estate cannot be effected by this form of donation. And any donation mortis causa expressly embracing the whole of the donor’s property has been said to be illegal, being deemed to be an attempt to escape disposition by last will (American Law Register, I, 25). The grounds already referred to on which a donation inter vivos may be avoided seem also grounds for avoiding a donation mortis causa. In every instance evidence establishing such a donation as against a donor’s representatives must “be clear and convincing, strong and satisfactory” (125 New York Court of Appeals Reports, 757). For this “death-bed disposition of property,” as it is termed by Blackstone (op. cit.), is not a favour of the law. Many years ago a Lord chancellor of England, profoundly learned in the law and noted for his conservatism suggested that if “this donatio mortis causa was struck out of our law altogether it would be quite as well” (American Law Register, I, 25). And by the Code Civil it has been “struck out” (op. cit., 757).

Donation of Constantine (Lat. Donatio Constantinii).—By this name is understood, since the end of the Middle Ages, a forged document of Emperor Constantine the Great, by which large privileges and rich possessions were conferred on the pope and the Roman Church. In the oldest known manuscript (Bibliotheque Nationale, Paris, MS. Latin 2777) and in many other manuscripts the document bears the title: “Constitutum domini Constantinii imperatoris”. It is addressed by Constantine to Pope Sylvester I (314-35) and consists of two parts. In the first (entitled “Confessio”) the emperor relates how he was instructed in the Christian Faith by Sylvester, makes a full profession of faith, and tells of his baptism in Rome by that pope, and how he was thereby cured of leprosy. In the second part (the “Donatio”) Constantine is made to confer on Sylvester and his successors the following privileges and possessions: the pope, as successor of St. Peter, has the primacy over the four Patriarchs of Antioch, Alexandria, Constantinople, and Jerusalem, also over all the bishops in the world. The Lateran basilica at Rome, built by Constantine, shall surpass all churches as their head, similarly the churches of St. Peter and St. Paul shall be endowed with rich possessions. The chief Roman ecclesiastics (lerici cardinales), among whom senators may also be received, shall obtain the same honours and distinctions as the senators. Like the emperor the Roman Church shall have as functionaries cardinali, ostiarii, and excubiores. The pope shall enjoy the same honorary rights as the emperor; the right to wear an imperial crown, a purple cloak and tunic, and in general all imperial insignia or signs of distinction; but as Sylvester refused to put on
his head a golden crown, the emperor invested him with the high white cap (phrygium). Constantine, the document continues, rendered to the pope the service of a strator, i.e. he led the horse upon which the pope rode. Moreover, the emperor makes a present to the pope and his successors of the Lateran palace and Rome and the provinces, districts, and towns of Italy and all the Western regions (tam palatinum nostrum, ut prefectum est, quamque Romae urbis et omnium Italiae seu occidentali regiumpicum provinciarum loca et civitates)

The document goes on to say that for himself the emperor has established in the East a new capital which became the residence of his successors, in which he has removed his government, since it is inconvenient that a secular emperor have power where God has established the residence of the head of the Christian religion. The document concludes with maledictions against all who dare to violate these donations and with the assurance that the emperor has signed them with his own hand and placed them on the tomb of St. Peter.

This document is without doubt a forgery, fabricated somewhere between the years 750 and 800. As early as the fifteenth century its falsity was known and demonstrated. Cardinal Nicholas of Cusa (De Constantino et Constantine, lib. XIII, ii. cap. 1) spoke of it as a dictamen a poecryphum. Some years later (1440) Lorenzo Valla (De falso credita et ementita Constantini donationi declaratio, Mainz, 1518) proved the forgery with certainty. Independently of both his predecessors, Reginald Peckock, Bishop of Chichester (1450–57), reached a similar conclusion in his work, "The Repressor of over Much Blaming of the Clergy", Rolls Series, II, 351–366. Its genuineness was yet occasionally defended, and the document still further used as authentic, until Baronius in his "Annales Ecclesiastic[i]" (ad an. 324) admitted that the "Donatio" was a forgery, whereafter it was soon universally admitted to be such. It is so clearly a fabrication that there is no reason to wonder that, with the revival of historical criticism in the fifteenth century, the true character of the document was at once recognized. The forger made use of various authorities, which Grauer and others (see below) have thoroughly investigated. The introduction and the conclusion of the document are imitated from authentic writings of the imperial period, but formula of other periods are also utilized. In the "Confession of faith" the doctrine of the Holy Trinity is explained at length, and the Fall of man and the Incarnation of Christ. There are also reminiscences of the decrees of the Iconoclast Synod of Constantinople (754) against the veneration of images. The narrative of the conversion and healing of the emperor is based on the apocryphal Acts of Sylvester (Acta or Gesta Sylvætri), yet all the particulars of the "Donation" narrative do not appear in the hitherto known texts of that legend. The distinctions conferred on the pope and the cardinals of the Roman Church the forger probably invented and described according to certain contemporary rites and the court ceremonial of the Roman and Byzantine Church. The author also used the biographies of the popes in the Liber Pontificiæ (q. v.), likewise eighth-century letters of the popes, especially in his account of the imperial donations.

The authorship of this document is still wrapped in obscurity. Occasionally, but without sufficient reason, critics have attributed it to the author of the False Decretals (q. v.) or to some Roman ecclesiastic of the eighth century. On the other hand, the time and place of its composition have lately been thoroughly studied by numerous investigators (especially Germans), though surely not universally accorded. But conclusions have yet been reached. As to the place of the forgery Baronius (Annales, ad. an. 1081) maintained that it was done in the East by a schismatic Greek; it is, indeed, found in Greek canonical collections. Natalis Alexander opposed this view, and it is no longer held by any recent historian. Many of the recent critical students of the document locate its composition at Rome and attribute the forgery to an ecclesiastic, their chief argument being an intrinsic one: this false document was composed in favour of the pope and of the Roman Church, himself must have held the chief interest in a forgery executed for a purpose so clearly expressed. Moreover, the sources of the document are chiefly Roman. Nevertheless, the earlier view of Zaccaria and others that the forgery originated in the Frankish Empire has, perhaps by itself recently been newly defended by Bayet and Grauer and see below). They call attention to the fact that the "Donatio" appears first in Frankish collections, i.e. in the False Decretals and in the above-mentioned St-Denis manuscript; moreover the earliest certain quotation of it is by Frankish authors in the second half of the ninth century. Finally, this document was never used in the papal chancery until the middle of the eleventh century, nor in general is it referred to in Roman sources until the time of Otto III (993–1002, i.e. in case the famous "Diploma" of this emperor be authentic). The first certain use of it at Rome was in 1054, and it is noted that this pope was by birth and training a German, not an Italian. The writers mentioned have shown that the chief aim of the forgery was to prove the justice of the translatio imperii to the Franks, i.e. the transfer of the imperial title at the coronation of Charlemagne in 800; the forgery was, therefore, important mainly for the Frankish Empire. This view is rightly tenable against the opinion of the majority that the forgery originated at Rome.

A still greater divergency of opinion reigns as to the time of its composition. Some have asserted (more recently Martens, Fergusson, and Bayet) that each of its two parts was fabricated at different times. Martens holds that the author executed his forgery at brief intervals; that the "Constitutum" originated after 800 in connexion with a letter of Adrian I (778) to Charlemagne wherein the pope acknowledged the imperial position to which the Frankish king by his own efforts and fortune had attained. Friederich (see below), on the contrary, attempts to prove that the "Constitutum" was composed of two really distinct parts. The gist of the first part, the so-called "Concessio", appeared between 638 and 653, probably 638–639. The "Donatio" proper was written in the reign of Stephen II, between 752 and 757, by Paul, brother and successor of Pope Stephen. According to Bayet the first part of the document was composed in the time of Paul I (757–767); the latter part appeared in or about the year 774. In opposition to these opinions most historians maintain that the document was written at the same time and wholly by one author. But when was it written? Colombier decides for the reign of Pope Conon (680–687). Genelin for the beginning of the eighth century (before 728). But neither of these views is supported by any weighty evidence. Most investigators accept as the earliest possible date the pontificate of Stephen II (752–757), thus establishing a connexion between the forgery and the historical events that led to the origin of the States of the Church and the Western Empire of the Franks. But in what year or period from the above-mentioned pontificate of Stephen II until the reception of the "Constitutum" in the collection of the False Decretals (c. 840–50) was the forgery executed? Nearly every student of this intricate question maintains his own distinct view. It is necessary first to answer a few preliminary questions. Did Pope Adrian I, in his letter to Charlemagne of the year 778 (Codex Carolinianus, ed. Jaffé, Ep. xii) exhibit a knowledge of the "Constitutum"? From a passage of this letter (Sicut temporibus beati Silvestri Romani pontificis a sancta recorda-
tionissimum Constantinum magno imperatore per eius largitatem sancta Dei Catholica et Apostolica Romana ecclesia elevata et exaltata est et positurum in his Hesperiae partibus largi dignatus, ita et in his vectris felicissimae temporibus utique nostris sancta Dei ecclesiae id est beati Petri apostolii, germenque exuites. Archivists, e.g. Dölger, disagree, and others have concluded that Adrian I was then aware of this forgery, so that it must have appeared before 778. Much in Adrian I a knowledge of the "Constitutum" from his letter to Emperor Constantine VI written in 785 (Mansi, Concill. Coll., XII, 1757), which he said is forgeries, however, three letters, from asserting that Adrian I made use of this document from his letters, therefore, the time of its origin cannot be deduced. Most of the recent writers on the subject assume the origin of the "Donatio" between 752 and 795. Among them, some decide for the pontificate of Stephen II (752-757) on the hypothesis that the author of the forgery wished to substantiate thereby the claims of this pope in his negotiations with Pepin (Dölger, Hauck, Frederick, Böhmer). Others lower the date of the forgery to the time of Paul I (757-767), and base their opinion on the political events in Italy under that pope, and on the fact that he ministered power for St. Sylvester, and that the "Donatio" had especially in view the honour of this saint (Scheffer-Boichorst, Mayer). Others again locate its origin in the pontificate of Adrian I (772-795), on the hypothesis that this pope hoped thereby to extend the secular authority of the Roman Church over a greater part of Italy and to create in this way a powerful ecclesiastical State under papal government (Langen, Loening). A smaller group of writers, however, remove the forgery to some date in the ninth century, e.g. after the coronation of Charles Martel as emperor. Among these, Martens and Weiland assign the document to the last years of the reign of Charlemagne, or the first years of Louis the Pious, i.e. somewhere between 800 and 840. They argue that the chief purpose of the forgery was to bestow on the Western ruler the imperial power, or that the forgery refers to the fact that the new emperor, as successor of Constantine the Great, might have conferred on the Roman Church. Those writers also who seek the forger in the Frankish Empire maintain that the document was written in the ninth century, e.g., especially Hergenröther and Grauert. The latter opposes the theory that the "Constitutum" originated in the monastery of St. Denis, at Paris, shortly before or about the same time as the False Decretals, i.e. between 840 and 850. Closely connected with the date of the forgery is the other question concerning the primary purpose of the forger of the "Donatio." Here, too, there exists a great variety of opinions. Most of the writers who locate at Rome itself the origin of the forgery maintain that it was intended principally to support the claims of the popes to secular power in Italy; they differ, however, as to the extent of the said claims. According to Dölger the "Constitutum" was destined to aid in the creation of a united Italy under papal government. Others would limit the papal claims to those districts which Stephen II sought to obtain from Pepin, or to isolated territories which, then or later, the popes desired to acquire. In general, this class of historians seeks to connect the forgery with the historical events and political movements of that time in Italy (Mayer, Langen, Friedried, Loening, and others). Several of these writers lay more stress on the elevation of the popacy than on the donation of territories. Occasionally it is maintained that the forger sought to secure another kind of thing, something akin to imperial supremacy as against the Frankish Government, then solidly established in Italy. Again, some of this class limit to Italy the expression accedentium regionum provinciarum, but most of them understand it to mean the whole former Western Empire. This is the attitude of Weiland, for whom the chief object of the forgery is the increase of papal power over the imperial, and the establishment of a kind of imperial supremacy of the pope over the whole West. For this reason also he lowers the date of the forgery further than the tenth century, and the reign of Charlemagne (814). As a matter of fact, however, in this document Sylvester does indeed obtain from Constantine imperial rank and the emblems of imperial dignity, but not the real imperial supremacy. Martens therefore sees in the forgery an effort to elevate the papacy in a manner rightfully and imaginatively, the title of the pope and of Roman ecclesiastics, all gifts of landed possessions, and rights of secular government are meant to promote and confirm this elevation, and from it all the new Emperor Charlemagne's right to the papacy was to be practical conclusions for his behaviour in relation to the pope. Scheffer-Boichorst holds a singular opinion, namely that the forger intended primarily the glorification of Sylvester and Constantine, and only in a secondary way a defence of the papal claims to territorial possessions. Grauert, for whom the forger is a Frankish subject, shares the view of Hergenröther, i.e. the forger had in mind the elevation of the new Western Empire from the attacks of the Byzantines. Therefore it was highly important for him to establish the legitimacy of the newly founded empire, and this purpose was especially aided by all that the document alleges concerning the elevation of the pope. From the foregoing it will be seen that the word of historical research in this matter still remains to be said. Important questions concerning the sources of the forgery, the place and time of its origin, the tendency of the forger, yet await their solution. New research will probably pay still greater attention to textual criticism, especially that of the first part or "Confession" of faith. As far as the evidence at hand permits us to judge, the forged "Constitutum" was first made known in the Frankish Empire. The oldest extant manuscript of it, certainly from the ninth century, was written in the Frankish Empire. In the second half of that century the document is expressly mentioned by three Frankish writers. Ado, Bishop of Vienne, speaks of it in his Chronicle (De sex etatibus mundi, ad an. 306, in P. L., CXXIII, 92); Aeneas, Bishop of Paris, refers to it in defence of the Roman primacy (Adversus graecos, c. cxiii, CXXI, 99); in the life of John Cassian, Archbishop of Reims, mentions the donation of Rome to the pope by Constantine the Great according to the "Constitutum" (De ordine palatii, c. xiii, op. cit., CXXV, 998). The document obtained wider circulation by its incorporation with the False Decretals (840-850), or more specifically between 847 and 852; Hainachius, Decretales Pseudo-Isidorianae, Leipzig, 1863, p. 249). At Rome no use was made of the document during the ninth and the tenth centuries, not even amid the conflicts and difficulties of Nicholas I with Constantine, when it might have served as a base for some argument of the claims of the first pope who used it in an official act and relied upon it, was Leo IX; in a letter of 1054 to Michael Cerularius, Patriarch of Constantinople, he cites the "Donatio" to show that the Holy See possessed both an earthly and a heavenly imperium, the royal priesthood. Thereafter the "Donatio" acquires more and more importance and is more frequently used as evidence in the ecclesiastical and political conflicts between the papacy and the secular power. Anselm of Lucca and Cardinal Deusdedit inserted it in their collections of canons. Gratian, it is true, excluded it from his Decretum, but it was inserted in the False Decretals by the ecclesiastical writers in defence of the papacy during the conflicts of the early part of the twelfth century quoted it as authoritative (Hugo of Fleury, De regia potestate et ecclesiastic dignitate, 11; Placidus of
DONATISTS

Donatists.—The Donatist schism in Africa began in 311 and flourished just one hundred years; until the conference at Carthage in 411, after which its importance vanished.

Causes of the Schism.—In order to trace the origin of the division we have to go back to the persecution under Diocletian. The first edict of that emperor against Christians (24 Feb., 303) commanded their churches to be burned, any of their books and documents to be delivered up and burnt, while they themselves were outlawed. Severer measures followed in 304, when the fourth edict ordered all to offer incense to the idols under pain of death. After the abdication of Maximin in 305, the persecution seems to have abated in Africa. Until then it was terrible. In Numidia the governor, Florus, was infamous for his cruelty, and, though many officials may have been, like the proconsul Anulinus, unwilling to go further than they were obliged, yet St. Optatus is able to say of the Christians of the whole country that some were confessors, some were martyrs, some fell only those who were hanged or escaped. The exaggerations of the highly strung African character showed themselves. A hundred years earlier Tertullian had taught that flight from persecution was not permissible. Some now went beyond this, and voluntarily gave themselves up to martyrdom in order to escape despotic taxation. Their motives were, however, not always above suspicion. Menrarius, the Bishop of Carthage, in a letter to Secundus, Bishop of Tigis, then the senior bishop (primate) of Numidia, declares that he had forbidden any to be honoured as martyrs who had given themselves up of their own accord, or who had appealed to the law, instead of claiming the validity of the Scriptures which they would not relinquish; some of these, he says, were criminals and debtors to the State, who thought they might by this means rid themselves of a burdensome life, or else wipe away the remembrance of their misdeeds, or at least gain money and enjoy in prison the luxuries supplied by the kindness of Christians. The later excesses of the Circumcellions show that Menrarius had some ground for the severe line he took. He explains that he had himself taken the Sacred Books of the Church to his own house, and had substituted a number of homiletic writings which the persecutors had seized without asking for more: the proconsul, when informed of the deception, refused to search the bishop's private house. Secundus, in his reply, without blaming Menrarius, somewhat pointedly praised the martyrs who in his own province had been tortured and put to death for refusing to deliver up the Scriptures; he himself had replied to the officials who came to search: "I am a Christian and a bishop, not a traditor." This word traditor became a technical expression to designate those who had given up the Sacred Books, and also those who had consented to the worse crimes of delivering up the sacred vessels and even their own brethren.

It is certain that relations were strained between the confessors in prison at Carthage and their bishop. If we may credit the Donatists Acts of the forty-nine martyrs of Asbrite, they broke off contact entirely with Menrarius. We are informed in these Acts that Menrarius was a traditor by his own confession, and that his deacon, Cecilian, raged more furiously against the martyrs than did the persecutors themselves; he set armed men with whips before the door of the prison to prevent their receiving any food. The martyrs, according to the piety of Christians was thrown to the dogs by these ruffians, and the drink provided was spilled in the street, so that the martyrs, whose condemnation the mild proconsul had deferred, died in prison of hunger and thirst. This story is recognized by Du-

DONATISTS

St. Peter Damian also relied on it in his writings against the Church of Parma (Discorsio synodalis, in Libelli de lite, I, 88). Gregory VII himself never quoted this document in his long warfare for ecclesiastical liberty against the secular power. But Urban II made use of it in 1091 to support his claims on the island of Corsica. Later popes (Innocent III, Gregory IX, and Innocent IV) took its authenticity for granted (Innocent III, Sermo de sancto Silvestro, P. L., CCXVII, 481 sqq.; Radiationus. Annales, ad an. 1236, n. 24; Potthast, Regesta, no. 11, 848), and ecclesiastical writers often added its evidence in favour of the papacy. The medieval adversaries of the popes, on the other hand, never denied the validity of this appeal to the pretended donation of Constantine, but endeavoured to show that the legal deductions drawn from it were founded on false interpretations. The authenticity of the document, as already stated, was doubted by no one before the fifteenth century. It was known to the Greeks in the second half of the twelfth century, when it appeared in the collection of Theodore Balssamon (1169 sqq.); later on another Greek canonist, Matthias Blaistes (about 1350), admitted it into his collection. It appears also in other Greek works. Moreover, it was highly esteemed in the Greek East. The Greeks claimed, it is well known, for the New Rome (Constantinople) the same honorary rights as those enjoyed by the Bishop of Old Rome. But now, by virtue of this document, they claimed for the Byzantine clergy also the privileges and prerogatives granted to the pope and the Roman ecclesiastics. In the West, long after its authenticity was recognized in the fifteenth century, its validity was still upheld by the majority of canons and jurists who continued throughout the sixteenth century to quote it as authentic. And though Baronius and later historians acknowledged it to be a forgery, they endeavoured to marshal other authorities in defence of its content, especially as regards the imperial donations. In later times even this was abandoned, so that now the whole "Constitutum," both in form and content, is rightly considered in all senses a forgery. See False Decretals; Sylvester I; States of the Church; Temporal Power of the Pope; Donation.
chesne and others as exaggerated. It would be better to say that the main point is incredible; the prisoners would not have been allowed by the Roman officials to starve; the details—that Mensuris confessed himself a traditor, that he prevented the succouring of the imprisoned confessors—are simply founded on the four fathers of the Secundus. Then we may safely reject all the latter part of the Acts as fictitious. The earlier part is authentic: it relates how certain of the faithful of Abitine met and celebrated their usual Sunday service, in defiance of the emperor’s edict, under the leadership of the priest Saturninus, for their bishop was a flamen, and they did not dare to meet in the house of Carthage. made bold replies when interrogated, and were imprisoned by Anulinus, who might have condemned them to death forthwith. The whole account is characteristic of the fervid African temperament. We can well imagine how the prudent Mensuris and his lieutenant, the deacon Cecilian, were disliked by some of the more excitable among their flock.

We know in detail how the inquiries for sacred books were carried out, for the official minutes of an investigation at Ciria (afterwards Constantine) in Numidia are preserved. The bishop and his clergy showed themselves ready to give up all they had, but drew the line at betraying their brethren; even here their generosity was not remarkable, for they added that the names and addresses were well known to the officials. The examination was conducted by Munatius Felix, perpetual flamen, curator of the colony of Carthage, who arrived with sulphur and copper at the bishop’s house—in Numidia the searching was more severe than in Proconsular Africa—the bishop was found with four priests, three deacons, four subdeacons and several foresse (diggers). These declared that the Scriptures were not there, but in the hands of the clerics. In fact the bookcase was found to be empty. The clergy present refused to give the names of the lectors, saying they were known to the notaries; but, with the exception of the books, they gave in an inventory of all possessions of the church: two golden chalices, six of silver, six silver cruets, a silver bowl, seven silver lamps, two candelsticks, seven short bronze lamp-stands with lamps, eleven bronze lamps with chains, eighty-two women’s tunic, twenty-eight veils, sixteen men’s tunics, thirteen pairs of men’s boots, forty-seven pairs of women’s boots, nineteen countrymen’s smocks. Presently the subdeacon Silvanus, wearing a silver breastplate, answered: “You are forced to give up the Four Gospels.” Felix replied: “It was the curator, Valentine; he forced me to throw them into the fire. Forgive me this fault, and God will also forgive it.” Secundus said: “Stand on one side.” Secundus (after another Gaspra) said to Purpurus and Satra: “You have killed the two sons of your sister at Mileum” (Milevis). Purpurus answered with vehemence: “Do you think I am frightened by you as the others are? What did you do yourself when the curator and his officials tried to make you give up the Scriptures? You did not even get off scot-free, for they gave you something, or ordered something to be given? They certainly did not let you go for nothing! For me I have killed and I kill those who are against me; do not provoke me to say any more. You know that I do not interfere where I have no business.” At this outburst a nephew of Secundus said to the primate: “You hear what they say of you! He is ready to withdraw and make a schism; and the same is true of all those whom you accuse; and I know they are capable of turning you out and condemning you, and you alone will then be the heretic. What is it to you if they have come to you and hate you? Each must render account to God.” Secundus (as St. Augustine points out) had apparently no reply ready against the accusation of Purpurus, so he turned to the two or three bishops who remained unaccused: “What do you think?” These answered: “They have God to whom they must give an account.” Secundus said: “You know and God knows. Sit down.” And all replied: Deo gratias.

These minutes have been preserved for us by St. Augustine. The later Donatists declared them forged, but not only could St. Optatus refer to the age of the parchment on which they were written, but they were made easily credible by the testimonies given before Zephynilius in 320. Seeck, as well as Duchesne (see below), upholds their genuineness. We hear from St. Optatus of another fallen Numidian bishop, who refused to ordain a subdeacon, but when he rose against him, he proved that he had offered incense, a crime of which the other bishops were not guilty. The bishops proceeded to ordain a bishop, and they chose Silvanus, who, as a subdeacon, assisted in the search for sacred vessels. The people thought that Victor rose up against him, crying that he was a traditor, and demanded that Optatus should ordain Donatus. But country people and gladiators were engaged to set him to the episcopal chair, to which he was carried on the back of a man named Mutus.  

CECILIAN AND MAJORINUS.—A certain Donatus of
Case Nigre is said to have caused a schism in Carthage during the lifetime of Menusiurs. In 311 Maxentius obtained dominion over Africa, and a deacon of Carthage, Felix, was accused of writing a defamatory letter against the tyrant. Menusiurs was said to have composed it for the deacon in his house and was himself summoned to Rome. He was acquitted, but died on his return journey. Before his departure from Africa, he had given the gold and silver ornaments of the church to the care of certain old men, and had also consigned an inventory of these effects to an aged woman, who was to deposit it to the next bishop. Maxentius gave liberty to the Christians, so that it was possible for an election to be held at Carthage. The bishop of Carthage, like the pope, was commonly consecrated by a neighbouring bishop, assisted by a certain number of others from the vicinity. He was primate not only of the proconsular province, but of the other provinces of North Africa, including Numidia, Byzacene, Tripolitana, and the two Mauretaniae, which were all governed by the vicar of prefects. In each of these provinces the local primate was attached to no town, but was held by the senior bishop, until St. Gregory the Great made the office elective. St. Optatus implies that the nominations of Numidia, many of whom were at no great distance from Carthage, had expected that they would have a voice in the election; but two priests, Botrus and Cælestius, who each expected to be elected, had managed that only a small number of bishops should be present. Cæcilian, the deacon who had been so obstinately to the martyr, was duly chosen by the whole people, placed in the chair of Menusiurs, and consecrated by Felix, Bishop of Antogna or Abutiga. The old men who had charge of the treasure of the church were obliged to give it up; they joined with Botrus and Cælestius in refusing to acknowledge the new bishop. They were summoned before a rich lady named Lucilla, who had a grudge against Cæcilian because he had rebuked her habit of kissing the bone of an uncanonized (non vindicatus) martyr immediately before receiving Holy Communion. Probably we have here again a martyr whose death was due to his own ill-regulated fervour.

Secundus, as the nearest primate, came with his suffragans to Carthage to judge the affair, and in a great council of seventy bishops declared the ordination of Cæcilian to be invalid, as having been performed by a traditor. A new bishop was consecrated, Menusiurs, and a small council of bishops and the old primate assembled. That lady provided the sum of 300 jolles (more than 11,000 dollars), nominally for the poor; but all of it went into the pockets of the bishops, one-quarter of the sum being seized by Purpurius of Limata. Cæcilian had possession of the basilica and the cathedra of Cyriph, and the people were with him, so that he refused to appear before the council. "If I am not properly consecrated," he said ironically, "let them treat me as a deacon, and lay hands on me afresh, and not on another."

No wonder that the action of this council, which sent letters throughout Africa, had a great influence. But at Carthage it was well known that Cæcilian was the choice of the people, and that it was believed that Felix of Antogna had given up the Sacred Books. Rome and Italy had given Cæcilian their communion. The Church of the moderate Menusiurs did not hold that consecration by a traditor was invalid, or even that it was illicit, if the traditor was still in lawful possession of his see. The council declared that a traditor could not act as a bishop, and that any who were in communion with traditors were cut off from the Church. They called themselves the Church of the martyrs, and declared that all who were in communion with public sinners like Cæcilian and Felix were necessarily excommunicate.

The Condemnation by Pope Melchiades.—Very soon there were many cities having two bishops, the one in communion with Cæcilian, the other with Majorinus. Constantine, after defeating Maxentius (28 May, 312) and becoming himself a Christian in his acts. He wrote to Anulinus, proconsul of Africa (was he the same as the mild proconsul of 303?) restoring the churches to Catholics, and exempting clerics of "the Catholic Church of which Cæcilian is president" from civil functions (Eusebius, Hist. Eccl., X, v, 1). He wrote to Cæcilian (ibid., X, v, 1) sending him an order for 3000 jolles to be distributed in Africa, Numidia, and Mauretania; if more was needed, the bishop must apply for more. He added that he had heard of turbulent persons who sought to corrupt the Church; he had ordered the proconsul Anulinus and the vicar of prefects to restrain them, and Cæcilian was to appeal to these officials if necessary. The opposing party lost no time. A few days after the publication of these letters, their delegates, accompanied by a mob, brought to Anulinus two bundles of documents, containing the complaints of their party against Cæcilian, to be forwarded to the emperor. St. Optatus has preserved a few words from their petition, in which Constantine is begged to grant judges from Gaul, where under his father's rule there had been no persecution, and therefore no traditors. Constantine was afraid the Church's position too weak to make Gallic bishops judges of the primate of Africa. He at once referred the matter to the pope, expressing his intention, laudable, if too sanguine, of allowing no schisms in the Catholic Church. That the African schismatics might have no ground of complaint, he ordered them to summon Rutilius of Autun, Maternus of Cologne, and Marinus of Arles, to repair to Rome, to assist at the trial. He ordered Cæcilian to come thither with ten bishops of his accusers and ten of his own communion. The memorials against Cæcilian he sent to the pope, who would know, he says, what procedure to employ in order to conclude the whole matter in accordance with justice (Eusebius, Hist. Eccl., X, v, 18). Pope Melchiades summoned fifteen Italian bishops to sit with him. From this time forward we find that in all important matters the popes issue their decretal letters, if necessary, to the bishops. The case of Rutilius and Reticius of Autun, Maternus of Cologne, and Marinus of Arles, to repair to Rome, to assist at the trial. He ordered Cæcilian to come thither with ten bishops of his accusers and ten of his own communion. The memorials against Cæcilian he sent to the pope, who would know, he says, what procedure to employ in order to conclude the whole matter in accordance with justice (Eusebius, Hist. Eccl., X, v, 18). Pope Melchiades summoned fifteen Italian bishops to sit with him. From this time forward we find that in all important matters the popes issue their decretal letters, if necessary, to the bishops. The case of Rutilius and Reticius of Autun, Maternus of Cologne, and Marinus of Arles, to repair to Rome, to assist at the trial. He ordered Cæcilian to come thither with ten bishops of his accusers and ten of his own communion. The memorials against Cæcilian he sent to the pope, who would know, he says, what procedure to employ in order to conclude the whole matter in accordance with justice (Eusebius, Hist. Eccl., X, v, 18). Pope Melchiades summoned fifteen Italian bishops to sit with him. From this time forward we find that in all important matters the popes issue their decretal letters, if necessary, to the bishops. The case of the chief accusers, St. Augustine, and the other Catholic apologists that this was "Donatus the Great," the successor of Majorinus as schismatic Bishop of Carthage. But the Donatists of St. Augustines time were anxious to deny this, as they did not wish to admit that their protagonist had been condemned, and the Catholics at the conference of 411 granted them the existence of a Donatist Bishop of Case Nigre, who had distinguished himself by active hostility to Cæcilian. Modern authorities agree in accepting this view. But it seems inconceivable that, if Majorinus was still alive, he should not have been obliged to go to Rome. It would be very strange, in fact, for Case Nigre should have been the leader of the party, without any explanation, unless Case Nigre was simply the birthplace of Donatus the Great. If we assume that Majorinus had died and had been succeeded by Donatus the Great just before the trial at Rome, we shall understand why Majorinus is never again mentioned. The accusations against Secundus, as being anonymous and unproved. The witnesses brought from Africa acknowledged that they had nothing against him. Donatus, on the other hand, was convicted by his own confession of having
rebutted and of having laid his hands in penance on bishops—this was forbidden by ecclesiastical law. On the third day the unanimous sentence was pronounced by Melchiades: Caecilian was to be maintained in ecclesiastical communion. If Donatist bishops returned to the church in a place where there were two rival bishops, the junior was to remain and the pope was to be another see. The Donatists were furious. A hundred years later their successors declared that Pope Melchiades himself was a traitor, and that on this account they had not accepted his decision; though there is no trace of this having been alleged at the time. But the case of the bishops of Rome were donatized with the seventy bishops of the Carthaginian Council, and a fresh judgment was demanded.

The Council of Arles.—Constantine was angry, but he saw that the party was powerful in Africa, and he summoned a council of the whole West (that is, of the whole of his actual dominions) to meet at Arles on 1 August. 314. Melchiades was dead, and his successor, St. Sylvester, thought it unbecoming to leave Rome, thus setting an example which he repeated in the case of Nicaea, and which his successors followed in the cases of Sardica, Rimini, and the Eastern ecclesiastical Councils. Between forty and fifty sees were represented at the council by bishops or proxies: the Bishops of London, York, and Lincoln were there. St. Sylvester sent legates. The council condemned the Donatists and drew up a number of canons; it reported its proceedings in a letter to the pope, which is entitled the “Life of Caecilian.” But, as in the case of Nicaea, no details remain, nor are any such mentioned by the ancients. The Fathers in their letter salute Sylvester, saying that he had rightly decided not to quit the spot “where the Apostles daily sit in judgment.” He had been with them, they might perhaps have dealt more severely with the heretics among the canons of the council (which was still practised in Africa), another declares that those who falsely accuse their brethren shall have communion only at the hour of death. On the other hand, traitors are to be refused communion, but only when the fault has been proved by public official acts; those whom they have ordained are to retain their positions. The council produced some effect in Africa, but the main body of the Donatists was immovable. They appealed from the council to the emperor. Constantine was horrified: “O insolent man!” he wrote, “they appeal from earth to heaven, from Jesus Christ to a man.”

The Policy of Constantine.—The emperor retained the Donatist envoys in Gaul, after at first dismissing them. He seems to have thought of sending for Caecilian, then of granting a full examination in Africa. The case of Felix of Aptons was in fact examined by his order at Carthage in February. 315 (St. Augustine is probably wrong in giving 314). The minutes of the proceedings have come down to us in a mutilated state; they are referred to by St. Optatus, who appended them to his book with other documents, and they are frequently cited by St. Augustine. It was shown that the letter which the Donatists put forward as proving the crime of Felix, had been interpolated by a certain Ingensius; this was established by the confession of Ingensius, as well as by the witness of Albus, the writer of the letter. It was proved that Felix was actually absent at the time the letter was produced. Sacred Books was made at Aptons. Constantine eventually summoned Caecilian and his opponents to Rome; but Caecilian, for some unknown reason, did not appear. Caecilian and Donatus the Great (who was now at all events, bishop) were called to Milan, where Constantine heard both parties with great severity. He declared that Caecilian was innocent and an excellent bishop (Augustine, Contra Cresconium, III, lixxi). He retained both in Italy, however, while he sent two bishops, Eunomius and Olympius, to Africa, with an idea of putting Donatus and Caecilian aside, and substituting a new bishop, to be agreed upon by all parties. It is to be presumed that Caecilian and Donatus had assented to this course; but the violence of the sectaries made it impossible to carry it out. Eunomius and Olympius declared at Carthage that the Catholic Church was that which was diffused throughout the world and that the See of Rome could not be divided. The Donatists could not be annulled. They communicated with the clergy of Caecilian and returned to Italy. Donatus went back to Carthage, and Caecilian, seeing this, felt himself free to do the same. Finally Constantine ordered that the churches which the Donatists had taken should be returned to Silvanus. Their other meeting-places were confiscated. Those who were convicted (of calumnies?) lost their goods. Evictions were carried out by the military. An ancient sermon on the passion of the Donatists “martyrs,” Donatus and Advocatus, describes such scenes. In one of them a regular massacre occurred, and a bishop was among the slain, if we may trust this curious document. The Donatists were proud of their persecution of Caecilian,” which “the Pure” suffered at the hands of the “Church of the Traditors.” The Comes Leontius and the Dux Fractus were the special objects of their indignation.

In 320 came revelations unpleasant to the “Pure.” Nundinarius, a deacon of Cirta, had a quarrel with his bishop, Silvanus, who caused him to be stoned—so he said in his complaint to certain Numidian bishops, in which he threatened that if they did not use their influence in favor of Silvanus, he would tell all he knew of them. As he got no satisfaction he brought the matter before Zenophilus, the consular of Numidia. The minutes have come down to us in a fragmentary form in the appendix of Optatus, under the title of “Gesta apud Zenophilum.” Nundinarius produced letters from Purpurius and other bishops in favor of Silvanus and to the people of Cirta, trying to have peace made with the inconvenient deacon. The minutes of the search at Cirta, which we have already cited, were read, and witnesses were called to establish their accuracy, including two of the possesores then present and a lector, Victor the grammarian. It was shown not only that Silvanus was a traditor, but that he had assisted Purpurius, together with two priests and a deacon, in the theft of certain casks of vinegar belonging to the treasury, which were in the temple of Aesculapius. Silvanus had retained a priest for the sum of 20 folles (500 to 600 dollars). It was established that none of the money given by Lucilla had reached the poor for whom it was ostensibly given. Thus Silvanus, one of the mainstays of the “Pure” Church, which declared that to communicate with any traditor was to be outside the Church, was himself proved to be a traditor. He was exiled by the consular for robbing the treasury, for obtaining money under false pretences, and for getting himself made bishop by violence. The Donatists later preferred to say that he was banished for refusing to communicate with the “Caelicianists” and Cresconium even spoke of “the persecution of Zenophilus.” But it should have been clear to all that the consecrators of Majorinus had called their opponents traditores in order to cover their own delinquencies.

The Donatist party owed its success in great part to the ability of its leader Donatus, the successor of Majorinus. He appears to have really merited the title of “the Great” by his eloquence and force of character. His writings are lost. His influence with his party was extraordinary. St. Augustine frequently declares against his arrogance and the impetuosity with which he was almost worshipped by his followers. He is said to have been a favorite of the adulation he received, and after death he was counted as a martyr and miracles were ascribed to him.

In 321 Constantine relaxed his vigorous measures, having found that they did not produce the peace
DONATISTS

had hoped for, and he weakly begged the Catholics to suffer the Donatists with patience. This was not easy, for the schismatics broke out into violence. At Carthage, Silvanus having returned, they seized the basilica which the emperor had built for the Catholics. They could not so easily be silenced, for Constantine found it better expedient than to build another. Throughout Africa, but above all in Numidia, they were numerous. They taught that in all the rest of the world the Catholic Church had perished, through having communicated with the traditor Cecilian; their sect alone was the true Church. If a Donatist came into these churches, they drove him out, and washed with salt the pavement where he had stood. Any Catholic who joined them was forced to be rebaptized. They asserted that their own bishops and ministers were without fault, else their ministrations would be invalid. But in fact they were convicted of drunkenness and other sins. St. Augustine tells us on the authority of Tichonius that the Donatists held a council of two hundred and seventy bishops in which they discussed for seventy-five days the question of rebaptism; they finally decided that in cases where tradition refused to believe that they should be rebaptized, these bishops should be rebaptized. But in spite of this; and the Donatist bishops of Mauretania did not rebaptize until the time of Macarius. Outside Africa the Donatists had a bishop residing on the property of an adherent in Spain, and at an early period of the schism they made a bishop for their small congregation in Rome, which was outside the city, and had the name of Montesinos. This antipapal succession without a beginning was frequently ridiculed by Catholic writers. The series included Felix, Boniface, Encolpius, Macrobius (c. 370), Lucian, Claudian (c. 378), and again Felix in 411.

THE CIRCUMCELLIONS.—The date of the first appearance of the Circumcellions is uncertain, but probably they began before the death of Constantine. They were mostly rustic enthusiasts, who knew no Latin, but spoke Punic; it has been suggested that they may have been of Berber blood. They joined the ranks of the Donatists, and were called by them agonitici and "soldiers of Christ", but in fact were brigands. Troops of them were to be met in all parts of Africa. They had no regular occupation, but ran about armed, like madmen. They used no swords, on the ground that St. Peter had been tolled: they wore clubs, which they called "Israelites". They bruised their victims without killing them, and left them to die. In St. Augustine's time, however, they took to swords and all sorts of weapons; they rushed about accompanied by unmarried women, played, and drank. Their battle-cry was Deo laudes, and no bands were more terrible to meet. They frequently sought death, counting suicide as martyrdom. They were especially fond of flinging themselves from precipices; more rarely they sprang into the water or fire. Even women caught the infection, and those who had sought to avoid death cast themselves from the cliffs, to atone for their fault. Sometimes the Circumcellions sought death at the hands of others, by either paying men to kill them, by threatening to kill a passer-by if he would not kill them, or by their violence inducing magistrates to have them executed. While paganism still flourished, they would come in vast crowds to any great sacrifice, not to destroy the idols, but to be martyred. Theodoret says a Circumcellion was accustomed to announce his intention of becoming a martyr long before the time, in order to be well treated and allowed to fight for salvation. He relates an amusing story (Hier. Fab IV. xix) to which St. Augustine also refers. A number of these fanatics, fattened like pheasants, met a young man and offered him a drawn sword to smite them with, threatening to murder him if he refused. He pretended to fear that when he had killed a few, the rest might change their minds and avenge the death of their fellows; and he insisted that they must all be bound. They agreed to this; when they were defenceless, the young man gave each of them a beating and went his way.

When in controversy with Catholics, the Donatist bishops were not proud of their supporters. They declared that self-sacrifice from a cliff had been forbidden in their councils. Yet the bodies of these suicides were sacrilegiously honoured, and crowds celebrated their anniversaries. Their bishops could not always rely on the clergy, or else they often glad enough of the strong arms of the Circumcellions. Theodoret, soon after St. Augustine's death, knew of no other Donatists than the Circumcellions; and these were the typical Donatists in the eyes of all outside Africa. They were especially dangerous to the Catholic clergy, whose houses they attacked and pillaged. They beat and wounded them, put lime and vinegar on their eyes, and even forced them to be rebaptized. Under Axi- dus and Fasir, "the leaders of the Saints" in Numidia, property and roads were unsafe, debtors were protected, slaves were set in their masters' carriages, and the masses made to communi cate with the Donatists. The Donatist bishops invited a general named Taurus to repress these extravagances. He met with resistance in a place named Octavia, and the altars and tablets to be seen there in St. Optatus' time testify to the veneration given to the Circumcellions who were slain; but if their bishops were not martyrs, it seems, on the whole, that they were not to martyrs. It seems that in 336—7 the prefectus praetorio of Italy, Gregory, took some measures against the Donatists, for St. Optatus tells us that Donatus wrote him a letter beginning: "Gregory, stain on the senate and disgrace to prefects". They were to be punished.

THE PERSECUTION OF MACARUS.—When Constantine became master of the East by defeating Licinius in 323, he was prevented by the rise of Arianism in the East from sending, as he had hoped, Eastern bishops to Africa to adjust the differences between the Donatists and the Catholics. Cecilian of Carthage was present at the Council of Nicæa in 325, and his successor, Gratus, was at that of Sardica in 342. The conciliabulum of the Easterns on that occasion wrote a letter to Donatus, as though he were the true Bishop of Carthage; but the Arians failed to get the support of the Donatists, who looked upon the whole East as set off from the Catholic Church, which survived them alone. The Emperor Constans was as anxious as his father to give peace to Africa. In 347 he sent thither two commissioners, Paulius and Macarius, with large sums of money for distribution. Donatus naturally saw in this an attempt to win over his adherents to the Church by bribery; he received the envoys with insolence: "What has the emperor to do with the Church?" said he, and he forbade his people to accept any largess from Constans. In most parts, however, the friendly mission seems to have been not unfavourably received. But at Bagai in Numidia the bishop, Donatus, assembled the Circumcellions of the neighbourhood, who had already been excited by their bishop. Macarius was obliged to ask for the protection of the military. The Circumcellions attacked them, and killed two or three soldiers; the troops then became uncontrollable, and slew some of the Donatists. This unfortunate incident was thereafter continually in the teeth of the Catholics, and they were nicknamed Macarans by the Donatists, who declared that Donatus of Bagai had been precipitated from a rock, and that another bishop, Marculus, had been thrown into the sea. The existence of Arius, and the latter "martyr" do not seem to deserve credit, and the African Catholics believed that the two bishops had sought their own deaths. The Acts of two other Donatist martyrs of 347, Maximian and Isaac, are preserved; they apparently belong to Carthage, and are attributed by Harnack to the Antipope Macrobius.
seems that after violence had begun, the envoys ordered the Donatists to unite with the Church whether they willed or no. Many of the bishops took to flight with their partisans; a few joined the Catholics; the rest were banished. Donatus the Great died in exile. At this time, Victor, who wrote in 367, composed a work to show that the servants of God are hated by the world.

A solemn Mass was celebrated in each place where the union was completed, and the Donatists set about a rumour that images (obviously of the emperor) were to be placed on the altar and worshipped. As nothing of the sort was found to be Africa, and as the emperor merely made a speech in favour of unity, it seems that the reunion was effected with less violence than might have been expected. The Catholics and their bishops boasted God for the peace that ensued, though they declared that they had no responsibility for the action of Paulus and Macarius. In the following year Gratian, the Catholic Bishop of Carthage, held a council, in which the reiteration of baptism was forbidden, while, to please the rallyed Donatists, traitors were condemned anew. It was forbidden to honour suicides as martyrs.

THE RESTORATION OF DONATISM BY JULIAN.—The peace was happy for Africa, and the forcible means by which it was obtained were justified by the violence of the sectaries. But the accession of Julian the Apostate in 361 changed the face of affairs. Delighted to throw Christianity into confusion, Julian allowed the Catholics who had been banished to return to the sees which the Arians were occupying. The Donatists, who had been banished by Constantius, were similarly allowed to return at their own petition, and received back their basiliques. Scenes of violence were the result of this policy both in the East and the West. A Yougos wrote St. Optatus, "returned to Africa at the same moment that the devil was set free", for the same emperor restored supremacy to paganism and the Donatists to Africa. The decree of Julian was considered so discreditable to them, that the Emperor Honorius in 405 had it posted up throughout Africa for their shame. St. Optatus gives a vehe-

The revolt of Firmus, a Mauretanian chieftain who defied the Roman power and eventually assumed the style of emperor (366–72), was undoubtedly supported by many Donatists. The imperial laws against them were strengthened by Valentinian in 375 and by Gratian, who legislated a law to show that the Catholic catechumens of the Donatists were to be given up to the Catholics. St. Augustine shows that even the churches which the Donatists themselves had built were included. The same emperor required Claudian, the Donatist bishop of Rome, to return to Africa; as he refused to obey, a Roman council had him driven a hundred miles from the city. It is probable that the Catholic Bishop of Carthage, Genethlius, caused the laws to be mildly administered in Africa.

St. Optatus.—The Catholic champion, St. Optatus, Bishop of Milevis, published his great work "De schismate Donatistarum" in answer to that of the Donatist Bishop of Carthage, Parmenianus, under Valentinian and Valens, 364–75 (so St. Jerome). Optatus himself tells us that he was writing after the death of Julian (363) and more than sixty years after the beginning of the schism (303). The form which we possess is a second edition, brought up to date by the author after the accession of Pope Siricius (Dec., 354), with a seventh book added to the original six. In the first book he describes the origin and growth of the schism; in the sec-

They were driven out of Africa and took refuge in Gaul. In the third book he defends the Catholics from the charge of persecuting, with especial reference to the days of Macarius. In the fourth book he refutes Parmenianus's proofs from Scripture that the sacrifice of a sinner is polluted. In the fifth book he shows the validity of baptism even when conferred by sinners, for it is conferred by Christ, the minister being the instrument only. This is the first important statement of the doctrine that the grace of the sacraments is derived from the opus operatum of Christ independently of the worthiness of the minister. In the sixth book he describes the violence of the Donatists and the sacrilegious way in which they had treated Catholic altars. In the seventh book he treats chiefly of unity and of reunion, and returns to the subject of Macarius.

He calls Parmenianus "brother", and wishes to treat the Donatists as brethren, since they were not unlike other Fathers, he prays that covets the unity of the church, pagans and heretics go to hell; schismatics and all Catholics will eventually be saved after a necessary purgatory. This is the more curious, because before him and after him in Africa Cyprian and Augustine both taught that schism is as bad as heresy, if not worse. St. Optatus was much venerated by St. Augustine and later by St. Fulgentius. He writes with vehemence, sometimes with violence, in spite of his protestations of friendliness; but he is carried away by his indignation. His style is forceful and effective, often concise and epigrammatic. To this work he appended a collection of documents containing the evidence for the history he had related. This dossier had certainly been formed much earlier, at all events before the peace of 347, and not long after the latest document it contains, which is dated Feb., 330; the rest are not later than 321, and may possibly have been put together as early as that year. Unfortunately these important historical testimonies have come down to us only in a single mutilated MS., the archetype of which was also incomplete. The collection was freely used at the conference of 411 and is often quoted at some length by St. Augustine, who has preserved many of the most important portions which would otherwise be unknown to us.

The Maximianists.—Before Augustine took up the mantle of Optatus together with a double portion of his spirit, the Catholics had gained new and victorious arguments from the divisions among the Donatists.
DONATISTS

127 DONATISTS

themselves. Like so many other schisms, this schism bred schisms within itself. In Mauretania and Numidia these separate sects were so numerous that the Donatists themselves could not name them all. We hear of Urbanists; of Claudianists, who were reconciled to the Church of Carthage; of Rogatists, a Mauretanian sect, of mild character, because no Circumcellions belonged to it; the Rogatists were severely punished whenever the Donatists could induce the magistrates to do so, and were also persecuted by Optatus of Thamugadi. But the most famous sect of the Donatists, for the story of the separation from the Donatists reproduces with strange exactitude that of the withdrawal of the Donatists themselves from the communion of the Church; and the conduct of the Donatists towards them was so inconsistent with their avowed principles, that it became in the skilled hands of Augustine the most effective weapon of all his controversial armoury.

Primianus, Donatist Bishop of Carthage, excommunicated the deacon Maximianus. The latter (who was, like Majorinus, supported by a lady) got together a council of forty-three bishops, who summoned Primianus to appear before them, to be heard. The bishop insulted their envoys, tried to have them prevented from celebrating the Sacred Mysteries, and had stones thrown at them in the street. The council summoned him before a greater council, which met to the number of a hundred bishops at Cebarsusium in June, 393. Primianus was deposed; all clerics were to leave communion within eight days; if they should delay till after Christmas, they would not be permitted to return to the Church even after penance; the laity were allowed until the following Easter, under the same penalty. A new bishop of Carthage was appointed in the person of Maximianus himself, and was consecrated by twelve bishops. The heretics of Primianus were rebaptized, if they had been baptized after the permitted delay. Primianus stood out, and demanded to be judged by a Numidian council; three hundred and ten bishops met at Bagas in April, 394; the primate did not take the place of an accused person, but himself presided. He was of course acquitted, and the Maximianists were condemned without a hearing. All but the twelve consecrators and their abettors among the clergy of Carthage were given till Christmas to return; after this period they would be obliged to do penance, composed of sermons in elegant style by Emeritus of Caesarea, and adopted by acclamation, made the Donatists henceforth ridiculous through their having readmitted schismatics without penance. Maximian's church was razed to the ground, and after the term of grace had elapsed, the Donatists persecuted the unfortunate Maximianists, representing themselves as Catholicks, and demanding that the magistrates should enforce against the new sectaries the very laws which Catholic emperors had drawn up against Donatism. Their influence enabled them to do this, for they were still far more numerous than the Catholicks, and the magistrates must often have been of their party. In the reception of those who returned from the party of Maximian they were yet more fatally inconsequent. The rule was theoretically adhered to that all who had been baptized in the schism must be rebaptized; but if a man refused, he and his whole flock were admitted without rebaptism. This was allowed even in the case of two of the consecrators of Maximian, Pretextatus of Asur and Felicianus of Musti, after the proconsul had vainly tried to expel them from their sees, and although a Donatist bishop, Rogatus, had already been appointed at Asur. In another case the party of Primianus was more consistent. Salvius, the Maximianist Bishop of Membressa, was another of the consecrators. He was twice summoned by the proconsul to retire in favour of the Primanian Restitutus. As he was much respected by the people of Membressa, a mob was brought from over from the neighbouring town of Abitene to expel him; the aged bishop was beaten, and made to dance with dead dogs tied round his neck. But his people built him a new church, and three bishops coexisted in this small town, a Maximianist, a Primanian, and a Catholick.

The leader of the Donatists at this time was Optatus, Bishop of Thamugadi (Timgad), called Gildonianus, from his friendship with Gildo, the Count of Africa (380-397). For ten years Optatus, supported by Gildo, was the tyrant of Africa. He persecuted the Rogatists and Maximianists, and he used troops against the Catholicks. St. Augustine tells us that his vices and cruelties were beyond description; but they had at least the effect of disgracing the cause of the Donatists, for though he was hated throughout Africa for his wickedness and his evil deeds, yet the Puritan faction remained always in full communion with this bishop, who was a robber, a Session, an oppressor, a traitor, and a monster of cruelty. When Gildo fell in 397, after having made himself master of Africa for a few months, Optatus was thrown into a prison, in which he died.

SAINT AUGUSTINE.—St. Augustine began his vitiqious campaign against Donatism soon after he was ordained priest in 391. His popular psalm or "Aberedarium" against the Donatists was intended to make known to the people the arguments set forth by St. Optatus, with the same conciliatory end in view. It shows that the sect was founded by traditors, condemned by popes and council, separated from the whole world, a cause of division, violence, and bloodshed; the true Church is the one Vine, whose branches are over all the earth. After St. Augustine had become bishop in 395, he obtained conferences with some of the Donatist leaders, though not with his successor at Hippo. In 400 he wrote the latter of Parmenianus, refuting his calumnies and his arguments from Scripture. More important were his seven books on baptism, in which, after developing the principle already laid down by St. Optatus, that the effect of the sacrament is independent of the holiness of the minister, he shows in great detail that the authority of St. Cyprian is more awkward than convenient for the Donatists. The principal Donatist controversialist of the day was Petilianus, Bishop of Constantine, a successor of the traditor Silvanus. St. Augustine wrote two books in reply to a letter of his against the Church, adding a third book to answer another letter in which he was himself attacked by Petilianus. Before this last book he published his "De Unitate ecclesiae" about 403. To these works must be added some sermons and some letters which are real treatises.

The arguments used by St. Augustine against Donatism fall under three heads. First we have the historical proofs of the regularity of Caecilian's consecration of the innocence of Felix of Apotonga, of the guilt of the founders of the "Pure" Church, also the judgments given by popes and council, separated from the whole world, a cause of division, violence, and bloodshed; the true Church is the one Vine, whose branches are over all the earth. Second, there are the doctrinal arguments: the proofs from the Old and New Testaments that the Church is Catholic, divided throughout the world, and necessarily one and united; appeal is made to the See of Rome, where the succession of bishops is uninterrupted from St. Peter himself; St. Augustine borrows his list of popes from St. Optatus (Ep. II), and in his psalm crystallizes the argument into the famous phrase: "That is the rock against which the proud gates of hell do not prevail." A further appeal is to the Eastern Church, and especially to the Apostolic Churches to which St. Peter, St. Paul, and St. John addressed epistles—they are not in communion with the Donatists. The validity of baptism conferred by heretics, the impurity of rebaptizing, are
important points. All these arguments were found in St. Optatus. Peculiar to St. Augustine is the necessity of defending St. Cyprian, and the third category is wholly his own. This third division comprises the argumentum ad hominem drawn from the inconsistence of the Donatists; full fellowship was accorded to malefactors like Optatus Gildonanus and the Circumcellions; Tichonius turned against his own party; Maximin had divided from Primianus just as Majorinus from Caecilian; the Maximianists had been readmitted without reformation.

This last method of argument was found to be of great practical value, and many conversions were now taking place, largely on account of the false position in which the Donatists had placed themselves. This point had been especially emphasized by the Council of Carthage of Sept., 401, which had ordered information as to the treatment of the Maximianists to be gathered from magistrates. The same synod restored the earlier rule, long since abolished, that Donatist bishops and clergy should retain their rank if they returned to the Church. Pope Anastasius I wrote to him himself, urging the importance of the Donatist question. Another council in 403 organized public disputations with the Donatists. This energetic action roused the Circumcellions to new violence. The life of St. Augustine was endangered. His future biographer, St. Possidius of Calama, was insulted and ill-treated by a party led by a grammarian, Crespinus. The latter's bishop, also named Crespinus, tried at Carthage and fined ten pounds of gold as a heretic, though the fine was remitted by Possidius. This is the first case known to us in which a Donatist is declared a heretic, but henceforth it is the common style of the laws and decrees of Maximianus, Bishop of Bagai, is also related by St. Augustine in detail. The Emperor Honorius was induced by the Catholics to renew the old laws against the Donatists at the beginning of 405. Some good resulted, but the Circumcellions of Hippo were excited to new violence. The letter of Petilianus was defended by a grammarian named Cresciognus, against whom St. Augustine published a reply in four books. The third and fourth books are especially important, as in these he argues from the Donatists' treatment of the Maximianists, quotes the Acts of the Council of Carthage by Secundus, and other important documents. The saint also replied to a pamphlet by Petilianus, "De unico baptismae".

The "Collatio" of 411.—St. Augustine had once hoped to conciliate the Donatists by reason only. The violence of the Circumcellions, the cruelties of Optatus of Thamugadi, the more recent attacks on Catholic bishops had all given proof that repression by the secular arm was absolutely unavoidable. It was not necessarily a case of persecution for religious opinions, but simply of the protection of life and property and the securing of freedom and safety for Catholics. Nevertheless the laws were much harsher than this. Those of Honorius were promulgated anew in 408 and 410. In 411 the method of disputation was organized on a large scale by order of the emperor himself at the request of the Catholic bishops. Their case was now complete and unanswerable. But this was to be brought home to the people of Africa, and public opinion was to be forced to recognize the facts, by a public exposure of the weakness of the separatist position. The emperor sent an official named Marcellinus, an excellent Christian, to preside as cognitor at the conference. He issued a proclamation declaring that he would consult his absolute imperial powers in the proceedings and in his final judgment. The Donatist bishops who should come to the conference were to receive back for the present the basilicas which had been taken from them. The number of those who arrived at Carthage was very large, though somewhat less than the two hundred and seventy-nine whose signatures were appended to a letter to the president. The Catholic bishops numbered two hundred and eighty-six. Marcellinus decided that each party should select seven disputants, who alone should speak, and that they might consult, and four secretaries to keep the records. Thus only thirty-six bishops would be present in all. The Donatists pretended that this was a device to prevent their great numbers being known; but the Catholics did not object to all of them being present, provided no disturbance were caused.

The chief Catholic speaker, besides the amiable and venerable Bishop of Carthage, Aurelius, was of course Augustine, whose fame had already spread through the whole Church. His friend, Alypius of Tagaste, and his disciple and biographer, Possidius, were also among the seven. The principal Donatist speakers were Emeritus of Cesarea in Mauretania (Cherchel) and Petilianus of Constantine (Cirta); the latter spoke or interrupted about a hundred and fifty times, until on the third day he was so hoarse that he had to desist. The Catholics made a generous proposal that any Donatist bishop who should join the Donatist question, another council in 403 organ, public disputations with the Donatists. This energetic action roused the Circumcellions to new violence. The life of St. Augustine was endangered. His future biographer, St. Possidius of Calama, was insulted and ill-treated by a party led by a grammarian, Crespi,
hundred. A further law was published in 428. The good Marcellinus, who had become the friend of St. Augustine, fell a victim (it is supposed) to the rancour of the Donatists; for he was put to death in 413, as though an accomplice in the revolt of Heraclius, Count of Africa. Historians deny that the emperor, who did not believe him guilty. Donatism was not now discouraged by the conference and proscribed by the persecuting laws of Honorius. The Circumcellions made some dying efforts, and a priest was killed by them at Hippo.

It does not seem that the decrees were rigidly carried out. In any case, clerical clergy were still found in Africa. The ingenious Emerita was at Carthage in 418, and the wish of Pope Zosimus St. Augustine had a conference with him, without result. But on the whole Donatism was dead.

Even before the conference the Catholic bishops in Africa were considerably more numerous than the Donatists, except in Numidia. From the time of the invasion of the Vandals in 429 little is heard of them until the days of St. Gregory, when they seem to have revived somewhat, for that pope complained to the Emperor Maurice that the laws were not strictly enforced. They finally disappear with the irruptions of the Saracens.

Donatist Writers.—There seems to have been no lack of literary activity among the Donatists of the fourth century, though little remains to us. The works of Donatus the Great were known to St. Jerome, but have not been preserved. His book on the Holy Spirit is lost. It is said that Father to the Church. It is possible that the Pseudo-Cyprianic “De singularitate clericorum” is by Macrobius; and the “Adversus aleatores” is by an antipope, either Donatist or Novatianist. The arguments of Parmenianus and Cresconianus are known to us, though their works are also lost. But that a treatise of St. Augustine’s citations are known in the Pseudo-Augustinian “Contra Felicitianum Donatistam” is certain. Of the donatists, or for the church, which was quite inconsistent with Donatism, and which Parmenianus tried to refute. In the famous words of St. Augustine (who often refers to his illogical position as to the force with which he argued against the cardinal tenets of his own sect): “The Donatists, assailed on all sides by the voices of the holy pages, woke and saw the Church of God diffused throughout the world, as had been foreseen and foretold of her so long before by the hearts and mouths of the saints. And seeing this, he undertook to demonstrate and assert against his own party that no sin of man, however villainous and monstrous, can interfere with the promises of God, nor can any impurity of any persons within the Church cause the word of God to be made void as to the existence and diffusion of the Church to the ends of the earth, which was promised to the Fathers and now is manifest to all men both in the sacred page and in the Church.”

Donaldus of Bagai. See DONATISTS.

Donaldus of Case Nigre. See DONATISTS.

Donaldus of Fiesole, Irish teacher and poet, Bishop of Fiesole about 829–876. In an ancient collection of the Vita Aurea, a fourth century copy exists in the Laurentian library of Florence, there is an account of the life of Donaldus, from which we glean the following facts. Donaldus was born in Ireland, of a noble family. About 816 he visited the tombs of the Apostles in Rome. On his journey he was led by Divine Providence to the city of Fiesole, which he entered at the moment when the people were crowded around their altars praying for a bishop to deliver them from the evils, temporal and spiritual, which afflicted them. Raised by popular acclaim to the See of Fiesole, Donaldus instituted a revival of piety and learning in the Church over which he was placed. He himself did not disdain to teach the “art of metrical composition.” The “Life” is interspersed with short poems written by the saintly bishop. The best known of these is the twelve-line poem in which he describes the beauty and fertility of his native land, and the prowess and piety of its inhabitants. Donaldus also composed an epitaph in which he alludes to his birth in Ireland, his years in the service of the princes of Italy (Lothair and Louis), his episcopate at Fiesole, and his activity as a teacher of grammar and poetry.

WILLIAM TURNER.

Donaldus the Great. See DONATISTS.

Donders, Peter, missionary among the lepers, b. at Tilburg in Holland, 27 Oct., 1807; d. 14 Jan., 1887. He desired from his early childhood to be a priest, but he had to begin life as a worker in a factory. He afterwards became a servant in a college where he acquired a little and made a beginning. Later a benefactor enabled him to pursue his theological studies in the College of Herlaar. A chance reading of the “Annals of the Propagation of the Faith” determined his vocation for foreign missions. He was accepted in 1832 in the Dutch Guiana Mission, but was ordained priest the following year, and in 1842 arrived at Paramaribo to begin his long apostolic career. He laboured with success among the blacks in the plantations, and by 1850 had instructed and baptized 1200. In the epidemic of 1851 his labours were superhuman, but like his fellow-priests, he too became a victim. Before he was convalescent he not
only resumed his work among the blacks, but extended it to the Indians of Saramaca. In 1655 he took up his residence in Batavia where for nearly thirty-two years he ministered to 600 lepers. He left them only to visit the blacks and Indians. In 1685 the whole colony was confided to the Redemptorist Fathers by the Holy See and the King of Holland. Father Dongan at once asked to be of their number and was received in Paramaribo, in 1687, by Monsignor Swinkels, the first Redemptorist vicar Apostolic. After this he went back to his charge. He studied music to cheer his afflicted children, and though given an assistant he laboured to the end. The process of his beatification has been placed before the Congregation of Sacred Rites.

Dongan, Thomas, second Earl of Limerick, b. 1634, at Castletown Kildrue, now Celbridge, County Kildare, Ireland, d. at London, 1715. He was the youngest son of Sir John Dongan, Baronet, Member of the Irish Parliament; an uncle, Richard Talbot, was afterwards created Earl of Tyrconnell, Lieut.-Governor of Ireland; and another, Sir Robert, married Grace, daughter of Lord Calvert, Baron of Baltimore. At the death of Charles I, the family, retired to the Continent, removed to France. Thomas served in an Irish regiment, participated in all Turenne's campaigns under the name of D'Unguent and rose to the rank of colonel in 1674. After the Treaty of Nimeguen (1678) he returned to England in obedience to the order of the English Government recalling all British subjects in French service. Through the Duke of York, a fellow-officer under Turenne, he was appointed to high rank in the army designated for service in Flanders, and was granted an annual pension of £500. The same year (1678) he was appointed Lieutenant-Governor of Tangiers. In 1682 the Duke of York, the Lord Proprietor, selected Dongan to govern the Province of New York, then bankrupt and in a state of rebellion. In this office Dongan proved himself an able lawgiver, and left an indelible mark on political and constitutional history. He convened the first representative assembly of New York Province on 14 Oct., 1683, at Fort James within the present boundaries of the city of New York. This assembly, under the wise supervision of Dongan, passed an act entitled "A Charter of Liberties"; decreed that the supreme legislative power under the Duke of York shall reside in a governor, council, and the people convened in general assembly; conferred upon the members of the assembly rights and privileges making them a body coequal to and independent of the British Parliament; established town, county, and general courts of justice; solemnly proclaimed the right of religious liberty; and passed acts enunciating certain constitutional liberties, e.g., no taxation without representation; taxes could be levied only by the people; free election in general assembly; right of suffrage; no martial law or quartering of the soldiers without the consent of the inhabitants; election by majority of votes; and the English law of real property.

Thus to Dongan's term as governor can be dated the Magna Charta of American constitutional liberties, for his system of government became the programme of continuous political agitation by the colonists of New York Province during the eighteenth century. It developed naturally into the present system of state government, and is in keeping with the whole framework of the Federal Government. Moreover, a rare tribute to his genius, the government imposed by him on New York Province, 1683, was adopted by England after the American War of Independence as the framework of her colonial policy, and constitutes the present form of government in South America, Australia, and the Transvaal.

Dongan signed the Charter of Liberties 30 Oct., 1683, and on the following day solemnly proclaimed it at the City Hall of New York City. The Duke of York signed and sealed the Charter 4 Oct., 1684; but never returned it, probably for reasons of prudence, for at the time Charles II had, by a quo warranto proceeding, abolished the Charters of New England, and the Charter of Pennsylvania granted in 1684 distinctly admits the right of Parliament to tax the colonies. Dongan established the boundary lines of the province by settling disputes with Connecticut on the English Governor of Canada on the North, with Pennsylvania on the South, thus marking out the present limits of New York State. By treaty with the Indians made at Albany, New York, 1684, in presence of Lord Howard, Governor of Virginia, Dongan obtained the written submission of the Iroquois to the Great Sachem Charles, on two white deerskins, and outlined the masterly Indian policy which kept the Five Nations, friends of England and a barrier between the English and French possessions in North America, a policy afterwards maintained with success by Sir William Johnson. At the death of Charles II, 1685, James Duke of York was proclaimed King, and New York became a royal province.

The Board of Trade and Plantations, under whose supervision the province passed, vetoed the Charter of Liberties and James approved the veto. The colonists were disappointed, but such was the moral strength of Governor Dongan that we find no trace of popular resentment. In 1685 Dongan established a post office in New York for the better correspondence of the colonies in America. In 1686 he granted charters to the cities of New York and Albany; the former remained unchanged for 135 years and forms the basis of the existing city government; the latter was superseded only in 1870, notwithstanding the extraordinary development in civil and political institutions.

Dongan established a college under the direction of the Jesuit Fathers Harvey (his own private chaplain), Harrison, and Gage in New York City, and advised that the King's Farm, a tract beyond the walls of the then existing city, be set aside for its maintenance. The king vetoed the grant, and in 1705 this land became the property of Trinity Church. He planned that a mission of English Jesuits be permanently established at Saratoga, New York, on land purchased by him for the purpose; that the number of Irish Catholics be founded in the centre of the Province; and that an expedition be made to explore the Mississippi River and take possession of the great valley then made known by the explorations of La Salle. These plans were set aside by the king.

In 1687, the Assembly of New York was dissolved by the king, and in 1688 Andros was appointed Governor of the consolidated Provinces of New York and New England. Dongan refused command of a regiment with the rank of major-general, retired to his estate on Staten Island, New York, but was obliged to leave it for safety in the reign of James II. In 1689 he returned to England. By the death of his brother William (1698), late Governor of the Province of Munster, Ireland, whose son,
Colonel Walter, Lord Donnan, was killed at the battle of the Boyne, Donnan became Earl of Limerick. In 1702 he was recognized as successor to his brother's estates, but only on payment of claims of the purchasers from the Earl of Athlone. Donnan died poor and without direct heirs. By will, dated 1715, he provided that he be buried at an expense of over £100, and left the residue of his estate to his niece, wife of Colonel Nugent, afterwards Marshal of France. The tribute of history to his personal charm, his integrity, and character, is outspoken and universal. His publics papers give evidence of a keen mind and a comprehensive grasp. He was a man of age, tact, and capacity, an able diplomat, and a statesman of prudence and remarkable foresight. In spite of the brief term of five years as Governor of New York Province, by virtue of the magnitude, of the enduring and far-reaching character of his achievements, he stands forth as one of the greatest constructive statesmen ever sent out by England for the government of any of her American colonial possessions.

John T. Driscoll.

Donlevy, Andrew, educator, b. in 1694, probably in Sligo, Ireland; date and place of death uncertain. Little is known about his early life. With the penal laws then rigorously enforced it was difficult to obtain an education at home; and when he went abroad to study for the priesthood he must have gone in disguise, being afraid of any such purpose being a crime. However, he reached Paris in 1710 and became a student at the Irish College. His clerical course finished, he was ordained priest, and in 1728 he was appointed prefect in the college, an office he held till he had also attended lectures at the university, graduating both in theology and law. While holding the office of prefect, he drew up a new code of rules for the government of the college, placing it under the control of the Archbishop of Paris and subject to the university. He also published in 1742 an Irish-English catechism of the Christian Doctrine, an edition of which appeared in Dublin in 1748.

E. A. D'Alton.

Donnan, Saint.—There were apparently three or four saints of this name who flourished about the seventh century.

(1) St. Donnan, Abbot of Eigg, and St. Donnan of Auchterless are regarded by both the Bollandists and Dempster as different personages, but there is so much confusion in their chronology and repetition in what is known of them, that it seems more probable that they were identical. Reeves (Adamnan's Life of St. Columba), moreover, accepts them as the same without discussion. According to Adamnan's Life, St. Columba, who followed him from Ireland to Scotland towards the end of the sixth century. Seeking a solitary retreat, he and his companions settled on the island of Eigg, off the west coast of Scotland, then used only to pasture sheep belonging to the queen of the country. Informed of this invasion, the queen ordered that all should forthwith be slain. Her agents, probably a marauding band of Picts, or pirates according to one account, arrived during the celebration of Mass on Easter eve. Being requested to wait until the Sacrifice was concluded, they did so, and then St. Donnan and his fifty-one companions gave themselves up to the sword. This was in 617. Reeves mentions eleven churches dedicated to St. Donnan; in that at Auchterless his pastoral staff was preserved to the Reformation and is said to have worked miracles. The island of Eigg was still Catholic in 1703 and St. Donnan's memory venerated there (Martin, Journey to the Western Islands, London, 1716).

(2) Son of Liath, and nephew and disciple of St. Senan, in whose life it is related that by his uncle's direction he restored to life two boys who had been drowned. This St. Donnan succeeded St. Ciarran of Clonmacnois as Abbot of Aigin, an island in Lough Ree, on the Shannon (now Hare Island). He flourished about the middle of the sixth century.

(3) St. Donnan, son of Beoadh and brother of St. Ciaran. He was a monk in his brother's monastery at Clon, or Clonmacnois, in Ireland, in the sixth century.

G. Cyprian Alston.

Donner, Georg Raphael, Austrian sculptor, b. at Essling, Austria, 25 May, 1692; d. at Vienna, 15 February, 1741. It is said his fancy was first kindled by the works of art at Halleinkreuz. He received his technical training in the academy at Vienna; in 1724 he entered the imperial service, and in 1729 passed to that of Prince Esterhazy. Donner's work stands out with prominence in a period given over to mannerism, but he is sometimes more mindful of elegance than of character in his subject. He had a true sense of the beautiful, was lifelike and noble in his conceptions, and represents for South Germany and Austria a classic reaction against rococo methods. Among his productions are the marble statue of Charles VI and two bronze reliefs in the Belvedere at Vienna, a fountain for the old Town Hall, representing "Andromeda and Perseus," the marble reliefs of "Hagar" and the " Samaritan Woman," and many busts and statues in different palaces and gardens. In Pressburg he made the equestrian statue of St. Martin, and the decorations for the burial chapel of the Primate Emmerich Esterhazy. Youthful productions (1726) are the marble figures at Minnbell Castle, Salzburg. Donner is best known to-day by his famous fountain (1738–1739) of the Neuen Markt, Vienna; "Providence" or "Foresight," a classic female figure, forms the apex, while lower down four sporting children, each holding a water-spouting fish, embody the four rivers of Austria proper that flow into the Danube. Donner's two brothers, Sebastian and Matthias, are generally numbered among his scholars. Sebastian was a talented sculptor, and produced various works, mostly in marble. Donner, Matthias, brother of the above, also a sculptor, b. 1704; d. 1756. He is known chiefly for his relief carvings and medals. He was appointed court-medallist, professor, and later rector of the Academy, and was employed by various princes. Among his medals may be mentioned ones of Bavaria, 1727, and various ones representing Maria Theresa. His medals are signed D. or M. D.

Linnen, Outline of the History of Art, ed. Stubbs (New York, 1904); Marindan and Frothingham, History of Sculpture.
Donnet, FERDINAND-FRANÇOIS-AUGUSTE, a French cardinal, b. at Bourg-Argental (Loire), 1795; d. at Bordeaux, 1882. He studied in the seminary of St. Ireneus at Lyons, taught at the college of Belley, was ordained priest in 1819, and, after some time spent at the Maison des hautes études founded by Cardinal Fesch, went to Irigny as pastor. From 1821 to 1827 he engaged in missionary work and then returned to Lyon as pastor of the Vieux-Plancher. Appointed coadjutor to the Bishop of Nancy, 1835, he evinced such sterling qualities that two years later he was called to the archiepiscopal See of Bordeaux. During the forty-one years of his administration he showed a prodigious activity in every line of work, religious, social, and even material. To him are due the resumption of provincial councils; the restoration of many shrines like Arecachon, Verdelais, Notre-Dame de la Fin-des-terres; the reconstruction of the Pey Berland tower, etc. Cardinal in 1852, and Senator of the Empire, he used his influence in favour of the pope, the church, and the suppression of the irreligious press. At the Vatican Council he openly sided with the Ultramontanes like Plantier, Pie, etc. His affable disposition and cheerful character endeared him to his people, and few bishops have been loved and regretted as Donnet was. His eulogy was pronounced by Canon Laprie at the cathedral of Bordeaux, 1883, and by M. Boué at the academy of the same place, 1894. Cardinal Donnet's works comprise twelve volumes (8vo) of "Instructions pastorales, mandements, lettres, discours"; also "Lettres, discours et autres documents relatifs à la question royaude (Bordeaux, 1865)."

Pougeois, Vie. apostolat et épiscopat du cardinal Donnet (Paris, 1884); Captant in Rev. Cath. (1884), 453; Ponssec, Le cardinal Donnet, in "L'épiscopat françois, 1802-1905" (Paris, 1907), s. vv. Nancy and Bordeaux.

J. F. SOLLEIR.

Donoso Cortés, JUAN FRANCISCO MARÍA DE LA SALUD, Marquess of Valdegamas, author and diplomat, b. 6 May, 1889, at Valle de la Serena in the province of Estremadura, Spain; d. 3 May, 1883, at Paris. His father, Pedro Donoso Cortés, was a descendant of Hernando Cortés, the conquistador. At the age of eleven, Donoso Cortés had finished his humanities, and at twelve had begun the study of law at the University of Salamanca; at sixteen he received his degree from the University of Seville, and at eighteen became professor of literature at the College of Cáceres. Carried away by the rationalism prevalent in Spain following upon the French invasions, he ardently embraced the principles of Liberalism and fell under the influence of Jean-Jacques Rousseau, whom he later characterized as "the most eloquent of sophists." In 1830 he went to Madrid and, with his characteristic energy, engaged in the political controversies of the day, espousing the cause of the reigning dynasty. A memoir addressed to Ferdinand VII on the situation of the Spanish monarchy, advocating the abdication of the Salic Law, attracted wide attention and procured for him an official position under the Minister of Justice. But the revolutionary events of 1833 led him to reconsider the ground of his political liberalism, and drew a second brochure from his pen seethingly criticizing the revolution movement. On the death of Ferdinand VII (1833) he remained a faithful adherent of the queen-mother Maria Cristina and of her infant daughter Isabelita, whose title was disputed by Don Carlos in virtue of the Salic Law against the succession in the female line to the Spanish throne. In 1836, under the ministry of Maria Cristina, he became secretary of the Council; this same year he gave a brilliant course of lectures on political rights at the Athenaeum of Madrid. In 1837 he was elected deputy to the Cortes from Cadiz. In 1840, following upon the revolution headed by Espartero, Duke of Victoria, he followed the exiled queen Maria Cristina to Paris in the post of private secretary. He accompanied her on her return after the overthrow of Espartero in 1845, and was appointed to the office of secretary and director of the studies of the young queen, Isabella, was created Marquess of Valdegamas, and entered the Senate. For his eloquent advocacy of the "Spanish marriages" (the simultaneous alliance of Isabella with Francesco of Assisi and of her sister with the Duke of Montpensier) he was made an officer of the Legion of Honour by Louis Philippe.

The death of a dearly beloved brother at this time made a profound impression upon Donoso Cortés. The mystery of human destiny assumed for him a new aspect, and from this time he became an ardent champion of the Catholic Church. On the 4th of January, 1849, he pronounced a remarkable discourse in the Cortes in which he pointedly reprehended Liberalism and Socialism, branding them as "sterile and disastrous ideas in which are comprehended all the errors of the past three centuries, intended to disturb and disrupt human society." In 1849 he represented Spain as minister plenipotentiary at the court of Berlin, and afterwards at Paris (1850-53), where he died.

The complete works of Donoso Cortés, with a biographical sketch by Gabino Tejado, were published in 1854-55 (Madrid). A translation into French of his principal works, with an introduction by Louis Veillot, was published at Paris (1858-59). His most valuable work is his "Ensayo sobre El Catolicismo, El Liberalismo y El Socialismo" (English translation, Philadelphia, 1862; Dublin, —). This work was written at the instance of Louis Veillot, who was an intimate friend of the author, and places Donoso Cortés in the first rank of Catholic publicists. It is an exposition of the impotence of all human systems of philosophy to solve the problem of human destiny and of the absolute dependence of humanity upon the Catholic Church for its social and political salvation. Upon its publication the work was acrimoniously attacked by the Abbé Gaudel, Vice-General of Orléans, in a series of articles in the "Ami de la Religion," and vigorously defended by Louis Veillot in "L'Univers." Donoso Cortés at once submitted his work to the Holy See, which refused to interdict it or any of the propositions declared heretical by the Abbé Gaudel. It remains to-day one of the most brilliant and profound expositions of the influence of Catholic truth upon human society from the pen of a publicist. In a notable series of letters, from 1849-53, to Count Raczyński, at that time Prussian ambassador at Madrid, Donoso Cortés gives a penetrating analysis of the social, political, and religious conditions of Europe, and with almost prophetic insight predicts the triumph of Germany in a great empire under the Prussian monarchy as well as the political decadence of France and the latter's loss of Alsace and Lorraine.

CONDE B. PALLEN.
DORCHESTER

Dorchester, Abbey of, founded in 1140 by Alexander, Bishop of Lincoln, for Canons of the Order of St. Augustine (or Black Canons). Dorchester, an important Roman city of Mercia, about nine miles from Oxford, had been the seat of a bishopric from A.D. 584, when St. Birinus, the first bishop, was sent to that district by Pope Honorius, until 1085, when the See of Mercia was transferred to Lincoln. The abbey, founded fifty-five years later, was dedicated in honour of Sts. Peter, Paul, and Birinus, richly endowed out of the lands and tithes of the former bishopric, and had twelve parishes subject to it, being included in the Peculiar of Dorchester, until the suppression of peculiars. The first abbot appears to have been Alured, whose name occurs in 1146 and again in 1163; the last was John Merebe, who was elected in 1558, and in the following year subscribed to the king's supremacy, with five of his canons, and was given a pension of £22 a year. The revenues of the abbey were valued at the time of its suppression at about £220. Henry VIII reserved the greater part of the property of the house for a college, erected by him in honour of the Holy Trinity, and the canons and prebendaries; but this was dissolved in the first year of his successor. No register or cartulary of Dorchester Abbey is now known to exist, and only a single charter, confirming the donation of a church by King John, is given by Dugdale. Edmund Ashford was the first impropriator of the abbey site and precincts, which afterwards passed through various hands. The stately church of Dorchester Abbey, as it stands today, was built entirely by the Augustinian Canons, although there are traces on the north side of Saxon masonry, probably the ancient church. The whole length of the church is 230 feet, its width seventy, and its height fifty-five feet. The north transept with its doorway is of the Norman period; the north side of the nave and chancel arch, early English, the south side of nave, south aisle, and chancel, Decorated; the south porch, late Perpendicular. The extraordinarily rich sanctuary, with its highly decorated windows (including the famous northern one known as the "Jessé" window) and beautifully carved sedilia and piscina, dates from 1330. One of the very few existing leaden fonts in England is in this church.

Dugdale, Monasticon Anglicanum, vi, 233; Parke, History of Dorchester (Oxford, 1882); Willis, Mitched Abbeyes, II, 175; Victoria, History of Oxfordshire (London, 1807), I, 87-
DORÉ (AURATUS). PIERRE, controversialist, b. at
Orléans about 1500; d. at Paris, 19 May, 1559. He
took the degree of Doctor of Law at Padua in 1526;
Doré entered the Dominican Order in 1514 and won his de-
grees at Paris, in 1532, after a brilliant examination.
Through the influence of the office of prior to Biére in 1545,
Doré continued to preach throughout the provinces.
At Châlons the bishop, who had been captivated by his zeal
and eloquence, entrusted him with the reform of
the Carthusian monastery of Val des Choux (Vallis Caullum).
For the same reasons, Claude de Lorraine, Duke of Guise,
and hia consort, Antoinette de Lorraine, were inclined
to choose him as confesser. He wrote thirty-five
aceto-theological works, some of which are only
redactions of his sermons. Chief among these is
"Les voies du Paradis enseignées par notre Sauveur
Jésus-Christ en son évangile", which appeared twice at
Lyons in 1538 (Paris, 1540; Lyons, 1586; Rome, 1610).
In his "Paradoxa ad profugandae heresies ex
divi Pauli epistolis selecta", he refuted the Huguen-
notes, but soon turned to writing ascetical commen-
taries on the Psalms. When Henry II entered Paris
in 1548, Doré wrote a Latin ode which won for him the
post of court preacher and royal confesser. He

Döring, Matthias, historian and theologian, b. between 1390 and 1400, at Kyritz, in Brandenburg; d. there 24 July, 1469. He joined the Friars Minor in his native place, studied at Oxford, was graduated (1424) at Erfurt as doctor of theology, and for some years taught theology and Biblical exegesis. In 1427 he was professed of his order for Saxony. In the disputes between the Conventuals and those of the Observance he took an active part. In 1443 at Berne the Conventuals elected him minister general. This position he held for six years, receiving approbation from the assembly of prelates still posing as the General Council of Basel. On this council he had been prominent since 1432 as an over-zealous reformer and an adherent of the supremacy of a general council over the pope. He was sent by it to Denmark, to win over the king and the people, and assisted in the deposition (1439) of Eugene IV and the election of the antipope, Felix V. Excommunicated by the Archbishop of Magdeburg he appealed to Rome. In 1461 he resigned his office and spent the last years of his life in literary work at the convent of Kyritz.

Döring is said to be the author of the "Confutatio primatus Pape", written (1443) anonymously and with much success. Name and title were added when the article was edited in 1550 by Matthias Placius Illysrius. It is in part an extract from the "Defensor pacis" of Marsilius of Padua (printed in Goldast, Monarchia, i, 537 sqq.). Other works attributed to Döring are "Defensorium postulii Nicolai Lyranii", against the Spanish bishop, Paul of Burgos, since 1451 frequently printed with the "Postilla"; "Liber perplosum Ecclesiae" (lost); continuation (1420 to 1464) of the Chronicle of Dietrich Engelus. He also wrote on the so-called "Donation of Constantine" and (1444) on the relics of the Precious Blood of Wilsnack.

Dornin, Bernard, first publisher in the United States of distinctively Catholic books, b. in Ireland, 1761; d. in Ohio, 1836. He was forced to leave his native land, in 1803, because of political troubles and, arriving in New York soon after, began a book-selling and publishing concern. He got a New Testament, printed for him in Brooklyn, in 1803, and an edition of Pastoral's "History of the Church" in 1807. He moved to Baltimore, in 1809, and from there to Philadelphia in 1817. During many years he was the leading Catholic publisher of the country, and as such enjoyed the friendship of Archbishop Carroll and of other members of the hierarchy, who esteemed him as a vigorous and gifted writer and editor. In the early thirties he disposed of his business in Philadelphia, where he had published a number of Catholic books, and went to Ohio to reside near his daughter.

Dornin, Thomas, theologian, b. at Berkhamstead, Hertfordshire, England, date uncertain; d. at Tournai, 1572 or 1577. He received his early education through his uncle, Thomas Dorman of Agroundames, now Amersham, Buckinghamshire. His master at Berkhamstead was Richard Reeve, a noted Protestant schoolmaster. He was also known to Thomas More, the Catholic scholar, then professor of Hebrew at Oxford, who took great interest in the boy and sent him to Winchester school in 1547. From Winchester Dorman went to New College at Oxford, of which Harding was a fellow, and here he was elected a probationer fellow. During the Catholic revival under Mary he was appointed fellow of All Souls College (1554) and on 9 July, 1558, took the degree B.C.L. A year or two after Elizabeth's accession, finding that he could not live in England without conforming to the new religion, he sacrificed his fellowship and his patronage to his friend and sectant, Robert Busby, where he met Harding, who was also an exile for the faith. Harding persuaded him to resume his studies, and Dorman accordingly went to Louvain and devoted himself to the study of theology. In 1565 he became B.D. in the University of Douai and finally received the doctorate there. During this period he engaged in controversy with the Anglican divines, Jewel, Bishop of Salisbury, and Nowell, Dean of St. Paul's. In 1569, at the invitation of Dr. Allen, he joined the band of scholars at the newly founded English College at Douai which he assisted in the services of his private studies. He died at Tournai where he had been given an important benefice. His works are: "A Prophete of certeine articles in Religion denied by M. Juell" (Antwerp, 1564); "A Displeasure of M. Novellis Reprouthe" (Antwerp, 1565); "A Request to M. Jewell that he keep his promise made by solemm Protestation in his late Sermon at Pauls Cross" (London, 1567; Louvain, 1567).
2 May, 1393, with the permission of the chapter and of the Teutonic Order, established a hermitage near the cathedral. She led a very austere life. Numerous visitors sought her advice and consolation, and she had wonderful visions and revelations. Her confessor, the dean and canons of Marienwerder, a learned theologian, wrote down her communications and composed a Latin biography in seven books, "Septillium", besides a German life in four books. She was never canonised, but the people honoured her as the guardian of the country of the Teutonic Knights and "patroness of Prussia". Her feast is celebrated on 25 June, in some places on 30 Oct. The church at Marienwerder is now in the hands of the Lutherans; her relics cannot be found.

DORIS EMER.

Dorset, Altar. See Altar (in Liturgy), sub-title Altar-curtain.

Dorsey, Anne Hanson, novelist, b. at Georgetown, District of Columbia, U. S. A., 1815; d. at Washington, 26 December, 1896. She was the daughter of the Rev. William McKenney, a chaplain in the United States Navy, and Chloe Ann Langian McKenney. In 1827 she was married to Lorenzo Dorsey, and in 1840 became a convert to the Catholic Faith. From this period, for more than a half a century, she devoted her exceptional talent to Catholic fiction. She was a pioneer of light Catholic literature in the United States and a leading writer for the young. While deeply religious in tone, her stories are full of living interest and a knowledge of the world gained by clear insight and wide experience. Mrs. Dorsey's only son was killed while serving in the Union Army during the Civil War. She left three daughters. Pope Leo XIII twice sent her his benediction, and the University of Notre Dame conferred upon her the Lector medal. Her chief works are: "The Student of Blenheim Forest"; "Flowers of Love and Memory"; "Guy, the Leper"; "Tears of the Diadem"; "Tale of the White and Red Roses"; "Wood-reve Manor"; "Conscience, or the Trials of May Brooke"; "Cocama, the Rose of the Algonquins"; "The Flemings"; "Nora Brady's Vow"; "Moma, the Vestal"; "The Old Gray Rosary"; "Tangled Paths"; "The Old House at Glenarra"; "Adrift"; "Ada's Trust"; "Beth's Promise"; "The Heir of Carignons"; "War and Woof"; "The Palms"; "Coel of the Bough", 11, 1906; A Round Table of American Catholic Novelist (New York, 1896).

MARY T. WAGGAMAN.

DORCHESTERS. See ARMIRANISH.

Dorothy, a titular see of Phrygia Salutaris, in Asia Minor. This city already existed under the kings of Phrygia and is mentioned by most of the ancient geographers. It was situated at Karadja Hassar, six miles south-west of the modern Eski Shehir. About the end of the fourth century it is recorded that it was removed to Shehir Euyuk, at the ruins north of the same Eski Shehir: there it remained during the Byzantine period. Seven bishops are known from the fourth to the ninth century, the most famous being Eusebius, who denounced successively the heresies of Nestorius and Eutyches (Lequien, Oriens christ., I, 837). The see is mentioned as late as the twelfth century among the suffragans of Sennada, but must have been suppressed soon after. Dorylaeum was taken and destroyed by the Seljuk Turks probably in 1076. It was there (1 July, 1097) that the crusaders won their great victory over the Turks. The city was rebuilt in 1175 by Manuel Comnenus and fortified as well as possible. At this time John Cinnamus ("Hist.", VII, 2-3) and Nicetas Choniates ("De gestis" 1, 4) write enthusiastically about it as one of the most beautiful cities of Asia Minor. The next year it fell again into the hands of the Turks; in 1240 it passed to Ethemogoul, father of Othman, the founder of the Osmanli dynasty (his tomb is at Sehghud near Eski Shehir). Meanwhile the city stretched away from the hill of Shehir Euyuk and developed along the Poursak (ancient Tembris or Tymbria), under the name of Eski Shehir. The modern town is situated at an altitude of 758 metres, on a vast and fertile plateau, about 400 kilometres from Constantinople. Eski Shehir is the chief town of a canton in the vilayet of Edirne. The population is about 40,000: 2000 Greeks, 200 Armenians, 200 Latins, a few Catholic Armenians, Protestants, and Jews, the rest being Musalmans. Since 1891 the Assumptionists have conducted a mission with a school for boys, and the Oblate Sisters of the Assumption two schools for girls. This is also a Catholic Armenian parish. Eski Shehir has hot springs that are used for baths. Fish, especially gigantic silures, swarm in the Poursak. The meerschaum industry flourishes there; the chief known mine of this mineral is at Mihalkali in the district of Eski Shehir.

S. VALIÉE.

DOSITHEANS, followers of Dositho, a Samaritan who formed a Gnostic-Judaic sect, previous to Simon Magus. Although the name of Dositho is often coupled with that of Simon Magus as the first of all heretics, we possess but scanty information concerning him. He is not mentioned in Justin Martyr, but first occurs in Pseudo-Tertullian's "Adv. Her.", a Latin rendering of the lost "Syntagma" of Hippolytus (about a.d. 220). "I pass over in silence", says the author, "the heretics of Judaism, I mean Dositho the Samaritan, who first dared to reject the Prophets, as not having spoken in the Holy Ghost. I pass over the Sadducees, who, springing from this root of error, failed in addition to this heresy to deny even the resurrection of the flesh" (ch. i). If, however, the Sadducees sprang from Dositho, he must have begun to teach sometime previous to the Christian Era, and his sect properly be counted among heresies in the time of St. Jerome, who copied Pseudo-Tertullian, distinctly speaks of "those who before the coming of Christ undid the Law". An independent witness to the same fact is found in the Pseudo-Clementine "Recognitions", I, 54: "the author of this [Sadducee] opinion was first Dositho and then Simon". On the other hand in "Recognitions", II, 8, we read that Dositho founded a sect after the death of John the Baptist. Origen states that "Dositho the Samaritan, after the time of Jesus, wished to persuade the Samaritans that he himself was the Messiah proclaimed by Moses" (Contra Celsum, VI, 11). This is all that he says about John the Baptist, Theodas, and Judas of Galilee as people whom the Jews mistakenly held to be the Christ (Hom. xvi in Lucam; Contra Celsum, I, xvii). He informs us that the Dosithoans gave out
that they possessed some books of Dositheus and told some tales about him as being still alive in this world, and he further accuses Dositheus of having mutilated the Scriptures. It is not certain, however, whether Origen did not confound Dositheus the Pseudo-Messias with an Encratite heretic who lived somewhat later. This is suggested especially by a passage in Origen's "De Principiis", IV, vii, where he ascribes to Dositheus the Samaritan and others some absurd and violent observance of the Sabbath. This is also, probably, the reason why Dositheus is placed by Hegesippus after Simon Magus instead of before. In Talmudic literature (Pirke d. R. Eliezer, xxxviii, and Tanhuma Vayyashbeh, ii) there occurs a Samaritan of the Syro-Macedonian period named Ḥannârî, and it has been plausibly argued that the patristic references which connect Dositheus with the Sadducees arise from a confusion of Dositheus the Samaritan-Pseudo-Messias with this early Jewish heretic. If this be true, there would have been three persons of this name, one at the time of Alexander the Great, another at the time of Christ, and a third, a generation later. But the mention of a fourth at the time of Salmanasar (about 700 B.C.) makes one cautious of Talmudic information. It is certain, however, that a Jewish sect, mentioned by several Arab and other historians under the name of Dustamyes or Dostan, continued to exist till the tenth century, and that they were considered similar to the Kutm, or Samaritans. But they seem never to have possessed any importance in the Christian world, in which from the earliest times there existed but a vague reminiscence of their name, though they continue to be mentioned in descriptions and lists of heresies, such as the "Heresies" of Epiphanius and similar collections.

DOSQUET  137  DOSSI

years in Canada (1721-23) he was appointed superior of the Seminary of Lisieux in France, and helped to preserve that institution from Jansenism. While acting as proctor-general for the Oriental Missions of the Congregation of the Holy Ghost, he was made vicar Apostolic of a portion of India and consecrated titular Bishop of Samos by Benedict XIII (1723). He remained in Rome until appointed coadjutor to Bishop Mornay of Quebec (1729). Bishop Dosquet had to solve many difficulties that had arisen towards the close of the life of Bishop St-Vallier. He legislated wisely in behalf of the religious communities of women and was zealous for the suppression of the liquor traffic. In 1733, after Bishop Mornay's resignation, he succeeded to the See of Quebec, where he promoted education, primary and classical. A patron and benefactor of the Congregation of the Holy Ghost, he continued almost exclusively to his missionaries Acadian, the islands of the Gulf of St. Lawrence, Cape Breton, Newfoundland, and probably Labrador. He rewarded that congregation by generous endowments, including Sarecane, a property near Paris, which until the Revolution yielded an annual revenue of 2000 livres. In 1735 ill health forced him to leave Quebec, but his resignation was accepted only in 1739. Thenceforth he resided chiefly in Rome, attending to the interests of his former diocese, especially after the English conquest.

Dosquet, Pierre-Herman, fourth Bishop of Quebec, b. at Liège, Flanders, 1691; d. at Paris, 1777. He studied at the Seminary of Saint-Sulpice, Paris, and entered that congregation. After two

Dossi, Giovanni, actually named Giovanni di Nicolò di Luterò, but also called Dosso Dossi, an Italian

painter, b. about 1479; d. at Ferrara in 1542. Dossi belonged to the School of Ferrara and was a pupil of Lorenzo Costa in Mantua. He is believed to have derived his name from the village of Dossio, in which it has been stated he was born. In conjunction with his brother Battista (1480-1548) Dossi visited Rome and Venice and passed eleven years in these places studying especially the works of Giorgione and Titian, but forming his own style, which was distinguished by
DOUAI

romantic treatment, imaginative power, rich, brilliant, and often novel colouring. He and his brother were frequently employed by Alfonso I, Duke of Ferrara, and by his successor, Ercole II. His greatest work is the altar-piece in the Ferrara Gallery. He also composed the polyphonic setting of the Requiem in the cathedral of that city, for those in the church of San Francesco, and in the ducale palace at Modena. Many of his frescoes still remain in the ducale palace at Ferrara and his paintings can be studied in the cathedral and churches of Modena, in the Louvre, and in the galleries of Dresden, Berlin, Munich, and Vienna. He painted a portrait of Aristot and the poet enrolled his name, in conjunction with those of Leonardo da Vinci, Michelangelo, Raphael, and Titian, in the poem of "Orlando Furioso," but the portrait cannot now be identified, although many other portraits by Dossi are still in existence. The landscape backgrounds of his pictures are marked by beauty of colouring and fine imaginative quality. On his return from Venice he appears to have settled down in Ferrara. His work has a close kinship with that of the Venetian School.

George Charles Williamson.

DOUAI

—The town of Douai, in the department of Nord, France, is situated on the River Scarpe, about thirty miles south of Lille. It contains about 30,000 inhabitants and was formerly the seat of a university. It was strongly fortified, and the old ramparts have only been removed in recent years. The town flourished in the Middle Ages, and the church of Notre-Dame dates from the twelfth century.

To English Catholics, the name Douai will always be bound up with the college founded by Cardinal Allen (q. v.) during the reign of Queen Elizabeth, where the majority of the clergy were educated in penal times, and to which the preservation of the Catholic religion in England was largely due. Other British establishments were founded there—colleges for the Scots and the Irish, and Benedictine and Franciscan monasteries—and Douai became the chief centre for those who were exiled for the Faith. The University of Douai may be said to date from 31 July, 1559, when Philip II of Spain (in that then situated) obtained a Bull from Pope Paul IV, authorizing its establishment, the avowed object being the preservation of the purity of the Catholic Faith from the errors of the Reformation. Paul IV died before he had promulgated the Bull, which was, however, confirmed by his successor, Pius IV, 6 January, 1560. The letters patent of Philip II, dated 19 January, 1561, authorized the establishment of a university with five faculties: theology, canon law, civil law, medicine, and arts. The formal inauguriation took place 5 October, 1562, when there was a public procession of the Blessed Sacrament, and a sermon was preached in the market-place by the Bishop of Arras.

There were already a considerable number of English Catholics living at Douai, and their influence made itself felt in the new university. In its early years the chief posts were held by Englishmen, mostly from Oxford. The first chancellor of the university was Dr. Richard Smith, formerly Fellow of Merton and regius professor of divinity at Oxford; the regius professor of canon law at Douai for many years was Dr. Owen Lewis, Fellow of New College, who had held the corresponding post at Oxford; the first principal of Marchiennes College was Richard White, formerly Fellow of New College; while Allen himself, after taking his licentiate at Douai in 1570, became regius professor of divinity. It is reasonable to suppose that many of the traditions of Catholic Oxford were perpetuated at Douai. The university was, however, far from being even predominantly English; it was founded on the model of that of Louvain, from which seat of learning the majority of the first professors were drawn. The two features already mentioned—that the university was founded during the progress of the Reformation in the Catholic Church, and that it was to a considerable extent under English influences—explain the fact that William Allen, when seeking a home for a projected English college abroad, turned his eyes towards Douai. The project arose from a conversation with Dr. Vendeville, then regius professor of canon law in the University of Douai, and afterwards Bishop of Tournai, whom he accompanied on a pilgrimage to Rome in the autumn of 1567; and the foundation took definite shape when Allen made a beginning in a hired house on Michaelmas Day, 1568. His object was to gather some of the numerous body of English Catholics who, having been forced to leave England, were scattered in different countries on the Continent, and to give them facilities for continuing their studies, so that when the time came for the re-establishment of Catholicism, which Allen was always so far distant, they might become a body of learned clergy ready to return to their country. This was of course a very different thing from sending missionaries over in defiance of the law while still remaining in the hands of the Protestants. This latter plan was an afterthought and a gradual growth from the circumstances in which they were found itself, though eventually it became its chief work.

Allen's personality and influence soon attracted a numerous band of scholars, and a few years after the foundation of the college the students numbered more than one hundred and fifty. A steady stream of converso works issued from the printing presses of Douai, and the town became the centre of English literature and learning. By the end of the sixteenth century more than three hundred priests had been sent on the English mission, nearly a third of whom suffered martyrdom; and almost as many had been banished. By the end of the persecution the college numbered more than one hundred and sixty martyrs. Allen had at first no regular source of income, but depended on the generosity of others. This, and especially upon the generosity of the Catholic princes of Spain, the dukes of Mantua, and the abbots and abbesses of the Benedictine and Cistercian monasteries of Saint-Vaast at Arras, Anchin, and Marchiennes, which, at the suggestion of Dr. Vendeville, had from time to time subscribed towards the work. Many private donations were also received from England. After a few years, seeing the extreme need of the college and the importance of the work it was doing, Allen applied to Pope Gregory XIII, who in 1575 granted a regular pension of one hundred gold crowns a month, which continued to be paid down to the time of the French Revolution. Allen himself gave his wholsalary as regius professor of divinity. The work of the college was not allowed to proceed without Allen, so that at one time became so strong that Allen's life was in danger, and in 1578 the English were all expelled from Douai. The college was established temporarily at Reims; but possession was retained of the house at Louvain, and in 1583 it was found possible to return there. By this time Allen had been called to reside in Rome, where he died 16 Oct., 1594. Under his successor, Dr. Richard Barrett, the work was extended to include a preparatory course in humanities, so that it became a school as well as a college. In 1603 under Dr. Worthington, the third president, a regular college was built at Louvain, and the new church of St.-Jacques, in the Rue des Morts, so called on account of the adjoining cemetery. The town at this time formed a single parish. In the eighteenth century it was divided into four parishes, and the present church of St.-Jacques dates from that time.
The English College was the first to be opened in connection with the university. The Collège d'Anchin was opened a few months later, endowed by the Abbot of the neighbouring monastery of Anchin, and entrusted to the Jesuits. In 1570, the Abbot of Marchiennes founded a college for the study of law. The Abbot of Saint-Vaast founded a college of that name. Later on, we find the College of St. Thomas Aquinas, belonging to the Dominicans, the Collège du Roi, and others. The remaining British establishments were all exclusively for ecclesiastics. The Irish College was originally a Spanish foundation. It was established before the end of the sixteenth century, and endowed with 5,000 florins a year by the King of Spain. The course of studies lasted six years and the students attended lectures at the university. The Scots' College has an unfortunate notoriety in consequence of the long dispute between the Jesuits and the secular clergy which centred round it in later times. It was established in 1594, not as a new foundation, but as the continuation of a secular college at Pont-à-Mousson in Lorraine, which, owing to the unhealthfulness of the site, had to seek a new home. In 1606, however, it moved again, and it was the turner several further migrations that terminated finally at Douai in 1612. The college was devoid of resources, and it was due to the zealous efforts of Father Parsons in Rome and Madrid, and of Father Creighton in France and Flanders, that numerous benefactions were given, and it was placed on a permanent footing. For this reason, the Jesuits afterwards claimed the property as their own, although it was admitted that in its early years secular clergy had been educated there. Appeals and counter-appeals were made, but the question was still unsettled when the Jesuits were expelled from France in 1764. The French Government, however, recognized the College of the Scotch secular clergy and allowed them to continue the work of the college under a rector chosen from their own body. The Benedictine and Franciscan houses at Douai were near together and were both bound up in their history with the restoration of the respective orders in England. The Franciscan monastery was founded mainly through the instrumentality of Father John Gennings, the brother of the martyr. It was established in temporary quarters in 1618, the students for the time attending the Jesuit schools; but by 1621 they had built a monastery and provided for admission in June. The first college in their own walls. The Benedictines began in 1605, in hired apartments belonging to the Collège d'Anchin, but a few years later, through the generosity of Abbot Caravel of the monastery of Saint-Vaast, they obtained land and built a monastery, which was opened in 1611. The house acquired a high reputation for learning, and many of the professors of the university were at different times chosen from among its members.

Returning now to the English College, we come upon the unfortunate disputes between the secular and regulars in the seventeenth century. Dr. Worthington, though himself a secular priest, was under the influence of Father Parsons, and for a long time the students attended the Jesuit schools and all the spiritual direction was in the hands of the society. A visitation of the college, however, laid bare many shortcomings in its administration; at the end Worthington was deposed. His successor, Dr. Kellison (1631–1641), succeeded in restoring the reputation of the college, while he gradually arranged for the necessary tuition to be given within its walls. In the latter half of the seventeenth and the early years of the eighteenth century the College went through a troubled time. During the presidency of Dr. Hyde (1646–1651), the University of Douai claimed certain controlling rights over the college, which claim, however, he successfully withstood. His successor, Dr. George Leyburn (1652–1670), fell out with the “Old Chapter”, in the absence of a bishop, governing the Church in England. He attacked one Mr. White (alias Blacklo), a prominent member of their body, and procured a condemnation of his writings by the University of Douai. In the end, however, he himself found it necessary to retire in favour of his nephew, Dr. John Leyburn, who was afterwards vicar Apostolic. Hardy was the dispute with the “Blackloists” (as they were called) finished, when a further storm of an even more serious nature arose, the centre being Dr. Hawarden who was professor of philosophy and then of theology at the English College for seventeen years. His reputation became so great that when a vacancy occurred in 1732 he was solicited by the bishop, the chief members of the university, and the magistrates of the town to accept the post of regius professor of divinity. His candidature, however, was opposed by a party headed by the vice-chancellor. The Jesuits also declared against him, accusing him, and through him the English College of Jansenism. In the end, Dr. Hawarden retired from Douai and went on the mission in England; and a visitation of the college, made by order of the Holy See, resulted in completely clearing it of the imputation. In 1777, Douai was taken by Louis XIV, and a copy that date has been ordered. The college was for the short time that it was held by the English after the siege of the Duke of Marlborough in 1710; but it was retaken by the French the following year.

During the rest of the eighteenth century, there were important changes. While in England, the Jesuits were under the influence of Father Gennings. In 1770, the Jesuit college was re-established, and in 1778, a new English College was founded. The college was rebuilt at the middle of the century and the English Benedictine monastery between 1776 and 1781. But all were destined to come to an end a few years after this, under the Reign of Terror.

As a town, Douai suffered less than many others at the beginning of the Revolution. The university kept up its Catholic character within the walls. The English College was shut up in 1779, when the revival of the five typical Catholic universities to which Pitt appealed for an authoritative declaration as to the Catholic doctrine on the "deposing power" of the pope. During the Reign of Terror, however, it suffered the same fate as many similar establishments. When all the clergy of the town were called upon in 1791 to take the "Civic Oath", the members of the British establishments claimed exemption in virtue of their nationality. The plea was allowed for a time; but after the execution of Louis XVI, when war was declared between England and France, it was not to be expected that this immunity would continue. The superiors and students of most of the British establishments took flight and succeeded in reaching England. The members of the English College, with their president, Rev. John Daniel, remained in the hope of saving the college; but in October, 1793, they were taken to prison at Doullens in Picardy, together with six Anglo-Benedictine monks who had remained for a similar purpose. After undergoing many dangers and hardships, they were allowed to return to Douai in November, 1794, and a few months later, by the order of Dr. Stapleton, President of St. Omer (who with his students had likewise been imprisoned at Doullens), they were set at liberty and allowed to return to England. The English collegians never returned to Douai. The Penal Laws had recently been repealed, and they founded two colleges to continue the work of Douai—Crook Hall (afterwards removed to Ushaw).
in the North, and St. Edmund's, Old Hall, in the South. The Roman pension was divided equally between these two until the French occupied Rome in 1799, when it ceased to be paid. Both these colleges exist at the present day. After the Revolution, Bonaparte restored the Catholic establishment in France under one administrator, Rev. Francis Walsh, an Irishman. On the restoration of the Bourbons, a large sum of money was paid to the English Government to indemnify those who had suffered by the Revolution; but none of this ever reached Catholic hands, for it was ruled that as the Catholic colleges were illegal in France for that religion, they were illegal in England, and were restored to their rightful owners, and most of them were sold. The Anglo-Benedictines alone retained their ancient monastery; and as the community of St. Gregory was then permanently established at Downside, they handed over their house at Douai to the community of St. Edmund, which had formerly been located in Paris. These Benedictines carried on a school at Douai until 1903, when in consequence of the Associations' Law passed by the Government they were forced to leave. They returned to England, and settled at Woolampton, near Reading.

Also many unpublished MSS. in the Westminster archives, and in those of the Old Brotherhood (formerly the Old Chapter).

**BENEDICT WARD.**

**DOUAY BIBLE.**—The original Douay Version, which is the foundation on which nearly all English Catholic versions are still based, owed its existence to the religious controversies of the sixteenth century. Many Protestant versions of the Scriptures had been issued and were used largely by the Reformers for polemical purposes. The rendering of some of the texts showed evident signs of controversial bias, and it became of the first importance for the English Catholics of the day to be furnished with a translation of their own, which they could depend on and to which they could appeal in the course of argument. The work of preparing such a version was undertaken by the members of the English College at Douai, in Flanders, founded by William Allen (afterwards cardinal) in 1588. The chief share of the translating was borne by Dr. Gregory Martin, formerly of St. John's College, Oxford. His text was revised by Thomas Worthington, Richard Bristowe, John Reynolds, and Allen himself—all of them Oxford men. A series of notes was added, designed to answer the principal arguments of the Reformers; these were prepared by Allen, assisted by Bristowe and Worthington.

The object of the work was, of course, not limited to controversial purposes; in the case of the New Testament especially, it was meant for pious use among Catholics. In fact, however, that the primary object was controversial explains the course adopted by the translators. In the first place they translated directly, not from the original Hebrew or Greek, but from the Latin Vulgate of St. Jerome. This had been declared authoritative for Catholics by the Council of Trent; but it is also commonly asserted that the text was nearer to the Latin original than in any manuscripts at that time extant in the original languages. Then, also, in the translation, many technical words were retained bodily, such as *posch, parasceve, azymes,* etc. In some instances, also, where it was found difficult or impossible to find a suitable English equivalent for a Latin word, the latter was retained in an anglicized form. Thus in Phil., ii, 8, we get "He *exercised* himself," and in Heb., ix, 28, "Christ was offered once to *exhaust* the sins of many.

It was considered that an ordinary reader, finding the text word for word, would have no occasion to refer to the original, and that this was preferable to satisfying him with an inadequate rendering. In other cases Latinisms seem to have crept in unawares, as in Luke, x, 1, "Our Lord *designed* also other seventy-two"; or in Phil., ii, 10, "In the name of Jesus, every knee bow of the *celestialts, terrestrials and infernals*." The proper names are usually translated, though not always (e.g. Paul), but the word *Dominus* is rendered throughout Our Lord. The general result was a version in cumbersome English, so full of Latinisms as to be in places hardly readable, but with scholary and accurate.

In the year 1578, owing to political troubles, the college was temporarily transferred from Douai (which was then in the dominions of the King of Spain) to Reims, and during its sojourn there, in 1582, the New Testament was published, and became consequently known as the "Reims Testament". It contained no episcopal imprimatur, but a recommendation was appended by three doctors of that university. Thus the New Testament appeared nearly thirty years before the Anglican "Authorized Version", and although not officially mentioned as one of the versions to be consulted, it is now commonly recognized to have had a large influence on the King James Version (see Preface to R. V., iv, 1, also, Carleton, "Rheims and the English Bible."

The Reims Testament was reprinted twice at Antwerp—in 1600 and 1621—and a fourth edition was issued at Rouen in 1633. Then it was allowed to rest for over a century, before a fifth edition appeared, with some slight changes, dated 1728, but without any place of publication stated. It is believed to have been printed in London and was edited by Dr. Challoner (afterwards bishop), and Father Blyth, a Carmelite. The Douay Bible was never after this printed abroad. A sixth edition of the Reims Testament was printed at London in 1798, and a seventh dated 1838, which is the accuracy of the last Catholic edition. Several Protestant editions have appeared, the best known being a curious work by Rev. William Fulke, first published in 1598, with the Reims text and that of the Bishops' Bible in parallel columns. A Protestant edition of the Reims Testament was also brought out by Leavitt of New York, in 1834. Although the Bibles in use at the present day by the Catholics of England and Ireland are popularly styled the Douay Version, they are most improperly so called; they are founded, with more or less alteration, on a series of revisions undertaken by Bishop Challoner in 1709-52. His object was to meet the practical want felt by the Catholics of his day of a Bible moderate in size and price, in readable English, and with notes more suitable to the time. He brought out three editions of the New Testament, in 1719, 1750, both separately, and one composite in 1750. The changes introduced by him were so considerable that, according to Cardinal Newman, they "almost amounted to a new translation". So also, Cardinal Wiseman wrote, "To call it any longer the Douay or Rheims Version is an abuse of terms. It has been altered and modified until scarcely any remains as it was originally published nearly every case Challoner's changes took the form of approximating to the Authorized Version, though his three editions of the New Testament differ from one another in numerous passages. The best known
DOUBT

Catholic Bible published in England in modern times is perhaps Haydock's, which was first issued at Manchester in fortnightly parts in 1811-12. The Irish editions are mostly known by the names of the bishops who gave the imprimatur: as Dr. Carpenter's New Testament (1783); Dr. Tristram's Bible (1791); Dr. Murray's (1825); and Dr. Denviri's (1836)—the last two of which have often been reprinted, and circulated largely at the present day in England as well as in Ireland. Of late years the issue of the sixpenny New Testament by Burns and Oates of London has by its large circulation made the Vulgate edition of Challoner's of 1749—the standard one, especially as the same is adopted in Dr. Murray's and Dr. Denviri's Bibles. In America an independent revision of the Douay Version by Archbishop Kenrick (1849-59) is much used.

Doubt (Lat. dubium, Gr. ὑπόθεσις, Fr. doute, Ger. Zweifel), a state in which the mind is suspended between two contradictory propositions and unable to assent to either of them. Any number of alternative propositions on the same subject may be in doubt at the same time; but, strictly speaking, they should be attached separately to each one, as between the proposition and its contradictory, i.e. each proposition may or may not be true. Doubt is opposed to certainty, or the adhesion of the mind to a proposition without misgiving as to its truth; and again to opinion, or social adhesion to a universal proposition together with such a misgiving. Doubt is either positive or negative. In the former case, the evidence for and against is so equally balanced as to render decision impossible; in the latter, the doubt arises from the absence of sufficient evidence on either side. It is thus possible that a doubt may be positive on the one side and negative on the other (positivo-negative or negativo-positive), i.e. in cases where evidence on one side only is attainable and does not, of itself, amount to absolute demonstration, as, for instance, in circumstantial evidence. Again, doubt may be either theoretical or practical. The former is concerned with abstract truth and error; the latter with questions of duty, or of the licitness of actions, or of mere expediency. A further distinction is made between doubt concerning the existence of a particular fact (dubium facti) and doubt in regard to a precept of law (dubium juris). Prudent doubts are distinguished from impudent, according to the reasonableness or unreasonableableness of the considerations on which the doubt is based. It should be observed that doubt is a purely subjective condition; i.e. it belongs only to the mind which has to judge of facts, and has no application to the facts themselves. A proposition or theory which is commonly called doubtful is, therefore, one as to which sufficient evidence to determine assent is not forthcoming; in itself it must be either true or false. Theories which are at one time held as doubtful and are afterwards accepted, or which, finally, become certain truth or false by reason of the discovery of fresh evidence.

Certitude may be produced either by reason (which deals with evidence) or by faith (which rests on authority), it follows that theoretical doubt may be in like manner made concerning the subject-matter of either reason or faith, that is to say, with philosophy or with religion. Practical doubt is concerned with conduct; and since conduct must be guided by principles afforded by reason or by faith, or by both conjointly, doubt concerning it regards the application of principles already accepted under one or other of the foregoing heads. The resolution of doubt of this kind is the province of moral theology, in regard to questions of right and wrong; and in regard to those of mere practical expediency, recourse must be had to the scientific or other principles which properly belong to the subject-matter of the doubt. Thus, for example, doubt as to the occurrence of an historical event can only be resolved by consideration of the evidence; doubt as to the doctrine of the sacraments, by ascertaining what is of faith on the subject; doubt as to the morality of a commercial transaction, by the application of the suitable injunctive decision; doubt as to the moral theology, when the question of the wisdom or the reverse of the transaction in regard to profit and loss must be determined by commercial knowledge and experience. The legitimacy, or the reverse, of doubt in regard to matters of fact is made evident by the forms of logic (induction and deduction), which, whatever may be the extent of their function as a means of acquiring knowledge, are indispensably necessary as a test of the correctness of conclusions or hypotheses already formed.

DOUBT IN PHILOSOPHY.—The validity of human perception and reasoning in general as a means of discovering objective truth has been frequently called in question. The doubt thus raised has been sometimes of the character called methodic, fictitious, or provisional, and sometimes real, or sceptical, as embodying the conclusion that objective truth cannot be known. Doubt of this character is preliminary to all inquiry, and in this sense philosophy is said by Aristotle (Metaph., III, i) to be "the art of doubting". Sir W. Hamilton points out (Lect. on Metaphysics, v) that doubt, as a preliminary to philosophical inquiry, is the only means by which the necessary removal of the prejudice is accomplished, and that the method of philosophical inquiry is to proceed in the primary necessity of putting aside the "idols", or prejudices, by which men's minds are naturally influenced. Thus the Scholastic proof of a proposition or thesis begins by the statement of doubts', or contrary arguments; after which the evidence for the thesis is given, and finally the doubts are resolved. This, it need hardly be said, is the method pursued in the "Summa" of Saint Thomas Aquinas and still in use in the formal disputations of theological students. An instance of this kind of doubt is the Six et Non (Yes and No) of Abelard, which consists of a series of propositions on theological, Scriptural, and philosophical subjects, with a counter-proposition attached to each. The solution of the doubts in the sense of the orthodox thesis, which was clearly intended to follow, was never written or, if so, has not been preserved. (See Victor Cousin's "Fragments Philosophiques"). The philosophical system of Descartes begins with a universal methodic doubt; the famous cogito, ergo sum, on which the whole system is based, is the solution of the philosopher's fundamental doubt of his own existence. This solution had been anticipated by St. Augustine, who took the subjective certainty of one's own existence as the ground of all certainty (e.g. "Tu, qui vis te nosse, scis esse te? Scio. Unde scis? Nescio. Cogitare te scis? Scio."") (Sol., II, i); "Utrum aëris sit vis vivendi, an ignis, dubitavertur homines? vivere semen et minus, scire et scire et scire, et scire et scire et scire"") (De Trin., X, xiv). In general it may be said that doubt, either expressed or implied, is involved in all intellectual research. Doubt among the systematics of moral doubt as to the trust-worthiness of human faculties is not merely provisionally assumed, but is genuine and final, those which find in a supernatural revelation the guide to truth which natural reason fails to provide must be distinguished from those which hold doubt to be the final conclusion of all inquiry into truth. The former de-
precipitate reason in the interests of faith; the latter take reason as the only possible guide, but find no ground for confidence in it. To the former class belongs Nicholas of Cusa (1410), who was the author of two sceptical treatises on human knowledge; certainty is to him as the only attribute of the divine being, now, only the name of mystical knowledge of God. The scepticism of Montaigne made a reservation (whether sincerely or not is uncertain) in favour of revealed truth; and the same principle was advocated by Charron, Sanchez, and Le Vayer. Hume, in his sceptical essays on miracles and immortality, also attributed rational authority to revelation; but with obvious insincerity. The sceptical views of Hobbes, combined with his peculiar theory of government, made all conviction, including that of religious truth, dependent on the civil authority. Gianvili’s “The Vanity of Dogmatizing”, or “Scepsis Scientific”, grounded a serious defence of revealed religion on the uncertainty of natural knowledge. Balfour’s “Defence of Philosophic Doubt”, based on the indemonstrability of ultimate truths, is an attempt in the same direction. (See Fideism.)

In the second class are to be reckoned the various systems which was far the ancient Greek philosophy at a very early date. Heraclitus held the senses to be untrustworthy (κακοτρεπος) and misleading, though he also conceived a supersen- suous knowledge of the universal reason, immanent in the cosmos, to be attainable. Zeno of Elea defended the unity and permanence of being by propounding a series of “hypotheses”, each of which resulted in a contradiction, and by means of them sought to demonstrate the unreality of the manifold and changing. The subjective principle of the Sophists (Protagoras, Gorgias, and others of less note) that “what is true for me is true for all” implied doubt by scepticism, as to all objective reality. Knowledge is resolved by Protagoras into mere variable opinion; and Gorgias asserts that nothing really exists, that if anything existed, it could not be known, and that if such knowledge were possible it would be incomunicable. The Pyrrhonists, or Sceptics, held everything in doubt, even the fact of doubting. The Middle Academics, whose chief representatives were Ares- ciinus and Carneades, while doubting all knowledge, held, nevertheless, that probability could be recognized in varying degrees. The “Encyclopedia of Diderot and d’Alembert” contains a severe contradiction of Montaigne, who claimed a higher degree of probability for the Pyrrhonist than for the Academic opinion. Sextus Empiricus advanced the theory, often since maintained, that the syllogism is really a petitio principii, and that demonstration is therefore impossible. Bayle, in his celebrated “Dictionary”, subjected the philosophy of his time to severe destructive criticism, but was confessedly unable to supply its deficiencies. Hume’s position was purely negative; for him, neither the existence of the external world nor that of the mind by which it is known was capable of demonstration; and the conclusion of Kant’s “Critique of Pure Reason”, that the “thing in itself” (Ding an sich) is unknowable though certainly existing, is evidently sceptical (though the author himself rejected the title), since it embodies a prior conclusion in the doubt as to the nature of ultimate reality. Kant’s argument for the existence of God, as rationally indemonstrable, but postulated by the practical reason, necessarily results in a very limited conception of the Divine nature. Lamarck’s general consent, or the common sense of mankind, as the ground of certitude; the individual person he held to be incapable of attaining it. “Nothing is as evident to us to-day that we can be sure we shall not find it either doubtful or erroneous to-morrow” (Essai sur l’indifférence, II, xii).

It may be observed that theories which deny the validity of simple experience as a guide to truth are really instances of doubt, because, though they assert dogmatically the inadequacy of widely accepted evidence, they are nevertheless in that state of suspense by which doubt is properly characterized in regard to the reality commonly held to be made known by experience. This is true of the name of Agnosticism is a strictly doubtful one towards all that lies beyond sense-experience. The doubt is purely negative in this view; whatever is not cognizable by the aid of the senses is held to be unknowable; God may exist, or he may not, but we can neither affirm his existence nor deny it. Again, the system or method known as Pragmatism regards all reality as doubtful; truth is the correspondence of ideas with one another, and cannot be regarded as anything final, but must perpetually change with the progress of human thought; knowledge must be taken at its ‘face value’ from moment to moment, as a practical guide to well-being, and must not be regarded as having any necessary correspondence with definite and permanent reality.

DOUBT IN REGARD TO RELIGION has at different times assumed a variety of forms. It is perhaps uncertain whether to mention scepticism. This opinion was extensively held in ancient Greek philosophy at a very early date. Heraclitus held the senses to be untrustworthy (κακοτρεπος) and misleading, though he also conceived a supersen- suous knowledge of the universal reason, immanent in the cosmos, to be attainable. Zeno of Elea defended the unity and permanence of being by propounding a series of “hypotheses”, each of which resulted in a contradiction, and by means of them sought to demonstrate the unreality of the manifold and changing. The subjective principle of the Sophists (Protagoras, Gorgias, and others of less note) that “what is true for me is true for all” implied doubt by scepticism, as to all objective reality. Knowledge is resolved by Protagoras into mere variable opinion; and Gorgias asserts that nothing really exists, that if anything existed, it could not be known, and that if such knowledge were possible it would be incomunicable. The Pyrrhonists, or Sceptics, held everything in doubt, even the fact of doubting. The Middle Academics, whose chief representatives were Ares- ciinus and Carneades, while doubting all knowledge, held, nevertheless, that probability could be recognized in varying degrees. The “Encyclopedia of Diderot and d’Alembert” contains a severe contradiction of Montaigne, who claimed a higher degree of probability for the Pyrrhonist than for the Academic opinion. Sextus Empiricus advanced the theory, often since maintained, that the syllogism is really a petitio principii, and that demonstration is therefore impossible. Bayle, in his celebrated “Dictionary”, subjected the philosophy of his time to severe destructive criticism, but was confessedly unable to supply its deficiencies. Hume’s position was purely negative; for him, neither the existence of the external world nor that of the mind by which it is known was capable of demonstration; and the conclusion of Kant’s “Critique of Pure Reason”, that the “thing in itself” (Ding an sich) is unknowable though certainly existing, is evidently sceptical (though the author himself rejected the title), since it embodies a prior conclusion in the doubt as to the nature of ultimate reality. Kant’s argument for the existence of God, as rationally indemonstrable, but postulated by the practical reason, necessarily results in a very limited conception of the Divine nature. Lamarck’s general consent, or the common sense of mankind, as the ground of certitude; the individual person he held to be incapable of attaining it. “Nothing is as evident to us to-day that we can be sure we shall not find it either doubtful or erroneous to-morrow” (Essai sur l’indifférence, II, xii).

It may be observed that theories which deny the validity of simple experience as a guide to truth are really instances of doubt, because, though they assert dogmatically the inadequacy of widely accepted evidence, they are nevertheless in that state of suspense by which doubt is properly characterized in regard to the reality commonly held to be made known by experience. This is true of the name of Agnosticism is a strictly doubtful one towards all that lies beyond sense-experience. The doubt is purely negative in this view; whatever is not cognizable by the aid of the senses is held to be unknowable; God may exist, or he may not, but we can neither affirm his existence nor deny it. Again, the system or method known as Pragmatism regards all reality as doubtful; truth is the correspondence of ideas with one another, and cannot be regarded as anything final, but must perpetually change with the progress of human thought; knowledge must be taken at its ‘face value’ from moment to moment, as a practical guide to well-being, and must not be regarded as having any necessary correspondence with definite and permanent reality.
Pastor, "History of the Popes", chapters on the Renaissance.) It helped to prepare the way, however, for the Reformation, which, beginning with a revolt against ecclesiastical authority, called all the doctrines of Christianity in question, rejecting those which failed to find support in the Bible. Among the different leaders of the movement. Thus among Protestants in general there is great variety of opinion on religious doctrines, those which are firmly held by some being considered doubtfully by others, and by others again, rejected as false. Anglicanism, especially, leaves open many of the tenets which the Church of England holds as of faith, and thus endeavours to comprehend within its boundaries persons who differ widely from one another on important subjects. The Catholic Church, on the other hand, pronounces authoritatively as to the truth or falseness of opinions, by means of general councils, professions of faith, infallible decisions of the supreme pontiff, and the ordinary teaching of her pastors. As St. Avisus, in the sixth century, declared, "it is the law of the councils that if any doubt have arisen in matters which regard the state of the Church, we are to have recourse to the chief priest of the Roman Church, and to him we are bound to submit our objections." As regards the Faith is thus impossible in the Catholic Church without infringing the principle of authority on which the Church itself depends. The field, however, which is open to a variety of opinions on questions not directly involving the essential doctrines of the Faith is very wide; and though it is further limited by future dogmatic decisions, it is probable on the other hand that it will be increased in the future, as in the past, by the emergence of doubtful questions as to the exact bearing of dogmatic truth upon fresh discoveries or theories of all kinds.

It will be evident from what has been said that doubt cannot coexist either with faith or knowledge in regard to any given subject; faith and doubt are mutually exclusive, and knowledge which is limited by a doubt, becomes, in regard to the subject or part of a subject to which the doubt applies, no longer knowledge but opinion. A moral certainty—that is, one which is founded on the normal course of human action—does not strictly exclude doubt, but, as excluding prudent doubt, must be considered a sufficient practical guide. (cf. Butler, "Analogy of Religion", in the same sense.) Thus doubt is sometimes said to imply belief; though such belief or practical certainty cannot properly be held to rise above the most probable kind of opinion. The rhetorical conception of the faith that "lives in honest doubt" (Tennyson, In Memoriam) must be taken to signify that truthful and serious habit of mind which refuses to submit to deception on motives furnished by intellectual sloth or the desire of worldly advantage. Catholic philosophy is entirely opposed both to the Pyrrhonian doubt of external reality and to that form of Idealism which is closely connected with the Kantian method on its sceptical side, and which seeks to reduce all dogma to the mere expression of subjective religious conceptions, relegateing the objective facts with which dogma is concerned to the domain of symbol and parable. In the view of the Scholastic system, human experience is a phenomenon through the senses and the intellect; phenomena being the object both of the senses, which they directly affect, and, after a different manner, of the intellect, which apprehends through sensible impressions the true nature and principles of the reality which causes those impressions. The facts of the Church bears witness in this sense real and objective, and may neither be explained away nor set aside by any system of historical or scientific criticism. Such is the purport of the Encyclical "Pascendi Dominici gregis" (1907), which both controverts and condemns the attempt to evade dogma of its true significance made by the method of religious speculation known as Modernism.

**Practical Doubt**, or doubt as to the lawfulness of an action is, according to the teaching of moral theology, incompatible with right action; since to act with a doubtful conscience is to sin directly against the moral law. To act with a doubtful conscience is, therefore, sinful; and the doubt must be removed before any action can be justified. It frequently happens, however, that the solution of a practical doubt is not attainable, while some decision is necessary. In such cases the conscience holds "reflexive" certainty by adopting an approved opinion as to the lawfulness of the action contemplated, apart from the intrinsic merits of the question. The question is much discussed among different schools of theologians whether the opinion so formed must be of greatly overpowering authority in favour of liberty in order to justify an action the lawfulness of which appears intrinsically doubtful, whether it must be merely more probable than the contrary one, or equally probable, or merely probable in itself, even though less so than its contrary. (See Moral Theology; Probabilism.) The last, however, the theory is generally accepted for all practical purposes; and the principle that lex dubia non obligat—i.e. that a law which is doubtful in its application to the case in hand does not bind—is universally admitted. It must be observed, however, that where the question is of a doubtful law but of a certain practical result, only the "safer" course may be followed. No opinion, however probable, is allowed to take precedence of the most certain means of securing such ends; e.g. in providing for the validity of the sacraments, in discharging obligations of justice, or in avoiding injury to others. Thus doubtful baptisms and ordinations must be repeated conditionally. (See Agnosticism; Certitude; Epistemology; Faith; Heresy; Infallibility; Scepticism.)

*Douglas*, Gavin, Scottish poet and poet, b. about 1474; d. 1522; he was the third son of Archibald, Fifth Earl of Angus, known as "Bell-the-Cut". Educated for the Church at the universities of St. Andrews and Paris, he held for some years a benefice in East Lothian, and during this period composed most of the poetical works which have made his name famous. In 1501 he became provost of the cathedral church of St. Giles, Edinburgh, and subsequently, through the influence of Queen Margaret, who had married his nephew, the young Earl of Angus, he obtained the abbacy of Arbroath and later the Bishopric of Dunkeld. The queen's efforts to have him promoted to the primacy were unsuccessful; and when the popular indignation at her marriage with A. B. Sharpe.
Angus resulted in his being deprived of the regency, Douglas was brought to trial by the new regent, the Duke of Albany, for intriguing with the queen to obtain ecclesiastical promotion without the consent of Parliament. He was imprisoned for a year in Edinburgh, and after his release continued for a time in the administration of his diocese. When, however, Margaret separated from her husband and sided with Albany against the Douglases, Gavin was deprived of his see. He fled to England in 1321 and was kindly received by Henry VIII, but he died of plague the following year. He was buried in the Savoy Church in London.

It was unfortunate for Douglas’s future reputation that his high birth and family connections plunged him into the political turmoil of his time, and thus prematurely closed his career as a poet and scholar of the first order. His participation in the internal divisions by which Scotland was torn during most of his life ended, as far as he was concerned, in failure, exile, and death; and it is as a literary genius, rather than a churchman or a statesman, that he lives in Scottish history. It was during his quiet life as a country parson that the most gorgeous allegory called the “Pelican of Honour”, whose wealth of illustration and poetical embellishments at once won renown for its author; and a little later he produced the translation of Virgil’s “Aeneid”, which gives him his chief claim to literary immortality. The translation is a rather free adaptation of the Roman poet, written in the “Scottish” language then current, while its author prefixed an original prologue in verse. It was printed (for the third time) by the Bannatyne Club in 1839. Douglas wrote two other poems, “King Harter” and “Conscience”, and translated also Ovid’s “De Remedia Amoris”. His complete works were first collected and published in Edinburgh (ed. Small), in 1874.

Dove (Lat. columba).—In Christian antiquity the dove appears as a symbol and as a Eucharistic vessel. As a Christian symbol it is of very frequent occurrence in ancient ecclesiastical art. (1) As a symbol of the Holy Spirit it appears especially in representations of the baptism of Our Lord (Matt., iii, 16) and of Pentecost. St. Gregory the Great (590-604) is generally shown with a dove on his shoulder, symbolizing inspiration or rather Divine guidance. A dove of gold was hung up in the baptistery at Reims after the baptism of Clovis; in general the symbol occurs frequently in connexion with early representations of baptism. In ancient times a dove-like vessel was frequently suspended over the baptismal font and in that case was sometimes used to contain the holy oils (Ariiingi, Roma Subterr., ii, 326). (2) As a symbol of martyrdom it indicated the action of the Holy Spirit in bestowing the fortitude necessary for the endurance of suffering. (3) As a symbol of the Church, the agent through which the Holy Spirit works on earth. When two doves appear the symbolism may represent, according to Macarius (Hagiographa, 222), the Church of the circumcision and that of the Gentiles.

On a sarcophagus or on other funeral monuments the dove signifies (a) the peace of the departed soul, especially if, as is often the case in ancient examples, it bears an olive branch in its beak; (b) the hope of the Resurrection. In each case the symbolism is derived from the story of Noe and the Flood. Such is the meaning of the dove (columba, palumba sine felle) in numerous epitaphs of the Roman catacombs. Occasionally funeral lamps were made in the shape of a dove. Two doves on a funeral monument sometimes signify the conjugal love and affection of the parties buried there. The dove in flight is the symbol of Assumption of Christ or of the entry into glory of the martyrs and saints (cf. Ps. xcviii, 7; “our soul is escaped as a bird from the snare of the hunters, the snare is broken and we are delivered.” In like manner the caged dove signifies the human soul yet imprisoned in the flesh and held captive during the period of mortal life. In general, the dove as a Christian emblem signifies the Holy Spirit either personally or in His works. It signifies also the Christian soul, not the human soul as such, but as indwelt by the Holy Spirit; especially, therefore, as freed from the toils of the flesh and entered into rest and glory.

As a Eucharistic Vessel.—The reservation of the grain was first performed in the presence of a dove (columba) on a certain occasion in the church of St. Martin at Tours in Gaul in the year 1171. He returned to France after labouring as a missionary in the Mississippi Valley for twenty years.

EDWARD P. SPELLANE.

DOUKHOBORS. See Russia.

Doutreleau, Stephen, missionary, b. in France, 11 Oct., 1589; date of death uncertain. He became a Jesuit at the age of twenty-two and migrated to Louisiana, U. S. A., with the Ursuline nun in 1727. Soon after his arrival he was sent to the Illinois mission, for in 1728 he seems to have been at Poste Vincennes, "the fort on the Wabash", which was established about that time. On 1 January, 1730, he set out from N. Orleans on business connected with the mission. The Natchez Indians, only a few weeks before, had massacred all the inhabitants of the little French village of Natches, and the Yazoo, a neighboring Indian tribe, had followed their example. Two Jesuit missionaries perished in these uprisings. Ignorant of the state of the country and accompanied by four or five French voyageurs, Father Doutreleau landed at the mouth of the Yazoo River to offer up the Holy Sacrifice. The Indians attacked the little party killing one of the Frenchmen and wounding the missionary in the arm. Doutreleau escaped to his canoe with two of his companions and began their flight down the Mississippi. After many dangers they reached the French camp at Tonica Bay, where they were received with great kindness; their wounds were dressed and after a night’s rest they proceeded unmolested to New Orleans. A journey of four hundred leagues through this country had been accomplished. Shortly after, Father Doutreleau became chaplain of the French troops in Louisiana, and in this capacity accompanied them on one expedition. At his own request he was sent back to the Illinois Indians, but how long he remained is uncertain. He was at one time chaplain of the hospital at New Orleans. In
DOWDALL

Holy Eucharist for the use of the sick was, certainly since early medieval times, effected in many parts of Europe by means of a vessel in the form of a dove, suspended by chains to the baldaquin and thus hung above the altar. Mention may be made here of the (two) doves or, as they are usually represented, the Roman catacombs as drinking from a Eucharistic chalice (Seyerdy, "Die Darstellungen des eucharist.

Kevels auf altr. Grabinschri
ten", in "Stromation Archæologonen", Rome, 1900, 97-118). The idea of the Eucharistic vessel was probably taken from this dove-like receptacle used at an early period in the baptisteries and often suspended above the fonts. These vessels were usually made of gold or silver. This was no doubt always the case if the vessel was designed to be the immediate holder of the Blessed Sacrament, since the principle that no base material ought to be used for this purpose is early and general. But when, as seems generally to have been the case in later times, the dove was only the outer vessel enshrinning the pyx which itself contained the Blessed Sacrament, it came about that any material might be used which was itself suitable and dignified. Mabilllon (Iter Ital., 217) tells us that he saw one at the monastery of Bobbio made of gilded leather, a dove is shown to this day in the church of San Nazario at Milan which is enamelled on the outside and silver gilt within. The exact time at which such vessels first came into use is disputed, but it was certainly at some early date. Tertullian (C. Valentinian. cap. iii) speaks of the Church as "colymbam auream" and the dove of the dove, and his words are sometimes quoted as exhibiting the use of such vessels in the third century. The reference, however, is clearly to the Holy Spirit. In the life of St. Basil, attributed to St. Amphilo
cius, is perhaps the earliest clear mention of the Eucharistic dove. "Cum patrum divisisset in partes..." (368, 369) ("A super sacrum altare suspendi") (When he had divided the bread into three pieces he placed the third part in a golden dove which was suspended above the holy altar—Opp. Amphilo
cii, P. G., XXXIX). St. Chrysostom's expression concerning the Holy Eucharist, "consecutam Spiritus Sancto, clothed with the Holy Spirit (Hom. xiii, ad pop. Antioch.)," is generally taken to allude to this practice of reserving the Holy Eucharist in a dove, the emblem of the Holy Spirit. The same idea is expressed by St. Irenaeus (Epist. xiii) in the verses, "ut Deus, vivens Spiritus in sanctum Christum vestivit... honore."

And the Holy Spirit in the form of a dove has robed Christ in honour. The general, and certainly the earliest custom, both East and West, was to suspend the dove from the ciborium or baldaquin. At a later period in some parts of the West, especially in Rome, a custom grew up of placing a tower of precious material upon the altar, and enclosing the dove with the Blessed Sacram ent within this tower. Thus, in the "Libera Pontificis" which contains ample records of the principal gifts made to the great basilicas in the fourth and succeeding centuries, we never find that the dove was presented without the tower as its complement. Thus in the life of Pope Hilary it is said that he presented to the baptistery at the Lateran turrem argenteam et columnam auream. In the life of St. Sabas it is said that he presented the same to the Vatican Basilica pateram... cum turre et columna. Innocent I (ibid.) gave to another church turrem argenteam cum columna.

ARTHUR S. BARNES.

Dowdall, George, Archbishop of Armagh, b. at Drogeda, County Louth, Ireland, in 1487; d. at London, 15 August, 1538. He entered the Order of Crutched Friars, and was the last prior of their monastery at Ardee. On the suppression of the monastery by Henry VIII, in 1539, he received a pension of £20 a year. After the death of Primate Cromer, four years later, he was appointed to the See of Armagh by the King, but his appointment was not recognized by the pope. Dowdall acknowledged Henry VIII as supreme head of the Church on earth, and denounced the real primate, Robert Wauchope, to the Government.

Though a schismatic, he nevertheless vigorously opposed the introduction of Protestantism into Ireland in the following reign and became the leader of the Catholic party. His opposition was fruitless, he withdrew from public life in disgust and shortly afterwards retired to the Continent. On the death of Primate Wauchope, Dowdall, having renounced the schism, was appointed in 1553 by the pope to the very see of which he had been the schismatical archbishop. Ruling during nearly all the reign of Queen Mary, he exerted himself to repair the ravages to religion wrought in the preceding reigns. He held an important synod in Drogeda in 1554 in which decrees were passed against priests who had presumed to marry.

AMBROSE COLEMAN.

Dowdall, James, martyr, date of birth unknown; executed for his faith at Exeter, England, 29 September, 1600. He was the Benedictine of Drogheda, in Ireland, and was, though several authorities, including Challoner, describe him as a native of Wexford. Further confusion is added by reason of the fact that another contemporary, James Dowdall, died a confessor. According to Rothe, however, the martyr belonged to Drogeda, and traded with England and the Continent. In the summer of 1598, when returning from France, his ship was driven by stress of weather onto the coast of Devonshire, and he was arrested by William Bourchier, Earl of Bath, who had him under examination. Dowdall publicly avowed that he rejected the queen's supremacy, and only recognized that of the Roman pontiff. The earl forwarded the examination to Sir Robert Cecil, and had Dowdall committed to Exeter jail. Whilst in prison he was tortured and put to the rack, but continued unchanged in his fidelity to the ancient faith. On June 9, 1599, the Earl of Bath wrote to Sir Robert Cecil for instructions in regard to James Dowdall, who had been detained in prison almost a year. Accordingly he was tried at the Exeter assizes, and was ordered to be hanged, drawn, and quartered. His name is included in the Apostolic Process of the Irish Martyrs whose cause is at present (1908) before the Congregation of Sacred Rites.

W. H. GRATTON-FLOOD.

Dower (Lat. dowerium; Fr. doute), a provision for support during life accorded by law to a wife surviving her husband. Being for the widow being accorded by law, lower does not entail necessarily from the marriage, though at one time the marriage marriage portion such as the dow of the old Roman law, the French dot, or the English dowry. Dower is thought to have been suggested by the marriage gift which Tacitus found to be usual among the Germans. This gift he terms dos, but contrasts it with the dos of the Roman law, which was a gift on the part of the wife to the husband, while in Germany the gift was made by the husband to the wife (La
rousse, Grand dictionnaire universel, Paris, 1870, s. v. Doute). There was indeed in the Roman law what was termed donatio propter nuptias, a gift from the family of the husband, but this was only re-
quired if the dos were brought on the part of the wife. So too in the special instance of a widow (herself poor and undated) of a husband rich at the time of his death, an ordinance of the Christian Emperor Justinian secured her the right to a part of her husband's property, of which no disposition of his could deprive her.

But the general establishment of the principle of dower in the customary law of Western Europe, according to Maine (Ancient Law, 3rd Amer. ed., New York, 1887, 218), is to be traced to the influence of the Church, and to be included perhaps among its most arduous triumphs. Dower is an outcome of the ecclesiastical practice of exacting from the husband at marriage a promise to endow his wife, a promise retained in form even now in the marriage ritual of the Established Church in England. (See Blackstone, "Commentaries on the Laws of England", II, 134, note p.) In an ordinance of King Philip Augustus of France (1214), and in the almost contemporaneous Magna Charta (1215), dower is referred to. But it seems to have already become customary law in Normandy, Sicily, and Naples, as well as in England. The object of both ordinance and charter was to regulate the amount of the dower where this was not the subject of voluntary arrangement, dower by English law consisting of a wife's life estate in one-third of the lands of the husband "of which any issue which she might have had might by possibility have been heir" (Blackstone, op. cit., 131).

The Reformation period, a man who became a monk and made his religious profession in England was deemed civilly dead, "dead in law" (Blackstone, op. cit., Bk. II, 121); consequently his heirs inherited his land forthwith as though he had died a natural, instead of a legal, death. Assignment of his land would not have been possible until the natural death of such a religious. For only by his wife's consent could a married man be legally professed in religion. And she was not allowed by her consent to exchange her husband for dower. After the Reformation and the extinguishment of the English statute of 11 and 12 William III, prohibiting "papists" from inheriting or purchasing lands, a Roman Catholic widow was not held to be debarred of dower, for dower accruing by operation of law was deemed to be not within the prohibitions of the statute. In the curious disallow of old English law a Jewess born in England would be debarred of dower in land which her husband, having been an Englishman of the same faith and becoming converted after marriage, should purchase, if she herself remained unconverted.

There is judicial authority on the year 1310 for the proposition that dower was favoured by law (Year Books of Edward II, London, 1905, Vol. III, 189), and at a less remote period it was said to be with liberty one of three things which "the law favoreth." But an English statute of the year 1635 has inflicted the ininviable liability of dower by empowering husbands to cut off by deed or will their wives from dower. It was the law of dower unimpaired by statute, which according to the American commentator, Chancellor Kent, has been "with some modifications everywhere adopted as part of the municipal jurisprudence of the United States" (Commentaries on American Law, IV, 36). But while the marriage portion, dot, is, yet dower is not, known to the law of Louisiana, and it has now been expressly abolished in some other States and in some territories. The instances of legislative modifications are numerous and important.

Of dower (douaire) as it existed in the old French law no trace is to be found in the existing law of France. But brought to Canada from the mother country in pre-Revolutionary times, customary dower accruing by operation of law is yet recognized in the law of the former French Province of Quebec. The civil death which by English law seems to have applied to men only, might be by the French law incurred by women taking perpetual religious vows. A widow, therefore, thus entering into religion, would have some dower, although in some regions she was allowed to retain a moderate income. (See infra, op. cit.) And now by the law of Quebec a widow joining certain religious orders of the province is deemed civilly dead and undoubtedly would suffer loss of dower.

CHARLES W. SLOANE.

Dower, Religious (Lat. dos religioso). — Because of its analogy with the dower that a woman brings to her husband when she marries, the name "religious dower" has been given to the sum of money or the property that a religious woman, or nun (religiosa), brings, for her maintenance, into the convent where she desires to make her profession. It is not a question of the more or less generous donation of the young woman or her family either to the convent or to some of the good works that it carries on, nor of the amount paid in for the support of the postulant or novice until the time of her profession, but of a sum (usually a fixed one) set apart for the support of a religious who, by her profession, has become a member of the community.

The custom of religious dower was not in vogue in the ancient Church. Introduced occasionally for nuns under solemn vows (the only vows that existed in ancient times), it became gradually the rule in all communities, particularly in congregations under simple vows, these being now the most numerous. According to common ecclesiastical law, every convent had formerly to be provided, at the time of its foundation, with the resources necessary for the maintenance of a fixed number of nuns, not less than twelve. If a nun received gratuitously and without dower and, although in no wise prohibited from presenting the monastery with a portion of their property, were supported out of the revenue assigned to the monastery for this purpose. That is why the Council of Trent (Sess. XXV, c. III, De regul.) established in this regard the following rule: "Let only such a number [of religious] be determined, and henceforth maintained, as can be profitably supported, either by the proper revenue [of each house] or by the customary alms" [in the case of mendicant orders]. The determination of this number belongs to the bishop, who, if there be occasion, will act together with the regular superior (Gregory XIII, Constitution, Deo sacris, 15 Dec., 1572). The Council of Trent does not speak of religious dower. However, from the end of the sixteenth century the prescription relative to the fixed number of religious had fallen into disuse, and the convents came into use; and in the last two centuries. The first was the acceptance of "super-numerary" religious, that is of a larger number than the resources of the convent warranted; hence it was but just that the amount required for their maintenance should be demanded of them. The second reason to lay in the decrease of the resources of the ancient convents and in the absence of property for the many new houses founded towards the end of the sixteenth century. An evidence of the simultaneous existence of these two causes is found in the general decree of the Sacred Congregation of Bishops and Regulars, 6
Sept., 1604 (in Bizzarri, Collectanea, 260), ordaining that
the supernumerary religious should deposit a
dower equal to twice that of the others and amounting
to at least 400 écus (about $400). This was the mini-
mum, and each house was to set its own figure, to be
regulated according to circumstances. Though
postponed at the time of receiving the habit, the convent
did not acquire possession of the dower until the
ceremony of profession, and if the novice left before
being professed, it was restored to her (cf. Council of
Trent, Sess. XXV, cap. xvi). Dispensation from solemn
vows was, it may almost be said, unknown, and the obli-
gation of dower being not been provided for in the case
of a religious leaving her community; it was
the result of equity rather than of law. But since the
decree "Perpensis" of 3 May, 1902, which requires
of all religious under solemn vows a probationary
period of three years under simple vows, this
restitution has become a rule. Article X says: "The dower
established for each monastery should be deposited
before the profession of simple vows"; and Article XII
continues: "If a sister who has professed simple vows
retires from the monastery, either after being dis-
pensed from her vows by the Holy See or after sen-
tence of dismissal (before the solemn vows), the capital
of her dower is to be restored to her, but not the in-
terest."

Such is also the general rule for congregations under
simple vows. Stipulations concerning the dower are
very clearly set forth in the "Normæ," rules in use by
the Sacred Congregation of Bishops and Regulars for
the approbation of religious under simple vows, pub-
lished 28 June, 1901, ch. vii, articles 91-94. Each
congregation of nuns should settle in its statutes the
dozer, equal in all cases, for the choir religious; it
should even establish a lesser dower (but the same
for each one) to be deposited by the lay, or assist-
ant, sisters. The superior cannot receive a religious
without a dower or with an insufficient dower, except
by permission of the bishop, if the congregation be
dioecesan, or by that of the Congregation of Reli-
gious, if the institute be approved by Rome.

The required dower must be duly pledged to the con-
gregation prior to the taking of the habit and must be
deposited shortly before the profession. Thus de-
posited, such a dower cannot be alienated, that is, it
cannot be used by the congregation in whatever way
it may deem fit, as, for instance, to meet building ex-
penses or discharge debts, but must be prudently and
advantageously invested. Even though the funds be
administered by the mother-house or the provincial,
the income from each dower must be given to the
house where the religious resides who brought in that
dozer. Although no longer the property of the nun, the
dozer becomes entirely the property of the institute
only at the death of the subject, for whom, until then,
it must remain set apart, so that, should a religious
withdrew from a community either on the expiration of
her temporary vows, or after a dispensation, or
finally on account of dismissal, the capital of her
dozer must be restored to her.

asticæ (Paris, 1897), II, 45.

A. BOUDINHON.

DOWLING, JOSEPH THOMAS. See Ottawa, Dio-
cese of.

DOWN. Down and Connor, Diocese of (Dunensis et Con-
nensis), in Ireland. A line drawn from Whitehouse
on Lough Neagh due west to the Clady River, thence
by the river itself to Muckamore and Lough Neagh,
marks the boundary between the Diocese of Down
and the Diocese of Connor. North of this line to the
sea and the Bann, including the greater part of the
County Antrim and a small portion of Derry, is the
Diocese of Connor. South of the line, the remainder
of Antrim, except the parish of Aghalee, belonging to
Dromore, belongs to the Diocese of Down, as also the
whole of the County Down, except the baronies of
Iveagh and part of Kincardine. The extent of the
United dioceses is 597,450 Irish acres (about 576 sq.
miles).

Each diocese was a collection of ancient sees. With-
in the limits of Down, and founded in St. Patrick's
time, there were: Raholp, founded by St. Tasseach,
Gortgrib by Vincel, Bright by Loarn, Mahee Island
by St. Mochay, Maghera by St. Donard. There were
also: Moville, founded by St. Finnan, and Bangor by
St. Comgall, the latter an abbey, but often ruled in
aftertimes by a bishop. St. Fergus is named as first
Bishop of Down. In ancient times the place was called
Dun Cetar, Cetar being one of the Red Branch
knights. Afterwards it was called Dun-da-Leth-
Glaisse, "the fort of the two half-chains." According
to tradition two young chiefs had long pined in King
Laegaire's prison. St. Patrick miraculously struck
off the chain which bound them, and the prisoners, thus
released, hastened to their father's residence at Dun
Cetar, flinging from them the pieces of the severed
chain; hence the new name. A further change occurred
after St. Patrick's death. Dying at Down (493), he
was buried at Down, which then contained no church.
Subsequently the remains of St. Brigid were brought
there from Kildare, as were some relics of St. Columba
from Iona. Meanwhile the ancient Dun Cetar had
become Downpatrick, a town overshadowing all the
neighbouring towns, the capital also of the Diocese of
Down, which in process of time absorbed all the sur-
rounding sees.

Like Down, Connor, founded in 480 by St. Macnissu,
was a collection of smaller sees. These were Kilroot,
Dumattulagh, Culfeightrin, Coleraine, Inispolen,
Army, and Rashee. The date of the founding of each
of these sees is uncertain, as also the dates of their
uniting, nor can a regular succession of bishops be
discovered. By the twelfth century all the sees had
ceded to exist except Connor. Its western boundary
was then the Roe; but by the Synod of Rath-Breasail
(1118), when the number and limits of the Irish dio-
ceses were fixed, the Bann was made the western
boundary of Connor, and Down was joined to it, but
only for a brief period. In 1124 St. Malachy became
Bishop of Connor, which was separated from Down.
The two dioceses were again united in 1134, when
Malachy became Archbishop of Armagh; but when he
resigned the primacy, in 1137, he became Bishop of
Down, again dividing the two sees. This separation
was recognized by the Synod of Kells (1152), and con-
tinued till 1411, when John Cely, Bishop of Down,
was deprived for having violated his vow of chastity.
Meanwhile the annals record the death of many dis-
}
both dioceses. It is further recorded that in 831 Connor was plundered by the Danes, and Down in 942; that in 1177 Downpatrick was captured by John de Courcy, who imprisoned the bishop; that in 1183 de Courcy turned the secular canons out of the cathedral and replaced them by Benedictine monks from Clonard. In 1184 the relics of St. Patrick, St. Brigid, and St. Columba were discovered there and reinterred in the church with great solemnity; that in 1185 a great battle was fought at Connor; and that the whole extent of the two dioceses suffered grievously during the invasion of Edward Bruce.

When John O'Neill, the first Great Duke of Ulster (1177-1214), died, the union of Down with Connor in 1411, and it did not finally take effect till 1451. Since that date both dioceses, recognized as one, have remained under the rule of one bishop. During the troubled times of the Reformation and the wars of the O'Neills, the Ulster counties suffered much, though the old Faith was still maintained. But the plantation of Ulster replaced the greater number of the Catholics by English Protestants and Scotch Presbyterians. Later on, in the seventeenth century, the tide of penetration rolled over Antrim and Down, with consequent destruction of Catholic property. The Penal Laws followed; and such was the combined effect of plantation and proscription that in 1670 in the whole of Down and Connor there were but 2500 Catholic families. For nearly sixty years subsequently the diocese was ruled by vicars. When at length the pressure of Penal legislation was removed Catholicism revived rapidly. In the period from 1810 to 1840 no less than forty new Catholic churches were built. The progress thus made under Dr. Crotty (1825-1845) and Dr. Denyer (1835-45) was continued under Dr. Dorrian (1865-86) and Dr. MacAllister (1886-95); nor did any of his predecessors show greater energy and zeal than Dr. Henry, whose death occurred with such tragic suddenness early in 1908. During the nineteenth century splendid churches were built at Newtownards, Hollywood, Ballymoney, and Belfast, and on every side visible signs of Catholic progress appeared.

This prosperity is largely due to the rapid growth of Belfast. Situated on the shores of Belfast Lough, it was occupied in the sixteenth century only by a strong castle, then in the hands of the O'Neills of Clannaboy. From them it passed at the close of the century to the British Government, and in 1693 the castle and land adjoining were granted by King James to Sir Arthur Chichester. He laid out and planted a small town, which, in 1696, was made a corporation by royal charter. Its growth was slow, and during the seventeenth century it was entirely overshadowed by the neighbouring town of Carrickfergus. About 1700, Belfast had a population of 2000, and a good deal of trade; in 1757 a population of 8000. Henceforth its rise was rapid and continuous. Its population in 1811 was 174,400; in 1881, 208,422; in 1901, 255,960; and in 1911, with an enlarged city area, 348,876. It sends four members to Parliament, and is ruled by a lord mayor, fifteen aldermen, and forty-five councillors. In commerce and shipping, in trade and manufactures, it is the first city in Ireland. Catholicism has more than kept pace with the general advancement of the city. In 1708 there were but seven Catholics in Belfast, and not till 1785 was there a Catholic church. Belfast is now the episcopal seat, with ten city parishes, a diocesan seminary, and many educational and charitable institutions. Among the remarkable men of the diocese the following may be mentioned: St. Macnisse, the patron saint of Connor, and St. Malachy, the patron saint of Down; St. Tassagh, who attended St. Patrick in his last illness; St. Comgall, who founded the monastery of Bangor; St. Finian, founder of Moone; St. Colman Elia, founder of Muckamore in Antrim; St. Mochay, Bishop of Nendrum; St. Donard, Bishop of Magherna; St. Dohonha, Bishop of Connor. In the sixteenth century the notorious Miles Magrath was Bishop of Down and Connor; and in the next century the martyrputed Cornelius O'Devany, and the fighting bishop, Heber MacMahon, who also met a martyr's fate.—Statistics (1908): Parishes, 60; secular clergy, 167; regular clergy, 21; churches, 114; colleges, 2; monasteries & convents, 16; total Catholic population (1901), 164,693; total population of all creeds, 671,266.

**DOWNES (alias Bedingfeld, Mountford and Mumford), Thomas, son of Thomas Downes of Bodney in Norfolk.** In 1617, d. 21 December, 1678. His mother was Mary, daughter of John Bedingfeld of Redfield in Suffolk. He was educated at St. Omer, but completed his studies at the English College at Valladolid, and entered the Society of Jesus in January, 1639. From the novitiate he was sent to the college of the English Province at Liége, but went for his theology to Pont-à-Mousson and was professed of the four vows 16 January, 1656. In 1671 he was chaplain to the Duke of York, afterwards James II. When his uncle, the Duke of York, set sail for Canada, he asked for "Father Mumford" as confessors on board his flagship. During an encounter between the two ships Father Downes won for himself a great reputation by exposing himself for many hours to a heavy fire while ministering to the wounded and dying. In 1679 he fell a victim to the infamous Oates plot; was arrested and died at Windsor but intended to be intercepted, and purporting to have been written by the provincial and Fathers of the Society. He handed the letters to the Duke of York who showed them to the king. The
latter was convinced of the fraud, and testified openly to Father Downes's innocence, but was unable to protect him from the malice of the plotters who succeeded in getting him arrested and sent to the Gatehouse prison where he died.

J. M. STONE.

Downside Abbey, near Bath, Somersetshire, England, was founded at Douai, Flanders, under the patronage of St. Gregory the Great, in 663 by the Venerable John Roberts, first prior, and some other English monks who had received the habit and taken vows in the Spanish Benedictine Congregation. In 1611 Dom Phillip de Caverel, Abbot of Saint Vaast's at Arras, built a monastery for the community in Douai, and consequently is revered as its founder. For some years the foundation was embroiled in attacks from without, and also in disputes as to a union with other English Benedictines, all of which were settled in 1633 by the Bull “Plantata” of Urban VIII.

From the first a school or college for lay pupils, sons of English Catholic gentry, has been an integral part of the institution. This undertaking, conducted on traditional English public school lines, has always absorbed much of the energies of the community, whose other chief external work has consisted in supplying various missions or parishes in England. When Charles II established for his queen a Catholic chapel royal at St. James’s palace, the community to serve it was supplied from St. Gregory’s at Douai, and certain relics and church-plate then presented are still in existence at Downside. On the outbreak of the French Revolution the school was disbanded and the monks put in prison, where they remained nearly two years. At length in March, 1795, they were allowed to proceed to England where an asylum was supplied by Sir Edward Smythe, first Baronet, a former pupil, who lent his Shropshire seat of Acton Burnell to his old masters for use as a monastery and school. In 1814 the establishment was moved to Mount Pleasant, Downside, a small manor-house with sixty-six acres of land, bought for £7000, largely the savings of the community for this purpose, and many of the buildings now in use were purchased by the community at that time. In 1823 Dr. Baines, Vicar Apostolic of the Western District, proposed to the community that they should abandon the monastic state and become a kind of diocesan seminary under himself. This extraordinary suggestion being rejected, the bishop applied to the Holy See for the suppression of the monastery on the ground of some alleged flaw in its canonical erection; after much litigation the pope decided in favour of the monks on every point. Since then the foundation has increased steadily in size and importance, new buildings being added in 1826, 1833, and almost continually since 1870. In 1833 Pope Leo XIII raised the priory to abbacy, the forty-fifth prior, Dom Edmund Ford, being elected first abbot, on whose resignation in 1866, Dom Cuthbert Butler was chosen to succeed him.

Six monks of St. Gregory’s have died martyrs for the Catholic Faith and are already pronounced Venerable, viz. Dom George Gervaise, martyred 1608; Dom John Roberts, the first prior, 1610; Dom Maurus Scot, 1612; Dom Ambrose Barlow, 1641; Dom Philip Powell, 1646; and Brother Thomas Pickering, 1679. Besides these the community have given to the Church three archbishops, Dom Bede Folding and Dom Bede Vaughan, the first two archbishops of Sydney, New South Wales; and Dom Bernard Ullathorne, first Bishop of Birmingham and titular Archbishop of Carthage, well known as an ascetical writer. Also six bishops, Dom Philip Ellis, Dom Laurence York, and Dom Gregory Sharrock, all three successively Vicars Apostolic of the Western District; more recently, Dom Placid Morris, Vicar Apostolic of Mauritius, and for many years assistant to Cardinal Winnington, Dom Joseph Brown, first Bishop of Newport and Menevia; and Dom Henry Davis, Bishop of Maitland, New South Wales. From many other notable names may be mentioned Dom Serenus Cressy, author of the “Church History of Britain”; Dom John Huddlestone, who was instrumental in saving Charles II after Worcester and reconciled him to the Church in his death-bed; the Abbots Sweeney, the well-known preacher; Dom John Davis Vaughan, founder of the Abbey of Fort Augustus, N. B.; Dom Aidan Gasquet, the historian, Abbot President of the English Benedictines and also head of the Pontifical Commission for the revision of the Vulgate. Among the alumni of St. Gregory’s School, though not monks in the community, were Bishop Charles Walmesley, who consecrated Dr. Carroll the first Bishop of Baltimore, U. S. A.; John Stevens, editor of Dugdale’s “Monasticon”; Henry Carey, author of “God save the King”; Sir John Day, one of the best known English Carlists; and Bishop Patrick J. Donahue, of Wheeling, U. S. A.

The abbey buildings now consist of a monastery for about fifty monks; school buildings for 1340 boarders; guest-house, the original building bought in 1814; and the abbey church, for exterior view of which see The...
DOXOLOGY

Catholic Encyclopedia, I, 14. The last-named building consists at present of transept, choir, and fifteen side chapels only; it is 230 feet long, and 70 feet high internally. Even in its unfinished state it ranks as one of the finest modern Gothic buildings in England. It is the tomb of the Irish martyr, venerable Oliver Plunket, Archbishop of Armagh. The community numbers eighty-four choir monks; there are no lay brothers. About half the monks work on the twenty-two missions or parishes in various parts of England which are dependent on the abbey. Besides the school attached to the monastery, hand schools at Ealing, London, W., and at Gorey, Co. Wexford, Ireland; a house of studies for its monks at Cambridge University and another for students in London, near the British Museum. The "Downside Review", a periodical in its twenty-eighth year, devoted chiefly to local, monastic, and liturgical interests, and in which are many articles of value, is published every four months. The "Downside Masses" and "Downside Motets" indicate the abbey's interest in the revival of polyphonic music; a similar interest in Christian art being shown in the "Downside Prints", a series of small devotional pictures reproduced from ancient masters. The Abbey Church of St. Albans, and the cathedral priories of Canterbury, Bath, Coventry, and Norwich. The arms of Downside are: Or a cross moline gules; the abbot's seal bears the effigy of Bl. Richard Whiting, martyr to the faith. The last abbot of the neighbouring Abbey of Glastonbury is WELDON, Chronological Notes on English Congregations O.S.B. (privately printed, Worcester, 1881); TAYLOR, English Bishops of St. Benedict (London, 1897); H. R. B. Ho- lycross, Guide to Downside Abbey Church (London, 1905); Illustrated articles in Christian Art, I, 135; Architectural Re- view, XXII, 40; Downside Review, I—XXVIII, many articles passim.

G. ROGER HUDLESTON.

DOXOLOGY.—In general this word means a short verse praising God and beginning, as a rule, with the Greek word Δέκα. The custom of ending a rite or a hymn with such a formula comes from the Synagogue (cf. The Prayer of Manasses: tibi est gloria in saecula saeculorum. Amen.) St. Paul uses doxologies constantly (Rom., xi, 36; Gal., i, 5; Eph., ii, 21; etc.). These early examples are addressed to God the Father alone, or to Him through (θαυμά) the Son (Rom., xxvi, 27; Jude, 25; I Cem., xlii; Mart. Polyc., xx; etc.) and in (εἰς) or with (οὗ), the Holy Ghost (Mart. Polyc., xiv, xxii, etc.). The form of baptism (Matt., xxviii, 19) had set an example of naming the three Persons in parallel order. Especially in the fourth century, as a protest against Arian subordination (since heretics appealed to these prepositions; cf. St. Basil, "De Spir. Sancto", ii—v), the custom of using the "Glory to the Father, and to the Son, and to the Holy Ghost", became universal among Catholics. From this time we must distinguish two doxologies, a greater (doxologia maiores) and a shorter (minor). The greater doxology is the Gloria in Excelsis Deo (q.v.) in the Mass. The shorter form, which is the one generally referred to under the name "doxology", is given and is continued by an answer: "and it is in this effect that this glory shall last for ever. The form, els τοῦ αἰώνα τῶν αἰώνων, is very common in the first century (Rom., xxvi, 27; Gal., i, 5; I Tim., i, 17; Heb., xiii, 21; Peter iv, 11; I Cem., xx, xxxii, xxxviii, xliii, xiv, etc.; Mart. Polyc., xxii, etc.). It is a common Hebrewism (Tob., xxiii, 23; Ps. 1xxxvi, xliii, repeated in the Apocalypse: i, 6, 18; xiv, 11; xiii, 8; etc.) meaning simply "for ever". The simple form, els τοῦ αἰώνα, is also common (Rom., xi, 36; Doctr. XII Apost., ix, x; in the Liturgy of the Apostolic Constitutions, passim). Parallel forms are: els τοῦ μεγάλου αἰώνα (Mart. Polyc., xiv); καὶ γένεσ

GLOSSARY

elis γενέσ (ibid.); etc. This expression was soon enlarged into: "now and ever and in ages of ages" (cf. Heb., xiii, 8; Mart. Polyc., xiv, etc.). In this form it occurs constantly at the end of prayers in the Greek Liturgy of St. James (Brightman, Eastern Liturgies, pp. 31, 32, 33, 34, and as the last doxology of psalms, though not so invariably as with us. The second form is occasionally slightly modified and other verses are sometimes introduced between the two halves. In the Latin Rite it seems originally to have had exactly the same form as in the East. In 529 the Second Synod of Vaison (Vaison in the province of Avignon) says that the additional words, Sic est erat in principio, are used in Rome, the East, and Africa as a protest against Arianism, and orders them to be said likewise in Gaul (can. v.). As far as the East is concerned the synod is mistaken. These words have never been used in any Eastern rite and the Greek councils complained of their absence. Attached to the prayer, the tituli of the Abbey of Glastonbury are: De rebus eccl., xxv. The explanation that sicut erat in principio was meant as a denial of Arianism leads to a question whose answer is less obvious than it seems. To what do the words refer? Everything in the form now understands gloria as the subject of erat; "As it [the glory] was in the beginning, so is it now and shall He be for ever." The text usually takes clear allusion to the first words of the Fourth Gospel, and the sentence is obviously directed against Arianism. There are medieval German versions in the form: "Als er war im Anfang." The doxology in the form in which we know it has been used since about the seventh century, all over Western Christendom, except in one corner. In the Mozarabic Rite the formula is: "Gloria et honor Patri et Filio et Spiritui sancto in saecula saeculorum" (so in the Missal of this rite; see P. L., LXXV, 109, 119, etc.). The Fourth Synod of Toledo in 635 ordered the use of the form (can. xxv). The modern, medieval tradition is founded on a spurious letter of St. Jerome (in the Benedictine edition, Paris, 1700, V, 415) that Pope Damasus (366—384) introduced the Gloria Patri at the end of psalms. Cassian (died c. 435) speaks of this as a special custom of the Western Church (De instit. con., II, viii). The use of the shorter doxology in the Latin Church is this: the two parts are always said or sung as a verse with response. They occur always at the end of psalms (when several psalms are joined together as one, as the sixty-second and sixty-sixth and again the one hundred and forty-eight, one hundred and forty-ninth, and one hundred and fifty-first). At Lauda, the Gloria Patri occurs only once at the end of the group; on the other hand each group of sixteen verses of the one hundred and eighteenth psalm in the day Hours has the Gloria (except on occasions of mourning. For this reason (since the shorter doxology, like the greater one, Gloria in Excelsis Deo, is naturally a joyful chant) it is left out on the last three days of Holy Week; in the Office for the Dead its place is taken by the verses: Requiem aeternam, etc. Et lux perpetua, etc. It also occurs after antiphons, except that the Benedictine has its own doxology (Benedictus patri Patrem, Benedictus Deus, etc.). The alternative one left in the Roman Rite, etc. In the Mass it occurs after three psalms, the "Judica me" at the beginning, the fragment of the Introit-Psalm, and the "Lavabo" (omitted in Passiontide, except on feasts, and at requiem Masses). The first part only
DOYLE 151

DOYLE occurs in the *responsoria* throughout the Office, with a variable answer (the second part of the first verse) instead of "Sicut erat," the whole doxology after the "Deus in aditorium;" and in the *proces* at Prime; and again, as a one verse, at the end of the *invitatoria* at Mattins. At those places it is left off from the Office for the Dead and at the end of Holy Week. The Gloria Patri is also constantly used in extraliturgical services, such as the Rosary. It was a common custom in the Middle Ages for preachers to end services with it. In some countries, Germany especially, people make the sign of the cross on the first part of the doxology, considering it as chiefly a profession of faith.

ADRIAN FORTESCUE.

DOYLE, JAMES WARREN, Irish bishop: b. near New Ross, County Wexford, Ireland, 1786; d. Carlow, 1834. He belonged to a family, respectable but poor, and received his early education at Clonlough, at Rathconlogue, and later at the Augustinian College, New Ross. Shortly after 1800 he joined the Augustinian Order and was sent to Coimbra in Portugal; and there, at the university, first manifested his great intellectual powers. In the university library he read everything, Voltaire and Rousseau among the rest. As a consequence his faith became unsettled; but his vigorous intellect soon asserted itself, and subsequently he became the fearless champion of the Church in which he was born. During the French invasion he did serynt work at Coimbra, and accompanied the English to Lisbon as interpreter, and such was the impression he made at the Portuguese Court that he was offered high employment there. He declined the offer, however, and, returning to Ireland in 1808, was ordained priest the following year. Then for eight years he taught logic at the Augustinian College, New Ross. In 1817 he became professor at Carlow College, and two years later the priests of Kildare and Leighlin placed him *dignissimus* for the vacant see. Their choice was approved at Rome, and in 1819, Doyle became a bishop that date the effects of the Penal Laws were still visible in the conduct of the Catholics. Even the bishops, as if despairing of equality and satisfied with subjection, often allowed Protestant bigotry to assail with impunity their country and creed. This attitude of timidity and acquiescence was little to Dr. Doyle's taste, and over the signature of "J. K. L." (James, Kildare and Leighlin) he vigorously repelled an attack made on the Catholics by the Protestant Archbishop of Dublin. He also published an extremely able pamphlet on the religious and civil principles of the Irish Catholics; and a series of letters on the state of Ireland, in which the inequities of the Church Establishment, the executions of the landlords, the corrupt administration of justice were lashed with an unparrying hand. The clearness of style, the skilful marshalling of facts, the wide range of knowledge astonished all. And not less remarkable was his examination before two Parliamentary committees in London. Seeing his readiness and resource, the Duke of Wellington remarked that Doyle examined the committees rather than was examined by them. He joined the Catholic Association and wrote regularly to that body, and when Clare, Doyle addressed him a public letter hoping "that the God of truth and justice would be with him." After Emancipation these two great men frequently disagreed, but on the tithe question they were in accord, and Doyle's exhortation to the people to hate tithe as much as they loved justice became a battle-cry in the tithe war. Meantime nothing could exceed the bishop's zeal in his diocese. He established confraternities, temperance societies, and parish libraries, built churches and schools, conducted retreats, and ended many abuses which had survived the penal times. He also worked unceasingly against the then incessant war on secret societies. He died young, a martyr to faith and zeal.

L. (Dublin, 1825); Evidence Taken Before the Select Committee of the Houses of Lords and Commons, 1825-6 (London, 1825).

E. A. D'ALTON.

DOYLE JOHN, b. in Dublin, Ireland, 1797; d. in London, 2 Jan., 1808; English portrait-painter and caricaturist. This clever artist studied under Gabrielli, and Comerford, the miniature-painter. He came to London in 1821 and started as a portrait-painter, but gave his attention to producing caricatures in 1827 or 1828, and developed his well-known signature, "H. B.," by means of two sets of initials "J. D." placed one above the other. In 1829 he commenced his famous series of drawings which he continued to produce until 1851, caricaturing in brilliant style all the political movements of the day. They differ completely from the caricatures which preceded them, notably those of Rowlandson and Gillray, inasmuch as they are marked by reticence, courtesy, and a sense of good breeding. They are extraordinarily clever and at times stinging in their bitter epigrammatic quality; but Thackeray underestimated their power when he spoke of them as "genteeel" and said that they would "only produce a smile and never a laugh." There are some six hundred of them in the British Museum, and taken altogether they form a most interesting and graphic representation of the political history of England for the times. Doyle retired from professional work seventeen years before his death. He preserved his incognito to the very last and few people were aware of the fact that the initials on the caricatures formed his signature. He produced several pencil sketches of well-known personages and made use of his studies in this way in his caricatures, but the sketches themselves constitute in several instances the most life-like representations of the persons in question which exist.

GEORGE CHARLES WILLIAMSON.

DOYLE, RICHARD, English artist and caricaturist, b. in London, September, 1824; d. there 11 December, 1883. The second son of John Doyle (q. v.), he inherited much of his father's talent and exceeded the elder Doyle in skill and in power as a draughtsman. From a very early age he amused himself with making drawings. He prepared an account of the Eglinton Tournament when he was but fifteen, and at the age of sixteen commenced his famous journal, now preserved in the British Museum. The journal is a manuscript book containing many small sketches in pen and ink, executed with skill and brilliance, and marked by power of observation and by a sense of humour hardly equalled and certainly not exceeded in later years. This extraordinary work was reproduced in facsimile in 1885 with an introduction by J. H. Pollen, and is a remarkable proof of Richard Doyle's precociousness as an artist. In 1843 he drew "Punch" and contributed to the staff of that paper till 1820. He produced many cartoons, but his name will be especially remembered from the fact that he designed the cover for "Punch" which has continued in use down to the present time. He also wrote for "Punch" a series of articles entitled "Manners and Customs of ye English" A
very devout Catholic, he resigned his position on the staff of the paper in 1850 in consequence of its hostility to what was termed "papal aggression," and devoted the remainder of his career to preparing drawings for book illustration and to painting in water-colour. His chief series of illustrations were the "King of the Golden River," "In Fairyland," and "The Foreign Tour of Brown, Jones and Robinson." His water-colour drawings were marked by much poetic feeling, and were executed in harmonious low-toned schemes of colour. His genius has been well described as "kindly, frolicsome, and sportive." His life was full of imagination and delighted in romantic fancy, while his caricatures are exquisitely drawn, amusing and graceful, lacking perhaps the strength of his father's works but far exceeding them in charm and in quality of sentiment. There are many of his drawings in the British Museum, and some of his sketch-books are in the Fitzwilliam Museum at Cambridge.

George Charles Williamson.

Drach, David Paul, convert from Judaism, b. at Strasburg, 6 March, 1791; d. end of January, 1868, at Rome. Rosenthal's "Convvertiten bild" (III, 48) prefaces the autobiography of Drach with the following words: "The conversion of this learned Jewish proselyte is undoubtedly one of the most important conversions witnessed by the grace of God during this century in France and became the source of salvation to many of his coreligionists." This conversion, affecting one who enjoyed the highest esteem as an author and a learned rabbi, produced a most profound influence on all the honest and earnest minds of the rising generation and inspired them to do the more serious problems of life. His endeavours to lead his coreligionists to the fountain of truth, to the acknowledgment of Jesus as the real and true Messiah, crystalized in numerous writings and were blessed by God. Herein lies the net result of this scholar's conversion.

Drach received his first instruction at the hands of his father, a renowned Hebraist and Talmudic scholar, whose linguistic talents the son inherited. At the age of twelve Drach entered the first division of the Talmudic school in Edendorf near Strasburg. This course was completed in one year, and entered the second division of the Talmudic school in Bischheim in the following year. He graduated in eighteen months and then matriculated in Westphala to qualify as a teacher of the Talmud. When only sixteen years of age he accepted the position of instructor at Rappoltsweiler, remaining there three years; afterwards he followed the same profession in Colmar. Here the ambitious youth devoted himself zealously to the study of secular sciences to which he had already seriously applied himself while prosecuting his Talmudic studies. Having obtained the rather unwilling permission of his father, he went to Paris, where he received a call to a prominent position in the Central Jewish Consistory and at the same time fulfilled the duties of tutor in the household of a distinguished Jew. The marked result of this method of teaching induced even Christian families to entrust their children to his care. It was under these circumstances that he received the first impulse towards a change of his religious views which ultimately resulted in his conversion. He writes: "Stirred by the edifying examples of Catholic piety before me and by the consciousness of my own salvation, the tendency towards Christianity, born in earlier life, acquired such strength that I resisted no longer." He now applied himself studiously to patristical theology and specialized in the study of the Septuagint with a view towards ascertaining the truth of the unanimous reproach of the Fathers, viz. that the Jews had falsified the Hebrew text. These studies resulted in his unquestioned belief in the Divinity and Messiahship of Jesus Christ. On Maundy Thursday, 1825, he renounced Judaism in the presence of Archbishop Quellen. On the following (Holy) Saturday, and on Easter morning received his first Holy Communion and the Sacrament of Confirmation. Two daughters and an infant son were also baptized. His wife, the only member of the family who adhered stanchly to the old faith, abducted the children. They were returned, however, after two years.

After a few years Drach went to Rome, where he was appointed librarian of the Propaganda (1827), which office he held at his death. Among the many converts who trace their conversion to the influence of Drach's example are the Libermann brothers; Franz Maria Paul Libermann was especially indebted to the influence of Drach for his sound advice and active assistance in the establishment of the "Congregation of the Immaculate Heart of Mary." Of Drach's numerous writings the following deserves particular mention: Lettres d'un rabbin converti aux Israélites, ses frères (Paris, 1848). He wrote, moreover, "Du divorce dans l'Eglise" (Paris, 1846), and published the "Bible de Venise," with annotations (Paris, 1827-1833) in 27 volumes octavo. He remodelled the Hebrew-Latin Dictionary of Gesenius, and published a Catholic Hebrew-Chaldaic dictionary of the Old Testament (ed. Migne, Paris, 1848). He wrote, moreover, "De l'Harmonie entre l'Eglise et la synagogue" (Paris, 1844); and "La Cabale des Hebreux" (Rome, 1861).

Paul Augustin, son of the preceding, b. 12 Aug., 1817; d. 20 Oct., 1865; canon of Notre-Dame and exlegate of importance. He studied at the Propaganda College in Rome, and in 1846. We owe to him a large French Bible commentary (La Sainte Bible, Paris, 1869) in which he himself wrote the Pauline Epistles (1871), the Catholic Epistles (1879), and the Apocalypse (1879). Rosenthal, Conversations, III, 48; Gruber in Kirchenez., III, 2011; Houter, Nomenclator; Peters, Life of the Ven. Servant of God, Franz Maria Paul Libermann, Ger. tr. Müller (Stuttgart, 1889).

N. Scheid.

Drachma (Gr. δραχμή), a Greek silver coin. The Greeks derived the word from ἄθροισις, "to grip," "to take a handful"; cf. ἄθροισμα, manipulus, "a handful." Thus the term originally signified a handful of grain (Liddell and Scott; Riemh, "Handwörterbuch"; Smith, "Dict. of Antiq."); but in Vigouroux, "Dict. de la Bible," the term is derived from darag-mana, the name of a Persian coin equivalent to the Hebrew דָּרָג, daragmemon. The Persian word darag, Assyrian darku, means "degree," "division." Thus the words darag-mana and drachma would signify a part of a mina. The darag-mana was also called a Daric because it was first struck by the emperor Darius Hystaspis. The drachma contained six obols. It was the fourth part of a stater, the hundredth part of a mina, and the six-thousandth part of a talent. The precise value of the drachma differed at various times. The two principal standards of currency in the Grecian states were the Attic and the Æginetan. The Attic drachma had the greater circulation after the time of Alexander the Great. It's weight was about 66 grains, its value was a little less than twenty cents (nine pence, three farthings), and its size was about that of a quarter. On the one side it had the head of Minerva, and on the reverse her emblem, the owl, surrounded by a crown of laurels. The Æginetan drachma weighed about 92 grains and was twice the weight of the second Attic drachma. It was current in the Peloponnese (Corinth excepted, Riemh, "Handwörterbuch") and in Macedonia until Alexander the Great. The drachma is mentioned in the Old Testament (II Macabees,
DRAONITUS

xii, 43), when Judas sends 12,000 drachmas to Jerusalem that sacrifices may be offered for the dead. In the New Testament (Luke, xv, 8, 9), Christ used the word in the parable of the woman that has ten drachmas (D. V. "groats") and loses one.

C. VAN DEN BIESSEN.

Dracnonius, BLOSSIUS ÁMILIV, a Christian poet of the fifth century. Dracnonius belonged to a distinguished family of Carthage and was the pupil of a man of much more distinguished name, Pelissonus. He was called clarissimus (most illustrious), won the favour of the proconsul Pacideius, and led a prosperous life by means of inherited riches and the income of his law practice until he incurred the ill will of the Vandal king, Gunthamund. The cause of this misfortune seems to have been the expression of sentiments of Romano-Byzantine patriotism; for these utterances Dracnonius suffered a long imprisonment. Nothing more is known of his history except that he was still alive when Thrasamund ascended the throne in 496.

His works are the "Romules", three books on God ("Deus""); and a poem entitled "Satisfactorius." The latter two were written in prison; the first-mentioned is a collection of pieces composed at various times and written in the style of rhetorical school-exercises. Thus, one of these poems represents a rich man and a poor man as enemies; as a reward for the exploits of the rich man his statue is erected in the public square and accorded the right of sanctuary. Later, in recompense for additional services, the rich man asks for the head of the poor one, whereupon the latter flees to the statue for safety and a formal process ensues. In another poem Achilles deliberates as to whether or not he shall sell the body of Hector. Dracnonius deals with themes of his own day, as in the eulogy on his former teacher, and the "Epithalamia" for two couples who were friends, his style is occasionally less conventional. The writings forming the "Romules" contain but little suggestion of a Christian poet; on the other hand, the "Satisfactorius" and the "De laudibus Dei" manifest an ardent and sometimes eloquent faith. The "Satisfactorius," written about 490, was intended to be instrumental in obtaining the royal pardon; the "De laudibus Dei", produced between 486 and 496, is a recital of God's benefits. The first book of the "De laudibus Dei" has for its theme a description of the creation; the chief theme of the second is the Incarnation and the Redemption; it also contains vehement attacks on Arianism; the third compares, by appropriate examples, the hope of the Christian who denies himself in order to love God with the cheerless prospect of the pagan who counts on no future reward. This poem, like the others, is full of ideas taken from other sources; the episodes drawn from the Bible, profane history, and mythology are as varied as the textual reminiscences of the Latin poets, both classical and pagan. However, the excellent pupil of Pelissonus was not a thorough master of Latin diction and prosody; his writings give frequent evidence in their form of the surrounding barbarism.

The collection named "Romules" is incomplete. Particularly when the two contain a small poem on the nut and the other on the origin of the rose; perhaps, further, the "Orestis tragedie", which is a called tragedy, though in reality it an epic poem of some thousand verses, wherein the author follows a unique ancient version of the myth; finally, though with characteristic industry, the "De laudibus Dei" (Perdica's Malady). The subject of this little poem of 290 hexameters is interesting from the point of view of folklore. Perdica, a student of Athens, has neglected the worship of Venus and by way of revenge this goddes inspires him with a guilty love for his mother, Castalia. Perdica falls into a decline and his physicians are unable to understand his ailment, but Hippocrates, who ascertains that Perdica's heart beats more violently when Castalia approaches, recognizes the real nature of the malady. There is no remedy for the grave and Perdica hangs himself (see Rohde, Der griech. Roman, p. 54). The works of Dracnonius were not known in their real form until 1791 and 1873. His Christian poems were very popular in the sixth and seventh centuries. They were revised by Eugenius, Bishop of Toledo (d. 657), but these revisions made great changes in the author's statements. What Eugenius omitted he altered and he corrected the doctrine of Dracnonius. The latter had said that God deliberately created good and evil at the same time (Satisfactorius, 15); Eugenius made him say that God tolerated evil. It was in this recession that both the Christian poems were known until 1791. The larger part of the secular poems of Dracnonius were first published in 1873.

PAUL LEJAY.

Drane, Auguste Theodosia, in religion Mother Francis Raphael, O.S.D.; b. at Bromley near London, in 1823; d. at Stone, Staffordshire, 29 April, 1894. Her parents were both Protustants, her father being managing partner in an East India mercantile house. Her remarkable natural gifts were developed by wide reading at a very early age. In 1837 she moved with her family to Babbocombe, Devonshire, where she read much of the early literature of the Oxford Movement. Burnet's "History of the Reformation," she declared, was the real cause of her conversion. It was not, however, till 1847 that she grew uneasy as to her religious beliefs, whereupon she consulted Keble and Pusey, but without satisfaction. The influence of Maskell, then Vicar of St. Mary Church, helped her more and she confided to him a scheme called "Ideal of a Religious Order." He told her that such an order existed in the Catholic Church, naming the Third Order of St. Dominic. This made a profound impression on her mind and gradually she was drawn to the Church. She was received at Tiverton, 3 July, 1850, and in 1852 entered the Third Order of St. Dominic at Clifton. On 8 Dec., 1853, she was professed at the new convent of Stone, Staffordshire, and was there employed in teaching and in writing various books, meanwhile making great spiritual progress. In 1860 she was appointed mistress of novices, but in 1866 became mistress of studies instead, thus obtaining more leisure for writing. In 1872 she became prioress under her friend, Mother Imelda Poole, and on the death of the latter in 1881 succeeded her as provincial (25 Nov., 1881), thus taking charge of the whole congregation and its convents. In 1887 she was elected the Third Order of St. Dominic at Clifton. Drane was well known in the religious world and her books were much read. She was a fine writer and had a gift of narrative power which enabled her to make a large impression on her contemporaries. Her works include: "The Morality of Tractarianism" (1860), published anonymously, "Catholic Legends and Stories" (1857), "Knights of St. John" (1858), "Three Clergymen, Wykeham, Waynflete and More" (1859); "Historical Tales" (1862); "Tales and Traditions" (1862); "History of England for Family Use" (1864);
dreams recorded in the annals of King Asshurbanipal. From these documents we learn that Asshur appeared in a dream to Gyges, King of Lydia, and said to him: "Embrace the feet of Asshurbanipal, King of Assyria, and thou shalt conquer thy enemies by his name." Asshurbanipal then sent to the Assyrian ruler to narrate this dream and pay him homage, and henceforth succeeded in conquering the Kimmians. Another passage relates that, in the course of an expedition against Elam, as the Assyrian troops were afraid to cross the Titi River, Istar of Artaba appeared to them in their sleep and said: "Go before Asshurbanipal, the king whom my hands have made." Encouraged by this vision, the army crossed the river ("West, As. Inschr.", vol. III; G. Smith, "Hist. of Asshurbanipal"). The Divinely sent dream might also at times foreshow some coming event. Moreover, its meaning was not always clear and might be shrouded in symbols, or, if conveyed through oral communication, wrapped up in figures of speech. In either case, the knowledge of the significance of the dream would depend on the interpretation. And as most dreams portend no clear message, the task of unfolding dream symbols and figures gradually grew into an art, more or less associated with soothsaying. Elaborate rules were laid down and handbooks compiled for the guidance of the priests in explaining the portent of the visions and symbols perceived by the inquirer in his sleep.

Many such manuals have been found in Assyria and Babylonia, the contents of which enable us to understand the principles followed in dream-interpretation. From Dan., ii, 2 sqq., it would seem that the paterim, or dream-interpreters, might be called upon even to discharge the perplexing task of recalling dreams forgotten by the dreamer. The instance here recorded may, however, be more typically illustrative of the context distinctly intimates that this task, impossible "except to the gods", yet imposed upon the Babylonian diviners by a whim of the king, was beyond the acknowledged attributions. Most of the Egyptian magic books likewise contain instructions either to procure or to explain dreams. These incantations had to be recited according to fixed cantillations, and the soothsayer's art consisted in knowing them thoroughly, copying them faithfully, and applying them properly. Side by side with this religious view of dreams, which regarded them as the expression of the will of the god, there existed the superstitious view, according to which all dreams were considered as omens. Assuming "that things causally connected in thought are causally connected in fact" (Jevons), people blindly believed that their dreams had a bearing on their own fate, and eagerly strove to discover its significance.

Like the Eastern peoples, the Greeks and the Romans attached a religious significance to dreams. Of this belief many traces may be found in classical literature. Homer and Herodotus thought it natural that the gods should send dreams to men, even to deceive them, if needs be, for the accomplishment of their higher ends (Agamemnon's dream). The same indications may be found also in the works of the dramatists (e.g. Clytemnestra's dream in the "Agamemnon" of Eschylus). Plato, whilst regarding it as inconceivable that a god should deceive men, acknowledged less that dreams may come from the gods (Tim., cxvi, xliv). Aristotle was similarly of the opinion that there is a divinatory value in dreams (De Divin. per somn., ii). The teaching of the Stoics was along the same lines. If the gods, they said, love man and are his protectors, then of course they might be expected to disclose their purposes to man in sleep. Finally, in Greece and Rome, as well as in the East, the popular views of dreams went a great deal farther and developed into superstition. It was in accordance with these views, and to gratify the cravings which they
created, that Daldianus Artemidorus compiled his "Oneirocritica", in which rules were laid down whereby any one could interpret his own dreams.

In the light of the beliefs and practices of the ancient peoples, we are better able to judge the belief and practice recorded in the Bible. That God made man into communication with man through dreams is asserted in Num., xiii, 6, and still more explicitly in Job, xxxii, 14 sqq.: "God speaketh once, ... By a dream in a vision by night, when deep sleep falleth upon men, and they are sleeping in their beds; then he openeth the ears of men, and teacheth them what they are to learn." As a matter of fact, dream-revelation through dreams occurs frequently in the Old and in the New Testament. In most of the cases recorded the dream is expressly said to come from God; of this description are, e.g., the dreams of Abimelech (Gen., xx, 3); of Jacob (Gen., xxviii, 12; xxxi, 10); of Solomon (III K., iii, 5-15); of Nabuchodonosor (Dan., ii, 19); of Daniel (Dan., vii, 1); of Joseph (Matth., i, 20; ii, 13); of St. Paul (Acts, xxiii, 11; xxvii, 23), unless we should interpret these passages as referring to visions granted to the Apostles while awake. God is said to appear Himself only in a few instances, as in the case of Abimelech, to Jacob, to Solomon, and to Daniel, if, as is generally admitted, the "Ancient of days", spoken of in this connexion, should be understood to be God; in other instances He is said to speak through an angel, as in the dreams narrated by St. Matthew and St. Paul. The Bible records other dreams, which, though prophetic, are not distinctly said to come from God (Gen., xxvii, 6; xI, 5; xii, 1; Judges, vii, 13; II Mach., xv, 11). It appears, however, from the circumstances and from their prophetic import, that their Divine origin cannot be doubted; at least their interpretation is declared (Gen., xi, 8) to "be to God". Accepting the historical truth of these facts, there is no reason indeed why God should not use dreams as a means of manifesting His will to man. God is omniscient and all-powerful, and He loves man; He may, therefore, in order to disclose his purposes, choose natural as well as supernatural means. Now dreaming, as a natural psycho-physiological phenomenon, has undoubtedly its laws, which, however obscure they may be to man, are established by God, and obey His bidding. But since man may be easily deceived, it is needful that God in using natural causes should supply such evidences as will make His intervention unmistakable. Sometimes these evidences are manifested to the dreamer, at other times to the interpreter, if one be necessary; but they will never fail. The analogy of the foregoing reasons with those which brought forward by theologians to prove the possibility of revelation is readily perceived. In fact, there is here more than a mere analogy; for communication by dreams is but one of the many ways God may select to manifest His designs to man; there is between them a relation of species to genus, and one could not deny either without denying the possibility of a supernatural order.

All the dreams actually recorded in Holy Writ came unsought. Some scholars infer from the words of Saul (I K., xxviii, 15): "God is departed from me, and would not hear me, neither by the hand of prophets, nor by dreams", that the practice of deliberately seeking supernatural dreams was not approved of by God. The words just quoted, however, do not necessarily imply such a meaning, but may as well be interpreted of unsought prophetic dreams. Still less can it be asserted that the Israelites would seek prophetic dreams by resorting to a well-known sanctuary and sleeping there. The two instances adduced in connection with them are the dream of Jacob at Bethel (Gen., xxviii, 12-19) and that of Solomon at Gabaon (III K., iii, 5-15), do not bear out such an affirmation. In both cases the dream, far from being sought, was unexpected; moreover, with regard to the former, it is evident from the narration that Jacob was quite unaware beforehand of the holiness of the place he slept in. His inference on the next morning as to its sacredness was inspired by the object of the dream, and his conduct in this circumstance seems even to betray some fear of having unknowingly defiled it by sleeping there.

It should not be concluded from the above remarks that there were no errors with regard to dreams and dream-interpretation in the minds of individual Israelites. Like their neighbours, they had a tendency to consider all dreams as omens, and attach importance to their interpretation. This tendency was constantly held in check by the more enlightened, and more religious part of the nation. Besides the prohibition to "observe dreams", embodied in the Law (Lev., xix, 26; Deut., xviii, 10), the Prophets, from the eighth century B. C. onwards, repeatedly warned the people against giving "heed to their dreams which they dream" (Jer., xxviii, 3). "Dreams follow many cares", says Ecclesiastes (v, 2); and Ben Sirach wisely adds that "dreams have deceived many, and they have failed that put their trust in them" (Eccles., xxxiv, 7). This was, according to II Par., xxxiii, 6, one of the faults which brought about the downfall of Manasses. Above all, the Israelites were ever on their guard to explain every dream in every manner against trusting in the pretended dreams of false prophets: "Behold, I am against the prophets that have lying dreams, saith the Lord" (Jer., xxiii, 32; cf. Zach., x, 2, etc.). From these and other indications it appears clear that the religious Israelites were kept pure from superstition connected with dreams. True, a mere glance at the respective dates of the above-quoted passages suggests that the zeal of the prophets was of little avail, at least for certain classes of people. The evil opposed by them continued in every age and even after the Exile. But it is scarcely necessary to remark how unjust it would be to hold the Jewish religious responsibility for the abuses of individual persons. Neither did there exist at any time in Israel a class of diviners making it their business to interpret the dreams of their countrymen; there were no soothsayers among the temple-officials, nor later around the synagogues. The very few dream-interpreters spoken of in the Bible, as Joseph and Daniel, were especially commissioned by God in exceptional circumstances. Nor did they resort to natural skill or art; their interpretations were suggested to them by the Divine Intellect enlightening their minds: "interpretation belongs to God", as Joseph declared to his fellow-prisoners. Undoubtedly there were among the people some soothsayers ever ready to profit by the curiosity of weaker and credulous minds; but as they possessed no authority and as they were condemned both by God and by the higher religious consciousness of the community, they practised their art in secret.

That certain dreams may be caused by God seemed to be acknowledged without controversy by the early fathers of the Church and the ecclesiastical writers. This opinion they based mainly on Biblical authority; occasionally they appealed to the authority of classical writers. Agreeably to this doctrine, it was admitted likewise that the interpretation of supernatural dreams belongs to God who sends them, and who must manifest it either to the dreamer or to the interpreter. The divine intervention in man's dreams is an exceptional occurrence; dreaming, on the contrary, is a most common fact. We may inquire, therefore, how the official guardians of the Faith viewed ordinary and natural dreams. In general they held that the prohibitions and warnings of the Old Testament, and denounced in particular the superstitious tendency to consider dreams as omens. It may suffice in this connexion to recall the names of St Cyril of Jerusalem, St. Gregory of Nyssa, and St. Gregory the Great, whose teaching on the
question at issue is clear and emphatic. A few, however, held opinions somewhat at variance with the traditional view. Among them the most noteworthy is Symposius of Cyrene (about 370-413), who is the author of a very strange treatise on dreams. Starting from a Platonic anthropological trichotomy—emanation from certain archetypical hypostases of Plato and Plotinus, he attributed to the imagination a manifestly exaggerated role. Above all the arts of divination, the lawful use of which he did not seem to doubt, he extolled dreaming as the simplest and surest mode of prophesying. We know that he had accepted the episcopal only on the condition that he might continue to hold certain favourite philosophic ideas; and it is reasonable to suppose that his theories on dreams were included in the compact. Medieval theologians added to the reasonings of their predecessors a more careful, and to some extent more scientific, study of the phenomena of sleep; but they found no reason to depart from the moral principles contained in the writings of the Fathers. Sufficient here to quote St. Thomas Aquinas, who summarizes the best teaching of the Schoolmen. To the query: Is divination through dreams unlawful?—he replies: The question consists in determining the cause of dreams, and examining whether the same may be the cause of future events, or at least come to the actual knowledge of them. Dreams come sometimes from internal, and sometimes from external, causes. Two kinds of internal causes influence our dreams: one and which is such as such images remain in a sleeper's fantasy as were dictated upon by him while awake; the other found in the body: it is indeed a well-known fact that the actual disposition of the body causes a reaction on the fancy. Now it is self-evident that neither of these causes has any influence on individual events; and dreams may be the effects of a twofold external cause. This is corporeal when external agencies, such as the atmospheric conditions or others, act on the imagination of the sleeper. Finally dreams may be caused by spiritual agents, such as God, directly, or indirectly through his angels, and the devil. It is easy to conclude thence what chance there is to know the future from dreams, and when divination will be lawful or unlawful (11-12, Q. 95, a. 6). Modern theologians, whilst profiting by the progress of psychological research, are of the opinion that dreams are supernatural in their origin, and consequently the possibility of dream-interpretation depending on supernatural communications. As to ordinary dreams, they readily grant that, because the imaginative faculties of man acquire sometimes a keenness which they do not possess otherwise, it is possible in such cases to conjecture with a certain degree of probability some future events; but in all other cases, by far the most common, it is useless and illogical to attempt any interpretation. As a matter of fact dreams are now—we speak of civilized peoples—seldom heeded; only very ignorant and superstitious persons ponder over the "dictionary of dreams" and the "keys to the interpretation of dreams" once so much in favour. "As idle as a dream" has become a proverb expressive of the popular mind; and the indicating sufficiently that there is little need nowadays to revive the last. Enrons enacted in past ages against divination through dreams.

DRECHSEL

DRECHSEL (also DREXELUS or DREXEL), JEREMIAH, poetical writer, b. at Augsburg, 13 August, 1581; entered the Society of Jesus 27 July, 1608; d. at Munich, 19 April, 1638. He was professor of humanities and rhetoric at Augsburg and Dillingen, and for twenty-three years court preacher to the Elector of Bavaria. His writings enjoyed an immense popularity. Chief among them are his "Considerationes in Lumen Eternitatis" (Munich, 1620), of which there were nine editions; in addition to these he published 3200 copies in Latin and 4200 in German. It was also translated into English (Cambridge, 1632; Oxford, 1661; London, 1710 and 1714) and into Polish, French, and Italian. His "Zodiacus Christianus" or "The Twelve Signs of Predestination" (Munich, 1622), is another famous book, but there seem to have been an edition anterior to this; in 1642 eight editions had already been issued and it was translated into several European languages. "The Guardian Angel's Clock" was issued first at Munich, 1622, and went through seven editions in twenty years; it was also translated extensively. "Nietzs seu Triumphata conscientia" (Munich, 1624) was dedicated to the sodalist of a dozen or more cities which he names on the title page; "Trium vagus" was printed in the same year and place; "Heliotropium" or "Conformity of the Human with the Divine Will" came out in 1627; "Death of the Magistrate" bears the date of 1627. His fancy for odd titles shows itself in other books also. Thus there are the "Gymnasium of Patience"; "Orbis Phaeon, hoc est de universis vitis Linguarum". The only work he wrote in German was entitled "Tugendtspregel oder Kleinodschutz" (Munich, 1636). He has also a "Catholic Politecum"; "Rosicrucianism virtutum"; "Rhetorica Cœlestis"; "Gazophylacium Christi". There are in all thirty-four such books. Other works are: "Res bellicae expediitionis Maximilliani" (1620), and some odes and sermons.

DREXEL, bibliographia de c. de J., 1646-55; Sommervogel, Bibl. de la c. de J., III, 181 sqq.

T. J. CAMPBELL

Dresden, the capital of the Kingdom of Saxony and the residence of the royal family, is situated on both sides of the Elbe, which is here crossed by five bridges, and is surrounded by pleasing heights. Including the suburbs which now form a part of it, the city contained (1 December, 1905) 510,996 inhabitants, of whom 462,108 were Evangelical Lutherans, 43,929 Catholic, 4,079 Catholics, 3451 Jews, etc. Dresden is the residence of the vicar Apostolic for Saxony, and is the seat of the Catholic ecclesiastical consistory and of the vicarial court. In 1907 there were in Dresden 24 ecclesiasties, including the vicar apostolic, who is a titular bishop, 7 other bishops, and 1 military chaplain. Dresden has 6 Catholic parish churches, of which 2 are only chapels, 1 garrison church, which is also used for Protestant worship, the church attached to St. Joseph's Institute, built in 1746, and 6 chapels. The most important of these edifices is the court church, one of the finest Rococo structures of Germany. It was built by the Italian master-builder, Gaetano Chiaveri, in the years 1739-51, for Frederick Augustus II (1733-63). The church has a finely painted ceiling, a high altar with altar-painting by Raphael Mengs, and valuable silver ornamentation; since 1823 the body of the royal family have been buried in the crypt. Among the other churches should be mentioned the parish church of Dresden-Neustadt, built, 1852-58, in Romanesque style and containing finely painted windows, and the chapel in the royal palace.

The Catholic schools of Dresden consist of a pro gymnasium with 4 ecclesiastical teachers and about 70 scholars, 1 middle-class school with nearly 300 scholars, and 5 district schools with 3300 pupils. For girls there are also St. Joseph's Institute, founded in 1746 by Maria Josepha, wife of King Augustus III, to give poor Catholic girls food, clothing, and instruction.
and the institution for noble young ladies, founded in 1761 by Freiherr von Burkersroda, in which Catholic young women of noble birth receive a home and an education. As houses of male orders are forbidden throughout Saxony, Dresden has only convents of female congregations; these are: 2 houses of Grey Sisters who have charge of a hospital, St. Joseph's Institute, a home for servants, 2 kitchens for the poor, etc.; 1 convent of the Sisters of St. Charles Borromeo, which conduct the Amalia home and a boarding home for working-women. Among the Catholic societies of Dresden should be mentioned: the Catholic Press Association, the Teachers' Association, 2 workingmen's societies, the People's Association (Volkverein) of Catholic Germany, the journeyman's society (Gesel-

DRESDEN

Hersfeld laid claim to Dresden; in 1319 the city finally came into the possession of the margraves. Margrave Wilhelm I made Dresden his place of residence; he enlarged the castle, granted the rights of a city to the old settlement called Alt-Dresden (Old Dresden) on the right bank of the Elbe, and founded there in 1404 a monastery of Hermits of St. Augustine. The intention of this ruler to establish a cathedral chapter in Dresden was not, however, carried out. In 1449 the city was besieged by the Hussites and badly damaged. Among the most remarkable events of the following period was the presence at Dresden of St. John Capistran, who in 1452 preached repentance here with great success.

When the lands of the House of Wettin were divided

COURT CHURCH (1751) and PALACE (1534), DRESDEN.

lenverein) which carries on a boarding home, the Merchants' Association, 3 associations for youths, 2 societies of St. Charles Borromeo, the Catholic Casino, and 20 religious societies and brotherhoods. The only Catholic daily newspaper for Dresden and Saxony is the "Sächsische Volkszeitung".

Dresden was originally a village of the Sorbs, who in the sixth century settled on both sides of the Elbe. In the tenth century the territory was conquered by the Germans, and the Diocese of Meissen (see MEISEN) was erected in 968 for the conversion of the pagan Sorbs. The first church of Dresden, the church of Our Lady, was built about 1080. Towards the end of the twelfth century the Germans made a settlement, not far from the Sorbs, which is first mentioned in a deed of 1206 and is spoken of as a city as early as 1216. This new settlement, which gradually absorbed the other, received many privileges and rights from Margrave Heinrich the Illustrious (1230-88). The edifices still existing, which were founded in the time of this ruler are: the St. Maternus infirmary, the St. Bartholomew infirmary, the Franciscan monastery, the church of which forms part of the present Protestant church of St. Sophia, and the church of the Holy Cross, which in 1234 received a piece of the True Cross and consequently became a great resort for pilgrims. After the death of Heinrich, besides the Margrave of Meissen, both the Bishop of Meissen and the monastery of in 1485 between the two brothers, Albrecht and Ernst, Dresden was included in the possessions of Albrecht, to whose successors it has ever since belonged. Soon after this, in 1491, a great fire laid waste the city, burning to the ground the church of the Holy Cross and 270 houses, but the town recovered quickly. The city developed rapidly under Duke George the Bearded (1500-39), who was a strong opponent of the religious innovations of Luther. Soon after his death, however, his brother Heinrich introduced the Reformation into Dresden (1539). The monasteries of the Franciscans and Augustinians were suppressed; twenty-seven altars of the church of the Holy Cross were destroyed and the paintings were removed; the vessels of gold and silver were taken from the churches by the council, and the holding of Catholic church services was soon after this entirely forbidden.

During the reign of Duke Maurice, who attained the electoral dignity, the two towns were consolidated in 1550; in the time of Maurice and his successors Dresden became one of the most beautiful cities of Germany. After the sufferings of the Thirty Years War Dresden was adorned by its rulers, Johann Georg, Augustus the Strong, and Frederick Augustus II, with fine edifices and numerous treasures of art, so that it competed with Paris in its attractions. The Seven Years War brought intense misery to the city, the population of which fell from 65,000 to the fourth part of
DREVES

this number. Scarcely had the place recovered when the Napoleonic Wars with their enormous burdens, to which hunger and disease were added, again brought the greatest suffering on the city. After the Wars of Liberation the development of the city steadily progressed until it was interrupted again by the Revolution of 1849 which led to the erection of barricades and to bloody strife. Since then there has been a constant and rapid growth of the city, which rivals the other great centres of the German Empire in elegance and beauty and in the activity of its industries and commerce.

After the introduction of the Reformation into Dresden Catholicism could not exist openly. Catholics were forbidden to settle in it even as late as 1820; the few Catholics who lived there could only hear Mass in the chapel of the imperial embassy. This oppressed condition of the Catholics was not much improved when Augustus the Strong in 1697 became a convert; he gave the chapel of the hunting castle Moritzburg for Catholic worship, and in 1708 the court church of the Holy Trinity was consecrated; but public church services were still forbidden to Catholics. It was not until 1780, with the Concordat of 11 December, that the Catholics of Saxony were granted the same freedom of worship as the Lutherans and that the Catholic and Protestant subjects of the king received the same civil and political rights. Since this date the Catholic Church in Dresden has increased, though slowly, as the justification of the principle of the unimpaired supremacy of the church family, is strongly Protestant and has little toleration for the Church; thus, for example, the founding of monasteries is forbidden by the Constitution of 1831. The losses of the Church in Dresden annually exceed the conversions more than tenfold.

DREYES, LEBRECHT BLÜCHER, poet, b. at Hamburg, Germany, 12 September, 1816; d. at Feldkirch, 19 Dec., 1870. The famous Prussian General Blücher was his baptismal sponsor, whence his name. At fifteen he wrote German and Latin poems faultless in rhyme and metre. Four years later he submitted a good-sized volume of poems to the critical judgment of A. von Chamisso and Gustav Schwab, and both expressed favourable opinions. This was followed shortly by another volume entitled "Lyrische Anklänge" (Lyric Melodies), and although these "melodies" were largely on the music of his favourite authors, Chamisso, Uhland, Heine, Rückert, Schwab, and others, they were not devoid of a sweetness all their own. His studies in jurisprudence were prosecuted during the three succeeding years and rewarded by the degree of doctor of laws summa cum laude, failed to extinguish the love of his favourite study of poetry. Another volume, entitled "Vigilien" (Vigils), fulfilled the earlier promises of this child-phenomenon. About this time, however, the seamy side of life pressed itself on him, troubled growing space with financial difficulties in the young lawyer's family. Hitherto, although a strict Protestant, his entire religion had been summed up in the word poetry. Impending poverty destroyed this rather roseate view. His mental and bodily troubles, however, were more or less dissipated by his reception into the Catholic church on Candlemas Day, 1846. A subsequent appointment as notary raised him above immediate want. It was during these darker periods that he was most prolific as an author. In 1843 he had already published anonymously a third volume of poems "Schlichte Lieder" (Unpretentious Songs) embodying his battle-songs, "Lieder eines Hanseaten". Precedous to this, when unhampered by the dread of poverty, he had written (1868) the two-act comedy "Der Lebensretter" (The Life-Saver) inscribing it: "A manuscript printed for (improved) private theatricals".

The change of view involved in his conversion brought him two advantages, a loftier conception of his literary work and an enlarged circle of friends. His "Lieder der Kirche" (Church Hymns) paved his way to becoming a model translator of hymns (2d ed., 1868). He also dedicated his virile pen to the cause of religion in his native town by writing a "History of the Catholic Congregations in Hamburg and Altona". He likewise translated the "Nachtgallenlied" by the Pseudo-Bonaventura and St. Rembert's Life of St. Thomas Aquinas, Apostle of Clergy. He undertook the thankless task of editing (1867) the important periodical of the history of his native city in the "Annuaire Missionis Hamburgensis 1589-1781". About this time he revised and republished his own poetical works. This work was made easy for him by the advice of his wife who had become a friend. Meantime he had become the father of a happy family, and to secure for his promising son a good education he determined to remove to Feldkirch in the Vorarlberg. To compensate for the loss of his friend von Eichendorff he gained a new one, the poet Father Gall Morel. The most distinguished of his children is his son, Dr. G. Drevet, editor of the "Analecta hymnica mediæ ævi", a vast collection of medieval hymnology, which has already reached its fiftieth volume.

DREYFUS, LEON, Convitsbilder (autobiography). I, 636-638; KREITEN, Lebrecht Drevet, ein Lebensbild (Freiburg in Br. 1907); SCHEID, Dichterstimmern der Gegenwart (1903). N. SCHEID.

Drevet Family, The, were the leading portrait engravers of France for over a hundred years. Their fame began with Pierre, and was sustained by his son, the celebrated Imbert, and his nephew, Charles-Drevet, the Elder, b. at Loire in the Lyonnais in 1663; d. in Paris, 1738, was the son of Estienne Drevet, a man of excellent family, and began his studies with Germain Audran at Lyons, continuing them with Gérard Audran in Paris. So rapid was his progress, so quickly did he imitate and assimilate knowledge, and with such precision and delicacy did he manage the graver, that in 1696 he was made court engraver. In 1707 he was admitted to membership in the Académie des Beaux-Arts, his reception picture being an engraving of Robert de Cotte.

Bargues' portraits were held in high favour at the end of the seventeenth century and Drevet was the first to encounter and surmount the difficulties of translating into black and white the natural appearance of texture and materials which the brilliant oils readily presented. He was an excellent draughtsman, and he dressed flesh and fabrics, the flash of jewels and the shimmer of steel, with painter-like realism, surpassing all his predecessors in these effects. With all his elegance of detail he produced an harmonious ensemble, combining artistic feeling with skilful technique. Although his work with the burin was like that of the great Nanteuil, he attained to a style of his own. Previous engravers sacrificed much to make the head prominent, but Drevet made everything salient, though never violently so. Always engraving after oil-paintings, Drevet was at times uneven, but this was because the originals were uneven. Orders
THE COURT CHURCH, DRESDEN
poured in upon him faster than he could fill them, and throughout his life he had command of every important work produced in France. His engravings were mainly the portraits of distinguished people. Among his many superb plates a portrait of Colbert (1700) marks the apex of his art; and next in point of excellence come the portraits of Louis XIV and Louis XV, both after Rigaud. Other celebrated works of his are a Crucifixion, after Coypel, and a portrait of Charles II of England. During the last years of his life Drevet worked with his son and they produced plates together.

Pierre-Imbert Drevet, called the Younger Pierre, was born in Paris, 1697; died there, 1739. His father, the elder Drevet, gave him such assiduous instruction that at the age of thirteen he produced a superb little plate which indicated his future eminence. At first he engraved a few Lebrun plates, but he soon developed a style of his own, spontaneous, sincere, and brilliant. Under his facile, soft, and skilful hand, every detail was rendered, every shade of colour and every variety of texture. The result was always an harmonious unit. He was his father's constant companion and worked with unwearying patience with him. In 1723 Pierre-Imbert finished his portrait of Bossuet after Rigaud (see Catholic Encyclopedia, II, s. v. Bossuet), "perhaps the finest of all the engraved portraits of France" (Lippman). In 1724 the portrait of Cardinal Dubois was engraved. Both of these are treated broadly and freely, show magnificent handling of draperies, and possess exquisite finish. The great plate of Adrienne Lecouvreur (1730) and that of Samuel Bernard are by many authorities ranked with the Bossuet. For Bernard's portrait Rigaud himself made the drawing, a most unusual event in eighteenth-century engraving. Besides his masterly portraits, Pierre-Imbert produced many religious and historical plates, chiefly of Coypel. A sunstroke (1726) resulted in intermittent imbecility, and the talented and hardworking master—the last of the pure-line men—had thirteen years of such madness before his death. He kept on engraving, however, until the end. He was a member of the Académie de Peinture and the king assigned him apartments in the Louvre. Among his pupils were François and Jacques Château and Simon Vallée.

The following are among his principal works: "Presentation of the Virgin", after Le Brun; "Presentation in the Temple", after L. Boullongne; portraits of the Archbishop of Cambrai (after Vivien); and René Puelle, his last work, after Rigaud.

Claude Drevet, a French engraver, b. at Lyons, 1705; d. in Paris, 1782. He was a nephew and pupil of Pierre the Elder and at first followed the traditions of the two Pières, forming about him a coterie of engravers who endeavoured to keep alive their great traditions. Later he became very hard and precise with the graver, and his work lost all its artistic and painter-like quality, everything being sacrificed for a brilliant technic. Nevertheless, many of his plates possess great charm and delicacy. Claude seemed indifferent to his art and produced but little compared with the other members of the family. When Pierre-Imbert died, his rooms in the Louvre were given to Claude, who proceeded to squander nearly all the money left him by his uncle and his cousin.

He engraved portraits of Henri Oswald, Cardinal d'Auvergne, after Rigaud, and of De Vintimille, Archbishop of Paris, also after Rigaud.

Leigh Hunt.

Drexel, Francis Anthony, banker, b. at Philadelphia, U. S. A., 20 June, 1824; d. there 15 Feb., 1885. He was the oldest son of Francis Martin Drexel, a Tyrolese by birth, and by profession a portrait-painter and musician, who in 1837 turned his attention to finance, and founded the house of Drexel & Co. in Philadelphia with connections with the firms of J. S. Morgan & Co. of New York, and Drexel, Harjes & Co. of Paris. Associated with him were his sons Francis Anthony, Anthony Joseph, and Joseph William. Francis Anthony began his financial career at the age of thirteen, and at his father's death in 1863 became the senior member of the firm, and was recognized as one of America's foremost financiers. The house of Drexel & Co. was in the public estimation unalterably associated with the strictest integrity and the most boundless liberality. At critical periods it came generously to the support of the public credit. Francis A. Drexel's giving fortune did not alienate him from religion or harden his heart against the appeals of charity. He remained to the end poor in spirit, and regarded his vast wealth merely as a Divinely lent instrument for doing good. In his exercises of piety and his copious distribution of charities, he was ably seconded by his second wife, Emma Bouvier Drexel, who died before him. His children by his first wife, who was Hannah J. Langstroth, were Elizabeth, who died 26 September, 1890, and was the wife of Walter George Smith, of Philadelphia, and Katharine, who entered religion and founded the congregation of the Sisters of the Blessed Sacrament for Indians and Coloured People (see Catholic Encyclopedia, II, p. 599). Another daughter, Louise, wife of Edward Morrell, was the only child of his second marriage. In his will Mr. Drexel followed the Biblical injunction of bequeathing a tithe ($1,500,000) of his great estate to religious and charitable purposes, with the further proviso that in case his daughters should leave no issue, the entire estate should be distributed among the institutions specified in the will. His daughters continued to walk in the footsteps of their father. Among their own benefactions, Mrs. Smith and Mrs. Morrell founded the St. Francis Industrial School at Eddington, Pennsylvania. The Francis A. Drexel Chair of Moral Theology in the Catholic University of America was founded by his daughters in honour of Mr. Drexel.

James F. Loughlin.

Drey, Johann Sebastian von, professor of theology at the University of Tubingen, b. 15 Oct., 1777, at
Küllingen, in the parish of Röllingen, in the then ecclesiastical principality of Ellwangen; d. 19 Feb., 1853. The parish priest of Röllingen, an ex-Jesuit, noting the boy's talents, instructed him in the elements of Latin, and persuaded his parents to send him, in 1787, in spite of their extreme poverty, to the gymnasium of Ellwangen. There he lived partly on the charity of the townpeople and partly by tutoring, especially in Latin, mathematics, and physics. He studied theology, 1797-1799, at Augsburg; after 1799 he lived in the diocesan seminary at Pfaffenhofen and was ordained in the summer of 1801. During his five years as a student in his native place, Drey studied the then paramount philosophy of Kant, Fichte, and Schelling, and the philosophical erudition which he acquired in this study appears clearly in his scientific works. His position, from 1806, as professor of philosophy of religion, mathematics, and physics in the Catholic academy at Rottweil, formed a good preparation for his subsequent academic career.

When in 1812 King Frederick I of Württemberg founded the University of Ellwangen as a Catholic national university for his recently acquired Catholic territory, Drey was called to lecture there on dogmatics, history of dogma, apologetics, and introduction to theology. There he published two Latin dissertations: "Observavit quaedam et illustrandam Justini M. de regno millenario sententiam" (1814), and "Dissertatio historico-theologica originem et viessitutinem exomologeseos in ecclesiis catholicae ex documentis ecclesiasticis illustrans" (1815), the latter of which was denounced to Rome, but without serious consequences for its author, at least for the time being.

When King William I (1817) incorporated the University of Ellwangen with the old national University of Tubingen as its Catholic faculty of theology, Drey with his colleagues, Gratz and Herbst, joined the staff of the new school and founded (1819), together with them and his new colleague, Hirscher, the "Theologische Quartalschrift" of Tubingen, still flourishing; he took a prominent part in its publication and wrote for it a number of essays and reviews. In the same year he published: "Kurze Einleitung in das Studium der Theologie mit Rücksicht auf den wissenschaftlichen Standpunkt und das katholische System". An effort to make Drey first bishop of the newly founded Diocese of Rottenburg failed, among other reasons because of the distrust with which he was regarded in Rome owing to his above-named work on confession. Somewhat as a compensate the first position at the cathedral was reserved for him, which, however, he never filled. In 1832 appeared his "Neue Untersuchungen über die Konstitutionen und Konnones der Apollinaris"; a work of such thoroughness that only recent investigations, especially those of von Funk, have gone beyond it. After convalescing from a severe illness, he was relieved from his office as teacher of dogmatic theology (1838). Just then his principal work, in three volumes, appeared: "Die Apologetik als wissen schaftliche Nachweisung der Gottesliheit des Christentums in seiner Erscheinung" (1838-1847). Still comparatively robust, though well advanced in years, Drey was pensioned in 1846, almost against his will; he continued, however, to write for Wetzler and Welte's "Kirchenlexikon" and for the "Theologische Quartalschrift" of Tubingen. With Mohler, Drey was the founder of the so-called Catholic School of Tubingen. Like Mohler, Hefele, and von Funk, he was a truly critical historian. But Drey also gave to the systematic theology of this school its peculiar stamp, equi-distant from Traditionalism and Rationalism, recognizing on the one hand the objective facts in the history of Revelation and the tradition from generation to generation, maintaining on the other the rights of our natural reason and of philosophical speculation, with all due loyalty to dogma. Kuhn and Schulte happily followed in the path marked out by Drey.

**Johann Baptist Sagmüler.**

**Dromore, Diocese of (Dromorensis, and in ancient documents Dromorennsis), one of the eight suffragans of Armagh, Ireland. It includes portions of the counties of Down, Armagh, and Antrim, and contains eighteen parishes, of which two, Newry and Clonallon, are mensal parishes. It takes its name from Dromore (Drumore, great ridge), a small town in the north-west of County Down, sixty-three miles north of Dublin, twenty-five miles east of Armagh, and fourteen miles south-west of Belfast, which is built on the same river, the Lagan. The See of Dromore was founded in the sixth century by St. Colman (called also Mo-cholomce), one of themany holy men (more than a hundred) bearing that name in the calendars of Irish saints. From a prophecy said to have been uttered by St. Patrick, sixty years before, Archbishop Henry ("Life and Writings of St. Patrick", p. 394) infers that St. Patrick claimed no immediate spiritual jurisdiction over the territory of I'veagh which forms mainly the Diocese of Dromore, but willed that territory be reserved for a bishop of the native race of Dal-Arde—namely, St. Colman, who founded his see there about the year 514, some sixty years after St. Patrick founded the See of Armagh. Dromore has had its own independent jurisdiction ever since. The old cathedral of Dromore, which had been taken by the Protestants, was burnt down by the Irish insurgents in 1611, and rebuilt by Bishop Taylor twenty years later: but it has been far surpassed by the Catholic church recently erected. The seat of the cathedral, however, was transferred some two hundred years ago to Newry, the largest town of County Down, and a place of great historical interest, situated at the head of Carlingford Lough. In this town, when the severity of the Penal Laws began to be felt, on the latter half of the eighteenth century, the Catholics built in a retired suburb a very plain church which is still in use; but just before Catholic Emancipation an edifice worthy of the name of cathedral was begun in 1825 and completed by Dr. Michael Blake (1833-1860).
who had been Vice-General of Dublin and the restorer of the Irish College at Rome. This cathedral was greatly enlarged and beautified by Bishop Henry O'Neill, who succeeded Bishop McGavern in 1901.

Under Dr. McGavern’s predecessor, Dr. John Pius Leavy, O.P. (1850–1900), a Dominican priory was founded on the Armagh side of Newry, and a very handsome church erected. The Poor Clares, who went to Newry from Harold’s Cross, Dublin, in 1830, were for many years the only nuns north of the Boyne. The Sisters of Mercy founded a convent at Newry in 1855, and have now flourishing establishments in Lurgan, Rostrevor, and Warrenpoint. There is a large diocesan college at Violet Hill near Newry which is under the patronage of St. Colman. To this patron saint of the diocese and its first bishop, besides the church at Drumore already referred to, are dedicated the parish churches at Tullyglass, Kilvarin, in the parish of Magheralin, and Barranmore near Rathfriland in the parish of Drumgath. Few ecclesiastical antiquities have survived the ravages of time, war, and heresy. Abbey Yard in Newry marks the site of the Cistercian abbey founded in the year 1141 by St. Bernard of Clairvaux, St. Mauclerc O’Morgart, and endowed in 1157 by Maurice O’Lochlainn, King of All Ireland. It is called in the annals Monasterium de Viridii Ligno—a name given to Newry from the yew-tree said to have been planted there by St. Patrick, the Irish name being Niubar (and sometimes Newkin-tragh, the head or horn of the strand”) which is located Irigion or Virginiua, but more commonly as above Viride Lignum. There are the ruins of an old church half a mile east of Hilltown. In the adjoining parish of Kilbroney (church of St. Bronach, a virgin saint of the district) half a mile north-east of Rostrevor is a graveyard with the venerable ruins of a church, an ancient stone cross, and a little to the west St. Bridget’s well. Imbedded in a tree in this graveyard, a very antique bell was found about a hundred years ago and is now carefully preserved.

The first Protestant Bishop of Drumore was John Tod, on whom it was bestowed in commendam in 1666, while he was at the same time Bishop of Down and Connor. It was an unfortunate beginning; for the Protestant historian, Sir James Ware, says Tod was degraded for intemperance and poisoned himself in prison in London. Two of his successors distinguished themselves more creditably: Jeremy Taylor, who was bishop of these three dioceses from 1661 to 1667, an eloquent preacher and a writer of genius, and Thomas Percy, Bishop of Dromore from 1752 to 1801, whose “Reliques of Ancient Poetry” had a great and enduring influence on English literature.

There are 18 parishes, 42 churches, and 53 priests, a diocesan seminary and a convent of Dominicans at Newry; also 5 convents of Sisters of Mercy, one of Poor Clares, and a college of the Christian Brothers (Newry). The Catholic population is (1905), 43,014; non-Catholic, 71,157.

DROSTAN

Drostan (Drustan, Dystan, Thrystan), Saint, a Scottish abbot who flourished about A.D. 600. All that is known of him is found in the “Breviary Aberdeenense” and in the “Book of Deir”, a 12th century MS. now in the University Library of Cambridge. These two accounts do not agree in every particular. He appears to have belonged to the royal family of the Scotti, his father’s name being Coisgrach. Showing signs of a religious vocation he was entrusted at an early age to the care of St. Columba, who trained him and gave him the monastic habit. He accompanied that saint when he visited Aberdour (Aberdeen) in Buchan. The Pictish ruler of that country gave them the site of Deir, fourteen miles farther inland, where they established a monastery, and when St. Columba returned to Iona he left St. Drostan there as abbot of the new foundation. On the death of the Abbot of Dalquhonngael (Holywood) some few years later, St. Drostan was chosen to succeed him. Afterwards, feeling called to a life of greater seclusion, he resigned his abbacy, went farther north, and became a hermit at Glenesk. Here his sanctity and poverty attracted to him, and many miracles are ascribed to him, including the restoration of sight to a priest named Symon. After his death his relics were transferred to Aberdour and honourably preserved there. The “Breviary of Aberdeen” celebrates his feast on 15 December. The monastery of Deir, which had fallen into decay, was rebuilt for Cistercian monks in 1213 and so continued until the Reformation.

MATTHEW RUSSELL.

DROSTAN

DROSTE-VISCHERING

Clemens August von, Archbishop of Cologne, b. 21 Jan., 1773, at Münster, Germany; d. 19 Oct., 1845, in the same city. Besides attending the University of Münster, he had as private tutor the well-known church historian Theodore Katerkamp (d. 1834). At an early age he was introduced into the circle of learned men that gathered around Baron von Fürstenberg and the refined Princess Amelia von Gallitzin, where he imbibed the thoroughly Catholic principles which characterized him while Archbishop of Cologne. After completing his studies he began, in June, 1796, an extensive educational journey under the direction of Katerkamp, through Germany, Switzerland, and Italy, returning to Münster in Aug., 1807. The following year, on 14 May, he was ordained priest by his brother Caspar Maxilian, then Auxiliary Bishop of Münster. In accordance with the wish of the aged Baron von Fürstenberg, Vicar-General and Administrator of the Diocese of Münster, the cathedral chapter elected Clemens August as his coadjutor on 18 Jan., 1807, and when Fürstenberg resigned six months later, Clemens August became his successor. As administrator he founded in 1808 an independent congregation of Sisters of Mercy, the so-called Klemens-Schwestern, who, though practically confined to the Diocese of Münster, numbered 81 houses and 1126 members in 1904. When in 1813 Münster became part of Napoleon’s monarchy, the emperor appointed Baron von Spiegel as Bishop of Münster without the knowledge of the pope, but after Napoleon’s fall the pope restored Clemens August to his former office in March, 1815. Under Prussian rule the administrator repeatedly came into conflict with the Government on account of his attitude towards mixed marriages and the supervision of the theological studies. When by agreement between the Holy See and the Prussian Government the dioceses of Prussia were again supplied with bishops, Clemens August, who was not persona grata to the Prussian Government, withdrew from public life and devoted himself to works of piety and charity. He remained in seclusion even after being canonized Auxiliary Bishop of Münster with the titular See of Calama in 1827.

After the death of Baron von Spiegel, the incumbent of the metropolitan See of Cologne, the Prussian Government, to the surprise of Catholics and Protestants alike, desired Clemens August as his successor. 
This unexpected move on the part of the Government was intended to conciliate the Catholic nobility of Westphalia and Rhinen Prussia as well as the Catholic clergy and laity, who began to lose confidence in the faintheartedness of the Government and justly protest against the open favoritism shown to Protestants in civil and ecclesiastical affairs. The Catholic chapter of Cologne, which had become accustomed to act as a passive instrument in the hands of the Government, elected Clemens August as Archbishop of Cologne on 1 Dec., 1833. He received the papal confirmation on 1 Feb., 1839, and was solemnly enthroned at the Palatine Chapel on the 14th of the same month, Bishops Minister, on 29 May. Soon after this he came into conflict with the adherents of Hermes (d. 1831), whose doctrines (see HERMEN AND HERMENIANSM) had been condemned by Pope Gregory XVI on 26 Sept., 1835. When many professors at the University of Bonn refused to submit to the papal Bull, Clemens August refused the imprimatur to their theological magazine, forbade the students of theology to attend their lectures, and drew up a list of anti-Hermetic theses to which all candidates for ecclesiastical ordination and all pastors who wished to be transferred to non-Catholic churches were obliged to swear adherence. Government was angered because the archbishop had enforced the papal Bull without the royal approbation, but gave him to understand that he would allow him free scope in this affair, provided he would accede to its demands concerning mixed marriages. Before Clemens August became involved with the Government, he had become asked by an agent of the Government whether, if he should be set over a diocese, he would keep in force the agreement regarding mixed marriages, which was made "in accordance with the papal Brief of 25 March, 1839", by an Archbishop von Spiegel and Minister Bunsen on 19 June, 1834. Clemens August did not then know in what this agreement consisted, and misled by the words "in accordance with the papal Brief", answered in the affirmative. After becoming archbishop he discovered that the agreement in question, far from being in accordance with the papal Brief, was in some essential points in direct opposition to it. The papal Brief forbade Catholic priests to celebrate mixed marriages unless the Catholic training of the children was guaranteed, while in the agreement between von Spiegel and Bunsen no such guarantee was required. Under these circumstances it was the plain duty of the archbishop to be guided by the papal Brief, and all attempts of the Government to the contrary were futile. His conscientious devotion to duty finally caused the Government to have recourse to the most drastic measures. Advised by Minister Bunsen, Frederick William III ordered the arrest of the archbishop. The order was carried out in all haste and secrecy on the evening of 20 Nov., 1837, and Clemens August was transported as a criminal to the fortress of Minden. If the Government thought it could overawe the Catholics of Prussia by thus trampling under foot the religious liberty of its subjects, it speedily discovered its mistake. The Bishops of Minden and Paderborn, fired by the example of Clemens August, recalled the assent they had formerly given to the agreement, while Martin von Dunin, the Archbishop of Gnesen and Poven, was imprisoned at Kolberg for the same offense that had sent Clemens August to Minden. In an allocation of 10 Dec., 1837, Pope Gregory XVI praised the course of the Archbishop of Cologne and solemnly protested against the action of the Government. The slanderous "Darlegung", or exposé, in which the Government attempted to defend its course by accusing the archbishop of treason, was refuted by Joseph Gœres in his great apologetical work "Athanassius", and a declaration of the true state of affairs was published at Rome by order of the pope. The Government saw its mistake and the archbishop was set free on 22 April, 1839. He was permitted to retain the title of Archbishop of Cologne, but, in order to uphold the authority of the State in the public eye, was prevailed upon to select a coadjutor in the person of Johann von Geissel (q. v.), Bishop of Speyer, who had been most kindly received by the pope and the Curia. The cardinalate, which was offered him by the pope, he refused, and returned to Minden in October. Clemens August is the author of a few ascetical and ecclesiastico-political works. The most important is an exposition of the rights of Church and State entitled "Ueber den Frieden unter der Kirche und den Staaten", published at Minden in 1843.

Michael Ott.

Druidism.—The etymology of this word from the Greek drwos, "oak", has been a favourite one since the time of Pliny the Elder; according to this the druids would be the priests of the god or gods identified with the oak. It is true that the oak plays an important part as the sacred tree among the ancient Aryans of Europe, and this etymology is helped out by the Welsh word for druid, viz. derwodd. But there is a difficulty in equating the synonymous Irish draoi and Welsh derwodd. Probably the best-substantiated derivation of this word is from the root weud, "to know", and the intensive prefix dru-. According to this etymology, the druids would be the "very wise and learned ones". But this, like the others, is merely a conjecture, and it has been surmised that the word as well as the institution was not of Celtic origin. Although the druids are mentioned with more or less fullness of account by a score of ancient writers, the information to be derived from their statements is very meagre, and very little of it is at first hand. Even Cesar, who probably came more in contact with the druids than any other writer, does not seem to have ever heard of this people, either in fact or in this general. With the ancient writers the word druid had two meanings: in the stricter sense it meant the teachers of moral philosophy and science; in the wider sense it included the priests, diviners, judges, teachers, physicians, astronomers, and philosophers of Gaul. They formed a class apart and kept the people, who were far inferior to them in culture, in subjection. They were regarded as the most just of men, and disputes both public and private were referred to them for settlement. Thus their influence was much more a social than a religious one, in spite of the common opinion that they were exclusively a priestly class or Gaulish clergy. They enjoyed certain privileges, such as exemption from military service and the payment of taxes; and the ancient authors are unanimous in speaking of the great honours which were shown them. Above all, the druids were the educators of the nobility. Their instruction was very varied and extensive. It consisted of a large number of verses learned by heart, and we are told that sometimes twenty years were required to complete their course of study. They held that their learning should not be consigned to writing. They maintained the written literature of sacred songs, formulae of prayers, rules of divination and magic, but of all this lore not a verse has come down to us, either in their own language or in the form of translation, nor is there even a legend that we can call with certainty druidical. Pomponius
Mela is the first author who says that their instruction was secret and carried on in caves and forests. It is commonly believed that the druids were the stubborn champions of Gaulish liberty and that they took a direct part in the government of the nation, but this is an hypothesis which, however probable, is not supported, for the early period at least, by any text or by the statement of any ancient author. "The principal point of their doctrine," says Caesar, "is that the soul does not die and that after death it passes from one body into another." But, as is well known, the belief in the immortality of the soul was not peculiar to the teachings of the philosophers of Gaul. Just what was the nature of that second life in which they believed is not quite clear. Some of the Greek authors, struck by the analogy of this doctrine with that of Pythagoras, believed that the druids had borrowed it from the Greek philosopher or from one of his disciples. The practice of human sacrifice, which has often been imputed to the druids, is now known to have been a survival of a pre-druidic custom, although some members of the druidic corporation not only took part in, but presided at, these ceremonies. Nor has it been proved that the druids had gods of their own or had introduced any new divinity or rites into Gaul, with the exception perhaps of the Dispater, who, according to Caesar, was regarded by the druids as the head of the nation, and who may have owned his origin to their belief. The druids, in addition to teaching, which was their most important occupation, seem to have been content to preside over the traditional religious ceremonies and to have acted as intermediaries between the gods, such as they found them, and men. It is certain that they had a philosophy, but it is very unlikely that their doctrines had penetrated into the great mass of the population.

Although the only positive information we possess on the druids is to the effect that their institution existed in Gaul and Britain between the years 53 B.C. and A.D. 77, there is evidence to show that it must have existed from a much earlier time and lasted longer than the limits fixed by these dates. It seems reasonable to suppose that the influence of the druids was already at its decline when Caesar made his campaigns in Gaul, and that to them was due the civilization of Gaul in the fifth and fourth centuries B.C. We may affirm that references to the druids and signs of the existence of their institution, in the germ at least, are found which would date them as early as the third century B.C. With the Roman conquest of Gaul the druids lost all their jurisdiction, druidism suffered a great decay, and there is no reason to believe that it survived long after A.D. 77, the date of the last mention of the druids as still in existence. The opening of the schools of Marseilles, Bordeaux, and Lyons put an end to their usefulness as teachers of moral philosophy; and if some of them remained scattered here and there in Gaul, most of them were obliged to emigrate to Britain. The Emperors Tiberius and Claudius abolished certain practices in the cult of the druids, their organization, and their assemblies, but their disappearance was gradual and due as much to the romanization of the land as to any political measure or act of violence or persecution on the part of Rome. Yet there can be no doubt that Rome feared the druids as teachers of the Gallo-Roman youth and judges of trials. In Gaul in the third century of the Christian Era there is mention of women who predicted the future and were known as druidesses, but they were merely sorcerers, and we are not to conclude from the name they bore that druidism was still in existence at that late date. According to Caesar, it was a tradition in Gaul in his time that the druids were of British ori-
gin and that it was to Great Britain that they went to make a thorough study of their doctrine, but the authors of antiquity throw very little light on the institution and practices of Druidism in the island of Britain.

Druillettes.

Druillettes were the Society of Jesus at Quebec, and it is from this that the name of the order is derived. In 1648, they entered the new city of Quebec, and were soon followed by other Jesuits. They were the first Catholic missionaries in Canada, and their work was of great importance in the development of the country.

From here he was appointed to take charge of a lodging-house for boys which the St. Vincent de Paul Society had opened some time previously. The caring for homeless and destitute children appealed to him specially, and he volunteered to take up the direction of the establishment, which had languished until then. Under his sympathetic and prudent management success was at once assured. He started St. Joseph's Union for the support of the institution and soon extended its membership all over the world. The first location of the lodging-house became inadequate to the needs and he purchased land at Great Jones Street and Lafayette Place and built an imposing structure which was opened as the Mission of the Immaculate Virgin in December, 1881. In the following year a farm was bought on Staten Island, and Mount Loretto, the country-place of the Mission, where trade schools and other buildings were built, their care being given to a community of Franciscan Sisters. These buildings cost more than a million dollars and were large enough to care for 2000 destitute children annually; at his death, which occurred after a very short illness, Father Drumgoole left them entirely free of debt. He accomplished all this without any great personal talents apart from a simplicity and earnestness of charity that won him friends everywhere. He had singular success in managing boys, and, like his great prototype, Don Bosco, he believed and said that it was all due to his rule: "in looking after the interests of the child it is necessary to cultivate the heart."

Mallick J. Fitzpatrick.

DRURY, ROBERT, VENERABLE, Martyr (1567-1607), was born of a good Buckinghamshire family and was married into the English College at Reims, 1 April, 1588. On 17 September, 1590, he was sent to the new College at Valladolid; here he finished his studies, was appointed to a priest and returned to England in 1593. He laboured chiefly in London, where his learning and virtue made him much respected among his brethren. He was one of the so-called confessors, and Drury probably did not know of it. He died a martyr at Tyburn, 26 February, 1606-7. A curious contemporary account of his martyrdom, entitled "A true Report of the Arraignment of a Popish Priest named Robert Drumgoole," has been reprinted in the "Harleian Miscellany," calls him a Benedictine, and says he was a Benedictine. But this "habit" as described proves to be the cassock and cap worn by the secular clergy. The writer adds, "There were certain papers shown at Tyburn which had been found about him, of a very dangerous and traitor-
ous nature, and among them also was his Benedictine faculty under seal, expressing how great was his subject's allegiance, and how ready they were to render to Caesar the things that were Caesar's, so that they might permit to yield to the successor of Peter that obedience which Peter himself might have claimed under the commission of his apostles, and so to distinguish between their several duties and obligations as to be ready on the one hand "to spend their blood in defence of her Majesty", but on the other "rather to lose their lives than infringe the lawful authority of Christ's Catholic Church." This bold repudiation of the pope's depos-

DRUSILLA

Druzy, daughter of Herod Agrippa I, was six years of age at the time of her father's death at Cæsarea, A.D. 44. She had already been betrothed to Ephiphanes, the son of Antiochus, King of Commagene. Herod had stipulated that Ephiphanes should embrace the Jewish religion. The prince finally refused to abide by his promise to do so, and the brother of Drusilla, Herod Agrippa II, gave her in marriage to Azizus, King of Emess, who, in order to obtain her hand, consented to be circumcised. It was shortly after this marriage, it would appear, that Felix, the Roman procurator of Judea, met the beautiful young queen. This meeting took place under the auspices of Herod Agrippa II, for we can gather from Josephus that Benvene, the elder sister, whose jealousy the Jewish historian mentions as an explanation of Drusilla's conduct, lived with her brother at this time. Felix was struck by the great beauty of Drusilla, and determined to make her his wife. In order to per-
Drusipara, a titular see in Thrace Prima. Nothing is known of the ancient history of this town, which, according to Ptolemy, III, 11, 7, and Iúner, 40, 11, was situated on the route from Adrianople to Byzantium. Under Maximian, St. Alexander suffered martyrdom there (Acta Sanctorum, May, III, 17). In the time of Emperor Mauritius the city was captured by the Khakan of the Ivars, who burned the church and despoiled the relics of the martyr (Theophylact Simocatta, VII, 14, 15). Drusipara was first at an episcopal see, suffragan of Heraclea (Lequien, Opusc. Hist. Eccl., I, 1131, etc.). In the eighth and ninth centuries it became an independent archbishopric, which must have been suppressed during the Bulgarian incursions. In two "Notitiis Episcopatuum" Mesene appears as a later name for Drusipara; at Mese in 1565 died the wife of the famous Grand Duke Notaras (Ducas, Hist. Byz., 12). Mesene is to-day a small village, with 500 inhabitants, east of Karashil in the vilayet of Adrianople.

S. PÉTRIDES.

Druys (Lat. Druzus), Jean, thirteenth Abbot of Parc near Louvain, Belgium, b. at Compiegne, near Triermont, d. 25 March, 1385. He studied successively at St-Trond, Liège, Namur, and Louvain, and entered the Abbey of Parc in 1387. Or- dained priest, he was sent to the Norbertine College at Louvain and obtained his licentiate in 1396. Recalled to the abbey, he was made sub-prior and pro- fessor of theology to the young religious at the abbey, chaplain to Abbot Ambrisse Louts at the Refuge, which the abbey possessed at Brussels during the troublous times at the end of the sixteenth century, and at the death of Abbot Louts his successor. Four years later he was appointed vicar-general to the Abbot-General of Prémontré, and was later named by Archduke Albert a member of the States of Brabant and of his private council. The University of Louvain having suffered much from the religious and political disturbances of the time, Druys was appointed, with a layman, visitor to the university, with full power to reform abuses, a task which was not completed until 1617. He was also made visitor to the University of Damp (1616) and to the Celestine monastery at Héverlé. In addition he restored and enlarged his own abbey, which had suffered much from the vandalism of the soldiers, and provided better educational advantages for his religious. At the general chapter held at Prémontré in 1629, Abbot Druys was commissioned to revise the statutes of the order and conform them to the prescriptions of the Council of Trent, a revision which was approved at the general chapter of 1630. Druys prefixed a preface, "Predafatio ad omnes candidissimi et canonici ordinis religiosos", which Foppens characterizes as longam, piam, erudition. He had a tree of the saints of the order made by the skilful engraver, C. Mallery. He also published a small work entitled "Exhortatio ad candidi ordinis religiosos". Abbot Druys was appointed by the general chapter of 1630 to bring back several abbeys of Spain into union and observance, but was unsuccessful. While on this mission he conferred with Philip IV on the sad state of affairs in Brabant. A ring presented to him by this monarch is preserved at Parc, as is also a letter from Henrietta Maria, Queen of England.

Martin Geuden.

Drzubicki, Caspar, ascetic writer, b. at Sierady in Poland, 1589; entered the Society of Jesus, 20 August, 1609; d. at Posen, 2 April, 1622. After some years of teaching he became master of novices, and subsequently rector of the colleges of Kalisz, Ostrog, and Posen. He was twice provincial and was in the seventh and tenth general congregations of the order. Almost all his works are posthumous and have been drawn from his "Opera Ascetica". It has been found impossible to arrange them in chronological order. Among them are a brief discourse of the Society assigned to a writer in the "Cronica Academy" (1632); books of meditations on the Life and Passion of Christ, some in Polish, some in Latin; "The Tribunal of Conscience", translated into English for the "Quarterly Serial", edited by the English Jesuits (London, 1885); and "Propositiones Sacrae" (Ingolstadt, 1736). There are also "Considerations for Every Sunday and Feast of the Year" (Kalisz, 1779); "The Sacred Heart, the Goal of Hearts" (Angers, 1885), translated for the English "Messenger", probably by Father Dignam (1890); "Exercises for Novices" (Prague, 1890); "The Religious Vows" (Posen, 1890), translated into Spanish and found in the Library of Guadalajara, Mexico; "Solid Jesuit Virtue" (Prague, 1896); "Lapis Lydus" (Mainz, 1875), translated into French by the Redemptorist Father Ratti (Paris, 1889) and into German by the Benedictine Grübler (Salzburg, 1740). A complete list of Drzubicki's works occupies twelve volumes in Sommervogel.

De Backer, "Bibl. de la c. de J., I, 1593-64, III, 2149; Sommervogel, "Bibl. de la c. de J., III, 2149".

T. J. Campbell.

Druzes, a small Mohammedan sect in Syria, notorius for their opposition to the Maronites, a Catholic people dwelling on the slopes of the Lebanon. Their name is derived from El-Doray, the proper name of a Persian at the court of El Hakim in Egypt (about A.D. 1015). They subsequently repudiated all connexion with this Mohammed Ibn Ismail el-Doray, and styled themselves Unitarians or Mumah-helmin, on account of the emphasis they lay on the unity of God. Their history begins with the capture of El Hakim in the Wady el-Temsa after his flight from Egypt. This Persian had had the audacity to read to a large multitude gathered in a mosque a book tending to prove that El Hakim, the mad Fatimite caliph, was an incarnation of God. Escaping from the crowd, who were enraged at this blasphemy, he fled to the valley between Hermon and the Southitis, and with the support of his master preached his doctrine to these mountain people, already given to Batenite doctrines and therefore predisposed to accept a further incarnation of the Deity. He was soon superseded by another Persian, Hamzeh Ibn Ahmed El Hady, who assumed the real founder of the sect as author of its sacred books. After the assassination of El Hakim, Hamzeh wrote a treatise to prove that El Hakim had not really died but only disappeared to test the faith of his followers. This disappearance and ulti-
mate return of El Hakim are cardinal points of the Druze faith to-day. The sacred books of the Druzes, successfully hidden from the world for eight centuries, have since the middle of the last century found their way into European libraries. They are written in Arabic and affect the style of the Koran. They consist of six volumes containing 111 treatises of a controver-sial character or explanatory epistles to individual persons. Each book takes its name from the first treatise. Their speculations strongly reflect their Persian origin.

The Druze doctrine concerning God is characterized by its abstraction from all divine attributes; these, it declares, would imply limitation in the Supreme Being. God, however, manifested Himself first in the Universal Mind, then in the Universal Soul, and again in the Word. These three form the first great manifestation. The second great manifestation began with the residence of the Universal Mind in Adam for a thousand years; after which Enoch took his place, and in turn was followed by the Seven Ministers, Noe, Abraham, Moses, Jesus, Mohammed, Ibn Ismail; the seventh is unknown. God appeared ten times in human form, for the last time in El Hakim. The Druzes teach a distinction between Jesus, the son of Joseph, and the Christ. Christ instructed Jesus, but finally Jesus disobeyed Christ and was crucified in consequence. Christ, who was concealed under the form of one of the Disciples of Jesus, stole the body of Jesus from the grave and gave out the report that Christ had risen, in order that the true Druzes might be concealed for awhile in the religion of Jesus. The Druzes are firm believers in the transmigration of souls, and this transmigration will never end; after the Judgment Day death it will continue, but will be painless for the saved, who will live to the age of 120 years, and whose souls will forthwith be reborn and re-enter a life of peace and pleasure. The Druzes are unshakably convinced that the whole of China is peopled with adherents of their religion. The Judgment Day, or rather the golden age for the Druzes, will be at hand when the Christians wax greater than the Mohammedans, some nine hundred years after the disappearance of El Hakim. Then the Christians, aided by the King of Alavsinia, a sort of Antichrist called ‘The Antagonist’, will march against the Qaaba in Mecca. The hosts of Christ and Mohammed will meet, but only to be both overcome by 2,000,000 Chinese Druzes. All Muslims and Christians will both be reduced to everlasting slavery, and the Unitarians will reign forever. The Druze religion contains seven moral precepts: veracity, love of the brethren, forsaking of idolatry, repudi-ation of devils, acknowledgment of God’s unity at all times, secrecy in religion, and resignation to the will of God.

The Druzes are divided into two main classes: the Ukkal, or initiated, and the Juhhal, or unininitiated; amongst the former, the Iwayid profess the strictest Druze principles. They meet on Thursday evenings for worship, which consists almost exclusively in reading their sacred books. They often comply with the outward observances of Islam and even make pretence of being Mohammedans, but they are officially designated as unbelievers. They live mostly in the Lebanon, but are also found in the Hauran and in the districts near Damascus; their total number is estimated at 100,000 or a few thousand at the most. Encouraged by Turkish authorities, the Druzes in 1858 attacked the Catholic Maronites, and are said to have massacred some ten thousand of them. The massacres were stayed mainly through English and French intervention.

D R Y B U R G H

(Druze Woman (In Bridal Dress))

Dryburgh Abbey, a monastery belonging to the canons of the Premonstratensian Order (Norbertine or White Canons), situated four miles south-east of Melrose, Scotland. It was founded about 1150 by Hugo de Morville, Constable of Scotland, who brought a community from Alnwick in Northumberland. The situation is beautiful, a wooded promontory, around the three sides of which sweeps the River Tweed. The church was dedicated to the Blessed Virgin. The monastery was burnt to the ground by Edward II, who encamped in the grounds when retreating from Scotland in 1322, but it was restored under Robert I, who himself contributed largely. At the Dissolution it was created a temporal lordship, and conferred by James VI on the Earl of Mar, who made it over to his third son, ancestor of the Earl of Buchan. It has again come into the hands of the last-named family in recent times by purchase.

The general style of the existing remains of Dryburgh is Early English, with some older (Norman) work. Of the church only the western gable, the east end of the transept, and part of the choir remain; but considerable portions of the conventual buildings have been preserved, including the refectory, with a beautiful rose window. James Stuart, of the Darnley family, is buried under the altar; and various members of the Buchan family are interred in the choir. The principal object of interest to visitors is the tomb of Sir Walter Scott, in St. Mary’s Aisle (part of the north transept). Sir Walter’s maternal ancestors, the Halliburtons, at one time owned Dryburgh. His wife and eldest son are also interred here.

D R Y D E N

Dryden, John, poet, dramatist, critic, and translator; b. 9 August, 1631, at Oldwinkle All Saints, Northamptonshire, England; d. at London, 30 April, 1700. He was the son of Esmers dryden (or Dri- den), and Mary Pickering. He was a member of the Royal Society Pickering. Esmers Dryden was the son of Sir Eruus Dryden, and was a justice of the peace under Cromwell. On both sides Dryden’s family were of the Parliamentary party. He received his early education at King’s College at Westminster and while there his first published work appeared. This was a tragedy contributed in 1649 to the "Lachrymae Musarum", a collection of tributes in memory of Henry, Lord Hastings. He entered Trinity College, Cambridge, 18 May, 1650, being elected to a scholarship on 2 October. He graduated as Bachelor of Arts, January 1653-4, and after inheriting from his father a small estate worth £600 annually, he returned to Cambridge, living there until 1655. The "Heroic Stanzas" on the death of Oliver Cromwell, his first important work (1658), are smooth and vigorous, and while laudatory,
are not nearly so. There is no attack on royalty and no mention of Cromwell's religion. Dryden always was in favour of authority and of peace from civil strife, and consequently when disorders broke out upon Cromwell's death, he, with the rest of the nation, welcomed the return of Charles II. He celebrated the king's return with his poem of "Aurengzebe" (1661), in which he already showed his mastery of the rhymed couplet. Then followed his poems on the "Coronation" (1661); "To Lord Clarendon" (1662); "To Dr. Charleton" (1663); "To the Duchess of York" (1665); and "Almon Mirabilis" (1667). His great prose "Essay on Dramatick Poesie" appeared in 1668. Meanwhile, in 1662, Dryden had been elected to the Royal Society, and on 1 December, 1663, he was married to Lady Elizabeth Howard, eldest daughter of the Earl of Berkshire.

In 1662 he began his dramatic career with "The Wild Gustant", a comedy of humours, influenced by Spanish sources. In 1665 appeared "The Rival Ladies", a tragicomedy, also from a Spanish model. To this Dryden prefixed the first of the famous prefaces in which he laid down his principles of dramatic criticism. "The Indian Emperor", a heroic play, his first original drama, appeared in 1665. In 1667 he produced "The Maiden Queen", a comedy in which some blank verse is seen alongside of the rhymed couplet and prose; "Sir Martin Mar-all", a prose comedy based on "L'Etourdi" of Molière; and an adaptation of "The Tempest" with Davenant. "The Mock Astrologer" (1668) was an imitation of "Le feint astrologue" of Thomas Corneille, influenced by Molière's "Des Espions". About this time Dryden entered into an agreement with the King's Theatre Company. According to this he was to produce three plays a year, for which he was to receive one and one-quarter shares out of a total of twelve and three-quarters. In the winter of 1668-9, "Tyrannic Love, or the Royal Martyr", a rhymed heroic tragedy, was played, and in 1670 his greatest heroic tragedy, the first and second parts of "Almanzor and Almahide, or the Conquest of Granada".

Dryden was given the degree of M.A. by the Archbishop of Canterbury in 1668; in 1670 he was made poet laureate and royal historiographer, which brought him an annual income of £200. In 1671 he was satirized in "The Rehearsal", a play written by Buckingham, Butler, and others, "Marriage à la Mode", a comedy in prose and rhyme, was played in 1672, as well as "The Assignment, or Love in a Nunnery", a prose comedy, interspersed with a little blank verse. "Amorvosa" (1673) was a prose tragedy on the subject of the Dutch outrages, and "The State of Innocence" (1674) was an unsuccessful attempt to treat the theme of Paradise Lost. "Aurengzebe" (1674) is a rhymed tragedy in which the run-on lines show a tendency toward blank verse, which becomes triumphantly placed in the next play, "All for Love" (1678). This is Dryden's masterpiece, a play based on the story of Anthony and Cleopatra which he wrote to satisfy his own standards. It is a play worthy of comparison with Shakespeare's "Anthony and Cleopatra", surpassing it in unity of time and motive, and in the part of Pentheus adding one of the great characters of the English drama. "Limberham" (1678), a prose comedy, was unsuccessful and was withdrawn from the theatre. After the production of "Othello", a tragedy in blank verse written in collaboration with Lee in 1679, Dryden seems to have quarrelled with the King's Company, and his next play, "Trogus and Cressida", (1679), an adaptation in blank verse and prose of Shakespeare's play, was produced by the Duke's Company. With the "Spanish Friar" (1693) he closed for a time his dramatic career. He had in the meantime suffered as well as profited by his fame. The Earl of Rochester, suspecting that Dryden had aided Lord Mulgrave in his attack on Rochester in the "Essay on Satire", caused Dryden to be beaten by hired ruffians as he passed through Rose Street, Covent Garden, while returning from Wallis's house to his own house in Gerrard Street. It is characteristic of the unfair attitude taken by Dryden's enemies that this cowardly assault was held by them to reflect upon his character.

In November, 1681, Dryden began, in the first part of "Absalom and Achitophel", the series of satires in the rhymed couplet which placed him at the head of English satirical poets. "Absalom and Achitophel" was the most important literary expression of the party which prevented the exclusion of the Duke of York from the succession to the throne. It is also one of the greatest of English satires, especially in its portraiture of the characters of Monmouth and the Earl of Shaftesbury, both of whom the author has represented allegorically in the title of the poem. Then followed, in March, 1682, "The Medal", an assault upon Shaftesbury. These poems occasioned many attacks on Dryden, and to one of them, the "Medal of John Bayes" by Thomas Shadwell, Dryden replied, in October, 1682, by "Mac Flecknoe", a vigorous satire which dismissed Shadwell as the "best great prophet of tautology". In November, 1682, appeared the second part of "Absalom and Achitophel" in which Nathan is elevated. In "Religio Laici" (1682) Dryden presented an argument for the faith of the Church of England, and in 1685, on the death of Charles II, he wrote an ode called "Threnodia Angustissima". In 1684 at Charles's request he had also translated "The History of The League" from the French of Marmontel. Dryden's position at the death of Charles was not an enviable one. His income from play-writing had ceased, his pensions were not regularly paid, though they were continued by James II, and as soon as his appeal for some of the arrears, which amounted to £1000 in 1683, he had received £75 and an agreement as collector of customs of the port of London, the emoluments of which office are not known. He was converted to Catholicism in 1686. This step was the natural outcome of his investigation into theology,
Dryden's position in the history of English literature is one of supreme importance. He brought the rhymed couplet as a means of satire to a brilliancy and a point never surpassed before or since his time; as a close and logical reasoner in verse he has never been equalled. As a dramatist he did much good work, and in some cases, as in "All for Love," or "Don Sebastian," he achieved supreme distinction as a lyrist. He has left many exquisite songs and at least two of the finest odes in the language. As a translator and adaptor he ranks high, while as a prose writer he not only produced a body of criticism which established itself as one of the greatest of English critical work, but he also clarified English prose and marked the way for future development. As a man, he shared the faults of his time, but the scandals heaped upon him by his enemies have fallen away under critical examination, and the impression remains of a brave, honest Englishman, earnest in every cause he championed, who loved to praise those who befriended him, and who could suffer reverses in silence and dignity. The standard edition of Dryden's works is that edited by Walter Scott in 18 volumes in 1808 and re-edited by George Saintsbury (Edinburgh, 1892-93). For lives of Dryden, see Samuels, Dryden in English Men of Letters Series (1881); Christie, Memoir in Globe Edition of Dryden's Poems (London, 1870); Ivory in Dictionary of National Biography (Paris, 1882, 5th ed., 1883); Collins, Memoir in The Satires of Dryden (London, 1893). See also Ker in Introduction to The Writings of John Dryden (Oxford, 1901). The Conversion to the Roman Catholic Faith in Publications of the Modern Language Association of America (June, 1907), new series, XV, Pt. II: Delamiére, Le public et les hommes de lettres en Angleterre au dix-huitième siècle (Paris, 1883).

Charles Dryden, eldest son of John Dryden the poet, b. at Charlton, in Wiltshire, England, in 1665 or 1666; d. in 1704. He was educated at Westminster, and elected to Trinity College, Cambridge, in 1683, but could not enter, being barred by his father's debts to the second volume of his father's Miscellany. He left Cambridge in 1685, and entered into the seventh satire for the translation of Juvenal in 1692. He then went to Italy and became chamberlain to Pope Innocent XIV, coming back to England in 1697 or 1698. He was drowned in the Thames and was buried at Windsor, 20 August, 1704.

Dry Mass. See Mass.

Dualism (from Lat. duo, two), like most other philosophical terms, has been employed in different meanings by different schools.—First, the name has been used to denote the religious or theological system which would explain the universe as the outcome of two eternally opposed and coexisting principles, conceived as good and evil, light and darkness, or some other form of conflicting powers. We find this theory widely prevalent in the East, and especially in Persia, for several centuries before the Christian Era. The Zend-Avesta, ascribed to Zoroaster, who probably lived in the sixth century B.C. and is supposed to be the founder or reformer of the Medo-Persian religion, explains the world as the outcome of the struggle between Ormuzd and Ahriman. Ormuzd is infinite light, supreme wisdom, and the author of all good; Ahriman is the principle of darkness, and the cause of evil. In the third century after Christ, Manes, for a time a convert to Christianity, developed a form of Gnosticism, subsequently styled Manichaeism, in which he sought to fuse some of the elements of the Christian religion with the dualistic creed of Zoroastrianism (see MANICHAEISM). Christian philosophy, expounded with minor differences by theologians and philosophers from St. Augustine downwards, holds generally that physical evil is the result of the necessary limitations of finite created beings, and that moral evil, which alone is evil in the true sense, is a consequence of the creation of beings possessed of
free wills, and is tolerated by God. Both physical and moral evil are to be conceived as some form of privation or defect of being, not as a positive entity. Their existence is thus not irreconcilable with the doctrine of theistic monism.—Second, the term dualism is employed in opposition to monism, to signify the view that the existing universe contains two radically distinct kinds of being or substance—matter and spirit, body and mind. This is the most frequent use of the name in modern philosophy, where it is commonly contrasted with monism. But it should not be forgotten that dualism in this sense is quite reconcilable with a monism of all things. The theistic doctrine of creation gives a monistic account of the universe in this sense. Dualism is thus opposed to both materialism and idealism. Idealism, however, of the Berkeleian type, which maintains the existence of a multitude of distinct substantial minds, may, along with dualism, be described as pluralism.

Historically, in Greek philosophy as early as 500 B.C., we find the Eleatic School with Parmenides as their chief, teaching a universal unity of being, thus exhibiting a certain affinity with modern German monism. Being alone exists. It is absolutely one, eternal, and unchanging. There is no relinquishing of being. Seeing changes and plurality of beings are mere appearances. To this unity of being Plato opposed an original duality—God and unproduced matter, existing side by side from all eternity. This matter, however, was conceived as indeterminate, existing with God, and governed by necessity, in contrast with mind which sets according to plan. The order and arrangement are due to God. Evil and disorder in the world have their source in the resistance of matter which God has not altogether vanquished. Here we seem to have a trace of the Oriental speculation. Again there is another dualism in man. The rational soul is a spiritual substance distinct from the body within which it dwells, somewhat as the charioteer in the chariot. Aristotle is dualistic on many important topics. The contrast between the fundamental conceptions of matter and form—of a potential and an actualizing principle—runs through all branches of his system. Necessarily coeval with God, Who is pure actuality, there has existed the passive principle of matter, which in this sense, however, is mere potentiality. But further, also, with God Who is the Prime Mover, there have also existed from all eternity the World moved by God. In his treatment of cognition Aristotle adopts the ordinary common-sense view of the existence of individual objects distinct from our perceptions and ideas of them. Man is an individual substantial being resulting from the confluence of the two principles—form (the soul) and matter.

Christians rejected all forms of a dual origin of the world which erected matter, or evil, or any other principle into a second eternal being coexistent with God, and taught the monistic origin of the universe from one, infinite, self-existing spiritual Being. Being proceeded from God, and not God from Being. The unfamilial conception of free creation, however, met with considerable opposition in the schools of philosophy and was abandoned by several of the earlier heretics. The neo-Platonists attempted to lessen the difficulty by emanative forms of pantheism, and also by inserting intermediate beings between God and the world. But the former method implied a materialistic conception of God, while the latter only postponed the difficulty. From the thirteenth century, through the influence of Albertus Magnus and William of St. Thomas Aquinas, the philosophy of Aristotle, though subjected to some important modifications, became the accredited philosophy of the Church. The dualistic hypothesis of an eternal world existing side by side with God was of course rejected. But the conception of spiritual being as opposed to matter received fuller definition and development. The distinction between the human soul and the body which it animates was made clearer and their separability emphasized; but the ultra-dualism of Plato was avoided by insisting on the intimate union of soul and body to constitute one substantial being under the name of mind.

The problem of dualism, however, was lifted into quite a new position in modern philosophy by Descartes (q.v.). Indeed, since his time it has been a topic of central interest in philosophical speculation. His handling, however, of the two distinctions, the one epistemological, the other metaphysical, brought this out. The mind and substance in a cogitans stand in the external world, and in a causal relation to the changes within the body. What is the precise nature of each of these relations? According to Descartes the soul is res cogitans. Its essence is thought. It is simple and unextended. It has nothing in common with the body, but is connected with it in a single point, the pineal gland in the centre of the brain. In contrast with this, the essence of matter lies in extension. So the two forms of being are utterly disparate. Consequently the union between them is of an accidental or extrinsic character. Descartes thus approximates the monism of character to the theory of chimeras. Soul and body are really two merely allied beings. How then do they interact? Real reciprocal influence or causal interaction seems impossible between such disparate things. Gualter and other disciples of Descartes were driven to invent the hypothesis of occasional uncausally or totally and Divinity according to which it is God Himself who effects the appropriate change in either body or mind on the occasion of the corresponding change in the other. For this system of miraculous interferences Leibniz subverted the whole theory of monism and Divinity according to which God has coupled pairs of bodies and souls which are destined to run in parallel series of changes like two clocks started together. The same insoluble difficulty of psycho-physical parallelism remains on the hands of those psychologists and philosophers at the present day who reject the doctrine of the soul as a real being capable of acting on the body which it informs. The ultra-dualism of Descartes was immediately followed on the Continent by the pantheistic monism of Spinoza, which identified mind and matter in one infinite substance of which they are merely "mod-2s."

The cognitional question Descartes solves by a theory of knowledge according to which the mind immediately perceives only its own ideas or modifications. The belief in an external world corresponding to these ideas is of the nature of an inference, and the guaranteeing of this inference or the construction of a reliable bridge from the subjective world of thought to the objective world of material being, was thenceforth the main problem of modern philosophy. Locke similarly taught that the mind immediately apprehends only its own ideas, but he assumed a real external world which corresponds to these ideas, at least as regards the primary qualities of matter. Berkeley, accepting Locke's assumption that the mind immediately cognizes only its own ideas, raised the question: What grounds have we for believing in the existence of a material world corresponding to these ideas? He concludes there are none. The external cause of these ideas is God Who awakens them in our minds by regular laws. The dualistic opposition between mind and matter is thus got rid of by denying an independent material world. But Berkeley still postulates a multitude of real substantial minds distinct from each other and apperceive God. This is the idealistic pluralism. Hume carried Berkeley's scepticism a step further and denied the existence of permanent spiritual substances, or minds, for grounds similar to those on which Berkeley rejected material substances. All we know to exist are ideas of greater or
less vividness. Kant repudiates this more extreme scepticism and adopts, at least in the second edition of his chief work, a form of dualism based on the distinction of phenomena and noumena. The mind immediately perceives only its own representations. These are innate memory-images; the cause of these phenomenal representations, are beyond our power of cognition. Fichte rejected things-in-themselves outside the mind, and reduced the Kantian dualism to idealistic monism. The strongest and most consistent of the defenders of dualism in modern philosophy have been the Schott School, including Reid, Stuart, and Hamilton. Among English writers in more recent times Martineau, McCosh, Miavart, and Carse have carried on the same tradition on similar lines.

The problem of dualism, as its history suggests, involves two main questions: (1) Does there exist a material world outside of our minds and independent of our thought? (2) Supposing such a world to exist, how does the mind attain to the cognition of it?—The former question belongs to epistemology, the latter to metaphysics.

It is true that dualism is ultimately rejected by the materialist, who reduces conscious states to functions or "aspects" of the brain: but objections from this standpoint will be more suitably dealt with under materialism and monism. The idealist theory since Berkeley, in all its forms, maintains that only our own states or representations, and that what we suppose to be an independent material world, is, in the last analysis, only a series of ideas and sensations plus belief in the possibility of other sensations. Our conviction of the objective reality of a vivid consistent dream is analogous to our conviction of the validity of our waking experience. Dualism affirms, in opposition to all forms of idealism, the independent extramental reality of the material world. Among its chief arguments are the following: (1) Our belief in the existence of other minds is an inference from our own states. Consequently the denial of an external material world involves the rejection of all evidence for the existence of other minds, and lands the idealist in the position of "Solipsism". (2) Physical science assumes the existence of a material world, existing when unperceived, possessing various properties, and exerting various powers according to definite conditions. Astronomy, for example, describes the movements of heavenly bodies moving in space of three dimensions, attracting each other with forces inversely proportional to the square of the distance. It postulates the movement and action of such bodies when they are invisible as well as when they are visible through long periods of time and over vast areas of space. From these assumptions it deduces future positions and foretells eclipses and transits many years ahead. Observations carried out by subsequent generations verify the predictions. Were there not an extramental world whose parts exist and act in space and time, it could not be mirrored by our cognitions and ideas, such a result would be impossible. The branches of science dealing with sound, light, heat, and electricity are equally irreconcilable with idealism. (3) The teachings of physiology and psychology bear particularly absurd in the idealist theory. What, for instance, is meant by saying that memory is dependent on modifications in the nervous substance of the brain, if all the material world, including the brain, is but a collection of mental states? (4) Psychology similarly assumes the extramental reality of the human body in its account of the growth of the senses and the development of perception. Were the idealist hypothesis true its language would be meaningless. All branches of science thus presuppose and confirm the dualistic view of common sense.

Granted, then, the truth of dualism, the psychologicaquestion emerges: How does the mind come to know the material world?—Broadly speaking there are two answers. According to one the mind immediately perceives only its own representations or ideas and from these it infers external material objects as present. And the other, which holds a mediate cognizance of the non-ego, as the inferred cause of a representation immediately apprehended, he terms hypothetical dualism or hypothetical realism. The doctrine of immediate or presentative perception is that adopted by the great body of the Scholastic philosophers and is enshrined in the dictum that the idea, concept, or mental act of apprehension is non id quod percipitur sed medium quae percipi est—nor that which is perceived but the medium by which the object itself is perceived. This seems to be the only account of the nature of knowledge that does not imply to idealism.

The history of the subject confirms this view. But affirmation of the mind's capacity for immediate perception of the non-ego and insistence on the distinction between id quod and id quod percipitur, do not dispose of the whole difficulty. Modern psychology has become genetic. It is posits that the material world is the growth and development of cognition from the simplest and most elementary sensations of infancy. Analysis of the perceptive processes of a later age, e.g. apprehension of size, shape, solidity, distance, and other qualities of remote objects, proves that operations seemingly instantaneous and immediate may involve the activity of memory, imagination, judgment, reasoning, and subconscious contributions from the past experience of other senses. There is thus much that is indirect and inferential in nearly all the perceptual acts of mature life. This should be frankly admitted by the defender of natural dualism, and the chief psychological problem for him at the present day is to sift and discriminate what is immediate and direct from what is mediate or representative in the admittedly complex cognitive operations of normal adult life.

DuBlin (Dublinum): ArchiCoe e of (Dublinensis), occupies about sixty miles of the middle eastern coast of Ireland, and penetrates inland about forty-six miles, including all the County of Dublin, nearly all of Wicklow, and parts of Kildare and Wexford, with the exception of the Counties of Limerick and Leitrim. Dublin is divided into the City and County. It covers an area of 629,277 statute acres.

Ptolemy, who flourished in the first half of the second century, on his famous map places Eblana civitas under the same parallel of latitude as the present city of Dublin. The first mention of Dubhlinn appears in the "Annals of the Four Masters", under date of 291, where the name, which in English signifies a black pool, is quoted as that of a river on the bank of which a battle was fought by the King of Ireland against the Leinstermen. A river still empty into the Liffey at Dublin, now known as the Foddle River, but formerly designated the Pool
or Pole, clearly a survival of the earlier Black-Pool. The natives distinguished the locality as AthCloth, i.e., "The Ford of Hurdles", from the wicker bridge or ford by which the great road from Tara was conducted across the Liffey into Uídallán (South County Dublin and Wicklow). In so, when Aulaf (Old) the Dane invaded Ireland and subjected all the contending tribes of Danes, he erected a fortress on the triangle of elevated land formed by the confluence of the Dubhlinn with the Liffey, a site now occupied by Dublin Castle. This fortress, taking its name from the river over which it stood, was immediately selected and consecrated bishop for the Dublin district. To him, regarded as the Apostle of Ireland, the See of Dublin looks as to its founder. His first visit after brief landings at Wicklow, Malahide, and Holmpatrick, was to his old slave-master in the northern parts of the country. But so soon as he was able to gather the bishops of Leoghaire, King of Ireland, to preach the Gospel throughout the land, he visited every part of the island and made innumerable converts. At Kilkenny, in the Dublin Diocese, he established a bishop, and another at Lusk, while there are few parishes in the diocese that do not lay claim to a visit from him. Soon after his death in 492, the monastic system, which Patrick had himself partly initiated, became the settled form of ecclesiastical organization in Ireland. The number of tribes into which the country was divided, and the fierce inter-tribal jealousy that prevailed at all times, rendered this system the most desirable. Each tribe had its own monastic establishment with a portion of the tribe lands set apart for its endowment, and in most of these centres a bishop was to be found, frequently (but not necessarily) the ruler of the community. It was in such establishments that the ecclesiastical jurisdiction was centred. In this way we must mention from time to time of bishops at Kilconly, Lusk, Swords, Finglas, Glendalough, Taney, Clondalkin, Castledermot, and Bray. We have no existing records and but scant traditions of any monastic establishment known as Dublinable, but a tribe did lie scattered along the valley of the Combe, and who may have taken its name, as did the Danish fortress later on, from the Dubhlnna which meandered through its midst. The old church-dedications, which were certainly Celtic, of Patrick, Bridget, Kevin, and Mac-Thomas, among their neighbours, would point to such a conclusion. Such a tribe would undoubtedly have had its monastery with its resident bishop. If this surmise be correct, it would help to explain a list of bishops given in Harris's edition of Ware's "Antiquities of Ireland", and described as Bishops of Dublin; whilst from the inevitable practice they all seem to have adopted, of embarking in some foreign missionary enterprise, they can scarcely be regarded as diocesan bishops in the accepted sense of the term, i.e., as prelates sedevacant to their sees.

The first of these bishops that we meet with is St. Livinus. He travelled into Belgium, where he converted many, and was at length crowned with martyrdom, 12 November, 665, in which month his feast is celebrated. To him succeeded Disibod, who being driven out by violence went to Germany, and after forty years' labour in the neighbourhood of Disibodenberg, having lived there as a hermit, died a hermit and was buried about 675. St. Wiro is next. He emulated the example of Livinus and passed over into Gaul. There, at the request of Pepin, he established himself about 700 at Roemond in Holland, where a portion of his relics is preserved under the high altar of the cathedral dedicated to him. St. Gualafer is mentioned as bishop in Scandinavian Dublin in the ninth century, but of his life nothing is known except that he baptized and instructed his successor, who figures more conspicuously. St. Rumold was certainly Irish-born, and is reputed to have been some time Bishop of Dublin. He cherished an ardent desire for martyrdom, and setting out for Rome there received the pope's blessing. On his return journey he preached at Mechin with great zeal and success. Having had occasion to rebuke certain public sinners, he met at their hands the longed-for martyrdom. He is the patron of Mechin, whose splendid cathedral is dedicated to him, and his relics are preserved in a sumptuous silver shrine. St. Sebulus, who died in 785, is given by some writers as "Bishop of Dublin", by others as "Abbot of Dublin". In all probability he filled both offices. In or about 790 there is mention of Cornius as bishop. Ware could learn nothing about him. D'Alton says he was a missionary Bishop when Gregory, King of Scotland, besieged and captured Dublin.

**Danish Period.**—The year 815 is commonly assigned as the date when Scandinavian invaders began to make permanent settlements in Ireland. They were succeeded by more piratical expeditions. They landed, plundered, and departed. But that year Turgesius and his followers came to stay. The "Annals of the Four Masters" tell us that in 849 the Dubhgoill or "black foreigners" arrived at AthCloth and made a great slaughter of the Finngoll or "white foreigners". Shortly after, the former gained a still more decisive victory. Finally in 852 Aulaf (Old) invaded Ireland, "and all the foreign tribes submitted to him". Thus was founded the Danish city and kingdom of Dublin. Aulaf was succeeded by Ivar in 870, and as the latter was at the same time King of Northumbria, this dual sovereignty of the Danish kings of Dublin was with occasional brief interruptions maintained throughout a period of nearly a century and a half. Paganism was of course the cult of these rude Norsemen. They sedulously practised the worship of Thor and Woden, and thus during a great portion of their prolonged rule in Dublin its Christian history becomes a blank, varied at intervals by doleful recitals of the burning and plundering of celebrated monasteries, such as Glendalough, Lusk, Swords, Clondalkin, etc. The first of the Danish kings to embrace Christianity was Sitra, who was baptised in England, and married a daughter of Alfred in 925. But he very soon abjured the Faith, abandoned his wife, and died a pagan. His son, however, Aulaf Curann, on visiting England, was there converted in 943, and received at baptism by King Edmund. He remained firm in the Faith, and going to Iona on a pilgrimage in 947, died there "after penance and a good life". It was the conversion of this Aulaf and his family, aided by the efforts of Northumbrian monks whom he had brought over with him, that led to the conversion of the Danes of Dublin which chroniclers assign to 948.

The great victory won by King Brian Boru on the plain of Clontarf in 1014 broke for ever the power of the Danes in Ireland, but it did not dispossess them of Dublin. Their kings continued to rule there for a century and a half; nevertheless, the completeness of the victory, together with the civilizing effects of
Christianity, disposed the contending races to more friendly intercourse, and enabled Celt and Dane henceforward to live together in comparative peace. In 1038, little more than twenty years after the battle of Clontarf, we find another King Brian (11) at Dublin, who, seeing that the subjects had all become Christians, was moved to organize the Church on a proper hierarchical basis. Wherefore in that year he founded and endowed a cathedral dedicated to the Holy Trinity (since Queen Elizabeth's time appropriated to Protestant worship and known as Christ Church). To much in his cathedral he had a bishop appointed and consecrated; with this first bishop of the Danish Christians in Dublin, the See of Dublin may be said to have been formally founded. Having received their Christianity from Northumbria, the Danes looked to Canterbury for their spiritual government, and had their first bishop, Donatus, consecrated by the Archbishop of Canterbury. Except in faith and general discipline they were in no way identified with the rest of Christian Ireland.

Donatus died in 1074 and was succeeded by Patrick, who bore commendatory lettersto Lanfranc and was consecrated by him in St. Paul's, London. After ruling the diocese for about ten years he perished at sea in 1084. Donat O'Haingly, evidently an Irishman, came next. He wasa Benedictine monk in Lanfranc's monastery at Canterbury. By consent of the king and of the clergy of Dublin, he was consecrated by Lanfranc in 1085; he died of the plague in 1095. To him succeeded his nephew Samuel O'Haingly, a Benedictine monk of Glendalough. As the bishop of Meath, he was consecrated at Winchester by Saint Anselm on the Sunday after Easter, 1096, and died in 1121. It was to this prelate that St. Anselm administered the sharp rebuke for having removed the monks from his church, from which we may infer that it was at this period that a chapter of secular canons was established in the cathedral, its clergy having been previously monastic. Gregory was chosen as successor. He is described as a wise man and well skilled in languages. He was consecrated at Lambeth by Ralph, Archbishop of Canterbury.

Twelfth-Century Reforms.—During Gregory's incumbency great and far-reaching changes were wrought in the ecclesiastical organization of Ireland. Up to this time, except in the Danish towns of Dublin, Waterford, and Limerick, the old system of centring jurisdiction in the monastery of the dean with a bishop resident, almost universally prevailed, but Gillebert (Gilbert), Bishop of Limerick, who had travelled much, and had made the acquaintance of St. Anselm, received a strong letter from the latter exhorting him to do his utmost, in union with the Irish bishops, to reform certain abuses and bring the system of ecclesiastical government more into conformity with the religious practice of Christendom. Whereupon Gillebert having received legatine powers from Paschal II convoked a synod which met at Rath-Breasail in 1118. At this synod the number of sees was fixed at twenty-four, Dublin excluded. Glendalough, the church founded by St. Kevin in the sixth century, was definitely erected into a diocese, but the Danish See of Dublin was ignored, or if referred to, it is described as being in the Diocese of Glendalough, for the latter came up to the very walls of Dublin and surrounded them on all sides. St. Malachy, consecrated Bishop of Armagh about 1127, followed up the work of Gillebert, and, on the occasion of a journey to Rome, besought Innocent II to constitute the Bishops of Armagh and Cashel metropolitans and transmit the pallium to them. Before his request could be fully considered, Malachy on a second journey fell sick on the way, and died at Clairvaux in the arms of St. Bernard (1148). The object of his journey, however, was not lost sight of, and in 1151, Eugene III commissioned Cardinal Paparo to proceed to Ireland and establish there four metropolitans, giving him the palliums with which each was to be invested. The cardinal on his arrival convoked a general synod at Kells in 1152. At this synod Armagh, Dublin, Cashel, and Tuam, were created archiepiscopal sees, with canonical jurisdiction over their suffragans, and each of the new archbishops received the pallium. In this way Gregory became the first Archbishop of Dublin, by him were given to him as suffragans the Sees of Kildare, Ossory, Leighlin, Ferns, and Glendalough. In a document drawn up by the then Archbishop of Tuam, in 1214, the cardinal is described as finding on his arrival in Ireland, a bishop dwelling in Dublin, who at the time exercised his episcopal office without

in the walls. "He found in the same diocese another church in the mountains, which likewise had the name of a city [Glendalough] and had a certain story of its beginnings. But he delivered the pallium to Dublin which was the best city and appointed that the diocese [Glendalough] in which both these cities were should be divided, and that one part thereof should fall to the metropolitans. This secured the North County Dublin known as Fingall, from Glendalough Diocese and annexed it to Dublin. Thus was the Church in Ireland reorganized in strict hierarchical form, and all dependence upon Canterbury was brought to an end.

Archbishop Gregory died in 1161 and was buried in the Holy Trinity Cathedral. To him succeeded Lorcan (latinized Laurence) O'Toole, son of Muriartach, Prince of Uimaile. His mother was an O'Byrne, so that he was Irish of the Irish. Entrusted at an early age to the care of the Bishop of Glendalough he grew up a pious and exemplary youth and eventually became a monk there. When but twenty-five years old he was elected abbot and a few years later bishop of the see. This choice, however, he successfully withstood. But his resistance did not long avail him. As soon as the See of Dublin was vacated both clergy and people turned their eyes on the Abbot of Glendalough and would not be refused. He was consecrated in Dublin cathedral by Gelasius of Armagh in 1162. His first act was to induce the canons of his chapter to become canons regular according to the rule of the priory of Arosaia. He himself assumed the religious habit with them and scrupulously conformed to the rule. He was indefatigable in his work and boundless
in his charity. In 1167 he attended a great convention held at Athboy at the request of King Roderic O’Connor, and helped there to enact several decrees affecting ecclesiastical discipline. In the following year the ill-starred Dermot MacMurrough set out for England to negotiate the betrayal of his country. In 1169 the first expedition of the Anglo-Normans landed in Ireland, and Wexford and Waterford soon fell before them. They then marched on Dublin, and in this expedition Strongbow was joined by the army of Dermot. Haseulf, the Danish king, made a sturdy defence, but eventually the city was captured and Haseulf and his followers escaped to their ships. In 1171 they returned with a number of Norwegians collected at Orkney and the Isles, and attacked the eastern gate of the city. St. Laurence implored King Roderic to come to their aid; the latter did assemble an army, but their operations were ineffectual, and the grip of the Norman fastened on Dublin, never again to be relaxed. King Henry II of England landed this same year, and received at Dublin the fealty of most of the native princes. Thenceforward Ireland became an appanage of the English Crown.

Early in the following year a synod was held in Cashel by order of Henry, at which Laurence assisted and where among other disciplinary regulations, the system of tithes was introduced, as is commonly believed. With the aid of Strongbow and other Norman chiefs he was enabled to enlarge and beautify Christ Church, i.e. Holy Trinity Cathedral, and the transepts and one bay of the choir remain to this day evidences of his work. In 1177 Cardinal Vivian arrived in Ireland as papal legate, summoned a meeting of bishops and abbots, and meditated obedience to the conquerors. In 1179 Archbishop Laurence went to Rome to attend the Third General Council of the Lateran under Alexander III. The pope received him with marked kindness, took his see under his protection, confirmed its possessions, and extended its boundaries on the south as far as Bray. He also appointed him legate in Ireland. Some time in 1180 the archbishop again crossed to England for the purpose of interviewing King Henry in the interests of his people, but Henry had no wish to see him and fled into Normandy. Laurence, nothing daunted, quickly pursued him, but had severely landed on the Norman coast when he fell seriously ill. He asked to be brought to the community of Clone Regular established at Eu, and there died peacefully 14 November, 1180. He was canonized by Honorius III in 1223, and his relics, being transferred, were placed over the high altar in a costly shrine where they are still devoutly venerated. His feast is celebrated in Dublin each recurring 14 November with great pomp and solemnity, and a parish church in that city is specially dedicated to him.

Norman-English Archbishops.—With the passing of St. Laurence, the Irish character of the newly constructed hierarchy, as far as Dublin was concerned, was brought to a premature close. The conquerors brought with them a colony of Bristol men and settled them in Dublin, and they brought all their feudal privileges and customs, prominent among which was the right of the English monarch to nominate to vacant sees within his dominion, this with the concurrence of the Holy See. In the exercise of this prerogative, Henry II named John Comyn, an Englishman, as successor to Laurence. Henceforward, for full four centuries, the see was occupied by an unbroken line of twenty-five archbishops, all Englishmen, born, bred, and benefited in England. Comyn proceeded to Rome where he was first ordained priest, and then consecrated bishop, by Lucius III at Velletri. He did not take up his residence in Dublin until 1184. The king conferred additional lands upon him to be held in barony tenure, by virtue of which he became a Lord of Parliament. In 1185 he received Prince John on his landing in Ireland, and in the same year the Diocese of Glendalough was united to Dublin; this union, however, was not to take effect until after the death of the governing bishop, William Piro. In 1190 he assembled a provincial synod in Christ Church cathedral at which several important canons were enacted. In 1190 he undertook the work of building a new church just outside the city wall. He erected it on the site of an old Celtic church dedicated to St. Patrick, but preserved the original dedication and dedicated it with great solemnity on Patrick’s Day, 1191. In connexion with this church he founded and endowed a collegiate chapter of thirteen canons and erected an episcopal residence close by, which became known as St. Nepleuche’s.

Archbishop Comyn died in 1212 and was succeeded by Henry de Loundres, Archdeacon of Stafford. Two years later William Piro, Bishop of Glendalough, died, whereupon the union of the sees promised by King John took place. De Loundres’s principal work was the conversion of the collegiate chapter established by his predecessor in connexion with St. Patrick’s, into a cathedral chapter, with four dignities and an increased number of prebendaries. This change presented the singular spectacle of a city having two cathedrals, with two chapters, one monastic, the other secular, an arrangement which led to a good deal of friction and gave much trouble to succeeding archbishops. In 1228 de Loundres was succeeded by Archbishop Luke, brought over from London. Flourishing as he did in the period of cathedral building, we need not be surprised to learn that he caught the infection, and practically re-erected St. Patrick’s as we have it today, and put the nave to Christ Church as we see it in its restored condition. It is scarcely necessary to go through nominating the series of English bishops who filled the see during the medieval period. Suffice it to mention, that as most of them held some government post, such as lord chancellor, or lord treasurer, in conjunction with the archbishopric, their spiritual influence was thereby rendered obnoxious to the native clans of the O’Byrnes and O’Tooles, when they shook off the English yoke during the fourteenth and fifteenth centuries. The Holy See, not to leave the natives without episcopal care, was compelled to provide a bishop for them, titularly of Glendalough, and the rubricelle in the Vatican Library furnish a list of six such bishops who presided over the mountainous region of the diocese well into the reign of Henry VIII.
his religious vagaries into Ireland. He kept the see vacant for nearly a year, and then filled it without any reference to the pope, by the appointment of George Browne. Browne had been provincial of the suppressed Augustinian Hermitage in England, and was the bond slave of Henry, ready to do his master’s biddings. He was consecrated by Cranmer, 19 March, 1535-6, and took up his residence in Dublin in August, 1536. The antecedents of Browne and the schismatical char-

acter of his appointment did not recommend him to the Dublin clergy. He complained of their resistance to his injunctions and was compelled to send round his own servants in order to cancel the pope’s name in the service-books. A sharp warning from the king stirred him up to more demonstrative action, and forthwith he had all holy relics preserved in Christ Church cathedral, including St. Patrick’s crosier known as the “Staff of Jesus”, gathered into a heap and burned. He co-operated only too gladly in the suppression of all the religious houses, in changing the prior and convent of Christ Church into a secular dean and chapter, and in the total suppression of St. Patrick’s chapter. Under Edward VI he introduced that monarch’s new liturgy, as found in his first “Book of Common Prayer”, into the cathedral, and finished by taking a wife.

With the accession of Queen Mary all things Catholic were restored, and Browne, being convicted of being a married bishop, was deposed. The queen filled the vacant see by nominating Hugh Curwen, Dean of Hereford, yet another Englishman, and the royal nomination was confirmed at Rome. She also re-established the dean and chapter of St. Patrick’s. While the queen survived, unhappily not long, Curwen behaved as a Catholic; but on the accession of Elizabeth, he was ready to worship the rising sun, to accept her royal supremacy and Act of Uniformity, and eventually to transfer to the See of Oxford as its Protestant bishop. This apostasy, coupled with the severe persecution of Catholics which continued through the whole of Elizabeth’s reign, left the See of Dublin without a Catholic bishop for full forty years. The compensations were, however, a firm and faithful clergy and people, and a long roll of martyrs and confessors.

Era of Persecution.—Some attempt was made by the Holy See to provide a bishop in 1585 by appointing a certain Donald or Donatus, but he did not live to take possession, and not until 1600 was his successor appointed in the person of Matthew d’Oviedo, a Spanish Franciscan. Though he came to Ireland, he dared not set foot in his diocese, but governed it through vicars-general, three of whom successively ended their days in prison. Finally about 1611 d’Oviedo returned to Spain and resigned the see, being succeeded by Dr. Eugene Matthews, transferred from Clough. Dr. Matthews laboured hard and in most difficult times. In 1615 he called a provincial synod in Kil-
rrogative of nominating to vacant sees; the claim being admitted, he named Peter Creagh, Bishop of Cork, as Archbishop of Dublin. Dr. Creagh was an exile in France, and was obliged to govern through a vicar-general. He went himself as auxiliary to the Bishop of Strasburg where he died in 1705. Of the six archbishops who filled the see in the seventeenth century, two could never set foot in the diocese, two died in exile, and two in prison. When the penal laws commenced their ferocious career (1708) Ireland was reduced to a single bishop, the Bishop of Dromore, and he was confined in Newgate Prison, Dublin. The new hierarchy sprang from his prison cell. Therein was consecrated (1707) Dr. O'Rorke, Bishop of Killala, and once established in the Apostolic office, he imposed hands on the newly chosen Archbishop of Dublin, Dr. Edmund Byrne, parish priest of St. Nicholas.

The population and extent of Dublin had been steadily increasing ever since the Restoration, and new quarters had grown up. Dr. Byrne's first care was to erect these into parishes. To him owe their origin St. Mary's, St. Paul's, and St. Andrew's. In 1710 the oath of abjuration, aimed against the Stuarts, but full of other objectionable matter, raised a new storm of persecution, and Dr. Byrne for a time was forced to hide with his relatives in Killare. With

varying vicissitudes he continued to rule the diocese until his death in January, 1723-4. He was succeeded by Dr. Edward Murphy, transferred from Killare. This archbishop continued to date his letters, according to the well-known formula of hunched bishops: e loco refuge nostris, i.e. from our place of refuge. He died in 1729 and was followed by Dr. Luke Egan, translated from Meath, who died in 1734, and had for his successor Dr. John Linegar, a native of Dublin, who lived until 1757, when his coadjutor Dr. Richard Lincoln, also a native of the city, succeeded him. In 1763 he died, and was followed by Dr. Patrick Fitzsimon who governed the see until 1770, when Dr. John Carpenter succeeded. With him may be said to commence the modern history of the diocese, for he was the first of the archbishops, since Archbishop Alan's time, who left behind him, carefully compiled, detailed records of the diocese. He died on 29 October, 1790.

RESTORATION OF CATHOLIC LIFE.—With a rapidity extraordinary for that time, Dr. John Thomas Troy, a Dominican, was transferred 9 December, 1786, from Osuna to the Archdiocese of Dublin. For thirty-seven years he governed the Church of Dublin well and wisely. He witnessed the first assertion of Catholic rights, took part in the foundation of Maynooth College, and laid the foundations stone of the metropolitan church in Marlborough Street, which still does duty as pro-cathedral. Archbishop Troy saw the beginnings of the Christian Brothers and the restoration of the Jesuits, while churches and schools multiplied under his eyes. He died in 1821 and was buried in the vaults of the new metropolitan church not yet quite ready for use.

His coadjutor, Dr. Daniel Murray, a native of Wicklow, succeeded him. Educated in Salamanca, he was an eloquent, cultured, and pious ecclesiastic, deputed by his papal predecessor "the ambassador of Ireland." To him belong the completion of the pro-cathedral, the founding of the Irish Sisters of Charity, and the communities of Loretto. He witnessed the achievement of Catholic Emancipation in 1829, the wonderful career of the Liberator, Daniel O'Connell, of the great temperance movement under Father Mathew, and the establishment of a system of national (primary) education of which he himself was appointed a commissioner. The awakening of a nation and of a church to a new life and increased responsibilities was accomplished in his time. He died in 1852 regretted by all, and was buried in the Marlborough Street vaults, where in the church above them, a beautiful kneeling statue by Sir Thomas Farrell, adorns the northern transept. Archbishop Murray was followed by Dr. Paul Cullen (q. v.), then Archbishop of Armagh, who in June, 1852, was solemnly consecrated in the cathedral of Dublin. He founded the diocesan seminary and the Mater Misericordiae Hospital. He inaugurated innumerable new churches, colleges, and schools, and became the recognized champion of Catholic education all the world over. In 1866 he was made cardinal—Ireland's first cardinal. In 1870 he took a distinguished part in the Vatican Council, and in 1875 presided over the National Synod of Maynooth. In 1878 he went to Rome to assist at the conclave which elected Leo XIII, but arrived late, and in October of that year passed to his reward. He is interred in the crypt of the college chapel at Clonliffe, a fine marble statue perpetuates his memory in the pro-cathedral.

In October, 1878, Dr. Edward McCabe, consecrated assistant bishop in 1877, was raised to the archiepiscopal office. His administration was short. In 1882 Pope Leo conferred on him the dignity of cardinal. Never in very robust health, he died in February, 1883. He was interred at Glasnevin where a handsome mausoleum is erected to his memory. In July, 1885, the Most Rev. William J. Walsh was appointed to succeed him.

STATISTICS.—The status of the diocese (1908) is as follows: archbishop 1; bishop (of Canea) 1; parishes, 71; parish priests, 70; administrators, 4; curates etc., 190; in diocesan seminary, 9; chaplains, 21; secular clergy, 293; regular clergy, 247; public churches, chapels, and oratories, 193; convents, 93. Catholic population (Vital Statistics of 1908), 407,514; non-Catholic population, 112,983; total, 520,012.

The religious orders are very well represented in Dublin by houses of Augustinians, Capuchins, Carmelites, Dominicans, Franciscans, Holy Ghost Fathers, Jesuits, Lazarists, Marists, Oblates, and Passionists. Dublin is the residence of the Superior General of the Irish Christian Brothers and the seat of their novitiate. Numerous sisterhoods, both within and without the city (Sisters of Charity, Mercy, Loretto, Dominican, Presentation, Carmelite, Holy Faith, Sacred Heart, Poor Clares, Assumption, Bon Secours, Poor Servants, Heart of Mary, etc.) devote themselves to the usual works of education and charity (hospitals, orphanages, asylums for the aged poor, for the blind, and for deaf-mutes of both sexes, industrial schools, homes, refuges, lunatic asylums, etc.).

The Catholic University of Ireland, founded in 1854, consists since 1882 of the following (6) colleges located for the most part in the environs of St. Patrick's College, Maynooth; University College, St. Stephen's Green (Jesuits); University College, Blackrock (Holy Ghost Fathers); St. Patrick's College, Carlow; Holy Cross College, Clonliffe; and the School of Medicine, Dublin. Each of these colleges retains its
own independent organization. (For the history of this university see Cullen; MacHale; Newman; Ireland.) Other colleges are conducted by the Jesuits (Belvedere College), the Holy Ghost Fathers (Rathmines), the Carmelites (Terenure), and the Lazarists (Castleknock). The Holy Cross College (Clonliffe) is the diocesan college or seminary for aspirants to the priesthood. For the ecclesiastical seminary of St. Patrick's, Maynooth, see Maynooth College.

By the New Universities Act passed in 1908, the official existence of the Catholic University of Ireland was brought to a close. This Act suppressed the Royal University of Ireland, and created two new universities in Ireland, both strictly undenominational. One had its seat in Belfast, and absorbed the Queen's College already existing there; the other had its seat in Dublin, with a new college founded there, and absorbing the Queen's Colleges in Cork and Galway. The new Colleges of Dublin, Cork, and Galway, although undenominational under the Act, principally preserve Catholic interests, Dublin University (Trinity College) being left undisturbed and mostly frequented as well as governed by members of the Protestant Church. The Archbishop of Dublin is nominated, though not ex officio, a member of the Senate of the new university having a seat in Dublin, and also a member of the Statutory Commission charged by the Crown with the duty of revising and approving of the statutes of the several colleges comprised in the university.

Nicholas Donnelly.

Dubno. See Mostar.

Dubois, Guillaume, French cardinal and statesman, b. at Bruy, in Limousin, 1656; d. at Versailles, 1723. He was the son of an honourable physician and received his first education from the Fathers of the Christian Doctrine in his native place, whence he went in 1672, as beneficiary, to the College Saint-Michel in Paris. He had been engaged some nine years in private teaching when he was appointed (1683) sub-preceptor to the Duke of Chartres, nephew of Louis XIV, the full tutorship following four years later. When the Duke of Chartres became Duke of Orléans (1700), Dubois was made his secretary. During the regency of Philippe d'Orléans he rose in rapid succession to the high positions of state councillor (1716), secretary of foreign affairs (1717), Archbishop of Cambrai (1720), cardinal and surintendant des postes (1721), member of the Conseil de Vérence, and soon after, ministre principal (1722). The French Academy admitted him the same year and the Assembly of the French Clergy elected him president in 1723, the year of his death.

Owing to his humble birth, his stanch opposition to Jansenism, and his bold reversal of the aristocratic regime prevalent under Louis XIV, Dubois was disliked by the noblemen of his day. As the protectors of contemporary libels and Saint-Simon's memoirs, historians of France have long repeated against him such charges as corrupting the morals of his pupil, accepting money from England, seeking, though unworthy, ecclesiastical dignities, etc. The publication by révérends of Dubois's Memoirs, and concordance with the careful study of contemporary documents by Seilhae, Wiesener, and Bliard.—For the diplomatic papers preserved in the archives of the French, English, and Spanish foreign offices—have thrown a new light on the subject and partly verified the words of Fontenelle at the time of the reception of Cardinal Dubois into the French Academy: "Les siecles suivants en sauront davantage, fiez-vous à eux". Far from catering to his pupil's wantonness, Dubois did what he could to check it, and his Plan d'éducation pour la des Chartres shows a competent and conscientious tutor. The expediency of his foreign policy, resulting in the Triple Alliance of France, England, and Ireland against Spain, like the contrary policy of Cardinal de Bernis, must be largely a matter of opinion. In so far as Dubois was concerned, it was the best way of serving the interests of France and counteracting the intrigues of Alberoni. Stair and Stanhope had a high regard, almost amounting to admiration, for the minister of France, charge that bribery was resorted to is untrue. That Dubois was not set against the natural amity between France and Spain was shown later, when, after Alberoni's fall and the restoration of peace, he successfully negotiated the treaty of 1721 and the marriage of Louis XV with the Infanta and that of the Prince of the Asturias with Mlle de Montpensier. Dubois's career as a churchman is not above reproach. While there is no foundation for the oft-repeated assertion of his secret marriage, his gross license, and notorious impity even at the hour of his death, still it cannot be denied that he sought and used ecclesiastical dignities principally as props to his political prestige. Tonsured at the age of thirteen he bethtough himself of sacred Orders only in his old age, when, as a cardinal, the long coveted and long denied red hat, he asked for the Archbishopric of Cambrai merely as a stepping stone to the cardinalate.

The "Mémoires du cardinal Dubois" published by P. Lacroix (Paris, 1829) are apocryphal. His genuine writings were edited by Séverine. "Mémoires inédits du cardinal Dubois" (Paris, 1815).

DUBOIS 178

DUBOIS, Jean-Antoine, French missionary in India, b. in 1765 at St. Remèze (Ardeche); d. in Paris, 17 Feb., 1818. The Abbé Dubois was a director of the Se-
minary of the Foreign Missions, a member of the Royal Societies of Great Britain and Paris, and of the Literary Society of Madras. At the outbreak of the French Revolution he went to India to preach Christianity to the natives, whose favour he soon won by his amiability and patience. For their instruction he composed ele-ments on Christian doctrine which were of general commendation. Though he remained thirty-
two years in that arduous field, his labours were all fruitless and he returned convinced that the conver-
sion of the Hindus with the deep-rooted prejudices of centuries was impossible under the existing conditions.
This opinion which he broached in "Letters on the
State of Christianity in India," etc. (London, 1825),
was vigorously attacked in England. Two Anglican
ministers, James Hough and H. Townley, published,
refutation of his letters, to which the abbé rejoined in
a letter of much gravity and moderation. It found
its way into the "Bulletin des Sciences," May, 1825,
and the first volume of the "Asiatic Journal" (1841).
Besides these letters he wrote: "Description of the
Character, Manners and Customs of the People of
India, and of their Institutions, religious and civil"
(London, 1816). This work was bought by the East
India Company for twenty thousand francs and
printed at their expense. The author published an
enlarged edition in French under the title "Moeurs,
institutions, et cérémonies des peuples de l'Inde"
(Paris, 1825, 2 vols.), which is considered the best
and most complete work on the subject. "Exposé de
quelques-uns des principaux articles de la théologie
des Brahmes" (Paris, 1825); "Le Pantécha-tantra ou
les secrets de l'Inde," fables du Brabman Wichnu-Syri
(Paris, 1826). Abbé Dubois was also one of the collabora-
tors of the "Bulletin Universel des Sciences" of
the Baron de Férussac.

Edward P. Spillane.

Dubbob, John, third Bishop of New York, educator and missionary, b. in Paris, 24 August, 1764; d. in
New York, 20 December, 1842. His early education was received at home until he was prepared to enter the
College of St. Pierre at Besançon, where he had for fellow-stu-
dents Louis-Antoine Bugué and Jean-Baptiste Durand. Ordained priest in the Oratorian Seminary of St. Malo-
rie, 22 Sept., 1787, by Archbishop de Juigné, of Paris, he was appointed an assistant to the cure of St-Sulpice, and chaplain to the Sisters of Charity (Hospice des Petites Maisons). Forced to leave France, he fled to America in 1793, where he was ordained in 1788 and entered the Company of Saint Sulpice. He was superior of the seminary of Issy when the French Revolution broke out, and retired at first to Bordeaux. In 1794 he emigrated to the United States where he was welcomed by Bishop Carroll. He was president of Georgetown College from 1786 to 1799. After an unsuccessful trip to Havana where he attempted to open a school, he returned to Baltimore and became the first superior of Saint Mary's College.

On 18 August, 1812, he was appointed Apostolic Admin-
istrator of the Diocese of Louisiana and the Flori-
das to succeed Bishop Perenquy. He was consecrated (1801) to the archiepiscopal See of Guatemala. The position was by no means an easy one and Father Du-
bourg was forced, at the beginning of his administra-

P. J. Hayes.

DUBOIS, Louis-Guillaume-Valentin, second
Bishop of Louisiana and the Floridas, Bishop of Mont-
auan, Archibishop of Besançon, b. at Cap Français,
Santo Domingo, 16 February, 1766; d. at Besançon,
Besançon, 12 December, 1832. Ordained priest in the
Oratorian Seminary of St-Maloire, 22 Sept., 1787,
by Archbishop de Juigné, of Paris, he was appointed an
assistant to the cure of St-Sulpice, and chaplain to the Sisters of Charity (Hospice des Petites Maisons).
Forced to leave France, he fled to America in 1793, where
he was ordained in 1788 and entered the Company of Saint Sulpice. He was superior of the seminary of Issy when the French Revolution broke out, and retired at first to
Bordeaux. In 1794 he emigrated to the United States
where he was welcomed by Bishop Carroll. He was
president of Georgetown College from 1786 to 1799. After
an unsuccessful trip to Havana where he attempted to
open a school, he returned to Baltimore and became the
first superior of Saint Mary's College.

On 18 August, 1812, he was appointed Apostolic Admin-
istrator of the Diocese of Louisiana and the Flori-
das to succeed Bishop Perenquy. He was consecrated
(1801) to the archiepiscopal See of Guatemala. The
position was by no means an easy one and Father Du-
bourg was forced, at the beginning of his administra-

P. J. Hayes.
tion to take up his residence outside New Orleans. However, he gradually overcame his opponents. On 23 January, 1815, on the threshold of the New Orleans cathedral, he bestowed on General Jackson the laurels of victory.

That was a satisfactory way the affairs of the diocese Father Dubourg proceeded to Rome where he consecrated Bishop of Louisiana and the Floridas, 24 September, 1815. He returned to America in 1817 and took up his residence in St Louis where he founded a theological seminary and college at “The Barren Ground” which he transferred to the present site in 1833. He was a benefactor of the University of St Louis. The Religious of the Sacred Heart simultaneously opened their first American convent, St. Charles’s Academy (1818), and soon after a second one at Florissant. These institutions gave a great impulse to religion in what was then known as Upper Louisiana. The bishop visited yearly the southern part of his diocese, and when Bishop Rosati was appointed his coadjutor, New Orleans became again his residence.

In 1820 Bishop Dubourg went to Europe. He was a brilliant and learned man, but was reluctant to enforce his authority against the clergymen who continued to oppose him, before he tendered his resignation of the See of New Orleans (November, 1820), thinking that another incumbent would be more successful.

He was not, however, allowed to live in retirement, but was transferred, 2 October, 1826, to the Diocese of Montana; then on 12 February, 1833, he was appointed to the archiepiscopal See of Besançon. Archbishop Dubourg was one of the first patrons and benefactors of the Propagation of the Faith, but was not, as has been said, its founder. This society was organized at a meeting held at Lyons in the presence of the Bishop Dubourg, the vicar-general of the See of Besançon, but the chief rôle in its creation is due to a pious woman of Lyons, Pauline-Marie Jardin (q. v.).

Emery (Paris).

CÉLESTIN M. CHAMON.

Dubric (DYFRIQ, DUBRIQUE), Saint, bishop and confessor, one of the greatest of Welsh saints; d. 612. He is usually represented holding two crosiers, which signify his jurisdiction over the Sees of Caerleon and Llandaff. St. Dubric is first mentioned in a tenth-century MS. of the “Annales Cambriae”, where he died in the year 612, and which is also in the earliest life of the saint that has come down to us. It was written about 1133, to record the translation of his relics, and is to be found (in the form of “Lectiones”) in the “Liber Landavensis”. It may contain some genuine traditions, but as it appeared at least five hundred years after St. Dubric’s death, it cannot claim to be historical. According to this account he was the son (by an unnamed father) of Eurdill, a daughter of Pheia Claforw, prince of the region of Erygyn (Erehenfield in Herefordshire), and was born at Madely on the River Wye. As a child he was noted for precocious intellect, and, at the time of his manhood was already known as a scholar throughout Britain. He founded a college at Henllan (Hentland in Herefordshire), where he maintained two thousand clerics for seven years. Thence he moved to Mochros (perhaps Mocas), on an island, and farther up the Wye, where he established an abbey. Later on he became Bishop of Llandaff, but resigned his see and retired to the Isle of Bardsey, off the coast of Carmarvonshire. Here with his disciples he lived as a hermit for many years, and here he was buried. His body was translated by Urban, Bishop of Llandaff, to a tomb before the Lady-altar in “the old monastery” of the cathedral city, which afterwards became the cathedral church of St. Peter.

A few years after the “Liber Landavensis” was written, there appeared the “Historia Regum Britanniae of Geoffrey of Monmouth, and this romance is the source of the later and more elaborate legend of St. Dubric, which describes him as “Archbishop of Caerleon” and one of the great figures of King Arthur’s court. Benedect of Gloucester and John de Tinnouth (as adapted by Capgrave) developed the fictions of Geoffrey, but their accounts are of no historical value. There is no record of St. Dubric’s canonization, “Liber Landavensis” designates his death to 11 November, but he was also commemorated on 4 November. The translation of his body which, the same authority assigns to 23 May, is more usually kept on 29 May.

Dubucq, See Ragusa.

Dubuque, Archdiocese of (Dubuqueensis), established, 28 July, 1837, created an archbishopric, 1893, comprises that part of Iowa, U. S. A., north of Polk, Jasper, Poweshiek, Iowa, Johnson, Cedar, and Scott, and east of Kossuth, Humboldt, Webster, and Boone Counties; an area of 15,094 sq. miles. The city is beautifully situated on the Mississippi River. The noble bluffs that rise 300 feet above the river; many of these eminences are crowned with Catholic institutions and fine residences. The city is named after Julien Dubuque, a Canadian, who lived there from 1788 to 1811, mining lead and trading with the Indians. His grave was marked by a cross and recently has been adorned with a rugged round tower of native limestone.

The first white men to visit Iowa were the Jesuit Marquette and the Franciscan Hempen. Later the missionaries sent from Quebec laboured among the Indians of Wisconsin and Iowa, and kept alive the Faith among the scattered pioneers. Iowa became United States territory by the Louisiana Purchase, and in 1833, after treaty with the Indians, was opened to settlement. The lead mines at Dubuque attracted many, the fertile prairies many more, and the population increased rapidly. The earliest Catholic settlers were French, German, and Irish, coming directly from their native lands or from the Eastern States; soon the whole State was dotted with thriving villages and prosperous farms. The attitude of non-Catholics has been uniformly friendly; the coming of a priest and the building of a church were generally met with favour and even with generous contributions. At present the Catholic people of the Archdiocese of Dubuque are about equally divided between agricultural and urban pursuits, and hold a prominent position in social, business, and religious life. The principal parishes outside of the city of Dubuque presided over by irremovable rectors are Clinton, Cedar Rapids, Independence, Marshalltown, Waterloo, Dyersville, Mason City, Lansing, Ackley, Cascade, New Vienna, and Waukon.

The Diocese of Dubuque was created in 1837 by division of that of St. Louis, and embraced the area north of Missouri to Canada, and east of the Mississippi to the Missouri. One priest, a zealous Dominican, Samuel Mazzuchelli, ministered to a scattered population of less than 3000; three churches had been built; St. Raphael’s at Dubuque, one at Davenport,
and one at Sugar Creek, Lee County. To-day in that same territory the Church numbers nearly 1,000,000 souls with two archbishops, a score of bishops, and thousands of priests and religious workers.

Bishops.—(1) Pierre-Jean-Mathias Loras, the first bishop, was born at Lyons, France, 30 December 1742, the son and heir of Pierre Mathias Loras, renowned for his services to the Jacobins during the Revolution. Matthis, who had as a school-mate the Blessed Curé d’Ars, was ordained priest 12 November, 1815, and for years was superior of the seminary of Largentière. His zeal led him in 1829 to Mobile, Alabama, U.S.A., where he laboured as pastor of St. Stephen’s until 1837. Consecrated Bishop of Dubuque, at Mobile, 10 December, 1837, by Bishop Portier of Mobile, he familiarized himself by letters with the needs of his diocese, and went to France for priests; he returned 21 April, 1838, with six men of heroic mould, whose names are inseparably linked with the Catholic North-West. Joseph Crétin, who in 1834 was consecrated first Bishop of St. Paul, A. Ravoux, a noted Indian missionary, J. A. M. Pelamourgue, the patriarch-priest of Davenport, L. Caltier, R. Pirotet, and J. Cusse, pioneer priests of Minnesota. At Dubuque the bishop was received, 19 April, 1839, with great joy by the people. His administration was marked by piety, zeal, and providential prudence. He multiplied his priests, encouraged immigration from the crowded cities of the East, welcomed the Trappists and various orders of sisters, chose and purchased tracts of land in the wilderness, that are now flourishing parishes. He was constantly engaged in the motions and preaching missions. By personal example and formation of societies, he advanced the cause of temperance. In his work the generosity of the people was supplemented by contributions from France. In October 1840 he received the Order of the Holy Faith of Lyons, he acknowledged a gift of $100,500 for his diocese. In 1850 St. Bernard’s diocesan seminary was opened, which flourished for five years; among its students was Henry Cosgrove, who became Bishop of Davenport. In 1854 Bishop Loras visited Ireland and France in quest of priests. In 1858 he requested and obtained as coadjutor the Rev. Clement Smyth, superior of the Trappist community at New Mellary. Bishop Loras died at Dubuque, 20 February, 1858. Where he found one priest and a scattered little flock, he left 48 priests with 60 churches and $4,000 Catholics.

(2) Clement Smyth was born 24 February, 1818, at Finner, County Clare, Ireland; educated at Trinity College, Dublin, he entered the Cistercian Order and was ordained, 29 May, 1841. He was sent to the United States and founded New Mellary monastery, twelve miles from Dubuque, on land donated by Bishop Loras. He was consecrated, 3 May, 1857, by Archbishop Kenrick of St. Louis. Bishop Smyth was a man whose deep piety and boundless charity won the devotion of priests and people. He held a synod whose canons remained unaltered till 1902. Under him immigration continued, but owing to hard times and the Civil War, not much progress was made in church-building, but the spiritual edifice was strengthened. At his death, 22 September, 1865, there were 90,000 Catholics in Iowa.

(3) Bishop Smyth was succeeded in 1866 by the Rev. Rt. Rev. John Hennessy, born 20 August, 1825, in the County Limerick, Ireland. He entered Carondelet seminary near St. Louis, and was ordained in 1850. He became president of the seminary, and in 1858 was sent to Rome as representative of Archbishop Kenrick. From 1860 to 1866 he was pastor of St. Joseph, Missouri. As a priest he manifested an example of piety, learning, and eloquence, and was consecrated by Archbishop Kenrick, at Dubuque, 30 Sept., 1866. Bishop Hennessy received many priests from Germany and Ireland, and in 1873 founded St. Joseph’s College and Theological Seminary in Dubuque. Existing parishes were systematically divided, and he directed his energies especially to Christian education. Wherever possible schools were built, and heroic sacrifices were made that every Catholic child should be educated by Catholic teachers. Considerable and continued opposition was encountered by some Catholics on account of political reasons, but also because they considered the preference an attack on the public schools. The wisdom of the bishop was shown by the generous condition of the parochial schools, which at the time of his silver Jubilee showed 12,257 pupils enrolled. Bishop Hennessy assisted at the Vatican Council, and was prominent in the Third Plenary Council of Baltimore. In 1893 he was made first Archbishop of Dubuque, with Davenport, Omaha, Wichita, and Sioux Falls as suffragans. His death occurred 1 March, 1900.

(4) The Most Rev. John J. Keane, titular Archbishop of Damascus and formerly Bishop of Richmond, Virginia, and Rector of the Catholic University of America, was named to succeed Archbishop Hennessy, 24 July, 1900. Archbishop Keane was b. 12 Sept., 1839, at Ballisodar, Co. Donegal, Ireland; ordained 2 July, 1866, at Baltimore; consecrated bishop at Baltimore 25 August 1879. His episcopate in 1902, 1905, and 1908, applied the Baltimore Plan to local conditions. Conferences of the clergy were held semi-annually in every deanery. Complete annual reports from every parish were made through the chancery. His zeal for total abstinence founded an archdiocesan union, and in the field of education he encouraged postgraduate courses for priests, doubled the faculty and buildings of St. Joseph’s College, the preparatory seminary of the archdiocese, which now enrolls 300 classical students, established a missionary band of diocesan priests, sent the Sisters of the Good Shepherd and the Sisters of the Order of St. Joseph to the Brothers of Mary. Thus with indefatigable zeal he continued the work of his predecessors. In 1902 the western portion of the archdiocese was erected into the new Diocese of Sioux City.

The Sisters of Charity of the B. V. M. went to Dubuque in 1841 from Philadelphia, with 17 members, and the house is now located there and they conduct two academies and eleven schools in various centres, besides having sent communities to four other states. The Sisters of Mercy located in 1868 in Davenport, and now have independent houses at Dubuque, Cedar Rapids, and Independence. The Presentation Nuns arrived from Ireland in 1875, and have 20 members. The Visitation Nuns conduct an academy in Dubuque: their number 31 members. The Sisters of St. Francis came from Westphalia, Germany, and 320 of them are employed in schools throughout Iowa. Other sisters—enlargements represented in the archdiocese are Third Order of St. Dominic, Franciscan Sisters of the Temple, Presentation, Sisters of St. Francis of Assisi, M. C. School Sisters of St. Francis, Sisters of the Holy Ghost, Sisters of the Holy Humility of Mary, and the School Sisters of Notre Dame.
DUCIO

STATISTICS.—Official reports for 1908 give these figures: 222 diocesan and 9 regular priests; 165 parish churches; 63 mission churches; 50 chapels (in religious institutions); 1 college for men with 380 students; 25 academies for the higher education of young women attended by 400; 96 parochial schools with 25,000 pupils; 1 orphanage with 225 inmates; 7 hospitals each accommodating from 30 to 150 patients; one industrial home with 50 inmates; one home of the Good Shepherd. Catholic population, 111,112 in a total of 693,400. About 630 sisters of religious communities are engaged in teaching; and about 130 are in hospitals and other charitable work.

Duc, Fronton du (called in Latin Deceus), a French theologian and Jesuit, b. at Bordeaux in 1558; d. at Paris, 25 September, 1624. At first he taught in various colleges of the Society and wrote for the Jesuits the "Histoire tragique de la mort de Domnus, autrement d'Orléans" (Nancy, 1581), which was acted at Pont-a-Mousson before Charles III. Duke of Lorraine. At a later date he took part in the theological discussions of the age and is the author of "Inventaire des fautes, contradictions, fautes allégées, et des fautes de la vie et de la mort, de la Sainte Eucharistie, par les théologiens de Bordeaux" (Bordeaux, 1599-1601). This is one of many refutations of the treatise on the Eucharist issued in 1598 by the Huguenot theologian Du Plessis-Mornay. The Protestant publicist made a reply to which Fronton du Duc rejoined in 1602.

At the suggestion of Casaubon, Henry IV contemplated the publication of manuscripts of the royal library. The clergy of France decided to confide the revision of the Greek Fathers to the Jesuits, and Fronton du Duc was chosen by the Society to labour on this project. Accordingly he published the works of St. John Chrysostom (Paris, 1669-24) and a "Bibliotheca veterum Patrum" (Paris, 1624, 2 vols. in folio). The "Bibliotheca" contains a large number of the Greek Fathers with Latin translations (see the list in Vol. II, 345), and serves as a supplement to the great collection of Margarin de la Bigne known as "Sacra Bibliotheca Sanctarum Patrum." After the death of Fronton du Duc there was issued an edition of Nicephorus Callistus (Paris, 1630, 2 vols. in folio) which he had undertaken. This edition follows a Vienna manuscript that had belonged to the library of Matthias Corvins; its publication had been delayed by a series of curious complications in which the political schemes of Richelieu were involved. Fronton du Duc had also occupied himself with the Greek texts of the Bible and had begun a revision of the text, but this was not completed. Librarian from 1604 of the Collège de Clermont at Paris, he reorganized the library, which had been scattered during the period in which the Jesuits had been obliged to abandon the school. While holding this position he also taught (1615-23) at the Jansenist college.

PAUL LEJAY.

Duce, Charles Dufresne, historian and philologist, b. at Amiens, France, 15 Dec., 1610; d. at Paris, 1688. His father, who was a magistrate, had him educated by the Jesuits at Amiens, and the young man afterwards studied law at Orléans and was admitted to the Bar before the Parliament of Paris, 11 Au-

DUCIO

gust, 1631. But the legal profession failing to satisfy him, he returned to Amiens, married there in 1638 and in 1645 purchased the position of Treasurer of France held by his father-in-law. Obliged to leave Amiens in 1668 on account of the plague, he settled in Paris, where he died. Neither his official duties nor his family cares (he was the father of ten children) prevented him from following scholarly pursuits. Conversant with many languages, he was consulted on all sides, and he obtained much information through his correspondence. His unremitting energy was largely expended on the history of France and that of Constantinople. To insure a solid basis for his researches, he began by mastering the languages of ten centuries, a task which was unceasing in his efforts to increase his knowledge of Byzantine Greek and Low Latin.

Two great and useful works were the outcome of this preparation and even yet suffice to secure the scholarly reputation of their author; they were the "Glossarium ad scriptores mediæ et infimæ latinitatis" (Paris, 3 vols. fol. 1678; new edition with addenda by Dom Carpentier, Paris, 7 vols., 1840-1850; 10 vols., 1882-1887), and the "Glossarium ad scriptores mediæ et infimæ latinitatis" (Paris, 2 vols., 1688). Chief among his other works are: "Histoire de l'Empire de Constantinople, et de Constantin de Dourmas, et de Constant d'Orléans, et de Constantin d'Amiens" (Paris, 1657, 1 vol. fol.); "Traité historique du chef de Saint Jean-Baptiste" (Paris, 1666, 4to); "Histoire de Saint Louis" (Paris, 1668, 2 vols. fol.); "Historia Byzantina" (Paris, 1680, 2 vols. fol.), editions of the Byzantine historians, notably of Zonaras (Paris, 1680, 2 vols. fol.); and the "Chronicon Pusehale" (Paris, 1689, 1 fol.). He left many manuscripts which, after being widely scattered, were collected toward the middle of the eighteenth century by his grand-nephew Dufresne d'Aubigny and are now nearly all preserved in the National Library, Paris. From these have been compiled the "Histoire de la Ville d'Amiens" (published by Hardouin at Amiens, 1840) and "Les familles d'outre-mer" (published by Rey in the "Documents inédits de l'Histoire de France," Paris, 1869).

BAILLIERE, Épitaphe de vitæ et morte C. Du Cange ad Eva, Renaudotum (Paris, 1688), reprinted as preface to the Chronicon Pushehale: NICHEM, Mémoires pour servir à l'historie des hommes illustres (Paris, 1727-1745), V, notice des chroniques et écrits de M. Du Cange in Journal des Savants (October-December, 1749); and DUFRESNE, Mémoire historique sur les manuscrits de M. Du Cange (Paris, 1761).

PAUL LEJAY.

Duccio di Buoninsegna, painter, and founder of the Siennese School, b. about 1255 or 1260, place not known; d. 3 August, 1319. About this time Sienna was at the zenith of her political power. She had just defeated Florence on the field of Montaperti (4 September, 1260), and an era of marvellous development followed this conquest. Then was begun the huge task of building the cathedral, where, in 1266, was commenced the incomparable pulpit sculptured by Nicholas of Pisa, and it was under these flourishing conditions that Duccio received his artistic education. However, he owed nothing to the Gothic style nor to the naturalistic Renaissance of Nicholas of Pisa; he allied himself exclusively with Byzantine tradition. Duccio has been called the "Last of the Greeks," and his genius consisted in giving exquisite expression to the refined sentiment of the masters of Byzantium, discovering its original meaning despite the barbaric, hideous imitations made by a degenerate school.

Duccio is first mentioned in 1278, when he was engaged upon minor work, such as painting the covers of the archives and the tablettes (memorandum-books) of the Bicherna, one of them for the year 1293 now in the Industrial Museum of Berlin. But his great work at this time was the famous "Madonna de' Rucellai"—one of the most illustrious specimens of Italian painting—preserved at Florence in a side-
chapel of Santa Maria Novella and, on the authority of Vasari, so long considered one of Cimabue's masterpieces. But that the painting was Duccio's is now beyond question, as Milanesi has published the text of a contract drawn up for this picture, 15 April, 1285, between the artist and the rectors of the Confraternity of the Annunciation of Padua. Although still hieratical and archaic, Duccio's "Madonna," when compared, for instance, with that of Guido of Siena, painted in 1221 and shown to-day in the Palazzo Publico of Siena, seems fully to deserve its celebrity. But it was in 1311 that Duccio achieved his principal work, the glory of which is destined to remain traditional, the great reredos for the high altar of the Siena cathedral. This panel, removed in the fifteenth century, may now be seen in the museum of the Opera del Duomo. The day of its installation was observed as a public feast; shops were closed and bells were rung and the people of the city, carrying lighted candles, solemnly escorted the picture from the artist's residence at the Porta Stalloreggi to the cathedral. This painting was indeed a national masterpiece and in this regard is comparable only to the reredos by Van Eyck in Flemish painting. The two sides represent the Twenty-six Scenes of the Gospels. The back contains twenty-six scenes from the life of Jesus between the entry into Jerusalem and the Ascension. The steps, now taken apart, were decorated with twenty other scenes representing Christ's childhood, and His miracles, and the life of the Virgin. In fact, the theme was the same as that treated by Giotto in 1305 in the Arena of Padua. But Duccio consulted Byzantine formularies only, and his compositions resemble the famous miniatures of the "Evangelistarium" of Rossano, or those of the great Benedictine school of Mont' Amiata. However, apart from his perfect taste in color and composition, Duccio excelled in the essentially Greek elegance of his portrayal of ordinary life. He abounds in genre pictures as pure as some of the selections in the Anthology. The scene of "Peter before the High-Priest," the dialogue of the holy women with the angel at the Sepulchre, and the "Pilgrims of Emmaus," are models of poetic conception expressed in a familiar, true-to-life, lyric fashion. On the front of the great panel is the "Madonna Maestà" (Majesty), which is in reality the "Madonna de' Ruecellai" more amply, richly, and harmoniously developed. Never did Byzantine painting attain greater plasticity of expression. But here the form is animated by a new sentiment, a tenderness that manifests itself in the distich engraved on the step of the Virgin's throne:

MATER SANTA DEI, SIS CAUSA SENIS REQUEI
SIS DUCIO VITA, TE QUA PINXIT ITA.

(Holy Mother of God, give peace unto Siena; obtain for me that, as I have painted Thee so fair, I may live eternally.)

Duccio painted only frame (and panel) pictures and, without doubt, miniatures, and hence the oblivion into which he fell in a country where monumental painting alone is glorified. Nevertheless his is the first of the great names in Italian painting. He preceded Giotto by a score of years and had the honour of founding an original Sicilian school at a time when the Sicilian painters were of no account in Florence; since, in 1285, it was to him that the Florentines had to have recourse. And the most magnificent work of the Sicilian School, the "Maestà" by Simone di Martino, in the Palazzo Publico (1315) is but an enlargement of Duccio's. His type of beauty and his poetic idea were indelibly impressed upon this charming generation of late thirteenth and early fourteenth centuries. Duccio seems to have been gay and light-hearted. In 1313 he was imprisoned for debt and at another time fined for refusing to mount guard. Some of his lesser works are preserved in various collections in the Siena Museum, the National Gallery, London, and at Windsor."

**DUCHESE, PHILIPPINE-ROSE, founder in America of the first houses of the Society of the Sacred Heart, b. at Grenoble, France, 29 August, 1769; d. at St. Charles, Missouri, 18 October, 1852. She was the daughter of Pierre-François Duchese, an eminent lawyer. Her mother was a Périer, ancestor of Casimir Périer, President of France in 1854. She was educated by the Visitation Nunns and received its dispersion under the Reign of Terror, vainly attempted the re-establishment of the convent of St.-Marie-d'en-Haut, near Grenoble, and finally, in 1804, accepted the offer of Mother Barat to receive her community into the Society of the Sacred Heart. From early childhood the dream of Philippine had been the apostolate of souls: heathen in distant lands, the neglected and poor at home. Nature and grace combined to fit her for this high vocation; education, suffering, above all, the guidance of Mother Barat trained her to become the pioneer of her order in the New World. In 1818 Mother Duchese set out with four companions in the missions of America. Bishop Dubourg welcomed her to New Orleans, whence she sailed up the Mississippi to St. Louis, finally settling her little colony at St. Charles. "Poverty and Christian heroism are here," she wrote, "and the riches of priests in this land." Cold, hunger, and illness; opposition, ingratitude, and calumny, all that came to try the courage of this missionary, served only to fire her lofty and indomitable spirit with new zeal for the spread of truth. Other foundations followed, at Florissant, Grand Côteau, St. Louis, Missouri, and the annals in 1826 by Leo XII recognized the good being done in these parts. She yearned to teach the poor Indians, and old and broken as she was, she went to labour among the Pottowatomies at Sugar Creek, thus realizing the desire of her life. Called by the recitals of Father De Smet, she turned her eyes towards the Rocky Mountain missions; but Providence led her back to St. Charles, where she died. Thirty-four years of mission toil, disappointment, endurance, self-annihilation sufficed, indeed, to prove the worth of this valiant daughter of Mother Barat. She had opened the way, others followed in it; and the success hidden from her eyes was well seen later by the many who rejoiced in the rapid spread of her order over North and South America. Sincere, intense, generous, austere yet affectionate, endowed with large capacity for suffering and work, Mother Duchese's was a stern character that needed and took the moulding of Mother Barat. Preliminary steps for her beatification have already been taken.**

**Duckett, JAMES, VENERABLE, MARTYR, b. at Gilfords in the parish of Skelsmergh in Westmoreland, England, date uncertain, of an ancient family of that county; d. 9 April, 1601. He was a bookseller and publisher in London. His godfather was the well-known martyr James Ludlow. He was a man of strong convictions. He seems, however, to have been brought up a Protestant, for he was converted while an apprentice in London by reading a Catholic book lent him by a friend. Before he could be received into the Church he was twice imprisoned for not attending the Protestant service,**
and was obliged to compound for his apprenticeship and leave his master. He was finally reconciled by a venerable priest named Weekes who was imprisoned in the Gatehouse at Westminster. After two or three years he married a Catholic widow, but out of his two years of married life, no less than nine years he spent in prison, owing to his zeal in propagating Catholic literature and his wonderful constancy in his new-found faith. His last apprehension was brought about by Peter Bullock, a bookbinder, who betrayed him in order to obtain his own release from prison. Both house and shop were searched on 4 March, 1601, Catholic books were found there, and Duckett was at once thrown into Newgate. At his trial, Bullock testified that he had bound various Catholic books for Duckett, which the martyr acknowledged to be true. The jury found him not guilty, but Judge Popham at once stood up and bade them consider well what they did, for Duckett had had bound for him Bristowe's "Motives", a controversial work peculiarly odious to Anglicans on account of its learning and elegance. The jury thereupon reversed their verdict and brought in the prisoner guilty of felony. At the same time three priests, Father Page, Tichborne, and Watkinson, were sentenced to death. Bullock did not save himself by his treachery, for he was conveyed in the same cart with Duckett to Tyburn, where both were executed, 19 April, 1601. There is an account, written by his son, the Prior of the English Carthusians at Nieuport (Ch. D.) of James Duckett's martyrdom. On the way to Tyburn he was given a cup of wine; he drank it and desired his wife to drink to Peter Bullock, and freely to forgive him. At the gallows his last thoughts were for his betrayer. He kissed him and implored him to die in the Catholic Faith.

John Duckett, Venerable, Martyr, probably a grandson of Venerable James Duckett, b. at Underwen in the parish of Sedbergh, Yorkshire, in 1603; d. 7 September, 1644. He was ordained priest in 1639 and afterwards went to Paris where he studied three years in the College of Arras. He had an extraordinary gift of prayer, and while yet a student would spend whole nights in contemplation. On his way to the English mission, he spent two months in spiritual exercises, under the direction of his uncle, the Carthusian prior at Nieuport. He laboured for about a year in Durham, and was taken near Whisingham on his way to Tyburn, 2 July, 1644. The place to which tradition declares to be that of his arrest is now marked by a tall stone cross. Carried to Sunderland, he was examined by a Parliamentary Committee of sequestrators, and placed in irons. He confessed his priesthood and was thereupon sent up to London with Father Ralph Corbie, S. J. (q. v.), who had been arrested about the same time near Newcastle-on-Tyne. They were committed to Newgate, and edified the crowds of Catholics who flocked to see them by their joyousness, their sanctity, and their longing to suffer for Christ. A reprise for one of them having been obtained, each refused to take it for him. On his way to execution, Duckett astonished all by his supernatural joy, comforting those who wept for him, he said smiling: "Why weep you for me who am glad at heart of this happy day?" His jailers even were so struck by his good looks that they exclaimed "an angel dies for this man dies for a good cause!" He suffered with Father Corbie, at Tyburn. In a farewell letter to the Bishop of Chalcedon, he wrote on the eve of his martyrdom: "I fear not death, nor I contemn not life. If life were my lot, I would endure it patiently; but if I will receive it joyfully, for that Cause which is my life, and death is my gain. Never since my receiving of Holy Orders did I so much fear death as I did life, and now, when it approacheth can I faint?"

Du Coudray, Philippe-Charles-Jean-Baptiste-Tronson, soldier, b. at Reims, France, 8 September, 1738; d. at Philadelphia, U. S. A., 11 September, 1777. He was educated for the army and showed great merit as an engineer. He was adjutant-general of artillery and considered one of the best military experts in France when, in 1776, he volunteered to go to America to assist the colonists in their revolt against England. Silas Deane and Benjamin Franklin, the American agents, promised him a commission as major-general with command of the artillery. This stipulation gave great offence to the officers already attached to the army when he arrived from France, in May, 1777, with twenty-nine other officers and twelve sergeants of artillery. Several of the more prominent threatened to resign. As a compromise he was made inspector-general 11 August, 1777, with the rank of major-general, and assigned to command the works along the Delaware. On 11 Sept., 1777, he was drowned while crossing the Schuylkill River at Philadelphia, the horse on which he was seated becoming frightened and dragging him overboard. Congress gave him an official funeral and attended his requiem Mass, 18 Sept., 1777, in St. Mary's church. This was one of the few occasions on which Congress was officially present. The Mass during the Revolution, the others being the requiem on 8 May, 1750, for Don Juan de Miraalles, the agent of the Spanish Government, and the Te Deums on 4 July, 1779, and 4 November, 1781, all being celebrated at St. Mary's, Philadelphia. Du Coudray was buried in St. Mary's churchyard, but the grave is now unknown.

Thomas F. Meehan.

Ducrue, Francis Bennon, missionary in Mexico, b. at Munich, Bavaria, of French parents, 10 June, 1721; d. there 30 March, 1779. He became a member of the Society of Jesus in 1758, and ten years later was sent to California, where he laboured zealously until the expulsion of the order in 1767. When that unfortunate event took place, Ducrue was the superior of all the California missions. He submitted uncomplainingly to the decree of expulsion and even cooperated with the royal commission in enforcing its provisions. The Jesuits were allowed to leave only their clothing and a few books; this was all the wealth they carried away from California after seventy years of work in its missions. Ducrue eventually returned to his native land. He wrote in Latin "A Journey from California through the district of Mexico to Europe in the year 1767", which was translated into German for the "Nachrichten von verschiedenen Ländern des spanischen Amerika" of Christoph von Murr (Halle, 1809, 2d pt., p. 489-530). H. H. Bancroft regards this as "a standard work on the subject so far as California is concerned" (Works, XV, 175). He left also a "Relation of the Expulsion of the Society of Jesus from Mexico and in particular from California in 1767". This document is likewise found in Murr (vol. XII, p. 217-276), and was translated into French and published by Fr. Carayon in his "Documents Inédits" (Paris, 1876). Murr also gives some interesting specimens of the language of California, which were communicated to him by Ducrue.

Edward P. Spillane.
DUDIK

DUDIK, BERG FRANCISCUS, Moravian historian, b. at Kojetin near Kremnitz, Moravia, 29 January, 1815; d. as abbot and titular bishop at the monastery of Raigern, 18 January, 1890. After studying at the philosophical school at Brunn he attended the University of Olmütz. In 1830 he entered the Benedictine Order and in 1840 was ordained priest at Raigern. From this latter date until 1854 he taught first the classical languages and then history at the gymnasium of Brunn. In 1855 he became Privatdozent for historical research at the University of Vienna; in 1859 he was appointed historiographer of Moravia, and in 1865 was made a member of the Academy of Sciences of Vienna. For purposes of historical research he went in 1851 to Sweden, in 1852 to Rome, in 1870 to France, Belgium, and Holland, in 1874 to Russia, a country which he later repeatedly visited. Between the years 1855 and 1859 he established at Vienna the main historical library of the Teutonic Order. Dudik was a prolific writer and diligent investigator; his works have a lasting value on account of the sources from which he drew. His chief works in chronological order are: "Geschichte des Benediktinerstiftes Raigern" (2 vols., Brunn, 1840; 2nd ed., Vienna, 1869); "Mährische Geschichtsquellen" (Brunn, 1850); "Forschungen in Schweden für Mährisches Geschicht" (Brunn, 1852); "Umb Romanum" (2 vols., Vienna, 1855); "Des Herzogtums Troppau ehemalige Stellung zur Markgrafschaft Mähren" (Vienna, 1857); "Waldeistins Korrespondenz" (Vienna, 1863-66); "Waldeists von seiner Entbehrung bis zur abermaligen Ubernahme des Armeekommandos" (Vienna, 1858); "Des hohen Deutschen Ritterordens Münzsammlung in Wien" (Vienna, 1858, a special edition with 22 copper plates); "Riendlen des Deutschen Ritterordens" (Vienna, 1860); "Die morabische Geschichte im Könige Galien Godebernden" (Vienna, 1867); "Erinnerungen aus dem Feldzug in Italien 1866" (Vienna, 1867); "Preussen in Mähren in Jahre 1742" (Vienna, 1869); "Schweden in Böhmen und Mähren 1640-1660" (Vienna, 1879); "Die Christliche Entwicklung der Buchdruckerkunst in Mähren von 1380 bis 1623" (Brunn, 1879).

Dudik's most important publication is: "Mährisches allgemeine Geschichte" (12 vols., Brunn, 1880-89); it treats the history of Moravia up to 1590. Volumes VIII-X, which give an account of Moravia during the period of the Hungarian dynasty, have been translated into Czech. He also published several papers in the transactions of the Academy of Sciences; in vol. LIV appeared: "Korrespondenz Ferdinands II. mit seinen Beichtvateins Becanus und Lamorinaun" in Revue bénédictine, VII, 179.

PATRICK SCHLAGER.

Duel (duellum, old form of bellum).—This word, as used both in the ecclesiastical and civil criminal codes to-day, generally signifies every contest with deadly weapons which takes place by agreement between two persons on account of some private quarrel. Thus a contest with weapons is essential to the conception of a duel. Further, the contest must take place by agreement, and the weapons used must be capable of inflicting deadly wounds. Although generally demanded by custom, similarity of weapons is not essential, neither are wounds mortal, seconds, etc. Finally, it is essential to a duel that it take place on account of some private matter, such as wounded honour. Consequently the customary duel of to-day differs from those public duels which took place for some public reason by the arrangement of the authorities, as the conflict between Caesar and his Parthian, etc. Between two armies there is no higher court than the appeal to arms; therefore war must decide, and there may be instances in which it is allowable to substitute for a battle between two armies a contest between two persons selected for the purpose.

History.—Duelling was unknown to the civilized nations of antiquity. The contests of the Roman gladiators were not, like the duels of to-day, a means of self-defence, but bloody spectacles to satisfy the curiosity and cruelty of an effeminate and degenerate populace. On the other hand the customs of duelling existed among the Gauls and Germans from very early times, as Diodorus Siculus (Biblioth. histor., Lib. V, ch. xxviii), Velleius Paterculus (Histor. rom., I, cxxxviii), and others relate. The duel is, therefore, undoubtedly of heathen origin, and was so firmly rooted in the customs of the Gauls and Germans that it persisted among them for a long time after the Roman conquest. The oldest known law of Christian times that permitted the judicial duel is that of the Burgundian King Gundobald (d. 516). With few exceptions the judicial duel is mentioned in all old German laws as a legal ordeal. It rested on a twofold conviction. It was believed, first, that God could not allow the innocent to be defeated in a duel; hence it was held that the guilty party would not dare primarily to appeal to the judgment of God in proof of his innocence and then enter upon the fight under the weight of perjury; the fear of Divine wrath would discourage him from this. And secondly, the Church would not permit a law to exist which was not consonant to the spirit of God and the Gospel. It was not therefore an appeal to the judgment of God; it was rather that the Church could not, as the Bishop of Tyre, permit the defeat of the innocent. The pope also at an early date took a stand against duelling. In a letter to Charles the Bald, Nicolas I (868-87) condemned the duel (monomachia) as a temptation of God. In the same century his example was followed by the popes Alexander II and Alexander III, Celestine III, Innocent III and Innocent IV, Julius II, and many others. In addition to the judicial, non-judicial combats also occurred, in which men arbitrarily settled private grudges or sought to revenge themselves. The tournaments, especially, were often used to satisfy revenge; on account of this misuse the Church early issued ordinances against the excesses committed at tournaments, although these were not always obeyed. The more the judicial combat fell into disuse, the more the old instinct of the Germanic and Gallic peoples, by which each man sought to gain his rights with weapon in hand, showed itself in personal contests and at tournaments. From the middle of the fifteenth century duelling over questions of honour increased so greatly, especially in the Romanic countries, that the Council of Trent was obliged to enact the severest penalties against it. It decreed that "the detestable custom of duelling which the Devil had originated, in order to bring about at the same time the ruin of the soul and the violent death of the body, shall be entirely uprooted from Christian soil" (Sess. XXIV, De reform., c. xix). It pronounced the severest ecclesiastic penalties against those princes who should permit duelling between Christians in their territories. According to the council those who take part in a duel are ipso facto excommunicated, and if they are killed in the duel they are to be deprived of Christian burial. The seconds and those who advised or encouraged the duel or received the weapon in hand, are also excommunicated. These ecclesiastical penalties were at a later date repeatedly renewed and even in parts made more severe. Benedict XIV decreed that duellists should also be denied burial by the Church, even if they did not die on the duelling ground and on the spot. All modern penal duels, whether judicial or private, are substantially in force to-day. Pius IX in the "Constitutio Apostolica Sedis" of 12 October, 1869, decreed the penalty of excommunication against "all who fight duels, or challenge to a duel or accept such challenge; as well as against all who are necessary
to the duel or who in any way abet or encourage the same; and finally against those who are present at a duel as spectators [de industria spectantes], or those who permit the same, or do not prevent it, whatever their rank, even if they are kings or emperors'.

Like the Church, the State also took steps against the evil of duelling. In 1608 an edict against the practice was issued by Henry IV of France. Whoever killed his opponent in a duel was to be punished with death; severe penalties were also enacted against the sending of a challenge and the acceptance of the same. Unfortunately, the Emperor of Austria-Francisco I.-against this edict, was generally pardoned. In 1626, during the reign of Henry's successor, Louis XIII, the laws against duelling were made more stringent and were strictly carried out. Notwithstanding these measures the custom of duelling increased alarmingly in France. The great number of French noblemen who fell in duels about the middle of the seventeenth century, is shown by the statement of the contemporary writer Théophile Raynaud that within thirty years more men of rank had been killed in duels than had been killed in any war. Olier, the founder of the Congregation of Saint-Sulpice, with the aid of Vincent de Paul, formed an association of distinguished noblemen, the members of which signed the following obligation: "The undersigned publicly and solemnly make known by this declaration that they will refuse every form of challenge, will for no cause whatever enter into a duel, and will thereby give proof that they detest duelling as contrary to reason, the public good, and the laws of the State, and as incompatible with salvation and the Christian religion, without, however, relinquishing the right to avenge in every legal way any insult offered them as far as the position and birth make such action necessary." Louis XIV aided these efforts at reform by the severe enactment against duelling which he issued early in his reign. For a long time after this duelling was infrequent in France.

In other countries too severe measures were taken against the constantly spreading evil. In 1681 the Emperor Leopold I forbade the fighting of duels under the severest penalties; Maria Theresa ordered not only the challenger and the challenged but also all who had any share in a duel to be beheaded, and in the reign of the Emperor Joseph II duellists received the punishment of pillaging and accepting a command in the army. Frederick the Great of Prussia also tolerated no duellists in his army. The present penal code of Austria makes imprisonment the punishment of duelling; the penal code of the German Empire commands confinement in a fortress. The penalty is, without doubt, entirely insufficient and constitutes a form of privilege for the person who kills his adversary in a duel. Theoretically these penal laws are also applicable to the respective armies, but unfortunately in the case of officers they are not carried out; indeed, up to the present time, an officer who refuses to fight a duel in Germany and Austria is in danger of being dismissed from the army. In 1896 when, in consequence of the fatal issue of a duel, the Reichstag by a large majority called upon the Government to proceed by all the means in its power against the practice of duelling, as opposed to the criminal code, the emperor issued an order on 1 January, 1897, which established courts of honour to deal with disputes in the army concerning questions of honour. Unfortunately the decree leaves it open to the court of honour to permit or even to command a duel to take place. Furthermore, on 15 January, 1896, General von Einen, President of the Army, stated: "The law of 1 January, 1897, which was in force when the duel was still in force, and Chancellor von Buelow added to this: "...the corps of army officers can tolerate no member in its ranks who is not ready, should necessity arise, to defend his honour by force of arms". In the army, as a result of this principle, a conscientious opponent of duelling is constantly exposed to the danger of being expelled for refusing to fight. In England duelling is almost unknown, and no duel has occurred, it is said, in the British army for the last eighty years. English jurisprudence contains no special ordinances against duelling; but the wounding and killing of another are punishable according to common law. On the Continent also public opinion on the subject of duelling seems to be gradually changing. The demand for the abolition, even in the army, of this abuse is growing louder and louder. Some years ago, at the instance of the Infante Don Francisco of Bourbon, an anti-duelling league was formed in order to carry on systematically the opposition to duelling. A preliminary convention, held at Frankfort-on-the-Main in the spring of 1901, issued an appeal for support in its struggle against this evil. In a few weeks a thousand signatures were received, mostly those of men of influence from the most varied ranks of society. A convention to draw up a constitution met at Cassel 11 January, 1902, and Prince Carl zu Lowenstein was elected president. A committee was also appointed to direct affairs and to conduct the agitation. The French government has made proposals to the king of Prussia that he should establish a permanent bureau at Leipzig. Concerning the aims of the league the declaration subscribed by the members states the following: "The undersigned herewith declare their rejection, on principle, of duelling as a custom repugnant to reason, conscience, and civilization, as a violation of laws and the common good of society and the State."

Wrongfulness of Duelling.—After what has been said above there can be no doubt that duelling is contrary to the ordinances of the Church and of most civilized countries. By the anti-duelling league or by the decrees of the Council of Trent plainly indicated that duelling was essentially wrong and since then theologians have almost universally characterized it as a sinful and reprehensible course of action. However there were always a few scholars who held the opinion that cases might arise in which the unlawfulness of duelling could not be proved with certainty by mere reason. But this opinion has not been tenable since Pope Benedict XIV in the Bull "Detestabimur" of the year 1752 condemned the following propositions: (1) "A soldier or officer who would be blameless and not liable to punishment for duelling or accepting a challenge would be considered as having committed an act of cowardice and unworthy of esteem, and unfit for military duty, were he not to send a challenge or accept such, and who would for this reason lose the position which supported him and his family, or who would be obliged to give up forever the hope of obtaining advancement." (2) "Those persons are excusable who to defend their honour or to escape the contempt of men accept or send a challenge when they know positively that the duel will not take place but will be prevented by others." (3) "A general or officer who accepts a challenge through fear of the loss of his reputation and his position does not come under the ecclesiastical punishment decreed by the Church for duellists." (4) "It is permissible under the natural conditions of man to accept or send a challenge in order to save one's fortune, when the person who was attacked by any cause would be rewarded by such a duel." (5) "This permission claimed for natural conditions can also be applied to a badly guided state in which, especially, justice is openly denied by the remissness or malevolence of the authorities." Like his predecessors, Leo XIII in his letter "Pastoralis officii", of 12 September, 1891, to the German bishops, laid down the following principles: From two points of view the Divine law forbids a man as a private person to wound or kill another, excepting when he is forced to it by self-defence. Both natural reason and the inspired Holy Scriptures proclaim this Divine law."
The intrinsic reason why duelling is in itself sinful and reprehensible is that it is an arbitrary attack on God's right of ownership as regards human life. Only the owner and master of a thing has the right to destroy it or expose it to the danger of destruction. But man is not the owner and master of his life. It belongs, instead, entirely to his Creator. Now man can only call that his property and treat it as such which is intended in the first instance for his benefit, so that he has the right to exclude others from the use of the same. Man, however, is not created primarily for himself but for the glory and service of God. Here below he is to serve his Creator and Lord as long as the Lord wills and thus attain his own salvation. For this end God has given man life, maintains it for him, and has bestowed on him the instinct of self-preservation. But if man is not the master of his life, he has not the right to expose it at pleasure to destruction or even deliberately to seek such danger. In order rightfully to expose the life to danger there must be a justifiable reason, and even then the risking of life is only permissible, not the end to be sought in itself. What is said of one's own life applies also to the life of one's fellow-man. Every man has the right to defend himself from an unlawful attack on his life, even if it cost the life of the assailant; this is a requirement of public safety; but apart from such defence no man has the right as a private individual to injure the life of his fellow-man or at pleasure to expose his own to similar danger. For this end cannot, however, be attained by duelling, as the result of it is as a rule a dishonourable exposure of his own life and that of his fellow-man, consequently is guilty of a wrongful assumption of the right of God, the Lord of life and death. To make this clear it is only necessary to examine the pretexts used to justify duelling, and what is the same, to look into the aims sought to be attained by this custom. One of the principal reasons given in justification of duelling is the obtaining of satisfaction. A man is insulted or injured in reputation, and in order to obtain satisfaction challenges the defamer. But besides the offence against civil law seeking to establish one's rights with weapons, thus evading the authority of the State, a duel is totally unsuited to the attainment of satisfaction and in addition is wrongful. Satisfaction consists in the offender withdrawing his insult and treating the offended person with respect and honour. This end cannot, however, be attained by duelling, as by the same weapons that injure the opponent one's own party is also subjected to the same weapon. When the one who has given the provocation accepts the challenge he does not thereby withdraw the insult; he intends, rather, to maintain it by weapons and shows himself, moreover, ready to add other and greater wrongdoing to the first, inasmuch as he may severely wound or even kill the challenger. Moreover, who would allow to the man whom he wishes to compel to make good a wrong the same chance of victory as to himself, i.e. who would give the offender the opportunity to add to the wrong he has already done an even more heinous injury? Yet this is what the challenger does in granting his adversary the same weapon with the same damage for success as he claims for himself.

Another reason offered in justification of duelling is self-defence. The duellist desires to avoid the loss of the honor of his peers and thus to retain his office and his income, or, as is said, to defend his honour and his social position. It is unfortunately only too true that to-day the conscientious opponent of duelling, especially in the army, must often suffer great losses. Nevertheless duelling cannot be justified as self-defence. Honour and the respect of others rests on the same weapons. Moreover, the use of arms is often the only method of preserving the use of arms, nor in a duel is there any actual vindication of these. The duel implies that the honour of the challenger has already been injured, and consequently that this injury is an accomplished fact; besides, the duel takes place according to agreement, so that it is not a case of self-defence against sudden attack. But the word self-defence is used in a broader sense. According to the prejudices existing in certain circles, the person who does not answer an insult by a challenge or who declines a challenge is held to be dishonourable and cowardly; thus it may be that a legal position is thus placed in a worse plight, from its very nature, a duel is an unsuitable and illicit method of preserving or rehabilitating honour. Look at the duel from the point of view of the person injured. He must, it is said, send a challenge because he has been insulted. Two cases, however, are here possible. Either his moral character and good name have been attacked, or the specific charge of cowardice has been made against him. If the former be the case, the duel is manifestly unsuited to defend the injured man's honour. A duel can never prove that the person attacked is a man of honour, is not a simpleton, has not committed adultery, or the like. A man without character or morals can be just as skilful in handling weapons as his honourable opponent. If the quarrel hinges on the charge of cowardice, a duel is apparently a proper means of disproving the same. But in this instance the challenger directly endangers his life in order to prove that he is not such. Consequently he cannot say that he only suffers his life to be endangered, he deliberately seeks this danger in order to show his courage. And, according to our former statements, this is to dispose of one's life unlawfully. It cannot be said in reply that the injured man merely intends to rehabilitating his honour. That is certainly the final aim of the duel, but first and direct aim is to prove one's courage by fighting the duel. Is it permissible, however, to risk one's own life and that of one's fellow-man merely as a means of proving one's courage? If this be correct, it would be equally permissible to enter a lion's cage, because, if a man, if public opinion demanded such proof of personal bravery. Hence it follows that the duel is not in reality a proper means to demonstrate one's courage, for true courage is a moral virtue which is not blind and foolhardy, but exposes itself to danger only if reason demand it. What has been said of the injured party is applicable also to the party giving the provocation, the one who is challenged. If he has acted unjustly he should as a man of honour offer reparation; that is his duty, and the refusal to perform this duty plainly gives him no right to fight a duel with his opponent. If he be wrong the right to refuse the challenge. The only ground for which a challenge might be accepted would be fear of the accusation of cowardice; that this reason is, however, not tenable has already been shown. It is surely the basest cowardice to do, through fear of being accused of want of courage, what sober reflection would lead any man of sense to condemn as immoral and wrong.

The conclusion necessarily to be drawn from the above is: whoever is killed in a duel is indirectly guilty of self-murder, because he has for no justifiable reason risked his life, and whoever slays his adversary in a duel is guilty of it the same as if he had taken the risk of causing death without any right to do so; this holds true even though he did not directly intend his opponent's death. The above applies not only to duels undertaken by private individuals of their own free will, but also to duels fought on account of personal grievances by order of State authorities. Those in authority have not the right to dispose at their pleasure of the life of the subject. Should a dispute be laid before them, they should examine the matter judicially and punish the guilty party. If the guilt cannot be proved the accused should be acquitted; in such a case there is no right to command a duel and thus expose the innocent to the same peril as the guilty. This has all the more force, as duels often take place on account of wrongs which are not to-day punished with death by civil law.
Duffy, Sir Charles Gavan, politician and author, b. at Monaghan, Ireland, 12 April, 1816; d. at Nice, France, 9 Feb., 1903. Educated in his native town, he contributed, at an early age, to the "Northern Herald", and in 1836 joined the staff of the Dublin "Morning Register" of which he shortly afterwards became sub-editor. In 1839, being appointed editor of the newly established Uster Catholic paper, "The Vicar of Belfast", he went to Belfast, where he resided till 1842. Going to Dublin in the summer of that year, he met two young barristers, Thomas Davis and John Dillon, and in conjunction with them he founded "The Nation", the first number of which appeared in October. Duffy was editor, Dillon and Davis were proprietors, and what with the ability of editor and contributors, the freshness and vigour of style, and the manly and militant tone adopted on public questions, the paper soon became a power. Its whole-hearted support of Repeal filled the meetings and the coffers of the Repeal Association, and O'Connell gratefully recognized its assistance. People also noted its influence, and when O'Connell was executed in 1844, Duffy was with him in the dock and subsequently his fellow-prisoner in Kilmainham. Later, in the struggles between the Young and the Old Ireland, Duffy took sides with the former against O'Connell, and was one of those who helped to found the Irish Confederation. He specially resented O'Connell's alliance with the Whigs, as he did the intolerance and presumption of John O'Connell. The failure of the Repeal movement, the horrors of the famine, and the death of O'Connell weakened his faith in national action, and for a time, in 1849, he advocated revolutionary measures. The Government, in consequence, seized his paper and threw Duffy into prison; but, though tried four times in succession, the prosecution failed, owing chiefly to the great ability of his lawyer, Isaac Butt. In the revived "Nation", in 1849, Duffy reverted to constitutional agitation, and with Lucas and others established in 1850 the Tenant League, which at the general election of 1852 returned forty members of parliament pledged to Tenant Right and Independent Opposition. Duffy himself being returned for New Ross, County Wexford. The treachery of the place-hunters, Reagh and Sadlier, soon wrecked the party, and, when Lucas died, Duffy in despair resigned his seat and left for Melbourne, Australia, where he arrived early in 1856. Though determined to avoid politics, he was induced to enter the Victorian Parliament, where his abilities made him at once a prominent figure. He filled in succession the position of minister of public works and minister of public lands, and for a brief period was prime minister. Ultimately he became speaker, receiving also the honour of knighthood. Though he reached without any difficulty, without denying either his country or faith, or ever failing to defend them when assailed. He consistently championed the labourers and the farmers against the capitalists and the squatters, and when he left Victoria in 1880 the whole colony regarded him as one of the ablest and most useful of its public men. His last years were devoted to writing several valuable historical works: "Young Ireland" (Dublin, 1884); also his "Four Years in Irish History" (London, 1885); "The League of North and South" (London, 1880); and "My Life in Two Hemispheres" (London, 1890).}

Duhamel, Jean-Baptiste, a French scientist, philosopher, and theologian, b. at Vire, Normandy (now in the department of Calvados), 11 June, 1624; d. at Paris, 6 August, 1706. He began his studies at Chartres and completed them at Paris. In 1642, being only eighteen years of age, Duhamel published an explanation of the work of theodosius called "Sphères", to which he added a treatise on trigonometry. The following year he entered the Congregation of the Oratory, which he left ten years later to take charge of the parish of Neuilly-sur-Marne. Resigning this position in 1663, he became chancellor of the church of Bayeux. When Colbert founded the Académie des Sciences (1666), he appointed Duhamel its first secretary. Duhamel held this office until 1697, when he resigned and, upon his own recommendation, was succeeded by Fontenelle. With Colbert's brother, the marquis de Rossy, he went, in 1666, to Madrid, where he represented France at the peace negotiations, and later to England, where he came in touch with the foremost scientists, especially with the physicist Boyle.

Duhamel's works are "Philosophia moralis christiana" (Angers, 1652); "Astronomia physica" (Paris, 1659); "De meteoris et frequentibus" (Paris, 1663); "De consenso veteris et nove philosophia" (Paris, 1665), a treatise on natural philosophy in which the Greek and scholastic theories are compared with those of Descartes; "De corporum affectionibus" (Paris, 1670); "De mente humana" (Paris, 1672), "De corpore animali" (Paris, 1673); "Philosophia vetus et nova ad usum scholae accommodata" (Paris, 1678). This last work, composed by order of Colbert as a textbook for colleges, ran through many editions. He also published: "Theologia speculativae et practicae" (7 vols., Paris, 1695), abridged in five volumes for use as a textbook in seminaries (Paris, 1694); "Regalae et Academica historia" (Paris, 1698; enlarged edition, 1701); "Institutiones biblice" (Paris, 1698), in which are examined the questions of the authority, integrity, and inspiration of the Bible, the value of the Hebrew text and of its translations, and the interpretation, Biblical geography, and chronology; "Biblia sacra Vulgata editionis" (Paris, 1705), with introductions, notes, chronological, historical, and geographical tables. In his choice of opinions, Duhamel shows great impartiality and unbiased judgment. His admiration for empirical science does not make him despise the speculations of his predecessors, but he examines and criticizes both sides carefully, tries to reconcile them, and, if this be impossible, gives his own opinion. Bruere, in his history of philosophy, calls him "vir et judex laude clarissimus et memoriam copia celeberrimus". Fontenelle praises his noble character and his disinterestedness; his charity, which "was exercised too frequently not to be known, notwithstanding his care to conceal it"; his humility, which was not only on his lips, but was "a feeling based on science itself".

Dulcin (Dolcino). See Apostolic.

Du Lhut (Duluth), Daniel Greysonol, Sieur d. at Saint-Germain-en-Laye about 1640; d. at Montreal, 26 Feb., 1710. He first served in the French army, becoming a lieutenant in 1657 and a gendarme of the King's Guard in 1664. He also took part in the campaign in Flanders and fought at the battle of Senig in 1674. During that year he went to Canada, whither he had been preceded by several members of his family, amongst them his cousins, the Tontys. At first he settled in Montreal, but in 1678 left for the West accompanied by his brother, La Tournet, and six soldiers. In 1679 he took possession of the Sioux country in the name of the King of France. He also explored Lake Superior and the high inland plateau where the Mississippi, the Red River, and the St. Lawrence rise, erected the fortified post of Kaministikquin (now Fort William) and afterwards built Fort La Tourette on Lake Nipigon. Du Lhut was the first Canadian to explore the West and it was his privilege to save Father Hennepin from captivity when this famous Recollect missionary, having become separated from La Salle's expedition, was wandering about in the wilderness near Saint-Antoine. On account of his intrepidity, Du Lhut had great influence over the savages and won their confidence. He later went to France, where he served as a lieutenant at the siege of Port royal in 1689, then was commissioned to explore the region of the Great Lakes, and finally was put in command of Fort Frontenac. Here, in 1707, he was succeeded by Tonty, his cousin. He died three years later and was buried in the church of the Recollets at Montreal.

Du Lhut was one of the most dauntless pioneer range-rovers (coureurs de bois) in Canada during the French regime. For thirty years he succeeded in keeping the country to the west of the Great Lakes under French control. Notwithstanding that he had every chance of becoming wealthy, he died poor and Governor Vaudreuil testified to his having been a very upright man. The Society of Duluth, Minnesota, takes its name from him. Du Lhut wrote accounts of his journeys (1676–1678), but unfortunately they have been lost; however, we have a plan that he designed for a chain of posts to be erected for the purpose of keeping the lake route clear of savages and thus facilitating communication between Canada and the western and southern parts of the continent (1683–95). This plan was published by Marny (Découvertes et Établissements, V, 3–72). In the Library of Congress at Washington may also be found extracts from his account of Detroit.

Duluth, Diocese of (Duluthensis), established 3 Oct., 1889, suffragan of the Archdiocese of St. Paul, Upper Minnesota, U.S., comprises the counties of Beltrami, Carlton, Cass, Clay, Clearwater, Cook, Crow, Hubbard, Itasca, Kittson, Lake, Marshall, Norman, Pine, Polk, Roseau, Red Lake, Mahnomen, Koocheching, and St. Louis, in the State of Minnesota, an area of 30,139 square miles. The first Catholic to visit that region, who were the French fur-traders who, under Grosseilliers, are recorded as having shipped furs from there in 1660. Daniel Greysonol Du Lhut, the French officer, adventurer, and fur-trader after whom the city is named, was there in 1679. After a varying existence as trading post and frontier settlement Duluth was incorporated as a town in May, 1857. The first priest in Minnesota was the famous Father Hennepin, who in 1680 was a prisoner among the Siouxs. He explored the Mississippi and at St. Paul named the falls in honour of St. Anthony, writing a glowing description of them in 1683. Wandering missionaries made frequent visits to the Indian tribes and scattered Catholics of the region down to 1839, when the Rev. Joseph Cretin (q. v.), a zealous French priest, began an active and successful missionary career.

The Seventh Provincial Council of Baltimore (1849) recommended to Rome the erection of a new see at St. Paul for the Territory of Minnesota and the appointment of Father Cretin as its first bishop, which plan was carried out. Father Cretin had been in the territory for some time, trying to revive the old Indian missions and evangelize the Canadian voyageurs who went there for the fur trade. The numerous Indians roaming in the wilderness had nearly forgotten the doctrines of Christianity preached to their ancestors by the Recollets and Jesuits more than a century before, but they were still anxious to have the “blackrobes” come among them once more. In 1857 the Vicariate Apostolic of Northern Minnesota was established, and these two divisions of the whole State continued until 4 May, 1888, when St. Paul was raised to the rank of an archdiocese with the four suffragan sees of Duluth, Winona, Jamestown (now Fargo), and St. Cloud, the last-named being the result of the Vicariate of Northern Minnesota. Duluth, the see city, was within these old limits of the vicariate. In 1866 the few Catholics there were brought together by a visiting missionary. They numbered only about two dozen families in 1870, and Father John Chebul, an Austrian by birth, attended them as a mission from Superior and built the first frame church for their use. Other priests of the formative period were Fathers G. Keller, a German, J. B. M. Génin, a French Oblate, Joseph Buh, Charles Verwyst, Joseph Staub, Christopher Murphy, and G. J. Goebel.

The Rev. James McGolrick, a member of the
council of Bishop Ireland of St. Paul and rector of the church of the Immaculate Conception, Minneapolis, was nominated as the first bishop of the new see and consecrated at St. Paul, 27 Dec., 1880. He was born 1 May, 1841, at Borrisokane, County Tipperary, Ireland. He founds in organic chemistry. With Bousinault he studied the composition of water and of the atmosphere. With Stas he investigated the composition of carbon dioxide, and later his memoirs on hydrogen and the amide compounds brought him at once into the first rank among the chemists of the nineteenth century.

In 1829 he founded the Ecole Centrale des Arts et Manufactures with Pécout, Lavallée, and Olivier. Brilliant lecture courses in the Sorbonne won him further renown. He replaced Thénard as professor at the École Polytechnique, was professor at the Sorbonne and dean of the faculty of sciences.

Aspo a very poor speaker, by practice and study he acquired eloquent powers that brought him great celebrity. Dumas also became professor at the École de Médecine, a position he resigned in favour of Wurtz, one of his most distinguished pupils. His scholars included such illustrious men as H. Sainte-Claire Deville, Wurtz, Debry, Pastier, and others. Turning his attention to politics, Dumas was elected a deputy from the department of Nord in 1849; among the proposed laws in which he was interested were various ones treating the receiving of money, stamped paper, forgery of public acts, taxes on salt, sugar, etc. In 1851 he was appointed minister of agriculture and commerce by Louis Napoleon, and after the coup d'état was made minister. From 1832 he was a member of the Institute, being elected to the Academy of Sciences, and in 1868 he was made a perpetual secretary; in 1878 he became a member of the French Academy. In 1888-89 he carried on an animated controversy as to the nature of the elements with Despretz; in the course of the discussion Dumas' energetic methods in attacking his opponent's views excited some criticism. His abandonment of chemical research for politics was considered a misfortune by the scientific world, as he ceased his brilliant investigations when in the very prime of his powers.

Dumas was a consistent Catholic, and remained true to his faith all his life. When it was necessary, he never hesitated to defend Christianity against the attacks of materialism. Examples of his views in this regard may be found in his various addresses, as: "Traité de chimie appliquée aux arts" (8 vols., 1828-45); "Précis de chimie physique et médicale"; "Leçons sur la philosophie chimique" (1837); "Essai de statique chimique des êtres organisés" (1841), the last work written in collaboration with Bousinault. Besides the publications just mentioned there were numerous papers in scientific
journals and in the transactions of the Academy of Sciences. A list of his papers was published in the "Catalogue of Scientific Papers of Royal Society, London".

MATIGNON, L'OEUVRE DE JEAN-BAPTISTE DUMAS (1848); Dictionnaire Larousse, a. v.

T. O'CONNOR SLOANE.

**Dumetz, Francisco, date of b. unknown; d. 14 Jan., 1811.** He was a native of Mallorca (Majorca), Spain, where he entered the Franciscan Order. In May, 1790, he went to Mexico with forty-eight other Franciscans to join the famous Franciscan missionary college of San Fernando in the City of Mexico. On volunteering for the Indian missions, he was sent to California in October, 1770. Sailing from San Blas, Jalisco, with ten friars in January, 1771, he reached Monterey in May and was assigned to Mission San Diego. In May, 1772, he was transferred to Mission San Carlos, and in May, 1782, was appointed for Mission San Buenaventura, where he continued his unostentatious labours for the Indians until August, 1797, when he was directed to found Mission San Fernando. Father Dumetz remained there from its founding on 8 Sept. to the end of 1805, except during 1803 and 1804 when apparently he resided at San Gabriel. From January, 1806, to the time of his death, Father Dumetz was stationed at San Gabriel. His remains were transferred in the mission church on 15 January, 1847. Dumetz was the last of the pioneer friars who did so much for California, where he toiled without interruption for forty years.

**Dumetz, Francois de.** See GALLOWAY.

**Dumont**, HUBERT-ANDRÉ, Belgian geologist, b. at Liége, 15 Feb., 1809; d. in the same city, 28 Feb., 1857. When only twenty years old he received the gold medal of the Academy of Brussels for his "Description géologique de la province de Liége". This memoir marked an important advance in stratigraphical geology. In 1835 he was made professor in mathematical and physical science and in the same year was appointed professor of geology and mineralogy at the University of Liége. He held this position until his death, serving also for a time as rector of the university. His native city has erected a statue in his honour. He was a devout Catholic and one of his friends entered the Society of Jesus. His principal achievement was his geological map of Belgium, the preparation of which engaged his attention for a number of years. The first edition was issued in 1849. Later and more complete editions followed, the last being "La carte géologique de la Belgique et des contrées voisines représentant les terrains qui se trouvent en dessous du limon hesbayen et du sable campanien au 1:40,000".

Dumont's work, together with that of Gosselet on the palaezoic rocks of Belgium, served as a foundation for a subsequent research in that region. The formation in 1848 had divided the Terrains Ardennois into the Devilien, Revinien, and Schienien groups, the Terrain Rheinan into the Gedinnen, Cobletzien, and Ahrien groups, and the Terrain Anthraxisfere into the Elfelden, Condruisen, and Houiller groups. This classification, though based on purely local considerations, was an excellent one both from a lithological and a stratigraphical point of view. He did not, however, deem it necessary to make any extended comparison between the subdivisions which he had distinguished in Belgium and similar groups in other countries. It was his opinion that the same fauna never extended over the whole earth, so that extreme caution was necessary in establishing a parallel between widely separated rocks on the basis of fossils contained in them. Besides the works already mentioned, Dumont was the author of a number of papers characterized by careful observation and great clearness. Among them are: 'Notizia di una nuova specie di phosphate ferroso' (Bull. of the Acad. of Belgium, 1827); "Observations sur la constitution géologique des terrains tertiaires de l'Angleterre comparés à ceux de la Belgique" (Ibid., XIX); "Mémoire sur les terrains triasique et jurassique de la province de Luxembourg" (Mém. de l'Acad., XV); "Étude sur les terrains ardennais et rhénviens de l'Ardennais et du Brabant" (Ibid., XXII).

**Dumolin (or DUMOLIN; latinized MOLINUS), CHARLES, French jurist, b. at Paris in 1500; d. there 27 December, 1566.** He was a descendant of a noble family related to Anne Boileyn, the mother of Elizabeth of England. The life of Dumolin was full of vicissitudes. After taking the degree of Doctor of Law, he first lectured on that subject at Orléans in 1531, and afterwards became advocate of the Parliament of Paris (the highest court of France). He soon abandoned this position, devoted himself exclusively to the study of law, and gained a great reputation by his works on jurisprudence. He liked to call himself the jurisconsult of France and Germany. It is related that he said, "Ego qui nemini cedo nec a nemine docteri possum" (I yield to no one nor is anyone able to teach me). His hatred for the papacy led him into apostacy. In 1542 he embraced Calvinism, but soon passed over to Lutheranism. His violent attacks on the papacy compelled him to seek refuge in Germany. In 1553 he lectured on law at Tübingen, and afterwards at Strasburg, Dôle, and Besançon; returning to Paris in 1557, he was soon obliged to quit that city and went successively to Orléans and Lyons. From 1564, he resided again in Paris; on his death-bed he abjured his heresy and was reconciled to the Church. The following are his principal works upon civil law: "Commentarii in consuetudines Præsen- sianæ"; "Extricatio labyrinthi dividui et individui"; "Tractatus de eo quod interest". His chief work on canon law is a critical edition of the "Decree of Gratian" with the gloss, accompanied by notes (postilla). Amongst his other works may be mentioned, "Commentarius ad editionem Henrici II. contra parvas datas et abusus curiae Romanae" (1532); "Concilium sui partis et Concilii de Trenta, receptione or rejet d'icelui" (1564), which work caused him to be cast into prison; "Consilium super cons- modis et incommodi novissimae sectae Jesuicetanum" (edited 1604). His "Opera omnia" were published in three volumes at Paris, in 1612; the best edition, however, is that of Paris, 1681, in five volumes.

**A. VAN HOVE.**

**Dunbar**, WILLIAM, Scottish poet, sometimes styled the "Chauver of Scotland", born c. 1460; died c. 1529(). He graduated B.A. at St. Andrews University in 1511. Educated for the Church, according to his own statement he became a Franciscan novice and, as such traversed the whole of England, preached in various towns, and crossed over for a time to Picardy in France. About 1490 he returned to Scotland and entered the service of James IV, who employed him on various embassies to Paris and elsewhere, and settled...
a small pension on him. He celebrated James's marriage to Margaret of England by his well-known poem "The Thrissal and the Rois" (The Thistle and the Rose, 1503), symbolizing the union between the two kingdoms. The poet received gifts in money from the kinship of his other poems on other occasions, such as the dedication of his first Mass in 1504, but though he often petitioned both the king and queen for a benefice (limiting his wishes, as he said, to a small country kirk covered with feather) he never obtained one, and seems always to have lived in poverty. The best known of his other poems was the "Golden Large," an allegory illustrating the victory of love over reason; a "Dance" (of the seven deadly sins), a work of much gloomy power; and many other pieces, somewhat humorous and disfigured by the coarseness of the time, others of a religious and ascetic type. A few were printed during his lifetime; and in 1834 an admirable edition of his complete works was published, edited by Dr. David Laing. In 1511 Dunbar is mentioned among Queen Margaret's train on one of her journeys; but nothing is heard of him after 1513, the year of the battle of the Flodden. Laing conjectures that he must have died at that fight, but other writers suppose he had to survive until about 1520.

Dunchad (Dunchad, Duncad, Donatus), Saint, confessor, Abbot of Iona; date of b. unknown, d. in 710. He was the son of Granmuadhach and grandson of Maelcobba of the house of Conall Gulban. He is first heard of as Abbot of Killochuir on the coast of S. E. Ulster (perhaps Killough, County Down). There is considerable dispute as to the year in which he became Abbot of Hy Iona). The "Annals of Ulster" first mention him in that capacity under the year 706 (really 707); but Conamhail was abbot from 704 to 710. It may be that St. Dunchad was coadjutor to Conamhail (the phrase is principatum tenuit). Or perhaps there was some schism in the monastery over the paschal question, for though St. Dunchad is said to have ruled from 710 till 717, in 713 the death of "St. Durbaine Foda, Abbot of Ia" is recorded by the "Annals of the Four Masters," and the same authority relates the appointment of "Faelchu, son of Durbaine" to the abbeacy in 714. It was this Faelchu who was really abbot from 712 to 724. It is possible, however, may have been really coadjutors to St. Dunchad, or priors, or even bishops, for there were certainly bishops in Iona at that period, and the phrase employed is cathedra in obtinuit. However this may be, the paschal controversy was settled at Iona by the adoption of the Roman usage, while St. Dunchad was abbot. This took place at the instance of St. Egbert, a Northumbrian priest, who had been educated in Ireland. He came to Iona in 716, and was at once successful in persuading the community to abandon the Celtic Easter and tenure.

Dunedin, Diocese of (Dunedinen) comprises the provincial district of Otago (including the Otago part, Southland, and Stewart Island, as well as other adjacent islands). The diocese contains the most picturesque lake and fiord scenery in New Zealand. Its area is about 24,000 sq. miles, of which some 4000 sq. miles are fields, and 2940 forest. This part of New Zealand was visited (perhaps discovered) by Captain Cook in 1770. Beyond a few traders, there was, however, no white population in the Otago provincial district till 1840, when some families settled on land at Waitakouaiti. In 1848 the district was first colonized systematically and on a considerable scale by the Otago Association, under the auspices of the Free Church of Scotland. It was desired to retain the province as a Free Kirk reserve, and the immigration in New Zealand was at first resisted. The last barriers of religious exclusiveness were, however, swept away by the rush of population that flowed into the province from all parts of Australia when, in 1861, rich gold was discovered at Gabriel's Gully and elsewhere. The new conditions thus brought about led to a rapid development of the mineral, pastoral, agricultural, and forest resources of Otago. All New Zealand formed part of the Vicariate Apostolic of Wellington, which was erected in 1835. The first vicar, Dr. Pompllier, arrived in the country, with the pioneer (Marist) missionaries, in 1838. All New Zealand remained within its spiritual charge till 1848. From 1848 till 1869 the territory now comprised in the Diocese of Dunedin was included in the episcopal See of Wellington. In the latter year the Diocese of Dunedin was established. Its first bishop was the Right Rev. Patrick Moran, translated thither from the Cape of Good Hope, 3 December, 1869; d. 22 May, 1895. He was succeeded by the Right Rev. Michael Verdon, consecrated 3 May, 1899. In 1849 he accompanied Pesant, and visited and instructed the native villagers and a few white (Catholic) whalers at Otakou and Moeraki. Up to 1859, however, there was no Catholic church or school or resident priest in the whole southern province, and only about ninety scattered Catholics, who, when visited, on foot, by the aforesaid Marist, Father Petitjean. Early in the gold-rush of the sixties, another devoted Marist missionary, Father Moreau, was appointed resident priest in Dunedin, with charge of the whole province. He built, at Dunedin, the first Catholic church and presbytery in that province. In the arrival of Bishop Moran, in 1871, Father Moreau and a few of his fellow-religious
Dunfermline, Abbey of, in the south-west of Fife, Scotland. Founded by King Malcolm Canmore and his queen, Margaret, about 1070, it was richly endowed by him and his sons, and remodelled as a Benedictine abbey by his successor, David I, who brought with him twelve monks from Canterbury. The monastic buildings, which were of such extraordinary and splendid size that three sovereigns and their retinues might (says Matthew Paris) have been lodged there together, were burned down by Edward I of England in 1304, but were afterwards restored. The Abbey of Dunfermline and its priory of Melrose were still to be seen within the ruined walls of the Lady chapel, and were repaired and enclosed by order of Queen Victoria. Dunfermline Abbey was one of the richest Scottish houses, owning almost all Western Fife, as well as property in other counties. It possessed, within its own domain, the civil and criminal jurisdiction equal to that of the Crown. The church succeeded Iona as the burial-place of kings, and was thus the Westminster Abbey of Scotland. Besides Malcolm and Margaret, David I and Robert Bruce, with his queen and daughter, were inlaid there. After the Dissolution, the property passed through the hands of the Pitcairn family, Lord Gray, and von Earl of Dunfermline, to the Marquises of Tweeddale. The splendid church was deserted in 1560 by the Reformers, all but the nave, which were restored for Presbyterian worship. It is a fine example of Gothic architecture, with a beautiful western doorway. The remains of the church and palace are now Crown property.

D. O. Hunter-Blair.
churches, and discharged faithfully the other duties of his pastoral ministry. In the exercise of these duties he came into conflict with the Prussian Government on the question of mixed marriages. The conditions laid down by Benedict XIV (1740–58) in the Constitution “Magnae nobilitatis” (20 June, 1748), by which marriages between Catholics and members of other Christian denominations became lawful, had been well observed in Catholic Poland. But in a treaty concluded in 1768 with various European powers the Prussian Government undertook to enforce another order of things. Mixed marriages were not to be celebrated; male children born of such marriages were to be brought up in the religion of their father, the female offspring in that of the mother. The marriage was to be blessed by the ecclesiastical minister, under whose jurisdiction the bride was; if a Catholic priest should refuse to solemnize the marriage, the minister of the other party was to officiate. Similar provisions were contained in the code of Prussian law extended to Prussian Poland in 1797. By a royal decree of King Frederick William III (1797–1840), 21 Nov., 1803, they were further modified in an anti-Catholic sense: all the children of mixed marriages were to be raised in the religion of the father.

Such legislation was unquestionably hostile to Catholic interests. It often happened, therefore, that Catholic priests blessed mixed marriages without first requiring the usual promise concerning the free exercise of religion for the Catholic party and the education of all offspring in the Catholic faith. The bishops were silent; both priests and bishops seemed to believe that they must endure what they could not prevent. Penalties were inflicted by the Government on all priests who refused to bless mixed marriages contracted without any of the above conditions. The Catholic conscience was quite in accordance with them. “Litteris altero abhino” of Pius VIII (1829–30), 25 March, 1830, forbidding priests to bless a mixed marriage if no promise were given relating to the education of the children in the Catholic faith. In case of such refusal Pius VIII agreed to tolerate a passive assistance (assistenta passiva) on the part of the priest. Realizing the harm done to the Catholic religion by the lax practice observed so far, Archbishop Von Dunin resolved to break with it. In January, 1837, he requested from the Ministry of Ecclesiastical Affairs in Berlin permission to publish the Brief of Pius VIII. This, or at least his letter to the clergy on the same, was sent directly to Frederick William III, 26 Oct., 1837, was similarly treated. Determined not to betray his high office he sent an instruction to his priests, 30 Jan., 1838, in which he inculcated the principles of the Church relating to mixed marriages; soon after (27 Feb.) he suspended ipso facto any priest of his diocese who should henceforth bless a mixed marriage without previous assurance as to the Catholic education of the offspring. The king was notified of these acts, 10 March, 1838. While the instructions of the archbishop were well received throughout his diocese, the Government was highly indignant and sought by all means to render them ineffectual. They were declared null and void; the archbishop was asked to recall them, and finally (in July, 1838) a regular trial was commenced against him in the Court of Posen, to which, however, he was never brought, owing to the circumstances of the case. In the midst of this struggle he received much consolation from the unimpeachable support of his clergy, and from an Allocution in his favour by Gregory XVI, 13 Sept., 1838. At the conclusion of his trial in 1839 he was summoned to Berlin, where he arrived 5 April, and an attempt was made to have him recant; finally the sentence of the court proclaiming his deposition from office, inability ever to hold one, and a confinement of six months in a fortress, was read to him. He appealed directly to the king for clemency, but nothing was changed except that he was detained in Berlin instead of being sent to a fortress.

Meanwhile the archbishop began to think of the needs of his diocese, and being unable to obtain permission to return, he departed secretly from Berlin and arrived in Posen, 4 October. In less than two days, during the night of 5–6 Oct., he was arrested and taken to the fortress of Kolberg, where he remained until the death of Frederick William III (7 June, 1840). After his departure many measures were put in motion; the bells and the organs remained silent during the celebration of the Holy Mysteries; on all Sundays and feast days public prayers were said for the speedy return of the archbishop; and both the clergy and the nobility of Posen made several fruitless attempts to obtain his release. With the accession of the peaceful king, Frederick William IV (1840–61), matters changed. On 3 Aug., 1840, Von Dunin was set free, and on the 5th of the same month he arrived in Posen amid the rejoicing of his faithful flock. According to an agreement reached with the Government he issued a pastoral letter, 25 Aug., in which his previous instructions were somewhat modified, except in so far as, however, to Catholic principle. He recommended his clergy not to insist absolutely on the fulfillment of the usual conditions required for mixed marriages, but at the same time to abstain from all active participation in such marriages, if the usual promises were not given. No mention was made of any punishment in the case of contravention. Later on (21 Feb., and 26 Sept., 1842) he issued new instructions relating to the manner of dealing in confession with the husband or wife of a mixed marriage. The priests were directed to be indulgent towards those who tried their best to influence their children in favor of the Catholic faith, and to distinguish them from those who were altogether careless in the discharge of this sacred duty. With this the whole controversy ceased. Archbishop Von Dunin did not long survive these conflicts. His memory is held in respect for his unwavering loyalty to Catholic principles, and for his courage, frankness, and prudent moderation displayed in their defence.

Dunkeld, Diocese of (Dunkeldensis), in Scotland, constituted, as far back as the middle of the ninth century, the primatial see of the Columban Church by King Kenneth Mac Alpine, who rebuilt there the church and monastery founded by King Constantine (afterwards destroyed by the Danes), and translated thither St. Columba’s relics. The first occupant of the see is styled in the Annals of Ulster (A. D. 865) Bishop of Fortrenn, the name by which the kingdom of the Southern Picts was then known. He was also Abbot of Dunkeld, with jurisdiction, formerly enjoyed by Iona, over the other Columban monasteries in Scotland. The seat of the primacy was, however, subsequently transferred to Abernethy, and then to St. Andrews, and Dunkeld became subject to lay abbots, from one of whom, Crinan, sprang Malcolm III and his successors on the throne of Scotland. The see was united to the Diocese of Moray further north, erected Dunkeld into a cathedral church and replaced the Columban monks by a chapter of secular canons. The new bishopric included a great part of what afterwards became the Dioceses of Argyll and Dunblane, and retained its jurisdiction over various churches retaining old Columban foundations. The Abbeys of Iona remained, as heretofore, subject to the ancient prima-
tial See of Dunkeld, until Iona became the seat of the Bishop of the Isles at the end of the fifteenth century. About the same time Dunkeld (together with Dunblane, Galloway, and Argyll) became a suffragan of the newly-constituted Archibishopric of Glasgow; but during the pontificate of Archbishop Foreman of St. Andrews (1529-1532) it was restored to the metropolitan province. Thirty-five bishops occupied the See of Dunkeld from its foundation in 1107 until the extin-
tion of the ancient hierarchy in the sixteenth century. Of this line of prelates the most distinguished were James Kennedy (1438-1440), illustrious for his birth, learning, and piety, who was translated after two years at Dunkeld, to the Bishopric of St. Andrews; the famous post-precate Gavin Douglas (1516-1521), who died in exile in England; and John Hamilton (1515-1547), who succeeded the murdered Cardinal Beaton at St. Andrews, and closed his troubled career on the scaffold at Stirling in 1371. The last pre-
Reformation Bishop of Dunkeld was Robert Crichton (nephew of a former occupant of the see), who survived until 1586.

For close on three centuries, the Diocese of Dun-
kleed, like the other Scottish bishoprics, remained vac-
ant. The sixteenth century and the seven-teenth were restored in 1685 by Pope Friday XIII by his Bull, "Ex suprema apostolatus apice". The diocese, as then reconstituted, is one of the suffra-
gen sees of the archiepiscopal province of St. An-
drews, and includes the counties of Perth, Forfar, Clackmannan, Kinross, and the northern part of Fife. Superiority of the see, as exercised by three bishops: George Rigg (d. 1877); James G. Smith (transferred to St. Andrews in 1900); and the Right Rev. Angus Macfarlane, consecrated 1901. The bish-
op's pro-cathedral is in Dundee, the residence of the Diocesan Archdeacon, and the church of the see, St. Mary's, erected in a pro-
vost and eight canons. The total number of secular priests in the diocese (1908) is 35; regulars (Redemptorists), 12. The missions and chaplaincies number 17, the churches, chapels, and stations 31, and the parochial schools 15. There are two societies of men (Redemptorists and Marists), four convents of women (Sisters of Mercy, Little Sisters of the Poor, Ursulines, and Sisters of Charity), and the Catholic insti-
tutions comprise a home for aged poor, a house of mercy for servants, and a working girls' home. The Catholic population of the diocese is estimated to be rather more than 30,000. The old cathedral of Dun-
kleed, beautifully situated on the Tay amid wooded hills, was erected between 1220 and 1500. The build-
ing was much damaged in the reign of Robert II, and suffered later at the hands of the Earl of Buchan, styled the "Wolf of Badenoch". It fell partly into the ruins in the sixteenth century, since when the choir has been used for Presbyterian worship. The Duke of Atholl, the owners of the building, have spent a good deal on its preservation and repair, and an ex-
tensive restoration of the choir was carried out in 1908, chiefly at the cost of Sir Donald Currie. There is now no Catholic church or resident priest in the vil-
 league of Dunkeld.

Duns Scotus, John, surmised Doctor Subtilis, d. 8 Nov., 1308; he was the founder and leader of the fa-
mous Scotish School, which had its chief representatives among the Franciscans. Of his antecedents and life very little is definitely known, as the contemporary sources are silent about him. It is certain that he died rather young, according to earlier traditions at the age of thirty-four years (cf. Wadding, Vita Scotii, in vol. I of his works); but it would seem that he was somewhat older than this and that he was born in 1270. The birth-place of Scotus has been the subject of much discussion, and so far no conclusive argument in favour of any locality has been advanced. The surname Scotus by no means decides the question, for the name was given to Scotchmen, natives of northern England. The other name, Duns, to which the Irish attach so much importance, settles nothing; there was a Duns also in Scotland (Ber-
wick). Moreover, it is impossible to determine whether Duns was a family name or the name of a place. Appeal to supposedly ancient local traditions in behalf of Ireland's claim is of no avail, since we can-
not ascertain just how old they are; and their age is the pivotal point. This discussion has been strongly tinged with na-
tional sentiment, especially since the beginning of the sixteenth century. Scotland produced as prominent Irish Franciscans like Mauritius de Portu (O'Fihely), Hugh Carvell, and Luke Wadding had rendered great service by editing Scotus's works. On the other hand, the English have some right to claim Scotus; as a professor for several years at Oxford, he belonged at any rate to the English province; and neither his writings nor his lifelong activity after his death was any other view as to his nationality proposed. It would not, however, be forgotten that in those days the Franciscan clerics in Scotland were affiliated to the English province, i.e. to the See of Canterbury. It would not there-
fore be amiss to regard Scotus as a native of Scotland or as a member of a Scottish cleric. In any case it is high time to eliminate from this discussion the famous entry in the Merton College MS. (no. 39) which would make it appear that Scotus was a member of that college. And therefore a native of Northern England. The statutes of the college excluded monks; and as Scotus became a Franciscan when he was quite young, he could not have belonged to the college previous to joining the order. Besides, the entry in the college register is under the date of 1455, and consequently too late to be estimated.

The case is somewhat better with the entry in the catalogue of the library of St. Francis at Assisi, under date of 1381, which designates Duns Scotus's commentary on the "Sentences" of Peter Lombard as "magistri patris Johannis Scotii de Ordine Minorum, qui et Doctor Subtilis nuncupatur, de provincia Hibـicieus" (the work of master John Scotus of the Franciscan Order, known as the subtle doctor, from the province of Ireland). This, though it furnishes the strongest evidence in Ireland's favour, cannot be regarded as decisive. Since Scotus laboured during several years in England, he cannot, simply on the strength of this evidence, be assigned to the Irish province. The li-

permission only to eight; among those who were refused was “Ioannes Dous”. It is quite certain, too, that he went to Paris about 1301 and that there he was at first merely a Bachelor of Arts, for the general of the Franciscans, Gonsalvus de Vallevbuna, wrote (1301 or 1308) he was sent to present John Scotus at the university for the doctor's degree. The general's letter mentions that John Scotus had distinguished himself for some time past by his learning ingenique subtilissimo. He did not teach very long in Paris; in 1304 or 1308 he was sent to Cologne, probably as a professor at the university. There he died, and was buried in the monastic of the Minorites. At the present time (1908) the process of his beatification is being agitated in Rome on the ground of a cultus immemorabilis.

Duns Scotus's writings are very numerous and they have often been printed; some, in fact, at a very early date. But a complete edition, in 12 folio volumes, was published only in 1639 by Wadding at Lyons; this, however, included the commentaries of the Scotists, Lyttenus, Poncupo, Cavelli, and Hiquescus. A reprint of Wadding's edition, with the treatise “De perfectione statum” added to it, appeared 1891-93 at Paris (Vives) in 46 vols. 4to. Whether all the writings contained in these editions are by Duns Scotus himself is doubtful: it is certain, however, that many changes and additions were made by later Scotists. A critical edition is still wanting. Besides these printed works, some others are attributed to Scotus, especially commentaries on books of Scriptue. The printed writings deal with grammatical and scientific, but chiefly with philosophical and theological, subjects.

Of a purely philosophical nature are his commentaries and questiones on various works of Aristotle. These, with some other treatises, are contained in the first seven volumes of the Paris edition. The principal work of Scotus, however, is the so-called “Opus Oxoniense”, i.e. the great commentary on the “Sentences” of Peter Lombard, written in Oxford (vols. VIII.-XXI). It is primarily a theological work, but it contains many treatises, or at least digressions, on logical, metaphysical, grammatical, and scientific topics, so that nearly his whole system of philosophy can be derived from this work. Volumes XXII.-XXIV contain the “Reportata Parisiensia”, i.e. a smaller commentary, for the most part theological, on the “Sentences”. The “Queestiones Quodlibetales”, chiefly on theological subjects, one of his most important works, and the above-mentioned essay, “De perfectione statum” can be derived from this work. Volumes XXII.-XXIV contain the “Reportata Parisiensia”, i.e. a smaller commentary, for the most part theological, on the “Sentences”. The “Queestiones Quodlibetales”, chiefly on theological subjects, one of his most important works, and the above-mentioned essay, “De perfectione statum” can be derived from this work. Volumes 18 and 19 contain the “Reportata Parisiensia”. It is a remarkably comprehensive commentary, covering all the important topics in philosophy, and presenting Scotus's views on them in a clear and concise manner. The work is divided into two parts, the first dealing with metaphysics and the second with the doctrine of God. In the first part, Scotus discusses the nature of being, existence, causality, and the relationship between the mind and the body. In the second part, he deals with the attributes of God, the concept of eternity, and the problem of the existence of God. The work is extensively annotated, and contains many references to the works of other philosophers, such as Aristotle, Aquinas, and Ockham. It is a valuable source for understanding Scotus's thought and its influence on later generations of philosophers.

tinctio formalis is intermediate between the distinctio rationis tantum, or the distinction made by the intellect alone, and the distinctio reais, or that which exists in reality. The former occurs, e.g., between the definition and the thing defined, the latter, within the realm of created reality, between things that can or cannot be separated separately by Divine omnipotence, as, e.g., between the different parts of a body or between substance and accident. A thing is "formally distinct" when it is such in essence and in concept that it can be thought of by itself, when it is not another thing, though with that other so closely united as to be inseparable, just because the accident is not identical with the substance. But it has no subsistence of its own, since it is not a thing existing by itself, but inheres in the substance as its subject and support; it is not an independent being. Moreover, only actually existing things can be in the form of God, Who is infinitely real and existent with existence. In the state of mere identity or possibility, before their realization, things have an essence, an ideal conceivable being, but not an actual one; else they could not be created or annihilated, since they would have had an existence before their creation and since being is in itself true and good, only those things are really good and true which actually exist. If God, therefore, by an act of His free will gives existence to the essences, He makes them by this very act also true and good. In this sense, it is quite correct to say that according to Scotus things are true and good because God so wills. By this assertion, however, he does not deny that things are good and true in themselves. They have an objective being, and hence also objective truth and goodness, because they are in the likeness of God, Who being good and true, can make being and truth that imitate. At the same time, in their ideal being they have no existence, and in their essence, too, they are only imitations. The ideas of them are not produced by the Divine free will, but by the Divine intellect, which, without the co-operation of God's will, recognizes His own infinite essence as imitable by finite things, and thus of necessity conceives the ideas. In this ideal state God necessarily wills the things, since they cannot but please to Him as images of His own essence. But from this it does not follow that He must will them with an effective will, i.e., that He must realize them. God is entirely free in determining what things shall come into existence.

God alone is absolutely immaterial, since He alone is absolute and perfect actuality, without any potentiality for becoming other than what He is. All creatures, angels and human souls included, are material, because they are changeable and may become the subject of death. But from this it does not follow that souls and angels are corporeal; on the contrary, they are spiritual, physically simple, though material in the sense just explained. Since all created things, corporeal and spiritual, are composed of potentiality and actuality, the same materia prima is the foundation of all things; and therefore all things have a corporeal and spiritual substratum, a common material basis. This materia, in itself quite indeterminate, may be determined to any sort of thing by a form—a spiritual form determines it to a spirit, a corporeal form to a material body. Scotus, however, does not teach an extreme Realism: he does not attribute to the universals or abstract essences, e.g., genus and species, an existence of their own, independent of the individual beings in which they are realized. It is true, he holds that materia prima, as the indeterminate principle, can be separated from the canons, or the determining principle, at least by Divine omnipotence, be said to separate the one from the other, just as in the Holy Eucharist He keeps the accidents of bread and wine in existence, without a substance in which they inhere. It is no less certain that Scotus teaches a plurality of forms in the same thing. The human body, e.g., taken by itself, without the soul, has its own form, the forma corporis. It is transmitted to the child by its parents and is different from the rational soul, which is infused by God himself. The forma corporis gives the body a sort of human form, though quite imperfect, and remains after the rational soul has departed from the body in death until decomposition takes place. Nevertheless, it is the rational soul which is the essential form of the body or of man; this constitutes with the body one being, one substance, one person, one man. With all its faculties, vegetative, sensitive, and intellectual, it is the immediate substance, whether in the body in existence, only one soul in man, but we can distinguish in it several forms; for conceptually the intellectual is not the same as the sensitive, nor is this identical with the vegetative, nor the vegetative with that which gives the body, as such, its form; yet all these belong for- mally to the same essence, to the same essence, to the essence of man, the visible soul. Scotus also maintains a formal distinction between the universal nature of each thing and its individuality, e.g., in Plato between his human nature and that which makes him just Plato—his Platonicity. For the one is not the other; the individuality is added to the human nature and it constitutes the human individual. In this sense the property or difference, or the accidens, is the principium individualitatis. Hence it is clear that there are many points of resemblance between matter and form on the one hand and universal natures and their individualizations on the other. But Scotus goes far from taking extreme Realism. According to his view, matter can exist without form, but not the universal essence without individuation; nor can the different forms of the same thing exist by themselves. He does not maintain that the uniform matter underlying all created things is the absolute being which exists by itself, independent of the individuals, and is then determined by added forms, first to genera, then to species, and lastly to individuals. On the contrary, materia prima, which according to him can exist without a form, is already something individual and numerically determined. In reality there is no materia without form, and vice versa. The materia which God created had already a certain form, the imperfect form of chaos. God could create matter by itself and form by itself, but both would then be something individual, numerically different, though not specifically, different from the matter and other forms of the same kind. This matter, numerically different from other matter, could then be united with a form, also numerically different from other forms of the same kind; and the result would be a compound individual, numerically different from other individuals of the same kind. The individualized matter and compound we get by abstraction the idea of a universal matter, a universal form, a universal compound, e.g., of a universal man. But by themselves universal matter and universal form cannot exist. The universal as such is
a mere conception of the mind; it cannot exist by itself, it receives its existence in and with the individual; in and with the individual it is multiplied, in and with the individual it loses again its existence. Even God cannot separate in man the universal nature from the individual, or the human soul the intellect, or the sensitive part, without destroying the whole. In reality there are only individuals, in which, however, we can by abstraction formally separate both the abstract human nature from the individuality and the several faculties from one another. But the separations and distinction and formation of genera and species are mere processes of thought, the work of the contemplating mind.

The psychology of Scotus is in its essentials the same as that of St. Thomas. The starting-point of all knowledge is the sensory or outer experience, to which must be added the inner experience, which he designates as the ultimate criterion of certitude. He lays stress on induction as the basis of all natural sciences. He denies that sense-perception, and a fortiori intellectual knowledge, is merely a passive process; moreover, he asserts that not only the universal but also the individual is perceived directly. The adequate or intellectual knowledge is not the species in the material, but being in its universality. In the whole realm of the soul the will has the primacy since it can determine itself, while it controls more or less completely the other faculties. The freedom of the will, taken as freedom of choice, is emphasized and viewed from St. Thomas's point of view. In the contemplation of God, the will is not necessitated, but determines itself freely. This doctrine does not imply that the will can decide what is true and what is false, what is right and what is wrong, nor that its choice is blind and arbitrary. Objects, motives, habits, passions, can exert a great influence, and incline it to choose one thing rather than another. Yet the final decision remains with the will, and in so far the will is the one complete cause of its act, else it would not be free. With regard to memory, sensation, and association we find in Scotus many modern views.

System of Theology.—It has been asserted that according to Scotus the essence of God consists in His will; but the assertion is unfounded. God, He holds, is the ens infiniatum. It is true that according to him God is infinite in Himself and as the infinite God by Father and Son are not based upon a natural instinct, so to say, but upon God's own free choice. Every will is free, and therefore God's will also. But His will is so perfect and His essence so infinitely good, that His free will cannot but love it. This love, therefore, is at once free and necessary. Also with regard to created things Scotus emphasizes the freedom of God, without however, falling into the error of merely arbitrary, unmotivated indeterminism. It has been asserted, too, that according to Scotus, being can be attributed univocally to God and creatures; but this again is false. Scotus maintains that God is the evil per essentiam, creatures are entia per participationem— they have being only in an analogical sense. But from the being of God and the being of creatures, a universal idea of being can be abstracted and predicated univocally of both the finite and the infinite; otherwise we could not infer from the existence of finite things the existence of God, we should have no proof of God's existence, as every syllogism would contain a quaternio terminorum. Between God's essence and His attributes, between the attributes themselves, and then between God's essence and the Divine Person, there is a formal distinction along with real identity. For conceptually Divinity is not the same as wisdom, intellect not the same as will; Divinity is not identical with paternity, since Divinity neither begets, as does the Father, nor is begotten, as is the Son. But all these realities are formally in God and their distinction is not annulled by His infinity; on the other hand it remains true that God is only one. The process constituting the Blessed Trinity takes place without regard to the external world. Only after its completion the three Divine Persons, as one principle, produce by their act an infinite species. But quite apart from this process, God is independent of the world in His knowledge and volition, for the obvious reason that dependence of any sort would imply imperfection.

The cognition, volition, and activity of the angels is more akin to ours. The angels can of themselves do all things; they do not need any external grace, though in fact they receive such from God. The devil is not necessarily compelled, as a result of his sin, always to will what is evil; with his splendid natural endowments he can do what in itself is good; he can even love God above all things, though in fact he does not do so. Sin is only in so far an infinite offence of God as it leads away from Him; in itself its malice is no greater than is the goodness of the opposite virtue.

In his Christology, Scotus insists strongly on the reality of Christ's Humanity. Though it has no personality and no subsistence of its own, it has its own existence. The union of human and divine natures is not the same as the human individual, but is the ens idiomatum are explained in accordance with the doctrine of the Church, with no leaning to either Nestorianism or Adoptionism. It is true that Scotus explains the influence of the hypostatic union upon the human nature of Christ and upon His work differently from St. Thomas, in that in Scotus's view the human nature of Christ, it does not of itself impart to the Humanity the beatific vision or impeccability. These prerogatives were given to Christ with the fullness of grace which He received in consequence of that union. God would have become man even if Adam had not sinned, since He willed to manifest His humanity and the world should be united with Himself by the closest possible bond. Scotus also defends energetically the Immaculate Conception of the Blessed Virgin. All objections founded on original sin and the universal need of redemption are solved. The merits of Christ are infinite only in a broader sense, but of themselves they are entirely sufficient to give adequate satisfaction to the Divine justice; there is no deficiency to be supplied by God's mercy. But there is needed a merciful acceptance of the work of Christ. He himself states that Christ by the operation of the Holy Ghost has been given to be an example of this humanity and the world should be united with Himself by the closest possible bond. The sacraments give grace of themselves, or ex opere operato, if man places no obstacle in the way. The essence of the Sacrament of Penance consists in the absolute remission; but this is of no avail unless the sinner repent with a sorrow which springs from love of God; his doctrine of attrition is by no means lax. As to his eschatology it must suffice to state that he makes the essence of beatitude consist in activity, i.e., in the love of God, not in the beatific vision; this latter is only the necessary condition.

In ethics Scotus declares emphatically that the morality of an act requires an object which is good in its nature, its end, and its circumstances, and according to the dictate of right reason. It is not true that God's free will decide arbitrarily what is good and what is bad; he only asserts that the Commandments of the second table of the Decalogue are not in such strict sense laws of nature as those of the first table; because God cannot grant a dispensation from the laws of the first, whereas He can dispense from those of the second, as in fact He did when He com-
manded Abraham to sacrifice his son. But the precepts of the second table also are far more binding than the other positive laws of God. In the present order of things God cannot permit manslaughter universally, taking the property of others, and the like. They regard objects, but under no circumstance the individual. Absolutely speaking, man should direct all his actions towards God; but God does not require this, because He does not wish to burden man with so heavy a yoke. He obliges man only to observe the Decalogue; the rest is free. Social and legal questions are not treated by Scotus as indifferent acts of the individual; he, however, contains sound observations on these subjects.

**Relation between Philosophy and Theology.**

—Scotus does not, as is often asserted, maintain that science and faith can contradict each other, or that a proposition may be true in philosophy and false in theology and vice versa. Incorrect, also, is the statement that he attaches little importance to showing the harmony between scientific knowledge and faith and that he has no regard for speculative theology. Quite the contrary, he proves the dogmas of faith not only from authority but, as far as possible, from reason, by the same means he uses for the demonstration of philosophical propositions. Facts which have God for their author and yet can be known by our natural powers, especially miracles and prophecies, are criteria of the truth of Revelation, religion, and the Church. Scotus strives to gain as thorough an insight as possible into the true nature of God, to disclose the truth to establish truth upon truth, and from dogma to prove or to reject many a philosophical proposition. There is just as little warrant for the statement that his chief concern is humile subjection to the authority of God and of the Church, or that his tendency a priori is to deposit scientific knowledge and to reduce speculative theology into doubt. Scotus simply believes that many philosophical and theological propositions can be proved which other Scholastics consider incapable of demonstration. He indeed lays great stress on the authority of Scripture, the Fathers, and the Church; but he also attaches much importance to natural knowledge and the intellectual capacity of the mind of angels and of men, both in this world and in the other. He is inclined to widen the range of attainable knowledge. He sets great value upon mathematics and the natural sciences and especially upon metaphysics. He rejects every unnecessary recourse to Divine or angelic intervention or to miracles, and demands that the supernatural and miraculous be limited as far as possible even in matters of faith. Dogmas he holds to be explained in a somewhat softened and more easily intelligible sense, so far as this may be done without diminution of their substantial meaning, dignity, and depth. In Scripture the literal sense is to be taken, and freedom of opinion is to be granted so far as it is not opposed to Christian Faith or the authority of the Church. Scotus was much given to the study of mathematics, and for this reason he insists on demonstrative proofs in philosophy and theology; but he is no real sceptic. He understands by our sense, internal and external, and by the authority together with reason, can furnish us with absolute certainty and evidence. The difficulty which many truths present lies not so much in ourselves as in the objects. In itself everything knowable is the object of our knowledge. Reason can never recognize the existence of God and many of His attributes, the creation of the world out of nothing, the conservation of the world by God, the spirituality, individuality, substantiality, and unity of the soul, as well as its free will. In many of his writings he asserts that mere reason can come to know the immortality and the creation of the soul; in others he asserts the direct opposite; but he never denies the so-called moral evidence for these truths.

Theology with him is not a scientific study in the strictest sense of the word, as are mathematics and metaphysics, because it is not based on the evidence of science but on authority. It is a practical science because it pursues its practical end: the possession of God. But it gives the mind perfect certainty and unchangeable truths; it does not consist in mere practical, moral, and religious activity. Thus Scotus is removed from Kant and the modern sceptics, not by a single line of thought, but by the whole range of his philosophical speculation. Scotus is no precursor of Luther; he emphasizes ecclesiastical tradition and authority, the freedom of the will, the power of our reason, and the co-operation of grace. Nor is he a precursor of Kant. The doctrine of primary of the will and the practical character of theology has quite a different meaning in his mind from what it has in Kant’s. He valores metaphysics highly and calls it the queen of sciences. Only as a very subtle critic may he be called the “Kant of the thirteenth century.” Nor is he a precursor of the Modernists. His writings contain many entirely modern ideas, e.g. the stress he lays on free will in scientific and also in religious matters, upon the separateness of the objective world and of thought, the self-activity of the thinking subject, the dignity and value of personality; yet in all this he remains within proper bounds, to the Modernists, and to the humanists, it asserts very forcibly the necessity of an absolute authority in the Church, the necessity of faith, the freedom of the will; and he rejects absolutely any and every monistic identification of the world and God. That he has so often been misunderstood is due simply to the fact that his teaching has been viewed from the standpoint of modern thought.

Scotus is a genuine Scholastic philosopher who works out ideas taken from Aristotle, St. Augustine, and the preceding Scholastics. He is universally recognized as a deep thinker, an original mind, and a sharp critic; a thoroughly scientific man, who without personal bias proceeds objectively, stating his own doctrines with modesty and with a certain reserve. It has been asserted that he did more harm than good to the Church, and that by his destructive criticism, his subtleties, and his barbarous terminology he prejudiced rather than helped the natural science. He inculcated the truth that the study of dogmas, the study of literal sense, and a thorough knowledge of the unchangeable truths of the faith of the Church and the authority of the Church, are necessary in order to understand the dogmas. These accusations originated to a great extent in the insufficient understanding or the false interpretation of his doctrines. No doubt his diction lacks elegance; it is often obscure and unintelligible; but the same must be said of many earlier Scholastics. Then too, subtle discussions and distinctions which to this age are meaningless, abound in his works; yet his researches were occasioned for the most part by the remarks of other Scholastic philosophers, especially by Henry of Ghent, whom he attacks perhaps even more than he does St. Thomas. But the real spirit of scholasticism is perhaps in no other Scholastic so pronounced as in Scotus. In depth of thought, in which after all is the important thing, Scotus is not surpassed by any of his contemporaries. He was a child of his time; a thorough Aristotelian, even more so than St. Thomas; but he criticizes sharply even the Scholastics and his commentators. He tries always to explain them favourably, but does not hesitate to differ from them. Duns Scotus’s teaching is orthodox. Catholics and Protestants have charged him with sundry errors and heresies, but the Church has not condemned a single proposition of his; on the contrary, the doctrine of the Immaculate Conception, which he so strongly advocated, has been declared a dogma.

DUNSTAN, SAIN T, archbishop and confessor, one of the greatest saints of the Anglo-Saxon church; b. near Glastonbury on the estate of his father, Heorstan, a West-Saxon noble. His mother, Cyneethryth, a woman of saintly life, was miraculously forewarned of the sanctity of the child within her. She was in the church of St. Mary on Candlemas Day, when all the lights were suddenly extinguished. Then the candle held by Cyneethryth was so suddenly relit and all present lit their candles at this miraculous flame, thus foreshadowing that the boy "would be the minister of eternal light" to the Church of England. In what year St. Dunstan was born has been much disputed. Osbern, a writer of the late eleventh century, fixes it at "the first year of the reign of King Aethelstan", i.e. 924-5. This date, however, cannot be reconciled with other known dates of St. Dunstan's life and involves many obvious absurdities. It was rejected, passages by Milhius of Lindern; but on the strength of "two manuscripts of the Chronicle" and an entry in an ancient Anglo-Saxon paschal table, Dr. Stubbs argued in its favour, and his conclusions have been very generally accepted. Careful examination, however, of this new evidence reveals all three passages as interpolations of about the period, when Osbern was writing, and there seem to be very good reasons for accepting the opinion of Milhius that the saint was born long before 925. Probably his birth dates from about the earliest years of the tenth century.

In early youth Dunstan was brought by his father and committed to the care of the Irish scholars, who then frequented the desolate sanctuary of Glastonbury. We are told of his childish fervour, of his vision of the great abbey restored to splendour, of his nearly fatal illness and miraculous recovery, of the enthusiasm with which he absorbed every kind of human knowledge, and of his manual skill. Indeed, throughout his life he was noted for his devotion to learning and for his mastery of many kinds of artistic craftsmanship. With his parents' consent he was tonsured, received minor orders, and served in the ancient church of St. Mary. So well known did he become for devotion and learning that he is said to have been summoned by his uncle Athelm, Archbishop of Canterbury, to enter his service. By one of St. Dunstan's earliest biographers we are informed that the young scholar was introduced by his uncle to King Aethelstan, but there must be some mistake here, for Athelm probably died about 923, and Aethelstan did not come to the throne till the following year. Perhaps there is confusion between Athelm and his successor Wulfhelm. At any rate the young man soon became so great a favourite with the king as to excite the jealousy of his kinsfolk at court. They accused him of studying heathen literature and magic, and so wrought on the king that St. Dunstan was ordered to leave the court. As he quitted the palace his enemies attacked him, beat him severely, bound him, and threw him into a filthy pit (probably a cesspool), treading him down in the mire. He managed to crawl out and make his way to the house of a friend, whence he journeyed to Winchester and entered the service of Bishop Aethelhah the Bald, who was his relative. The bishop endeavoured to persuade him to become a monk, but St. Dunstan was at first unwilling, whether he had a vocation to a celibate life. But an attack of swelling tumours all over his body, so severe that he thought it was leprosy, which was perhaps some form of blood-poisoning caused by the treatment to which he had been subjected, changed his mind. He made his profession at the hands of St. Aethelhah, and returned to live the life of a hermit at Glastonbury. Against the old church of St. Mary he built a little cell only five feet long and two and a half feet deep, where he studied and worked at his handicrafts and played on his harp. Here the devil is said (in a late eleventh-century legend) to have tempted him, and to have been seized by the face with the saint's tongs.

While Dunstan was living thus at Glastonbury he became the trusted adviser of the Lady Aethelfræd, King Aethelstan's niece, and at her death found himself in control of all her great wealth, which he used in...
later life to foster and encourage the monastic revival. About the same time his father Heorstan died, and St. Dunstan inherited his possessions also. He was now become a person of much influence, and on the death of King Aethelstan in 940, the new king, Eadmund, summoned him to his court at East Anglia, to which period he is said to have returned from Fontevraud Abbey. Again the royal favour roused against him the jealousy of the courtiers, and they contrived so to intrigue the king against him that he fled him deprrt from the court. There were then at Cheddar certain envons from the “Eastern Kingdome”, by which term many meaneth either East Anglia or the south-west of England. To these St. Dunstan applied, imploring them to take him with them when they returned. They agreed to do so, but in the event their assistance was not needed.

For, a few days later, the king rode out to hunt the stag in Mendip Forest. He became separated from his attendants and followed a stag at great speed in the direction of the Cheddar cliffs. The stag rushed blindly over the precipice and was followed by the hounds. Eadmund endeavoured vainly to stop his horse; then, seeing death to be imminent, he remembered his harsh treatment of St. Dunstan, and his heart was changed at that moment; his horse was stopped on the very edge of the cliff. Giving thanks to God, he returned forthwith to his palace, called for St. Dunstan and bade him follow, then rode straight to Glastonbury. Entering the church, the king first blessed the altar, then, taking St. Dunstan by the hand, he gave him the kiss of peace, led him to the abbot’s throne and, seating him thereon, promised him all assistance in restoring Divine worship and regular observance.

So Dunstan at once set vigorously to work at these tasks. He had to re-create monastic life and to rebuild the abbey. That it was Benedictine monasticism which he established at Glastonbury seems certain. It is true that he had not yet had personal experience of the stricter Benedictinism which had been revived on the Continent, such as Cluny and Fécamp. Probably, also, much of the Benedictine tradition introduced by St. Augustine had been lost in the pagan devastations of the ninth century. But that the Rule of St. Benedict was the basis of his restoration is not only definitely stated by his biographers, but the saint himself, in his Stiftsgeschichte, enunciated its observance with the nature of his first measures as abbot, with the significance of his first buildings, and with the Benedictine prepossessions and enthusiasm of his monastic character. And the presence of secular clerks as well as of monks at Glastonbury seems to be no solid argument against the monastic character of the revival. St. Dunstan’s first care was to erect the church of St. Peter, rebuild the cloister, and re-establish the monastic enclosure. The secular affairs of the house were committed to his brother Wulfwine, “so that neither himself nor any of the professed monks might break enclosure”. A school for the local youth was founded and soon became the most famous of its time in England. But St. Dunstan was not long left in peace. Within two years after the appointment King Eadmund was assassinated (946). His successor, his brother Eadwig, appointed Abbot of Glastonbury guardian of the royal treasure and records, and entrusted much of the government of the realm to his hands. The policy of Dunstan was supported by the queen-mother, Eadgifu, by the pri-mate, Oda, and by the East Anglian party, at whose head was the great thane, Aelfwine. Aethelstan, the white king”.

It was a policy of unification, of conciliation of the Danish half of the nation, of firm establishment of the royal authority. In ecclesiastical matters it favoured the spread of regular observance, the rebuilding of churches, the moral reform of the secular clergy and laity, the extirpation of heathendom.
That same evening he was offered the hospitality of a neighbouring abbot.

On his return from Rome Dunstan at once regained his position as virtual ruler of the kingdom. By his advice Aelfstan was appointed to the Bishopric of Lindsey; and by this appointment that of Worcester. St. Aethelwold, the Abbot of Abingdon, was appointed to the See of Winchester. With their aid and with the ready support of King Eadgar, St. Dunstan pushed forward his reforms in Church and State. Throughout the realm there was good order maintained, and the respect for law and order grew. In the north, a navy guarded the shores from Danish pirates. There was peace in the kingdom such as had not been known within memory of living man. Monasteries were built; in some of the great cathedrals monks took the place of the secular canons; in the rest the canons were obliged to live according to rule. The parish priests were compelled to live chastely and to fit themselves for their office; they were urged to teach their parishioners not only the truths of the Catholic Faith, but also such handicrafts as would improve their position. So for sixteen years the land prospered.

In 975 the seal was put on St. Dunstan's stateShip by the solemn coronation of King Eadgar at Bath by the two Archbishops of Canterbury and York. It is said that for seven years the king had been forbidden to wear his crown, in penance for violating a virgin living in the care of the nunneries of Wilton. That some severe penance had been laid on him for this act at St. Dunstan's command, but it is said that in 961 and Eadgar wore no crown till the great day at Bath in 973. Two years after his crowning Eadgar died, and was succeeded by his eldest son Eadward. His accession was disputed by his stepmother, Aelfthryth, who wished her own son Aethelred to reign. But, by the consent of St. Dunstan, Eadward was chosen and crowned at Winchester. But the death of Eadgar had given courage to the re-actionary party. At once there arose a determined attack upon the monks, the protagonists of reform.

Throughout Mercia they were persecuted and deprived of their possessions by Aelfthryth, the ealdorman. Their cause, however, was supported by Aethelwine, the ealdorman of East Anglia, and the realm was in serious danger of civil war. Three meetings of the Witan were held to settle these disputes, at Kyrtington, at Calne, and at Amesbury. At the second place the bill (solarium) was rejected. The third sitting gave way, and all except St. Dunstan, who eluded to a beam, fell into the room below, not a few being killed. In March, 978, King Eadward was assassinated at Corfe Castle, possibly at the instigation of his stepmother, and Aethelred the Redless became king.

His coronation on Low Sunday, 978, was the last action of state in which St. Dunstan took part. When the young king took the usual oath to govern well, the priate addressed him in solemn warning, rebuking the bloody act whereby he became king, and predicting the misfortunes that would surely fall on the realm. But Dunstan's influence at court was ended. He retired to Canterbury, where he spent the remainder of his life. Thrice only did he emerge from this retreat: once in 980 when he joined Aelfthryth of Mercia in the solemn translation of the relics of St. Dunstan from the inanimate grave at Wareham to a splendid tomb at Shaftesbury Abbey; again in 984 when, in obedience to a vision of St. Andrew, he persuaded Aethelred to appoint St. Aelfheah to Winchester in succession to St. Aethelwold; once more in 998, when he induced the king, by a promise of 100,000 marks of silver, to desist from his persecution of the See of Rochester.

St. Dunstan's life at Canterbury is characteristic; long hours, both day and night, were spent in private prayer, besides his regular attendance at Mass and the Office. Often he would visit the shrines of St. Augustine and St. Ethelbert, and we are told of a vision of angels who sang to him heavenly canticles. He worked ever for the spiritual and temporal improvement of his people, building and restoring churches, establishing schools, judging suits, defending the poor and the orphan, and ever speaking in protest for purity. He practised, also, his handicrafts, making bells and organs and correcting the books in the cathedral library. He encouraged and protected scholars of all lands who came to England, and was unwearied as a teacher of the boys in the cathedral school. There is a sentence written by his friend, that shows us the old man sitting among the lads, whom he treated so gently, and telling them stories of his early days and of his forebears. And long after his death we are told of children who prayed to him for protection against harsher teachers, and whose prayers were answered. On the vigil of Ascension Day, 988, he was warned by a vision of angels that he had but three days to live. On the feast itself he pontificated at Mass and preached three times to the people: once at the Gospel, a second time at the benediction (then given after the Pater Noster), and a third time after the Angelus. On the next day he announced his impending death and bade them farewell. That afternoon he chose the spot for his tomb, then took to his bed. His strength failed rapidly, and on Saturday morning (19 May), after the hymn at Matins, he caused the clergy to assemble. Mass was celebrated in his presence, then he received the Extreme Unction and the Holy Viaticum, and expired as he uttered the words of thanksgiving: "He hath made a remembrance of his wonderful works, being a merciful and gracious Lord: He hath given food to them that fear Him." They buried him in his cathedral; and when that was done the walls of the church were translated with great honour by Lanfranc on a tomb on the south side of the high altar in the new church. The monks of Glastonbury used to claim that during the sack of Canterbury by the Danes in 1012, the saint's body had been carried for safety to their abbey; but this claim was disproved by Archbishop Warham, by whom the tomb at Canterbury was opened in 1508 and the holy relics found. At the Synod of Winchester in 1029, St. Dunstan's feast was ordered to be kept solemnly throughout England on 19 May. Until his fame was overshadowed by that of St. Thomas à Becket, he was the favourite saint of the English people. His shrine was destroyed at the Reformation. Throughout the Middle Ages he was the patron of the goldsmiths' guild. He is most often represented holding a pair of smith's tongs; sometimes, in reference to his visions, he is shown with a dove hovering near him, or with a troop of angels before him.

Dupanloup, Félix-Antoine-Philibert, Bishop of Orléans, France, b. at Saint-Félix, Savoie, 2 June, 1802; d. at Lacombe, Isère, 11 October, 1878. His mother, Anne Decharme, to whom he was devotedly devoted, gave him his early education. The better to screen his future from the disgrace of his illegitimate birth, she took him when only seven years old to Paris where, by dint of work and privations, she succeeded in keeping him for some time at the Collège Sainte-Barbe. After various attempts in other direc-
tions, Félix chose the ecclesiastical career, studying grammar at the Petite Communauté, humanities at the preparatory seminary of Saint-Nicolas du Chardonnet, philosophy at Issy, and theology at Saint-Sulpice. Or-
dained priest 18 Dec., 1825, he went as curate to the Madeleine where he founded the famous Catholiche de 
du N.-S. of Paris and the Académie de St-Hyacinthe, 
the nun being entrusted with the religious education of 
the Duc de Bordeaux and of the Prince of Orlé-
s. The novelty and success of his catechizing methods drew upon him the ill will of his pastor. Transferred to Saint-Roch (1834), he soon won a reputa-
tion as superior of the preparatory seminary of Saint-Nicolas (1837-45), as he completely transformed the institution that admission into it was eagerly sought by members of the 
best families of France. “During those few years,” 
says Pauline, herself a pupil of Saint-Nicolas (Souve-
nement de France) “the old house of the rue 
St-Victor became the school in France which sheltered 
the greatest number of historical or well-known names.” At Saint-Nicolas Dupanloup was truly the 
ideal educator later described in his famous book: “La 
honneur de la France...” Wherever as a priest he was 
in his professional work, he did not completely give up the 
direction of souls. Through one of his penitents, 
Pauline de Périgord, he brought about the conversion of 
Talleyrand (1838). A course in sacred eloquence 
which he had brilliantly inaugurated at the Sorbonne 
was continued after the enthral lecturer, over the 
excitement occasioned by the lecturer’s severe 
criticism of Voltairre and Villemain’s unwillingness to 
conform. In 1844, in connexion with the Ville-
main educational bill, which was scarcely more satisfac-
tory to the Catholics than its numerous predecessors, 
Dupanloup advocated a bill of Montalembert and 
Ravignan that long struggle for liberty of education which resulted in the loi 
Dufallus. It was at his 
suggestion that Ravignan wrote “De l’existence et de l’institut des Jésuites,” in order to put down the still 
average bughbear of the hommes noirs called up by Bére-
gus. How actively supported in the 
formation of the Committee for the Defence of Relig-
ious Liberty, and when later Thiers spoke in favour of 
average unacceptable educational bill, Dupanloup 
write-in reply “Des associations religieuses,” a pamph-
let which became later the book “De la pacification reli-
(gious). A difference of views with Archibishop 
Ffrench, in connexion with the above-mentioned pom-
ptoms and the direction of Saint-Nicolas, ended in 
Dupanloup’s transfer from the seminary to a canonicate 
at Notre-Dame, 1845.

The four years of his canonicate were by no means years of leisure. In spite of his increasing activity in 
confessional and pulpit, he found time for public inter-
est. The elections of 1846 sent to the French Parlia-
ment some 150 deputies friendly to liberty of educa-
tion, and for these Dupanloup wrote “L’état de la 
question”, a moderate but clear assertion of Catholic 
claims. As the Salvandy project of 1847 fell short of 
these claims, he again published a series of pamphlets, 
“Du nouveau projet de loi”, “Des petits-séminaires,” 
among others; and the better to control public opinion 
he undertook the work of a Catholic daily paper, 
finally purchasing “L’ami de la religion”. In 1848 
when Falloux, yielding to Dupanloup’s persuasion, 
accepted a portfolio under President Louis Napoleon, he 
appointed a commissioner to draft an educational bill, 
and made Dupanloup a member. Dupanloup’s cour-
tesy and undeniable competence of over to the Cath-
olic view such men as Thiers and Cousin, thus insur-
ing the enactment of 1850. “He made me minister 
to my will”, said Falloux speaking of Dupanloup; “I have made him bishop against his will.” Ap-
pointed to the See of Orleans, he took possession of it 
Dec., 1849, and during the twenty-eight years of 
his episcopate showed incredible activity. His ad-
ministration min-
utely described by 
Cochard, touched on 
very vital interest of the 
diocese: the holding of synods, parish visitations, organ-
ization of cérémones and petits-
sermon plenaries along 
the lines adopted in 
Paris, development of charitable 
works, encouragement of ecclesiasti-
cal studies among priests, completion 
of the cathedral of Ste-Croix, in-
troduction of the Roman Liturgy, etc. Still his en-
ergy was not ex-
hausted. Wherever the interests of religion were at 
stake, he gave them vigorous support. In the question 
of the classics he stood for the broader view and entered 
upon a lively discussion with Louis Veullot. Profiting 
by his membership in the French Academy, to 
which he was elected May, 1834, Dupanloup pre-
vented the award of the prix Bodin to Taine’s “History of 
English Literature” and opposed the admission of Littré 
into that body. The reorganization of “Le Cor-
respondant”, with Falloux, Poisset, Cochin, and de 
Broglie at its head, was also largely his work. The 
Pucelle d’Orléans (Jeanne d’Arc) found in him an ar-
dent champion; twice he pronounced her panegyric at 
Orléans, and it was he who introduced in Rome the 
cause of her beatification and raised the first funds 
towards a new monument in her honour.

Dupanloup was always held in high esteem by 
the French people. In 1862, on the occasion of one of the 
periodical Irish famines, he preached a charity sermon 
in the Church of St-Roch at Paris, which netted the 
sum of thirty thousand francs. The grateful Irish 
returned this with interest during the Franco-Prussian 
war when they remitted to the eloquent Bishop of Orlé-
s the sum of two hundred thousand francs in res-
ponse to his appeal for the needs of France. On the 
occaion of the centenary (1875) of Daniel O’Connell, 
whom he had always admired and often praised pub-
licly, Dupanloup was formally invited by the centen-
ary authorities to take part in the celebration. Though 
too ill at the time to accept the honourable in-
vitation, he wrote in reply two letters, memorable for 
their eloquence, to the Lord-Mayor of Dublin and to 
Cardinal McCabe, and which were printed in “Le 
Monde” 9 and 10 Aug., 1875 (Lagrange, Vie de Du-

During these years, however, were directed towards the defence of the Holy See, menaced in its independence by the ambition of the Emperor of Savoy and the ill-disguised connivance of Napoleon III. Salomon says (Mgr Dupanloup, p. 58): "For eight years, he did not lay down his arms. From Villafraanca to Mentana, he never took off his breast-plate." During this phase of his life, besides endeavouring to enlist pontifical zouaves and to increase the Pope's prestige, he wrote the "Protestation" against the impending spoliation of the pope; the "Lettre à un catholic" in the brochure "Le pape et le congrès;" "La souveraineté pontificale," in which he cited a declaration made by Cousin in favour of the temporal power of the pope; two other pamphlets, one against the Convention of 15 Sept., 1864, and the other in defence of the Enechial of 8 Dec. and of the Syllabus; several letters to Ratari, Minghetti, etc. The Vatican Council and the Franco-Prussian War exhibit Dupanloup in two different lights. At the council he was the leader of that minority which for political reasons stood, if not against the papal infallibility itself, at least against the opportuneness of its definition. The papal Bull of indiction, in which no mention was made of infallibility, he welcomed with joy and triumph. Addressed to his flock, this dignified pastoral letter; but when the Catholic sentiment, voiced by such organs as the "Civiltà Cattolica" and the "Univers," began to petition for the definition, he appended to his pastoral letter certain observations which, by making known in advance the position he intended to take, involved him in a controversy with Louis Veuillot. Once in Rome he never swerved from his position but used all the resources of his fiery nature to win others over to its views. It was he who, on the eve of the final vote, advised the minority to vote neither place nor non-place, but to abstain and withdraw. That he appealed to the secular arm and threatened the council with diplomatic intervention has been both asserted and denied. This much is vouched for by Ollivier, then minister of Napoleon III: "No bishop of the minority, Dupanloup or other, ever demanded the evacuation of the pontifical territory: Le Correspondant (Paris, 1892), LAGRANGE, Vie de Mgr Dupanloup (Paris, 1883; 4th ed., 1894); SALOMON, Mgr Dupanloup, Hommages de l'Eglise au XIXe siécle (Paris, 1867); VI. J. F. SOLIER.

Duperron, Jacques-Davy, theologian and diplomat, b. 25 Nov., 1556, at St-Lô (Normandy), France; d. 5 Sept., 1618, at Batignolles, a suburb of Paris. His parents were Calvinists and on account of persecution sought refuge in Switzerland soon after his birth. Having received a thorough literary, scientific, and philosophical education, he applied himself to the study of the Fathers and ecclesiastical writers, especially St. Augustine and St. Thomas Aquinas, and in 1577 or 1578 was converted to the Catholic faith. He enjoyed the favour and confidence of King Henry III, to whom he had been presented in 1576, and later that of Henry IV. The latter's conversion was to a great extent due to Duperron's instructions and influence, and his abdication from heresy was obtained from the pope by Duperron and Cardinal d'Ossat (1589).

While in Rome for that purpose, Duperron was consecrated (1589) a cardinal by Pope Sixtus V, and in 1591 was appointed bishop of the diocese of Orléans. He left for France in 1593, and next year was appointed metropolitan of Paris, and in 1595 was created a cardinal. He was one of the ablest French bishops of his day. He repeatedly refused higher positions. In many things a conservative and even a legitimist, he was one of the first who thought of appealing, in behalf of the Catholic cause, to common law and public liberties before a generation no longer able or willing to recognize the Divine right of the Church. The criticisms passed on him by Catholics of a different school were more than offset by numerous papal Briefs of encouragement and letters of approval from all parts of the world. A man of action, he was also a prolific writer. A complete list of his writings is given by Lagrange, his biographer. Some of his polemical pamphlets have already been noticed. In his educational writings Dupanloup enumenates some of the most important principles which are generally accepted. Among these he places the notion of education as a process of developing mental activity instead of injecting knowledge into the mind, and his insistence on the duty of the teacher to respect the freedom of the pupils and to cultivate in them a spirit of honour. He advocates physical education by means of games, and warns against the danger of forcing precocious children. Education, he holds, is intellectual, moral, religious, and physical; but it is essentially one, and to neglect any of its purposes would be fatal.

His more important works are:—catechetical: "L'œuvre par excellence" (1869); educational: "L'éducation en général," "La haute éducation intellectuelle" (1865), "La femme studieuse" (1869), and "Lettres sur l'éducation des filles" (1878); historical: "Vie de Mgr Berderies" (Paris, 1864); oratorical: "Précis de la sagesses de Jean-Pierre de Ramey" (1850), and "La dédicace de l'Amer" (1862), and St. Vincent de Paul (1865); funeral oations of Père de Ravanign (1858), the volunteers (1860), Mgr Menjaud (1861), and Lamorcere (1866); pastoral: "Lettres pastorales et mandements" (in the archives of the episcopal palace of Orléans).

DUPIN

ists. On 4 May nine passages were examined concerning
which the commission decided against Duplessis. The
latter's real or feigned sickness and his departure prevented
further meetings.

Duperron was created a cardinal in 1604. The same
year he went to Rome, and was invited to assist at the
meeting of the Congregatio de Auxiliis which Clement
VIII had summoned to end the discussions on grace
and freedom. Meanwhile he took an important part in
the election of Leo XI and Paul V. The decision of
Paul V not to condemn the Molinistic system was due
largely to Duperron's advice. Duperron became Arch-
bishop of Paris in 1619. He stopped the publication of
the decisions of the Parliament condemning one of Bellar-
mine's works, and defended the latter's thesis on the
pope's infallibility and supremacy over councils. At a
synod held at Paris (1612) he condemned the work "De
ecclesiastica et politica potestate" by Edmond Richer,
synode of the Sorbonne. In 1614-15, at the meeting of
the States General at Paris, he urged, against the Third
Estate, the acceptance of the decrees of the Council
of Trent on discipline and reform. Duperron's knowledge
and eloquence were so great that Pope Paul V said of him:
"Let us pray that God may inspire Duperron,
for he will persuade us of what he believes," as he
believed all truths considered necessary by the first
Christians. In his answer Duperron treats of the charac-
teristics of the Catholic Church, of some articles which
the king did not look upon as essential, the
preservation and integrity of the doctrine and disci-
pline of the Church, the Eucharist as a sacrament and
a sacrifice, the invocation of the Saints, the use of
Latin, translation of Holy Scripture, etc. The third
volume contains various works among which are a
treatise on vocation, the Acts of the Fontainebleau
conference, a refutation of the work of Tillet on
Apostolic traditions, some moral and spiritual
truths, and poems both Christian and profane. Dup-
eron's secretary, César de Ligny, wrote "Ambassades
et négociations du cardinal Duperron" (Paris, 1618).
Under the title of "Terroniensis," remarks on theo-
logical, political, and literary subjects were published
by Christophe du Puy from the notes of his brother,
who had been with Duperron for a long time.

C. A. DUBRAY.

DUPIN (also Du Pin), LOUIS-ELIES, theologian, b. 17 June, 1657, of a noble family in Normandy; d. 6 June, 1719. His mother, a Vicar, was the niece of Marie des Moulins, grandmother of the poet Jean Ra-
cine. At the age of twenty Dupin accompanied Ra-
cine who made a visit to Nicole for the purpose of
becoming reconciled to the gentlemen of Port Royal.
But, while not hostile to the Jansenists, Dupin's intel-
lectual attraction was in another direction; he was
the disciple of Launoy, a learned critic and a Galilean.
Dupin took his Doctorate in Theologicals at the Sorbonne, and
received there the degree of bachelor in 1680, and of
doctor in 1684.

From the beginning of his studies he had accumulated
notes on the works and teachings of the Fathers.

In 1686 there appeared the first volume of the "Nou-
velle bibliothèque des auteurs ecclésiastiques," covering
the first three centuries. In it Dupin had treated
simultaneously biography, literary criticism, and the
history of dogma; in this he was a pioneer leading far
ahead of his time. Behind him all previous efforts, Catholic or Prot-
esteran, which were still under the influence of the Scholastic
method. He was also the first to publish such a col-
lection in a modern language. Unfortunately he was
young and worked rapidly. In this way errors crept
into his writings and his productions were violently
attacked. Mathieu Petit-Didier, a Benedictine, pub-
lished an anonymous booklet of "Remarques sur la
bibliothèque des auteurs ecclésiastiques de M. Du Pin" (Paris, 1691),
and this was followed by two other vol-
umes to which the author's name was appended
(Paris, 1692 and 1696). Dupin answered him in his
fifth volume and Petit-Didier replied in the fore part
of his second volume of "Remarques". Petit-Didier's
observations were often inspired by contemporaneous
prejudice. Thus Dupin had placed in the fourth cen-
tury, to which indeed he rightly belongs, St. Macarius
the Egyptian. Petit-Didier discovered Semipelagian-
ism in this author's works, in reality ideas expressed
by many before St. Augustine, but from the prior
base of his dogmas. The criticism of Dupin concluded that Macarius should
come after Pelagius and St. Augustine (II, 198).

A more formidable enemy appeared in Bossuet, who,
during a public thesis at the College of Navarre in
1692, condemned the audacity of the critic. Dupin
answered him and Bossuet appealed to the civil au-
thority, denouncing Dupin to Chancellor Boucherat
and to Archbishop de Harlay. Bossuet simply enu-
merated the points that he disagreed in the "Biblio-
thèque" concerning original sin, purgatory, the can-
onicity of the Sacred Scriptures, the eternity of hell's
penal torments, the immortality of the soul, the adora-
tion of the Cross, grace, the pope and the
bishops, Lent, divorce, the celibacy of the clergy, tra-
tition, the Eucharist, the theology of the Trinity, and
the Council of Nicea. He demanded a censure and a
retraction.

Like Petit-Didier Bossuet would not admit that any of
the Greek or Latin Fathers differed from St. August-
ine on the subject of grace, nor that this matter could
be called subtle, delicate, and abstract. Between Du-
pin and Bossuet there was a still wider difference.

The liberty M. Dupin takes of so harshly condem-
n ing the greatest men of the Church and God's cri-
not be tolerated" (Bossuet, Oeuvres, XXX, 513).
On the other hand Bossuet strongly contended that
heretics could not be too severely dealt with: "It is
dangerous to call attention to passages that manifest
the firmness of these people without also indicating
wherein this firmness has been overrated; otherwise
they are credited with a moral steadfastness which elicits
sympathy and leads to their being excused"
(op. cit., XXX, 633).

Dupin submitted but was nevertheless condemned
by the Archbishop of Paris (14 April, 1696). He
contended his "Bibliothèque," which he put out in
the month after his death (10 May, 1757), though other works
of his were condemned at an earlier date. He had also
to suffer the censure of Richard Simon (Paris, 1730,
4 vols.). Simon and Dupin had similar views and
methods so that when Bossuet was writing the "Dé-
fense de la Tradition et des Saints Pères" (which did
not appear, however, until 1741), he included both in
his invective against the "hauts critiques" who in-
clined to rabbinism and the errors of Socinians.
Although Dupin smoked favourably of Arnauld and
signed the "Cate de conscience," he was not a Jansen-
iste. On these matters he rather shared the position
of Launoy who "had found no fault with either
both Semipelagian and Jansenist" (Bossuet, Oeuvres,
XXX, 509). Dupin was pre-eminently a Galilean. It
was probably on this account that Louis XIV had him
exiled to Châtellerault, on the occasion of the “Cas de conscience”. Dupin retracted and returned, but his chair in the College of France was irretrievably lost. Later Dubois, who aspired to the cardinalate and sought therefore the favour of Rome, made similar accusations against Dupin. Dupin was on friendly terms with Wake, the Anglican Archbishop of Canterbury, who hoped for a union of the two Churches. The correspondence was looked on with suspicion, and in 1718 the regent had Dupin’s papers seized. This act led to calumnies against the writer, who really had had no other aim than the reconciliation of the separated Anglicans. A similar purpose animated the “Mémoires” he presented to Peter the Great during the latter’s residence in France. Dupin died shortly after.

Besides the “Nouvelle bibliothèque éschatologique” (38 vols. 8vo with tables), the “Remarques” by Pet- tit-Dièler, and the “Critique” by R. Simon reprinted in Holland (19 vols. 4to), Dupin edited the works of Gerson (Paris, 1703), Optatus of Mileve (Paris, 1700), the Psalms with annotations (1691), and published “Notes sur le Pentateuque” (1701), an abridgment of “L’histoire de l’Eglise” (1712), “L’histoire profane” (1714–1716), “L’histoire de l’Apostolique de Tyane” (1705, under the name of M. de Clairac), a “Tract de la puissance ecclésiastique et temporelle”, a commentary on the Four Articles of the clergy of France (1707), the “Bibliothèque universelle des historiens” (1716), numerous works and articles on theology, reprints of former works, etc. Dupin was no pedant. Étienne Jeanne de Choiseul, temporary who saw him, said: “In the morning he would grow pale over books and in the afternoon over cards in the pleasant company of ladies. His library and adjoining apartment were marvellously well kept.”

Dupin, Pierre-Charles-François, known as Baron Charles Dupin, a French mathematician and economist, b. at Varzy, Nièvre, 6 October, 1784; d. at Paris, 18 October, 1855. In 1773, at the age of thirteen, he entered the École polytechnique, and after three years of successful studies under the famous Monge, he received the degree of naval engineer. He then served in that capacity in the navy and showed so much ability that he was later appointed inspector-general of the navy. In 1813 he published a pamphlet, “Développement de géométrie pour faire suite à la géométrie pratique de Monge” (Paris, 1813), containing many new and brilliant theorems, the most important of which were one relating to the indicatrix of curved surfaces and another on orthogonal surfaces.

He was elected to the Academy of Sciences in 1818. The next year Dupin received a professorship at the Conservatoire des arts et métiers; during this period he wrote various pamphlets on scientific topics, such as: “Applications de géométrie et de mécanique à la marine” (Paris, 1826); “Diverses leçons sur l’industrie, le commerce, la marine” (Paris, 1825), and also numerous memoirs for the Academy of Sciences, which were highly spoken of. Notwithstanding his brilliant prospects as a mathematician, he soon preferred to devote himself to political economy. “Voyages en Bretagne dans le temps de 1819” (6 vols., Paris, 1820–1824), which were the result of a personal inquiry into the commerce and industry of England, placed him in the foremost rank of statisticians. In his “Carte de la France éclairée” (Paris, 1824), he was the first to use different colours to show the development of education in various parts of France. Charles X gave him the title of baron in 1824. Dupin gradually turned to politics and for forty years was a member of legislative assemblies. Under the Restoration, in spite of the honour bestowed on him by the Bourbons, he sided with the Liberals and took his seat at the Left of the Chamber; when the Monarchy of Charles X was established, and finally with the Right, under the Republic of 1848. He rallied to the Second Empire and was appointed senator by Napoleon III. In his political career he showed himself a man of ability, of great industry and activity, and never failed to assert his Catholic convictions. Although a less brilliant man than his brother the Elder Dupin, he may have a more lasting reputation on account of his discoveries in geometry.

Duponceau, Peter Stephen, jurist and linguist, b. at St-Martin de Re, France, 3 June, 1760; d. at Philadelphia, U. S. A., 1 April, 1844. Educated in a Benedictine college, he exhibited a marked taste for languages, and in 1777 accompanied Baron Steuben to America, serving as his secretary in the Revolutionary army, with rank of captain, until compelled by ill-health to resign in 1781. He settled in Philadelphia, studied law, and was admitted to the Bar. Throughout a long life he was identified with public affairs and was also author or translator of a number of legal or historical treatises, but his fame rests chiefly upon his studies of the native American languages at a period when ethnology was as yet hardly recognized as a science. Most of his linguistic papers appeared in volumes of the American Philosophical Society (Philadelphia), of which he was a member from 1791 and president from 1827 until his death. His memoir on the grammatical system of the Indian languages (Mémoire sur le système grammatical des langues de quelques nations Indiennes de l’Amérique du Nord) won the Volney prize of the French Institute in 1835.

James Mooney.
estantian. The Concordat, which Duprat himself negotiated with Leo X at Bologna, did away with the schismatical principles of the "Pragmatic Sanction"; on the other hand, by causing the appointment of the French hierarchy to rest on royal nomination instead of the old canonical elections, he vastly improved the civil power and easily abused authority over Church affairs. Duprat's uncompromising attitude towards Protestantism was dictated both by his political sense and his orthodoxy. The wiles of Luther, Melancthon, and Calvin did not deceive him; even so the well-known Protestant sympathies of Louis Henri d'Anjou, the Duchess of Etampes, and the Minister du Bellay failed to move him. The Sorbonne and the Parliament were instructed to exclude the writings of the innovators; in 1534 the posting of subversive pamphlets at the door of the royal apartments cost the perpetrators their lives. Duprat left no writings, but took a leading part in the compilation of the "Coutumes d'Auvergne"; he also did much to encourage the renovation of letters.

(2) Guillaume, son of the foregoing, b. at Issoreau, 1507; d. at Beaugregard, 1560. Appointed Bishop of Clermont in 1529, he led a serious and saintly life, and was known by the leading part he took in the last sessions of the Council of Trent as well as by his patronage of the Jesuits. Not only did he receive in his diocese, where they were put in charge of the colleges of Bollom and Mauriac, but, in face of much opposition, he helped them financially and in other ways to found in Paris the College of Clermont, so-called after Duprat's episcopal city.

DUPUYTREN, DURAND

DUPUYTREN, Guillaume, Baron, French anatomist and surgeon, b. 6 October, 1777, at Pierre-Butiffre, a small town in the Limousin, France; d. in Paris, 8 February, 1835. His parents were so poor that he received his education at the Collège de la Marche through charity. By competitive examination he gained the position of professor in anatomy at the newly established École de Médecine, Paris, when he was but eighteen. In 1803 he was appointed assistant surgeon to the Hôtel-Dieu. In 1811 he became professor of operative surgery, and in 1815 professor of surgical surgery at the École de Médecine and assistant surgeon to the Hôtel-Dieu. He was indefatigable in his devotion to his profession and had one of the largest surgical practices of all time. He amassed a fortune estimated at $1,500,000. He succeeded in accomplishing all this in spite of a consumptive tendency against which he had to battle all his life and which finally carried him off. In his will he endowed the chair of anatomy at the École de Médecine and established a home for physicians in distress. A curious contraction of the fascia of the palm of the hand, which cripples the fingers, is called after him, and the anatomical museum of the École de Médecine bears his name. The most important of his writings is his treatise on artificial anus. He published also a treatise on gunshot wounds and clinical lectures on surgery. Dupuytren was not an original investigator in surgical subjective views, but he was an excellent observer and a great worker, who knew how to adopt and adapt others' ideas very practically.

JAMES L. HANDLEY.

Duquesnoy, François (called also François Flamand, and in Italy Il Flamingo), b. at Brussels, Belgium, 1594; d. at Leghorn, Italy, 12 July, 1646. Duquesnoy was the son of an excellent Dutch sculptor from whom he received his first lessons. At an early age he carved the figure of justice on the portal of the chancellerie at Brussels, and two angels for the entrance of the Jesuit church of that city. In 1619, at the age of twenty-five, he was sent by the Archduke Albert to study in Italy, and there in the course of many years, executing various works of importance, to him we owe the handsome baldachin over the high altar in St. Peter's, the colossal statue of St. Andrew with his cross, also in St. Peter's, and the Santa Susanna in the church of St. Maria di Loreto. In the cathedral of Ghent he executed his famous tomb for Bishop Triest, a good work in its own style. Duquesnoy was a contemporary of Bernini and a friend of Le Pousain, who recommended him to Cardinal Richelieu. The sculptor was about to start for Paris when death overtook him at Leghorn. It is reported that he was poisoned by his own brother, Jérôme, who was also a clever sculptor (b. 1612; burned for unnatural crime, 24 Oct., 1654). François is famous for his beautiful sporting children in marble and bronze, his ivy carvings for drinking-cups, etc. The figure known to the populace of Brussels as the "Manneken" is commonly attributed to him.

M. L. Handley.

Duran, Narcisco, b. 16 Dec., 1776, at Castellon de Ampurias, Catalonia, Spain; d. 1 June, 1846. He entered the Franciscan Order at Gerona, 3 May, 1792, volunteered for the Indian missions, was incorporated into the Franciscan Missions, College of San Fernando in the City of Mexico, and in 1806 came to California. He was assigned to Mission San José and toiled there among the Indians until April, 1833, when he retired to Mission Santa Barbara. As early as 1817 Father Sarrié, the comisario prefecto, recommended Duran for higher offices. Father Padre, the comisario prefecto in 1829, likewise held him worthy and capable of any office. Towards the end of 1824 the College of San Fernando elected him presidente of the missions, which post he held with the exception of one term (1828-1831) until 1838. From 1844 till his death in 1846 he again held this office, and from 1837 to 1843 he was also comisario prefecto of the Fernandinos, i.e. Franciscans subject to the college in Mexico, who were in charge of the missions in Southern California. During the troublous times of the secularization and sale of the missions it was Father Duran who fought the pillagers step by step, though in vain, and fearlessly unmasked the real aims of the despilers. His numerous letters to the Government on the subject are masterpieces of close reasoning, pungent sarcasm, and unanswerable argument. Governor Figueroa recommended the exile of Father Duran, but the Mexican Government allowed him to remain unmolested at Mission Santa Barbara until his death. Six weeks previous to this the dying Bishop of Californi had appointed Father Duran vicar-general, and for a month he held the office of administrator of the diocese. His body was placed in the vault beneath the sanctuary of the mission church. He was, almost the last survivor of the Fernandinos, and for virtue, learning, and missionary zeal ranks with the most brilliant of his predecessors.

Durand de Maillane, Pierre Joussaint. See Gallicanism.

Durand Ursin, a Benedictine of the Maurist Congregation, b. 20 May, 1682, at Tours; d. 31 Aug., 1771, at Paris. He took vows in the monastery of
Durandus (Durantii, Durantius), William, canonist and one of the most important medieval liturgi- cal writers; b. about 1237 at Piuminum in the Diocese of Béziers, Provence; d. at Rome, 1 Nov., 1296. He was called "Speculator" from the title of one of his works, "Speculum Judiciale". He studied law at Bologna under Bernard of Parma and then taught it at that university. He was appointed archdeacon by the pope's uncle, Clement IV (Guy Pouques, 1263-1268, also a Provençal) summoned Durandus to Rome, ordained him subdeacon, and gave him titular canopies at Beauvais and Chartres. He was then attached to the papal curia as Auditor generalis causarum sacri palati. He accompanied Gregory X (1271-1276) to the Second Council of Lyons (1274) and, as the pope's secretary, drew up its decrees. In 1279 he was made dean of Chartres, but did not reside there. At about the same time he went to Romagna as papal governor and succeeded in subduing a rebellion under Guy of Montefeltro. He destroyed Guy's fortress della Riga and established it in place of the town of Urbino. In 1286 he was elected bishop by the chapter of Mende (Mimaut) in the province of Narbonne, but did not go into residence till 1291. Meanwhile his diocese was administered by his nephew, William Durandus the younger. In 1295 he was again in Italy (see Beneventum, Italy) in the honor of Romagna and Acone, where the Ghibellines were again in rebellion. He refused the pope's offer to make him Archbishop of Ravenna, came to Rome, and died there. There is no reason to suppose that Durandus belonged to any religious order, though he has been claimed by both the Dominicans and the Austin Canons. He is buried at Rome in Santa Maria Sopra Minerva, where a long epitaph tells the story of his life and gives a list of his works.

Of these works the most famous is the "Rationale diali et ordinari of officiorum" (ed. by Fust and Schoeffer at Mainz, 1459, and reprinted frequently, at Ulm by John Zainer, 1473; latest ed. at Naples, 1839). It was written in 1286. Its eight books contain a detailed account of the laws, ceremonies, customs, and mystical interpretation of the Roman Rite. Book I treats of the church, its altars, bells, churches, churchyards, etc.; II of the ministers; III of vestments; IV of the Mass; V of the canonical hours; VI of the Proprium Temporis; VII of the Proprium Sanctorum; and VIII of the astronomical calendar, manner of finding Easter, Epacts, etc. Durandus's "Rationale" is the most important medieval treatise of its kind; it is an em- standard authority for the ritual of the thirteenth century and for the symbolism of rites and vestments. The allegorical explanation of vestments, for instance, as signifying virtues or the garments worn by Christ in His Passion, is taken from its third book. Other works are "Speculum Legatum" (first ed. enlarged into "Speculum Judiciale" (four books), a treatise on the canonical rights of legates and the forms of canonical processes (first ed. at Strasbourg in 1473; Frankfort, 1668); "Breviarium, sive Reper- torium juris canonic" (Rome, 1474); "Glosser et textuum juris canonici" (Paris, 1519), both commentaries on the decretals, arranged in the same order; and "Commentarius in canones Concilii Lugudunensis II" (Fano, 1569, with a life of the author by Simon Majolus), a semi-official exposition of the canons of the Second Council of Lyons. Durandus's epitaph also mentions a "Pontificale", which is now lost. For works wrongly attributed to him see Schulte (op. cit. infra.), II, 155-156.

DURANDUS, William, the Younger, d. 1328, canonist, nephew of the famous ritualist and canonist of the same name (with whom he is often confounded). He was at first archdeacon of Mende, Languedoc, under his uncle and was appointed bishop of that see by Boniface VIII, in 1296, after the uncle's death. He was present at the Council of Vienne in 1311-1312. The pope (John XXII, 1316-1334) and the King of France (Charles IV, 1316-1328) appointed him to the Sudan Orphan (1326-1360) at Brusa, to obtain more favourable conditions for the Latins in Syria. He died on the way back, in Cyprus (1325). He wrote, by command of Clement V (1305-1314), a work: "Tractatus de modo concilii generalis celebrandi et de corruptis in ecclesiis reformandis", in three books. It is a treatise on the canonical process of summoning and holding general councils, gathered from approved sources with many quotations and illus- trations from the Fathers and from church history, together with attacks on various attacks on conciliar traditions that were common in the fourteenth century among ecclesiastical persons. The first edition was printed at Lyons in 1351, then again at Paris by Philip Probus, a canonist of Bourges, in 1545, and dedicated to Pope Paul III (1538-1540) as a help towards the Council of Trent. Other editions, 1571, etc.

ADRIAN FORTESSCUE.
Durandus was a philosopher and theologian, b. at Saint-Pourçain, Auvergne, France; d. 13 September, 1332, at Meaux. He entered the Dominican Order at Clermont and obtained the doctor's degree at Paris in 1313. John XXII called him to Rome to be his Master of the Sacred Palace, where he expanded the Scriptures. In 1318 he was consecrated Bishop of Le Puy-en-Velay and was transferred to Meaux in 1326. He is known as Doctor Resolutissimus owing to his strenuous advocacy of certain opinions novel to the Schoolmen of his day. His writings include comments on the Sentences, (Paris, 1308); "De origine jurisdictionum" (Paris, 1506); and a treatise on the condition of holy souls after their separation from the body. His nominalism was so much opposed to the contemporary philosophic realism that the third period of Scholasticism is made to begin with him. He rejects both the sensible and the intelligible species, introduced, he says, to explain sense-perception, as also the active intellect. He denies the principle of individuation as distinct from the specific nature of the individual. In theology he argues for a separation of natural knowledge from that of revelation, and, although he accepts the triple perfections of Christ, he insists that Christ could be present in the Eucharist with the substances of bread and wine remaining. Throughout, Durandus shows admirable submission to the corrective precepts of the Church, the exercise of which was not unnecessary. By order of John XXI, the treatise "De statu animarum" was examined and was found to contain eleven errors.

Durandus of Troarn, French Benedictine and ecclesiastical writer, b. about 1012, at Le Neubourg near Evreux; d. 1089, at Troarn near Sen. Affiliated from early childhood to the Benedictine community of Mont-Saint-Catherine and of Saint-Vandrill, he was made abbot of the newly founded Saint-Martin of Troarn by William, Duke of Normandy, in whose esteem he stood on a par with Lanfranc, Anselm, and Guibert Vitalis, calling him "episcopus contus et dogmatia doctor pertissismus." Of his achievements in sacred music we know nothing beyond that mention, but we have his "Liber de Corpore et Sanguine Domini." (P. L., CXLIX, 1357) against Berengarius. The ninth and last part of it contains precious historical information about the heresies. In Durandus' mind Berengarius is a figurist pure and simple, after the manner of Scotus Eriugena, whose now lost book he is said to have possessed and used. In the rest of his book Durandus follows Paschasius, whom he somewhat emphatically styles Divinitus sacramentorum auator, and he states his discussion upon whom he borrows both his patristic apparatus and his theological views. Turnel, however, notes that Durandus quotes new texts of Bede, Amalarius, Pulbert de Chartres, and St. John Chrysostom. His presentation of the Eucharistic dogma is frankly Ambrosian, i.e., he maintains with Paschasius and Gerbert the conversion of the bread and wine into the identical body and blood of Christ, thus excluding the Augustinian theory of the Presentia spiritalis still held by some of his contemporaries and contributing to prelude the Fourth Lateran Council by the 1215 texts. Durandus explains with skill the Augustinian text, chiefly in the "De doctrinæ christianæ" and the "Letter to Boniface", misused by Berengarius; but in the last analysis he appeals to the argument of authority already used by Guinmond (P. L., CXLIX, 1415). This is to say, he also wears the garb of the learned. A few years of composition, fails at times to clearly bring out his thought. Hence he may appear obscure to the unlearned and even become a source of error. If perchance he should have erred in so great a mystery, we should then bethink ourselves of the Apostolic saying: 'But though an angel from heaven preach a gospel to you besides that which you have received, let him be anathema'" (loc. cit., 1413). Durandus wrote also against Berengarius a poem of 900 verses, of which twenty-five preface the above treatise and thirteen are quoted from Mabillon's "Artis Antiquae," which is also being unpolished. Migne (loc. cit.) appends to the "Liber" two epistles composed by Durandus, one for Abbot Abbad and the other for the Countess Mabile. (See Berengarius of Tours.)

Durango (Durangum), Archbishopric of, located in northwestern Mexico. The see was created 28 Sept., 1620, seventy-two years after the Friars Diego de la Cadena and Gerónimo de Mendoza had established the San Juan Bautista de Analco mission in the valley of the Sierra Madre. The city of Durango was founded in 1534 by the Spanish captain Ibarra, and served at once as a centre for numerous missionaries, whose efforts to convert the natives were so successful that under Philip III the Diocese of Guadalajara was divided by Paul V, and Durango was raised to episcopal rank. The first bishop, Gonzalo Hernández y Hermosillo, devoted much time to the evangelization of the Indians. In 1582 the Diocese of Durango included New Mexico (Santa Fe), Chihuahua, and Sonora; eventually these were made independent sees. Durango was made an archdiocese by Leo XIII (23 June, 1891), and now includes all the State of Durango and part of Zacatecas, with Sonora, Chihuahua, and Sinaloa for suffragans. The first archbishop was Vicente Salinas. Among the remarkable bishops of the see were the scholarly Goeres, to whom the city owes its canons; the famous writer Le gaspi, who began the cathedral that was finished and consecrated by Antonio Zubiría y Escalante, and lately decorated anew by Archbishop Santiago Zubiría y Manzanera. The Catholic press is represented by "El Domingo," and the "Boletin Eclesiastic." Besides the Escuelas Guadalupanas there are two colleges, the Colegio Guadalupano and a College of the Brothers of Mary. The territory of the diocese is quite mountainous and is watered by a few streams, but is well adapted for grazing. There are many rich mines of gold, silver, and iron. In 1900 the population of the State of Durango was 307,274, that of the city 31,922. The latter, known also as Guadiana and Ciudad de Victoria, stands picturesquely at 6,700 feet above sea-level, and has important industries and a large trade in cattle and leather.

Reginaldo Guereca.
ST. PETER AND ST. JOHN—ST. PAUL AND ST. MARK
ALBRECHT DÜRER, PINAKOTHEK, MUNICH
DURAZZO, Archdiocese of (Dyrrachischen), in Albania, situated on the Adriatic, has a good port, and is the chief town of a sandjak in the vilayet of Scutari; the population is about 9000. According to Appian it was founded by a barbarian king, Epidamnus, after whom it was called Epidamnium; it then became the name of Dyrrachium, from Dyrrachius, nephew of a daughter of Epidamnus, to whom was due its port. According to Thucydides and Strabo it was more probably a colony of Corcyra. It was one of the causes of the Peloponnesian War. Conquered by the kings of Illyria, when attacked by the Romans, it surrendered to the latter and received from them many privileges. Its port was important for communication with Greece. Cicero and Pompey in their disgrace took refuge at Dyrrachium. When towards the end of the fourth century the empire was divided into two parts, the city fell to the Eastern Empire. The Byzantine emperors made it a strong fortress, and Anastasius I was born there. After the seventh century it was the centre of a theme; in 1011 its governors received the title of dukes. Under Michael the Paphligonian (1034–1041) it was occupied by the Bulgarians; in 1042 it was retaken by the Greeks. In 1204 it was captured by Robert Guiscard, who deposed Alexius Comnenus under its walls; at the death of Robert it fell again into the power of the Greeks, who held it till the capture of Constantinople by the Latins (1204). From 1206 to 1294 it belonged to the despots of Epirus. It was then conquered by the Angevin kings of Naples, who gave it as a fief to princes of the family; the descendants of these rulers kept the title of "Duras" even when they no longer held the city. The effective lordship passed to the Thopias about the middle of the fourteenth century. In 1373 the city was occupied by the Balsas of the Zetta, in 1386 by the Venetians, and finally, in 1501, by the Turks.

The church of Durazzo is the most ancient in Albania. According to local tradition the first bishop of the country was St. Cesarius, one of the Seventy Disciples. St. Astius, his successor, is said to have suffered martyrdom under Trajan about A.D. 100. A list of the Greek bishops is in Lequien (Oriens Christianus II, 240–247), but it is very incomplete. Durazio is even yet a metropolis for the Greeks. Under Eugenius, who attended the Council of Ephesus, 431, it was the metropolis of Epirus Nova or Illyricum. The see, long disputed between the Greeks, the Bulgarians, and Serbs, remained finally in the hands of the first named. Its bishops, who as early as 519 had sided with Acacius, Patriarch of Constantinople, against Pope Hormisdas, followed the schism of Michael Cerularius in the eleventh century. At the beginning of the thirteenth century, after the Latin conquest of Constantinople, a Latin see was established there (1209). The Latin succession was often interrupted, on account of political changes; the actual (1905) archbishop is the fifty-second of the list (Lequien, III, 950–954; Gams, I, 407; II, 57; Eubel, II, 81). The see is subject to several removals; after the Turkish conquest the archbishops transferred it to Corbina (1509), then to Canovia; to-day they reside at Delbenisti. Durazio had originally but one suffragan, Cerneum or Tzernemum, site unknown. Later it had Prisca, Coneya, and Canovia. To-day Alessio one is subject to the Archbishop of Durazzo, but his power over it has been so limited by Propaganda that he may be considered an archbishop without a suffragan.

There are in the archdiocese about 250,000 inhabitants and about 180,000 are Musulmans (Turks and chiefly Albanese), 95,000 Greeks or Grecized Albanians, 14,000 Catholics (Albanian, except a few Italians and Austrians). There are also at Elbassan about 150 recently converted Greeks. The diocese has no seminary, but some students are sent to the seminary of Scutari. It has 20 priests, of whom 13 are secular priests, 22 parishes, 46 churches or chapels, 39 stations, 5 schools for boys and 1 for girls (the latter conducted by Sisters of Charity of Agram). Franciscan friars have charge of several parishes.

L. PETTIT.

Durbin, Elisea John, the "patriarch-priest of Kentucky", b. 1 Feb., 1800, in Madison Co., in that State, of John D. Durbin, son of Christopher Durbin, pioneer, and Patience Logsdon; d. in 1887 at Shelbyville, Kentucky. In 1816 he was sent to the preparatory seminary of St. Thomas, in Nelson Co., where he spent about four years of manual labour and study under such distinguished missionaries as David Flaget, Felix de Andreis, and Joseph Rosati; thence he went to the near-by Seminary of St. Joseph, at Bardstown, where, in 1821–1822, he had as instructor Francis Patrick Kenrick, later Bishop of Philadelphia and Archbishop of Baltimore. He was ordained priest in Bardstown, by Bishop David, 21 Sept., 1822. Early in 1824 Bishop Flaget entrusted to him the pastoral care of western and south-western Kentucky, about thirty counties, with an area of over 11,000 square miles, nearly one-third of the State. Then began a missionary career of over sixty years, spent in the United States, and that subsequently won for him the names of "Apostle of Western Kentucky" and "Patriarch-Priest of Kentucky". Union County was the centre of his mission. From it he journeyed on horseback over his vast territory, erected churches, established stations, formed congregations, and visited isolated families. In the beginning duty called him beyond his mission proper into Indiana, and once a year to Nashville, Tennessee. He traversed his extensive and sparsely settled mission incessantly for over sixty years, his churches, stations, and the rude homes of his poor flock his only abiding places. Occasionally a communication from him would appear in the press, and then only in defence of truth or outraged justice. When he did write, he wrote cogently and elegantly. Enfeebled by age, his sturdy constitution gave way in 1884, when his bishop, yielding to his entreaties, assigned him the small mission at Princeton, Kentucky. After a stroke of paralysis he was given, in 1885, the chaplaincy of an academy, at Shelbyville, Ky., where he died.

Louis G. DEPPEN.

Dürer, Albrecht, celebrated painter and engraver, b. at Nuremberg, Germany, 21 May, 1471; d. there, 6 April, 1528. Dürer left his native city, then famous for its commerce, learning, and art, but three times in his life. His first journey was undertaken after he had completed his apprenticeships both to his father, a goldsmith, and to the painter and engraver Wohlgemuth; on this occasion he travelled through Germany and visited at Colmar and Basle the family of the recently deceased Schongauer; in 1505–07 he spent some time in Venice; in 1520–52 he went to the Netherlands, visiting especially Antwerp.

First Period: To 1505. — After the earliest works of his youth (portraits, Madonnas, coats-of-arms, landscape-sketches) he set up in 1494 a studio of his own. In the same year he married Agnes Frey but they had no children. Among his Nuremberg friends the learned humanist Willibald Pirckheimer held the first place. Besides great advancement in learning, Dürer owed to Pirckheimer the happiness of a lifelong friendship

V.—14
and the acquaintance with classical antiquity which he occasionally drew upon in his work. Dürer's art, however, with its sources in the German Middle Ages, remained essentially German; the influence of the art of Italy and the Netherlands was merely supplementary. In his own country there were few chances for mural paintings; but the demand for altar-pieces and portraits was all the greater. His woodcuts were eagerly sought after by the general public, his engravings on copper by connoisseurs. Among his fine compositions are: the Baumgartner altar-painting, the central panel of which represents the Adoration of the Christ Child, the wings, the donors as Sts. George and Eustachius; the "Lamentation of Christ", in which the pathos is noteworthy; and the remarkable picture of himself (1500). These are preserved in the Old Pinakothek in Munich. The portrait of himself just mentioned is greatly idealized as is also that of a lady of the Furlinger family. On the other hand, in the "Prodigal Son" and in his drawings, Dürer seeks to elevate his naturalism by

sweet simplicity, depth of feeling, and grandeur of conception. The "Adoration of the Magi" in the Uffizi at Florence will bear comparison, at least for German taste, with the masterpieces of Italy and the Netherlands. Dürer's woodcuts have a quality entirely their own; though without colouring, they yet produced the effect of colour. The "Apocalypse" (15 cuts) is distinguished by its daring fancy and grandeur of conception. The most striking of the series are: the "Four Riders", the "Angels of the Epiphany", the "Battle of the Angels with the Dragon". To the same period belong, for the most part, the powerful "Larger Passion" (7 later 12, cuts) as well as the beautiful "Life of the Virgin" (16, later 20, cuts), in which the scenes from the life of the Holy Family in Egypt have the sweetness of a charming idyll. Mention should be made of the so-called "Green Passion" in the Albertina Museum at Vienna, a series of twelve drawings with the pen on green paper, also of the "Smaller Passion" of a later date in 37 woodcuts, and of the 17 copperplate engravings on the same subject. For the fifth time the artist came back to the Passion of Christ eight years before his death; a few sketches are to be found in the Uffizi at Florence and in the Albertina at Vienna. Wood and copperplate engraving were brought to great perfection by Dürer; the latter, and etching as well, by his own work; the

former by his directions to the wood-engravers who carried out his designs.

Second Period: 1505 to 1520.—In the "Festival of the Rosary", painted in Venice for German merchants residing there, he competes, not unsuccessfully, with the Italian colourists, though it may be said that colour was not his strong point. The painting (Abbey of Strahow, Prague) is damaged, but a good copy is preserved in the Imperial Museum at Vienna. An oil-painting of the same period, "Christ on the Cross", and other works that followed, e.g. "Adam and Eve" (Madrid and Florence), show that Dürer's trip to Italy and the acquaintance made there with Giovanni Bellini were not without profit to his art; but Dürer's nationality and the independence of his genius are always evident. Another work much admired was the so-called Heller altar-piece, destroyed at Munich in 1674 by fire. Valuable studies for this picture and an indistinguishable copy are still extant. One of the finest examples of German art is the "Adoration of the Trinity" or "All Saints" (1511). Placed beside the "Disputa" of Raphael or the Sistine paintings of Michelangelo pro-

magnes, Sigismund, and Albrecht of Brandenburg; further, the marginal drawings, displaying great fancy and humour, made for Maximilian’s “Prayer Book”, and the “Triumphal Arch of Maximilian” belong to the same time. Later, Dürrer worked also on the “Triumphal Arch of Maximilian”, and the large “Triumphal Car”, for the emperor.

Third Period: 1520 to 1528.—Admirable sketches for “St. Jerome with the Skull”, lately discovered by Anton Weber in Lisbon, give ample proof of the artist’s diligence during his stay in the Netherlands. The strike of lead on the head of the saint very likely that of an Old Man” in the Albertina. After his return to Nuremberg, Dürrer painted a noteworthy “Head of Christ” and portraits of Pirkheimer, Erasmus, and Holzschuher. His last work of importance (1526) was the “Four Apostles”, Peter with John, and Paul with Mark; these paintings, which are now in Munich, are much admired for the individuality of character expressed by the figures and the fine treatment of the drapery.

From the inscription under these pictures, despite the fact that Peter is represented as holding the keys of heaven, and from other circumstances that prove his identification, some have wished to infer that towards the end of his life Dürrer became attached to the doctrines of Luther. But even the protestants Van Ey, A. W. Becker, C. Kinkel, and others, do not share in this opinion, and M. Thausing, the great Dürrer scholar, has now rejected it. No doubt many well-disposed persons of the time saw the necessity for ecclesiastical reform and hoped that it would be hastened by Luther’s stand. But they were deceived and acknowledged it, as Pirkheimer did for himself and his friend: “I confess that in the beginning I believed in Luther, like our Albert of blessed memory...but an apologist, the situation has become worse.”

In the years 1525–27, Dürrer wrote three books: on geometry, the proportions of the human figure, and the art of fortification.

G. GIETMANN.

Durham (Dunelm), Ancient Catholic Diocese of (Dunelmensis).—This diocese holds a unique position among English bishops. Owing to its geographical position on the Scottish border, the successive bishops were led to assume constitutional and political functions in addition to their spiritual office. Consequently their rights and privileges were peculiar and extensive; and even to this day the Anglican Bishop of Durham has precedence over all other English prelates except those of Canterbury, York, and London.

The diocese is the linear continuation of the Anglo-Saxon See of Lindisfarne, founded by St. Aidan in 635, when he came from the monastery of Iona at the request of St. Oswald, King of Northumbria, to evangelize that newly-conquered heathen kingdom. He built his monastery on the Island of Lindisfarne, now Holy Island, off Northumbria. Thus Northumbrian Christianity was of Celtic origin and followed the Celtic use as to the observance of Easter and other matters. But in the south the Roman use prevailed and conflict became inevitable. The controversy arose in the time of St. Colman, the third bishop, and was settled in 641 at the Synod of Whitby when the Roman use was adopted. Shortly after, St. Colman was slain, and the see was transferred to York, with St. Wilfrith as bishop.

In 678, St. Theodore, Archbishop of Canterbury, cut off from it two new sees, one for the Lindseywars of Lincolnshire and the other for Bernicia. In 680 the Bernician see was subdivided into the Dioceses of Lindisfarne and Hexham, while finally a separate bishopric was created for the Southern Picts. So that when St. Cuthbert (q. v.) became Bishop of Lindisfarne the diocese was only a fragment of what it had been under St. Aidan. In the ninth century, when the Danes reigned the Northern part of Hexham ceased to have a separate existence, and about 820 was merged in that of York. In 875, Eardulf, Bishop of Lindisfarne, was driven from his see, and taking the body of St. Cuthbert, he with his monks fled from the Danes. After wandering seven years they found a resting place at Chester-le-Street (882); and from here Eardulf and his eight immediate successors ruled the see. In 965 Bishop Aldhelm again found himself defenceless before the Danes and fled with St. Cuthbert’s body to Ripon. When peace was restored, he was returning to Chester-le-Street when miraculous signs were given that the body of the saint was to remain at Dunholm, the place where the city of Durham now stands. A stone chapel was built to receive St. Cuthbert’s body and Aldhelm began a great church where the cathedral now is, which was finished and consecrated in 999. In this way Aldhelm became the first Bishop of Durham.

The following is the list of bishops with the dates of their accession. Those marked thus (†) held the office of Lord Chancellor:

The Cathedral.—The first Norman bishop, Walcher, was murdered by the people in 1080, and was
suceeded by William de S. Carilef, who began the present cathedral, the foundation being laid 29 July, 1093. He also replaced the secular cathedral clergy by Benedictine monks from Jarrow and Wearmouth. The situation of the cathedral is remarkable, as it stands high on the cliff overlooking the river, and the building itself is most imposing, with its noble proportions, and what Dr. Johnson called its appearance of "rocky solidity and of indeterminate size". Bishop Carilef died shortly after beginning it; but the building was carried on with energy by the next bishop, the infamous Rannulf Flambard. He built the nave and aisles and the lower part of the west front, and in 1104 the shrine of St. Cuthbert was transferred to the new cathedral. In 1143 the see was usurped by William Cummin, chancellor of the King of Scotland, local survival of the old Northumbrian Kingdom. According to another view it was conferred by grant of some king, Alfred or, more plausibly, William the Conqueror. There is, however, no historical trace of any such grant, and recent research makes it more probable that it is a development of immunities granted to the Bishopric of Durham before the Conquest the bishops held large endowments of land known as the patrimony of St. Cuthbert, Terra or patrimonium Sancti Cuthberti. Therefore the diocese possessed large franchise or immunity both as against the sovereign power of the King of England and as the local rights of the Earl of Northumbria. Thus the bishopric was not included in Domesday Book, and even at the time of the Conquest the county of Durham was governed by the bishop with almost complete local independence. These extensive rights were strengthened by the fact that the bishops frequently had to repel Scottish invasions, by their own forces and at their own expense, which fostered both the military and financial independence of the palatinate. The strong local feeling of Northumbrian independence also prevented the formation of any firm ties with the English sovereigns, until the masterful policy of Henry II brought Durham into submission to the central government. But this subordination was exceedingly limited even then, and the bishopric escaped the deprivation of its privileges which befell many other franchises at that time. This was due to Bishop Hugh de Pudsey, who was the king's cousin and personal friend, and who took care that the see went on to obtain the charters necessary to safeguard the liberties of his see.

These were most considerable. First, the bishop had within the bishopric every right that the king had in the country: Quoiquid regis habeat extra episcopus habeat intra. He was therefore the head of the local government, with appointment of all civil officers. The bishop's writ, not the king's, ran within the bishopric, and the "Bishop's peace" was regarded as different from the "King's peace" until the time of Henry VIII. Offenders and law-breakers were tried in the bishop's court, and if necessary punished by his officials. Forfeitures for treason and forfeitures of war were both his right, and he could create corporations, and erect fairs and markets. He did not, however, have the right of making treaties with foreign powers, though instances of attempted secret treaties with Scotland are not wanting. The bishop had their own mint, and their coinage bears their initials on the reverse of each coin. From the feudal point of view the bishop was very strong, as he was the universal landlord, and all land was held mediately or immediately of him and not of the king. From this followed his rights of wardship, rights to all mines and to treasure-trove, as well as his extensive forest rights. At law he could stay procedure against offenders, grant pardons and even suspend the application of a statute. He had courts of common law, equity, and admiralty, besides his spiritual courts; and he regulated the relations between the latter and the temporal courts.

Thus, in theory, the bishop was as a king in his bishopric, but in practice his power was limited by the sovereign. In some instances the king actually infringed upon his rights, and in other cases this conflict of jurisdiction. Up to the end of the thirteenth century the episcopal power developed in every way, then followed a period during which the kings somewhat unwillingly tolerated the position, for the sake of the convenience of having what amounted to a buffer state between England and Scotland, and also because it was difficult to solve a problem so beset with complications both ecclesiastical and feudal. Although it is sometimes stated that the bishops had a council in the nature of a parliament, it is becoming increasingly clear that we have

![West Towers and Cloister Court, Durham Cathedral](image-url)
here a confused tradition of two separate bodies—the assembly and the council. The assembly (communitas) was practically the same gathering as the shiremoot in other counties. It raised money by taxation at the request both of the king and of the bishop, and sometimes for its own purposes. But it was not a legislative assembly, since all general legislation applied to the palatinate, although Durham was not represented in Parliament till the time of the Stuarts. When Acts were not intended to apply to Durham express exemption was stated. The council was in origin a feudal body, chosen from the bishop's immediate followers and officials, the functions entrusted to it being the general administration of the palatinate, financial affairs, and the duty of advising the bishop. The judicial courts of the palatinate arose out of this body. Much of the civil and judicial independence of the palatinate was destroyed by the Act of Resumption passed in 1536, at the will of Henry VIII. By this act the bishop's semi-regal power was abolished.

Galilee Chapel, Durham Cathedral

The see at this time was held by Cuthbert Tunstall, the venerable prelate who was the last Catholic bishop and who lived to witness the suppression of monasteries, the Pilgrimage of Grace (1536), and finally the surrender of Durham Abbey (1540), which involved the spoliation of St. Cuthbert's shrine. During the reign of Edward VI he was imprisoned and an Act of Parliament was passed dissolving the bishopric and forming it into a county palatine. After the brief reign of Mary's reign, Bishop Tunstall was deprived of his see by Elizabeth, July, 1559. With his death in confinement, on 18 Nov., the line of Catholic bishops ended. Ten years later during the "Rising of the North" the Catholics seized Durham cathedral, restored the altar, and publicly celebrated Mass, thus making it the last of the old English cathedrals in which Mass has been said.

In the bishopric there were six collegiate churches, Auckland, Darlington, Chester-le-Street, Lanchester, Norton, and Staindrop. The Benedictines held Durham Abbey, with the dependent houses of Jarrow, Wearmouth, and Finchale. There were Augustinians at Hexham and Brinkburn; Cistercians at Newcastle, and Premonstratensians at Blanchland. Durham College (now Trinity), at Oxford, was greatly protected and helped by various bishops and priors of Durham, and possibly was originally a Durham foundation. The arms of the see are: azure, a cross between four lions rampant, or. The mitre over the arms is encircled by a ducal coronet.

The Historical Works of Symeon of Durham in B. S. (1882-1883), the chief authority for the history of the see down to 1155. Subsequent events are recorded by Geoffrey of Coldingham, Liber de Statu Ecclesie Dunelmensis (1152-1212); Robert de Greydan, Historia de Statu Ecc. Dunelm. (1214-1336); William de Chandler, Continuatio Historiae Dunelmensis—all three ed. by Raine and pub. by Socites.
DURROW 214

tically that of the North of England (corresponding in all its main points to that of York), with a few local modifications such as one would expect to find in a great and flourishing monastic church. The treatise begins with a description of the famous nine altars (ed. Surtees Soc., p. 7). All the great paschal candlestick was reserved in a silver pelican hung over the High Altar. It should be noted that a pelican in her piety was assumed as his arms by Richard Fox (Bishop of Durham, 1494–1502) and was constantly introduced into monuments built by him (so at Winchester and at Corpus Christi College, Oxford). The large paschal candle was conspicuous and splendid feature of Easter ritual at Durham; and it the rite of the paschal candle are described in chapter xvi (ed. cit., p. 10). The Office for Palm Sunday does not differ from that of Sarum and the other English uses (ed. cit., p. 179). On Maundy Thursday there was a procession with St. Cuthbert's relics. A special feature of the Good Friday service was the crucifix service, performed by monks from inside a statue of Our Lady, for the Creeping to the Cross. On the same day the Blessed Sacrament was enclosed in a great statue of Christ on a side altar, and the candles were burned before it. On the Holy Saturday service in the Durham Missal is given on pp. 185–187 of the Surtees Society edition. The monks sang the "Miserere" while they went in procession to the new fire. When the paschal candle is lit they sing a hymn, "Inventor rotuli," which is repeated each time. There are only five Prophecies, and then follow the litanies. When "Omnes Sancti" is sung those who are to serve the Mass go out. The word Accenditur is said and the candles are lighted. It is repeated three times; at the third repetition the bishop comes out to begin the Mass. The bells (Anglus, rex, eleison, the Gloria, and the Alleluia. Between three and four o'clock in the morning of Easter Day the Blessed Sacrament was brought in procession to the high altar, while they sang an antiphon, "Christus resurgens ex mortuis, iam non moritur," etc. Another verse that is repeated each time. There are only five Prophecies, and then follow the litanies.

When "Omnes Sancti" is sung those who are to serve the Mass go out. The word Accenditur is said and the candles are lighted. It is repeated three times; at the third repetition the bishop comes out to begin the Mass. The bells (Anglus, rex, eleison, the Gloria, and the Alleluia. Between three and four o'clock in the morning of Easter Day the Blessed Sacrament was brought in procession to the high altar, while they sang an antiphon, "Christus resurgens ex mortuis, iam non moritur," etc. Another verse that is repeated each time. There are only five Prophecies, and then follow the litanies.

Throughout the year the chapter Mass was sung at nine o'clock, Vespers at three p.m. On Thursdays, except in Advent, Septuagesima, and Lent, on St. Cuthbert was sung in choir (ed. cit., p. 191). On Fridays there was a "Jesus-Mass" (a votive mass of St. Cuthbert was sung in choir (ed. cit., p. 220). This was also the custom at York, Lincoln, Lichfield, and Salisbury. On St. Cuthbert's Day (20 March) there was, naturally, a great feast and his relics were exposed. Chapter xvi (ed. cit., p. 16) describes the following names of benefactors (Liber Vitae) that was kept on the high altar, chapter xxi the forms for giving sacred to armed persons. They had to use the knocker, still shown to visitors, and, when they were received, to wear a black gown with a yellow cross of St. Cuthbert on the left shoulder (ed. cit., p. 10). No woman was allowed to approach the saint's tomb beyond a line of blue marble traced on the floor. To explain this, chapter xviii tells a legend about a king's daughter who falsely accused him and was eventually swallowed up by the earth. In the "Galilee" was a chapel of Our Lady for women (ch. xxii, ed. cit., p. 42). When a monk died his body was carried to St. Andrew's chapel, two monks watched before it all the time; after the dirge and the requiem Mass was celebrated in the sanctuary with a chalice of wax laid on the breast (ch. xxiii). Priors were buried in the Abbey choir (xxxvi), and choristers in the sanctuary (xxxvii). (See DURHAM, DIocese of.)

The Anglo-Saxon Rituale ecclesiae Dunelmensis is published (from the MSS. at Durham) by the SURTEES SOCIETY (vol. X, 1838), and was re-edited with a key in his Old English Texts (1865). The Ancient Monuments, Ritae, and Customs of the Metropolitan Church of Durham is a treatise on the Durham Ritual in a MS. of 1020 in the library at Durham (MSS. Bl. 11, fol. 5 and a MS. of 1656 belonging to Sir John Lawson, Bart., of Tatham Hall, Catterick (Pepys' friend). The edition of the Surtees Society has been printed (vol. CVII, Rituales, of 1898). Other editions are: one curtailed and modernized by Davies (London, 1872); Hunter, Durham Cathedral as it was before the dissolution of the monasteries (Durham, J. Ross for Mrs. waggon, 1733); reprinted, Durham, 1785); and Sanders, The Antiquities of the Abbey or Cathedral Church of Durham (Newcastle-on-Tyne, 1767). The Durham Obituary Register, 1688 to 1819, was added by Raines for the Surtees Society (vol. XXXI, 1856) and the Liber Vitae Ecclesiae Dunelmensis, from a ninth-century MS., by S. C. White for the same society (vol. XII, 1843). The Surtees Society Catalogue (pp. 38, 115) gives a Durham Canon Missae, bound up with a psalter, hymnary, and journal, of 1384 and Part of the Ms. (ed. Mortimer). The British Museum (Ms. 5289) is printed in vol. CVII of the Surtees Society (pp. 172–174). Occasionally the Durham Rite will be found in Rock, Church of our Fathers, ed. Hart and Freire (4 vols., London, 1904), and in Waddington E. T. Littledoll The Old Service-books of the English Church (London, 1904).

ADRIAN FORTESCUE.

DURROW (Irish Dearmghall, Plain of the Oaks), SCHOOL OF, is delightfully situated in the King's County, a few miles from the town of Tullamore, St. Columbia, who loved to build in close proximity to oak-groves, because of their natural beauty, as well as to pomp of their Druidic associations found here, as in Derry, a site just after his heart. It was freely given to him by Aedh, son of Brendan, lord of the soil, in 535, and the saint lost no time in founding his monastery, which, with more or less constant personal supervision, he ruled till 668. When, in that year, either as a matter of penance, or as Adamnan says, "of choice for Christ's sake," he became an exile in the wilds of Scotland, he appointed a most estimable monk, Cormac Ua Lethlain, to take his place. But owing to the jealousies that existed between the northern and the southern tribes, especially on the Canterbury, Cormac Ua Lethlain was put within the office of prior, and so he fled from the monastery, leaving in charge a first cousin of Columba, Laisren by name, who, acceptable to both sides, governed the institution with conspicuous success. Duroe, durrow is a gaelic verb (X) meaning to write a letter since its establishment as a famous school, at one time being seconded second to none in the country. The Venerable Bede styles it Monasterium nobile in Hibernia, and, at a later period, Armagh and itself was called the "Universities of the West." It will be ever noted for the useful and admirable practice of copying manuscripts, especially of the Sacred Scriptures, which had become quite a fine art amongst the masters and disciples there. Columba himself, who was an expert scribe, is generally credited with having written with his own hand the incomparable copy of the Four Gospels now known as the Book of Durrow, a great book every page of which is the result of exquisite workmanship, charming the mind as well as the eye with its intricate and highly ornamental details. An entry on the back of one of the folios of this remarkable book, which is now to be seen in Trinity College, Dublin, prays for a "remembrance of the books, Columba, who wrote this evangel in the space of twelve days."

Columba dearly loved Duroe. It held a place in his affections next to his own Derry, and while in Iona he manifested the tenderest interest in everything that concerned its welfare. When he was urging Cormac Ua Lethlain to return to the monastery there, ...
he recounted for him the manifold beauties of that "city devout, with its hundred crosses, without blemish, and without transgression", and added, "I pledge thee my unerring word, which may not be impugned, that death is better in reproachless Erin than life forever in Alba."

Du Ruyt, like Derry, and to rest, was frequently ravaged by the Danish invaders, but its complete devastation was left for the fierce Norman invader, Hugh de Lacy. In 1186 he began the building of a castle for himself out of the stones of the dismantled monastery, but the axe of an Irish laboring man cut him short in the unholy work in the church and the school are long since gone; not a stone of the original building may now be found. There are, however, still to be seen at Durrow a churchyard, probably marking the ancient site, a Celtic cross, and a holy well, which will serve to keep the name and the fame of St. Columba fresh in the minds of the people forever.

ADAMAN, Life of Columba, ed. Rev. F. Healy (Dublin, 1877; also by Fowler (London, 1905); Life in the Book of Lismore; HEALY, Ireland's Ancient Schools and Scholars (Dublin, 1906); GILBERT, Facsimiles of Irish National MSS. Whitley Stokes in Anecdota Oxoniensia (Oxford, 1890).

JOHN HEALY.

Dutch Guiana. See Guiana.

DUTY. —The definition of the term duty given by lexicographers is: "something that is due;" "obligatory service;" "something that one is bound to perform;" or "something to which a person is inclined." In this sense we speak of duties inherent in our nature; and, in general, the sum total of these duties is denoted by the abstract term in the singular. The word is also used to signify that unique factor of consciousness which is expressed in the following definitions by "obligatory," "bound," "ought," and "arrestable." Let us consider the term in consciousness. When, concerning a contemplated act, one forms the decision "I ought to do it," the words express an intellectual judgment. But unlike speculative judgments, this one is felt to be not merely declaratory. Nor is it merely preferential; it asserts itself as imperative and magisterial. It is accompanied by a feeling impelling one, sometimes effectually, sometimes ineffectually, to square his conduct with it. It presumes that there is a right way and a wrong way open, and that the right is better or more worthy than the wrong. All moral judgments of this kind are particular applications of a universal judgment which is postulated in each of them: right is to be done; wrong is to be avoided. Another phenomenon of our moral consciousness is that we are aware from our consciousness that nature has constituted a hierarchical order among our feelings, emotions, and desires. We instinctively feel, for example, that the emotion of reverence is higher and nobler than the sense of humour; that it is more worthy of us as rational beings to find satisfaction in a noble drama than in watching a dog-fight; that the sentiment of benevolence is superior to that of selfishness. Furthermore we are conscious that, unless it has been weakened or atrophied by neglect, the sentiment attending moral judgments asserts itself as the highest of all; awakens in us the feeling of reverence; and demands that all other sentiments and desires, as motives of action, shall be reduced to subordination to the moral judgment. When action is conformed to this demand, there arises a feeling of self-appropriation, while an opposite course is followed by a feeling of self-reproach. Starting from this analysis we may easily understand the theory of duty according to the ethics of the Catholic Church.

DUTY IN CATHOLIC ETHICS. —The path of activity proper and congenial to every being is fixed and dictated by the nature which the being possesses. The cosmic order which pervades all the non-human universe is predetermined in the nature of the innumerable variety of things which make up the universe. For man, too, the course of action proper to him is dictated by the constitution of his nature. A great part of his activity is, like the entire movements of the non-human world, under the iron grip of determinism; there are large classes of vital functions, over which he has no volitional control; and his body is subject to the physical laws of nature. And in the non-human world, he is himself the master of his action over a wide range of life which we know as conduct. He is free to choose between two opposite courses; he can elect, in circumstances innumerable, to do or not to do; to do this action, or to do that other which is incompatible with doing it. Does, then, his nature function by conduct? Is every form of conduct equally congenial and equally indifferent to human nature? By no means. His nature indicates the line of action which is proper, and the line which is abhorrent to it. This demand of nature is delivered partly in that hierarchical order which exists in our feelings and desires as motives of action; partly through the reflective reason which decides what form of action is consonant with the dignity of a rational being; comprehensively, and with immediate practical application to action, in those moral judgments involving the "ought." This function of reason, aided thus by good and practical experience, we call conscience (q. v.).

We have now reached the first strand of the bond which we know as moral obligation, or duty. Duty is a debt owed to the natural nature of which the spokesman and representative is conscience, which at each moment demands the satisfaction of justice. But is this the be-all and the end-all of duty? The idea of duty, of indebtedness, involves another self or person to whom the debt is due. Conscience is not another self, it is an element of one's own personality. How can one be said, except through a figure of speech, to be indebted to oneself? Here we must take into consideration another characteristic of conscience. It is that conscience in a dim, indefinable, but very real way, seems to set itself over against the rest of our personality. Its intimations awake, as no other exercise of our reason does, feelings of awe, reverence, love, fear, shame, such as are called forth in us by other persons, and by persons only. The universality of this experience is testified to by the expressions men commonly employ when speaking of conscience; they call it a voice, a judge; they say that they must answer to conscience; they speak of conscience as a teacher, as one's own master. Their attitude towards it is as to something not completely identical with themselves; its whole genesis is not to be accounted for by describing it as one function of life. It is the effect of education and training, some say. Certainly education and training may do a great deal to determine our feelings and desires, but in conscience there is another self implicated beyond ourselves. But the quickness with which the child responds to his instructor or educator on this point proves that he feels within himself something which confirms his teacher's lesson. Ethical philosophers, and conspicuously among them Newman, have argued that to him who listens reverently and obediently to the dictates of conscience, they inevitably reveal themselves as emanating, originally, from "a Supreme Governor, a Judge, holy, just, powerful, all-seeing, retributive." If, however, we accept Newman's view as universally true, we must admit that, as is generally asserted and believed, many men obey conscience and love righteousness, who nevertheless, do not believe in a personal, moral ruler of the universe. Why may not the most uncompromising their admit that the moral ruler according to Catholic ethics has implanted in our nature is powerful enough successfully to discharge its function, at least in occasional cases, without fully unfolding its implications? One of the leading Unitarian moralists has eloquently expressed this opinion. The profound sense of the authority and even sacredness of the moral law is often conspicuous among men whose
thoughts apparently never turn to superhuman things, but who are penetrated by a secret worship of honour, truth and right. Were this noble state of mind brought out of its impulsive state and made to unfold its implicit contents, it would indeed reveal a secret human sanctions for the authority of righteousness. But it is undeniable that that authority may be felt where it is not seen—felt as if it were the mandate of a Perfect Will, while yet there is no overt recognition of such a Will: i.e., conscience may act as human, before it is discovered to be divine. To the agent himself, its whole history may seem to lie in his consciousness and his visible social relations; and it shall nevertheless serve as his oracle, though it be hid from him Who it is that utter its. (Martineau, A Study of Religion, Introduction, p. 21.) Nevertheless it must be admitted that such persons are comparatively few; and they, too, testify to the implication of another self in the intimations of consciousness; for they, as Ladd says, “personify the conception of the sum-total of ethical obligations, they are fain to spell the words with capitals and swear allegiance to this purely abstract conception. They hypothesize and defy an abstraction as though it were itself existent and allow a command from him. If moral judgments can claim no higher origin than one's own reason, then under close, severe inspection they must be considered as merely preferential. The portentous magisterial tone in which conscience speaks is a mere delusion; it can show no warrant to the authority which it pretends to exercise. When, under stress of temptation, a man who believes in no higher legislator than conscience, finds arising in his mind the inevitable question, Why am I bound to obey my conscience when my desires run in another direction? he is in perilously tempted to adjust his moral code to his inclinations; and the device of spelling duty with a capital will prove but a slender support to it against the attack of passion.

Reason solves the problem of duty, and vindicates the sanction of the law of righteousness by tracing the law to its source in God, the sovereign order and expression of the Divine Will, so, likewise, is the moral law which is expressed in the rational nature. God wills that we shape our free action or conduct to that norm. Reason recognizing our dependence on the Creator, and acknowledging His ineflable majesty, power, goodness, and sanctity, teaches us that we owe Him love, reverence, obedience, service, and, consequently, we owe it to Him to observe that law which He has implanted within us as the ideal of conduct. This is our first and all-comprehensive duty in which all other duties have their root. In the light of this truth conscience explains itself and is transfigured. It is the accredited representative of the Eternal; He is the original Imponent of moral obligation; and disobedience to conscience is disobedience to Him. Infraction of the moral law is a crime higher than human nature for the subject of it is designated by calling it sin. The sanctions of conscience, self-approbation, and self-reproach, are reinforced by the supreme sanction, which, if one may use the expression, acts automatically. It consists in this, that by obedience to the law of perfection, and compass our supreme good; while, on the other hand, the transgressor condemns himself to miss that good in the attainment of which alone lies the happiness that is incorruptible. To obviate a possible misapprehension it may be remarked here that the distinction between right and wrong hangs not upon any arbitrary decree of the Divine Will. Right is right and wrong is wrong because the prototype of the created order, of which the moral law forms a part, is the Divine Nature itself, the ultimate ground of all truth intellectual and moral.

Duties and wanders. We have already touched upon the main weakness of the Kantian theory, which is to treat conscience as autonomous. Another mistake of Kant is that in his system duty and right are made coterminous. A moment’s reflection is sufficient to perceive that this is an error. There are only two actions good which one can do, and which it would be highly praiseworthy to perform, yet which no reasonable person, however rigorous his ideal of conduct might be, would say one is bound to perform. Duty and right are two concentric circles. The inner one, duty, embraces all that is to be observed under penalty of failing to live rationally. The outer contains the inner, but, stretching far beyond, permits an indefinite extension to the paths of virtue that lead to consummate righteousness and sanctity. Every philosophic system which embraces as one of its tenets the doctrine of determinism thereby commits itself to the denial of the existence of moral obligation. Duty implies that the subject of it possesses the power to observe the law, or to disobey, and the power to choose between these alternatives. What reproach can a determinist mentor logically address to one who has committed a wrong action? "You ought not to have done so." The culprit can reply: "But you have taught me that I must do no action that no one can act otherwise than he does. So, under the circumstances in which I found myself, it was impossible for me to refrain from the action which you condemn. What, then, can you mean by saying that I ought not to have acted as I did? You reproach me; as well reproach a tiger for having eaten his own or a volcano for having ruined a village."

With regard to the existence of duty every form of pantheism, or monism, logically finds itself in the camp of determinism. When man is looked upon as one with the Infinite, his actions are not really his own, but belong properly to the Universal Being. The part assigned to him, in his activities, is similar to that played by a carbon burner in relation to the electric current generated by a dynamo. The Divine power passing through him clothes itself with only a seeming individuality, while the whole course of action, the direction which it takes, and the results in which it culminates, belong to the Supreme Being. If this were true, then lying, debauchery, theft, murder were equally as worthy as truthfulness, chastity, honesty, benevolence; for both would be equally manifestations of the one universal Divinity. Then a classification of conduct into two opposite categories might still be made from the standpoint of results; but the idea of moral worth, which is the very core of the moral life and the first postulate of duty, would have vanished. Hedonism of every shade—epicurean, utilitarian, egoistic, altruistic, evolutionist—which finds its basis in the "greatest happiness" principle and makes pleasure and pain the discriminating norm of right and wrong, is unable to vindicate any authority for duty, or even to acknowledge the existence of moral obligation. No combination of impulses, if they are estimated from the merely biological or purely empirical standpoint, can, by any juggling of words, be converted into a moral hierarchy. The hedonist is doomed to find all his endeavours to establish the basis of the moral order terminate in "is", but never in "ought"; in fact, but never in an ideal. Berkeley has nicely summed up the situation of the problem of duty: "All that is meant by saying we ought to do an action is that if we do not do it we shall suffer."

Pleasure, say the epicurean and the egoist, is the only motive of action; and actions are good or bad
accordingly as they produce a surplus of pleasure over pain, or contribute to or diminish welfare. Then, we ask, must I always pursue what seems to me the most pleasurable or the most remunerative? If the answer is yes, we are again landed in determinism. If the reply is no, we are at a loss what I ought to do. As I have to do what produces the most happiness, then I ask, why ought I to choose the course which produces most happiness or pleasure if I prefer to do otherwise? To this question the epicurean and the egoist have no answer. Besides, the most pleasurable conduct may be one that is not reasonable, because it is injurious to some one else. Here the egoist is compelled to hand the difficulty over to the altruist. The latter endeavours to dispose of it by pointing out that the object of good conduct is not merely the agent’s own happiness, but that of everybody concerned. But again, why am I bound to take into account the welfare of others? and the altruist is silent. The evolutionist of the Spencerian type intervenes with a ponderous theory that in gauging the measure in which actions produce welfare or diminish it, not merely the immediate, but also and more especially remote results only, he then proceeds to show, that, as a hereditary consequence of our ancestors’ experience that remote results are more important than immediate, we have come to fancy that remote results have a certain authoritative- ness. Also, from unpleasant experiences of our ancestors it is a tendency to impose very stringent conditions upon actions, to think too of the external penalties which were attached to such actions. These two elements, blending into one, give rise, we are told, to the feeling of moral obligation. So the common conviction that moral obligation has really any binding authority is a more delusion. Spencer is bold enough to draw the inevitable corollary of this doctrine which is that our sense of duty and moral obligation is transitory and destined to disappear. Ethical writers of the “independent morality” schools have devised a beautifully simple way of escaping from the embarrassment of accounting for the validity of moral obligation. They ignore the subject altogether and refer the disappointed inquirer to the metaphysician. Ethics, they blandly declare, is a descriptive, not a normative science; hence that imposing array of works professing to treat scientifically of morals, yet calmly ignoring the real chief factor of the moral life.

Historic Development of the Idea of Duty.—To trace the development of the concept of duty would be to review the history of the human race. Even in the lowest races there is to be found some moral code, however crude and erroneous. Another universal fact is that the race has, everywhere and always, placed morals under a religious, or quasi-religious, sanction. The savage, in a measure corresponding to his crude moral and intellectual development, witnesses to this universal impulse by observing invariable customs because he believes them to have some sanction higher than that of his fellow tribesmen or their chief. The great nations of antiquity, Chinese, Chaldean, Babylonian, Egyptian, saw in their deities the source or sanction of their moral codes—at least until the religious and the moral ideal became thus confused. In Greece the religious and moral ideas were intimately associated, until religion proved false to its trust. The same phenomenon is found in the Aryan race of India and Persia, while the Semitic peoples, especially the Jews, always continued to look to religion for the reason of their moral conduct. In Greece and Rome, law and religion were intimately associated, until religion proved false to its trust. The same phenomenon is found in the Aryan race of India and Persia. When classic poets among the gods the vices of men, the ancient tradition continued to be vindicated by the poets, and by some of the philosophers. The magnificent testimonies of the Greek tragic poets, of Plato, Aristotle, and Cicero to the superhuman origin of the moral law and duty need not be quoted here. But when religious tradit-

DUTY

217

DUTY

lost its force and philosophy became the guardian of morality, a conflict of rival schools, none of which possessed sufficient authority to make its tenets prevail with the mass of the people, was the inevitable result; and as religious faith declined, the tendency to a non-religious basis for duty became more pronounced. The consequence was that the idea of duty faded; and systems arose, which, like our present day “independent morality,” had no place for moral obligation.

The unity of the moral and religious ideal was re-established and rendered perfect by Christianity. The Gospel vindicated the origin of the Duty as the development of the idea according to the purposes of the Divine. It was declared that its fulfillment constituted the very essence of religion. This idea has been the chief motor force to raise the Western world out of the moral chaos into which decaying paganism had dragged it. The doctrine that every man is an immortal being created by God to be united with Himself in an endless existence, provided that he observe the law of righteousness, in which God’s will is expressed, sets forth the dignity of man and the sacredness of duty in their full nobility. The wickedness of moral delinquency reveals itself in this, that it is a sin against the Most Holy idea formerly known to antiquity outside the Hebrew people. The Christian religion brought out more clearly and taught with the authority of God, the code of the natural law, much of which unaided reason developed only in hesitating accents and without the authority of God. Of the old idea of the nature of moral duty. The Christian was taught that the fulfillment of duty is the one supreme concern of life to which all other interests must be made to bow, and that its fulfillment is enforced by the most tremendous sanctions conceivable. The Gospel gave a satisfactory solution to the anomaly of a moral principle which both united and separated us from the computers of the moral world.

The State, too, is placed on a firmer basis, since Christian doctrine teaches that it draws the warrant of its existence not from force, or a mere consensus of human wills, but from God. Finally, the Christian law of love correlates the outer circle of righteousness with the inner one of strict duty. Love of God becomes the adequate motive for striving after the highest personal sanctity; love of our neighbour for the widest exercise of benevolence far beyond the limits of strict duty. In the person of the Master, Christianity offers us to the flawless Exemplar of the moral ideal, the perfect conformity of will and action to the Divine Will. His example has proved potent enough to inspire with heroic loyalty to duty “the millions who, countless and nameless, the stern hard path have trod.” The moral and perpetual obligations of our civilization have been developed and maintained by the efficiency of the Christian idea of duty. Contemporary conditions furnish unmistakable indications that these standards become debased and discredited when they are torn from the ground whence they sprang.

Duties.—The obligation of living according to our rational nature is the parent of all particular duties. These are generally divided into three groups—(1) duties to God, (2) duties towards ourselves, and (3) duties to others.—(1) To God, the Supreme Master of the universe, our Creator, the All Holy, All Good, we owe honour, service, obedience, and love. These
duties are comprehended under the general term religion. Since He is Truth itself, we owe it to Him to believe whatever He has revealed to us in a supernatural manner; to worship Him in the way which, in revelation, He has taught us is most pleasing to Him; and to obey the authority which He has constituted. Reverence due to Him forbids all profanity and blasphemy of Him or whatever is sacred to Him. Lying is an offence against His Divine nature, which is Truth itself. These generic duties cover all the specific duties that we owe to God, and embrace, besides, those duties which devolve upon us as members of — (2) Our duties towards ourselves may all be included under one principle: life, the goods of person, mental and physical, have been given to us in trust, with the obligation of using them to obtain our supreme good and end. Hence we may not destroy them, or abuse them as if we were independent master of them. Therefore suicide, abuse of our faculties, mental or physical, exposing our life or health to danger without a reasonable motive, are prohibited; as also are all actions incompatible with the reverence that we owe to our moral nature. We are bound to strive for the development of our intellect and temporal goods as far as these are necessary to the fulfillment of the moral law. As duty is a debt to some one other than ourselves, we cannot, strictly speaking, use the term duties to ourselves. They are due to God; they regard ourselves.—(3) All our duties towards others are explicitly contained in the Christian precept: "Thou shalt love thy neighbour as thyself." God wills the welfare of all men; hence the obligation of making His will the rule of life binds me to will their welfare, and to order my conduct towards them with a due respect to the rational nature which they possess, and to the obligations which that nature imposes on them. The application of this principle gives birth to duties towards the minds and wills of others (prohibition of scandal and lying); to the lives of others (prohibition of murder, etc.); to their good reputation (prohibition of insult, detraction, or defamation of character). As material goods are necessary to us in order to live according to the rational law, evidently God in imposing moral obligation wills also that we have at our disposal the means necessary to fulfill our duty. Hence arises that moral control over things which is called "duty." The needs of a moral life require that some things should be permanently under our control; hence the rights of ownership. Now a right in one person is nugatory unless others are bound to respect it. So to every right there is a corresponding duty.

Thus far we have sketched the line of duty incumbent on each one towards others as individuals. Besides these there are social duties. The primary society, the family, which is the unit of civil society, has its foundation in our nature; and the relations which constitute it give rise to two groups of rights and correlative duties — conjugal and parental. Besides the family, a wider, broader, association of man with his fellows is needed, generally speaking, in order that he may develop his life with all its needs and potencies, in accordance with the dictates of reason. God has intended man to live in civil society, and man becomes the subject of duties and rights with regard to the society of which he is a member. The society, too, acquires a moral unity or personality which is also the subject of rights and duties. This system of social rights and duties has for its pivot the right possessed by the society to impose laws which constitute a binding obligation. This right, called the authority, is derived from the natural law, ultimately from God. For, since He wills civil society as a means for the due development of human nature, He wills that authority without which it cannot exist. As the lower animals cannot be the subject of rights we do not owe them any duties; but we owe duties to God in their regard (see Ethics; Law: Obligation).

**Duvergier de Hauranne (or Du Verger). Jean (also called Saint-Cyrain) from an abbey he held in commendam, one of the authors of Jansenism, at Guayenne, France, 1611; d. in Paris, 1643. After studying the humanities in his native place, and philosophy at the Sorbonne, he went to Louvain, not to the university but to the Jesuit college, where he graduated, 1604, with a brilliant thesis admired by Justus Lipsius. His acquaintance with the future theologian of the Jansenists, Jean-Baptiste de Jussieu, at the Sorbonne, and a Commoner of the Jansenist family, humid of the Baisant Jacques, himself a disciple of Scaliger and an enthusiastic humanist, received him as a friend, appointed him to a canonry and the priory of Bonneville, and later, 1620, resigned in his behalf the Abbey of Saint-Cyrain-en-Bremme. The new commendatory prelate resided little in his abbey. In 1622 he returned definitively to Paris, the metropolis affording him better opportunities of his plans. During the years 1617-1635 an assiduous correspondence was kept up between Duvergier and Jansen, of which there remain only "Lettres de Jussieu à Duvergier de Hauranne," seized at the time of Saint-Cyrain's incarceration. These letters, wherein conventional epigrams are used, constantly mention the affaire principale, projet, cabale, that is, first and foremost, the composition of the "Augustinian" by Jansen, Saint-Cyrain employing himself to enlist patrons for the so-called Augustinian system (see Jansenism). For greater security the two innovators momentarily discussed the progress of their joint work. One of these meetings probably gave rise to the much-debated "Projet de Bourg-Fontaine." In his "Relation juridique de ce qui s'est passé à Poitiers touchant la nouvelle doctrine des Janséniens," Poitiers, 1655, Filleau stated on the authority of one of the conspirators that six persons had secretly met in 1621 at the chartreuse of Bourg-Fontaine, near Paris, for the purpose of overthrowing Christianity and establishing desism in its stead. The names of the conspirators, initially baffled by Filleau, were given in full by Bayle (Dict., s. v. "Arnauld"). The Jansenists always protested against this story. Arnauld called it a "diabolical invention," and Pascal ridiculed it in his "Seizième lettre à un provincial." The Jesuit Father Sauveur's argument in his "Réalité du projet de Bourg-Fontaine démonstrée par l'exécution,"
DUVERGIER 219

(Paris, 1715) was refuted by D. Clémenet in "La vérité et l'innocence victorieuses de la calomnie ou huit lettres sur le projet de Bourg-Fontaine" (Paris, 1738). Although Clémenet's book was burned by order of the Parliament of Paris, still it never was answered. Guet's remark that "the adepts of Jansenism passed insensibly from the tenets of Saint-Cyr and Montgerton to atheism and the worship of reason" (Civilisation en Europe, Lec. xil) may apply to some of the later Jansenists, but the charge of rationalism is obviously untenable when brought against the Jansenists of the first generation. Tripped up of unsupported details and deductions, Filliet's naive "la vie and sauvage" arguments show what is borne out by the letters of Jansenius and other documents of the time, a covert yet definite purpose, as early as 1621, to deeply modify the dogmas, moral practices, and constitution of the Church. St. Augustine being made responsible for such changes.

As noticed above, Duvergier's share was to win high influence in favour of the religious revolution. While at Poitiers he met Richelieu, de Condren, and Arnauld d'Andilly. At Paris he sought out such men as Vincent de Paul, founder of the Congregation de Minimes, Olier, founder of Saint-Sulpice, Bérulle, superior of the French Oratory; Tariisse, superior of the Benedictines of Saint-Maur; Bourdoise, superior of Saint-Nicolas, and many more. It cannot be denied that these men were at first attracted by Saint-Cyr's affectation asceticism, but when they understood his true aim they resented from him. The terse expression applied in the Roman Breviary to St. Vincent de Paul, Sensit simul et exhorruit (he shuddered on hearing), could be said of them all, with the exception of Bérulle and Arnauld d'Andilly. Bérulle never shared the errors of Duvergier and Jansen, but, being indebted to these two for the establishment of the French Oratory in the Netherlands, he failed to detect their real purpose and gave them a hold on his order which they never released. Owing to his Gallicanism and strong prejudices against the Jesuits, Arnauld d'Andilly fell an easy prey to Saint-Cyr's wiles and deceptions, and even brought with him the whole Arnauld family, along with the Bernardine nuns of Port-Royal (q. v.). Adroitly and persistently Saint-Cyr pushed his way into this celebrated monastery, id.d, in 1636, he became its sole director. Not content with his innovations and rigourous zeal eagerly accepted by the nuns, but Port-Royal became the centre of Jansenism, drawing a host of ecclesiastics, lawyers, writers, etc., all vying with one another to place themselves under the "spiritual domination" of the Abbé de Saint-Cyr. His incredible success and nefarious work are well described by M. Sépet (in Rev. des quest. hist., xlv, 534): "Taking advantage of the moral enthusiasm aroused by the religious awakening, an ardent and sombre sectarian, Saint-Cyr undertook to win souls over for the proud doctrine of absolute predestination to everlasting Damnation, and to put an end to this system of rigourism to which the initiated easily accommodated themselves, while simple-hearted folk like Pascal risked life and reason in its practice."

Saint-Cyr was at the summit of his influence when a pamphlet sent him (1638) to the dnr of Vincennes. His incarneration has been variously explained both by friends and enemies. Richelieu gave the true reason when he said: "Saint-Cyr is more dangerous than six armies. If Luther and Calvin had been arrested when they began to dogmatize, much mischief would have been spared the nations."

(See Marandé, "Inconvenients d'état procédant du Jansénisme", Paris, 1653.) Jansenists writers unduly insist on the rigour of Saint-Cyr's captivity. As a matter of fact, he was given liberty enough to receive his friends, to read the first printed copy of "Augustinus", to collaborate with Antoine Arnauld on the "Fréquente Communion", published in 1643, to write his "Théologie familière" and the voluminous "Lettres chrétiennes et spirituelles", and even to make new recruits. In 1645, after Richelieu's death, Saint-Cyr recovered his liberty and returned in triumph to Port-Royal. The triumph, however, was clouded by the announcement that the "Augustinus" had been condemned at Rome. When the author heard of the condemnation he angrily protested that "Rome was going too far and ought to be taught a lesson"; a stroke of apoplexy, however, carried him off before he could execute his threat. Pierre de Pons, parish priest of Saint-Jacques-du-Haut-Pas, was incriminated by Rapin (Hist. du Jans., p. 305), testified that Saint-Cyr died while being anointed, but had asked for neither absolute nor Viaticum, notwithstanding a certificate to the contrary, delivered by Mulse, when imported and bixed by the Jansenists.

Saint-Cyr was a prolific writer. His manuscripts, seized at the time of his arrest, formed no less than thirty-two thick folios. Amid the numerous writings ascribed to him by the "Dictionnaire des livres Jansénistes" (Antwerp, 1755), it is difficult to distinguish his genuine works, for he generally wrote anonymously, or under a false name, and intermixed them with others. Apart from two frivolous pamphlets written by Duvergier in his youth, "Question royale" (Paris, 1699), an apology for suicide under certain circumstances, and "Apologie pour . . . de Rochepeaux" (Poitiers, 1615), a thesis in which he shows that bishops have a right to use arms, his principal works are: (1) "Sommes des fautes du P. Garasse" (Paris, 1626), with several additional pamphlets in support of it; the book itself was a vile attack on the Jesuits on occasion of a somewhat inaccurate book written by one of them, Father Garasse; (2) "Petrus Aurelius de hierarchia ecclesiastica" (Paris, 1631), written in collaboration with Duvergier's nephew, Barcoas, and others. This book purports to be a defence of Richard Smith, vicar Apostolic in England, against the alleged machinations of the English Jesuits; in fact it aims at winning over to the Jansenist error the Catholic hierarchy whose prerogatives it exaggerates to the detriment of the Roman See. The scientific portion of it is taken from the "De republica christianæ" (1617) of the apostate Mare Antonio de Dominis; the rest consists mainly of a kind of storm-centre, was clouded by Father Garasse, and the clergy of France, taken by surprise, paid the expenses of the book but later ordered Saint-Marthe's eulogy of Duvergier expunged from the "Gallia Christiana". (3) "Chapelet secret du très Saint-Sacrement" (Paris, 1632), a series of Quietist remarks on the attributes of Christ. This booklet, having become a kind of storm-centre, was at once repudiated by Saint-Cyr who nevertheless wrote several tracts in its defence. (4) "Théologie familière" (Paris, 1642), a series of theological devotional tracts, the Jansenists' catechism, teeming with errors on nearly every subject, condemned by the Holy Office on 23 April, 1656. (5) "La collaboration nes et spirituelles" (Paris, 1645); another series (Paris, 1774). Bossuet calls them dry and over-wrought (spiritualité sèche et alambiquée). With the "Théologie familière" they exhibit a fair specimen of Saint-Cyr's galimatias and obscure asceticism. Saint-Cyr's writings were collected in his "Oeuvres" (Lyons, 1679).

Besides a mass of unreliable Jansenist memoirs, e. g. by Lancelot (Utrecht, 1738), Du Fossé (Utrecht, 1729), Arnauld d'Andilly, etc. (Utrecht, 1754), and J. P. A. de M. Du Verger de Hamme, ed. Guérin (Cologne, 1702); Saint-Cyr in Dict. des Jansénistes, ed. Migne (Paris, 1847); Rapin, Hist. du Jansénisme (Paris, 1865); Irem,

J. F. SOLlier.

Duvernay, Ludger, a French-Canadian journalist and patriot, b. at Vercheres, Quebec, 22 Jan., 1795; d. at Burlington, 29 Nov., 1852. A printer by trade, he founded and edited successively at Three Rivers, Quebec, "La Gazette des Trois-Rivières" (1817), "Le Constitutionnel" (1823), and "L'Argus" (1826). In 1827, with A. N. Morin, he founded in Montreal "La Minerve", one of the prominent papers of French Canada. He was imprisoned (1852) for protesting with Dr. Daniel Tracey, editor of the "Vindicatore", against the arbitrariness of the Legislative Council. A medal was presented him in acknowledgment of his devotedness to the public good. Duvernay's chief title to fame is the foundation of the Society of St. John the Baptist (1834). The choice of the Prefect for the patron saint of the French-Canadians accorded with a time-honoured tradition mentioned in the essay "Relations" (1646) as contemporary with the beginning of New France and inherited from the mother country. The maple leaf, now accepted by Canadians of every origin, was chosen as the national emblem and the motto adopted by Duvernay was: "Notre langue, nos institutions et nos lois". Elected for Lachenaie in 1837, he was forced to leave the country for participating in the Canadian Rebellion, and he took up his residence at Burlington, Vermont, where he founded "Le Patriote Canadien" (1840). The union of the two Canadas having been voted by the British Parliament and the principle of representative government adopted, peace was restored and political exiles were allowed to return. Duvernay began again the publication of "La Minerve", in which he extolled the introduction of responsible government, and criticized the Act of Union, destitute of its authors, to absorb Lower Canada. Duvivier, Molier, 1838; Le Jour. de Quebec (Dec. 1822); Chouinard, Fête Nat. des Canad. fran. (Quebec, 1831).

LIONEL LINDSAY.

Dyck, Antoon (Antong Van Dyck), usually known as Sir Anthony Van Dyck, Flemish portrait-painter, b. at Antwerp, 22 March, 1599; d. in London, 9 December, 1641. This great painter was the seventh child of a family of twelve, being the son of Frans Van Dyck, merchant in silk, linen, and kindred materials, and of Maria, daughter of Dirk Cuypers and Catharina Connex. While still a boy he was placed, on the advice of Jan Brueghel, as a pupil in the studio of Hendrick Van Balen, who had been a pupil of Rubens. The youth artist's development as a painter was rapid, for it is recorded that at the age of fourteen he painted a portrait of an old man, and a lawsuit in 1600 revealed the fact that he was over quite a youth a series of heads exceedingly well painted. A proof of his skill is the fact that in 1618, before he was twenty, he was admitted to the freedom of the guild of St. Luke in Antwerp, an unusual distinction for a youthful painter. The tradition that Van Dyck was apprenticed to Rubens or was over his pupil must be dismissed. Investigations have proved that he was regarded as a master in his art when he was introduced to the studio of Rubens. Here Van Dyck made one of the group of young men who assisted the master in his decorative works, which it would have been quite impossible for him to complete by himself.

In 1620, at the request of the Countess of Arundel, Van Dyck appears to have come to England and to have received commissions from James I for which he was paid in February, 1621. After executing these orders he returned to Antwerp and then determined to visit Italy, leaving in October, 1621, and remaining abroad for five years. He spent some time at Genoa, moved on to Rome, and then visited Florence; from here he went to Bologna, and later by way of Mantua to Venice. After this he was at Milan and finally in 1625 in Rome. The records of this journey remain in the famous "Chatsworth Sketch Book". His life in Rome was unsatisfactory, for he made many enemies, and soon left the Eternal City and settled in Genoa, where he was exceedingly popular. His portraits of the great nobility of Genoa rank among the finest in the world and form a magnificent and unrivalled series. In 1624 he visited Palermo, painting the portrait of Emmanuel of Savoy, Viceroy of Sicily, and some church pictures, but returned to Genoa and in 1626 left for Antwerp, probably on account of some complications with regard to the division of his father's estate. He visited Aachen and is believed to have gone on to Paris, while tradition states that he made a second visit to England. However, nothing definite is known of his movements until 1630 when he was at The Hague, and shortly afterwards back in his native town. Another tradition, which speaks of the rivalry between Rubens and Van Dyck, has to be discredited. Mr. Lionel Cust and others have shown that the two painters were not only on terms of equal respect and cordial friendship existed between them.

In 1632 Van Dyck went again to England and was graciously received by Charles I. He appears to have passed into the king's service immediately, as a warrant was issued on 21 May, 1632, for the payment of
an allowance to him, and a residence given him in Blackfriars. He had also a summer residence in the palace of Eltham, was knighted on 5 July, presented with a chain and medall of great value, and granted a pension of £200 a year to be paid quarterly. From the moment of his royal connexion his success was assured as a portrait-painter in England. The king and queen sat to him frequently, and he was overwhelmed with commissions. In 1634–5 he received a pressing invitation to visit the court at Brussels and accepted it, but in 1638 he was back at Antwerp and in the same year returned to London, taking again his position as portrait-painter to Charles I and to Henrietta Maria. Of the king he painted no less than thirty-six portraits and about twenty-five of Queen Henrietta Maria, but perhaps the most beautiful works executed for the royal family were those in which he depicted the children of the royal pair. To this period belong the wonderful portraits of the English aristocracy to be found in so many of the great English houses. He prepared a scheme for decorating the walls of the banqueting-house at Whitehall, the sketches for which still exist, but the royal exchequer could not afford the work. In 1640 he returned to Antwerp. Rubens having left and Van Dyck was acknowledged the head of the Flemish School and entertained with great magnificence. He was disposed to settle permanently at Antwerp, but first went to Paris, desiring to obtain the commission to decorate the gallery of the Louvre. The commission, however, given to French artists and Van Dyck returned to London for a while, later on in the year, however, visiting Antwerp and Paris, and then coming back to London. When he arrived his health was in a critical condition, and despite the attentions of the royal physician he died at his house in Blackfriars eight days after his wife had given birth to a daughter. He was buried in St. Paul's Cathedral, and a monument was erected to his memory by order of the king, but the grave and monument perished with the cathedral in the great fire of 1666.

In the opinion of Van Dyck he is the greatest artist of Europe after Titian, and in works of decorative splendour perhaps only rivalled by Rubens. He was a man of luxurious and somewhat indolent habits, ambitious, proud, sensitive, and quick to take offence. In his portraits the elegance of the composition, the delicacy of the handling of the head, the purity of his colouring, and the strong lifelike quality of expression give him the very highest position, and he is one of the few painters whom all critics have placed in the front rank. In a consideration of his art the brilliant and vigorous etchings must not be overlooked.

DYMPNA

Dympna (Dymnpa), Saint, virgin and martyr. The earliest historical account of the veneration of St. Dympna dates from the middle of the thirteenth century. Under Bishop Guy I of Cambrai (1238–47), Pierre, a canon of the church of Saint-Aubert at Cambrai, wrote a "Vita" of the saint, from which we learn that she had been venerated for many years in a church at Gheel (province of Antwerp, Belgium), which was dedicated to her. The author expressly states that he has drawn his biography from oral tradition. According to the narrative Dympna, the daughter of a pagan king of Ireland, became a Christian and was secretly baptized. After the death of her mother, who was of extraordinary beauty, her father desired to marry her to a very beautiful girl but she preferred a religious life with the priest Gerebernus and landed at Antwerp. Then they went to the village of Gheel, where there was a chapel of St. Martin, beside which they took up their abode. The messengers of her father, however, hearing of this, destroyed the chapel. Their mother took herself thither and renewed her offer. Seeing that it was in vain, he commanded his servants to slay the priest, while he himself struck off the head of his daughter. The corpses were put in sarcophagi and entombed in a cave, where they were found later. The body of St. Dympna was buried in the church of Gheel and the bones of St. Gerebernus were transferred to Xanten. This narrative is without any historical foundation, being merely a variation of the story of the king who wanted to marry his own daughter, a motif which appears frequently in popular legends. Hence we can only treat it as if it was the history of the St. Dympna and the time in which she lived. That she is identical with St. Damhna of Ireland cannot be proved. There are at Gheel fragments of two simple ancient sarcophagi in which tradition says the bodies of Dympna and Gerebernus were found. There is also a decorative brick, said to have been found in one of the sarcophagi, bearing two lines of letters read as Dympna. The discovery of this sarcophagus with the corpse and the brick was perhaps the origin of the veneration. In Christian art St. Dympna is depicted with a sword in her hand and a lettered devil at her feet. Her feast is celebrated 15 May, under which date she is also found in the Roman martyrology.

From time immemorial, the saint was invoked as patroness against insanity. The Bollandists have published numerous accounts of miraculous cures, especially between 1604 and 1668. As a result, there has long been a colony for lunatics at Gheel; even now there are sometimes as many as fifteen hundred, whose relatives invoke St. Dympna for their cure. The insane are treated in a peculiar manner; it is only in the beginning that they are placed in an institution for observation; later they are given to the good works of the inhabitants, take part in their agricultural labours, and are treated very kindly. They are watched without being conscious of it. The treatment produces good results. The old church of St. Dympna in Gheel was destroyed by fire in 1849. The new church was consecrated in 1852 and is still standing. Every year on the feast of the saint and on the Tuesday after Pentecost numerous pilgrims visit her shrine. In Gheel there is also a fraternity under her name. For an interesting account of Gheel, see Mrs. Byrne, "The City of the Simple" (London, 1889).
DYNAMISM

Dynamism, a general name for a group of philosophical views concerning the nature of matter. However, they may be in other respects, these all views agree in making matter consist essentially of simple and indivisible units, substances, or forces. Dynamism is sometimes used to denote systems that admit only matter and extension, but also determinations, tendencies, and forces intrinsic and essential to matter. More properly, however, it means exclusive systems that do away with the dualism of matter and force by reducing the former to the latter. Here we shall limit ourselves to this strict form of dynamism, first, indicating its chief advocates and its characteristic positions, secondly, comparing these in order to see the points of agreement and of difference.

I. We have but a vague and incomplete knowledge of the doctrines held by the Pythagorean School, but it seems that they may rightly be considered as at least the forerunners of modern dynamism. From a premetaphysical viewpoint the Pythagoreans, imbued with a mathematical spirit and accustomed to mathematical methods, came to look upon the principles (δύναμις) of numbers as the principles of things themselves, to assert that the elements (ἄτομα) of numbers were also the elements of reality, and that the whole heaven was a number. Various geometrical figures are but different combinations of numbers, the unit being a point; from points are formed lines, from lines, surfaces, and from surfaces, solids; and geometrical figures are the very substance of things. Hence, finally, "physical bodies are composed of numbers." Among the Arabphilosophers, the Mu'tazilim were atomists. The atom is the only substance, and all atoms are perfectly identical in nature. The identity, however, is not of a positive, but of a merely negative character, for these primitive elements of matter are mere simple substances and nothing else. They have no determinations, but the points of the points, however, no weight, no shape, no quantity, no extension. The atom is an indivisible and simple substantial point, the necessary subject of all accidents or determinations, and incapable of existing without them. Leibniz's doctrine is a reaction against both the material mechanicism of Descartes and the substantial monism of Spinoza. The essence of matter cannot be extension. The laws of mechanics cannot themselves be understood without using the notion of force. Moreover, "a substance is a being capable of action," and "what does not act does not deserve the name of substance." Hence substance implies unity and individuality, and the real substance cannot be the "material" atom (phyle de matière). Having extension, such an atom is composed of parts and divisible without limit; it has no real unity. The elements which compose material substances are simple substances, and "material" atoms (atoms de substance), simple and without parts. They are called monads. Bodies are "multitudes" and "aggregates," and the simple substances are units and elements. As they have no parts, monads have neither extension, nor shape, nor possible divisibility. They are the true atoms of nature, and a word, the elements of things." Since it is impossible for two beings to be perfectly alike, every monad is different from every other. Monads have no external, but only an internal, activity, which is twofold: perception and apposition. All monads are, in various degrees, representations of the whole universe, but this representation or perception becomes clearly conscious (apprehension), and is accompanied with attention, memory, and reflection, only in higher monads. Apperception is the activity of the internal principle by which the passage from one perception to another is effected. The more relative perfectness of the monads depends upon the degree of clearness of their perceptions. Some unite to form an organism whose centre of unity is a higher monad or soul. This system is completed by the supposition of a pre-established harmony. The order and harmony of the world are the result not of an interaction between monads, but of a pre-determined plan out of the Creator who has endowed them with their power of internal evolution. In the main, Christian Wolff reproduced and systematized Leibniz's theory.

According to Boscovich (q. v.), "the first elements of matter are points absolutely indivisible and without any extension. They are spread throughout an immense vacuum in such a way as to be always at some distance from one another. The distance may increase or decrease indefinitely, but can never disappear completely without a compensation of the points themselves, for contact between them is impossible." (The Phil. Trans. no. 79, p. 232.) There be no continuous extension. The elements are all homogeneous, and, by their numbers, distances, arrangements, activities, and relationships produce the diversity of material substances. They have no perception and no apperception. According to their distances, forces may have a determinate tendency to diminish or increase, the interval that separates them. This very determination Boscovich calls force, attractive in the former case, repulsive in the latter. The law of these forces is the following: if the distance between them is infinitesimal, they are repulsive, and the more so in the proportion as the distance is smaller. However, although remaining always very small, is increased a little, the repulsive force becomes first less intense, then null, and at a still larger distance is changed into an attractive force. This attraction again, with the increase of distance, goes on augmenting, till it becomes again null, and changes into a repulsion, which, in turn, by the same gradual process, becomes attraction. Such changes may be repeated several times, but only while the distance, though increasing, remains infinitesimal. At greater distances the force is exclusively attractive. To explain the interaction of the monads Leibniz admits the possibility of a Divinely pre-established harmony and even of occasionalism.

In his pre-critical period, Kant admitted physical monads, that is, simple and indivisible substances. His later views may be summed up as follows: matter is divisible without limit, but not actually divided into separate atoms. Matter is what fills up a space, and to fill up a space is to defend it against any mobile which should try to penetrate it. Hence matter is essentially resistance and force. It is not impenetrable, in the absolute or mathematical sense of the Cartesians, but in a relative sense and in varying degrees; it may be compressed and condensed. There are two distinct forces, repulsion and attraction. The former is the primary constituent of matter, since by it other things are excluded from the space it occupies. It produces the exclusion, and, without it, matter could not be attributed to a geometrical point. However, attraction is also essential to the occupancy of an assignable space, for otherwise matter would be scattered without limit. Repulsion can act only by contact; attraction may also act at a distance. From these two forces Kant derives all the properties of matter. It is, however, remembered that this theory is not in contradiction of the phenomenon only, the noun men being inaccessible to our mind. This idealistic feature was carried still further by the German Transcendentalists; among them Schelling proposes a view the main lines of which agree with that of Kant. In more recent times,
DYNAMISM

Herbert, Lotze, von Hartmann, Renouvier, to mention only a few names among many, also hold dynamic theories modified by their special points of view and philosophical systems. To these may be added some Catholic philosophers, e.g. the Sulpanian Branchereau, and the Jesuits Carbonnelle and Pii. Among scientists, Ampère, Cauchy, Faraday, and others are also in favour of dynamism. Faraday's theory is substantially the same as that of Bosovitch. That theory, namely, that "atoms . . . are mere centres of forces or powers, not particles of matter in which the powers themselves have "a great advantage over the more usual notion". "A mind just entering on the subject may consider it difficult to think of the powers of matter independent of a separate something to be called the matter, but it is certainly far more difficult, and indeed impossible, to think of or imagine that matter independent of the powers. Now the powers we know and recognize in every phenomenon of the creation, the abstract matter in none; why, then, assume the existence of that of which we are ignorant, which we cannot conceive, and for which there is no philosophical necessity?" (A Speculation touching Electric Conduction and the Nature of Matter, pp. 290, 291).

To-day there is a tendency to substitute the concept of energy for that of force. Hence Professor Ostwald's "energetic theory". Matter is to be looked upon as a complex of energies arranged together in space. The collective matter resolves itself into that of these energies, so that the manifestations of energy are all we know of the external world. Energy is the common substance, for it is that which exists in space and time; it is also the differentiating principle of whatever exists in space and time. Recent scientific discoveries, especially in the field of radio-activity, strengthen philosophical reason and lead to a more specific dynamism. The atom (q. v.) can no longer be considered as being what its name implies, namely indivisible. Atoms of different chemical elements are spheres of positive electrification enclosing a number of corpuscles, all homogeneous, having identical properties, and negatively electrified. Some physiologists still attribute to these corpuscles a real, though infinitesimal, extension; they admit a nucleus or carrier of the electric charge, and this nucleus alone is what we call matter. But this is denied by others for whom the carrier has nothing material; they hold that the mass and inertia of the corpuscle is identical with the self-induction of the electric current, and the mass results from the velocity of the current. It has been calculated that the whole mass and inertia of the corpuscle are accounted for by its electrical charge alone and its velocity. Hence the name "electron" given to the corpuscle; it is the ultimate unit of so-called matter. This is known as the electronic theory of matter.

II. The preceding outline shows that the term dynamism, like all other general names of philosophical systems, is very vague, and applies to a number of what are called homogeneous manifestations nothing material; commonly they are considered as being what we call matter. But this is denied by others for whom the carrier has nothing material; they hold that the mass and inertia of the corpuscle is identical with the self-induction of the electric current, and the mass results from the velocity of the current. It has been calculated that the whole mass and inertia of the corpuscle are accounted for by its electrical charge alone and its velocity. Hence the name "electron" given to the corpuscle; it is the ultimate unit of so-called matter. This is known as the electronic theory of matter.

DYSIBOD. See DISIBOD, SAINT.
Eadfrid, Bishop of Lindisfarne. See Cuthbert, Saint; Lindisfarne Gospels.

Eadmer, precentor of Canterbury and historian, b. 1064 (?); d. 1124 (?). Brought up at Christ Church ab infantes, he became after St. Anselm's consecration, in 1079, his intimate companion. After Anselm's death he was his chief occupation was writing. He had made notes of the saint's doings and discourses and of the affairs in which he had been engaged, and from these he compiled his chief works, the "Historia Novorum" and the "Vita S. Anselmi" (ed. M. Rule, 1884, in Rolls Series). Eadmer's "Opuscules" comprise verses on Sts. Dunstan and Edward, the lives of Sts. Wilfrid, Osuo, Dunstan, Oswald, Bregwin (printed in Wharton, Anglia Sacata). Of his theological works the most noteworthy is the "De conceptione Sancte Mariæ", a tract of much importance for the development of the doctrine of the Immaculate Conception (see Thurston's ed., Freiburg, 1904, and "The Month", July and August, 1904, for the discussion of the date of his death). In 1113 he was elected to the See of St. Andrews, but by refusing to be ordained except by the Archbishop of York, he put an insuperable bar to his own promotion.

Notices of this important writer are found in all treatises on English and on ecclesiastical writers. Besides the works cited above, see: Liiermann, Ungezähle anglo-normannische Geschichtsquellen (Strasbourg, 1879); Paschen, Eadmer (Paris, 1892).

J. H. Pollien.

Eanbald, the name of two Archbishops of York.

Eanbald I, date of birth unknown; d. 10 August, 796. Most of his life was probably spent in the monastery of York. As one of the officials in the monastery, he, conjointly with Alcuin, superintended the rebuilding of the minster. Albert, in his declining years, chose Eanbald to be his coadjutor and successor. He succeeded to the archbishopric in 782 (some say 778). His first care was to obtain the pallium and Alcuin went to Rome to bring it; on his return Eanbald was solemnly confirmed in his office. He lived in troubous times. Nevertheless Eanbald carried on the School of York and treasured its great library. In August, 791, he consecrated Baldulf Bishop of Whithorne. His last public act was on 25 June, 796, when he crowned Eadulf King of Northumbria. He died at the monastery of Etete or Edete. His body was taken to York and buried in the minster.

Eanbald II, date of birth unknown; d. 810 or 812. He received his education in the famous School of York where he was Alcuin's pupil. On the death of Eanbald I he was chosen his successor. On 8 Sept., 797, having received the pallium from Rome, he was solemnly confirmed in the archbishopric.

He assisted Ethelard, Archbishop of Canterbury, to recover the prerogatives of which he had been despoiled by Offa. In 798 he assembled his clergy in synod at Pinchenheale (Fincnhale, near Durham) and there enacted a number of wise regulations relating to the ecclesiastical courts and the observance of Easter. Some think he was the author of a volume of decrees and that he was the first to introduce the Roman Ritual in the church of York.

Law, particularly in the paschal lamb, which was eaten towards evening of the 14th of Nisan. In fact, the Jewish feast was taken over into the Christian Easter celebration; the liturgy (Exsultet) sings of the passing of Israel through the Red Sea, the paschal lamb of fire, etc. On the part, however, of the Jewish feast, the Christians would have celebrated the anniversary of the death and the Resurrection of Christ. But for such a feast it was necessary to know the exact calendar date of Christ's death. To know this date was very simple for the Jews: it was the day after the end of the first month, the 15th of Nisan, of their calendar. But in other countries of the vast Roman Empire there were other systems of chronology. The Romans from 45 B.C. had used the reformed Julian calendar; there were also the Egyptian and the Syro-Macedonian calendar (see Calendar). The foundation of the Jewish calendar was the lunar year of 354 days, whilst the other systems depended on the solar year. In consequence the first days of the Jewish months and years did not coincide with any fixed days of the Roman solar year. Every fourth year of the Jewish system had an intercalary month. Such a month was inserted in order to adjust the scientific method or some definite rule, but arbitrarily, by command of the Sanhedrin, a distant Jewish date can never with certainty be transposed into the corresponding Julian or Gregorian date (Ideler, Chronologie, I, 570 sq.). The connexion between the Jewish and Christian Pasch explains the movable character of this feast. Easter has no fixed date, like Christmas, because the 15th of Nisan of the Semitic calendar was shifting from date to date on the Julian calendar. Since Christ, the true Paschal Lamb, had been slain on the very day when the Jews, in celebration of the Passover, immediately after the figure the lamb, the Jewish Christians in the Orient followed the Jewish method, and commemorated the death of Christ on the 15th of Nisan and His Resurrection on the 17th of Nisan, no matter on what day of the week they fell. For this observance they claimed the authority of St. John and St. Philip.

In the rest of the empire another consideration predominated. Every Sunday of the year was a commemoration of the Resurrection of Christ, which had occurred on a Sunday. Because the Sunday after 14 November was the historical day of the Resurrection, at Rome this Sunday became the Pasch. Hence the first Sunday after Easter was celebrated in Rome and Alexandria on the first Sunday after the first full moon after the spring equinox, and the Roman Church claimed for this observance the authority of Sts. Peter and Paul. The spiritual Pasch in Rome fell on 25 March; in Alexandria on 21 March. At Antioch Easter was kept on the Sunday after the Jewish Passover. (See Easter Controversy.) In Gaul a number of bishops, wishing to escape the difficulties of the paschal computation, seem to have assigned Easter to a fixed date of the Roman calendar, celebrating the death of Christ on 25 March, His Resurrection on 27 March (Marinus Dumiensis in P. L., LXXII, 47–51), since already in the third century 25 March was considered the day of the Crucifixion (Computus Pseudocyprianus, ed. Lersch, Chronologie, II, 61). This practice was of short duration. Many calendars of the Middle Ages contain these same dates (25 March, 27 March) for purely historical, not liturgical, reasons (Grotorfend, Zeitrechnung, II, 46, 60, 72, 106, 110, etc.). The Montanists in Asia Minor kept Easter on the Sunday after 6 April (Schmidt, Osterfesteuberechnung in der antiken Kirche). The Council of Constance (325) decreed that the Roman practice should be observed throughout the Church. But even at Rome the Easter term was changed repeatedly. Those who continued to keep Easter with the Jews were called Quartodecimans (14 Nisan) and were excluded from the Church (see Quartodecimans). The computus paschalis, the method of determining the date of Easter and the dependent feasts, was of old considered so important that Durandus (Rit. div. off., 8, c. i) declares a priest unworthy of the name who does not know the computus paschalis.

The movable character of Easter (22 March to 25 April) gives rise to inconveniences, especially in modern times. For decades scientists and other people have worked in vain for a simplification of the computus, assigning Easter to the first Sunday in April or to the Sunday nearest to the 7th of April. Some even wish to put every Sunday to a certain date of the month, e.g. beginning with Sunday after Easter (Pascha) on a Sunday, etc. [See L. Günther, "Zeitschrift Weltall" (1903); Sandhage and P. Dueren in "Pastor bonus" (Trier, 1906); C. Tondini, "L'Italia e la questione del 'caldario' " (Florence, 1905).]

The Easter Office and Mass.—The first Vespers of Easter are connected now with the Mass of Holy Saturday, because that Mass was formerly celebrated in the evening (see Holy Saturday); they consist of only one psalm (exulvi) and the Magnificat. The Matins have only one Nocturn; the Office is short, and busy with the reconciliation of sinners, and the distribution of alms, which were given plentifully by the rich on Easter Day. This peculiarity of reciting only one Nocturn was extended by some churches from the octave of Easter to the entire paschal time, and soon to all the Paschal period and the entire ecclesiastical year. This observance is found in the German Breviaries far up into the nineteenth century ("Brev. Monaster," 1830; Bäumer, "Brevier," 312). The octave of Easter ceases with None of Saturday and on Sunday the three Nocturns with the Matins and Vespers of Easter Day are omitted. Many churches, however, during the Middle Ages and later (Brev. Monaster., 1830), on Low Sunday (Dominica in Albis) repeated the short Nocturn of Easter Week. Before the usus Romane Curiae (Bäumer, Brev., 319) was spread by the Franciscans over the entire Church the eighteenth (or twenty-four) psalms of the regular Sunday Matins were, three by three, distributed over the Matins of Easter Week (Bäumer, 301). This observance is still one of the peculiarities of the Carmelite Breviary. The simplified Breviary of the Roman Curia (twelfth century) established the custom of repeating the first three psalms of each of the following days: Pascha, March (Monday—Thursday), the first day of the octave, to Saturday, the first day of the second octave, to Sunday, the first day of the third octave. From the ninth to the thirteenth century, in most dioceses, during the entire Easter Week the two precepts of hearing Mass and of abstaining from servile work were observed (Keller, Heortologie, 17); later on this law was limited to certain days (Monday and Tuesday), and, since the end of the eighteenth century, to Monday only. In the United States even Monday is no holiday of obligation. The first three days of Easter Week are doubles of the first class, the other days semi-doubles. During this week, in the Roman Church, through immemorial custom the hymns are omitted, or rather were never inserted. The ancient ecclesiastical Office contained no hymns, and out of respect for the great solemnity of Easter and the ancient jubilus "Hae Dies", the Roman Church did not touch the old Easter Office by the new, but kept the old. Hence the Easter Office of the Eastern Church consists only of psalms, antiphons, and the great lessons of Matins. Only the "Victimae Paschali" was adopted in most of the churches and religious orders in the Second Vespers. The Mozarabic and Ambrosian Offices use the Ambrosian hymn "Vexilla regni passus ille" in Lauds and Vespers, the Monastic Breviary, "Ad cænum Agni providi" at Vespers, "Chorus novæ Jerusalem" at Matins, and "Aurora lucis rutilat" at Lauds. The Monastic Breviary has also three Nocturns on Easter Day. Besides the hymns the chapter is omitted and the Little Hours have no antiphons; the place of the hymns,
The Masses of Easter Week have a sequence of dramatic character, "Victima paschali", which was composed by Vipo, a Burgundian priest at the courts of Conrad II and Henry III. The present text is derived from the longer Preface of the Gregorian Sacramentary. The "Communicaentes" and "Hanc igitur" contain references to the solemn baptism of Easter Eve. To the "Benedicamus Domino" of Lauds and Vespers and to the "Ite Missa est" of the Mass two alleluias are added during the entire octave. Every day of the Easter Mass; an old MS. Spanish missal of 855 contains three Masses for Easter Sunday; the Gallican missals have two Masses for every day of the week, one of which was celebrated at four in the morning, preceded by a procession (Migne, La Liturgie Catholique, Paris, 1863, p. 952). In the Gelasian Sacramentary every day of Easter Week has its own Preface (Probst, Sacramentarien, p. 226).

To have a correct idea of the Easter celebration and its Masses, we must remember that it was intimately connected with the solemn rite of baptism. The processional acts connected with the liturgical services were habits which made the cere- monies transferred to the morning hours of Holy Saturday. This change, however, did not produce a new liturgical creation adapted to the new order of things. The old baptismal ceremonies were left untouched and have now, apparently, no other reason for preservation than their antiquity. The gap left in the liturgical services after the solemnities of the night had been transferred to the morning of Holy Saturday was filled in France, Germany, and some other countries by a twofold new ceremony, which, however, was never adopted in Rome. "First, there was the commemoration of the Resurrection of Christ. At midnight, before Matins, the clergy in silence entered the dark church and removed the cross from the sepulchre to the high altar. Then the candles were lit, the doors opened, and a solemn procession was held with the cross through the cloister or cemetery. Whilst the procession moved from the altar to the door, the beautiful old antiphon, "Cum rex gloriae", was sung, the first part softly (humili ac depressa voce), to symbolize the sadness of the souls in limbo; from "Adveniunt desiderabilia" the singers raised their voices in jubilation whilst the acolytes rang small bells which they carried. The full text of this antiphon, which has disappeared from the liturgy, follows:

Cum rex gloriae Christus inermem debellatus intraret; et chorus angelicus ante faciem ejus portas principum tollit praecipitam, sanctorum populumque sanctorum in corpore victum vocem victoriae clamabat diœces: Adveniunt desiderabilia, quae spectabilissimum in tenebris, ut educerentur noce neque vinculatos de clausuro. Te nostra vocabant suspiria, ut larga requirantem lamento, tu facias eum spes desperati, magna consolatio in tormentis.

When the procession returned, in many churches the "Attolite portas" (Ps. xxiii) was sung at the door, in order to symbolize the victorious entry of Christ into limbo and hell. After the procession Matins were sung. In later centuries the Blessed Sacrament took the place of the cross in the procession. The ceremony is, with the approval of the Holy See, still held in Germany on the eve of Easter with simpler ceremonies, in the form of a popular devotion. Second, the visitation of the Sepulchre. After the third lesson of the Nocturn two clerics, representing the holy women, went to the empty sepulchre where another cleric (angel) announced to them that the Saviour was risen. The two then brought the message to the choir, whereupon two priests, impersonating Peter and John, ran to the tomb and, finding it empty, showed to the people the body laid in the grave. Then the choir sang the "Te Deum" and the "Victima paschali". In some churches, e. g. at Rouen, the apparition of Christ to Mary Magdalen was also represented. Out of this solemn ceremony, which dates back to the tenth century, grew the numerous Easter plays. (Nord-Amerikanisches Pastoralblatt, April, 1907, p. 149, has a lengthy list of these two events.) The Easter plays in the beginning used only the words of the Gospels and the "Victima paschali"; in the course of development they became regular dramas, in Latin or vernacular verses, which contained the negotiation between the vender of unguents and the three women, the dialogue between Pilate and the Jews asking for soldiers to guard the Sepulchre, the contest of Peter and John running to the tomb, the risen Saviour appearing to Magdalen, and the descent of Christ into hell. Towards the end of the Middle Ages these plays became more widely used, and they were filled with long, beautiful, and solemn speeches of salve-dealers, Jews, soldiers, and demons (Creizenach, Gesch. des neun Dramas, Halle, 1893).

The procession combined with the solemn Second Vespers of Easter Sunday is very old. There was a great variety in the manner of solemnizing these services. The service commenced with the Kyrie Eleison, sung as in the Easter Mass, even sometimes with the corresponding trope lux et origo boni. After the third psalm the whole choir went into procession to the baptismal chapel, where the fourth psalm, the "Victima paschali", was sung; thence the procession moved to the great cross at the entrance to the sanctuary (choir), and from there, after the fifth psalm and the Magnificat were sung, to the empty sepulchre, where the services were concluded. The Carmelites and a number of French churches, e. g. Paris, Lyons, Besançon, Bayeux, Laval, have, with the permission of the Holy See, retained these solemn Easter Vespers since the re-introduction of the Roman Breviary. But they are celebrated differently in every diocese, very much modernized in some churches. At Lyons the Magnificat is sung three times, at Cologne and Trier the solemn Vespers of Easter were abolished in the nineteenth century (Nord-Amerikanisches Pastoralblatt, April, 1907, p. 50). Whilst the Latin Rite admits only commemorations of saints in Lauds, Mass, and Vespers from Wednesday in Easter Week and excludes any commemoration on the first three days of the week, the Greek and Russian Churches transfer the occurring Offices (canons) of the saints from Matins to Complin during the entire octave, even on Easter Sunday. After the Anti-passio (Low Sunday), the canons and other canticles of Easter are continued in the entire Office up to Ascension day, and the claims of the saints take only the second place in Matins. Also the Greeks and Russians have a solemn procession at midnight, before Matins, during which they sing at the door of the church Ps. lviii, repeating after each verse the Easter antiphon. When the procession leaves, the church is dark; when it returns, hundreds of candles and coloured lamps are lit to represent the splendour of Christ's Resurrection. After Lauds all those who are present give each other the Easter kiss, not excluding even the beggar. One says: "Christ is risen"; the other answers: "He is truly risen", these words being repeated during Easter time. A similar custom had, through the influence of the Byzantine court, been adopted at Rome for a time. The greeting was: Sierret Dominus vere; R. Et apparuit Simoni. (Maximinianus, Princ. Sax., Præfect. de liturg. Orient., 1, 114; Marteau, De
antiq. Eed. rit., c. xxy. 5.) The Armenian Church during the entire time from Easter to Pentecost celebrates the Resurrection alone to the exclusion of all feasts of the saints. On Easter Monday they keep All Souls’ Day, the Saturday of the same week the Dedication of St. John, the Sunday after the founding of the first Christian Church on Sion and of the Church in general, the fifth Sunday the Apparition of the Holy Cross at Jerusalem, then on Thursday the Ascension of Christ, and the Sunday after the feast of the great Vision of St. Gregory. From Easter to Ascension, he fast nor do they stain from meat (C. Tondini de Quaragni. Calendrier de la Nation Arménienne). In the Mozarabic Rite of Spain, after the Pater Noster on Easter Day and during the week the priest intones the particularus “Regnum” and sings “Vicet Leo de Tribu Juda radix David Alleluja”. The people answer: “Qui sedes super Cherubim radix David. Alleluja” This is sung three times (Missale Mozarab.). In some cities of Spain before sunrise two processions leave the principal church; one with the image of Mary covered by a black veil; another with the Blessed Sacrament. The procession move on in silence every woman wearing a predetermined place; then the veil is removed from the image of Mary and the clergy with the people sing the “Regina Celi” (Guéranger, Kirchenjahr, VII, 166). For the sanctuary at Emmaus in the Holy Land the Holy See has approved a special feast on Easter Mon of the Cana of the laboris manifestation. D. N. I Chr. Hours, Titul. Eccles. dupl. I Cl., with proper Mass and Office (Cal. Rom. Seraph. in Terre S. Custod., 1907).

**Peculiar Customs of Easter Time.**—1. *Ritus Paschalis.*—This strange custom originated in Bavaria in the fifteenth century. The priest inserted in his sermon funny stories which he would cause his hearers to laugh (Ostermärlein), e.g. a description of how the devil tries to keep the doors of hell locked against the descending Christ. Then the speaker would draw the moral from the story. This Easter laughter, giving rise to grave abuses of the word of God, was prohibited by Clement X (1670-1676) and in the eighteenth century by Maximilian III and the bishops of Bavaria (Wagner, De Ritus Paschali, Königsberg, 1705; Linsemeier, Predigt in Deutschland, Munich, 1886).

2. *Easter Eggs.*—Because the use of eggs was forbidden during Lent, they were brought to the table on Easter Day. Coloured red top eggs. This custom is found not only in the Latin but also in the Oriental Churches. The symbolic meaning of a new creation of mankind by Jesus risen from the dead was probably an invention of later times. The custom may have its origin in paganism, for a great many pagans customs, celebrating the return of spring, gravitated to Easter. The egg is the emblem of the germinating life of early spring. Easter eggs, the children are told, come from Rome with the bells which on Thursday go to Rome and return Saturday morning. The sponsors in some countries give Easter eggs to their god-children. Coloured eggs are used by children at Easter in a sort of game which consists in testing the strength of the shells (Krauss, Real-Encyklopädie, s. v. El). Both coloured and uncoloured eggs are used in some parts of the United States for the Easter egg race. The children stand in a line, and the first ones take a single egg and put it in a basket. Then they start running, and the one, who first brings all the eggs to the basket, is the winner. This is called Easter egg race. In France handball playing was one of the Easter amusements, found also in Germany (Simrock, op. cit., 575). The ball may represent the sun, which is believed to take three leaps in rising on Easter morning. Bishops, priests, and monks, after the strict discipline of Lent, used to play ball during Easter week (Beleth, Expl. Div. off., 120). This was called libertas Decem-brica, because formerly in December the masters used to play ball with their servants, maids, and shepherds. The ball game was connected with a dance, in which even bishops and abbots took part. At Auxerre, Provins, etc., the dance was performed to the strains of the “Vietme paschal”. In England, also, the game of ball was a favourite Easter sport in which the municipal corporation engaged with due parade and dignity. And at Bury St. Edmunds, in recent years, the game was kept up with great festivity. After the game the dance a banquet was given, during which a homily on the feast was read. All these customs disappeared for obvious reasons (Kirchenlex., IV, 1414).

3. *In France handball playing was one of the Easter amusements, found also in Germany (Simrock, op. cit., 575). The ball may represent the sun, which is believed to take three leaps in rising on Easter morning. Bishops, priests, and monks, after the strict discipline of Lent, used to play ball during Easter week (Beleth, Expl. Div. off., 120). This was called libertas Decemberica, because formerly in December the masters used to play ball with their servants, maids, and shepherds. In England, also, the game of ball was a favourite Easter sport in which the municipal corporation engaged with due parade and dignity. And at Bury St. Edmunds, in recent years, the game was kept up with great festivity. After the game the dance a banquet was given, during which a homily on the feast was read. All these customs disappeared for obvious reasons (Kirchenlex., IV, 1414).

4. **On the eve of Easter the homes are blessed (Rit. Rom., tit. S. c. iv) in memory of the passing of the angel in Egypt and the signing of the door-posts.**
with the blood of the paschal lamb. The parish priest visits the houses of his parish; the papal apartments are also blessed on this day. The room, however, in which the pope is found by the visiting cardinal is blessed by the pontiff himself (Moroni, Dizionario, s. v. Pasqua).

10. The Greeks and Russians after their long, severe Lent make Easter a day of popular sports. At Constantinople the cemetery of Perse is the noisy rendezvous of the Greeks; there are music, dances, and all the pleasures of an Oriental popular resort; the same custom prevails in the cities of Russia. In Russia anyone can enter the bellies on Easter and ring the bells, a privilege of which many persons avail themselves.

FREDERICK G. HOLWEECK.

EASTER CONTROVERSY.—Ecclesiastical history preserves the memory of three distinct phases of the dispute regarding the proper time of observing Easter. It will add to clearness if we in the first place state what is certain regarding the date and the nature of the controversies.

FIRST PHASE.—The first was mainly concerned with the lawfulness of celebrating Easter on a weekday. We read in Eusebius (Hist. Eccl., V. xxiii): "A question of no small importance arose at that time (i.e. the time of Pope Victor, about A.D. 190). The disciples of all Asia, as from an older tradition, held that the fourteenth day of the moon, on which day the Jews were commanded to sacrifice the lamb, should always be observed as the feast of the life-giving pasch [Δι' της τεταρτης Πασχαλίας], contending that the fast should extend on that day from day to day, week by week, as it might happen to be. However it was not the custom of the churches in the rest of the world to end it at this point, as they observed the practice, which from Apostolic tradition has prevailed to the present time, of terminating the fast on no other day than the first of the Resurrection of Our Lord. The bishops and assemblies of bishops were held on this account, and all with one consent through mutual correspondence drew up an ecclesiastical decree that the mystery of the Resurrection of the Lord should be celebrated on no other day but the Sunday and that we should observe the close of the paschal fast on that day only." These words of the Father of Church History, followed by some extracts which he makes from the controversial letters of the time, tell us almost all that we know concerning the paschal controversy in its first stage. A letter of St. Irenæus is among the extracts referred to, and the diversity of practice regarding Easter had existed at least from the time of Pope Sixtus (c. 120). Further, Irenæus states that St. Polycarp, who, like the other Asiatics, kept Easter on the fourteenth day of the moon, whatever day of the week that might be, following the tradition which he derived from St. John the Apostle, came to Rome c. 150 about this very question, but could not be persuaded by Pope Anicetus to relinquish his Quartodeciman observance. Nevertheless he was not debarred from communion with the Roman Church, and St. Irenæus, while condemning the Quartodeciman practice, nevertheless reproaches Pope Victor (c. 190-99) with having excommunicated the Asiatics too precipitantly and with not having followed the moderation of his predecessor. The question thus debated was therefore primarily whether Easter was to be kept on a Sunday, or whether Christians should observe the fast of the Jews, the fourteenth of Nisan, which might occur on any day of the week. Those who kept Easter with the Jews were called Quartodecimans or τυπονούντες (observers); but even in the time of Pope Victor this usage hardly extended beyond the Churches of Asia Minor. After the pontiff and churchmen the Quartodecimans seem to have gradually dwindled away. Origin in the "Philosophumena" (VIII. xxvii) seems to regard them as a mere handful of wrong-headed nonconformists.

SECOND PHASE.—The second stage in the Easter controversy centres round the Council of Nicea (A. D. 325). Granted that the great Easter festival was always to be held on a Sunday, and was not to be coincident with a particular phase of the moon, which might occur on any day of the week, a new dispute arose as to the determination of the Sunday itself. It was now the text of the decree of the Council of Nicæa (c. 1875), settled, or at least indicated a final settlement of, the difficulty has not been preserved to us, but we have an important document inserted in Eusebius's "Life of Constantine" (III., viii sq.) The emperor himself, writing to the Churches after the Council of Nicea, enjoins them to adopt its conclusions and other things: "At this meeting the question concerning the most holy day of Easter was discussed, and it was resolved by the united judgment of all present that this feast ought to be kept by all and in every place on one and the same day. And first of all it appeared an unworthy thing that in the observance of this most holy feast we should follow the practice of the Jews, who have impiously defiled their hands with enormous sin . . . for we have received from our Saviour a different way . . . And I myself have undertaken that this decision should meet with the approval of your Sugerites in the hope that your Wisdoms will gladly admit that practice which is observed at once in the city of Rome and in Africa, throughout Italy and in Egypt . . . with entire unity of judgment." From this and other indications which cannot be specified here (see, e.g., Eusebius, "De antiquitis evang." pp. 59-58) we learn that the dispute now lay between the Christians of Syria and Mesopotamia and the rest of the world. The important Church of Antioch was still dependent upon the Jewish calendar for its Easter. The Syrian Christians always held their Easter festival on the Sunday after the Jews kept their Pasch. On the other hand at Alexandria, and seemingly throughout the rest of the Roman Empire, the Christians calculated the time of Easter for themselves, paying no attention to the Jews. In this way the date of Easter as kept at Alexandria and Antioch did not always agree for the Jews, upon whom Antioch depended, adopted very arbitrary methods of intercalating embolismic months (see Calendar, Vol. III., p. 158) before they celebrated Nisan, the first spring month, on the fourteenth day of which the paschal lamb was killed. In particular, we learn that they had observed the fast of the Christians of Rome and Alexandria declared they were negligent) of the law that the fourteenth of Nisan must never precede the equinox (see Schwartz, Christliche und jüdische Ostertafeln, pp. 133 sqq.). Thus Constantine in the letter quoted above protests with horror that the Jews had claimed the Pasch in one year, meaning that two Paschs sometimes fell between one equinox and the next.

The Alexandrians, on the other hand, accepted it as a first principle that the Sunday to be kept as Easter Day must necessarily occur after the vernal equinox, then identified with 21 March of the Julian year. This
was the main difficulty which was decided by the Council of Nicea. Even among the Christians who calculated Easter for themselves there had been considerable variations (partly due to the difference of the lunar cycle adopted, partly to a divergent reckoning of the equinox). In the Council of Arles, it had been laid down that in future Easter should be kept \textit{uno die et uno tempore per omnem orbem}, and that to secure this uniformity the pope should send out letters to all the Churches. The Council of Nicea seems to have extended further the piece of laid down. As already stated, we know not its exact words, but we may safely infer from scattered notices that the council ruled: (1) that Easter must be celebrated by all throughout the world on the same Sunday; (2) that this Sunday must follow the fourteenth day of the paschal moon; (3) that this moon was to be accounted the paschal moon whose fourteenth day followed the spring equinox; (4) that some provision should be made, probably by the Church of Alexandria as best skilled in astronomical calculations, for determining the proper date of Easter and communicating it to the rest of the world (see St. Didymus on the Immovable Easter Sunday, \textit{Nig.}, p. 126, and Migne, Pat., \textit{Nig.}, p. 1055). This ruling of the Council of Nicea did not remove all difficulties nor at once win universal acceptance amongst the Syrians. But to judge from the strongly worded canon i of the Council of Antioch (a. d. 341; see Hefele-Lberer, "Concilies", I, 711), as also from the language of the later Syrian Canons (see Schmid, Oesterfrage, p. 63), the Syrian bishops loyally co-operated in carrying into effect the decision of the Council of Nicea. In Rome and Alexandria the lunar cycles by which the occurrence of Easter was determined were not uniform. But it was decided that the council of the hundred-and-twelve-year cycle, as laid down by Hippolytus, adopted an eighteen-year cycle, but neither gave satisfactory results. Alexandria adhered to the more accurate nineteen-year cycle of Meton. But it seems to be clearly established by the most recent researches (see Schwartz, op. cit., pp. 28-29) that the lunar cycles were never understood to be more than aids towards ascertaining the correct date of Easter, also that where the calculations of Rome and Alexandria led to divergent results, compromises were made upon both sides and that the final decision was always laid with accepted ecclesiastical authority.

**Third Phase.**—It was to the divergent cycles which Rome had successively adopted and rejected in its attempt to determine Easter more accurately that the third stage in the paschal controversy was mainly due. The Roman missionaries coming to England in the time of St. Gregory the Great found the British Christians, the representatives of that Christianity which had been introduced into Britain during the period of the Roman occupation, still adhering to an ancient system of Easter-computation which Rome itself had laid aside. The British and Irish Christians were not of Quartodecimans, as some unwarintably accused them of being, for they kept the Easter festival upon a Sunday. They are supposed (e. g. by Krusch) to have observed an eight-year cycle and not the five-hundred-and-thirty-two-year cycle of Victorius which was adopted in Gaul, but also a recently as 314, Pisius, adopted an eighteen-year cycle, but neither gave satisfactory results. Alexandria adhered to the more accurate nineteen-year cycle of Meton. But it seems to be clearly established by the most recent researches (see Schwartz, op. cit., pp. 28-29) that the lunar cycles were never understood to be more than aids towards ascertaining the correct date of Easter, also that where the calculations of Rome and Alexandria led to divergent results, compromises were made upon both sides and that the final decision was always laid with accepted ecclesiastical authority.

Third Phase.—It was to the divergent cycles which Rome had successively adopted and rejected in its attempt to determine Easter more accurately that the third stage in the paschal controversy was mainly due. Third Phase.—It was to the divergent cycles which Rome had successively adopted and rejected in its attempt to determine Easter more accurately that the third stage in the paschal controversy was mainly due. The Roman missionaries coming to England in the time of St. Gregory the Great found the British Christians, the representatives of that Christianity which had been introduced into Britain during the period of the Roman occupation, still adhering to an ancient system of Easter-computation which Rome itself had laid aside. The British and Irish Christians were not of Quartodecimans, as some unwarintably accused them of being, for they kept the Easter festival upon a Sunday. They are supposed (e. g. by Krusch) to have observed an eighteen-year cycle and not the five-hundred-and-thirty-two-year cycle of Victorius which was adopted in Gaul, but also a recently as 314, Pisius, adopted an eighteen-year cycle, but neither gave satisfactory results. Alexandria adhered to the more accurate nineteen-year cycle of Meton. But it seems to be clearly established by the most recent researches (see Schwartz, op. cit., pp. 28-29) that the lunar cycles were never understood to be more than aids towards ascertaining the correct date of Easter, also that where the calculations of Rome and Alexandria led to divergent results, compromises were made upon both sides and that the final decision was always laid with accepted ecclesiastical authority.
recognized, the moon according to which Easter is calculated is not the moon in the heavens nor even the mean moon, i.e., a moon travelling with the average motion of the real moon, but simply the moon of the calendar. This calendar moon is admittedly a fiction, though it departs very little from the actual astronomical facts; but in following the simple rule given for the dependence of Easter upon the moon of the calendar, uniformity is secured for all countries of the world. According to this rule, Easter Sunday is the first Sunday which occurs after the first full moon (or more accurately after the first fourteenth day of the moon) following the 21st of March. As a result, the earliest possible date of Easter is 22 March, the latest 25 April.

The bibliography of this subject is vast, and most ecclesiasticological works are largely confined to it. For purposes of the text and notes of REUFLE-LECLEROQ, Connotations, I, 133-151 and 450-458, supply all that is necessary; though LECLERQ refers to the article Compt. pascal in the Dictionnaire d'Archeologie lui for fuller treatment.

Among the more important contributions to the subject the following may be named: KÜCHER, Studien zur christlich-mittelalterlichen Chronologie (Leipzig, 1880); IDID IN NEROs ABANDONED, at the Roman Church, in the Chronologie des Mittelalters und der Neuzeit (Berlin, 1897), 110-165; SCHMID, Der Osterfreirat auf dem ersten allgemeinen Konzil von Nica (Vienna, 1905); LÖHR, Die Osteraufscheren in den katholischen Inseln (Staatsbib., 1904); HELDENDORF, Der Paschastreif der alten Kirche (1860); SCHMIDT, Christliche und katholische Ostertage der Bistomm (St. Peter, 1861); the Abhandlungen of the Gottingen Academy: this is a work of the very highest importance; SCHMIDT, Die Paschale, in the Zeitschrift f. kathol. Theologie (1870); DUCHESNE, Histoire de l'Eglise, I, 199-201; KÖNNER, Hebräische Liturgie (1906); DUCHESNE, in Revue des Questions Historiques, 27, 646-699; WICKERIN in Journal of Philology (1900), 137-151. See also the bibliography given under CHRONOLOGY, GENERAL, AND DOMINICAL LETTER.

Easter Churches. I. Definition of an Eastern Church. An accident of political development has made it possible to divide the Eastern Church, in the first place, into two great halves, Eastern and Western. The root of this division is, roughly and broadly speaking, the division of the Roman Empire, made first by Diocletian (284-305), and again by the sons of Theodosius I (Arcadius in the East, 395-408; and Honorius in the West, 395-423), then finally made permanent by the establishment of a rival empire in the West (Charles the Great, 800). The division of Eastern and Western Churches, then, in its origin corresponds to that of the empire. Western Churches are those that either gravitate around Rome or broke away from the Reformation. Eastern Churches depend originally on the Eastern Empire at Constantinople; they are those that either find their centre in the patriarchate of that city (since the centralization of the fourth century) or have been formed by schisms which in the first instance concerned Constantinople rather than the Western world. Another distinction, that can be applied only in the most general and broadest sense, is that of language. Western Christians till the Reformation were Latin; even now the Protestant bodies still bear unmistakably the mark of their Latin ancestry. It was the great Latin Fathers and St. Augustine (c. 354) who, most of all, who built up the traditions of the West; in ritual and canon law the Latin or Roman school formed the West. In a still broader sense the East may be called Greek. True, many Eastern Churches know nothing of Greek; the oldest (Nestorians, Armenians, Abyssinians) have never used Greek liturgically nor for their literature; nevertheless they too depend in some sense on a Greek tradition. Whereas our Latin Fathers have never concerned themselves with the doctrine of the schoolmen or canonists, they believe in the influence of Greek; for Greek theologians are still concerned about controversies carried on originally in Greek and settled by Greek synods. The literature of those that do not use Greek is formed on Greek models, is full of words carefully chosen or composed to correspond to some technical Greek term, even of Greek derivatives. The root of the distinction is, then, in the basis of the Church: that a Western Church is one originally dependent on Rome, whose traditions are Latin; an Eastern Church looks rather to Constantinople (or, as a friend or an enemy) and is rather to Constantinople. The point may be stated more scientifically by using the old division of the patriarchates. Originally (e.g., at the Council of Nicea, A. D. 325, can. vi) there were three patriarchates, those of Rome, Alexandria, and Antioch. Further legislation formed two more at the expense of Antioch: Constantinople in 381 and 481; Jerusalem in 491. In any case the Roman patriarchate was always enormously the greatest. Western Christendom may be defined quite simply as the Roman patriarchate and all Churches that have broken away from it. All the others, with schismatical bodies formed from them, make up the Eastern half. But it must not be imagined that either half is in any sense one homogeneous and archaic body; in fact, from the first there is a great number of important schisms) rather than to the Reformations. To find a time when there was one Eastern Church we must go back to the centuries before the Council of Ephesus (431). Since that council there have been separate schismatical Eastern Churches whose number has grown steadily down to our own time. The Nestorian heresy left a permanent Nestorian Church, the Monophysite and Monothelitae quarrels made several, the reunion with Rome of portions of every Rite further increased the number, and quite lately the Bulgarian schism has created yet another; indeed it seems as if two more in Cyprus and Syria, are being formed at the present moment (1908).

We have now a general criterion by which to answer the question: What is an Eastern Church? Looking at a map, we see that, roughly, the division between the Roman patriarchate and the Christian world, that runs down somewhat to the east of the River Vistula (Poland is Latin), then comes back above the Danube, to continue down the Adriatic Sea, and finally divides Africa west of Egypt. Illyricum (Macedonia and Greece) once belonged to the Roman patriarchate, and Greater Greece (Southern Italy and Sicily) was intermittently Byzantine. But both these lands eventually fell back into the branches that surrounded them (except for the thin remnant of the Uniat Italo-Greeks). We may, then, say that any ancient Church east of that line is an Eastern Church. To these we must add those formed by missionaries (especially Russians) from one of these Churches. Later Latin and Protestant missions have further complicated the tangled state of the ecclesiastical East. Their adherents everywhere belong of course to the Western portion.

II. Catalogue of the Eastern Churches. It is now possible to draw up the list of bodies that answer to our definition. We have already noted that they are by no means all in communion with each other, nor have they any common basis of language, rite, or faith. All are covered by a division into the great Churches, the Plays, the Eastern Churches, the Monophysite Churches. The original Monothelitae are now all Uniates, and lastly the Uniat Churches corresponding in each case to a schismatical body. Theologically, to Catholics, the vital division is between Catholic Uniates, on the one hand, and schismatics or
heretics, on the other. But it is not convenient to start from this basis in cataloguing Eastern Churches. Historically and archaeologically, it is a secondary question. Each Uniat body has been formed from some of the schismatical ones; their organizations are consequently those of the respective corresponding schismatical body, and has an organization modelled on the same plan. In faith a Uniat Armenian, for instance, is joined to Uniat Chaldees and Copts, and has no more to do with schismatical Armenians than with Nestorians or Abyssinians. Nor does he forget this fact. He knows quite well that he is a Catholic in union with the Pope of Rome, and that he is equally in union with every other Catholic. Nevertheless, national customs, languages, and rites tell very strongly on the superficies, and our Uniat Armenian would certainly feel very much more at home in a non-Uniat church of his own nation than in a Uniat Coptic. Outwardly, the bond of a common language and common liturgy is often more apparent than what everyone knows to be the essential and radical division of a schism. Indeed these Uniat bodies in many cases still faintly reflect the divisions of their schismatical relations. In one case it is between Orthodox and Jacobites still remains as a not very friendly feeling between the different Uniat Churches in this case Melkites and Catholic Syrians. Certainly, such feeling is a very different thing from formal schism, and the leaders of the Uniat Churches, as well as all the other schismatical bodies, are at all their well-wishers, earnestly strive to repress it. Nevertheless, quarrels between various Uniat bodies fill up too large a portion of Eastern Church history to be ignored; still, to take another instance, anyone who knows Syria knows that the friendship between Melkites and Maronites is not enthusiastic. It will be seen, then, that for purposes of tabulation we cannot conveniently begin by cataloguing the Catholic bodies on the one side and then classing the schismatics together on the other. We must arrange these Churches according to their historic basis and origin: first, the largest of the schismatical Churches: then, the bodies on each side of these, the corresponding Uniat Church formed out of the schismatics in later times.

A. Schismatical Churches.

1. The first of the Eastern Churches in size and importance is the great Orthodox Church. This is, after that of the Catholics, considerably the largest body in Christendom. The Orthodox Church now counts about a hundred millions of members. It is the main body of Eastern Christendom, that remained faithful to the decrees of Ephesus and Chalcedon when Nestorianism and Monophysitism cut away the national Churches in Syria and Egypt. It remained in union with the West till the great schism of Photius and then that of Cerularius, in the ninth and eleventh centuries. In spite of the short-lived reunions made by the Second Council of Lyons (1274) and the Council of Florence (1439), this Church has never been divided since. The "Orthodox" (it is convenient as well as courteous to call them by the name they use as a technical one for themselves) originally comprised the four Eastern patriarchates: Alexandria and Antioch, then Constantinople and Jerusalem. But the balance between these four patriarchates was upset when the Church of Cyprus was taken away from Antioch and made autarchal (i.e. extra-patriarchal) by the Council of Ephesus (431). Then, in the fifth century, came the great upheavals of Nestorianism and Monophysitism, of which the result was that enormous numbers of Syriatics and Egyptians fell away into schism. So the Patriarchs of Antioch, Jerusalem (this was always a very small and comparatively unimportant centre), and Alexandria, losing most of their subjects, inevitably sank in importance. The Moslem conquest of their lands completed their ruin, so that they became merely the merest shadows of what their predecessors had once been. Meanwhile, while Constantinople, by the presence of the emperor, and always sure of his favour, rose rapidly in importance. Itself a new see, neither Apostolic nor primitive (the first Bishop of Byzantium was Metrophanes, in 329), it succeeded so well in its ambitious career that for a short time after the great Eastern schism it seemed to the uninitiated as if the new See of New Rome would take the same place over the Orthodox Church as did his rival the Pope of Old Rome over Catholics. It is also well known that it was this insatiable ambition of Constantinople that was chiefly responsible for the schism of the ninth and eleventh centuries. The Turkish conquest, strangely enough, still further strengthened the power of the Byzantine patriarch, inasmuch as the Turks acknowledged him as the civil head of what they called the "Roman nation" (Rum millet), meaning thereby the whole Orthodox community of whatever patriarchate. For about a century Constantinople enjoyed this sacred high place by a long course of degrading intrigue could for a little time justify in the Orthodox world his usurped title of Ecumenical Patriarch. Then came his fall; since the sixteenth century he has lost one province after another, till now he too is only a shadow of what he once was, and the real power of the Orthodox body is in the new independent national Churches with their "holy Synods"; while high over all looms the shadow of Russia. The separation of the various national Orthodox Churches from the patriarchate of Constantinople forms the only important chapter in the modern history of this body. The principle is always the same. More and more has the idea obtained that political modifications should be followed by the Church, that is to say that the Church of an independent State must be itself independent of the patriarch. This by no means implies real independence for the national Church; on the contrary, in each case the much severer rule of the Government is substituted for the distant authority of the Ecumenical Patriarch. Outside the Turkish Empire, in Russia and the Balkan States, the Orthodox Churches are independent, each for the most part of all Christian bodies. The process began when the great Church of Russia was declared autocephalous by the Czar Feodor Ivanovitch, in 1589. Jeremias II of Constantinople took a bribe to acknowledge its independence. Peter the Great abolished the Russian patriarchate (of Moscow) and set up a "Holy Governing Synod" to rule the national Church in 1721. The Holy Synod is simply a department of the government through which the czar rules over his Church as absolutely as over his army and navy. The independence of Russia and its Holy Synod have since been copied by each Balkan State, and after it had been settled that the independence did not mean schism its first announcement is naturally very distasteful to the patriarch and his court. He often begins by excommunicating the new national Church root and branch. But in each case he has been obliged to give in finally and to turn to its help. He has been "Sister in Christ" in the Holy Synod that has displaced his authority. Only in the specially difficult and bitter case of the Bulgarian Church has a permanent schism resulted. Other causes have led to the establishment of a few other independent Churches, so that now the great Orthodox communion consists of sixteen independent Churches, each of which (except
The Churches are (1) The Great Church, that is, the Patriarchate of Constantinople, that takes precedence of the others. It covers Turkey in Europe and Asia Minor, with only four metropolitan bishops. Outside this territory the Patriarch of Constantinople has no jurisdiction. He still has the position of civil head of the Roman Church throughout the Turkish Empire, and he still has not the power to interpret his authority, or the jurisdiction he possesses, as a sort of ecclesiastical jurisdiction—by his action at this moment in Cyprus—but in modern times especially each attempt is at once met by the most pronounced opposition on the part of the other patriarchs and national Churches, who answer that they acknowledge no head but Christ, no authority but the seven Ecumenical Synods. The Ecumenical Patriarch, however, keeps the right of alone consecrating the chrism (myron) and sending it to the other Orthodox Churches, except in the cases of Russia and Romania, which prepare it themselves. Bulgaria gets her consecration from the Russian, (Greek Russian) Patriarch. This is a question of consecrating her own myron, and there seems no doubt that Antioch will do so also when the present stock is exhausted. So even this shadow of authority is in a precarious state.

(2) Alexandria (covering all Egypt as far as it is ruled by the Holy Synod, excepting only four metropolitan bishops.) (3) Antioch, extending over Syria from the Mediterranean to the Euphrates, as far as any Orthodox lives far or East, touching the Great Church along the frontiers of Asia Minor to the north and to the south, with twelve metropolitan sees and two or three titular bishops with no patriarchal curia. (4) Jerusalem, consisting of Palestine, from Haifa to the Egyptian frontier, with thirteen metropolitan sees. (5) Cyprus, the old autocephalous Church, with an archbishop whose succession (1908), after eight years, lends the whole Orthodox world, and three suffragans. Thus come the new national Churches, arranged here according to the date of their foundation, since they have no precedence. (6) Russia, (independent since 1589). This is enormously the preponderating partner, about eight times as great as all the others put together. The Holy Synod consists of thirteen metropolitan sees (Kiev, Moscow, and Petersburg), the Exarch of Georgia, and five or six other bishops or archimandrites appointed at the tsar's pleasure. There are eighty-six Russian dioceses, by which added missionary bishops in Siberia, Japan, North America, etc. (7) Carlowitz (1656), formed of Orthodox Serbs in Hungary, with six suffragan sees. (8) Czernagora (1765), the one independent diocese of the Black Mountain. (9) The Church of Sinai, consisting of one monastery recognized as independent of Jerusalem in 1872. The hegumen, is an archbishop. (10) The Greek Church (ki 30): thir two sees under a Holy Synod on the Russian model. (11) Hermannstadt (Nagy-Szoben, 1864), the Church of the Viaks in Hungary, with three sees. (12) The Bulgarian Church under the exarch, who lives at Constantinople. In Bulgaria are eleven sees with a Holy Synod. The exarch, however, claims jurisdiction over all Bulgars anywhere (especially in Macedonia) and has set up rival exarchal metropolitans against the patriarchal ones. The Bulgarian Church is recognized by the Pope and by Russia, but is excommunicate since 1872, by the Great Church and is considered schismatic by all Greeks. (13) Carlowitz (1873), for the Orthodox in Austria, with four sees. (14) Servia (1879), the national Church of that country, with five bishops and a Holy Synod. The Servs in Macedonia are now agitation to add two more sees (Tskub and Monastir) to this Church, at the further cost of Constantinople. (15) Rumania (1884), again a national Church with a Holy Synod and eight sees. (16) Herzegovina and Bosnia, organized since the Austrian occupation (1850) as a practically independent Church with a vague recognition of Constantinople’s primacy.

This ends the list of allied bodies that make up the Orthodox Church (see Fortescue, “Orthodox Eastern Church”, x, 278-337). Next come, in order of date, the old heretical Eastern Churches.

2. The Nestorians are now only a pitiful remnant of what was once a vast Church. It had before the heresy from which they have their name, been a flourishing Christian community in Chaldea and Mesopotamia. According to their tradition it was founded by Addai and Mari (Addeus and Mary), two of the seventy-two Disciples. The present Nestorians count Mar Mari as the first Bishop of Ctesiphon and predecessor of their patriarch. In any case this community was originally subject to the Patriarch of Antioch. As his vicar, the metropolitan of the twin-cities of Seleucia and Ctesiphon (on either side of the Tigris, north-east of Babylon) bore the title of catholics. One of these metropolitan sees was present at the Council of Nicea in 325. The great empire of this Church from Antioch led in early times to a state of semi-independence that prepared the way for the later schism. Already in the fourth century the Patriarch of Antioch waived his right of ordaining the catholics of Seleucia-Ctesiphon, and allowed them to be ordained by his own suffragans. This in great importance of the right of ordaining, as a sign of jurisdiction throughout the East, this fact is important. But it does not seem that real independence of Antioch was acknowledged or even claimed till after the schism. In the fifth century the influence of the Christian East of the Persian Empire, and that of Nestorius’ at Edessa spread the heresy of Nestorius throughout this extreme Eastern Church. Naturally, the later Nestorians deny that their fathers accepted any new doctrine at that time, and they claim that Nestorius learned them rather than they forced him ("Nestorius es secus est, non ipsi Nestoriurn. Ebed-Jesus of Nisibus, about 1300. Assemani, “Bibl. Orient.”, III, 1, 355). There may be truth in this. Theodore and his school had certainly prepared the way for Nestorius. In any case the rejection of the Council of Ephesus (431) by these Christians in Chaldea and Mesopotamia produced a schism between them and the rest of Christendom. When Bahaus, himself a Nestorian, became catholics, in 498, there were practically no more Catholics in those parts. From Ctesiphon the Faith had spread across the border into Persia, even before that city was conquered by the Persian king (224). The Persian Church, then, always depended on Ctesiphon and shared its heresy. From the fifth century this most remote of the Eastern Churches has been cut off from the rest of Christendom, and till modern times was the most separate and forgotten community of all. Shut out from the Roman Empire (Zenon closed the school of Edessa in 489), but, for a time at least, protected by the Persian kings, the Nestorian Church flourished around Ctesiphon, Nisibis (where the school was reorganized), and throughout Persia. Since the schism the catholics occasionally assumed the title of patriarch. The Church then spread towards the East and sent missionaries to India and even China. A Nestorian inscription of the year 751 has been found at Singan Fu in China (J. Helr, S.J., "Prolegomena zu einer neuen Ausgabe der nestorianischen Inschrift von Singan Fu", in the "Veröfentlungen des VII. internationalen Orientalisten-Kongresses", Vienna, 1886, pp. 37 seq.). Its greatest extent was in the eleventh century, when twenty-five metropolitans obeyed the Nestorian patriarch. But since the end of the fourteenth century it has gradually sunk to a very small sect, first, because of a fierce
persecution by the Mongols (Timur Leng), and then through internal disputes and schisms. Two great schisms as to the patriarchal succession in the sixteenth century led to a reunion of part of the Nestorian Church with Rome, forming the Unit Cha'ldian Church, numbering there about 150,000 Nestorians living chiefly in highlands west of Lake Urumiah. They speak a modern dialect of Syriac (Maclean, "Grammar of the Dialects of Vernacular Syriac", Cambridge, 1895; Noldeke, "Grammatik der neusyrischen Sprache", 1868). The patriarchate descends from the Syriac bishops of Edessa, and is divided into seven provinces, each of which is ruled by a bishop.- Another form of Nestorianism is that of the Family of Mamas: each patriarch bears the name Simon (Mar Shimun) as a title. Ignoring the Second General Council, and of course strongly opposed to the Third (Ephesus), they only acknowledge the First Nicene (325). They have a Creed of their own (Hahn, "Bibliothek der Symbole", p. 74), formed from an old Antiochene Creed, which does not contain any trace of the particular heresy from which their Church is named. Indeed it is difficult to say how far any Nestorians now are conscious of the particular teaching condemned by the Council of Ephesus, though they still honour Nestorius' Theodoret, of Mopsuestia, one of the elder heretics as saints and doctors. The patriarch rules over twelve other bishops (the list in Silber Nag, "Verfassung", p. 267). Their hierarchy consists of the patriarch, metropolitans, bishops, choripiscopi, archdeacons, priests, deacons, subdeacons, and readers. There are also many monasteries. They use Syriac liturgically written in their own (Nestorian) form of the alphabet. The patriarch, who now generally calls himself "Patriarch of the East", resides at Koehanah, a remote valley of the Kurdish mountains by the Zab, on the frontier between Persia and Kurdistan. He has an unlimited jurisdiction over his people, though he does not receive a berat from the Sultan. In many ways this most remote Church stands alone; it has kept a number of curious and archaic customs (such as the perpetual abstinence of the patriarch, &c.) that separate it from other Eastern Churches almost as much as from those of the West. Lately the Archbishop of Canterbury's mission to the Nestorians has aroused a certain interest about them in England.

All the other separated Eastern Churches are formed by the other great heresy of the fourth century, Monophysitism. There are first the separate Churches of Egypt, Syria, and Armenia.

3. The Copts form the Church of Egypt. Monophysitism was in a special sense the national religion of Egypt. As an extreme opposition to Nestorianism, the Egyptians believed it to be the faith of their hero St. Cyril of Alexandria (d. 444). His successor, Dioscorus (444-55), was deposited and excommunicated by the Council of Chaledon (451). From his time the Monophysite party gained ground very quickly among the native population, so that soon it became the expression of their national feeling against the Greek (Melchite, or Melkite) garrison and government officials. Afterwards, at the Moslem invasion (641), the opposition was so strong that the native Egyptians threw in their lot with the conquerors against the Greeks. The two sides are still represented by them. At present there are about 150,000 Monophysites in the whole country.

The Monophysites are sometimes called Jacobites here in Syria; but the old national name Copt (Gr. "Agyptos") has become the regular one for their Church as well as for their nation. Their patriarch, with the title of Alexandria, succeeds Dioscorus and Theodoret, a fanatical Monophysite bishop, who resided at Cairo, ruling over thirteen dioceses (Silber Nag., p. 289) and about 500,000 subjects. For him, too, the law is perpetual abstinence. There are many monasteries. The Copts use their own language liturgically and have in it a number of liturgies all derived from the original Greek rite of Alexandria (St. Mark). But Coptic is a dead language, so much so that even most priests understand very little of it. They all speak Arabic, and their service books give an Arabic version of the text in parallel columns. This Church is, on the whole, in a poor state. The Copts are mostly illiterate, and living in the most miserable state of poverty and ignorance. And the clergy will not, on the same conditions. Lately there has been something of a revival among them, and certain rich Coptic merchants of Cairo have begun to found schools and seminaries and generally to promote education and literature. They are still making inroads on the advantages among their nation. One of these, M. Gabriel Lahib, who is editing their service-books, promises to be a scholar of some distinction in questions of liturgy and archæology.

4. The Church of Abyssinia, or Ethiopia, always dependent on Egypt. It was founded by St. Frumentius, who was ordained and sent by St. Athanasius in 326. So Abyssinia has always acknowledged the supremacy of the Patriarch of Alexandria and still considers its Church as a daughter-church of the See of St. Mark. The same causes that made Egypt Monophysite affected Abyssinia equally. She naturally, almost inevitably, shared the power and the name of the mother Church. So Abyssinia is still Monophysist and acknowledges the Coptic patriarch as her head. There is now only one bishop of Abyssinia (there were once two) who is called Abuna (Our Father) and resides at Adea (the old see was Axum). He is always a Coptic monk consecrated patriarch. He is sent by the Coptic patriarch. It does not mean, however, that there is now much communication between Cairo and Adea, though the patriarch still has the right of deposing the Abuna. Abyssinia has about three million inhabitants, nearly all members of the national Church. There are many monks and an enormous number of monasteries, who have the same political privileges as the monks of the Roman Church, practically without any previous preparation or examination. The Abyssinians have liturgies, again, derived from those of Alexandria in the old (classical) form of their language. The Abyssinian Church, being the religion of a more than half barbarous people, cut off by the sea from all relations with any other Christian body except the poor and backward Copts, is certainly the lowest representative of the great Christian family. They have gradually mixed up Christianity with a number of pagan and magical elements, and are specially noted for strong Jewish tendencies and their strict observance of the forbidden food of the Church. The Abyssinian Church, being the religion of a more than half barbarous people, cut off by the sea from all relations with any other Christian body except the poor and backward Copts, is certainly the lowest representative of the great Christian family. They have gradually mixed up Christianity with a number of pagan and magical elements, and are especially noted for strong Jewish tendencies and their strict observance of the covenant containing the Ten Commandments.

Lately Russia has developed an interest in the Abyssinians and has begun to undertake schemes for educating them, and, of course, at the same time, converting them to Orthodoxy, and the Church of Christ.

5. The Jacobites are the Monophysites of Syria. Here, too, chiefly out of political opposition to the imperial court, Monophysitism spread quickly among the native population, and here, too, there was the same opposition between the Syrian Monophysites in the country and the Greek Melkites in the cities. Severus of Antioch (518-18) was an ardent Monophysite. After his death the Emperor Justinian (527-63) tried to cut off the succession by having all bishops suspect of heresy locked up in monasteries. But his wife Theodora was herself a Monophysite; she removed the ordinations of the Orthodox patriarch Theodore and James. It is from this James, called Zanzalos and Baradai (Jacob Baradaius), that they have their name ("Iqobite", "Jacobite"); it is sometimes used for any Monophysite anywhere, but had better be kept for the national Syrian Church. James was joined two Coptic bishops, who with him ordained a whole hierarchy, including one Sergius of Tellas as Patriarch of Antioch. From this Sergius the Jacobite patriarchs descend. Historically, the Jacobites of Syria are the national Church of their country, as much as the Copts in Egypt; but they by no means form so exclusively the religion of the native popula-
tion. Syria never held together, was never so compact a unity as Egypt. We have seen that the Eastern Syrians expressed their national, anti-Imperial feeling by adopting the extreme opposite heresy, Nestorianism, which, however, had the same advantage of not being the religion of Caesar and his enemies. Among the Western Syrians, too, there has always been a lack of cohesion. They had in Monophysite times two patriarchates (Antioch and Jerusalem) instead of one. In all quarrels, whether political or theological, whereas the Copts move like one man for the cause of Egypt and the “Christian Pharaoh”, the Syriacs were divided among themselves. There have always been many Melkites in Syria, and the Jacobites were never an overwhelming majority. Now they are a small minority (about 50,000) dwelling in Syria, Mesopotamia, Kurdistan. Their head is the Jacobite Patriarch of “Antioch and all the East”. He always takes the name Ignatius and dwells either at Diarbekir or Mardin in Mesopotamia. Under him, as first of the metropolitans, is the Maphrian, a prelate who was originally set up to rule the Eastern Jacobites as a rival of the Nestorian catholics. Originally the maphrian had a number of special rights and privileges that distinguish him from the independent metropolitans. Now he has only precedence of other metropolitans, a few rights in connexion with the patriarch’s election and consecration (when the patriarch dies he is generally succeeded by the maphrian) and the title “Maphrian and Catholicoi of the East”. Besides these two, the Jacobites have seven metropolitans and three other bishops. As in all Eastern Churches, there are many monks, from whom the bishops are always taken. The Syrian Jacobites are in communion with the Copts. They name the Coptic patriarch in the Liturgy, and the rule is that each Syrian patriarch should send an official letter to his own bishop of Alexandria and Constantinople to announce his succession. This implies a recognition of superior rank which is consistent with the old precedence of Alexandria over Antioch. At Mardin still linger the remains of an old pagan community of Sun worshippers who in 1762 (when the Turks finally decided to apply to them, too, the extermination that the Koran prescribes for pagans) preferred to hide under the outward appearance of Jacobite Christianity. They were, therefore, all nominally converted, and they conform to the laws of the Jacobite Church, but in the main do not receive all sacraments and be buried. But they only marry among themselves and every one knows that they still practise their old pagan rites in secret. There are about one hundred families of these people, still called Shamisjah (people of the Sun).

6. The Malabar Christians in India have had the strangest history of all these Eastern Churches. For, having been Nestorians, they have now veered round to the other extreme and have become Monophysites. We hear of Christian communities along the Malabar coast (in Southern India from Goa to Cape Comorin) as early as the sixth century (Silbernagl, op. cit., 317; see also German, “Die Kirche der Thomaschristen”, quoted below). They claim the Apostles St. Thomas as their founder (hence their name “Thomas-Christs”, or “Christians of St. Thomas”). In the first period they were dependent on the Catholics of Sciljeia-Ctesiphon, and were Nestorians like him. They are really one of the many missionary churches founded by the Nestorians in Asia. In the sixteenth century the Portuguese succeeded in converting a part of this Church to union with Rome. A further schism among these Unias led to a complicated situation, of which the Jacobite patriarch took advantage by sending a bishop to form a Jacobite Malabar Church. There were then three parties among them: Nestorians, Jacobites, and Unias. The line of Nestorian metropolitans died out (it has been revived lately) and nearly all the non-Union Thomas-Christs may be counted as Monophysites since the eighteenth century. But the Jacobite patriarch seems to have forgotten them, so that after 1751 they chose their own hierarchy and were an independent Church. In the nineteenth century, after they had been practically rediscovered by the English, the Jacobites in Syria tried to reassert their authority over Malabar by sending out a metropolitan named Athanasius. Athanasius made a considerable disturbance, excommunicated the hierarchy he found, and tried to reorganize this Church in communion with the Syrian patriarch. But the Rajah of Travancore took the side of the national Church and forced the Jacobites to separate. Since then the Thomas-Christs have been a quite independent Church whose communion with the Jacobites of Syria is at most only theoretic. There are about 70,000 of them under a metropolitan who calls himself “Bishop and Gate of all India”. He is always named by his predecessor, i.e., each metropolitan chooses a coadjutor with the right of succession. The Thomas-Christs use Syriac liturgically and describe themselves generally as “Syrians.”

7. The Armenian Church is the last and the most important of these Monophysite bodies. Although it makes a fuss in faith with the national Church of Syria, it does not in communion with them (a union arranged by a synod in 726 came to nothing) nor with any other Church in the world. This is a national Church in the strictest sense of all: except for the large Armenian Uniat body that forms the usual pendant, and for a very small number of Protestants, Armenia is entirely Catholic and it has no members who are not Armenians. So in this case the name of the nation and of the religion are really the same. Only, since there are the Uniates, it is necessary to distinguish whether an Armenian belongs to them or to the schismatical (Monophysite) Church. This is because of the disturbance it is usual to call the Gregorian Armenians—after St. Gregory the Illuminator—another polite concession of form on our part akin to that of “Orthodox” etc. Quite lately the Gregorian Armenians have begun to call themselves Orthodox. This has no meaning and only confuses the issue. Of course each Church thinks itself really Orthodox, and Catholic and Apostolic and Holy too. But one must keep technical names clear, or we shall always talk at cross purposes. The polite convention throughout the Levant is that we are Catholics, that people in communion with the “Catholic Patriarch” are Orthodox, and that Monophysite Armenians are Gregorian. They should be content with what is an honourable title to which we and the Orthodox do not of course think that they have really any right. They have no real right to it, because the Apostles of Armenia, St. Gregory the Illuminator (296), was no Monophysite, but a Catholic in union with Rome. The Armenian Church was in the first period subject to the Metropolitan of Cæsarea; he ordained its bishops. It suffered persecution from the Persians and was an honoured branch of the great Catholic Church till the sixth century. Then Monophysitism spread throughout Armenia from Syria, and in 527 the Armenian patriarch, Nestes, in the Synod of Dvin, formally rejected the Council of Chalcedon. The schism became quite manifest in 552, when the primate, Abraham I, excommunicated the Church of Georgia because it refused to accept it. From that time on the national Armenian Church has been isolated from the rest of Christendom; the continual attempts at reunion made by Catholic missionaries, however, have established a considerable body of Armenian Uniates. The Armenians are a persecuted people and widely dispersed. They are found not only in Armenia, but scattered all over the Levant and in many cities of Europe and America. As they always bring their Church with them, it is a large and important community, second only to the Orthodox in size among Eastern Churches. There are about three mil-
lions of Gregorian Armenians. Among their bishops four have the title of patriarch. The first is the Patriarch of Etchmiadzin, who bears as a special title that of catholicoi. Etchmiadzin is a monastery in the province of Erivan, between the Black and the Caspian Seas. This, however, is not Uniat, for the title does not give one half to the Armenian Patriarch of Constantinople. It is the cradle of the race and their chief sanctuary. The catholicoi is the head of the Armenian Church and to a great extent of his nation too. Before the Russian occupation of Erivan he had unlimited jurisdiction over all Gregorian Armenians and was something very like an Armenian pope. And even since he resides under the shadow of Russia, and especially since the Russian Government has begun to interfere in his election and administration, the Armenians of Turkey have made themselves nearly independent of him. The second rank belongs to the Patriarch of Constantinople. They have had a bishop at Constantinople since 1307. In 1461 Mohammed II gave this bishop the title of Patriarch of the Armenians, so as to rivet their loyalty to his capital and to form a millet (nation) on the same footing as the Rum millet (the Orthodox Church). This patriarch is the person responsible to the Porte for the affairs of the Armenians. He has the same rank as his Orthodox rival, and now uses the jurisdiction over all Turkish Armenians that formerly belonged to the catholicoi. Under him, and little more than titular patriarchs, are those of Sis in Cilicia (a title kept after a temporary schism in 1460) and Jerusalem (whose title was abolished in the eighteenth century). The Armenians have seven dioceses in the Russian Empire, two in Persia, and thirty-five in Turkey. They distinguish archbishops from bishops by an honorary precedence only and have an upper class of priests called Vartapets, who are celibate and provide all the higher offices (bishops and patriarchs are always of their rank). There are, of course, as in all Eastern Churches, many monks. In many ways the Armenian (Gregorian) Church has been influenced by Rome, so that they are among Eastern schismatists the only one that can be described as at all latinized. Examples of such influence are their use of unleavened bread for the Holy Eucharist, their vestments (the mitre is almost exactly the Roman one), etc. This appears to be the result of opposition to their nearer rivals, the Orthodox. In any case, at present the Armenians are properly more Roman in character than Greek Church and betoken the success of the East. They are disposed for reunion with any other of these communions. Their Monophysitism is now very vague and shadowy—as indeed is the case with most Monophysite Churches. It is from them that the greatest proportion of Uniates have been converted.

This brings us to the end of the Monophysite bodies and to the end of all schismatical Eastern Churches. A further schism was indeed caused by the Monothelite heresy in the seventh century, but the whole of the Church then formed (the Monarite Church) has been for many centuries reunited with Rome. So Monarites have their place only among the Uniates.

We have, then, as schismatists Eastern Churches, first, the great Orthodox Church, then one Church formed by the Nestorian heresy and five as the result of Monophysitism (those of the Copts, Abyssinians, Jacobites, and Chaldeans). The last groups, corresponding to each of these is a Uniat Church, with one additional entirely Uniat community (the Maronites).

B. Uniat Churches.—The definition of a Uniat is: a Christian of any Eastern rite in union with the pope: i.e., a Catholic who belongs not to the Roman, but to an Eastern Church. They differ from the Catholics in that they are in communion with Rome, and from Latins in that they have other rites. A curious, but entirely theoretic, question of terminology is: Are Milanese and Mozarabic Catholics Uniates? If we make rite our basis, they are. That is, they are Catholics who do not belong to the Roman Rite. The point has sometimes been urged rather as a catch than seriously. As a matter of fact, though, it is superficially less obvious than rite, is patriarchate. Uniates are Catholics who do not belong to the Roman patriarchate. So these two remnants of other rites in the West do not constitute Uniat Churches. If in the patriarchate, or any rite following it, it is the case, they are at least Roman Catholic. Their history is Christian, not only Roman Catholic, but also Eastern. Among and one, the great Gallican Church, with her own rite, was always part of the Roman patriarchate; so are Milan and Toledo. This, however, raises a new difficulty; for it may be urged that in that case the Italo-Greeks are not Uniates, since they certainly belong to the Roman patriarchate; and also since, for the same reason, they have done so legally. But the constitution of these Italo-Greek Churches was originally the result of an attempt on the part of the Eastern emperors (Leo III., 717-741; and see "Orth. Eastern Church", 45-47) to follow them from the Roman patriarchate and join them to that of Constantinople. Although the attempt did not succeed, the descendents of the Greeks in Calabria, Sicily, etc., have kept the Byzantine Rite.

They are an exception to the rule, invariable in the East, that rite follows patriarchate, and are an exception to the general principle about Uniates too. As they belong to their own, in this ground it may well be denied that they form a Uniat Church. An Italo-Greek may be best be defined as a member of the Roman patriarchate in Italy, Sicily, or Corsica, who, as a memory of older arrangements, is still allowed to use the Byzantine Rite. With regard to the funda-
ental question of their own nature it is said, however, that is no longer purely geographical. A Latin in the East belongs to the Roman patriarchate as much as if he lived in the West; Latin missionaries everywhere and the new dioceses in Australia and America count as part of what was once the patriarchate of Western Europe. So also the Melkites in Lachin, Marseilles, and Paris belong to the (Uniat) Byzantine patriarchate, though, as foreigners, they are temporarily subject to Latin bishops.

A short enumeration and description of the Uniates will complete this picture of the Eastern Churches. It is, in the first place, a mistake (encouraged by Eastern schismaties and Anglicans) to look upon these Uniates as a sort of compromise between Latin and the other rites, or between Catholics and schismaties. Nor is it true that they are Catholics to whom grudgingly they leave their church and betoken the failure of the schism. On the contrary, they are a national customs. Their position is quite simple and quite logical. They represent exactly the state of the Eastern Churches before the schisms. They are entirely and uncompromisingly Catholic in our strictest sense of the word, quite as much as Latins. They accept the whole Catholic Faith and the authority of the pope as head of the Catholic Church, as did St. Athanasius, St. Basil, St. John Chrysostom. They do not belong to the pope's patriarchate, nor do they use his rite, any more than did the great saints of Eastern Christendom. They have their own rites and their own patriarchs, as had their fathers before the schism. Nor is there any idea of compromise or concession about this. The Catholic Church has never been identified with the Western patriarchate. The pope's position as patriarch of the West is as distinct from his spiritual rights as is his to the pope's of Rome. It is no more necessary to belong to his patriarchate in order to acknowledge his supreme jurisdiction than it is necessary to have him for diocesan bishop. The Eastern Catholic Churches in union with the West have always been as much the ideal of the Eastern Church Universal as the Latin Church. If some of those Eastern Churches fall into schism, that is a mis-
fortune which does not affect the others who remain faithful. If all fall away, the Eastern half of the Church disappears for a time as an actual fact; it remains as a theory and an ideal to be realized again as soon as they, or some of them, come back to union with Rome.
This is what has happened. There is at any rate no certain evidence of continuity from time before the schism in any of these Uniat Churches. Through the bad time, from the various schisms to the sixteenth and seventeenth centuries, there are traces, isolated cases, of the Latins, the Western missionaries, or the Greeks, or the Remnants of the East surrounding the West; but it cannot be claimed that any considerable body of Eastern Christians have kept the union throughout. The Maronites think they have, but they are mistaken; the only real case is that of the Italo-Greeks (who have never been schismatic). Really the Uniat Churches were formed by Catholics, such as with the West; but it cannot be claimed that any considerable body of Eastern Christians have kept the union throughout. The Maronites think they have, but they are mistaken; the only real case is that of the Italo-Greeks (who have never been schismatic).

2. The Chaldees are Unians converted from Nestorianism. In the sixteenth and seventeenth centuries a complicated series of Eastern and Western controversies the Nestorians led to not very stable unions of first one and then another party with the Holy See. Since that time there has always been a Uniat Patriarch of the Chaldees, through several times the person so appointed fell away into schism again and had to be replaced by another. The Chaldees are said now to number about 70,000 souls (Silbernagl, op. cit., 351; but Werner, 'Orbis Terr. Cath.', 166, gives the number as 33,000). Their primate lives at Mosul, having the title of Patriarch of Babylon. Under him are two archbishoprics and ten other sees. There are monasteries and several important convents. Five of the Nestorians are very similar to the Nestorian ones by the Dominicans at Mosul. Most of their canon law depends on the Bull of Pius IX, 'Reversurus' (12 July, 1867), published for the Armenians and extended to the Chaldees by 'Quo Synodali' (31 Aug. 1869). They have some students at the Propaganda College in Rome.

3. The Uniat Copts have had a vicar Apostolic since 1781. Before that (in 1442 and again in 1713) the Coptic patriarch had submitted to Rome, but in neither case was there any union of long duration. The number of Copts of this Rite has increased very considerably of late years, Leo XIII in 1895 restored the Uniat patriarchate. The patriarch lives at Cairo and rules over about 20,000 Catholic Copts.

4. The Abyssinian Church had many relations with Rome in past times, and Latin missionaries built up a considerable Uniat Abyssinian Church. But repeated persecutions and banishment of Catholics prevented this community from becoming a permanent one with a regular hierarchy. Now that the Government is tolerant, some thousands of Abyssinians are Unians. They have an Apostolic vicar at Keren. If their numbers increase, no doubt they will in time be organized under a Uniat Abuna who should depend on the Uniat Coptic patriarch. Their liturgy, too, is at present in a state of disorganization. It seems that the Monophysite Abyssinian books will need a good deal of revision before they can be used by Catholics. Meanwhile the priests ordained for this rite have a translation of the Roman Missal in their own language, an arrangement that is not meant to be more than a temporary expedient.

5. The Catholic Syrian Church dates from 1781. At that time a number of Jacobite bishops, priests, and lay people, who had agreed to reunion with Rome, elected one Ignatius Girwe to succeed the dead Jacobite patriarch, George III. Girwe sent to Rome asking for recognition and a pallium, and submitting in all things to the pope's authority. He was then deposed by those of his people who clung to Jacobitism, and a Jacobite patriarch was elected. From this time there have been two rival successions. In 1850 the Catholic Syrians were acknowledged by the Turkish Government as a separate millet. The Uniat patriarch, with his See at Antioch, now has his See at Damascus. Under him are three archbishoprics and six other bishoprics, five monasteries, and about 25,000 families.

6. There is also a Uniat Church of Molobar formed by the Synod of Damiran in 1599. This Church, too, has passed through stormy periods; quite lately, since
the Vatican Council, a new schism has been formed from it of about 30,000 people who are in communion with neither the Catholics, nor the Jacobites, nor the Nestorians, nor any one else at all. There are now about 200,000 Malabar Uniates under three bishops: Apollonic (at Trichur, Changanacherry, and Ernakulam).

7. The Uniat Armenians are an important body numbering altogether about 130,000 souls (Silbernagl, 344). Like their Gregorian countrymen, they are scattered about the Levant, and they have congregations in Russia and Italy. There have been one or more or less temporary reunions of the Armenian Church since the fourteenth century, but in each case a rival Gregorian party set up rival patriarchs and bishops. The head of the Catholic Armenians is the Uniat Armenian Patriarch of Constantinople (since 1839), in whom is joined the patriarchate of Cilicia. He always takes the name Peter, and rules over three titular archbishops and fourteen sees, of which one is Alexandria and one Isphahan in Persia (Werner, 151; Silbernagl, 346). After much dispute he is now recognized by the Porte as the head of a separate millet, and by his representatives before the Uniat bodies that have as yet no political organization. There are also many Uniat Armenians in Austria-Hungary who are subject in Transylvania to the Latin bishops, but in Galicia to the Armenian Archbishop of Lemberg. In Russia there is an Armenian Uniat Society, and immediately after the Mehitartists (founded by Mechitar of Sebaste in 1711) are an important element of Armenian Catholicism. They are monks who follow the Rule of St. Benedict and have monasteries at San Lazaro outside Venice, at Vienna, and in many towns in the Balkans, Armenia, and Russia. They have missions in all the Levant, schools, and presses that produce important liturgical, historical, and theological works. Since 1869 all Armenian Catholic priests must be celibate.

8. Lastly, the Maronite Church is entirely Uniat. There is much dispute as to its origin and the reason of its separation from the Syrian national Church. It is certain that it was formed around monasteries in the Lebanon founded by a certain John Maro in the fourth century. In spite of the indignant protests of all Maronites (Assemani, "Sisl. Orient.," II, 291 sq.; J. Duhoux, "Histoire du Mon. Maronites du Liban, leur constance perseverance dans la Foi catholique," etc.), there is no doubt that they were separated from the old See of Antioch by the fact that they were Monothelites. They were reunited to the Roman Church in the twelfth century, and then (after a period of wandering) since 1216, when their patriarch, Jeremias II, made his definite submission, they have been unswervingly faithful, alone among all Eastern Churches. As in other cases, the Maronites, too, are allowed to keep their old organization and titles. Their head is the Maronite Patriarch of Antioch and all the East, successor to Monothelite rivals of the old line, who, therefore, in no way represents the original patriarchate (Duchesne, "Origines du culte chrétien," second ed., p. 65, note). He is also the civil head of his nation, although he has no biret from the sultan, and lives in a large palace at Bkerki in the Lebanon. He has under him all the general titular bishops. There are many monasteries and convents. The present law of the Maronite Church was drawn up by the great national council held in 1786 at the monastery of Our Lady of the Almond Tree, at Sidlat-al-Luizer in the Lebanon. There are about 300,000 Maronites in the Lebanon and scattered along the Syrian coast. They also have colonies in Egypt and Cyprus, and numbers of them have lately begun to emigrate to America. They have a national college at Rome.

This completes the list of all the Eastern Churches, whether schismatist or Uniat.

In considering their general characteristics we must first of all again separate the Uniates from the others. Uniates are Catholics, and have as much right to be so treated as Latins. As far as faith and morals go they must be numbered with us; as far as the idea of an Eastern Church may still be maintained and the state of opposition to the Holy See, they repudiate it as strongly as we do. Nevertheless, their position is very important as being the result of relations between Rome and the East, and as showing the terms on which reunion between East and West is possible.

III. CHARACTERISTICS OF THE EASTERN CHURCHES.—Although these Churches have no communion among themselves, and although many of them are bitterly opposed to the others, there are certain broad lines in which they may be classed together and contrasted with the West.

The first of these is their national feeling. In all these groups the Church is the nation; the vehement and often intolerant ardor of what seems to be their religious conviction is always really national pride and national loyalty under the guise of theology. This strong national feeling is the natural result of their geographical circumstances. For centuries, ages, various nations have lived side by side and have carried on bitter opposition against each other in the Levant, Syria, Egypt, Mesopotamia, and the Balkans; they have never had one homogeneous population speaking one language. From the beginning, nationalism in these parts has been a question not to the Pope, but of a community held together by its language, striving for supremacy with other communities. The Roman nation accentuated this. Rome and then Constantinople was always a foreign tyranny to Syrians and Egyptians. And already in the fourth century they began to accentuate their own nationalism, crushed in politics, by taking up an anti-imperial form of religion, by which they could express their hatred for the Government. Such an attitude has characterized these nations ever since.

Under the Turk, too, the only possible separate organization was and is an ecclesiastical one. The Turk even increased the confusion. He found a simple and convenient way of organizing the subject Christians by taking their religion as a basis. So the Porte recognizes each sect as an artificial nation (millet). The Orthodox Church becomes the "Lebanese Maronite nation" (millet), inheriting the name of the old Empire. Then there were the "Armenian nation" or (Ermeni millet), the "Coptic nation," and so on. Blood has nothing to do with it. Any subject of the Porte who joins the Orthodox Church becomes a Roman and is submitted politically to the ecclesiastical patriarch; a Jew who is converted by Armenians becomes an Armenian. True, the latest development of Turkish politics has modified this artificial system, and there have been during the nineteenth century repeated attempts to set up one great Ottoman nation. But the effect of centuries is too deeply rooted in the opposition between Islam and Christianity too great, to make this possible. A Mohammedan in Turkey, whether Turk, Arab, or negro, is simply a Moslem, and a Christian is a Roman, or Armenian, or Maronite, etc. Our Western idea of separating politics from religion, of being on one hand loyal citizens of our own country and on the other, as a quite distinct thing, members of some Church, is unknown in the East. The millet is what matters; and the millet is a religious body. So obvious does this identification seem to them that till quite lately they applied it to us. A Catholic was (and still is) to a "French Christian," a Protestant an "English Christian"; in speaking French or Italian, Levantines constantly use the word nation for religion. Hence it is, also, that there are practically no conversions from one religion to another. Theology, dogma, or any kind of religious conviction counts for little or nothing. A man
keeps to his millet and hotly defends it, as we do to our fatherlands; for a Jacobite to turn Orthodox would be like a Frenchman turning German.

We have noted that religious conviction counts for little. It is hard to say how much any of these bodies (Monophysite) are due even sometimes what was once the cardinal issue of their schism. The bishops and more educated clergy have no doubt a general and hazy idea of the question—Nestorians think that everyone else denies Christ’s real manhood, Monophysites that all their opponents’ “divide Christ.” But what stirs their enthusiasm is not the metaphysical problem; it is the controversy of their religious and political rights. For the most part, this controversy is a question of the faith of their fathers, the heroes of their “nation” who were persecuted by the other millets, as they are to-day (for there everyone thinks that everyone else persecutes his religion). Opposed to all these little mild (plural of millet) there looms, each decade mightier and more dangerous, the West, Europe, Frenigistan (of which the United States, of course, forms part to them). Their lands are overrun with Frenigs; Frengi schools tempt their young men, and Frengi churches, with eloquent sermons and attractive services, their women. They frequent the schools of the West; for the Levantine has discovered that arithmetic, French, and physical science are useful helps to earning a good living. But to accept the Frengi religion means treason to their nation. It is a matter of course to them that we are Catholics or Protestants, those are our millets; but an Armenian, a Greek, or a Serb does not feel that his nation does not exist. He can hardly accept this argument, quotation of Scripture, texts of Fathers, accounts of Church history, break in vain. Your opponent listens, as perhaps even mildly interested, and then goes about his business as before. Frenigs are very clever and learned; but of course he is more so. His words are true, or whatever it is. Whole bodies move (as Nestorian dioceses have lately begun to go), with Russian Orthodoxy, and then every member moves too. One cleaves to one’s millet whatever it does. Certainly, if the heads of any body can be persuaded to accept reunion with Rome, the rank and file will make no difficulty, unless there be another party strong enough to proclaim that those heads have deserted the nation.

The second characteristic, a corollary of the first, is the intense conservatism of all these bodies. They cling fanatically to their riles, even to the smallest custom—because it is by these that the millet is held together. Liturgical language is the burning question in the Balkans. They are all Orthodox, but inside the Orthodox Church there are various millets—Bulgars, Vlachs, Serbs, Greeks, whose bond of union is the language used in church. So one understands the uproar made in Macedonia about language in the liturgy; the revolution among the Serbs of Skup in 1891, when their new metropolitan celebrated in Greek (Orth. Eastern Church, 3261); the ludicrous scandal at Monastir, in Macedonia, when they fought over a dead man’s body and got the whole town aghast because some wanted him to be buried in Greek and some in Rumanian (op. cit., 334). The great and disastrous Bulgarian schism, the schism at Antioch, are simply questions of the nationality of the clergy and the language they use.

It is then that the great difficulty in the way of reunion is this question of nationality in theology. Theology counts for very little. Creeds and arguments, even when people seem to make much of them, are really only shibboleths, convenient expressions of what they really care about—their nation. The question of nature and person in Christ, the Filioque in the Creed, azyme bread, and so on do not really stir the heart of the Eastern Christian. But he will not become a Frenig. Hence the importance of the Unit Churches. Once for all these people will never become Latins, nor is there any reason why they should. The wisdom of the Holy See has always been to restore union, to insist on the Catholic Faith, and for the rest to leave each millet alone with its own native hierarchy, its own language, its own rites. When this is done we have a Unit Church.

IV. ROME AND THE EASTERN CHURCHES.—The attempts at reunion from the 12th century (as of Michael Cerularius (1054)). Before that Rome was little concerned about the older Nestorian and Monophysite schisms. The conversion of these people might well be left to their neighbours, the Catholics of the Eastern Empire.

Naturalistically, in those days the Greeks argued about this conversion in the most disastrous way possible. It was the government that tried to convert them back along the most impossible line, by destroying their nationalities and centralizing them under the patriarch of the imperial city. And the means used were, frankly and crudely, persecution. Monophysite conventicles were broken up by imperial soldiers. Monophysite bishops banished or executed. Of course this confirmed their hatred of Caesar and Caesar’s religion. The East, before as well as after the great schism, did nothing towards pacifying the schismatics at its gates. Only quite lately has Russia taken a more reasonable and conciliatory attitude towards Nestorians and Frenigs and Abyssinians, who are outside her political power. Her attitude towards people she can persecute may be seen in her abominable treatment of the Armenians in Russia. It was, in the first instance, with the Orthodox that Rome treated with a view to reunion. The Second Council of Nicaea (1267) and the Council of Florence (1438–39) were the first efforts on a large scale. And at Florence were at least some representatives of all the Eastern Churches; as a kind of supplement to the great affair of the Orthodox, reunion with them was considered too. None of these represented the body of those who remain, important facts. They (the union of Florence especially) were preceded by elaborate discussions in which the attitudes of East and West, Orthodox and Catholic, were clearly compared. Every question was examined—the primacy, the Filioque, azyme bread, purgatory, celibacy, etc. The Council of Florence has not been forgotten in the East. It showed Eastern Christians what the conditions of reunion are, and it has left them always conscious that reunion is possible and is greatly desired by Rome. And on the other hand it has been used as an invaluable precedent for the Roman Court. The attitude of the Holy See at Florence was the only right one: to be quite unsparing in the question of faith and to concede everything else that possibly can be conceded. There is no need of uniformity in rites or in canon law; as long as practices are not absolutely bad and immoral, each Church may work out its own development along its own lines. Customs that would not suit the West may suit the East very well; and we have no right to quarrel with such customs as long as they are not forced upon us. So, at Florence, in all these matters there was no attempt at changing the old order. Each Church was to keep its own liturgy and its own canon law as far as that was not incompatible with the Roman primacy, which is de fide. The very decree that proclaimed the primacy added the clause, that the pope guides and rules the whole Church of God “without prejudice to the rights and privileges of other patriarchs.” And the East was to keep its married clergy and its leavened bread, was not to say the Filioque in the Creed, nor use solid statues, nor do any of the things they resist as being Latin. This has been the attitude of Rome ever since. Many popes have published decrees, Encyclicals, Bulls that show that they have nor forgotten the very idea of the Churches cut off from us by these schisms; in all these documents consistently the tone and attitude are the same. If there has been any latinitizing movement among Uniates, it has sprung up among themselves; they have
occasionally been disposed to copy practices of the far richer and mightier Latin Church with which they are united. But all the Roman documents point the other way. If any Eastern customs have been discouraged or forbidden, it is because they were obviously abuses and innovations, or practices to the prejudice of the Roman Rite, and to the disgrace of the Church. But in this case, too, the criterion was not conformity with the Roman Rite, but purification from supposed (sometimes mistakenly supposed) false doctrine. That the Maronite Rite is so latinized is due to its own clergy. It was the Maronites themselves who insisted on using our vestments, our ozone bread, our communion under one kind, till these things had to be recognized, because they were already ancient customs to them prescribed by the use of generations.

A short survey of papal documents relating to the Eastern Churches will make these points clear. Before the most important of these documents was Benedict XIV's Encyclical "Allatæ sunt" of 2 July, 1755. In it the pope is able to quote a list of his predecessors who had already cared for the Eastern Churches and their rites. He mentions acts of Innocent III (1198-1216), Honorius III (1216-27), Innocent IV (1243-54), Alexander IV (1254-57), Gregory X (1271-76), Nicholas III (1277-80), Eugene IV (1431-47), Leo X (1513-21), Clement VII (1523-34), Pius IV (1559-65), all to this effect. Gregory XIII (1572-85) founded at Rome colleges for Greeks, Maronites, Armenians. In 1602 Clement VIII published a decree allowing Eastern Rites to be preserved in their rite in Latin churches. In 1624 Urban VIII forbade the Armenians to become Latins, and Clement IX, in 1669, published the same order for Uniat Armenians ("Allatæ sunt", 1). Benedict XIV not only quotes these examples of former popes, he confirms the same principle by new laws. In 1742 he had re-established the Russian Church and the Byzantine Rite after the national Council of Zamosc, confirming again the laws of Clement VIII in 1595. When the Melkite Patriarch of Antioch wanted to change the unchanging Liturgy in his Rite, Benedict XIV answered: "The ancient churches of the Greek Church must be kept unaltered, and your priests must be made to follow them" (Bullarium Ben. XIV., Tom. 1). He ordains that Melkites, who, for lack of a priest of their own Rite, had been baptized by a Latin, should not be considered as having changed to our use: "We forbid absolutely that any Catholic Melkites who follow the Greek Rite should pass over to the Latin Rite" (ib., cap. xviii). The Encyclical "Allatæ sunt" forbids missionaries to convert schismatics to the Latin Rites; when they become Catholics they must join the corresponding Uniat Church (XI). In the Bull "Etsi pastoralia" (1742) the same pope orders that there shall be no precedence because of Rite. Each prelate shall have rank according to his own position or the date of his ordination, and mixed dioceses, if the bishop is Latin (as in Southern Italy), he is to have at least one half French, a quarter Latin. Most of all did the last two popes show their concern for Eastern Christendom. Each by a number of Acts carried on the tradition of conciliation towards the schismatical Churches and of protection of Uniat Rites. Pius IX, in his Encyclical "In Suprema Petri" (1846), again assuaged the fears of quasi-Ordinaries that we will keep unchanged your liturgies, which indeed we greatly honour!; schismatic clergy who join the Catholic Church are to keep the same rank and position as they had before. In 1853 the Uniat Rumanians were given a bishop of their own Rite, and in the Allocution made on that occasion, as well as in the one to the Armenians on 2 February, 1854, he again insists on the same principle. In 1860 the Bulgars, disgusted with the Phanar (the Greeks of Constantinople), approached the Catholic Armenian patriarch, Hasun; he, and the pope confirming him, promised that there should be no latinizing of their Rite. Pius IX founded, 6 January, 1862, a separate department for the Oriental Rites as a special section of the great Propaganda Congregation. Leo XIII in 1888 wrote a letter to the Armenians (Paterna chartusis) in which he exhorts the Gregorians to reunions, always on the same basis. Between this pope and his immediate pupil, perhaps the most important of all documents of this kind, is the Encyclical "Orientalium dignitas ecclesiastri" of 30 November, 1894. In this letter the pope reviewed and confirmed all similar acts of his predecessors and then strengthened them by yet severer laws against any form of latinizing the East. The first part of the Encyclical quotes examples of the care of former popes for Eastern Rites, especially of Pius IX; Pope Leo remembers also what he himself has already done for the same cause—the foundation of colleges at Rome, Philippopolis, Adrianople, Athens, and St. Ann. He commands that the Eastern Rites should be exactly observed in the consecration of their clergy. He praises these venerable Eastern liturgies as representing most ancient and sacred traditions, and quotes again the text that has been used so often for this purpose, circumdata varietate traditionum. The Constitutions of Benedict XIV against latinizers are confirmed; and new and most severe laws are promulgated: any missionary who tries to persuade a Uniat to join the Latin Rite is ipso facto suspended, and is to be expelled from his place. In colleges where boys of different Rites are educated there are to be priests of each Rite to administer the sacraments. In case of need one may receive a sacrament from a priest of another Rite; but for communion it should be, if possible, at least one who uses the same kind of bread. No length of use can prescribe a change of Rite. A woman in marrying may conform to her husband's Rite, but if she becomes a widow she must go back to her own.

In the Encyclical "Præclaræ gràtulætionis", of 20 June, 1894, that has been often described as "Leo XIII's testament", he again turned to the Eastern Churches and invited them in the most commendable and the gentlest way to come back to communion with us. He assures schismatics that no great difference exists between their faith and ours, and repeats once more that he would provide for all their customs without narrowness (Orth. Eastern Church, 434. 435). It was this letter that called forth the unpardonably offensive answer of Anthimos VII of Constantinople (op. cit., 435-438). Nor, as long as he lived, did Leo XIII cease caring for Eastern Churches. On 11 June, 1895, he wrote the letter "Unitas christianæ" to the Caesars, and on 24 December of the same year he restored the Uniat Coptic patriarchate. Lastly, on 19 March, 1895, in a motu proprio, he again insisted on the reverence due to the Eastern Churches and explained the duties of Latin delegates in the East. As a last example of all, Pius X in his Allocution, after the now annual solemn celebration of the Feasts to which his presence on 12 February, 1908, again repeated the same declaration of respect for Eastern rites and customs and the same assurance of his intention to preserve them (Echoes d'Orient, May, 1908, 129-31). Indeed this spirit of conservatism with consecration of rite and the increase of liturgical knowledge, so that there is reason to believe that whatever unintentional mistakes have been made in the past (chiefly with regard to the Maronite and Uniat Armenian rites) will now gradually be corrected, and that the tradition of the most entire acceptance and recognition of other rites
in the East will be maintained even more firmly than in the past.

On the other hand, in spite of occasional outbursts of anti-papal feeling on the part of the various chiefs of those Churches, it is certain that the vision of unity is beginning to make itself felt very widely in the East. One of the first place, education and contact with Western Europeans inevitably breaks down a great part of the old prejudice, jealousy, and fear of us. It was a Latin missionary who said lately: "They are finding out that we are neither so vicious nor so clever as they had thought." And it is with this intercommunication and growing hope of regeneration for their own nations by contact with the West. Once they realize that we do not want to eat them up, and that our mild is safe, whatever happens, they cannot but see the advantages we have to offer them. And with this feeling goes the gradual realization of something larger in the way of a Church than their own mild. Hisberto, it was difficult to say what the various Eastern schismatics understood by the "Catholic Church" in the creed. The Orthodox certainly always mean their own communion only ("Orth. Eastern Church", 366-370); the other smaller bodies certainly hold that they alone have the true faith; every one else—especially Latins—is a heretic. So, presumably, for them, too, the Catholic Church is only their own body. But this is passing with the growth of knowledge of other countries and a juster sense of perspective. The Nestorian who looks at a map of the world can hardly imagine that his sect is the only and whole Church of Christ. And with the apprehension of larger issues there comes the first wish for reunion. For a Church consisting of mutually excommunicate bodies is a monstrosity that is rejected by everyone (except perhaps some Armenians) in the East.

When the conviction has spread that they have everything to gain by becoming members of a really universal Church that union with Rome means all the advantages of Western ideas and a sound theological position, and that, on the other hand, it leaves the national spirit untouche, un-latinized, and only the stronger for so powerful an alliance, then indeed the now shadowy and remote issues about nature and person in Christ, the entirely artificial grievances of the Filioque and our azyme bread will easily be buried in the dust that has gathered over them for centuries, and Eastern Christians may some day wake up and find that there is nothing to do but to register again a union that ought never to have been broken.

**Easterwine, (or Esterwine), Abbot of Wearmouth, was the nephew of St. Benedict Bishop; b. 650, d. 7 March, 686. Descended from the noblest stock of Northumbria, as a young man he led the life of a soldier in the army of King Ecgfrid. When twenty-four years old he gave up the soldier's profession to become a monk in the monastery of Wearmouth, then ruled over by St. Benedict Bishop. He is described as a noble youth, conscious for his humility and bodily activity, but with infinite gentleness; a most exact observer of rules, he loved to perform the lowliest work. He was ordained priest in the year 679, and in 682 St. Benedict appointed him abbot of Wearmouth as coadjutor to himself. As superior "when he was compelled to repro\fe a fault, it was done with such tender sadness that the culprit felt himself incapable of any new offence which should bring a cloud over the benign brightness of that beloved face". In the year 680 a deadly pestilence overspread the country; it attacked the community at Wearmouth and the youthful abbot was one of its victims. He bade farewell to all, the day before he died, and passed away on 7 March, when only thirty-six years old. St. Benedict was absent in Rome at the time of his death and Sigfried was chosen by the monks as his successor. Easterwine is not known to have been the author of any works.**

**Easton, Adam, Cardinal, b. at Easton in Norfolk; d. at Rome, 15 Sept. (according to others, 20 Oct.), 1397. He joined the Benedictines at Norwich. He probably accompanied Archbishop Langham to Rome and, being a man of learning and ability, obtained a post in the Curia. He was made Cardinal-priest of the title of St. Cecilia by Urban VI, probably in Dec., 1381. On 7 March, 1381 or 1382, he was nominated Dean of York. In 1385 he was imprisoned by Urban on a charge of conspiring with five other cardinals against the pope and was deprived of his cardinalate. The next pope, Boniface IX, restored his cardinalate 18 Dec., 1389, and for a time Easton returned to England, where he held a prebend in Salisbury cathedral, which he subsequently exchanged for the living of Heygham in Norwich. He wrote many works, none of which are extant, and it is stated he has composed the Office for the Vigil of Our Lady.**

**East Syrian Rite. See Syrian Rite.**

**Eata, Saint, second Bishop of Hexham; date of birth unknown; d. 26 October, 656. Whether this disciple of St. Aidan was of the English, or of the abo-**
original Pictish race, there is no means of judging. As early as 651 he was elected Abbot of Melrose, which was then within the metropolitan jurisdiction of York. With the increase of the Christian population in northeastern Britain, the spiritual government of a territory so large as that which was then called Northumbria became too heavy a charge for one see; accordingly, in 678 Archbishop Theodore constituted Bernicia (that part of the Northumbrian realm which lay to the north of the River Tees) a suffragan diocese and consecrated Eata its bishop. The new diocese was to have two sees: one at Hexham and the other at Lindisfarne, at the two extremities of what is now the County of Northumberland. Eata was to be styled "Bishop of the Bernicians". This arrangement lasted only three years, and the See of Hexham was then assigned to Trumbert, while Eata kept Lindisfarne. In 684, after the death of Trumbert, St. Cuthbert was elected Bishop of Hexham, but when the latter expressed a desire to remain in his old home rather than to remove to the more southern see, Eata readily consented to exchange with him, and for the last two years of his life occupied the See of Hexham, while Cuthbert ruled as Bishop at Lindisfarne. Like most of the bishops of the see of the English Church, St. Eata was canonized by general repute of sanctity among the faithful in the regions which he helped to Christianize. His feast is kept on 26 October, the day of his death.

EBBO

Ebbo (Ebo), Archbishop of Reims, b. towards the end of the eighth century; d. 20 March, 851. Though born in German parts, he was educated at the court of Charlemagne who gave him his liberty. After his elevation to the priesthood he became librarian of Louis le Débonnaire and was his councillor in the government of Aquitaine. When Louis became emperor he appointed Ebbo archbishop of the vacant See of Reims in 847, on the suggestion of the emperor, he went to Rome in 822, in order to obtain permission from Pope Paschal I to preach the Gospel to the Danes. The pope not only gave his sanction but also appointed Ebbo papal legate for the North. In company with a certain Haltigar, probably the one who wrote the Historia Regum Francorum (Paris, 1824), 199-223; MANN, The Lives of the Popes in the Early Middle Ages (London and St. Louis, 1906), II, 216 sqq., and passim; HASSEK, Coniectanea Hdbch Frieburg im Breisg., 1871, passim; HAUCK, Kirchengeschichte Deutschland, Leipzig, 1900, II, 670 sqq. et passim; SIMON, Der römische Bischofs- und Kaisertitel im Mittelalter, 7th ed. (Stuttgart and Berlin, 1904), § 326, et passim.

Michael Ott.

EBENDORFER

Ebenendorf, Thomas, German chronicler, professor, and statesman, b. 12 August, 1385, at Hasselbach, in Upper Austria; d. at Vienna, 8 Jan., 1464. He made his higher studies at the University of Vienna, where, in 1412 he was appointed Bishop of Cambrai; in 1414 he received the degree of Doctor of Arts. Until 1427 he was attached to the Faculty of Arts and lectured on Aristotle and Latin grammar. After 1419 he was also admitted to the theological faculty as cursus biblicus. In 1427 he was made licentiate and in 1429 master of theology; soon after he became dean of the theological faculty, in which body he was a professor until his death. Three several times, 1423, 1429, and 1445 he was rector of the University of Vienna; he was also canon of St. Stephen's, and engaged in the apostolic ministry as preacher and as pastor of Perchtoldsfeld and of Falkenstein near Vienna. He ranks high among the professors of the University of Vienna in the fifteenth century. In the struggles which it had to sustain he championed the rights and interests of the university with zeal and energy. He represented the university at the Council of Basle (1432-34), took an active part in all its discussions, and was one of the delegates sent by the council to Prague to confer with the Hussites. From 1440 to 1444 he was sent to various cities as ambassador of Emperor Frederick III. He disapproved of the attitude of the Council of Basle towards both pope and emperor, and eventually withdrew from it. Under his advocacy of the rights of the Vienna University, coupled with the attacks of his opponents he lost the favour of the emperor, who saw in him a secret enemy. In 1451 and 1452 he was in Italy and went to Rome where he obtained from the pope a confirmation of the privileges of the University of Vienna. In the war
between Frederick III and Albert of Brandenburg he tried to act as mediator but only fell into greater disfavour with Frederick. His last years were clouded by the disturbances of the years 1401–1463 during which Austria had much to suffer from the Bohemian king, George of Podiebrad, and from internal conflicts.

Ebenendorf is one of the most prominent chroniclers of the fifteenth century. His “Chronicon Austriae” is a dull but frank and very detailed history of Austria to 1463. From 1400 on it is an indispensable source of Austrian history (ed. Pez in “Scriptores rerum Austriacarum continens lib. II” Leipzig, 1725, 693–986; in this edition all of Book I and part of Book II were omitted). His account of the Council of Basle appears in the “Diarium gestorum concilii Basilensis pro reductione Bohemorum” (ed. Birk in Monumenta concilii Basilensic, Scriptores, I, Vienna, 1875, 701–783). He wrote also a history of the Roman popes, “Chronica regum Romana”. Books VI and VII, which are of independent value as sources, were edited by Pribram in the “Mitteilungen des Institutes für österreichische Geschichtsforschung”, third supplementary volume (Innsbruck, 1900–04), 387–949. Many of his writings are as yet uncritical in among them commentaries on Biblical books, sermons, “Liber de schismatibus”, “Liber Pontificum Romanorum” (see Levinson, “Thomas Ebendorfer Liber Pontificum” in “Mitteilungen des Institutes für österreichische Geschichtsforschung”, XX, 1899, 60–90).

AEBHARD, Gesch. der Wiener Universität (Vienna, 1865), 491–535; ZEILLER, Thomas Ebendorfer als Geschichtsschreiber in Österreich Mitte und Neuzeit (Munich, 1884), III, 799–810; Allgemeine deutsche Biographie (Leipzig, 1877), v.; HÜTTER, Nomenclator (Innsbruck, 1866), II, 682 sq.

J. P. KIRSCH.

EBERHARD, MATTHIAS, Bishop of Trier, b. 15 Nov., 1815, at Trier (Germany), d. there 30 May, 1876. After successfully completing the gymnasium course of his native town, he devoted himself to the study of theology, was ordained in 1839, and soon after made assistant at St. Castor's in Coblenz. In 1842 Bishop Arnoldi made him his private secretary, and, at the end of the same year, professor of dogmatics in the seminary of Trier. From 1849 to 1862 he was director of the seminary and also preacher at the cathedral. In 1850 he became a member of the council; from 1852 to 1856 he was representative of his fellow-citizens in the Prussian Lower Chamber, where he joined the Catholic section. On 7 April, 1862, he was preconized as auxiliary Bishop of Trier; after Arnoldi's death he was proposed for the episcopal see, but the Prussian Government acknowledged him only after the death of Arnoldi's successor, Pellrath, 16 July, 1867. Having chosen St. Charles Borromeo for his ideal, he spared no exertion, on the one hand, to make his clergy learned, zealous, devout, and thoroughly cultured, and on the other to cultivate a truly Christian and religious spirit in the people. To attain this double end, he bestowed very great care upon his seminary and demanded a conscientious observation of its rules on the pastoral conferences and the annual retreat. In the parishes he insisted on the instruction in Christian doctrine and on the giving of missions, took care that religious associations were established, especially among the youths and men, and tried to found everywhere good libraries for the people. At the Vatican Council he appeared several times as a speaker, he belonged to the minority of the bishops, who considered the definition of the pope's infallibility as inopportune for the time being; but as soon as the matter had been decided, he published the constitution at once. When, in the beginning of the seventies, the Prussian Government wished to fetter bishops and priests by its ecclesiastico-political legislation, Bishop Eberhard unflinchingly defended the rights of the Church and thus became one of the first victims of the so-called Kulturkampf. At first he was fined an exorbitant sum, but since he could not pay it, he was retained in the prison of Trier from 6 March to 31 December, 1874. New persecutions began after he had been dismissed; the flourishing institutions which belonged to the Church were closed and the appointment of priests was made impossible; the grief at the unhappy condition of his diocese accelerated his death. He is the author of a dissertation “De tituli Sedis Apostolicae ad insigniandam sedem Romanam usu antiquo ac in singulis” (Trier, 1846). His sermons, masterpieces of oratory, were edited after his death by Ditseh in 6 vols. (Trier, 1877–1883; Freiburg, 1894–1900). MÜLLER, Matthias Eberhard (Würzburg, 1874); KRAFT, Matthias Eberhard (Trier, 1878); DITSCHEID, Matthias Eberhard im Kulturkampf (Trier, 1900).

PATRICIUS SCHLAGER.

Eberhard of Ratisbon (or Salzburg; also called Eberhardus altahensis), a German chronicler who flourished about the beginning of the fourteenth century. Hardly anything is known of his life; the only positive facts are obtained from documents of the years 1294–1305, which show that within this period he was active as a magister, Augustinian canon, and archdeacon. He is the author of a chronicle that seems to have been written with the election of Rudolf of Habsburg and extends to 1305. He desired to give an account of Bavarian history only, but was unable to fully execute this intention. In reality he describes more or less fully events occurring outside of Bavaria that seem to him of importance. The value of the chronicle is increased by the greater detail with which he treats the last five years, and in this part are also added important letters which serve to make the narrative more life-like. There is no doubt that the work was influenced by Hermann, the celebrated Abbot of Niederaltaich, the founder of a new and brilliant period of annalistic writing and to whom is due a wonderful development in the art of historical writing in Bavaria during the latter half of the thirteenth century. The “Annales” of Eberhard were formerly held to be a direct continuation of Hermann's chronicle, but in the introduction to his edition of the “Annales” Jaffé has disproved this hypothesis. Eberhard's chronicle is, rather, an independent work, connected with its continuations (the so-called “Continuatio Altahensis” and the “Continuatio Ratisponensis”) only by their occasional paraphrases of what Eberhard has said or by information they occasionally give to his statements. In the earliest history of “Annales” is that of H. Canisius in his “Lectiones antiques”, I, 307–358. An improved edition was published by Böhmer, “Fontes”, II, 526–583, and another by Jaffé in “Mon. Germ. Hist., Scriptores”, XVI, 502–605.

PATRICIUS SCHLAGER.

EBIONITES.—By this name were designated one or more early Christian sects infected with Judaistic errors.

The word Ebionites, or rather, more correctly, Ebionites, “Ebionites”, is a transliteration of the Aramaic אֶבְיוֹנִי, meaning “poor men”. It first occurs in Irenæus, Adv. Haer., I., xxvi, 2, but without designation of meaning. Orig. (C. Celsum, II, 1; De Princ., IV, i, 22) and Eusebius (Hist. Eccl., III, xxxii) refer the name of the sects to the poverty of their understanding, or to the poverty of the Law to which they clung, or to the poor opinions they held concerning Christ. This, however, is obviously not the historic origin of the name. Other writers, as Tertullian (De Præser., xxiii; De Caném Chr., xiv, 18), Hippolytus (cf. Pseudo-Tert., Adv.
EBIONITES

Hær. III, as reflecting Hippolytus's lost "Syntagma")
and Epiphanius (Hær. xxx, xxxi), derive the name of the sect from a certain Ebion, its supposed founder. Eph. 
epiphanius even mentions the place of his birth, a hamlet
called Cochabe in the district of Bashan, and relates that
he travelled through Asia and even came to Rome. Of modern scholars Hilgenfeld has main-
tained the historical existence of this Ebion, mainly
on the ground of some passages ascribed to Ebion by
St. Jerome (Comm. in Gal., iii, 11) and by the author of
a compilation of patristic texts against the Monothelites.
But these passages are not likely to be genuine. Ebion, otherwise unknown to history, is probably only an invention to account for the name
Ebionites. The name may have been self-imposed by those
who gladly claimed the beatitude of being poor in
spirit, or who claimed to live after the pattern of the
first Christians in Jerusalem, who laid their goods at
the feet of the Apostles. Perhaps, however, it was
first imposed by others and is to be connected with
the notorious poverty of the Christians in Palestine
(cf. Gal., ii, 10). Recent scholars have plausibly
maintained that the term did not originally designate
a particular sect, but merely the orthodox Christians
of Palestine who continued to observe the Mosaic Law.
These, ceasing to be in touch with the bulk of the
Christian world, would gradually have drifted away from the standard of orthodoxy and become
formal heretics. A stage in this development is seen
in Irenaeus's "Dialogue of the Heresies" (iv, xxxvi)
chapter xlvii (about a.d. 140), where he speaks of two
sects of Jewish Christians estranged from the Church;
whom he observes the Mosaic Law for themselves,
but do not observe observance thereof from others;
and those who hold it of universal obligation. The
later form of this system is Pantheism, a middle way
between the former St. Justin would hold communion, though not
all Christians would show them the same indulgence.
St. Justin, however, does not use the term Ebionites,
and when this term first occurs (about a.d. 175) it
designates a distinctly heretical sect.

The doctrines of this sect are said by Irenaeus to be
like those of Cerinthus and Carpocrates. They
denied the Divinity and the virginal birth of Christ;
they clung to the observance of the Jewish Law;
they regarded St. Paul as an apostate, and only used a
Common (or Jewish) Gospel to St. Matthew (Adv. Hær., i, xxvi,
2; III, xxxii, 2; IV, xxx, 4; V, 1, 9, 10; 3, 10;
and trines are similarly described by Hippolytus (Philos.,
VIII, xxii, X, xviii) and Tertullian (De carne Chr.,
xiv, 18), but their observance of the Law seems no
longer so prominent a feature of their system as in the
account given by Irenaeus. Origen is the first (C.
Cels. V, i, xi) to mark a distinction between two classes
of Ebionites, a distinction which Eusebius also gives
(Hist. Eccl., III, xxvii). Some Ebionites accept, but
others reject, the virginal birth of Christ, though all
reject His pre-existence and His Divinity. Those
who accepted the virginal birth seem to have had
more exalted views concerning Christ and, besides
observing the Sabbath, to have kept the Sunday as a
memorial of His Resurrection. The milder sort of
Ebionites were probably fewer and less important than
their stricter brethren, because the denial of the virgin
birth is generally only attributed to them. (Origin, Hom.
in Luc., viii, xvi.) St. Epiphanius calls the more hereti-
ical section Ebionites, and the more Jewish-minded,
Nazarenes. But we do not know whence St. Ep-
iphanius obtained his information or how far it is reli-
able. It is very hazardous, therefore, to maintain, as
is sometimes done, that the distinction between
Nazarenes and Ebionites goes back to the earliest
days of Christianity.

Besides these merely Judaistic Ebionites, there ex-
isted a later Gnostic development of the same heresy.
These Ebionite Gnostics differed widely from the
main schools of Gnosticism, in that they absolutely
rejected any distinction between Jehovah the De-
urge, and the Supreme Good God. Those who regard
this distinction as essential to Gnosticism would even
object to classing Ebionites as Gnostics. But on the
other hand the general character of their teaching is
unmistakably Gnostic. This can be gathered from the
Pseudo-Clementines and may be summed up as
follows: Matter is eternal, and an emanation of the
Deity; nay it constitutes, as it were, God's body.
Creation, therefore, is but the transformation of pre-
existing material. God thus 'creates' the Universe by
the instrumentality of His wisdom which is de-
scribed as a "demiurge," an "emanation," or "produc-
ting the world. But this Logos, or Sophia, does not constitute a different person, as in Christian
theology. Sophia produces the world by a successive
evolution of syzygyes, the female in each case preceding
the male but being finally overcome by him. This
universe is, moreover, divided into two realms, that
of good and that of evil. The Son of God rules over
the realm of the good, and to him is given the world
to come, but the Prince of Evil is the prince of
this world (cf. John, xiv, 30; Eph., i, 21; vi, 12).
These passages mention a Son of God to be born,
but not the ordinary "Christ" or "Messiah." Those who
were born were, however, not only a "demiurge,"
but a creature, yet not equal to, nor even to be compared with, the Father (ἀυτοκεφαλὴν 
οὐκ ὄντα— "Hom.," xvi, 16). Adam was the bearer
of the first revelation, Moses of the second, Christ of
the third and perfect one. The union of Christ with
Judaism is involved in the "Logos" or "The Word"
knowledge (gnosis), by believing in God the Teacher,
and by being baptized unto remission of sins. Thus
he receives knowledge and strength to observe al
the precepts of the law. Christ shall come again to tri-
umph over Antichrist as light dispels darkness. The
particularism of Gnosticism with its Pagan Dualism, Judaism, and Christianity fused together, and here and there
reminds one of Mandaic literature. The "Recogni-
tions," as given us in Rufinus's translation (revision?),
come nearer to Catholic teaching than do the "Homi-
lies."

Amongst the writings of the Ebionites must be
mentioned (a) their Gospel. St. Irenaeus only states
that they used the Gospel of St. Matthew. Eusebius
modifies this statement by speaking of the so-called
Gospel according to the Hebrews, which was known to
Hegesippus (Eus. Hist. Eccl., IV, xxx, 8), the later
Jerome, De vir. ill., 7, and Clem. Alex. (Strom., II, ix,
45). This, probably, was the slightly modified Ara-
maic original of St. Matthew, written in Hebrew
characters. But St. Epiphanius attributes this to the
Nazarenes, while the Ebionites proper only possessed
an incomplete, falsified, and truncated copy thereof
(Adv. Hær., xxxix, 9). It is probably identical with
the Gospel of the Twelve.

(b) Their Apocrypha: "The Circuits of Peter" (περιαπό 
πέτρου) and Acts of the Apostles, amongst
which the "Ascents of James" (ἀσάρχοι Ιακώβος).
The first-named books are substantially contained
in the Clementine Homilies under the title of Clement's
"Compendium of Peter's itineraries sermons", and also
in the "Recognitions" ascribed to the same. They
form an early Christian didactic novel to propagate
Ebionite views, i.e. their Gnostic doctrines, the
supremacy of James, their connexion with Rome, and
their antagonism to Simon Magus. (See Clemen-
tines.)

(c) The Works of Symmachus, i.e. his translation
of the Old Testament (see Versions of the Bible;
Symmachus the Exegete) and his "Interpretation"
against the canonical Gospel of St. Matthew. The
latter work, which is totally lost (Eusebius, Hist.
Eccl., VI, xvi; Jerome, De vir. ill., iv), is probably
identical with "De distinctione preceptorum", mentioned
by Ebed Jeu (Assenian, Bibli. Or., III, 1).

(d) The book of Elcesait and the "Hidden Power"
(οὐσία), purporting to have been written about A.D. 100

243
and brought to Rome about A.D. 217 by Alciatiades of Apumae. Those who accepted its doctrines and its new baptism were called Elchasites. (Hipp, "Philos.," IX, xiv-xvi; Epiph., "Haer.," xiv, 1; iii, 1.)

Of the history of this sect hardly anything is known. It received not only a strong influence in the East and none at all in the West, where they were known as Symmachiani. In St. Epiphanius's time small communities seem still to have existed in some hamlets of Syria and Palestine, but they were lost in obscurity. Further east, in Babylonia and Persia, their influence is probably traceable amongst the Mandaeans, and it is suggested by Ulthorn and others that they may be brought into connexion with the origin of Mohammedianism.

Ebner, the name of two German mystics, whom historical research has shown to have been in no wise related.

(1) Christina, b. of a patrician family on Good Friday, at Nuremberg, 1277; d. at Engelthal, 27 December, 1535. From her mother she inherited a deeply religious spirit, which early manifested itself in a firm resolve for prayer and mortification. Hardly had she made her First Communion when her parents accorded her a desire, which she had expressed since her seventh year, of entering the Dominican convent at Engelthal in the vicinity of Nuremberg. At the end of her year of novitiate she was stricken with a dangerous illness, which reappeared three times annually from her thirteenth to her twenty-third year. Each year, for the remainder of her life, she suffered a relapse of this mysterious sickness. Christina did not, however, on this account relax her penitential practises, nor fail in her duties as superior, to which she had been early elected. In her thirteenth year she began to enjoy frequent visits from the Master, from whose words she drew light and counsel for her own direction. As a result she was misunderstood by all save her confessor, Father Konrad of Füssen (O.P.), at whose request she in the Advent of 1317, she began to write a diary of her spiritual experiences in chronological order. After an introduction in which she reviews in a simple, unaffected manner the whole history of her life till 1317, this touching piece of mystical literature is carried on till 1533. She speaks of herself as the third person as von dem menschen. Most of this diary was written by her own hand save when she dictated on account of illness. It is preserved, in a complete version of the fifteenth century, in a manuscript (cod. 90) at Nuremberg. Excerpts are to be found also at the same place (cod. 81, 91), at Stuttgart (cod. 90), and Medilingen. We learn from this source that Christina played an important part by her prayers in the settlement of the difficulties arising from the riots at Nuremberg in 1518; from the earthquake of the same year: the Black Death; the Flagellants' processions, and the long imprisonment of the local domain at Liesenhof between Louis the Bavarian and the Holy See. She also tells us of the absence of a director from the removal of Konrad to Freiburg in 1324 till 1331, when Henry of Nördlingen visited her and gave her advice sufficient for the remainder of her life. The treatise "Von der genaden," the Stuttgart Literatur, published over her name in 1871 is probably not her work.

(2) Margaretha, b. of rich parents at Donauwörth, 1291; d. 20 June, 1351. She received a thorough classical education in her home, and later entered the Dominican convent at Maria-Medingen near Dillingen, where she was solemnly professed in 1306. In 1312 she was dangerously ill for three years, and subsequently for a period of nearly seven years she was most of the time at the point of death. Hence she could exercise her desire for penance only by abstaining from wine, flesh, and only. On the occasion of a return from home, whether she had gone during the campaign of Louis the Bavarian, her nurse died, and Margaretha grieved insensibly, until Henry of Nördlingen assumed her spiritual direction in 1332. The correspondence that passed between them is the first collection of this kind in the German language. At his command she wrote her own hand, containing all her revelations and intercourse with the Infant Christ, as also all answers which she received from Him even in her sleep. This diary is preserved in a manuscript of the year 1353 at Medelen. From her letters and diary we learn that she never abandoned her adhesion to Louis the Bavarian, whose soul she learned in a vision had been saved.

THOS. M. SCHWERTNER.

Eccehlinia, abraham. See Abraham Eccehlinia.

Ecclesiarch. See SACHRITAN.

Ecclesiastes (Sept. Ecclesiastes, in St. Jerome also Conisator, "Preacher") is the name given to the book of Holy Scripture which usually follows the Proverbs; the Hebrew Qoheleth probably has the same meaning. The word preacher, however, is not meant to suggest a congregation nor a public speech, but only the solemn announcement of sublime truths (נְטֵנַי, passive נטני, Lat. congregare, I (III), K., vii, 3; נטני, in publico, palem, Prov., v, 11; xxvi, 26; נטני to be taken either as a feminine participle, and would then be either a simple abstract noun, praecomium, or in a poetic sense, nova dangers, or must be taken as the noun, like the proper nouns for similar formation, Ecd., i, 55, 57; corresponding to its use, the word is always used as masculine, except vii, 27). Solomon, as the herald of wisdom, proclaims the most serious truths. His teaching may be divided as follows.

Introduction.—Everything human is vain (i, 1-11); for man, during his life on earth, is more transient than all things in nature (i, 1-7), whose unchangeable course he admires, but does not comprehend (i, 8-11).

Part I.—Vanity in man’s private life (i, 12-iii, 15): man is human wisdom (i, 12-14); vain are pleasures and pomp (i, 12-17); St. Gregory of Tours has added the proof that all things are immutably predestined and are not subject to the will of man (iii, 1-15). Then, rhetorically exaggerating, he draws the conclusion: "It is not better to enjoy life’s blessings which God has given, than to waste your strength uselessly?" (iii, 24-20). In this first part, the reference to the writer himself, the self-acccusation, on account of the excessive luxury described in III Kings, x, is placed in the foreground. Afterwards, the author usually prefacces his meditations with an "I saw", and explains what he has learned either by personal observation or by other sources, and on what he has meditated. Thus he says—

Part II.—Sheer vanity also in civil life (iii, 16-13); vain and cheerless is life because of the iniquity which reigns in the halls of justice (iii, 16-22) as well as in the intercourse of men (iv, 1-3). The strong expressions
in iii, 18 sqq., and iv, 2 sq., must be explained by the writer's tragic vein, and this does credit to the writer, who, speaking as Solomon, deplores bitterly what has often enough happened in his kingdom also, whether through his fault or without his knowledge. The deepest rule of the king was described in advance by Samuel, and Solomon cannot be cleared of all guilt (see below). But even the best prince will, to his grief, find by experience that countless wrongs cannot be prevented in a large empire. Qoheleth does not speak of the wrongs which he himself has suffered, but of those which he has prevented. Other of life's vanities consist in the fact that mad competition leads many to fall into idleness (iv, 4-6); a third causes many a man to turn and greed to shun society, or even to lose a throne because his unwisdom forbids him to seek the help of other men (iv, 13-16). Qoheleth then turns once more to the three classes of men named: to those who groan under the weight of injustice, in order to exhort them not to sin against God by murmuring against Providence, for this would be tantamount to dishonouring God in His temple, or to breaking a sacred vow, or to denying Providence (iv, 17-5, 8); in the same way he also turns the counsel to the wise (v, 9-10) and describes the miseries of the supposed foolish king (vi, 1-6). A long oratorical amplification closes the second part (vi, 7-5, 10). The immutable predestination of all things in a world which must be taught man contentment and modesty (vi, 7-7, 1, Vulg.). A serious life, with all frivolity, is in vain (vii, 2-3). Instead of passionate outbreaks (vii, 8-5, 15), he recommends a golden mean (vii, 16-23). Finally, Qoheleth inquires into the deepest and last reason of "vanity" and finds it in the sinfulness of woman; he evidently thinks also of the first woman, through whom the will of God (apart from man) turned the world (vii, 24-30). In this part, also, Qoheleth returns to his admonition to enjoy in peace and modesty the blessings granted by God, instead of giving oneself up to anger on account of wrongs endured, or to avarice, or to other vices (iii, 22; v, 17 sq.; vii, 5).

Part III begins with the question: "Who is as wise as the wise man?" (In the Vulg., these words have been wrongly placed in chap. vii.) Qoheleth here gives seven or eight important rules for life as the quintessence of true wisdom. Submit to God's "the king's") will (viii, 1-5). If you observe that there is no end to all earth, content yourself "easy" (viii, 9-15). Do not attempt to solve all the riddles of life by human wisdom; it is better to enjoy modestly the blessings of life and to work according to one's strength, but always within the narrow limits set by God (viii, 16-17, 12. In the Vulg. ad alii miserebread us accepta.) In this "seige" of your city (by God) seek help in true wisdom (ix, 13-13, 15). It is always most important not to lose your temper because of wrongs done to you (x, 14-15). Then follows the repetition of the advice not to give oneself up to idleness; sloth destroys countries and nations, therefore work diligently, but leave the success to God without murmuring (x, 16-16, 6). Even amid the pleasures of life do not forget the Lord, but think of death and judgment (xi, 7-13, 8).

In the epilogue Qoheleth again lays stress upon his appointment as a teacher of wisdom, and declares that the pith of his teachings is: Fear God and keep the Commandments; for that is the whole man. In the above analysis, as must be expected, the writer of this article has been guided in some particulars by his conception of the difficult text before him, while he has placed much more importance on the same. Many critics do not admit a close connexion of ideas at all. Zapletal regards the book as a collection of separate aphorisms which form a whole only externally; Bickell thought that the arrangement of the parts had been totally destroyed at an early date; Siegfried supposed that the book had been supplemented and enlarged in strata; Luther assumed several authors. Most commentators do not expect that they can show a regular connexion of all the "sayings" and an orderly arrangement of the entire book. In the above analysis an attempt has been made to do this kind of work which, apart from historical sense, is not always to be expected.

Several parts must be taken in the sense of parables, e.g. what is said in ix, 14 sqq., of the siege of a city by a king. And in viii, 2, and x, 20, "king" means God. It appears to me that iv, 17, is not to be taken literally; and the same is true of x, 5 sqq. Few will have the patience to take xi, 1 sqq., figuratively. Chap. xii must conclude every one of the writer's thoughts with the fact in Qoheleth's style, "There is a time for everything", carried no deeper meaning than the words disclose at first sight. The strongest guarantee of the unity and sequence of thoughts in the book is the theme, "Vanitas vanitatum", which emphatically opens it and is repeated again and again, and (xii, 8) with which it ends. Furthermore, the constant repetition of vidit or of similar expressions, which connect the arguments for the same truth; finally, the sameness of verbal and structural forms of the writer's thought, with its hyperbolical language, from beginning to end. In order to reconcile the apparently conflicting statements in the same book or what seem contradictions of manifest truths of the religious or moral order, ancient commentators assumed that Qoheleth explained the course of the world. Modern commentators, on the other hand, have sought to remove these discrepancies by omitting parts of the text, in this way to obtain a harmonious collection of maxims, or even affirmed that the author had no clear ideas, and, e.g., was not convinced of the spirituality and immortality of the soul. But, apart from the statement that we cannot admit erroneous or varying views of life and faith in an inspired writer, we regard frequent alterations in the text or the proposed form of a dialogue as poor makeshifts. It suffices, in my opinion, to explain certain hyperbolical and somewhat paradoxical turns as results of the bold style and the tragic vein of the writer. If our explanation is correct, the chief reproach against Qoheleth—viz. that against his orthodoxy—falls to the ground. For iii, 17; xi, 9; xii, 7-14, point to another life as distinctly as can be desired, we cannot take it, 19-21, as a denial of immortality, and it is evident that in his whole book the author deplores only the vanity of the mortal or earthly life; but to this may be truly applied (if the hyperbolical language of the tragic mood is taken into consideration) whatever is said there by Qoheleth. We cannot find fault with his comparing the mortal life of man and his death to the life and death of the beast (in vv. 19 and 21 נפוג should always be taken as "breath of life"). Again, iv, 2 sq., is only a hyperbolical expression; in like manner Job (iii, 3) curses in his grief the day of his birth. True, some allege that the doctrine of immortality was altogether unknown to early antiquity; but even the Saviour (Luke, xx, 37) added the testimony of Moses for the resurrection of the dead and was not contradicted by his adversaries. And ix, 5 sq. and 10, must be taken in a similar sense. Now, in2ishing all things earthly to the resurrection, the very tendency of his book, Qoheleth admits the spirituality of the soul; this follows especially from xii, 7, where the body is returned to the earth, but the soul to God.

Sometimes Qoheleth also seems to be given to fatalism; for in his peculiar manner he lays great stress on the immutability of the laws of nature and of God's universe. But he considers this immutability as dependent on God's will (iii, 14; iv, 2; vii, 14 sqq.). Nor does he deny the freedom of man within the limits set by God; otherwise his admonitions to fear God, to work, etc. would be meaningless, and man would not have brought evil into the world through his own fault (vii, 23 sq.)
246

ECCLESIASTES

29. Heb.) Just as little does he contest the freedom of God's decrees, for God is spoken of as the source of all wisdom (ii, 26; v, 5). His views of life do not lead to Qoheleth to stoical indifference or to blind hatred; on the contrary he shows the deepest sympathy with the misery of the suffering and earnestly deprecates oppression and sin. In contentment with one's lot, in the quiet enjoyment of the blessings given by God, he discerns the golden mean, by which man prevents the vagaries of passion. Neither does he thereby recommend a kind of epicureanism. For the ever-recurring phrase, "Eat and drink, for that is the best in life," is only a type of wisdom which recalls man from all kinds of excesses. He recommends not idle, but moderate enjoyment, accompanied by incessant labour. Many persist in laying one charge on Qoheleth's door, viz., that of pessimism. He seems to call all man's efforts vain and empty, his life aimless and futile, and his lot deplorable. It is true that a sombre mood prevails in the book, that the author chose as his theme the description of the sad and serious sides of life: but is it pessimism to recognize the evils of life and to be impressed with them? Is it not rather the mark of a great and profound mind to be appalled by the more bitterly the scene of trouble and earthly, and, on the other hand, the peculiarity of the frivolous to ignore the truth? The colours with which Qoheleth paints these evils are indeed glaring, but they naturally flow from the poetical-oralatorical style of his book and from his inward agitation, which lifts him to the heights of language. "I will return to the Book of Job and in certain psalms. However, Qoheleth, unlike the pessimists, does not inveigh against God and the order of the universe, but only man. Chap. vii, in which he inquires into the last cause of evil, closes with the words, "I have found, that God made man right, and he hath entangled himself with an infinity of questions [or phantasms]" His philosophy shows us also the way in which man can find a modest happiness. While severely condemning exceptional pleasures and luxury (chap. ii), it counsels the enjoyment of those pleasures which God prepares for every man (viii, 15; ix, 7 sqq.; xi, 9). It does not purloin, but incites activity (ix, 10; x, 18 sqq.; xi, 1 sqq.). It stays him in his afflictions (v, 7 sqq.; vii, 5; x, 4); it consoles him in death (iii, 17; iv, 1); it discovers at every step how necessary is the fear of God. But Qoheleth's grief seems to be his inability to find a direct, smooth answer to life's riddles; hence he so frequently deplores the insufficiency of his wisdom; on the other hand, besides wisdom, commonly so called, i.e. the wisdom resultant from man's investigations, he knows another kind of wisdom which soothes, and which he therefore recommends again and again (vii, 12, 19; Heb. viii, 1; ix, 17; xii, 9-14). It is true, we feel how the author wrestles with the difficulties which beset his inquiries into the riddles of life; but he overcomes them and offers us an effective consolation even in extraordinary trials. Extraordinary also must have been the occasion which led him to compose the book. He introduces himself from the beginning and repeatedly as Solomon, and this forcibly recalls Solomon shortly before the downfall of the empire; but we know from the Scriptures that this had been prepared by various premonitions and had been foretold by the infallible word of the prophet (see below). We must picture to ourselves Solomon in these critical times, how he seeks in this sore trial by the wisdom which is a relief at all times; submission to the immutable will of God, the true fear of the Lord, undoubtedly must now appear to him the essence of human wisdom.

As the inspired character of Ecclesiastes was not settled in the Fifth Council, but only solemnly reaffirmed against Theodore of Mopsuestia, the faithful have always found elucidation and consolation in this book. Already in the third century, St. Gregory Thaumaturgus, in his paraphrase, then Gregory of Nyssa, in eight homilies, later Hugh of St. Victor, in nineteen homilies, set forth the wisdom of Qoheleth as truly celestial and Divine. Every age may learn from his teaching, but happiness must not be looked for on earth, not in his wisdom, nor in luxury, not in royal splendour; that many afflictions await everybody, in consequence either of the iniquity of others, or of his own passions; that God has put him up within narrow limits, lest he become overweening, but that He does not deny him a small measure of happiness if he does not seek things that are above him" (vii, 1, Vulg.), if he enjoys what God has bestowed on him, in the fear of the Lord and in salutary labour. The hope of a better life to come grows all the stronger the less this life can satisfy man, especially the man of high endeavour. Now Qoheleth does not intend this doctrine for an individual or for one people, but for mankind, and he does not prove it from supernatural revelation, but from pure reason. This is his cosmopolitan standpoint, which Kuenen rightly recognized; unfortunately, this commentator wished to conclude from this that the book originated in the far-off Solmnic times. Kuenen refuted the universal application of the meditations contained therein, to every man who is guided by reason, is unmistakable.

The Author of the Book.—Most modern commentators are of the opinion that Qoheleth's style points not to Solomon, but to a later writer. About this the following may be said:

(1) As a matter of fact, the language of this book differs widely from the language of the Proverbs. Some think that they have discovered many Aramaicisms in the text. "What can we say on this point?" (chap. vii, 12) cannot be gainsaid that Solomon and a great, if not the greatest, part of his people understood Aramaic. (We take the word here as the common name of the dialects closely related to the Biblical Hebrew.) Abraham and Sara, as well as the wives of Isaac and Jacob, had come from Charad; it is therefore probable that the language of that country was preserved, beside the language of Palestine, in the family of the Patriarchs; at any rate, in Moses' time the people still used Aramaic expressions. They exclaim (Ex., xvi, 15) "Hitherto we were as journeying in Egypt; but now, remained 12. A large portion of David's and Solomon's empire was peopled by Arameans, so that Solomon reigned from the Euphrates to Gaza [I (III) K., v, 4, Heb.; II Sam. (K.), x, 19; cf. Gen., xv, 18]. He was conversant with the science of the "sons of the East" and exchanged with them his wisdom (I K., v, 10-14, Heb.). But, as Palestine lay along the commercial routes between the Euphrates and Phenicia, the Israelites, at least in the north of the country, must have been well acquainted with Aramaic. At the time of King Ezechias even the officials of Jerusalem understood Aramaic (Is., xxxvi, 11; II K., xix, 14). Solomon could therefore assume, without hesitation, a somewhat Aramaic speech, if reason or mere inclination moved him. As a skilful writer, he may have intended, especially in his old age, and in a book whose style is partly oratorical, partly philosophical, partly poetical, to enrich the language by new turns. Goethe's language in the second part of "Faust" differs greatly from the first, and introduces many neologisms. Now Solomon seems to have had a more important reason for it. As it lay in his very character to remove the barriers between pagans and Israelites, he may have had the conscious intention to address this book, one of his last, not only the Israelites but his whole people; the Aramaic colouring of his language, then, served as a means to introduce himself to Aramaic readers, who, in their turn, understood Hebrew sufficiently. It is remarkable that the name of God, Jehovah, never oc-
ECCLESIASTES

247

ECCLESIASTES

curs in Ecclesiastes, while Elohim is found thirty-seven times; it is more remarkable still that the name Jah
dehad been omitted in a quotation (v, 3; cf. Deut., xxiii, 21). Besides, nothing is found in the book that
could not be known through natural religion, without the aid of revelation.

(2) The Aramaisms may perhaps be explained in
still another way. We probably possess the Old Testa
ment, not in the original wording and orthography,
but in a form which is slightly revised. We must un
questionably distinguish, it seems, between Biblical
Hebrew, an unchanging literary language and the
conversational Hebrew, which underwent constant
changes. For there is no instance anywhere that a
spoken language has been preserved for some nine
hundred years so little changed in its grammar and
vocabulary as the language of our extant canonical
books. Let us, for an instance, compare the English,
French, or German of nine hundred years ago with
those languages in their present form. Hence it seems
exceedingly daring to infer from the written Hebrew
the character of the spoken language, and from the
style of the book to infer the date of its composition.
Its literary language, on the contrary, which is a dead
language and as such essentially un
changeable, it is reasonable to suppose that in the
course of time its orthography, as well as single words
and phrases, and, perhaps here and there, some formal
elements, have been subjected to change in order to be
more suitable to later readers. But Ecclesiastes was received into the canon in some such later
edition. The Aramaisms, therefore, may also be
explained in this manner; at any rate, the supposition
that the time of the composition of a Biblical book
may be deduced from its language is wholly question
able.

(3) This is a fact admitted by all those critics who
ascibe Ecclesiastes, the Canticle of Canticles, portions
of Isaiah and of the Pentateuch, etc., to a later period,
without troubling themselves about the difference of
style in these books.

(4) The eagerness to find Aramaisms in Ecclesiastes
is also excessive. Expressions which are commonly
regarded as such are found now and then in many other
books. Hitzel thinks that he has found ten Arama
isms in Genesis, eight in Exodus, five in Leviticus, four
in Numbers, nine in Deuteronomy, two in Josue, nine
in Judges, five in Ruth, sixteen in Samuel, passim in
the Psalms, and several in Proverbs. For this there may
be a twofold explanation: Either the descend
ants of Abraham, a Chaldean, and of Jacob, who dwelt
twenty years in the Land of Canaan, and whose sons
were almost all born there, have retained numerous
Aramaisms in the newly acquired Hebrew tongue, or
the peculiarities pointed out by Hitzig and others are
no Aramaisms. It is indeed astonishing how accu
rately certain critics claim to know the linguistic
peculiarities of each of the numerous authors and of
every period of a language of which but little literature
is left to us. Zöckler affirms that almost every verse of
Qoheleth contains some Aramaism (Komm., p. 115);
Grotius found only four in the whole book; Hengstenberg admits ten; the opinions on this point
are so much at variance that one cannot help noticing how little imagination is left to us. But
peculiar or strange expressions are at once called
Aramaism; but, according to Hävernick, the Book of
Proverbs, also, contains forty words and phrases
which are often repeated and which are found in no
other book; the Canticle of Canticles has still more
peculiarities. On the contrary the Book of
Agesus, Zacharias, and Malachias are without any of
those peculiarities which are supposed to indicate so
late a period. There is much truth in Griesinger's
words: "We have no history of the Hebrew lan
guage".

(5) Even prominent authorities adduce Aramaisms
which are shown to be Hebraic by clear proofs or man
fest analogies from other books. There are hardly
any unquestionable Aramaisms which can neither be
found in other books nor regarded as Hebraisms,
which per chance have survived only in Ecclesiastes
without a detailed demonstration. (See Griesinger's
Commentary, pp. 23-31). We repeat here Weisse's
words: "Only the language remains as the principal
argument that it was written after Solomon; but how
fallacious in such cases is the merely linguistic proof,
nor need be mentioned after what has been said.

It is alleged that the conditions as described in
Ecclesiastes do not agree with those of the time of
Solomon. True, the author, who is supposed to be
Solomon, speaks of the oppression of the weak by
the stronger, or one official by another, of the denial
of right in the courts of justice (iii, 16; iv, 1; v, 7 sqq.;
vi, 9 sq.; x, 4 sqq.). Now many think that such
things could not have happened in Solomon's reign.
But it surely did not escape the wisdom of Solomon
that oppression occurs at all times and with every
people; the glaring colours, however, in which he
describes them originate in the tragic tone of the
whole book. Besides, which was the time of
Solomon, after his death, of oppressing his people, and
his son confirms the charge (I (III) K., xii, 4 and 14);
moreover, long before him, Samuel spoke of the despotism of the future kings (I Sam. K., viii, 11 sqq.). Many miss
in the book an indication of the past sins and the subse
quent repentance of the people, or it is possible that
Ecclesiastes was written at a later period. But if these
readers considered vii, 27-29, they could not help
seeing that Solomon's discourses were held at
women's intrigues and their consequences; if obedience
towards God is inculcated in various ways, and if
this (xii, 13) is regarded as man's sole destination, the
readers saw that the converted king feared the Lord;
in chap. ii sensuality and luxury are condemned so
vigorously that we may regard this passage as a su
cient expression of repentance. The openness, how
ever, with which Solomon accuses himself only heightens
the impression. This impression has at all times
been so strong, precisely because it is the experienced,
rich, and wise Solomon who brands the sinful aspira
tions of men as "vanity of vanities". Again, what
Qoheleth says of himself and his wisdom in xii, 9 sqq.,
cannot sound strange if it comes from Solomon, espec
ially if the passages he makes the fear of the Lord the
essence of wisdom. The passages iv, 13; viii,
10; ix, 13; x, 4, are considered by some as referring
to historical persons, which seems to me incorrect; at
any rate, indications of so general a nature do not
necessarily point to definite events and persons.
Other commentators think they have discovered traces of Greek philosophy in the book; Qoheleth
appears to be now a sceptic, now a stoic, now an epic
rean; but these traces of Hellenism, if existing at all,
are nothing more than remote resemblances too weak
to serve as arguments. (Cheyne (Job and Solomon)
sufficiently refuted Tyler and Plumptre. That iii, 12,
is a linguistic Graecism, has not been proved, because
the common meaning of δύναται έρωτάσθαι is retained by many
commentators; moreover, in 11 Sam. (K.), xii, 18,
δύναται έρωτάσθαι means 'to be sorry'; the verb, therefore,
is translated by έσται· and

As all the other internal proofs against the author
ship of Solomon are not more convincing, we must
listen to the voice of tradition, which has always attrib
uted Ecclesiastes to him. The Jews do not know the
Prophetic school by Solomon, but objected to the recep
tion, or rather retention, of the book in the canon;
Hillel's School decided definitely for its canonicity and
inspiration. In the Christian Church Theodore of
Mopsuestia and some others for a time obscured the
tradition; all other witnesses previous to the sixteenth
century favour the Solomonic authorship and the in
spiration. The book itself bears testimony for Solomon, not only by the title, but by the whole tone of the discussion, as well as in i, 12; moreover, in xii, 9, Qoheleth is expressly called the author of many proverbs. The ancient never so much as suspected that here, as in the Book of Psalms, Solomon only Jun. 4, 1913.

On the other hand, the attempt is made to prove that the details do not fit Solomon, and to contest his authorship with this single internal argument. The reasons adduced, however, are based upon textual explanations which are justly repudiated by others. Thus Hengstenberg sees (x, 16) in the king, "a man whose allusiveness is entirely that of Peretz Grätz, to Herod the Idumæan; Reusch rightly maintains that the writer speaks of human experiences in general. From ix, 13-15, Hitzig concludes that the author lived about the year 200; Bernstein thinks this ridiculous and opines that some other historical event is alluded to. Hengstenberg regards this passage as nothing more than a parable; on this last view also, the translation of the Septuagint is based (it has the subjunctive; ἐπὶ βασιλεῖς, "there may come a king"). As a matter of fact, Qoheleth describes only what has happened or may happen somewhere, in the sun's "right time; he does not speak of political situations, but of the experience of the individual; he has in view not his people alone, but mankind in general. If internal reasons are to decide the question of authorship, it seems to me that we might more justly prove this authorship of Solomon by much more right from the remarkable passage about the snares of woman (vii, 27), a passage the bitterness of which is not surpassed by the warning of any ascetic; or from the inanimate spirit of Qoheleth for wisdom; or from his deep knowledge of men and things. Considering everything we have seen, it is decisive to look for another author; on the contrary, the reasons which have been advanced against this view are for the great part so weak that in this question the influence of fashion is clearly discernible.

The time of the composition of our book is variously set down by the critics who deny the authorship of Solomon. Every period from Solomon to 200 has been suggested by them; there are even authorities for a later time; Grätz thinks that he has discovered a proof that the book was written under King Herod (40-4 B.C.). This shows clearly how little the linguistic criterion and the other internal arguments are to lead to an agreement of opinion. If Solomon wrote Ecclesiastes towards the end of his life, the sublime tone of the book is easily explained; for the joggers of God (II Kings, 11 sq.) which then came upon him would naturally move him to sorrow and repentance, especially as the breaking up of his kingdom and the accompanying misery were then distinctly before his eyes (see vv. 29 sqq.; 10). Amid the sudden ruin of his power and splendour, he might well exclaim, "Vanity of vanities!" But as God had promised to correct him "in mercy" (II Kings, vii, 11 sq.), the supposition of many ancient writers that Solomon was converted to God becomes highly probable. Then we also understand why his last book, or one of his last, consists of three thoughts: the vanity of earthly things, self-acquiescence, and emphatic appeal to obey the immutable decrees of Providence. The last was well suited to save the Israelites from despair, who were soon to behold the downfall of their power.

There is an unmistakable similarity between Ecclesiastes and the Canticle of Canticles, not only in the pithy shortness of the composition, but also in the emphatic repetition of words and phrases, in the boldness of the language, in the obscure construction of the whole, and in certain linguistic peculiarities (e.g. the use of the relative καθά). The loose succession of sententious thoughts however, reminds us of the Book of Proverbs, whence the epilogue (xii, 9 sqq.) expressly refers to Qoheleth's skill in parables. In the old lists of Biblical books, the place of Ecclesiastes is between Proverbs and the Canticle of Canticles: Sept., Talmud (Baba Bathra xiv, 2), Orig., Mel., Conel., Lact. (with others), etc., also in the Hexapla. Its position is different only in the Masoretic Bible, but, as is generally admitted, for liturgical reasons.

As to the contents, the critics attack the passages referring to the judgment and immortality: iii, 17; xi, 9; xii, 7; furthermore the epilogue, xii, 9 sqq., especially verses 15, 11; also some other passages. Bickell has expressed the opinion that the whole of the book, while being stitched and completely confused; his hypothesis found few advocates, and Euringer (Masorah hexaplera des Qoheleth, Leipzig, 1890) maintains, in opposition to him, that books had not at that early date taken the place of rolls. There is not sufficient evidence to assume that the text was written in verse, as Zapletal does.

Owing to its literalism, the translation of the Septuagint is frequently unintelligible, and it seems that the translators used a corrupt Hebrew text. The Septuagint and the Coptic translation follow the Septuagint. The Greek text, though translated from the Hebrew, is evidently also dependent on the text of the Septuagint. This text, with the notes of Origen, partly forms the Greek and Syriac Hexapla. The Vulgate is a shrift translation made by Jerome from the Hebrew and far superior to his translation from the Greek (in his commentary). Sometimes we cannot accept his opinion (in vi, 9, he most likely wrote quid cupias, and in viii, 12, ex eo quod protector). (See the remnants of the Hexapla of Origen in Field, Oxford, 1875; a paraphrase of the Greek text in St. Gregory Thaumaturgus, Migne, X, 987.) The Chaldean paraphrase is useful for commenting the Masoretic text, though it is without value. The commentary of Olympiodorus is also serviceable (seventh century, M., XClII, 477) and Eumenius, "Catena" (Verona, 1532). A careful translation from the Hebrew was made about 1400 in the "Graeca Veneta" (ed. Gebhardt, Leipzig, 1875).

In the Latin Church important commentaries were written, after the time of Jerome, or whom many depend, by Bonaventura, Nicol. Lyranus, Deriva, the Catholicus, and above all, D. Pinerus (seventeenth cent.), Malaise, H. Bouyer, A. LaRue, and Bossuet.

Modern Catholic commentaries: Schäfer (Freiburg im Br., 1870; Oxford, 1872); Matis (Paris 1871; R. Migne Paris, 1877); Giebhard (Paris, 1890); Zapletal (Freiburg, Switzerland, 1890).

Protestant commentaries: Zickler, tr. Taylor (Edinburgh, 1872); Bullock, in Speaker's Commentary (London, 1878); Commentary on the Bible (London, 1881); Wright, Trisé (London, 1882); Zöpf and Thiele (Hamburg, 1892); Hoffmann (Chur, 1893); Walsheber (Freiburg im Br., 1893).

G. GEBHARDT.

Ecclesiastical Art.—Before speaking in detail of the developments of Christian art from the beginning down to the present day, it seems natural to say something in regard to the vexed question as to the source of its inspiration. It would not be possible here to treat adequately all the various theories which have been propounded, but the essentials of the controversy may be given in a few words. Afterwards there will be some mention of the principal works which Christian art has brought to us and a setting forth of the influence of the Catholic Church in stimulating and directing that artistic spirit which for so many centuries it alone was destined to keep alive.

Origin of Christian Art.—There has been much discussion of late years as to the influences which were predominant in the development of early Christian art. Professor Wickhoff in a striking essay (Roman Art, tr., 1900) has contended that in the first century after Christ a distinctively Roman style was evolved both in painting and sculpture, the salient features of which he characterizes as impressionist or "illusionist". He marks several stages in the growth of this
style, and claims for it especially the creation of what he calls the "continuous" method of composition, i.e. a method by which several successive stages of the same history are depicted together in a single painting. Further, he contends that this Roman style was adopted by the Christian artists and that, though obscured and weakened, it pervaded the Roman world and maintained its identity throughout the Middle Ages, until eventually it quickened again into fuller life under the stimulus of the Renaissance. This view, an exaggeration of the Romanist hypothesis which long held the field, has been severely criticized by many competent authorities and notably by Strzygowski ("Orient oder Rom," 1901, and "Kleininsien", 1903), who attributes the predominant influence in the development of Christian art to the recrudescence of purely Oriental feeling. This, as he maintains, had always survived at Byzantium, Antioch, and Alexandria, and it became operative once more when the Greco-Roman artistic tradition at Rome had exhausted itself after the effort of a few centuries. Though Strzygowski may go too far when he claims that even the art of the Romanized provinces like Gaul or from the East directly to Rome, it seems highly probable that his contention is in substance accurate enough. It is significant that Professor André Michel in the monumental "Histoire de l'Art" (1905)—distinguishes his support to the theory that the Christian art of the Middle Ages was Roman rather than Romanesque, and of its origin. To him no doubt must be assigned the prevalence of the basilica type of church and the first effective conception of the possibilities of stone vaulting. But the transference of the seat of government by Honorius in 404 from Rome to Ravenna and the confusion that arose in the Western Roman Empire, the religious changes and the consequent development of art. If Rome was at all times the seat of the papacy, the vicars of Christ had at not this early date acquired any preponderating influence in the social and civil affairs of the Western world, while more than a hundred years after this, beginning with the seventh century, no less than thirteen pontiffs who succeeded in succession the chair of St. Peter were of Greek or Syrian origin. But what is perhaps most important of all, the Latin stock who occupied what was once the great city, but what now became a provincial town, was morally and intellectually effete. The motive power for such a development was to come from outside. The impetuous energy of the Teutonic tribes of the North was full of latent possibilities for the arts of peace, when that energy was once diverted from the strenuous occupations of a time of war. Once again, "Greco-empire victorem cepit"); but it was Greece enriched this time with the inheritance of Antioch, Ephesus, and Alexandria, while the culture that now travelled west and north found ultimately a more responsive soil than it had ever met with in Latium. In its adoption by Gothic, Franks, and Saxons, the art of Byzantium lost its rigidity, and something of its formalism. It was a living germ which soon developed an independent growth, and long before the Renaissance once more directed the minds of men to classic models, not only architecture and sculpture, but the arts of the painting and the plastic. Thus, and the first Christian founder was full of vigorous life and promise throughout all Western Europe.

The earliest specimens of decoration employed for a Christian purpose are found in the Roman catacombs. In the most ancient examples of all, the private chambers used for Christian interment and that, though obscure, there is decoration indeed, but it is only in a negative sense that it can be called Christian art, for while the abundant frescoes seen in the cemetery of Domitilla and notably in the cubicleum of Ambelius exclude such pagan elements as would be unseemly, the character of the painting is in every respect the counterpart of the ornamentation of the contemporary private houses buried at Pompeii. There is nothing distinctively Christian. Perhaps the frequent recurrence of the vine as a principal element in the scheme of decoration may have been meant to suggest the thought of the Eucharist, but is there any doubt that this is doubtful. Symbolism occurs early, but it can only be recognized with confidence in the more public cemeteries of the second century, e.g. that of St. Callistus; here, under the influence of the "Discipline of the Secret", it is hardly wrong to recognize the true beginnings of a distinctively Christian art. But the art in a most marked degree was rather the more frequent use of such pagan decoration familiar at the period. It seems constantly to be forgotten by those who discuss this subject that it was the deliberate object of the early Christian, during the ages of suspicion and persecution, to exclude from their places of sepulture all that would by its conspicuousness or strangeness attract the notice of the casual pagan intruder.

No wonder that the theme of the Good Shepherd is introduced again and again in the fresco decorations of the early catacombs. This is no indication, as rationalists have pretended, of an idolatrous mythology, but the very likeness of the beardless Good Shepherd to the type of the pagan Hermes Kriphorus—a likeness, however, which is never so exact as to lead to real confusion—constituted its recommendation to those who wished to hide their faith from the presence of the pagans and the people around them. In the same way the Orante, or praying figure, symbolic of the Church or the individual soul, bore a general resemblance to the statues of Pietas, familiar enough to the ordinary Roman citizen, while the dove, which was to the Christian element of the grace of the Holy Ghost, had been distinguished by its pagan neighbour from the birds consecrated to Venus. The deeper mysteries of the Eucharist and of the other sacraments were still more artfully veiled in the frescoes of those early centuries. No doubt the fish was an object familiar enough in all kinds of pagan decoration, but this very fact rendered it most suitable for the purpose of the Christian when he wished to symbolize the marvellous workings of Christ (Γεννησίς Χριστοῦ Θεοῦ στὸν Σωτήρα—IX 892, the fish) in the waters of baptism. What again was more common in decoration than symbolic of banquetting scenes there was often utilized by the worshippers of Mithra—but these beasts depicted upon the walls of a sepulchral chamber had a far other and deeper significance for the Christian, who by some minute sign, the little cross, it may be, impressed upon the loaves of the fishes which decked the frugal board, was quick to discern the reference to the life-giving mystery of the Blessed Eucharist. There are also human figures and Biblical scenes, especially those connected with the liturgy for the departed—for example, the miraculous restorations of Jonah and Daniel and Lazarus—and in one or two isolated instances we may perhaps recognize a presentment of the Madonna; but the reference is always cryptic and only interpretable by the initiated. It was under these circumstances that the instinct of religious symbolism was developed when the art of the Church was yet in its infancy, but one tradition has also often utilized the same symbols from the early Christian decorative art at the ages throughout all the ages of the Church.

With the triumph of the Church under Constantine the necessity for the sedulous hiding of the mysteries of the Faith in large measure disappeared. From a.d. 313 to the end of the fourth century was the period of formation and development in Christian art, and it may be conspicuously recognized upon the walls of the Roman catacombs. Biblical scenes abound, and the figure of Christ, no longer so frequently as the beardless Good Shepherd, but crowned with a nimbus and sitting or standing in the attitude of authority, is fearlessly introduced. The nimbus is also extended to
ECCLESIASTICAL

ECCLESIASTICAL

others beside Christ, for example to Our Lady and some of the saints. Sculpture again, though in the catacombs the traces it has left are relatively few, now for the first time becomes the helpmate of painting in the service of the Church. This is the age of the great Christian sarcophagi so wonderfully decorated, the figures of Christ and His Apostles and with biblical scenes still full of symbolic meaning. The old ways of the period of persecution had, it is plain, become not only familiar but dear to the body of the faithful. The allegorical method of representing the mysteries of the Faith did not disappear at once but though the triumph of the outline of the "chrism", or the Greek monogram of Christ, was universally held in honour and introduced into all Christian monuments and even into the coinage, the crucifix as a Christian emblem was as yet practically unknown. For more than a century the memory of the sacrifice of Calvary was recollected to the minds of the faithful only by some such device as that of a plain cross impressed with the figure of a lamb. The first representations of the figure of the Saviour nailed upon the Rood, as we see it upon the carved doors of Sta Sabina in Rome and in the British Museum ivory, belong probably to the fifth century, but for a long period after that this subject is very rarely found, and its occurrence in frescoes or mosaics is hardly recorded anywhere before the time of Justinian (527-565).

MOSAICS AND OTHER EARLY CHRISTIAN ARTS.—To find the facility of approach to the use of colour in the Roman Empire to anything like an important extent, we must look at the Roman pavements composed of myriads of tesserae, and representing in a flat and somewhat uninteresting manner mystic beings, extraordinary animals, fruits, flowers, and designs. Between these Roman pavements and one of the most archaic Christian art, that of mosaic, there is a very close connexion. It seems also possible that some of the early efforts of the art of the Christian Church are to be found in the decorations of gold on glass which have been discovered in the catacombs. Upon these glasses, dating from the third to the fifth century, are found representations of Christ and of the Apostles, as well as drawings in gold-leaf, partly symbolic and partly realistic, referring to the miracles of Christ, the emblems of the Seven Spirits, a future life, and the events narrated in the New Testament. Simple and archaic as these are, yet many of them have an original beauty. The primitive Church included within itself, not only the poor and humble, but persons of distinction, rank, and attainment, and it is clear from an examination of these drawings that some were executed by those who were in possession of considerable artistic skill, and who had been trained in a knowledge of Greek and Roman art. Contemporaneous with these, and earlier, are frescoes painted upon the walls of the catacombs, including portraits of the Apostles and of Christ, representations of the martyrs, naive pictures of the scenes from Holy Writ, and simple illuminatory symbolism. Then, between the fourth and tenth centuries, there is a long series of mosaics, in which for the first time strong evidence appears of a sense of colour. A few specimens of these mosaics adorn the catacombs, afterwards they are found in the oratories and places of worship of the primitive Church. It is speedily recognized that mosaic decorations possessed certain strong claims to attention, such as other methods of decoration lacked. While the artist himself must be responsible for fresco work, very much of the large mosaic decoration could be left to persons of subordinate position, and once the artist had drawn out the pattern and scheme which was to cover, for instance, the apse of the church, the actual manual labour of fitting in the tesserae could be done by workmen. Then, again, there was the quality of imperishability; the mosaic was permanent, an actual part of the structure which it decorated; it did not vary in

colour by reason of light or atmosphere, and could be cleansed from time to time. It was also capable of strong, broad effects, rendering it peculiarly suitable to positions at the end of a building, somewhat above the line of sight, and its colour could be made so emphatic and so brilliant that for centuries the hollows could be lit up by its luminous beauty. It is small wonder, therefore, that from the very earliest period the Church drew to itself the skilful workers in mosaic, and employed them, as can be seen by the wonderful remains at Ravenna, in Sicily, on Mount Athos, and notably at Rome, to decorate the interiors of the basilicas, and to set upon their walls the emblems of the Divine tragedy, of the sufferings of Christ and of His saints, or to represent in hieratic magnificence the figures of Christ in glory, or in benediction, so that the scenes might be well in sight of all the worshippers within the little churches.

From the representation of single figures at the end of the church, the work speedily spread to more elaborate adornment of the walls, and from the simplicity of a single emblem, a single figure, the artistic spirit was developed in pictorial effect. By means of symbols and miracles of Christ, or spread long triumphant processions of virgins, Apostles, martyrs, along the walls of the aisles and transepts of the larger churches. There is no city in Europe in which this earliest Christian art can be so well studied as at Ravenna. The place in its mosaics and paintings represents the four Books of the Gospels open upon four altars, and between them four thrones of dominion with crosses; these mosaics have never been restored, and are in the condition in which their makers left them. The huge font intended for baptism by immersion, which stands below them, is proof of their antiquity, but the actual inscription of dedication with its date still exists on the central metal cross surmounting the building. In the chapel of the archbishop in the archiepiscopal palace are mosaics of the fifth century made during the reign of Archbishop St. Peter Chrysologus, while in the tomb of the Empress Galla Placidia are mosaic decorations of her period; unfortunately, many of these latter works have been restored. The very finest mosaics in Ravenna, however, relate to the great heresy of Arianism. In the time of Theodoric, the old heresy was beginning once more to make itself felt. Arianism was no longer dead; Arians were fighting against the Church, and the Council of Nicæa and Constantinople had declared against it, and the Nicene doctrine had been confirmed, so that within the Church the heresy could no longer exist, but outside the Catholic Church there were still those who accepted it. When Theodoric, King of the Ostrogoths, came into power, Arianism became once more a force to be reckoned with, and the emperor erected a cathedral and a baptistery in Ravenna for his Arian bishops. It is in the church now called Sant’ Apollinare Nuovo, which was new more than a thousand years ago, that the great rhythm of the Arian church with its saints and virgins alluded to above exists; the greater part of it as it is at present was rebuilt and restored the church fourteen centuries ago. In the baptistery of the Arians, near by, the mosaics upon the roof were put in place practically at the same time as the church was completed, and there is not only, in mosaics, that Ravenna
illuminating primitive times, the period of the Middle Ages is one of enormous artistic importance, and it is an era in which the influence of the Church is practically paramount. To this period there does not belong any very long series of artistic objects relating exclusively to the life of the domestic. There was a form of art of domestic interest marked by artistic skill, there were objects of personal decoration, and for use in the home; but the choicest talent and the efforts of the most supreme genius were almost invariably given to the work of the Church, and even where the comparison is forced to domestic ornamentation, there is generally a religious element in the decorations and the use of religious symbolism. To this period belong the magnificent works in enamels, executed for church work. There are the tall pricket candlesticks, superb chasses and reliquaries, altar-crosses, crosiers, shrines, censers and incense boats, crucifixes, morses for copes, and medallions for sacred vessels, triptychs and polyptychs for use on the altar, plaques for book-covers, especially for the adornment of the Book of the Gospels, crosiers, basins, chalices, and book-binding in metal encrusted with jewels. The very first British enamels were executed in the fourth century, and the change from Arian heresy to Catholic truth, and the exquisite beauty of the mosaic work, the Church was able to make use of at that time. A little journey outside Ravenna to the church of Sant' Apollinare in Classe will enable the student to bring his study of early work and early sculpture down to the beginning of the seventh century, and bearing religious emblems of very early and inestimable importance, and still preserved in pictures of unprepared linen cloth, executed in a material similar to transparent water-colour, ascribed to a period antecedent to the third century. They chiefly purport to be representations of the features of Christ. The most notable of course is the one known as the Handkerchief of St. Veronica, preserved in the Vatican, and which none but an ecclesiastical of very high rank is allowed to examine closely. Although the most important, it is by no means the only example of such a picture. There are also a number, a third in the church of San Silvestro in Rome, and others in various parts of Italy. The metal work executed during the Ostrogothic occupation of Italy was often work commissioned by the Church for use in the ceremonies of the service, and figures of Christ and of the saints, ornaments for copes, chasses in which to put relics, and vessels for use at the altar, belonging to this period of primitive art, are the direct result of the teaching of the Church. As however, the religious feeling spread more and more, the desire arose among Christians to have artistic representations of the great events of the Faith in their houses, and it is possible that the beginnings of what we may term popular pictorial work arose in this way. The very early tempera paintings on wood of Eastern and Byzantine character, some of which are actually ascribed to the hand of the Apostle St. Luke himself, may very likely have been executed, not entirely for liturgical purposes, but for the adornment of the wealthier members of the community, at least, might have in their homes, in the privacy of their own oratories, some cherished representation of the Man of Sorrows Himself, or of some Apostle or saint from whom the owner was named, or towards whom he had some particular affection, that painting might be traced the beginning of the history of the icons, which are so important a feature in the life of the Eastern Church, and which adorn every house, in many cases being found in all the rooms occupied by the various members of the family.

Ecclesiastical Art in the Middle Ages.—Leav-
effect, groups of saints, sacred scenes, and religious symbols. On the chasubles, cope, albs, stoles, mani-oples, bureaus, veils, mitres, frontals, super-frontals, and altar-covers, pulls, bags, and panels of that period, are to be seen triumphs of artistic excellence, worked with exceeding beauty, and with a glorious richness of colour, by the hands of the faithful women of the day and designed by the men of supreme genius whom the Church had attracted to her side. Some of the very finest of this embroidery work was English, and references are found to the dignity of English embroidery in the lofty pan of the thirteenth century, as, St. Albans. Bishop of Sherborne, celebrated in verse the skilful work of the Anglo-Saxon embroideresses. Indeed, at one time, rather too much attention in the convents for women seems to have been given to this fascinating needlework, for a council held in 1747 recommended that the reading of books and psalm-singing by the nuns should receive greater attention, and that not quite so many hours should be spent in needlework. As early as 855, the Anglo-Saxon King Ethelwulf, when journeying to Rome took with him as presents silken vestments richly embroidered in gold, executed in England, and there are fragments of cloths and maniple, found in the tomb of St. Cuthbert (d. 687), which were produced under the auspices of the wife of Edward the Elder in 916 and placed in the saint's coffin. From that time down to the middle of the sixteenth century there was a constant demand for the work of the skilled embroideresses, and especially that section of art, so particularly suitable to ecclesiastical purposes, was one of perennial richness. It is well that some stress should be laid upon the question of embroidery, inasmuch as in the Middle Ages it was almost exclusively a branch of ecclesiastical art, and generally everything that could by any possibility be embroidered, especially in fine English embroidery previous to the fifteenth century, was executed for the Church. Enormous labour was given to the production of these beautiful vestments, and as an example it may be mentioned that a frontal presented to the Abbey of Westminster in 1271 took the whole labour of four women for three years and three-quarters. Lincoln Cathedral in the fourteenth century possessed over six hundred vestments in its sacristy, while the Abbey of Westminster had nearly very double as many, and the English embroideresses were far equal to those of Spain in the sumptuous manner in which they were supplied with vestments. There was therefore every possible necessity for the work, and no branch of art has a greater importance between the twelfth and the fifteenth centuries than this of embroidery. Fortunately, a sufficient number of the old vestments have come down to the present day to give a satisfactory idea of their importance and beauty, and the records and inventories of church goods prior to the sixteenth century afford still further information concerning this branch of art. The spirit of devotion which has ever given the instinct to decorate the house of God with the very finest works of which man is capable led to this lavish display of artistic genius in the service of the Catholic Church, but it must also be borne in mind that there were other, subordinate, even less important, work the Church, following its Divine Master, has always incited the importance of good works, and it has ever encouraged the faithful to give to its service of their best. If their skill was in metal-work, in embroidery, in carving wooden figures or wonderful choir-stalls, in stained glass, in fresco or mosaic, such skill was to be devoted to God's service, as the chosen instrument of the artist to lay upon the altar, symbol of his devotion to his faith. Even beyond that, there came the occasions in which the pennies for sin took the form of the devotion of artistic gifts to the work of the Church, and the other and very numerous cases in which this artistic labour was the constant employ-ment of those persons who had devoted their entire life to the religious career, in the various monastic houses belonging to the different orders. One further cause must not be overlooked, the fact that it was the Crown, the clergy, and the nobility who alone could command the means, the desires of the men of genius, the productions of the men of genius of the time, and that while the commissions given by the clergy would most certainly be for church purposes almost exclusively, those given by the Crown and the higher nobility were in almost all instances for exactly the same purposes. This for a double reason, for a double purpose. First, the desire to adorn the home beautiful had not yet arisen to any considerable extent, and secondly, there was every wish to make the private chapel or oratory, the public church or royal sanctuary, as beautiful as possible, both to carry out the instincts of the religious feeling and please those who held control of spiritual things, as well as to heap up a reward for good deeds which would have a corresponding equivalent in the future life and might serve as retribution for the deeds of violence that formed so integral a part of the life of these centuries.

The period under consideration was not so much one of portable pictures as of applied art, devoted to the interior decoration of the sacred buildings, and to every object having connexion with the service of the altar. One section of ecclesiastical art deserving special mention concerns almost exclusively the monastic choirs. Books of Hours, Missals, Brevearia, and Psalters, with an origin in the monastic houses of England, France, Germany, and Italy during the Middle Ages are now among the greatest artistic treasures of the world, and with regard to them there is one very striking fact which must never be overlooked. This does not relate exclusively to books of devotion, it belongs nearly as much to every work of art produced during this period, and it is the fact that these triumphs of skill are for the most part anonymous. In the period hardly any great names are recorded in connexion with such work. There is a wonderful series of artistic treasures, but signatures are scarcely ever seen. Here and there the name of an enameller is known, or perhaps the name of the place where he worked, occasionally the name of a wood-carver or a worker in stained glass is preserved and there are just a few cases in which the name of the monastic house producing the manuscript is known, but the instances are exceedingly few, and they occur, one might say, by accident rather than by intention. With respect to illuminations in books of devotion, one monk took up the task where the other had left it. Death caused no cessation of the self-imposed labour. The work must never die, and as in the present day great literary works are undertaken by the leading orders, in the full knowledge that to carry them out will extend far beyond the life of the writer who begins the undertaking, but that his successor will be equally able to continue the task, so in the earlier days the monks laboured in
their cloisters, each at his own work; each generation of monks in the footsteps of the former, hiding the individual identity in the name of the order and content, as the work was done for the greater glory of God, that while the work should remain, the monks themselves should be forgotten. This is the reason why it is striking in considering this period that the singleness of aim and devotion to duty which characterized these artists and led them to have no desire to perpetuate their own names, but simply to carry out to the best of their ability the allotted task for the glory of God and His church. The reason was that the dignity of personal labour was not fully realized, but the reason for this anonymity lies mainly in the facts already stated, that the work was religious work, that the aim was a religious aim, and that the identity of the person did not matter, so long as the Church was properly served by her faithful. There is one other aspect of the artistic work of the pre-Renaissance time to be alluded to. It is by no means confined to the pre-Renaissance period, but extends through the succeeding centuries, and it should extend to all the artistic labour of the present day, but it is especially a feature of the period under consideration. It is that determination which is never satisfied with the work which has been done, but which is always straining forward for finer and better work. It is that element of uniring energy and ever-quickening desire for perfection which has always characterized the greatest art-workers of the world, and it finds its earliest and perhaps its strongest development in this period.

The early Italian painters fall into two groups: the first, that which may be called the group of the miniaturists or illuminators, as, for example, Enrico, Berlinghieri, and Oleracea; the second of these painters, such as Margaritone, Spinello, Uccello, Cimabue, Dueto, Memmi, Lorenzetti, and the various early masters of the schools of Siena, Padua, and Verona. The predecessors of these artists, for the most part, worked without any reference to nature, under Byzantine influence, copying slavishly the methods fixed by the Greek Church. Their pictures, whether they illustrated scenes from the Sacred Writings, the legends of the Church, or the lives of the saints, were designed and painted according to fixed rules. Their work was inferior to that of the Byzantine workers in mosaic, but it was the same conception of art; the same way, in attitudes, compositions, types of face, folds of drapery, and even as regards colour, it was guided by the definite rules of tradition, so that the painter was little more than a mechanic. Still, despite what may be termed the ugliness of this particular school, there was a strong spirit of devotion exercising the minds of the artists, and they were able to put a certain amount of sympathy into their hard, angular productions, thus showing that their works were painted with religious sentiment, and with a desire to evoke that sentiment in others.

Margaritone was one of the first to break through the hard grime of rules, and although his work does not show any very striking advance upon that of his predecessors, yet in his pictures and in those of the earliest painters of Siena, we begin to find the desire to paint a Mother of God bearing some living image into a Mother of Man. There are a few things more striking towards tenderness and sweetness of countenance, a desire to represent raiment gently floating in easy curves, and a greater command of sentiment, together with a simplicity in story—telling, which marked this primitive school, and prepare the way for the more central treatment. Partly, of course, this was the period of the Renaissance. The great era of transition from the Middle Ages to modern times which is called the Renaissance may be divided into the three periods of the Early Renaissance, Full Renaissance, and Late Renaissance. Here again the influence of the Church is found just as strong and as definite as in the past. The growing desire to have magnificent churches created the necessity for other workers in art. The first years of this period give in Italy the earliest works known by name in fresco, and in portrait pictures, Cinabue, Orecagna, Giotto, and others.

Note 253. Things and places mentioned in this period of their "freedoms" and "liberties," are Assisi, Siena, Pisa, and other parts of Italy, is seen the beginning of the long list of painters whom the Church enlisted in her service. In bronze work Ghiberti produced the gates of the Baptistery of Florence, and with the appearance of Brunelleschi a new stage of art was introduced for ecclesiastical buildings arose. In this period belongs also the introduction of oil-painting, and here again, just as emphatically, the Church took the lead. The earliest printers were churchmen, belonging to a religious order, the earliest books those of religion—the first actual printed sheet being the Indulgence of Pope Nicholas V—followed by a long list of religious and liturgical works, Sacred Scriptures, and patristic literature. In the Low Countries the Van Eyck developed the methods of oil-painting and there arose a great school of artists, among whom were Van der Goes, Van der Weyden, Bouts, Crustus, Memling, and others, who carried the period under discussion.

In this period belongs also the introduction of oil-painting, and here again, just as emphatically, the Church took the lead. The earliest printers were churchmen, belonging to a religious order, the earliest books those of religion—the first actual printed sheet being the Indulgence of Pope Nicholas V—followed by a long list of religious and liturgical works, Sacred Scriptures, and patristic literature. In the Low Countries the Van Eyck developed the methods of oil-painting and there arose a great school of artists, among whom were Van der Goes, Van der Weyden, Bouts, Crustus, Memling, and others, who carried the period under discussion.

Towards the close of the Early Renaissance period is found the work in sculpture of Donatello and those of his school, Desiderio da Settignano, the Roscellini, Duccio, Verrocchio, the very and others, who were the finest and most important artists, and who have left their mark upon the history of Western sculpture. The most important works were altar-pieces, and in some cases all their paintings were of a religious character, while in others the paintings not religious were portraits of the various patrons who had commissioned the altar-pieces, or who had had their portraits painted by these artists; therefore the intimate connexion between art and the Church was just as close as ever.
turicchio, Francis, Albertinelli, and Fra Bartolomeo, almost exclusively religious painters, prepared those masterpieces of religious art to set upon the altars of the private chapels and great churches of the day, that are now among the treasured masterpieces of all time.

This era was also the period of that side by side with the Humanistic movement there was a strong religious one. In this religious movement art had its full share, and engaged in its tasks, not perhaps with the austere simplicity and singleness of aim which belonged to an earlier period, but still with a definite determination that the best products of artistic craftsmanship should be devoted to the service of God. There was, however, a growing desire that the home should be more beautiful and more luxurious. The decoration of churches was to be the sole aim of the artist, and he was finding other fields, but he was no longer to find work only in the churches. The period of the Renaissance marked a change in the character of religious art. The Church and the artist were in a state of equipoise.

The period of the Full Renaissance may be taken as lasting from 1450 to 1530, and here must be noticed the advent of a new movement in art, or rather a stronger exaltation of the work of the artist. The Venetian school, that took its rise in the earlier century with the great painters of the time, Titian, Palma, and Griselli, and that was to see its development at this time in the later Bellini, Giorgione, Titian, Paolo Veronese, and Tintoretto, the claims of colour gain a supremacy over the kindred branches of pictorial art. The Venetian school was the one in which brilliant colour attains to its apotheosis, and everything else subservient to it. The simplicity of aim which characterized such a man as Fra Angelico passed away, the devotional feeling that marked the works of Albertinelli and Fra Bartolomeo gave place to an overpowering desire for decoration as such, and in Venice, although the Church commissioned the great altarpieces, and the schemes of interior ornamentation for which these noble artists were responsible, it had to be content to accept Venetian tradition and to see religious scenes treated as gorgeous pieces of sumptuously coloured decoration. Although there might not be the simplicity of a past generation, yet there still existed in the artists the same desire to offer to the Church the greatest works of their genius. In this period of the Full Renaissance are found the work of Raphael and of Michelangelo; of Cloz, Malaspina, and Scorci; of Durer, Holbein, and Cranach; of Leonardo da Vinci, and of Correggio, while in applied arts there was immense industry and great development. The German metal-workers and goldsmiths prepared church vessels innumerable; Cellini and Caradosso produced ornamennts for church vestments; the screen and the waggoner for King's College Chapel, Cambridge, typified the ecclesiastical wood-carving of the time in England; while the stained-glass windows at King's College Chapel, in other churches, and in great churches show what was attained in this branch of ecclesiastical art.

The fall of Florence marked the close of the period of great art in that city, while the paintings and tapestry executed for Francis I at Fontainebleau, for Louis XII at Tours, and some sculpture done by Michelangelo for the Medici Chapel, all point out the enhanced power of the Humanistic movement and the destruction of that devotion to faith which had been so marked a feature of the earlier centuries. The epoch of the Late Renaissance, extending from 1500 to 1600, and overlapping that of the Full Renaissance, was still, however, distinguished by a considerable amount of earnest religious fervour in art. The painters of Perugia, of Luni, Gaudenzio Ferrara, with Leoni and del Sarto, Sodoma, Bronzino, and Peruzzi, are strong in this, but of the Spanish. The Iberian goldsmiths and iron-workers still certainly produced their famous grilles, jewels, maces, chalices, and crucifixes, while in needlework the finest workers of Castile were elaborating some of the most perfect examples of church vestments that have ever been produced. In bronze, the smelters of Aragon were casting superb church candelabra, and some of the weavers in France and England were producing tapestry decoration for churches; but the greater part of the Gobelin, Brussels, and Mortlake tapestry-weaving was for domestic use, the chief examples of the work done on domestic architecture, the potters on domestic pottery, and the painters and engravers upon work which cannot be termed religious. The names of certain men stand out, however, as representing persons of deep personal religion, who brought their own devotion to the execution of their work. The names of Cellini, Grotticelli, and the Behaimis, but the period of that supreme hold which the Church had maintained the art of the world, which she had initiated, developed, and encouraged, was passing away, never more to appear in its full fruition. Some reference should be made to the system under which during this time many of the great decorative schemes of Italian painting were executed. The encouragement which the Church gave to the Italian painters took various forms. It was permissible for an influential or a wealthy family to have allotted to it a small chapel in the large parish or own church, and the decoration of the chapel was left to the care of the family whose name it received. In some cases, these chapels were built onto the church, and in such instances an architect, a builder, a decorator, and an artist were all employed, and the Church gladly gave permission to the system of the church structure in order that the family might have a meeting-place and an opportunity to make an endowment for perpetual Masses for its deceased members. In cases where a new structure was not erected, a portion of the existing church was enclosed as a private chapel, perhaps in memory of a father, a mother, or some children, and a painter of repute was called in to devise a scheme of decoration for its walls, in which would be introduced the figures of saints to whom the deceased persons had been dedicated, or scenes from the lives of such saints; in many cases life-size figures of the saints were represented with the hanging figures of the donors of the chapel. There was no thought of an anachronism; it was considered perfectly right that representations of persons who had died but a few weeks or months before should be introduced into the scenes in which the saints of early church history were depicted. It then became the ambition of later members to add to the beauty of the family chapel as means allowed. The walls having been decorated, an altar-piece would be painted by another artist, while perhaps, following him, yet another would ornament the front of the altar, or craftsmen would be called in to paint the sacred service, or vestments and books for the priests. In this way these little chapels became shrines for artistic work, the productions of many hands, representing the desires of many persons to place the best work at the service of the Church, to act dutifully.
towards the family itself, and to make a suitable offering in recompense for crimes committed. Another course sometimes adopted was to call in two painters, rivals in their profession, to decorate different walls of a church, or the two sides of an altar-piece, or again, when some great addition was made to the fabric, account of an important event, such as the canonization of a local saint, or a marked interposition of Providence on behalf of the town, different influential persons in the place would undertake to be responsible for portions of the building, each calling in his own favourite painter, and in this way the work would be completed. Or it might be that an order desired to decorate a church dedicated to its patron saint, and the commission would be given to some notable artist, who perhaps was unable to complete the task, or who died before its completion. In such cases, others were called in to complete it, and in this way the fabric was beautified by various successive hands.

The number of definitely personal commissions which the sixteenth-century artist had was small, as even in the instances where a patron ordered a picture, it was generally an altar-piece for the family chapel, or even the decoration of something belonging to a trade guild to which he was attached, and this trade guild being nearly always a religious association, the commission came under the category of religious work. It is all this which marks the great distinction between art and craftsmanship previous to the sixteenth century, as regards its execution. In the period of Christianity to about 1260 in Italy, and about 1460 in Northern Europe, the dominant art is architecture, chiefly employed in the service of the Church, and the arts of painting and carving were only applied subordinately for its enrichment. During the Renaissance period these arts began to develop and detach themselves, to exist and strive after perfection on their own account, and while architecture still held an important position, it was no longer dominant; the arts which supplied the interior decoration of the building, and the objects needed in the service of the Church, ceased to be considered as subordinate, but were taking each its own high position under the guidance of workers of supreme genius. From this period, however, of the Full Renaissance, the great dignity of architecture began to diminish, as regards the ecclesiastical buildings, and architects devoted themselves almost exclusively to domestic and civic work. Architecture ceased to be personal, democratic, local, and became professional and more or less uniform throughout the whole of Europe, while it suffered severely because the design of such buildings as were produced in the sixteenth century was the work of others than the executant workmen. The same sort of difficulty was baffling the pictorial art and the arts of the craftsmen. The personal element was no longer the main strength of an art. The ecclesiastical side of the work was almost non-existent, and the crafts suffered by reason of the fact that the commercial element had entered into art, and the adornment of the house, the palace, and the person was considered of far greater importance than the adornment of the church, and the sacrifice of the life of the artist for the greater glory. It was a period when the art of the painter was being developed, and the artist was beginning to be considered as a professional person, and as such was to be paid for his work.

POST-RENAISSANCE PERIOD.—There are certain political explanations of this great change between the art of the sixteenth and the art of the seventeenth century. There were several forces at work which were hostile or indifferent to artistic development, such as the War, or the dynastic wars, the commercial wars, and the difficulties of the Reformation, and constitutional problems, while the grouping together of small towns into larger provinces and countries was doing away with the rivalry of the craftsmen in the smaller places, and permitting a spirit of greater uniformity in style to spread throughout a large section of Europe. Add to all these colonial expansion, huge enterprise, and great commercial prosperity, constantly broken into by ravaging wars, and the causes for the decay of that spirit of religious activity in art characterizing earlier periods are apparent. Spain and Italy were, in the seventeenth century, almost the only two countries in which any close connexion and the Church was kept up. England was troubled with the religious question, and struggling with great constitutional problems, while it had given itself over to the faith of the Reformed, and such art as it was producing was the great architectural triumph of Sir Christopher Wren in the rebuilding of his churches of London, and the various sections of craftsmanship concerned with the adornment of the house and the person. In Spain there were still some great goldsmiths at work, and some even greater workers in wrought iron, preparing the rejas for the Spanish cathedrals, while pictorial art was at its highest in that country, and its masterpieces, with the exception of those of the very greatest artist of all, Velazquez, were devoted to subjects suggested by the Church. Yet there had been no country in which the painter had been so tampered with traditional restrictions as in Spain. The very manner in which each saint was represented, which his or her clothing was to be painted, and the colouring which was to be applied to each garment, had been a matter of stern decree, it had needed the profound genius of a Velazquez to break through the traditional rules, and to open for his successors, and especially for Murillo, a period of great freedom. Commencing with such painters as Pantoja della Cruz and Vicente Carducci, the great Spanish School had produced the Ribaltas and Ribera, and then the majestic Velazquez. In Spain the only great painter to follow Velazquez was Murillo, but there were many other artists marked by distinction, excellence, and beauty, especially Zurbaran, Iriarte, Juan de Valdes, Alonso Cano, and Orrente. The seventeenth century was, in various countries of Europe, one of the important periods of artistic production, and although the Italian schools, the Realists, and the painters of the Second Revival were men whose productions at the present time are out of favour, yet they deserve more than a passing notice, while contemporary with them there are others who rank among the veritable giants of the artistic craft. The late Italian artists, such as Carracci, Caravaggio, Sassoferrato, Domenichino, Luca Giordano, Carlo Maratta, Guido Reni, Salvador Rosa, and others, show in their work melodramatic style, love of magnificent colouring, and intense shades. The draughtsmanship of these artists should cause their works to be more highly esteemed than they are at present, for they certainly represent an important epoch in the art history of the world, and one which must never be overlooked. Many of their works were altar-pieces painted for churches, or were intended for church decoration, but at the same time they were greatly influenced by the Humanistic movement, and by the eager desire to represent the stories of classical writers in pictorial effect. The commercial prosperity of Holland, at a time when other nations were lacking in material wealth, was one of the reasons for the existence of a veritable crowd of artists just at this time. The Church had ceased to commission pictures in Holland, and very seldom were stories, either from Holy Writ, or from the lives of the saints, represented by this school of artists. In dealing with the arts and crafts of the eighteenth century, a new and destructive factor which had hitherto been considered as of less importance, the “vogue of handcraft”, as has been well said, “passes now into invention”, and the commencement of a system now appears that was eventually to strike at the very roots of the manner in which supreme works of genius had been produced in the preceding centuries. It must also be noticed that, in painting especially, the artistic centre of gravity had shifted from Italy to
England, and to a lesser extent to France, and that Italy, Germany, Spain, and the Netherlands took but a very small share in the artistic development of the eighteenth century, instead of, as in preceding periods, being the great centres of development themselves. The reason of this was, in contradistinction to that of the Church, was not complete, and portraiture, whether concerning itself with the great decorative single figures or family groups of Reynolds and Gainsborough, or with the productions of the leading miniature painters, Cosway, Engleheart, Dublin, Smart, Horse, Wood, and others, far lower, was extensively applied to the multiplication of portraits of those persons who were able to afford to employ the artist, and who desired to possess and distribute to others such delightful representations as would adorn the home and the person. Ecclesiastical art, or art for the decoration of the church, had hardly any existence.

In England towards the middle of the nineteenth century a new movement having in it some of the instincts of earlier Italian art began to arise. The foremost artist of this new school was Sir Edward Burne-Jones, in the wonderful succession of poetic ideas which he presented, marked, in fancy, a fertility of inventiveness, tender witchery of inspiration, exquisite colour, and grace and harmony of line and grouping, he was able to develop the spirit of religious emotion to a far fuller extent than he himself had in itself, to identify the new art of the earlier and purer lines of thought in religion, to set faith free from the regulations of statecraft, and to rise from the dry, not monotony of a Grecian theology to something approaching closer to the fiery enthusiasm and the sumptuous ceremonial of the passionate faith of earlier days. The progress of this movement within the Protestant Church led to a considerable number of accessions to the Catholic Faith, but in the Church of its origin it worked a complete revolution. Once more there arose the determination that the house of God should be beautiful, and once again art, with all the various arts closely connected therewith, entered into the service of religion, very much in the manner they had done in preceding centuries. Tapestry workers, under the influence of William Morris and Burne-Jones, were set to work to prepare panels of glowing colour for the decoration of churches. The stained-glass painters, under the influence of these craftsmen, sought out old designs, originated new schemes of colour, and worked hard to discover old secrets of technic. The earlier schools of embroidery were studied, and all over the country women set to work to make vestments and to execute needlework of rare distinction and great beauty. A revival took place in the art of the metal-worker and in that of the stonemason. Many fine wrought-iron grilles were made, and the claim of the artist to prepare the design and to superintend the carrying out of its execution was once more considered by them as their right. Quite apart from the religious aspect of the movement, there was in this Oxford revival the origin of the effort towards greater refinement, greater beauty, and more attention to handicraft, which, commencing in the middle of the nineteenth century, has by no means reached its culmination in the early years of the twentieth.

One of the first and most important of the movements which aimed to break away from the artistic traditions of the eighteenth century took place in the early part of the nineteenth century in Germany, and was led by Overbeck. The Academy of Vienna, at the time that he entered it, was under the direction of Füger, a talented miniature painter, but a follower of the pseudo-classical school of David, and a firm believer in the tenets of those opinions, too conservative to vary from them in the least degree. Overbeck felt to the bone as a group of painters, that every noble thought was suppressed within the society that Christian art had been diverted and corrupted until nothing Christian remained in it. The differences between him and his followers and their fellow-students were so serious that the upholsterers of Overbeck and his friends were expelled from the academy, leaving Vienna, Overbeck journeyed to Rome, and in 1810, and remaining there for fifty-nine years. Here he was joined by such men as Witt, Cornelius, Schadow, with others of less importance; together they formed a school which was known as the Nazarenes, or the Church-Romantic painters. They built up a severe revival on simple nature and the serious art of the Umbrian and Bolognese painters, and although for a long time they laboured under great difficulties, yet, after a while, they were able to exert considerable influence, and their success led to memorable revivals throughout Europe. Overbeck, was a Catholic, as were several of his friends. He was noted for his purity of motive, of deep insight, and abounding knowledge, a very saintly person, and a perfect treasury of art and poetry, insomuch that his influence helped very largely to purify the art of his time. The movement from the original line of the previous century was. The Royal Academy in England late in the nineteenth century were not marked by the particular element of religious fervour distinguishing Overbeck, but were the result of a similar determination to return to nature, and understand the art of painting in the open air, for not only the adherence to realism, to choice and treatment of subject, but also the subordination of colour to tone gradation. These movements in England were, however, very much the result of the movement in France which had preceded them, and which was connected with the name of Millet.

In Catholic countries there are at least some signs that the old practice of enlisting the services of art for the purposes of religion may be developed, but the signals of an approaching movement are not very strong yet, and the Church has a good deal to learn with regard to decoration, to design, and to craftsmanship among the earlier periods of its history. Foremost among the signs of the new spirit must be placed the erection of the Westminster Cathedral at London, one of the most perfect buildings in England, erected after the truest and most careful study of the past and with every desire to give full play to the spirit of the present and to the original talent of its designer, while avoiding anything that could be called a slavish copying of the past. This building affords an example of the revived use of mosaic properly applied, in method following the work of Ravenna, and planned by a great artist, Bentley. It affords the most perfect scheme of interior decoration that could be conceived, and other countries of Europe the signs of progress are not quite so clear, but the Church which has fostered and encouraged art from its very birth has so many glorious examples in its midst of the great achievements of profound genius that it can only be a matter of time before its ancient use of the fine arts is revived. A close study of the past would enable the Church to once more set about the task of employing the craftsmen of the world to produce their finest work in the domain of ecclesiastical art.
the noblest of all the material arts. Even the needs of the liturgy itself are in a sense subsidiary to the needs of the faithful. *Sacramenta propriter hominum* is an old and sound saying. But, on the other hand, among the needs of the faithful must be reckoned, under normal circumstances, the adequate carrying out of the liturgy. It is, of course, perfectly true also that a church is not only a building in which we worship God, but also itself the expression of an act of worshipful homage. This, however, it ceases to be, at least in the highest degree, unless, as has been said, the aesthetic qualities of the building have been entirely subordinated to its primary purpose. It could only reflect to see that these preliminary remarks have a very practical bearing on modern church-building. There is always a danger lest we should be dominated by technical terms and conventional opinions about the merits of this or that style of architecture, derived from times and circumstances that have passed away; lest we should be led by sentiment or fashion, or mere lack of originality, to copy from the buildings of a bygone age without stopping to consider whether or how far the needs of our own day are those of the days when those buildings were raised. And the chief use of the study of the history of ecclesiastical architecture is not that it directs attention to a number of buildings more or less beautiful in themselves, but that it cannot fail to bring home to us that all true architectural development was inspired, primarily, by the desire to find a solution of some of the practical needs of the church.

Roughly speaking, all ecclesiastical architecture may be said to have been evolved from two distinct germ-cells, the oblong and the circular chamber. From the simple oblong chamber to the perfect Gothic cathedral the steps can be plainly indicated and admit of being abundantly illustrated from the actual course of architectural development in Western Europe (Brown, "From Schola to Cathedrals, passim"); while the links which connect the simple circular chamber with a gigantic cruciform domed church, like St. Peter's in Rome or St. Paul's in London, are still more obvious, though the actual course of development in the case of domed churches has been far less continuous and regular.

**The Origins of Ecclesiastical Architecture.** — That the first places set apart for Christian worship were rooms in private dwellings is admitted on all hands; but the art of making them well, and another of making them badly... Good architecture is the art of building beautifully and expressively; and bad architecture is the reverse. But architecture is the art of building in general” (Baring, *The Architecture of England*, 1). Since, however, the word building is apt to suggest, primarily, “the actual putting together of materials by manual labour and machinery”, it may be desirable to amend or restrict the definition given above by saying that architecture is the art of planning, designing, and directing buildings, and of directing the execution thereof (Bond, op. cit., 2). And in this art as in all others, including that of life itself, the fundamental principle should always be that of subordinating means to ends and secondary to primary ends. Where this principle is or has been abandoned or lost sight of, the work is indeed, or has been, a building which pleases the eye, but it must needs be also one which offends that sense of the fitness of things, which is the criterion of the highest kind of beauty. Now a church is, primarily, a building intended for the purpose of public worship; and in all sound ecclesiastical architecture this purpose should be at the very foundation of the building. To build a church for the adornment of “the man in the street”, who sees it from outside, or of the tourist who pays a passing visit, or of the artist, or of anyone else whatsoever except that of the faithful who use the church for prayer, the hearing of Mass, and the reception of the sacraments, is to commit a solecism in
ECCLESIASTICAL

ECCLESIASTICAL

alike be served if the piers which support the dividing arch were projected inwards, somewhat beyond the side walls of the sanctuary; for the narrower the span the easier it would be to construct the arch, and to suspend a curtain from pier to pier. Thus, then, that rudimentary type of curb-chapel would be reached of which archaic examples still survive in England and Ireland. Mr. Scott notes that in many of our oldest English churches there are clear indications that the opening from the nave into the sanctuary was originally much narrower than it is at present. He further notes that in the persistent and thrusting type of nave-church which manifests itself throughout the history of English ecclesiastical architecture, may possibly be found a surviving indication of the very early introduction of Christianity into these islands (Scott, op. cit., 4).

The earliest improvement on the crude form of the oblong chamber with its rectangular annex, and one which may well have become usual even while the liturgy was confined to a single room in a private house, was to throw out a semi-apse at the end of the chamber opposite the door, or to select for the purposes of worship a room thus built. And this was certainly done, as appears from the earliest accounts, in Rome, as soon as the Christian communities began to possess separate buildings in which to hold their religious meetings. These buildings would be, in the eyes of the public and perhaps of the law, schola or guild-rooms; and for such buildings the former rest appears to have been that of a long oblong terminated by an apse (Brown, op. cit., 51 sqq.; cf. Lange, op. cit., 211 sqq.). In the apse, of course, was placed the seat of the bishop; round the walls on either side were the subsidein of the assistant clergy, while the altar stood beneath the arch built by the opening of the apse, or slightly in advance of it. On the hither side of the altar would be a space reserved for the clerics of inferior rank, and for the schola cantorum, as soon as an organized body of singers, under whatever name, came into existence. Outside the boundary of this space however it may have been marked, the general body of the faithful would have their place, and at the lower end of this chamber, or in some kind of ante-room or narthex, or possibly even in an outer court, would be placed the catechumens and—when ecclesiastical discipline was sufficient—of the penitents.

This particular form of the domestic church, removed by just one degree, architecturally speaking, from a quite primitive simplicity, deserves special attention. For there would seem to be good grounds for the assertion that it had become at least not uncommon, even within Apostolic times. In fact, as several writers on the subject have quite independently pointed out, the main feature of the arrangement would seem to be indicated in the New Testament itself. The visions recorded in the Apocalypse are, of course, Divine revelations; but, as the vision of Ezekiel was cast in the mould of the Jewish ritual, so also those of St. John may be reasonably thought to reflect the ritual of primitive Christianity (Scott, op. cit., 211 sqq.; Weiswecker in "Jahrh. f. deutsche Theol.", xxvi, 180 sqq.; Lange, op. cit., 298 sqq.). There we see the throne, with in the midst, with there sits One enthroned, of whom the Christian bishop is the representative; and with Him are four and twenty elders, who are "priests" (levites), ranged in a semicircle (rookoleante), twelve on either hand (Apoc., iv, 2, 4). Within the space bounded by these sides is a pavement of glass "like to crystal," (pavement of mosaic), and in the centre the altar (Apoc., iv, 6; vi, 9; vii, 3; ix, 13; xvi, 7). On the hither side of this are the one hundred and forty-four thousand "signed," or "sealed," who "sing a new canticle," and who incidentally witness to the very early origin of the schola cantorum, at least in some rudimentary form (Apoc., vii, 4; xiv, 1-3). Farther removed from the altar is that "great multitude, which no man could number, of all nations, and tribes, and peoples, and tongues," the heavenly counterpart of the corona fidei- dum (Apoc., vii, 9).

To columned aisles and columns there is indeed no allusion, but it is at least possible that in the mention of the outer court which is "given unto the Gentiles" we may find the earliest traces of the atrium or peristyles, which in later ages formed part of the precincts of a fully equipped basilica (Apoc., xi, 2; Scott, op. cit., 29). Moreover, in the scriptural Apocalypse visions certain details of internal arrangements which might perhaps have been thought to have been comparatively late development, appear to be clearly implied. Every one is aware that in the basilicas of the fourth and succeeding centuries the altar was surmounted by a baldachin, or ciborium; and it is hardly less certain that the ciborium was not merely a canopy, but that means of support for curtains which during certain portions of the Liturgy were drawn round the altar. Traces of these ancient curtains still survive in those which flank our modern altars, in our tabernacles, in the very name tabernacle. And also, curiously enough, in "those imitations of silken curtains that are cast in bronze,... which we see in the canopies of S. Maria Maggiore and St. Peter's" (Scott, op. cit., 29).

In addition to these canopy veils, however, we hear of the curtains which, when drawn close, concealed the entire sanctuary from view. In the East these have, of course, been replaced by the iconostasis: the formerly latticed but now usually solid; while in the West they are represented, not without some change of position, by our chancel screens, and may be thought to have found another modified survival in the Lentinian veil of the thirteenth and fourteenth centuries.

Now, whatever may be the case as regards the ciborium with its veils, there are clear indications in the Apocalypse that the transverse curtains were in use from Apostolic times. For the seer thrice makes mention of a "voice" which he heard, and which proceeded either "from the four horns of the golden altar" (Apoc., ix, 13), or "from the temple of the tabernacle of the testimony" (Apoc., xv, 5), or "from the throne" (Apoc., xvi, 17). From the first of these expressions it is plain that the altar, at the moment when the voice was heard, must have been shrouded from view, and from the last it appears that the throne was likewise within the space enclosed within the veil. As regards other ritual indications in the Apocalypse, it must be sufficient to mention here the "souls of the martyrs" beneath the altar, the temple, the opening of the sealed book, and the garbs, carefully distinguished, of the various classes of persons mentioned in the visions (Apoc., vi, 9; vii, 3; etc.).

THE BASILICA AND BASILICAN CHURCHES.—A great deal of conjecture has been expended on the question as to the genesis of the Roman basilica. (The question has been discussed at great length by Zetzner, Meesener, Kramm, von Bezold, and others.) For present purposes it may be sufficient to observe that the addition of aisles to the nave was so manifest a convenience that it might not improbably have been thought of, even had models not been at hand in the civil buildings of the Empire. The most suitable example that can be chosen as typical of the Roman basilica of the age of Constantine is the church of S. Maria Maggiore. And this, not merely because, in spite of certain modern alterations, it has kept in the main its original features, but also because it departs, to a lesser extent than any other extant example, from the type. The lateral colonnade is immediately surmounted by a horizontal entablature, with architrave, frieze, and cornice all complete. The monolithic columns, with their capitals, are, moreover, homogeneous, and have been cut for their position, instead of being, like those
of so many early Christian churches, the more or less incongruous and heterogeneous spoils of older and non-Christian edifices. Of this church, in its original form, no one—however decidedly its tastes may incline to some more highly developed system or style of architecture—will call in question the stately and majestic beauty. The general effect is that of a continuous perspective of lines of noble columns, carrying the eye forward to the altar, which, with its ciborium or canopy, forms so conspicuous an object, standing, framed, as it were, within the arch of the terminal apse, which forms its immediate and appropriate background.

The Old Romanesque is considered to be any of the other three chief basilicas of Rome (St. Peter's, St. Paul's, and the Lateran). Each of these, in addition to a nave of greater length and breadth, was furnished (as may still be seen in the restored St. Paul's) with a double aisle. This, however, was an advantage which was not unattended with a serious drawback from a purely artistic point of view. For a great space of blank wall intervening between the top of the lateral colonnade and the clerestory window was of necessity required in order to give support to the pent-house roof of the double aisle. In consequence, it so happened that it should not have occurred to the builders of those three basilicas to utilize a portion of the space thus enclosed, and at the same time to lighten the burden of the wall above the colonnade, by constructing a gallery above the inner arch of the arch for the height of the flat roof. Taking East and West together, we find among early and medieval basilican churches examples of all the combinations that are possible in the arrangement of aisles and galleries. They are (1) the single aisle without gallery, which is, of course, the commonest type of all; (2) the double aisle without gallery, as in the Thius basilicas; (3) the single aisle with gallery, as in St. Agnese; (4) the double aisle with single gallery, as in St. Demetrius at Thessalonica; and finally, as a crowning example, though of a later period, the double aisle surmounted by a double gallery, as in the Duomo at Werden.

These, however, are modifications in the general design of the building. Others, not less important, though they are less obviously striking, concern the details of the construction. Of these the first was the substitution of the arch for the half-column in the nave, and the second that of the pillar of masonry for the monolithic columns. The former change, which had already come into operation in the first basilica of St. Paul Without the Walls, was so obviously in the nature of an improvement in point of stability that it is no matter for surprise that it should have been almost universally adopted. Colonnaded and arcaded basilicas, as we may call them, for the most part older than the eleventh century, are to be found in the most widely distant regions, from Syria to Spian, and from Sicily to Saxony; and the lack of examples in South-western France, which were probably a destructive innovation of the Saracens and Northmen and to the building of new churches of a different type, in the eleventh and succeeding centuries, on the ruins of the old. The change from column to pillar, though in many cases it was no doubt necessitated by lack of suitable materials for the supply of ready-made masonry from pagan buildings was not inexhaustible—proved, in fact, the germ of future development; for from the plain square support to the recessed pillar, and from this again to the grouped shafts of the Gothic cathedrals of later times, the process can be quite plainly traced.

Mention should here be made of a class of basilican churches, in which as in S. Miniato, outside Florence, and in S. Zenone, Verona, pillars or grouped shafts alternate, at fixed intervals, with simple columns, and serve the purpose of affording support to transverse arches spanning the whole depth of the first story, it may be observed, to continuous vaulting.

Romanesque Types.—Something must now be said of the very important alterations which the eastern end of the basilican church underwent in the process of development from the Roman to what may conveniently be grouped together under the designation of “Romanesque types.” Whereas, however, the ground-plan of a Roman basilica, we pass from the nave and aisles to what lies beyond them, only two forms of design present themselves. In the great majority of instances the terminal apse opens immediately on the nave, with the necessary result, so far as internal arrangements are concerned, that the choir, as we should call it, was an enclosure, quite disconnected with the architecture of the building, protruding forwards into the body of the church, as may still be seen in the church of S. Clemente in Rome. In the few remaining cases, as well as in a few other instances, a transept was interpolated between the nave and the apse, affording adequate space for the choir in its central portion, while its arms (which did not project beyond the aisles) served the purpose implied in the terms senatorium and matroneum. Now it is not without reason that the church of Notre-Dame, architecturally speaking, simply an oblong hall, crossing the nave at its upper extremity, and forming with it a T-shaped cross, or crux immissa, but having no organic structural relation with it. But it was only necessary to equalize the breadth of transept and nave, so that their arms became a square, in order to give to this crossing a definite structural character, by strengthening the pieces at the four angles of the crossing, and making them the basis of a more or less conspicuous tower. And this was one of the most characteristic innovations or improvements introduced by the Romanesque builders of Northern Europe. In fact, however, before this stage of development was reached, the older basilican design had undergone another modification. For the simple apse, opening immediately into the transept, church builders of all parts of Europe had already in the eighth century substituted a projecting chamber, forming a fourth limb of the cross, which now definitively assumed the form of the crux commissa, by contrast with the crux immissa of the Roman basilica. The earliest example of a perfectly square crossing, in which a somewhat rudimentary tower appears to have been the minster of Fulda, built about A.D. 800. It was quickly followed by St. Gall (830), Hersfeld (831), and Werden (875); but nearly two centuries were to elapse before the cruciform arrangement, even in the case of more important churches, can be said to have gained general acceptance (Dehio and v. Bezold, Die kirchenbaukunst des abendlandes, I, 161).

The differences which have already been mentioned were, however, by no means the only ones which distinguished the Romanesque from the Roman transept. The transept of a Romanesque church, especially of those which were destined as monasteries, was provided with one or more apses, projecting from the east side of its northern and southern arms; and from this it appears, plainly enough, that the purpose, or at least a principal purpose, of the medieval transept, was to make provision for subsidiary altars and pulpits. A pair of transept apses, projecting eastwards, already makes its appearance at Hersfeld and Werden. At Bernay, Bossenerville (St-Georges), and Cerisy-la-Forêt (St-Vigor), each arm of the transept has two eastern apses, corresponding respectively to the aisle and to the projecting arm. The same arrangement is found also at Tarragona. At La-Cha-
rité—holy or ecclesiastical. The primary function of the church was worship, and many of its features were designed to facilitate this. The plan of Cluny itself was that of a cross with two transverse arms, each arm having two apses; of the eastern each had three, two projecting eastwards and one terminal. Saint-Benoît-sur-Loire had likewise a double transept, furnished on the same principle with six subsidiary apses.

Among English cathedrals—it may here be mentioned—that of Canterbury and Norwich have a single chapel projected from each arm of their respective transepts; and at Ely the “Galilee” porch, which has the form of a western transept, opens eastwards into two apsidal chapels, contiguous on either side to the main walls of the cathedral.

Far more important in their bearing on the later history of architecture than these developments of the transept were certain changes which gradually took place in connexion with the chancel. It is not unusual in Romanesque churches, to find the chancel flanked, like the nave, with aisles, terminating in apsidal or square-ended chapels. But in more central and later church, especially in France, the aisle is often carried round as an ambulatory behind the chancel apse; and when this is the case, the ambulatory most commonly opens into a series of radiating chapels. These are, in the earliest examples, entirely separate from one another, being sometimes three or four, but nothing in number. In later examples the number of chapels increases to seven or even nine; and they are then contiguous, forming a complete corona or chevet.

The first beginnings of this system go back to so early a period as the fifth century. De Rossi has argued, apparently on good grounds, that some early Roman, Italian, and African basilicas were furnished with an ambulatory round the apse. This form of design, however, was soon abandoned in Italy, and in the Romanesque pre-Gothic period it cannot be said to have been usual anywhere except in France, where it proved a seed rich with the promise of future developments. The earliest instance of its adoption there was almost certainly the ancient church of St Martin of Tours, as rebuilt by Bishop Perpetuus in A.D. 470. This edifice, as Quicherat has shown, had a semicircular ambulatory at the back of the altar, in which, a few years later, was placed the tomb of Perpetuus himself. From Tours the type seems to have passed to Clermont-Ferrand (Sts Vitalis and Agricola), and thence, many centuries later, to Orleans (St-Aignan, 1029).

Meanwhile, in 997, the church of St Martin had been rebuilt, and in the foundations of this edifice, which can still be traced, we find what is probably the earliest example of a chevet or corona of radiating chapels. It served, in its turn, in the course of the following century, as the model, in this respect, of Notre-Dame de la Couture at L-Omme (c. 1000), St-Remi at Reims (c. 1010), St-Savin at St-Savin (1020-30), the cathedral at Vannes (c. 1030), St-Hilaire at Poitiers (1019), and the abbey church at Cluny, as rebuilt in 1089. Shortly before 1100 the church of St Martin was once more rebuilt, on a scale of greater splendour, and once more the new building became the model for other churches, chief among which were those of St-Savin at Toulouse (1096), of Santiago at Compostela (c. 1105), and of the cathedral at Chartres (1112).

ROMANESQUE VAULTING.—The history of ecclesiastical architecture in Western Europe during the relatively short period which alone deserves to be regarded as one of more or less continuous and steady advance, and which extends, roughly speaking, from 1000 to 1300, may be described as the history of successive and progressive attempts to solve the problem, how best to cover with stone vaulting a basilican or quasi-basilican church, that is to say, a building of which the leading feature is a nave flanked with aisles and lighted with clerestory windows (Dehio and v. Bezold, op. cit., I, 296; Bond, op. cit., 6). It was the conditions of this problem, and the failure, more or less complete, of all previous attempts to solve it satisfactorily, and the intense desire of removing the so-called weakness of the western traditional or basilican architectural form, which led step by step to the development of the Gothic architecture of the thirteenth century in its unsurpassed and unsurpassable perfection.

The advantages of a vaulted, as compared with a timber, roof are so obvious that we are not surprised to find, dating from the tenth century or at latest from the beginning of the eleventh, examples of basilican churches with vaulted aisles (Viollet-le-Duc, Dict., I, 177). Indeed these first attempts at continuous vaulting would probably have been made much earlier but for the invasions of Saracens and Northmen, which delayed till that period the first beginnings of a steady development in ecclesiastical architecture, but which by their wholesale destruction of pre-existing buildings may be said to have prepared the way for that same development. The vaulting of the nave, however, in any church, and especially in the larger, the size, was a very different matter; and it was not until the eleventh century was well advanced that the problem was seriously faced.

And when at last it was definitely taken in hand, this was done under pressure of dire necessity. Everyone who is at all conversant with the history of medieval churches, or with the history of the cathedrals of Western Europe, must be aware how extremely frequent were the disasters caused by confinements (Dehio and v. Bezold, op. cit., I, 296), and it was natural enough that the church-builders of the later Middle Ages should aim at making their buildings, at least relatively, fire-proof. The simplest form which the vaulting of a rectangular chamber can take is, of course, the cylindrical barrel-vault; and this is, in fact, the form which was adopted in many of the earliest examples of vaulted roofs, especially in the south of France; a form, too, which was extensively used in Italy during the age of the Renaissance. But, though simplest alike in conception and in construction, the cylindrical barrel-vault is in fact the least satisfactory that could be devised for its purpose; and the objections which nullify against its employment are equally valid against those of the barrel-vault, in which the great stones are set in a pointed arch. Of these objections the chief is that the horizontal thrust of a barrel-vault is evenly distributed throughout its entire length. Theoretically, then, this thrust requires to be met, not by a series of buttresses, but by a continuous wall of sufficient thickness to resist the outward pressure at any and every point along the line. Moreover, the higher the wall, the greater is the thickness needed, assuming of course that the wall stands free, like the clerestory wall of an aisled church. Much, too, will depend on the coherence of the vaulting itself, and as the Romanesque church-builders were either at sea, accustomed with, or unable to use, the methods by which the Romans and the Byzantines respectively contrived to give an almost rigid solidity to their masonry, it is no matter for surprise that in two large classes of instances they should have been content to sacrifice either the clerestory or the aisles to the advantages of a vaulted roof and to the exigencies of stability. Of aisleless churches, indeed, we must forbear here to speak. But of an important group of buildings which German writers have designated Hallenkirchen (hall-churches) a word must be said, as they unquestionably played a part in preparing the way for the final solution of the problem of vaulting.

The most rudimentary form of hall-church is that in which the nave and aisles are roofed with three parallel barrel-vaults, those of the aisles springing from the same level as those of the nave. Examples
are found at Lyons (St-Martin d'Ainay), at Lesteppe, Civray, and Carcassonne (St-Nazaire) (Delio and v. Bezold, op. cit., Pl. 122, figs. 3–6). An improvement on this design, in view of the illumination of the nave, consists in giving to the vaulting of the aisles the form of a pointed arch, as at St-Savin, and from this it was but a step to the arrangement by which the rib-vault took the form of a simple quadrant, as at Parthenay-le-Vieux, Preuilly, and Font foirole. This method of quadrant vaulting, as Viollet-le-Duc and others have observed, provides a kind of continuous internal "flying buttress", though it is by no means certain that the lights may approximate the flying buttress. The architecture of Northern France was actually suggested by these Southern buildings (Viollet-le-Duc, Dict. I, 173). In point of stability, the hall-churches of the eleventh century leave nothing to be desired. Their great defect is want of light (Viollet-le-Duc, Dict. I, 176). And this defect almost equally affects a class of buildings which may be described as two-storied hall-churches, and which are found principally, if not exclusively, in Auvergne and its neighbourhood. These are furnished, like a few of the Roman basilicas and certain Byzantine churches, with a gallery, which is usually the clerestory. In these churches the thickness of the walls, but a chamber of equal dimensions with the aisle. This arrangement not only affords additional space, but also, by reason of the greater height of the edifice, might seem to facilitate the provision of a more liberal supply of light, unimpeded by neighbouring buildings. Its practical and aesthetic advantage is that, almost entirely, and by the negligence of the circumstance that, in this class of buildings, each bay of the gallery is subdivided by means of coupled or grouped arches, the additional obstructions offered to the passage of the light almost entirely counterbalanced the possible gain through additional fenestration. We say "the possible gain" because, in fact, the galleries of these churches are but sparingly provided with windows. In these churches (which to the English reader should be of special interest by reason of their affinity in point of construction to the Westminster cathedral) the aisle is usually cross-vaulted, while the gallery has a quadrant vault abutting in the wall of the nave just below the springing of the transverse arches. The most noteworthy examples are found at Clermont-Ferrand (Notre-Dame du Port), Issore (St-Paul), and Conques. To the same family belong moreover, the great church of St-Sernin at Toulouse, already mentioned, which is distinguished from those previously named by having a double aisle. At Nevers the church of St-Étienne resembles those at Clermont, Issore, and Conques, except that it is provided with a range of upper windows which break through the barrel-vaulting, somewhat after the fashion which afterwards became so common in Italy in churches of the Renaissance period.

The inherent shortcomings of the barrel-vault, especially when used as a roof for the nave of an aisled church, have been sufficiently illustrated. These disadvantages, so far as structural stability and fenestration are concerned, might indeed be overcome by adopting the system of a succession of transverse barrel-vaults, such as are seen in the unique instance of the church of St-Philibert at Autun. The reconstruction is, however, "ponderous and inelegant, and never came into general use" (Moore, Gothic Architecture, 42). The system of cross-vaulting, which has now to be considered, may be regarded as a combination of longitudinal with transverse barrel-vaulting, inasmuch as it may be described as consisting of a central barrel which is penetrated or intersected by a series of transverse vaults, corresponding of course to the successive bays or compartments of the nave. The advantages of cross-vaulting are threefold. In the first place the total amount of the outward lateral thrust is very greatly diminished, since one-half of it is now replaced by longitudinal thrusts, which, being opposed in pairs, neutralize one another. Secondly, all that is left of the lateral thrust, as well as the longitudinal thrusts, and the whole of the vertical pressure, instead of being distributed throughout the whole length of the building, is now collected and delivered safely to the summits of the transverse ribs or pillars. Thirdly and lastly, a perfectly developed system of cross-vaulting makes it possible so to heighten the clerestory windows that their archivolt shall reach the utmost interior height of the building, and so to broaden them that their width between reveal will be very closely connected with the width between column and column below. By these improvements (as ultimately realized in the perfected Gothic of the thirteenth century) the somewhat rudimentary design of the ancient Roman basilica may be said to have reached the highest development of which it is capable. The gradual development of cross-vaulting, it is to be observed, did not take place in those districts of Southern and Central France which had already become the home of the barrel-vault and to a less degree of the cupola, but first in Lombardy, then in Germany, and finally in Northern France and in the Low Countries. In these countries the early Romanesque timber-roofed basilian church had—

with local variations of course—reached a far more advanced stage than was ever attained in those regions in which the adoption of barrel-vaulting at a relatively early date had in a manner put a check on architectural developments. And this last-mentioned district is not the least interesting, inasmuch as, while the Romans, Romans and Romans, were less trammeled than those of Normandy by the traditions of a school. The comparative lack of important architectural monuments of an earlier date left them, say these writers, a more open field for their inventive enterprise (op. cit., I, 45). The simplest form of cross-vaulting is of course that which is formed by the intersection of two cylindrical barrel-vaults of equal span. And this, without the use of ribbed groining, was the method mostly adopted by the Roman builders in their civic edifices and in the case of a pillared or columned church, however, this method had its disadvantages. In particular, having regard to the dimensions of the aisle and its vaulting, the builders of Northern Europe had all but universally adopted the plan of so spacing the columns and pillars which flank the nave that the intervals between them should be one-half the width of the church. Now the only means by which an equal height could be given to vaults of unequal span was the use of the pointed arch; and so it came about that the pointed arch was adopted, not primarily for aesthetic reasons, but rather for constructive purposes. Such a reason is to be said of the use of ribbed groining. The medieval builders, who, as has been said above, possessed neither a tenacious mortar nor the command of an abundant supply of rough labour, and who therefore could not—even had they wished it—have adopted the massive crete masonry of the Romans, were driven by the very necessities of the case to aim at lightness in the construction of their vaults, and at the same time to design for stability not on the cohesion of the materials, but on the reduction of thrusts to a minimum, and on their skilful transmission to points where they could be effectively resisted. It was then,
plainly desirable to substitute for a vaulting of uniform thickness a framework of ribs on which a comparatively thin layer of stones (cut to the requisite curvature) could be laid, and as far as possible to lighten the whole construction by moulding the ribs and likewise the columns, which supported the weight of the superstructure. The principle of a frame of ribs at lightness of construction led to the elimination, as far as possible, of all masses of solid masonry above the columns and arches of the nave. This was done by the enlargement of the windows and the development of the triforium, till the entire building, with the exception of the side buttresses and of the spandrels below the triforium, became a graceful framework of grouped shafts and intersecting ribs (Moore, op. cit., 17). The final stage in the evolution of architecture of the pointed arch was not, however, reached, until, for the solid Romanesque buttresses, which rested on the vaulting of the aisles, and which were not only clumsy but often proved inadequate for their purpose, the genius of the Gothic builders hit upon the epoch-making device of the flying buttress. By means of this device the thrust of the main vaulting was not, indeed, as has been too often said, "met by a counter-thrust", but was thrown out to the solid buttress on one side of the church, with pinnacles, which were now built outwards to a great distance from the aisles, and the spaces between which were sometimes utilized, and might with advantage have been more often utilized, for a range of lateral chapels. (Bond, op. cit., 17; cf. Moore, op. cit., 20.) Among the objects of Gothic architecture, as we have already seen, was to achieve a lightness of structure without the support of columns. This object was, however, one that needs separate treatment, and for present purposes this very inadequate indication of some of the general principles involved in its development must suffice.

The Circular Church and its Derivatives.—It is true that at the outset of this article that all ecclesiastical architecture may be said to have been developed from two primitive germs, the oblong and the circular church. Of these very numerous churches, principally, but by no means exclusively, Eastern or Italian, which may be regarded as the products of the second line of development, we shall speak very briefly. That a circular church without any kind of annex was unsuitable for the ordinary purposes of public worship is plain enough. And the most obvious modification of this rudimentary form was to throw out a projecting sanctuary on one side of the building, as in St. George's Thessalonica, or in the little church of S. Tommaso in Limine, near Bergamo. It was hardly less obviously convenient to build a projecting porch or narthex on the opposite side, as in St. Elias's, also at Thessalonica, and to complete the cross by means of lateral projections, as in the sepulchral chapel of Galla Placidia at Ravenna. Thus it was that churches having the form of a Greek cross, as well as other varieties of what German writers call the Centralbau, may be said to owe their origin to a very simple process of evolution from the circular domed building. Among the almost endless varieties on the main theme may be here enumerated: (1) buildings in which a circular, or polygonal, or quadrilateral aisle, whether in one or more stories, surrounds the central space; (2) buildings in which, though the principal space is circular, and the whole is dominated by a central cupola, the ground-plan shows a rectangular outline, the cross being, as it were, "boxed" within a square; and (3) buildings in which one of the arms of the cross is considerably elongated, as in the Duomo at Florence, St. Peter's in Rome, and St. Paul's in London. The last-named modification, it is to be observed, had the effect of assimilating the ground-plan of those great churches, and of many lesser examples of the same character, to that of the Romanesque and Gothic cruciform buildings whose genealogical descent from the columned rectangular basilica is incontestable. Among ecclesiastical edifices of historical importance or interest which are either circular or polygonal, or in which the circular or polygonal centre predominates over all subsidiary parts of the structure, may be mentioned the Pantheon in Rome, St. Sergius at Constantinople, S. Vitale and St. Apollinare Nuovo at Ravenna, S. Lorenzo at Milan, and the great monasteries of Florence, Siena, and Pisa, and the churches of the Knights Templars in various parts of Europe. St. Luke's at Stiris in Phocis, besides being an excellent typical instance of true Byzantine architecture, affords a good example of the "boxing" of a cruciform building of the type of a Greek cross, by enclosing within the square space the space between the adiacent limits of the cross.

Practically, however, the full development of cruciform from circular buildings became possible only when the problem had been solved of roofing a square chamber with a circular dome. This has in some cases been done by first reducing the square to an octagon, by means of "squeezes" or "trompettes", and then raising the dome on the octagon, by filling in the obtuse angles of the figure with rudimentary pendentives or faced curving. But already in the sixth century the architect and builder of Santa Sophia had shown that the necessary conditions of a square, namely that it should be possible, by means of "true" pendentives, to support a dome, even of immense size, on four arches (with their piers) forming a square. The use of pendentives being once understood, it became possible, not only to combine the advantages of a great central dome with those of a cruciform structure, but to institute domical or barrel-vaulting over the limbs of the cross, as at S. Marco, Venice, S. Front, Périgueux, and S. Antonio, Padua, or even to employ domical vaulting for a nave divided into square bays, as in the cathedral at Angoulême and a later eleventh-century churches in Périgord, in S. Salvador at Venice, in the London Oratory, and with the difference that saucer domes are here employed) in the Westminster Cathedral. Nor should it be forgotten that in the nave of St. Paul's, London, the architect showed that domical vaulting is possible even when the bays of nave, instead of being square, are pronouncedly oblong. Indeed, if account be taken of the manifold disadvantages of barrel-vaulting as a means of roofing the nave of a large church, it may safely be said that the employment of some form of the dome or cupola is as necessary to the logical and structural perfection of the round arch as ribbed vaulting is to the logical and structural perfection of the architecture of the pointed arch.

Systems and Styles of Architecture in Relation to Modern Needs.—A word must now be said, in conclusion, as to the merits of the several systems and styles of architecture, more especially in relation to the needs of our own day. Of systems, indeed, there are in truth only three, the trabeate or that of which the horizontal lintel may be regarded as the generating element, and which of necessity postulates a timber roof; that of the round arch, which by virtue of the law of economy postulates, as has been said, the use of domical rather than barrel-vaulting; and that of the pointed arch, which, if carried to perfection, postulates ribbed grining and the use of the flying buttress. The second system, however, admits of two methods of treatment which are sufficiently distinctive to be classed as two "styles", viz. the neo-classical, or Renaissance, and the Byzantine, and which shall be particularized presently.

Now the trabeate system, or that of the timber roof, may be very briefly dismissed. In the great majority of cases we must, indeed, admit, if we are to afford such a covering for our churches; but no one would choose a wooden roof which could afford a vaulted building. Again, the various types of Romanesque architecture, with their imperfect and tentative methods of vaulting, though historically of great interest, should
ECCLESIASTICUS

be regarded as finally out of court. On the other hand, of the Gothic architecture of the thirteenth century, as exemplified in the great cathedrals of Northern France and of Cologne, it may be quite fearlessly asserted: (1) that every single principle of construction employed therein, not only was the outcome of centuries of practical experience, in the form of successive retrogressive attempts to solve the problems of church vaulting; (2) that the great loftiness of these buildings was not primarily due (as has been sometimes suggested) to any mere "Emporastreben," or "upward-soaring" propensity, but was simply the aggregate result of giving the windows of the clerestory a height in suitable proportion to their width, and to the triforium a height sufficient to allow of the abutment of the aisle roof; and (3) that every subsequent attempt to modify, in any substantial particular, this perfected Gothic style, was of its nature retrogressive and decadent, as might be illustrated from the English Perpendicular and the Italian and Spanish varieties of Gothic architecture. Nevertheless it must be admitted that thirteenth-century Gothic, though perfect of its kind, has its limitations, the most serious of which—in relation to modern needs—is the necessarily reduced height of the nave. Then the arches of the Milan cathedral attempted to improve on his French predecessors by exceeding their maximum width of fifty feet, and to construct a Gothic building with a nave measuring sixty feet across, it was found impossible, as the building proceeded, to carry out the order without incurring the almost certain risk of a collapse, and hence it was necessary to depress the clerestory to its present stunted proportions. Now under modern conditions of life, especially in the case of a cathedral of first-class importance, a nave of far greater width is by all means desirable; and in order to achieve this greater width it is necessary with to fall back on the unsatisfactory compromise of Italian or Spanish Gothic, as illustrated in the cathedrals of Milan, Florence, or Gerona, or else to adopt the principle of the round arch, combined, by preference, with domical vaulting. This, as everyone knows, is what Mr. Bentley has done, with altogether conspicuous success, in the case of the Westminster Cathedral. Of the design of this noble edifice he is impossible to speak here. But it may be worth while to indicate one main reason for the choice of the Byzantine rather than the neoclassic or Renaissance treatment in the round-arch system. The principal difference between the two is this: that, whereas the neo-classical style, by its use of pilasters, treats every pier as though it were a cluster of huge, flat-faced columns, the Byzantine boldly distinguishes between piers and columns, and employs the latter exclusively for the purposes which the monolithic shafts are suited to fulfill, for instance the support of a gallery; while the piers in a Byzantine building make no pretence of being other than what they are, viz., the main supports of the vaulting. The Byzantine method of construction, as employed at Westminster, has the further advantage that it brings within the building the whole of the spaces between the buttresses, thereby at the same time increasing the interior dimensions and avoiding the awkward appearance of ponderous external supports. Nor is the Byzantine style of architecture suitable for a great cathedral alone; one may venture to be assured that a great experiment which has been tried at Westminster will be fruitful of results in the future development of ecclesiastical architecture.

HERBERT LUCAS.

I. Title.—The usual title of the book in Greek MSS. and Fathers is Σοφία Ἰσραήλ νεόν Σεφαρ, "the Wisdom of Jesus, the son of Sirach," or simply Σοφία Σεφαρ, "the Wisdom of Sirach." It is manifestly connected with, and possibly derived from, the following sub-section which appears at the end of the subsequent enumerated Hebrew fragments of Ecclesiasticus: "Wisdom (Hochmah) of Simeon, the son of Yeshuah, the son of Eleazar, the son of Sirah." Indeed, its full form would naturally lead one to regard it as a direct rendering of the Hebrew headings: Ἱσχιάν Χριστε Ἰσραήλ. Were it not that St. Jerome, in his prologue to the Solomonic writings, states that the Hebrew title of Ecclesiasticus was 'Mishle' (Parabol) of Jesus of Sirach. Perhaps in the original Hebrew the book bore different titles at different times: in point of fact, the simple name Ἱσχιάν is applied to it in the Talmud, while Rabbinic writers commonly quote Ecclesiasticus as Bēn Sīrāh. Among the other Greek names which are given to Ecclesiasticus in patristic literature, may be mentioned the simple title of Σοφία, "Wisdom," and the honorary designation Χρηστοφόρος σακχαρ, "all-virtuous sweetness." As might well be expected, Latin writers have applied to Ecclesiasticus titles which are derived from its Greek names, such as "Sapienza Sirach" (Rufinus); "Jesu filii Sirach" (Julianus), "Sapientia Jesu" (Codex Claromontanus); "Liber Sapientiae" (Roman MS.). It can hardly be doubted, however, that the heading "Parabola Solomonis," which is prefixed at times in the Roman Breviary to sections from Ecclesiasticus, is to be traced back to the Hebrew title spoken of by St. Jerome in his prologue to the Solomonic writings. Be this as it may, the book is most commonly designated in the Latin Church as "Ecclesiasticus," itself a Greek word with a Latin ending. This last title—not to be confounded with "Ecclesiastes" (Ecc.)—is the one used by the Council of Trent in its solemn decree concerning the books to be regarded as inspired and canonical; and one may fairly put forward the considerable esteem in which this didactic work was formerly held for the purpose of general reading and instruction in church meetings: this book alone, of all the deuterocanonical writings, which are also called Ecclesiastical by Rufinus, has preserved by way of pre-eminence the name Ecclesiasticus (Liber), that is "a church reading-book".

II. Contents.—The Book of Ecclesiasticus is preceded by a prologue which professes to be the work of the Greek translator of the original Hebrew and the genuineness of which is unquestioned. In this preface to his translation, the writer describes, among other things,
his frame of mind in undertaking the hard task of rendering the Hebrew text into Greek. He was deeply impressed by the wisdom of the sayings contained in the book, and therefore wished, by means of a translation, to place those valuable teachings within the reach of anyone, thereby elevating himself to the status of more perfect accord with the law of God. This was a most worthy object, and there is no doubt that in setting it before himself the translator of Ecclesiasticus had well realized the general character of the contents of that sacred writing. The fundamental thought of the author, Ecclesiasticus is that of wisdom understood and inculeated in inspired Hebrew literature; for the contents of this book, however varied they may appear in other respects, admit of being naturally grouped under the general heading of "Wisdom." Viewed from this standpoint, which is indeed universally regarded as the author's own standpoint, the contents of Ecclesiasticus may be divided into two great parts: chs. i-xiii, 14; and xiii, 15-1, 26. The sayings, which chiefly make up the first part, tend directly to inculcate the fear of God and the fulfillment of His commandments, wherein consists true wisdom. This they do by pointing out, in a concrete manner (as in xiv), the just man shall conduct himself in the manifold relationships of practical life. They afford a most varied fund of thoughtful rules for self-guidance "in joy and sorrow, in prosperity and adversity, in sickness and health, in struggle and temptation, in social life, in all circumstances with friends and enemies, with high, low, rich and poor, with the rich folk, the wise and the foolish, in trade, business, and one's ordinary calling, above all, in one's own house and family in connection with the training of children, the treatment of men-servants and maid-servants, and the way in which a man ought to behave towards his own wife and women generally" (Schürer). Together with these maxims, which resemble closely both in matter and form the Proverbs of Solomon, the first part of Ecclesiasticus includes several more or less long descriptions of the origin and excellence of wisdom (cf. iv, 12-22; v, 37; xvi, 29-33). The contents of the second part of the book are of a decidedly more uniform character, but contribute no less effectively to the setting forth of the general topic of Ecclesiasticus. They first describe at length the Divine wisdom as wonderfully displayed in the realm of nature (chs. 15-xxiii), and next illustrate the practical application of wisdom in the various walks of life, as made known by the history of Israel's worthies, from Enoch down to the high priest Simon, the writer's holy contemporary (xlv-1, 26). At the close of the book (1, 27-29), there is a short conclusion containing the author's subscription and the expression of his general purpose; and next, an appendix (ii) in which the writer returns thanks to God for His benefits, and especially for the gift of wisdom, and to which are subjoined in the Hebrew text recently discovered, a second subscription and the following pious ejaculation: "Blessed be the name of Xalweh from this time forth and for evermore."

III. ORIGINAL TEXT.—Until quite recently the original language of the Book of Ecclesiasticus was a matter of considerable doubt among scholars. They, of course, knew that the Greek translator's purpose was to state that the work was originally written in "Hebrew," Ἱςθαράδι, but they were in doubt as to the precise significance of this term, which might mean either Hebrew proper or Aramaic. They were likewise aware that St. Jerome, in his preface to the Solomonic writings, spoke of "a Hebrew original," but it is not clear whether it was truly a Hebrew text, or not rather a Syriac or Aramaic translation in Hebrew characters. Again, in their eyes, the citation of the book by rabbinical writers, sometimes in Hebrew, sometimes in Aramaic, did not appear decisive, since it was not certain that they came from a Hebrew original. And this was their view also with regard to the quotations, this time in classical Hebrew, by the Bagdad gaon Saadia of the tenth century of our era, that is of the period after which all documentary traces of a Hebrew text of Ecclesiasticus practically died out of the one, living in more perfect accord with the law of God.

These, their chief argument for this was that the Greek version contains certain errors; for example, xxiv, 37 (in Gr., verse 27), "light" for "love" (אorate); xxv, 22 (Gr., verse 15), "head" for "neighbour" (אפק; cf. Jer. verse 18), "Tyrants" for "enemies" (אנאים); etc.; these are best accounted for by supposing that the translator misunderstood a Hebrew original before him. And so the matter stood until the year 1896, which marks the beginning of an entirely new period in the history of the original text of Ecclesiasticus. Since that time, much documentary evidence has come to light, and it tends to show that the book was originally written in Hebrew. The first fragments of a Hebrew text of Ecclesiasticus (xxxix, 15-xl, 6) were brought from the East to Cambridge, England, by Mrs. A. S. Lewis; they were identified in May, 1896, and published in "The Expositor" (July, 1896) by S. Schechter, reader in Talmudic at Cambridge University. About the same time, in a box of fragments acquired from the Cairo geniza through Professor Sayce for the Bodleian Library, Oxford, nine leaves in Hebrew, (now callling them containing xi, 9-xlii, 11, were found by A. E. Cowley and Ad. Neubauer, who also soon published them (Oxford, 1897). Next followed the identification by Professor Schechter, first, of seven leaves of the same Codex (B), containing xxx, 11-xlii, 11; xxxi, 1b-xxxii, 5; xxxii, 11-xxxvii, 21; xxxiii, 30-xxxviii, 28b; xxxiv, 14b-15; xxxv, 1; and next, of four leaves of a different MS. (called A), and presenting iii, 6e-vii, 31a; vi, 36d-xvi, 26. These eleven leaves had been discovered by Dr. Schechter in the fragments brought by him from the Cairo geniza; and it is among matter obtained from the same source by the British Museum, that G. Margoliouth found and published, in 1899, four pages of the MS. B, containing xxxi, 12-xxxii, 1a; xxxvi, 21-xxxvii, 29. Early in 1900, I. Lévi published two pages from a third MS. (C), xxxvi, 29b-xxxviii, 1a, that is, a passage already contained in Codex B; and two from a fourth MS. (D), presently to be described, that is, a section already found in Codex A. Early in 1900, too, E. N. Adler published four pages of MS. A, viz. viii, 29-a; xi; and S. Schechter, four pages of MS. C, consisting of mere excerpts from iv, 28b-v, 15c, xxv, 11b-xxxvii, 25. Lastly, two pages of MS. D were discovered by Dr. M. S. Gaster, and contain a few verses of chapters, xviii, xix, xx, xxvii, some of which already appear in MSS. B and C. Thus by the middle of the year 1900, more than one-half of a Hebrew text of Ecclesiasticus had been identified and published by scholars. (In the foregoing indications of the newly discovered fragments of the text, the above verses given are according to the numbering in the Latin Vulgate.) As might naturally be anticipated, and indeed it was desirable that it should so happen, the publication of these various fragments gave rise to a controversy as to the originality of the text therein exhibited. At a very early stage in that publication, scholars easily noticed that although the Hebrew language of the fragments was apparently classical, it nevertheless contained readings which might lead one to suspect its actual dependence on the Greek and Syriac versions of Ecclesiasticus. When measurements to determine whether, and if so, to what extent, the Hebrew fragments reproduced an original text of the book, or on the contrary, simply presented a late transliteration of Ecclesiasticus into Hebrew by means of the versions just named. Both Dr. G. Bickell and
Professor D. S. Margoliouth, that is, the two men who but shortly before the discovery of the Hebrew fragments of Ecclesiasticus had attempted to retranslate small parts of the book into Hebrew, declared themselves openly against the originality of the newly found text. It may indeed be admitted that the efforts naturally entailed by their own work of translation had especially fitted Margoliouth and Bielkell for noticing and appreciating those features which even now appear to many scholars to tell in favour of a certain connexion of the Hebrew text with the Greek and Syriac versions. It remains true, however, that, with the exception of Israël Leévi and perhaps a few others, the most prominent Biblical and Talmudic scholars of the day are of the mind that the Hebrew fragments present an original text. They think that the arguments and inferences most vigorously urged by Professor D. S. Margoliouth in favour of his view have been disposed of through a comparison of the fragments published in 1890 and 1900 with those that had appeared at an earlier date, and through a close study of nearly all the facts now available. They readily admit in the MSS., thus far recovered, scribal faults, doublets, Arabisms, apparent transpositions on ancient versions, etc. But to their minds all such defects do not disprove the originality of the Hebrew text, inasmuch as they can, and indeed in a large number of cases must, be accounted for by the very late character of the copies now in our possession. The Hebrew fragments of Ecclesiasticus belong distinctly to the earliest, to the seventh, century of our era, and by that late date all kinds of errors could naturally be expected to have crept into the original language of the book, because the Jewish copyists of the work did not regard it as canonical. At the same time these defects do not disfigure the whole of the text of Hebrew in which Ecclesiasticus was originally written. The language of the fragments is manifestly not rabbinic, but classical Hebrew; and this conclusion is decided by the comparison of their text with that of the quotations from Ecclesiasticus, both in the Talmud and in the Midrashim, which have already been referred to. Again, the Hebrew of the newly found fragments, although classical, is yet one of a distinctly late type, and it supplies considerable material for lexicographic research. Finally, the comparatively large number of the Hebrew MSS., recently discovered in only one instance, points to the fact that the work in its primitive form was often transcribed in ancient times, and thus affords hope that other copies, more or less complete, of the original text may be discovered at some future date. To render their study convenient, all the extant fragments have been brought together in a splendid edition, "Facsimiles of the Fragments hitherto recovered of the Book of Ecclesiasticus in Hebrew" (Oxford and Cambridge, 1901). The metrical and strophic structure of parts of the newly discovered text has been particularly investigated by H. Grimm and N. Schlegel, whose results, in the least, indifferent, and by Jos. Knabenbauer, S.J., in a less venturesome way, and hence with more satisfactory results.

IV. Ancient Versions. It was, of course, from a Hebrew text comparatively free from errors that the grandson of the author of Ecclesiasticus rendered the book into Greek. This translator was a Palestinian Jew, who came to Egypt at a certain time, and desired to make the work accessible in a Greek dress to the Jews of the Dispersion, and no doubt also to all lovers of wisdom. His name is unknown, although an ancient, but little reliable, tradition ("Synopsis Sacra" in St. Athanasius's works) calls him Jesus, the son of Sirach. His literary qualifications for the task he undertook and carried out cannot be fully ascertained at the present day. He is commonly regarded, however, from the general character of his work, as a man of good general culture, with a fair command of both Hebrew and Greek. He was distinctly aware of the great difference which exists between the respective genius of these two languages, and of the consequent difficulty attending the efforts of one who aimed at giving a satisfactory Greek version of a Hebrew text. And therefore, in his prologue to the work, his reader's indulgence for whatever shortcomings they may notice in his translation. He claims to have spent much time and labour on his version of Ecclesiasticus, and it is only fair to suppose that his work was not only a conscientious, but also, a successful, rendering of the original Hebrew. One can but speak in this guarded manner of the exact value of the Greek translation in its primitive form, for the simple reason that a comparison of its extant MSS.—all apparently derived from a single Greek exemplar—shows that the primitive translation has been very often, and in many cases seriously, tampered with. The great uncials, the Vatican, the Sinaitic, the Ephraimitic, and possibly the Alexandrian, though comparatively free from glosses, contain an inferior text; the better form of the text seems to be preserved in the Venetus Codex and Codex Vaticanus, though these are not free from glosses. Undoubtedly, a fair number of these glosses may be referred safely to the translator himself, who, at times, added one word or even a few words to the original before him, to make the meaning clearer or to guard the text against possible misunderstanding. The great bulk of the Greek versions is, however, based on the above-revised, glossed, text of the Hebrew, and, again, the addition of the Book of Proverbs; they are expansions of the thought, or hellenizing interpretations, or additions from current collections of homiletic sayings. The following are the best-ascertained results which flow from a comparison of the Greek version with that of our Hebrew fragments. Sometimes, the corruptions of the Hebrew may be discovered by means of the Greek; and, conversely, the Greek text is proved to be defective, in the line of additions or omissions, by reference to parallel places in the Hebrew. At times, the Hebrew discloses considerable freedom of rendering on the part of the Greek translator; or enables one to perceive how the author of the version mistook one Hebrew letter for another; or, again, affords us a means to make sense out of an unintelligible expression in the Greek text. Lastly, the Hebrew text confirms the conclusions, reached in the Greek version, with which it is presented by the Syriac, Latin, and Armenian versions, over against the unnatural order found in all existing Greek MSS. Like the Greek, the Syriac version of Ecclesiasticus was made directly from the original Hebrew. This is well-nigh universally admitted; and a comparison of its text with that of the newly found Hebrew fragments should settle the point forever: as just stated, the Syriac version gives the same order as the Hebrew text for the contents of xxx-xxvii; in particular, it presents mistaken renderings, the origin of which, while inexplicable by supposing a Greek original as its basis, is easily accounted for through the reference to the text of the Hebrew fragments. But the Hebrew text from which it was made must have been very defective, as is proved by the numerous and important lacunae in the Syriac translation. It seems, likewise, that the Hebrew has been tampered with in a careless, and at times even arbitrary, manner. The Syriac version has all the less critical value at the present day, because it was considerably revised at an unknown date, by means of the Greek translation. Of all the other ancient versions of Ecclesiasticus, the Old Latin is the most important. It was made before St. Jerome's time, although the precise date of its origin cannot now be ascertained; and the holy doctor apparently revised its text but little, previously to its adoption into the Latin Vulgate. The unity of the Old Latin version, which was formerly doubted,
has been of late seriously questioned, and Ph. Thielmann, the most recent investigator of its text in this respect, thinks that chs. xiv-l are due to a translator other than that of the rest of the book, the former part being of European, the latter and chief part of African, origin. (See also the views of P. De Laplace, P. Sahatieh, E. G. Bengel, etc., namely, that the Latin version was made directly from the Greek, is now considered as altogether certain. The version has retained many Greek words in a latinized form: *eremos* (vi, 3); *eucharis* (vi, 5); *basta* (vi, 30); *oikion* (xx, 21); *zeuxis* (xx, 31); *diergeia* (vi, 11), *perderus*; etc., etc., together with certain Graecisms of construction; so that the text rendered into Latin was unquestionably Greek, not the original Hebrew. It is indeed true that other features of the Old Latin— notably its order for xxx-xxxxvi, which disagrees with the Greek translation, and agrees with the Hebrew text— seem to point to the conclusion that the Latin version was based immediately on the original Hebrew. But a very recent and critical examination of all such features in i-xiii has led H. Herkenne to a different conclusion; all things taken into consideration, he is of the mind that: “Nittura imperfecta legenda e vulgari greecum textum hebraicum alterius recensionis graece castigato.” (See also J. Knaebenauer, S.J., “In Ecclesiasticum,” p. 34 sq.) Together with graecized forms, the Old Latin translation of Ecclesiasticus presents many barbarisms and solecisms (such as *deomputior*, i, 13; *receptabilis*, ii, 1, 24; *receptabilis*, ii, 1, 24; *percer*, pericit, viii, 18; *xxxiii, 7; obductio*, ii, 2; *v*, 1, 10; etc.) which, to the extent in which they can be actually traced back to the original form of the version, go to show that the translator had a poor command of the Latin language. Apart from a fair number of expressions which certainly due to the translator, it may be inferred that, at times, he did not catch the sense of the Greek, and that at other times he was too free in rendering the text before him. The Old Latin version abounds in additional lines or even verses foreign not only to the Greek, but also to the Hebrew text. Such important additions—which often appear clearly so from the fact that they interfere with the poetical parallels of the book—are either repetitions of preceding statements under a slightly different form, or glosses inserted by the translator or the copyists. Owing to the early origin of the Latin version (probably the second century of our era), and to its intimate connexion with both the Greek and Hebrew texts, a good edition of its primitive form, as far as this form can be ascertained, is one of the chief things to be desired for the textual criticism of Ecclesiasticus. Among the other ancient versions of the Book of Ecclesiasticus which are derived from the Greek, the Ethiopic, Arabic, and Coptic are worthy of special mention.

V. Author and Date.—The author of the Book of Ecclesiasticus is not King Solomon, to whom, as St. Augustine bears witness, the work was sometimes ascribed “on account of some resemblance of style” with that of Proverbs, Ecclesiastes, and the Canticles of Canticles, but to whom, as the same holy doctor says, “the more learned” (apparently among the church writers of the time) “know full well that it should not be referred.” (See also the City of God, ch. xxvii, ed. ch. xxvi.) Even the present day, the authorship of the book is universally and rightly assigned to a certain “Jesus,” concerning whose person and character a great deal has indeed been surmised but very little is actually known. In the Greek prologue to the work, the author’s proper name is given as Ἰσραηλ, and this information is confirmed by the subcriptions found in the original Hebrew: 1, 27 (Vulg. 1, 25); ii, 30. His familiar surname was Ben Sirah, as the Hebrew text and the ancient versions agree to attest. He is described in the Greek and Latin versions as “a man of Jerusalem” (I, 29), and internal evidence (cf. xxiv, 18 sqq.; I) tends to confirm the statement, although it is not found in the Hebrew. His close acquaintance with “the Law, the Prophets, and the other books delivered from the fathers,” that is, with the three classes of writings which make up the Hebrew Bible, is distinctly borne witness to by the prologue to the work (367 lines), in which the study of the Hebrew fragments has shown to be derived from the sacred books of the Jews, are an ample proof that Jesus, the son of Sirah, was thoroughly acquainted with the Biblical text. He was a philosophical observer of life, as can be easily inferred from the nature of his thoughts, and his manner of speech is steeped in the wider knowledge which he acquired by traveling much, and of which he, of course, availed himself in writing his work (xxv, 12). The particular period in the author’s life to which the composition of the book should be referred cannot be defined, whatever conjectures may have been put forth in that regard by some recent scholars. The data to which others have appealed (xxxi, 22 sqq.; xxxviii, 1-15; etc.) to prove that he was a physician are insufficient evidence; while the similarity of the names (Jason-Jesus) is no excuse for those who have identified Jesus, the son of Sirah, with Jason, an apostle of the first rank, on the basis of the ungodly and hellenizing high priest Jason (175-172 B.C.—concerning Jason’s wicked deeds, see II Mach., iv, 7-26).

The time at which Jesus, the author of Ecclesiasticus, lived has been the matter of much discussion in the past. But at the present day, it is justly given with tolerable precision. Two data are particularly helpful for this purpose. The first is supplied by the Greek prologue, where we read that the grandson of Jesus of Sirah came into Egypt ἐν τῷ οἴκῳ καὶ τοιούτῳ τῃ ἐκ τοῦ Ἐρυθροῦ Βασιλείῳ, not long after which he returned into Greece his grandfather’s work. The “thirty-eighth year” here spoken of by the translator does not mean that of his own age, for such a specification would be manifestly irrelevant. It naturally denotes the date of his arrival in Egypt with a reference to the years of the rule of the then monarch, the Egyptian Ptolemy Euergetes; and in point of fact, the Greek grammatical construction of the passage in the prologue is that usually employed in the Septuagint version to give the year of rule of a prince (cf. Aggaeus, i, 1; ii, 1, 10; Zach., i, 1, 7; vii, i; I Mach., xiii, 42; xiv, 27; etc.). There were indeed two Ptolemies of the same name: the elder Ptolemy III Ptolemy III Ptolemy VII Phiscon. But to decide which is the one actually meant by the author of the prologue is an easy matter. As the first, Ptolemy I, reigned only twenty-five years (247-222 b.c.), it must be the second, Ptolemy VII, who is intended. This latter prince shared the throne along with his brother (from 170 B.C. onwards), and afterwards ruled alone (from 145 B.C. onwards). But he was wont to reckon the years of his reign from the earlier date. Hence “the thirty-eighth year of Ptolemy Euergetes”, in which the grandson of Jesus, the son of Sirah, came to Egypt, was 132 B.C. This being the case, the translator’s grandfather, the author of Ecclesiasticus, may be regarded as having lived and written his work between forty and sixty years before (between 190 and 170 B.C.), for there can be no doubt that in referring to Jesus by means of the term Ἰσραηλ and of the definite phrase Ἰσραηλ ὁ Ἱεροσαλημ, the writer of the prologue designates his grandfather, and not a more remote ancestor. The second datum that is particularly available for determining the time at which the writer of Ecclesiasticus lived is supplied by the book itself. It has long been felt that since the son of Sirah could not have lived such a genuine glow of enthusiasm the idea that Jesus, the son of Onias, whom he praises as the last in the long line of Jewish worthies, he must himself have been an eyewitness of the glory which he depicts (cf. i, 1-16, 22, 23). This was, of course, but an inference,
and so long as it was based only on a more or less subjective appreciation of the passage, one can easily understand why many scholars questioned, or even rejected, its correctness. But with the recent discovery of the original Hebrew of the passage, there has come a new, and distinctly objective, element, which places practically beyond doubt the correctness of the inference. In the Hebrew text, immediately after its eulogium of the high priest Simon, the writer subjoins the following fervent prayer: "May His [i.e. Yahweh's] mercy be continually with Simon, and may He establish with him the covenant of Phinehas, that will endure with him and with his seed for ever and ever." (1, 24). Obviously, Simon was yet alive when this prayer was thus formulated; and its actual wording in the Hebrew implies this so manifestly, that when the author's grandson rendered it into Greek, at a date when Simon had been dead for some time, he felt it necessary to modify the text before him, and hence rendered it in the following general manner: "May His mercy be continually with us, and may He redeem us in His days." Besides thus allowing us to realize the fact that Jesus, the son of Sirach, was a contemporary of the high priest Simon, chap. ii, the Hebrew text affords us certain details which enable us to decide which of the two Simons, both high priests and sons of Onias and known in Jewish history, is the one described by the writer of the book. On the one hand, the only known title of Simon I (who held the pontificate under Ptolemy Soter, about 300 B.C.) was Ptolemy. Could we furnish a reason for the great enthusiasm which passed upon Simon in Eccles., i, 1, the surname "the Just." (cf. Josephus, Antiq. of the Jews, Bk. XII, chap. ii, 2, 3), whence it is inferred that he was a renowned high priest worthy of being celebrated among the Jewish heroes praised by the son of Sirach. On the other hand, such details given in Simon's pæan, as the facts that he repaired and strengthened the Temple, fortified the city against siege, and protected the city against robbers (cf. Eccles., i, 1-4), are in close agreement with what is known of the times of Simon II (about 200 B.C.). While in the days of Simon I, immediately after, the people were undisturbed by foreign aggression, in those of Simon II the Jews were sorely harassed by hostile armies, and their territory was invaded by Antiochus, as we are informed by Josephus (Antiq. of the Jews, Bk. XII, chap. iii, 3). It was also in the later time of Simon II that Ptolemy Philopater was prevented only by the high priest's prayer to God, from desecrating the Most Holy Place; he then started a fearful persecution of the Jews at home and abroad (cf. III Mach., ii, iii). It appears from these facts—to which others, pointing in the same direction, could easily be added—that the author of Ecclesiasticus lived about the beginning of the second century b.c. As a matter of fact, recent Catholic scholars, in increasing number, prefer this position to that which identifies the high priest Simon, spoken of in Eccles., i, with Simon I, and which, in consequence, refers the composition of the book to about a century earlier (about 280 B.C.).

VI. METHOD OF COMPOSITION.—At the present day, there are two principal views concerning the manner in which the writer of Ecclesiasticus composed his work; and it is difficult to say which is the more probable. The first, held by many scholars, maintains that an impartial study of the topics treated and of their actual arrangement leads to the conclusion that the whole book is the work of a single mind. Its advocates claim that, throughout the book, one and the same general purpose and doctrine can be easily discovered, viz.: the purpose of teaching the practical value of Hebrew wisdom, and that one and the same method in handling the materials can be readily noticed, the writer always showing wide acquaintance with men and things, and never citing any exterior authority for what he says. They affirm that a careful examination of the contents discloses a distinct unity of mental attitude on the author's part towards the same leading topics, towards God, life, the Law, wisdom, etc. They do not deny the existence of differences of tone in the book, but think that they are found in various paragraphs relating to minor topics; that the diversities of style noticed do not go beyond the natural experience; that the author very likely wrote at different intervals and under a variety of circumstances, so that it is not to be wondered at if pieces thus composed bear the manifest impress of a somewhat different frame of mind. Some of them actually go so far as to say that the whole compilation of Ecclesiasticus may at times have collected thoughts and maxims that were already in current and popular use, may even have drawn material from collections of wise sayings no longer extant or from unpublished discourses of sages; but they, each and all, are positive that the author of the book "was not a mere collector or compiler; his characteristic personality stands out too distinctly and prominently for that, and notwithstanding the diversified character of the apothegms, they are all the outcome of one connected view of life and of the world." (Harnack)

The second view maintains that the Book of Ecclesiasticus was composed by a process of compilation. According to the defenders of this position, the compilatory character of the book does not necessarily conflict with a real unity of general purpose pervading and connecting the elements of the work: such a purge proves, indeed, that the compiler had brought together all the elements for a common end, but it really leaves untouched the question at issue, viz., whether that one mind must be considered as the original author of the contents of the book or, rather, as the compiler of the sayings and sermons of others. According to this view, the individual sayings and maxims of one and the same general purpose of the work of the son of Sirach, and admitting likewise the fact that certain portions of Ecclesiasticus belong to him as the original author, they think that, on the whole, the book is a compilation.

Briefly stated, the following are the grounds for their position: In the first place, from the very nature of his work, the author was like "a gleaner after the grape-gatherers"; and in thus speaking of himself (xxiii, 10) he gives us to understand that he was a collector or compiler. In the second place, the structure of the work still betrays a complete compilatory character. The section (vi) is a real appendix to the book, and was added to it after the completion of the work, as is proved by the colophon in 1, 29 sqq. The opening chapter reads like a general introduction to the book, and indeed as one different in tone from the chapters by which it is immediately followed, while it resembles some distinct sections which are embodied in further chapters of the work. In the body of the book, ch. xxxvi, 1-19, is a prayer for the Jews of the Dispersion, altogether unconnected with the sayings in verses 20 sqq. of the same chapter; ch. xliii, 15-1, 26, is a discourse clearly separate from the preceding section by which it is immediately preceded; chs. xvi, 24; xxiv, 1; xxxiv, 16, are new starting-points, which, no less than the numerous passages marked by the address "my son" (i, 1; iii, 19; iv, 1, 23; vi, 18, 24, 33, etc.), and the regular addition of new topics, in the sections which is the more striking, the unity of the work. Other marks of a compilatory process have also been appealed to. They consist in the significant repetition of several sayings in different places of the book (cf. xx, 32, 33, which is repeated in xii, 17b, 18; etc.); in apparent discrepancies of thought and doctrine (cf. the differences of tone in chs. xvi, 24; xxy; xxix, 21-41; xl, 1-11; etc.); in certain topical headings at the beginning of special sections (cf. xxxi, 12; xli, 16; xlv, 1, in the Hebrew); and in an additional psalm or canticle found in the newly discovered Hebrew text, between li, 12, and li, 13: all of which are best accounted for by the use of several
smaller collections containing each the same saying, or differing considerably in their general tenor, or supplied with their respective titles. Finally, there seems to be an historical trace of the compilatory character of Ecclesiasticus in a second, but unauthentic, prologue to the book, which is found in the "Synopsis scholastica," another book, which is printed in the works of St. Athanasius and also at the beginning of Ecclesiasticus in the Complutensian Polyglot, the actual reduction of the book is ascribed to the Greek translator as a regular process of compilation of detached hymns, sayings, prayers, etc., which had been left him by his grandfather, Jesus, the son of Sirach.

VII. DOCTRINAL AND ETHICAL TEACHING.—Before setting forth in a summary way the principal teachings, doctrinal and ethical, contained in the Book of Ecclesiasticus, it will not be amiss to premise two remarks which, however, elementary, should be distinctly borne in mind by anyone who wishes to view the doctrines of the son of Sirach in their proper light. First, it would be obviously unfair to require that the contents of this sapiential book should come fully up to the high moral standard of Christian ethics, or show in the clearest manner the distinction and separation of good and evil teachings embodied in the sacred writings of the New Testament or in the living tradition of the Church; all that can be reasonably expected of a book composed some time before the Christian Dispensation, is that it should stand forth substantially good, not perfect, doctrinal and ethical teaching. Nor is this requirement good logic and sound common sense demand that the silence of Ecclesiasticus concerning certain points of doctrine be not regarded as a positive denial of them, unless it can be clearly and conclusively shown that such a silence must be so construed. The work is marked by a great number of sayings which bear on all kinds of topics, and on that account, hardly ever, if ever at all, will a sober critic be able to pronounce on the actual motive which prompted the author of the book either to mention or to omit a particular point of doctrine. St. Jerome, in presence of a writer manifestly wedded to the national and religious traditions of the Jewish race, as the general tone of his book proves the author of Ecclesiasticus to have been, every scholar worthy of the name will readily see that silence on Jesus' part regarding some important doctrine, shows nothing so much as that of the writings, whether of the Ammons, the Jews, or the Messias, is not the reason whatever that the son of Sirach did not abide by the belief of the Jews concerning that doctrine, and, in reference to the special point just mentioned, did not share the Messianic expectations of his time. As can readily be seen, the two general remarks just made simply set forth elementary canons of historical criticism; and they would not have been dwelt on here were it not that they have been very often lost sight of by Protestant scholars, who, biased by their desire to disprove the Catholic doctrine of the inspired character of Ecclesiasticus, have done their utmost to depreciate the doctrinal and ethical teaching of this deutero-canonical book.

The following are the principal doctrinal doctrines of Jesus, the son of Sirach. According to him, as according to all the other inspired writers of the Old Testament, God is one and there is no God beside Him (xxxvi, 5). He is a living and eternal (god (xxvii, 18, 23; xviii, 18, 19); and although His greatness and mercy exceed all human comprehension, yet He makes Himself known to man through His wonderful works (xvi, 18, 23; xviii, 18, 19), which He produced by His Word of command, stamping them with all the marks of greatness and goodness (xlii, 15–xliii, etc.). Man is the choice handiwork of God, who made him for His glory, set him as king over all other creatures (xviii, 1–22), and will hold him accountable for His own personal deeds (xvi, 9–16), for while tolerating moral evil He reproveth and enables man to avoid it (xv, 11–21). In dealing with man, God is no less merciful than righteous: "He is mighty to forgive" (xvi, 12, and: "How great is the mercy of the Lord, and His forgiveness to them that turn unto Him" (xxviii, 28); yet none should presume that Divine mercy will at any time delay His wrath, "for His wrath shall come on a sudden, and in the time of vengeance He will destroy thee" (v, 6–9). From among the children of men, God selected for Himself a special nation, Israel, in the midst of which He wills that wisdom should reside (xiv, 13–16), and in the midst of which He offers a fervent prayer, replete with touching remembrances of God's mercies to the patriarchs and prophets of old, and with ardent wishes for the union and exaltation of the chosen people (xxxvi, 1–10). It is quite clear that the Jewish patriot who put forth this petition to God for future national quiet and prosperity, and who furthermore confidently expected that Elias's return would contribute to the glorious restoration of all Israel (cf. xlv, 10), looked forward to the introduction of Messianic times. It remains true, however, that in whatever way his silence be accounted, he does speak anywhere of the interposition of God in behalf of the Jewish people, or of the future coming of a personal Messiah. He manifestly alludes to the narrative of the Fall, when he says: "From the woman came the beginning of sin, and by her we all die" (xxxv, 30), and apparently counsels a similar original devotion from mankind in the two miseries and passions that weigh so heavily on "the children of Adam" (ix, 1–11). He says very little concerning the next life. Earthly rewards occupy the most prominent, or perhaps even the sole, place, in the author's mind, as a sanction for present actions (xvii, 1–22). He never speaks anywhere of a future life or of the miseries and passions that weigh so heavily on "the children of Adam" (ix, 1–11). As regards the underworld or Sheol, it appears to the writer nothing but a mournful place where the dead do not praise God (xvi, 32, 33). The central, dogmatic, and moral idea of the book is that of wisdom. Bén Sirã describes it under several important aspects. When he speaks of it in relation to God, he almost invariably invests it with personal attributes. It is eternal (1, 1), unsearchable (1, 6, 7), universal (xxiv, 6 sqq.). It is the formative, creative power of the world (xxiv, 3 sqq.). It yet is itself superior (1, 9; also in Greek: xcvii, 9), and is nowhere treated as a distinct, subsisting Divine Person, in the Hebrew text. In relation to man, wisdom is depicted as a quality which comes from the Almighty and works most excellent effects in those who love Him (xiv, 10–15). It is identified with the "fear of God" (4, 16), which should of course prevail in a special manner in Israel, and promote among the Hebrews the perfect fulfillment of the Mosaic Law, which the author of Ecclesiasticus regards as the living embodiment of God's will. It is a priceless treasure to the acquisition of which one must devote all his efforts, and the imparting of which to others one should never grudge (vi, 18–20; xx, 32, 33). It is a disposition of the heart which prompts man to practice the virtues of faith, hope, and love of God (ii, 8, 9), of trust and submission, etc. (ii, 18–23, x, 27, 37; etc.); which also secures the fear of God in this life (xxiv, 14–20; xxxvi, 37, 38, etc.). It is a frame of mind which prevents the discharge of the ritual law, especially the offering of sacrifices, from becoming a heartless compliance with mere outward
ECCLESTON 269

Observances, and it causes man to place inward righteousness far above the offering of rich gifts to God (xxxv). As can readily be seen, the author of Ecclesiasticus inculcates in all this a teaching far superior to that of the Pharisees of a somewhat later date, and in no respect to that of the prophets and other proto-canonical writers before him. Highly commendable, too, are the numerous pithy sayings which the son of Sirach gives for the avoidance of sin, wherein the negative part of practical wisdom may be said to consist. His maxims against pride (iii, 30; vi, 21; xii, 24), covetousness (iv, 1; xi, 12-21), envy (xxx, 22-27; xxxvi, 22), impurity (ix, 1-13; xix, 1-3; etc.), anger (xviii, 1-4; x, 6), intemperance (xxxvii, 30-34), sloth (vii, 16; xii, 2), the sins of the tongue (iv, 30; vii, 13, 14; xi, 2, 3, i; 36-40; vi, 17, 16; xxviii, 15-27; etc.), evile company (xi, 31-36; xxxi, 14-18; etc.) display a close observation of human nature, stigmatize vice in a forcible manner, and at times point out the remedy against the social distemper. Indeed, it is probably no less a result of the success which Bén Sirà attained to in branding vice than of that which he obtained in directly inculcating virtue that his work was so willingly used in the early days of Christianity for public reading at church, and bears, down to the present day, the pre-eminent title of "Ecclesiasticus"

Together with these maxims, which nearly all bear on what may be called individual morality, the Book of Sirach contains valuable lessons relative to the various classes which make up human society. The natural basis of society is the family, and the son of Sirach supplies a number of pieces of advice especially appropriate to the domestic circle as it was then constituted. He would have the man who wishes to become the head of a family determined in the choice of a wife by her moral worth (xxxvi, 23-26; xi, 19-23). He repeated describes the precious advantages resulting from the possession of a good wife, and contrasts with them the misery entailed by the choice of an unworthy one (xxvi, 1-24; xxxvii, 17-30). The man, as the head of the family, he represents indeed as vested with more power than would be granted to him among us, but be does not neglect to point out his numerous responsibilities towards those under him: to his children, especially his daughter, whose welfare he might more particularly be tempted to neglect (vii, 25; xxiv), to his slaves, concerning whom he says: "Let a wise servant be dear to thee as thy own soul" (vii, 23; xxxii, 31), not meaning thereby, however, to encourage the servant’s idleness or other vices (xxxii, 25-30). The duties of children towards their parents are often and beautifully insisted upon (vi, 29, 30, etc.). The son of Sirach devotes a variety of sayings to the choice and the worth of a real friend (vi, 6-17; ix, 14, 15; xii, 8, 9), to the care with which such a one should be preserved (xxii, 25-32), and also to the worthless and dangers of the unfaithful friend (xxvii, 1-6; 17-24; xxxiii, 6). The author has no brief against those in power, but on the contrary considers it an expression of God’s will that some should be in exalted, and others in humble, stations in life (xxxiii, 7-13). He conceives of the various classes of society, of the poor and the rich, the learned and the ignorant, as placed inferior to that of the prophets and the holy men (xvii, 29). He would have a prince bear in mind that he is in God’s hand, and owes equal justice to all, rich and poor (v, 18; x, 1-13). He bids the rich give alms, and visit the poor and the afflicted (iv, 1-11; vi, 38, 39; xii, 1-7; etc.), for almsgiving is a means to obtain forgiveness (xxxvii, 6; xxxvi, 1-4). Charity of heart is in every way hurtful (xxxiv, 25-29). On the other hand, he directs the lower classes, as we might call them, to show themselves submissive to those in higher condition and to bear patiently with those who cannot be safely and directly resisted (vii, 1-15; ix, 18-21; xii, 1-8). Nor is the author of Ecclesiasticus anything like a misanthrope that would set himself up resolutely against the legitimate pleasures and the received customs of social life (xxxxi, 12-42; xxxii, 1 sqq.); while he directs severe but just rebukes against the parasite (xxix, 28-35; xi, 29-32).

Similarly, he has favourable words about the prophet (xxvi, 1-15), and about the dead (vii, 37; xxxviii, 16-24); and strong words of caution against the dangers which one inures in the pursuit of business (xxvi, 28; xxv, 1, 4; viii, 15, 16). Catholic authors are marked with an asterisk (*). Commentary: Calmar* (Venice, 1618); F. T. LeBars (Leipzig, 1890); Biswell* (New York, 1880); Lesesne* (Paris, 1850); Ecclesiasticus (London, 1888); J. F. Ralston* (Issy, 1899); Vlessing* (Tübingen, 1900-1901); Knabenbauer* (Paris, 1902).

Introductions to the Old Testament: Kautz* (Paris, 1882); Vigouroux* (Paris, 1886); Conso* (Paris, 1887); Lesesne* (Paris, 1890); König (Bohn, 1899); Cornhill (Freiburg, 1898); Strack* (Munich, 1888); Kaulen* (Freiburg, 1898); Gigot* (New York, 1906).

Eccleston, Samuel, fifth Archbishop of Baltimore, U. S. A., b. near Chestertown, Maryland, 27 June, 1801; and at Georgetown, D. C., 22 April, 1851. His father was Samuel Eccleston, an Episcopalian. After her husband’s death, Mrs. Eccleston married a Catholic gentleman named Seidell. She was brought under Catholic influences, and sent to St. Mary’s College, Baltimore, where she was converted. Entering St. Mary’s Seminary in 1819, he was ordained priest, 24 April, 1825. He went to Issey, France, for further theological studies, and, returning to Baltimore in July, 1827, was made vice-president, and two years later president, of St. Mary’s College. On 14 Sept., 1834, he was consecrated titular Bishop of Thermia, and coadjutor with the right of succession for Baltimore, and, upon the death of Archbishop Whitfield, 10 October, 1834, succeeded him as Archbishop of the metropolitan see. He became also administrator of Richmond, until Bishop Whelan’s appointment in 1841. During his term of office many new churches were erected. He contributed largely of his own means towards the building of the cathedral. To provide for German Catholics the Redemptorists were invited from Austria in 1841; the Brothers of the Christian Schools were introduced into the United States in 1846, establishing Calvert Hall School at Baltimore, and the same year the Brothers of St. Patrick took charge of a manual labour school (since discontinued) in that city. An important event was the ordination, 1 November, 1849, of St. Charles’s College, founded by the generosity of Charles Carroll of Carrollton. Five provincial councils, the third to the seventh inclusive, were held at Baltimore under Archbishop Eccleston. (See Baltimore, Archdiocese of.)

J. P. W. McNeal.

Eccleston, Thomas of, thirteenth-century Friar Minor and chronicler, dates of birth and death unknown. He styles himself simply "Brother Thomas", and Bale seems to have been the first given him the title of "Eccleston". He appears to have entered the order about 1232-3 and to have been a student at Oxford between 1230 and 1240. After the latter year he was stationed at the convent in London, but he does not appear to have ever held any office in the order. He is very probably famous for his work "De Adventu Fratrum Minorum in Anglia", which extends from the coming of the friars into England under Agnellus of Pisa, in 1224, up to about 1258, when the work was probably completed. Eccleston declares that he spent twenty-six years collecting material for his chronicle, most of the information it contains being derived from
personal knowledge or verbal communication, although he seems to have had access to certain written documents now lost. His "De Adventu" is a collection of notes rather than a finished work. He describes with extreme simplicity and vividness what has been called the heroic period of the Franciscan movement in England. In spite of the absence of dates and of any chronological sequence and of its tendency to extol the English province above all others, his chronicle is very valuable and is accurate and reliable in all that concerns the establishment and spread of the Friars Minor in England. Incidentally it throws some light on the trend of early Franciscan events and thought in general. Four MSS. of the "De Adventu", all of which go back to one lost archetype, are known to scholars. The chronicle has been often edited; in part by Brewer in the "Monumenta Franciscana" (Rolls Series, London, 1858); and by Howlett in the same series (1892); by the Friars Minor at Quaraecli (in Analecta Franciscana, I, 1885, 217-57); by Liebermann in the "Monumenta Germanica" (XXVIII, Hanover, 1885, 501-60). A critical edition of the complete text is much needed. There is an English translation of Echave's work by Father Cuthbert, O.S.P.C. (Friars and how they came to England" (London, 1905).

PASCAL ROBINSON.

Echard, Jacques, historian of the Dominicans, b. at Rouen, France, 22 Sept., 1644; d. at Paris, 15 March, 1724. As the son of a wealthy official of the king he received a thorough classical and secular education. He entered the Dominican Order at Paris and distinguished himself for his assiduity in study. When Jacques Quétif, who had planned and gathered nearly one-fourth of the material for a literary history of the Dominican Order, died in 1698, Echard was commissioned to complete the work. After much labour and extensive research in most European libraries this monumental history appeared in two quarto volumes under the title "Scriptores ordinis praedicatorum recensiti, nis his historici illustrati" etc. (Paris, 1721). Besides a sketch of Pignon and Salanc, and a list of each writer's works, with the dates and peculiarities of the various editions, Echard enumerates the unpublished, spurious, and doubtful works, with valuable indications as to their whereabouts. He displays throughout a keen, sane, and intelligent sense, which is highly praised by competent critics (Journal des Savants, LXIX, 574). A new and revised edition was prepared in 1908 by Rémi Coulon, O.P.

DAS PLEIE, Archiv für Literatur und Kirchengeschichte (1900), II, 165 seq.; MORTIER, "La Grande Encyclopædie," s. v. THOS. M. SCHWERTNER.

Echave, Baltasar de, painter, b. at Zumaia, Guipuzcoa, Spain, in the latter part of the sixteenth century; d. in Mexico about the middle of the seventeenth. As there was a painter of the same name, thought to be his son, he is known as Echave the Elder. He was one of the earliest Spanish artists to reach Mexico, arriving at about the same time as the end of the sixteenth century, as Sebastian Artiga and Alonso Vasquez. He was then a young man, and there is a tradition that his wife, also a painter, was his instructor. Echave, whose subjects religiously, had especial skill in composition, and his best works, which have much charm of colour and tenderness of treatment, are thought to recall those of Guercino for the galleries of the Order of San Carlos, in the City of Mexico, there are some of his best pictures, notably "The Adoration of the Magi", "Christ in the Garden", "The Martyrdom of San Antoniano", "The Holy Family", "The Visitation", "The Holy Sepulchre", "Saint Ann and the Virgin", "The Apparition of Christ and the Virgin to San Francisco", "The Martyrdom of San Ponziano", and "Saint Cecilia". In the church of San Jose el Real, generally known as the "Prospe" are several others, including "St. Isabel of Portugal", while he executed for the church of St. Thelma, above fifty altarpieces. In the cathedral is his "Candelaria" and a "San Sebastian", believed to be by his wife. Among the smaller paintings of Echave is one of San Antonio Abad with St. Paul, the first hermit. The artist also had a reputation as an author, among his works being one on the Biscayan language.

AUGUSTUS VAN CLEEF.

Echines, a titular see of Thessaly, Greece. Echines (IEXIVOS, also IEXIVOS) was situated on the northern shore of the Gulf of Lamia (Matalus Sinus). To-day it is a small village, Akhinos (AKXIV), of 500 inhabitants, in the valley of Phalara and the plain of Phthiotis. On the conical hill which rises above the village are the remains of the old walls. The city has been destroyed by earthquakes and rebuilt many times, particularly in 432 B.C. and in 423 A.D. Philip II of Macedon left it to the Malians, and Philip V took it from the Aetolians. It was fortified by Justinian. The see, mentioned in "Notitiae episcopatum" as late as the twelfth or thirteenth century, was a suffragan of Larissa. Three bishops are known: Theodore in 531; Peter in 451, and Aristotle in 560 (Lequevin, Orient Christians, II, 115).

LEAKE, Northern Greece (London, 1885), II, 80; PAULY-WISSOWA, Real-Encycl., s. v.

S. PrÉfiltrés.

Echternach, Abbey of (also Efternach, Lat. EPTERNACensis), a Benedictine monastery in the town of that name, in the Grand Duchy of Luxembourg and the Diocese of Trier. It was founded in 698 by St. Willibrord, an English monk of Ripon, who became the Apostle of Friesland and first Bishop of Utrecht. Although a bishop, he ruled the monastery as abbot until his death in 739. The abbey stood near the town on land given him for the purpose by St. Irmin, Abbess of Oeren and daughter of Dagobert II. It had many royal and other benefactors, including Pepin and Charlemagne, who conferred upon it great privileges. In 859 the monks were replaced by secular canons, as was so often the case with the early monasteries, but in 971 Emperor Otto I restored the Benedictine life there, bringing forty monks thither from the great Abbey of St. Maximin at Trier, one of whom, Ravenger by name, was made abbot. The monastery became very celebrated and was, during the Middle Ages, one of the most important in Northern Europe. It continued to flourish until the French Revolution, when it was suppressed, and the monks dispersed. The buildings put up by St. Willibrord were burnt down in 1017, and a new abbey was then erected. The church was Romanesque in style, but Gothic additions and alterations were made in the fourteenth and fifteenth centuries. In 1797 it was sold and became a pottery manufactory, but in 1861 it was reacquired by the townspeople, through whose generosity and devotion it was restored and made a parish church. The reconsecration took place with great solemnity in 1895, and since that date the work of restoration and decoration has continued steadily. It is popularly called "the cathedral", though not the seat of a bishop. The conventual buildings, originally erected in 1017-31, have been frequently rebuilt and added to, and they were entirely modernized in 1732. At the suppression they became State property and have for many years served as a National Academy and Gymnasium. It was noted for a number of precious MSS. of very early date which it contained; some of them are now in the Bibliothèque Nationale at Paris.

The Dancing Procession.—The Abbey of Echternach owes much of its fame, especially in modern times,
to the curious “dancing procession” which takes place annually on Whit Tuesday, in honour of St. Willibrord. The cult of the saint may be traced back almost to the date of his death, and the stream of pilgrims to his tomb in the abbey church has never ceased. The Emperor Lothair, Conrad, and many other nobles that would have been in Europe in the time of the saint may be numbered amongst them. The tomb stands before the high altar, and has been recently entirely renewed. On it is a recumbent effigy of the saint, and amongst other relics preserved there are a mitre, crozier, and chasuble said to have been used by him. The origin of the procession cannot be traced with certainty. Authentic documents of the fifteenth century speak of it as a regular and recognized custom at that time, but for earlier evidence there is only tradition to depend upon. The legend is that in 1417, when a pestilence raged amongst the cattle of the neighbourhood, the symptoms of which were a kind of trembling or nervous shaking followed by speedy death, the people thought that by imitating these symptoms, more or less, whilst imitating the intercession of St. Willibrord, the evil might be stayed. The desired result was obtained, and so the dancing procession of the saint’s tomb became an annual ceremony. Nowadays it is made an act of expiation and penance on behalf of afflicted relations and especially in order to avert epilepsy, St. Vitus’s dance, convulsions, and all nervous diseases. The function commences at nine o’clock in the morning at the bridge over the river, when a sermon is preached by the abbot of the monastery; after this the procession moves towards the basilica, through the chief streets of the town, a distance of about 14 kilometres. Three steps forward are taken, then two back, so that five steps are required in order to advance one pace. The result is that it is well after midday before the last of the dancers has reached the church. They go four or five abreast, holding each other by the hand or arm. Many bands accompany them, playing a traditional melody which has been handed down for centuries. A large number of priests and religious also accompany the procession and not infrequently there are several bishops as well. On arrival at the church, the dance is continued around the tomb of St. Willibrord, when litanies and prayers in his honour are recited, and the whole concludes with Benedictinism of the Blessed Sacrament. Though curious and even somewhat ludicrous, the people perform it in all seriousness and as a true act of devotion. It usually attracts to Echternach a great concourse of tourists as well as pilgrims, and as many as ten thousand people generally take part in it. The procession took place annually without intermission until 1777. Then, on account of some abuses that had crept in, the music and dancing were forbidden by the Archbishop of Trier, and in 1786 Joseph II abolished the procession altogether. Attempts were made to revive it ten years later but the French Revolution effectively prevented it. It was recommenced, however, in 1802 and has continued ever since. In 1826 the Government tried to change the day to a Sunday, but since 1830 it has always taken place on Whit Tuesday, as formerly.

G. CYPRIAN ALSTON.

Eck von Messebrunn, JULIUS, Prince-Bishop of Würzburg, b. 18 March, 1545, in the Castle of Messebrunn, Spessart (Bavaria); d. 13 Sept., 1617, at Würzburg. Descended from an ancient family in the service of the archbishops of Mainz, he received a good education in the schools of that city, also at Louvain, Douai, Paris, Angers, Pavia, and Rome; it was in Rome that he became a licentiate of canon and civil law. In 1567 he entered on his duties as canon of Würzburg, an office to which he was appointed in 1554; in 1570 he became dean of the cathedral chapter, and in 1573, at the age of twenty-eight, even before his ordination to the priesthood, he was appointed Prince-Abbot of the Augustinian monastery of Heiligenkreuz. After Mephisto had combined to bring the diocese into a sad state. Deeply in debt and poorly administered, it had an almost entirely Protestant population. The clergy, in point of virtue and learning, were for the most part unequal to their task, and the cathedral chapter was adverse to any ecclesiastical reform. During the first ten years of Eck’s government the attempt to unite the Abbey of Fulda and the Bishopric of Würzburg, after the deposition of the Prince-Abbot Balthasar von Dernbach, caused much confusion. This was due to the youthful ambition of Eck and not, as some wish to interpret it, a sign of any anti-Catholic sentiments on his part. From the outset he endeavoured to carry out a thorough ecclesiastical restoration. For this reason he encouraged, as far as possible, the Jesuits and promoted their beneficent ministry. In the same spirit he conceived the idea of founding an academy at Würzburg. In 1590 he laid the foundation of the University of Würzburg, and despite all difficulties it was solemnly opened (2 Jan., 1582) and became a model for all similar Counter-Reformation institutions. Under the Jesuits it flourished, grew rapidly, and furnished the see with the priests and officials needed to counterbalance the growing influence of the Jesuits in the state. The bishop was now able to take decisive steps against Protestantism. He banished all Lutheran preachers from his territory and removed all priests who were unwilling to observe the rules of their office. The public officials had to be Catholics, and none but Catholic teachers could be appointed. He began, moreover, courses of careful instruction for non-Catholics, and to some extent threatened them with penalties and even with banishment. Within three years about 100,000 returned to the Catholic Church. Public worship was also improved by the introduction of new devotions, processions, and the establishment of confraternities. Bishop Eck restored ruinous monasteries or devoted their revenues to the erection of new parishes and to the building of three hundred new churches. The tapering towers of these churches, called after the bishop “Julius towers”, still preserve his memory. His most beneficial and lasting endowment, after the university, is the Julius Hospital, which he founded with the endowment of the abandoned monastery of Heiligenethal. By skilful administration he improved the decadent economic conditions of his ecclesiastical states, reduced taxes, perfected the administration of justice, and established many primary schools. In a word, he proved himself one of the most capable rulers of his time. Not only in his own diocese did he display an extraordinary and varied activity, but as the founder and soul of the Catholic League, he exercised a decisive influence on the future of Germany.

Buchinger, Julius Eck von Messebrunn (Würzburg, 1833); Wegel in Allgemeine deutsche Biographie, XIV, 671-84; PATRICIUS SCHLAGER.

Eck (Eckius), JOHANN, theologian and principal adversary of Luther, b. 3 Nov., 1440, at Würzburg, in Saxonia; d. 10 Feb., 1543, at Ingolstadt. His family name was Maier, and his father, Michael Maier, was for many years magistrate in the town, the latinized name of which, Eckius or Eccius, was adopted after 1505 by Johann. His uncle, Martin Maier, pastor at Rothenburg, received him in his house (1495) and educated him. In 1498, when he was twelve years old, he was admitted to the Heidelberg University; thence he went in 1499 to Tübingen where he received the degree of Master of Arts in 1501; then to Cologne and in 1502 to Freiburg in the Breisgau. After his graduation in the faculty of arts
he began the study of philosophy and theology, took courses at the same time in jurisprudence, physics, mathematics, and geography, joined the Humanistic movement, and in addition to Latin, learned Hebrew and Greek. Among his instructors at the university was a distinguished scholar. His uncles withdrew his allowance and Eck was obliged to earn his livelihood as a tutor while continuing his studies. In 1505 he was appointed rector of the *Artistenburse zum Pfou*, i.e. principal of the hall for students in arts at Freiburg, and received the degree of Bachelor of Theology. He lectured on the "Sentences" in 1506, was promoted to the licentiate in 1509; and in 1510, when twenty-four years old, he received the degree of Doctor of Theology. He had been ordained to the priesthood in 1508 with a papal dispensation from the age requirement. Shortly after graduating as doctor, he was invited (1510) by the Dukes of Bavaria to the professorship of theology in Ingolstadt. He was appointed pro-chancellor of the university in 1512, and during his professorate of thirty-two years filled repeatedly the offices of dean, pro-rector, and rector; he also served as pastor and was appointed canon in Eichstätt. At Freiburg and during his earlier years at Ingolstadt, his literary activity was not only in theology but also in other departments of science, as is evidenced by his writings which have been preserved partly in print and partly in MS. He engaged in geographical research and published a series of philosophical works, some of which were to serve as textbooks in the faculties of arts at Ingolstadt. In these writings he attempts to combine in a rational synthesis the advantages of the older philosophy with those of the new. His principal theological work during this period, entitled "Chrysopassus", treats of predestination with special reference to the dogmas of grace and free will which became, in consequence of Luther's outbreak, the centre of sharp discussion. The tenor of this treatise, written when its author was only twenty-eight years old, evinces both confidence and modesty.

Luther's appearance, and especially the Disputation at Leipzig (1519), formed the turning-point in Eck's intellectual development and in his activity as a theologian. Thenceforth he is a prominent figure in the history of that period. With a clear insight into the meaning of Lutheranism, he was the first to champion the cause of Catholic teaching against Protestant errors. He became Luther's most skilful, unctiring, and thoroughly equipped theologian. The rest of his life was spent in conflict with the Reformers in Germany and Switzerland. He defended the Catholic Church, its doctrines and its institutions, in his writings, in public debates, in his speeches at the diets, and in his diplomatic missions. For the betterment of ecclesiastical life and the spread of genuine reform he laboured earnestly by preaching to the people and by insisting on the scientific education of the clergy. As a reply to Luther's "theses" he wrote his "Obelisc", originally intended solely for the use of Eichstätt. Both Luther and Karlstadt answered bitterly and then it was agreed to submit the points at issue to the test of a public debate, which was held in Leipzig, 27 June-15 July, 1519. Eck came off victorious, exposed Luther's heresy, and won over as a loyal adherent to the Catholic standard, George, Duke of Saxony. During the same year he published several essays attacking the tenets of Luther, and grew steadily in prominence as an authority on theological questions. In 1520 he visited Rome to report on the condition of affairs in Germany and to secure the condemnation of Luther's heresy. He appealed on the matter of the papal legates, Leo X. was appointed prothonotary Apostolic, and was charged as papal legate, along with the two other legates, Alexander and Caracciolo, to carry out in Germany the provisions of the Bull "Exsurge Domine", which excommunicated Luther and condemned his 41 theses. The execution of this mandate was beset with difficulties on every side. Eck, through his "Epistola ad Carolum V" (1521), admonished Emperor Charles to enforce the papal bann. In the same year he went other prelates at the bazaar. His uncles, for whom he acted as counsellor in ecclesiastical affairs, and made a third visit to Rome in 1523. Meanwhile (1522) he had induced the Bavarian dukes to publish an edict in defence of the Catholic Faith. While in Rome he procured for the dukes, among other papal privileges, the right of enacting, independently of the bishops, decrees for the moral reform of the clergy; and furthermore the right to appropriate, for use against heretics and Turks, a fifth part of all church revenues.

Eck in the meantime combated Lutheranism by his letters and essays. Between the years 1522 and 1526 he published eight voluminous treatises against Luther. Through his influence the University of Ingolstadt retained its strictly Catholic attitude and strenuously opposed the rising Protestant institutions. Eck had also a considerable share in organizing the "Catholic Federation". Founded 5 June, 1524, by the leaders in Church and State for the purpose of preserving the Catholic faith and enforcing the Edict of Worms. He also defended in numerous essays the traditional doctrines of the Church against Zwingli and his adherents, and participated in the religious discussion in Baden (1526). When the Protestants, at the Diet of Augsburg in 1530, promulgated the "Augsburg Confession", defining their religious views, Eck headed the Catholic champions upon whom the refutation of the articles in this confession devolved. Together with Wimpina and Coelius he represented the Catholic party at the conference (16 Aug.) between Catholic and Lutheran theologians relative to the "Confession" and its "Confutatio"; and as theologian he served on the sub-committee which canvassed the results of the conference. Zwingli also had presented at Augsburg a Confession of Faith and this Eck alone refuted. Eck then drew up 404 heretical theses upon which he challenged the Protestant theologians to public debate. The challenge was not accepted; the only answer from the Protestant party was a torrent of abuse. In the negotiations relative to the Council of Trent, Eck was consulted by the emperor, Charles V, as well as by the pope, Paul III, and was charged with the latter with preparing the latter's work. At the religious disputation in Worms (1540), Eck again appeared as the chief Catholic representative and debated with Melanchthon on the issues involved in the "Augsburg Confession". This discussion was continued during the Diet of Ratisbon (1541) to which, besides Eck, the emperor delegated as spokesmen on the Catholic side, Julius Pfug and Gropper. Eck maintained clearly and decisively the Catholic position, and quite disapproved the "Ratisbon Interim". He also went on a mission to England and the Netherlands in the interest of the Catholic cause.

In 1529 the bishops of Denmark invited Eck and Coelius to the discussion at Copenhagen; but neither appeared. Eck fully deserved the prominence gained by him during the struggle against Protestantism. He was the most distinguished theologian of the time in Germany, the most scholarly and courageous champion of the Catholic Faith. Frank and outspoken in his opinions, he was also inspired by a sincere love of truth; but he showed none the less an intense self-consciousness and the jovial bluntness of speech which characterized the men of that day. His adversaries, lampooning him publicly, taxed him with the papal legates and the papacy. The nature of the writings published against Eck and the readiness of the Protestants to calumny their victorious opponents, arouse strong suspicion as to the truth of these accusations and make them, so far as the evi-
dence goes, altogether improbable. In rebuttal it should be noted that Eck received the last sacraments with exemplary piety, and that his funeral in the Frauenkirche at Ingolstadt was marked by great solemnity.

As a writer Eck was prolific. His most important works are: "Loci communes adversus Lutherum et alios hostes ecclesiae" (Arguments against Luther and Other Enemies of the Church), printed first in 1525, 45th edition in 1576; essays on the Primacy of Peter, Penance, the Sacrifice of the Mass, Purgatory, etc. He also published many polemical writings against Luther, Zwingli, Bucer, and other leaders of the new religious movements. He compiled the results of the numerous disputations in which he participated and the sermons he preached on various subjects. In 1539 he published a German version of the Scriptures, translating the Old Testament from the original and adapting Erasmus' translation of the New Testament. Eck, however, was able as a theologian than as a stylist. He also published a collection of most of his writings prior to 1535 entitled "Opera Johannis Eckii contra Lulderum in 5 partes" (Ingolstadt, 1530-1535). In this edition parts I-11 are his polemical writings on the Primacy, Penance, etc. against Luther; parts III-IV, his reports of the debates and his polemics against Zwingli, Karlstadt, and Bucer; also the "Loci Commmunes", part V (4 vols.), his Latin sermons.

J. P. KIRCH.

Eckart, Anselm, missionary, b. at Bingen, Germany, 4 August, 1721; d. at the College of Polstok, Polish Russia, 29 June, 1809. Entering the Society of Jesus at nineteen, he was sent as a missionary to Brazil. Two years after his arrival in that country, he and his brethren were seized on felons and carried to Portugal, where they languished in prison till death released them or till the king, in whose name it was all done, was summoned by his own judge. Father Eckart was confined for eighteen years in the underground dungeons of Almeida and St. Julian. He was afterwards able of his own sufferings and those of his companions in prison. Upon the death of Joseph I of Portugal in 1777, Pombal fell into disgrace, and those of his victims who survived were released from their loathsome dungeons. The Society of Jesus, which had been suppressed four years earlier by the Brief of Clement XIV, had continued to exist in Russia. Father Eckart applied for readmission, and for thirty-two years following had the consolation of hearing the habit of the proscribed order. After filling the office of master of novices at Dünaburg, he was sent to the College of Polstok, where that venerable confessor of Jesus Christ, the last survivor, perhaps, of the cruelties of Pombal, preserved in extreme old age the same vigour of soul which had sustained him in the missions and in captivity. He died full of days and merits in the eighty-eighth year of his age and the same day after his admission to the Society.

EDWARD P. SPILLANE.

Eckhart (Eckert, Eckbert), Abbot of Schönau, b. in the early part of the twelfth century of a distinguished family along the Middle Rhine; d. 28 March, 1184, in the Abbey of Schönau. He was for a time canon in the collegiate church of Sts. Cassius and Florentius at Bonn. In 1155 he became a Benedictine at Schönau in the Diocese of Trier, and in 1166, after the death of the first abbot, Hildegard, he was elected at the head of the foundations. In the same year, he was enzeal, he preached and wrote much for the salvation of souls and the conversion of heretics. The Cathari, then numerous in the Rhineland, gave him especial concern. While a canon at Bonn he often had occasion to debate with heretics, and after his monastic profession, was invited by Archbishop Rainald of Cologne to debate publicly with the leaders of the sect in Cologne itself. His chief works are: "Sermones contra Catharos" with extracts on the Manicheans, from St. Augustine (P. L., CXCV); "De Laude Crucis" (ibid.); "Soliiloquium seu Meditations" (ibid.); "De Beatam Virginem Deiparam serva panezenuous" (ibid., CLXXXIV); "De sancta Elisabetha virginine", a biography of his sister, a Benedictine nun and a famous visionary and mystic (see Elizabeth of Schönau); a portion of which is in P. L., CXCV, also in Acta SS.' June, IV, 501 sqq. (ed. Palmé, 1897). A complete edition of his works is found in printed works.

SCHNEIDER in Kirchensen, E. v. Egbert: HUTNER, Namenliste (Innsbruck, 1889); IV; CHWALIB, Bibl. der (Paris, 1905), k. v.

FRANCIS J. SCHAEPFER.

Eckhart, Johann Georg von (called Ecard before he was ennobled), German historian, b. at Duningen in the principality of Kalenberg, 7 Sept., 1664; d. at Würzburg, 9 Feb., 1730. After a good preparatory training at Schulpforta he went to Leipzig University. A man of great culture, whose first teacher was Walther, he went at first, as the desire of his mother, to study theology, but soon turned his attention to philology and history. On completing his course he became secretary to Field-Marshal Count Fleming, the chief minister of the Elector of Saxony; after a short time, however, he went to Hanover to find a permanent position. Owing to his extensive learning he was soon useful to the famous historian Leibniz, who, in 1694, took Eckhart as assistant and was, until death, his large-hearted patron and generous friend. Through the efforts of Leibniz Eckhart was appointed professor of history at Halle in 1708, and in 1714 he was summoned to Halle. After the death of Leibniz he was made librarian and historiographer of the royal family of Hanover, and was soon after ennobled by Emperor Charles VI, to whom he had dedicated his work "Origines Austriace", for reasons which have never been clearly explained. When he gave up his position, in 1723, and fled from Hanover, perhaps on account of debt, to the Benedictine monastery of Corvey, and thence to the Jesuits at Cologne, where he became a Catholic. Not long after this the Prince-Bishop of Würzburg, Johann Philipp von Schönborn, appointed Eckhart his librarian and historiographer. In his work Eckhart was influenced by the new school of French historians, and gave careful attention to the so-called auxiliary sciences, above all to diplomacy; he also strove earnestly to follow a strictly scientific method in his treatment of historical materials. Together with Leibniz he considered as a founder of the critical school of historical writing. Besides the help he rendered Leibniz, of whom he prepared an affectionately respectful obituary (in Murr, "Jurnal für Kunstgeschichte", VII), he issued a number of independent works. His chief work, written as professor at Helmstedt, is his "De etymologico lingue germanicae hactenus impensis" (Hannover, 1711), a literary and historical study of all works bearing on the investigation of the Teutonic languages. At Hanover he compiled a "Corpus historiae medi aevi" (Leipzig, 1723), in two volumes; at Würzburg he published the "Commentarii de rebus
Francie Orientalis et episcopus Wireberghensis’ (17,29), also in two volumes, an excellent work whose rich materials are treated with scientific exactness.

**Patricius Schlagel.**

**Eckhart** (Eckard, Eccard), **Johann, Meister** (the Master), Dominican preacher, theologian, and mystic, b. about 1260 at Hochheim, near Gotha; d. in 1327 at Cologne. He made his philosophical and theological studies in the Dominican Order. Although a profound mystic he was also an able man of affairs, admirably manifesting the spirit of his order by uniting throughout his career great activity with contemplation. After a period of teaching he was made, in 1298, prior of the Dominican convent at Erfurt and vicar-provincial of Thuringia. Two years later he began to lecture at Paris, where in 1302 his order gave him the degree of Master of Sacred Theology. In the following year he was elected provincial of the Province of Saxony, to which office he was re-elected in 1307, when he was also appointed vicar-general of Bohemia and was also to reform its canons. His term of office having expired in 1311, he again took a professorial chair at Paris, whence he went in 1314 to teach at Strasbourg. After three years he was made prior at Frankfort. He finally returned to the schools in 1320, when he was made first professor of his order at Cologne, where he remained until his death. Eckhart’s activity was also displayed in the pulpit, of which he was an illustrious ornament, and by his writings in the form of treatises and sermons. As a preacher he disdained rhetorical flourish and avoided oratorical passion; but he effectively employed the simple art of man and gave remarkable effect to his hearty sympathy. Using pure language and a simple style, he left us in his sermons specimens of the beautiful German prose of which he was a master. In these sermons, really short catechetics, we find frequent citations from such writers as Seneca and Avicenna, as well as from the theologians and Fathers. His discourses are directed to the intellect rather than to the will and are remarkable for their depth of mystical teaching, which only those who were advanced in the spiritual life could fully appreciate. His favourite themes are the Divine essence, the relations between God and man, the promises and gifts of the human soul, and the acts of creation. These and kindred subjects he develops more at length in his treatises, which partake of the catechetical character of his sermons. In his sayings he presents them in short and pithy form. Although the writings of Eckhart do not present a connected and studied system, they reveal the mind of the philosopher, the theologian, and the mystic. The studies of Henry Denifle, O.P., while showing Eckhart to have been less of a philosopher than he was supposed to be, show also that he was a scholastic theologian of very superior merit, although not of the first order. He followed the teaching of Albert the Great and of St. Thomas Aquinas, but departed from their Scholastic method and form. Some opponents of Scholasticism, admiring his aphorisms and originality of method, have pronounced him to be the greatest thinker before Luther. And there have been Protestants who called him a Reformer. It was, however, as a mystic that Eckhart excelled. He is held by many to have been the greatest among the German mystics, and by all to have been the father of German mysticism. To Tauler and Suso he gave not only ideas but also a clear, simple style, possessed of a kindness like that of his own. Although he frequently quotes from the writings of the Pseudo-Areopagite and of John Scottus Eriugena, in his mysticism he follows more closely the teaching of Hugh of St. Victor.

The very nature of Eckhart’s subjects and the untechnicality of his language were calculated to cause him to be misunderstood, not only by the ordinary hearers of his sermons, but also by the Schoolmen who listened to him or read his treatises. And it must be added that some of the conclusions and treatises were Beghardic, quietistic, or pantheistic. But although he occasionally allowed harmful sentences to proceed from his lips or his pen, he not unfrequently gave an antidote in the same sermon and treatises. And the general tenor of his teaching shows that he was neither a Beghard, nor a quietist, nor a pantheist. While at Strasbourg, although he had no relations with the Beghards (q.v.), he was suspected of holding their mystical pantheism. Later, at Frankfort suspicion was cast upon his moral conduct, but it was evidently groundless; for, after an investigation ordered by the Dominican general, he was appointed to a prominent position at Cologne. Finally the charge was made at a general chapter of his order, held at Venice in 1325, that some of the German brethren were disseminating dangerous doctrine. Father Nichlaus, O.P. of Strasbourg, having been ordered by Pope John XXII in 1319 to make an investigation, declared in the following year that the works of Eckhart were orthodox. In January, 1327, Archbishop Heinrich of Cologne undertook an independent inquiry, whereupon Eckhart and Father Nichlaus appealed to Rome against his action and authority in this matter. But this next to the last work of the Dominican church in Cologne, Eckhart repudiated the unorthodox sense in which some of his utterances could be interpreted, retracted all possible errors, and submitted to the Holy See. His profession of faith, repudiation of error, and submission to the Holy See of his condemned propositions was declared by Pope John XXII in the Bull “Dolen tes refurmi” (27 March, 1329), by which the pontiff condemned seventeen of Eckhart’s propositions as heretical, and eleven as ill-sounding, rash, and suspected of heresy (Denninger, Echterhron, no. 428 sqq.; Hertzheim, Con. Germ., IV, 631).

The entire works of Eckhart have not been preserved. Pfeiffer in “Deutsche Mystiker des 14. Jahrhunderts” (1857). II, has given an incomplete edition of his sermons. Additions have been made by Siever in “Zeitschrift für deutsche Alterthümer,” XV, 373 sqq.; Wackernagel in “Altdutsche Predigten” (1876), 156 sqq.; and in “Altdutsche Predigten” (1875). Bech in “Germania,” VIII, 223 sqq., X, 391 sqq.; Jundt in “Histoire du Panthéisme” (1875), 231 sqq. is a translation in High German by Landauer, “Meister Eckharts mystische Schriften” (1903). Eckhart’s Latin works bore the title “Opus Tripartitionum.” In the first part (Opus propozitum) there are over one thousand theses, which are explained in the second part (Opus questionum), and proved in the third part (Opus expositionum). Of these only the three prologues are known. Denifle discovered also a portion of the third part, part of an explanation of Genesis, a commentary on Exodus, Sirach, xxiv, Wisdom, and other fragments.

**A. L. McMahon.**

**Eckhel**, Joseph Hillarius, German numismatist, b. 13 January, 1737, at Enzesfeld near Pottenstein, in Lower Austria, where his father, Johann Anton Eckhel, was steward to the Prince of Montecuccoli; d. 16 May, 1798. In 1745 he was sent to study in Vienna,
in 1751 was admitted into the Society of Jesus, and thirteen years later was ordained priest. He had studied humanities in Leoben and philosophy in Graz, besides mathematics, Greek, and Hebrew. The first fruit of his literary labours, produced in his twenty-first year, was an "Exercitium grammaticale in prophetiam Obadiea". He published as an appendix to the "Institutiones linguae sacrae" of P. J. Engstler. After his ordination, and probably for some time before, he was professor at the Jesuit gymnasium at Leoben and Steyer; probably also at Judenburg, and finally at the college of Vienna, where he taught poetry and rhetoric, and acquired a mastery of this and of which he handled with ease and elegance. We still possess two rather comprehensive odes from his pen, "Plausus Urbs" and "Plausus Ruris". He left, besides, two German poems written for special occasions, in the style of that period, and a speech of the same nature delivered on the occasion of the journey of Emperor Joseph II to Italy.

How he became a numismatist, Eckhel himself has told us in the preface to his "Numi veteres anecdoti". Whilst teaching at the Academia Cesiensis in Rome, he became interested in its cabinet of coins, which was under the supervision of his fellow-Jesuit, P. Kehl. The collection, which had been formed by the learned Erasmus Frohlich, who had edited many of the ancient coins; Eckhel set to work selecting the coins which were as yet unknown and unedited, and added thereto the unedited coins of the choice collections of Count Michael Vinczay and Paul Festetics. Forced by ill-health to abandon teaching, he devoted himself entirely to numismatics and archeology. With the permission of his superior he went to Italy in 1772 for his further education. In Bologna and Rome he studied all the accessible coin collections, but found his richest treasures in Florence. Rainaldo Cocchi, prefect of the Archdiocesan Museum, received him most cordially and obtained for Eckhel the commission to arrange the coins which had been collected by Cardinal Leopoldo de' Medici, and which had afterwards been very considerably increased. Cocchi, who died shortly after this, recommended Eckhel to the Archduke Peter Leopold, who in turn introduced him to his mother, the Empress Maria Theresa. Meanwhile (1773) the Society of Jesus was suppressed, and Eckhel, like his brethren, was secularized. Returning to Vienna through the South of France in January, 1774, he was delighted to be entrusted by the empress with the task of transferring the collection which belonged to the university college of the Jesuits, to the court cabinet, where, however, it received a separate place. In March of the same year, having acquired an excellent reputation as a numismatist, he was named director of the cabinet of ancient coins, with Duval as his superior. After the latter's death (1775) he was appointed his successor, and at the same time curator of the imperial coin cabinet. Eckhel was commissioned to deliver bi-weekly lectures on numismatics in the coin cabinet. In the fall of 1775 he was promoted to the chair of antiquities and of the historical auxiliary sciences in the university. In the same year his first numismatic publication appeared. J. von Bergmann writes of Eckhel's official work: "Eckhel, as is everywhere evident, was an expert administrator of the treasure committed to his charge. Without much ado, without ostentation, he wrote only what was needful and regarded merely that which was essential. Besides his very simple accounts and some reports written during the twenty-four years of his incumbency, only a very few documents concerning the collection of antique coins are in existence. He enriched the cabinet without advertising it." He obtained the means for these acquisitions from the proceeds of the sale of duplicates in his cabinet, and examples resulted from the amalgamation of the collection of Francis I with that of the imperial family. Moreover, the series of the Persian and Parthian kings were transferred from the Oriental to the ancient department. The collection of Duke Charles of Lorraine, that of the Count of Arundel, and a selection of coins from the collections of suppressed monasteries were added. By means of embassies and lucky finds the coin cabinet acquired important additions (e.g. those of Ostropataka and Sleighy-Somlyo). As a professor in the university Eckhel lectured on ancient numismatics. His delivery is described as being simple, clear, instructive, inspiring, and often abounding in humour. He was highly respected by his pupils. That he also enjoyed high repute among his colleagues is attested by his appointment as dean of the philosophical faculty the same year.

The first numismatic work published by Eckhel was "Numi veteres anecdoti ex museis Caesarii Vindobonensis, Florentini Magni Duci Ettruriae, Granelliani nunc Caesaroe, Vitizianoe, Festitectianoe, Savorgnani Veneto allisqu" (Vienna, 1775, in two 4to sections "Catalogus antiquitatum veterum II, 17 copper-plate engravings") (Vienna, in two large folio parts with numerous illustrations) followed four years later. Eckhel had given the collection entrusted to him an entirely new arrangement, discarding the time-honoured alphabetical order, and substituting quite a new system. He divided ancient numismatics into large departments: the first contained the coins minted by cities other than Rome, arranged according to the geographical situation of the countries as far as this was possible; the second comprised all the coins of the Roman Empire. First come the important but crude issues, then the less important and less instructive pieces with the inscription "Roma". They are followed by those of the various families, emperors, and empresses, all arranged as far as possible in chronological order. Those whose date could not be exactly obtained are placed after each emperor as unclassified in alphabetical succession. "By this method", says Eckhel, "the author was enabled to rectify countless errors which Mezzabarba had forced upon us in his General Catalogue" (Imperator Romanorum numismata, Milan, 1683). And to make these corrections principally led him to prepare this catalogue for print. In it he gives an account, not on outside authority, but from personal observation and after lengthy and painstaking research, of everything instructive which so numerous a collection presents. The work was written in Latin and, "contrary to the present ornamental style, in the simplest language". This catalogue was followed by "Syloge II, numerorum veterum anecdotorum Thesauri Caesaris" and "Descrcriptio numerorum Antiochiae" (1786), then by the classical work "Doctrina numerorum veterum", in eight volumes (1792-1798). Friedrich Kenner says of this: "Misguided dilettantism had produced most mischievous results in the field of numismatics. Eckhel, through his system, wanted of critical judgment, and the disorderly arrangement of the literature had begotten confusion and distrust, which prevented numismatists from taking the place among other sciences to which it was so naturally entitled. With his natural critical faculty Eckhel mastered all the literature of his subject, eliminated errors and forgeries with the help of his profound learning, and then combined the results into an organic whole in his 'Doctrina numerorum veterum'". Eckhel has become the founder of the scientific numismatics of classical antiquity and taken his place alongside of his contemporaries, Heyn, and Winckelmann.
maties, hitherto despised, he changed into a kind of encyclopedia of classical antiquities, which includes extensive and much-used sources for other branches of archaeology." The addenda to this work which Eckhel entered in his manuscript copy were edited by his successor, M. B. M. S. B. M. S.

By command of Emperor Joseph II, Eckhel wrote an excellent manual, "Kurzgefasste Anfangsgründe zur alten Numismatik" (Vienna, 1757; 2nd ed., 1807). The work appeared in a Latin translation in 1799 and in a French revision in 1825. He edited, besides, "Choix des pièces gravées du Cabinet Impérial". Furthermore, a number of smaller treatises still exist in manuscript form. His "Inscriptions veteres" was used by Theodore Mommsen. He also left an extensive correspondence with the most prominent representatives of his branch of learning (Abbe Barthélemy, R. Cosczynski, L. Lanz, G. Marini, F. Séguier, and others).

Eckhel died shortly after the completion of his "Doctrina". He was, as Bergmann writes, "a man of firm and decided character, serious, but at the same time cheerful, indulging in sarcasm, and at times more than a little literary arrogance". He used his extensive learning to correct thousands of blunders committed by other writers, and was modest and not at all disputatious in his controversies. He spoke as he thought and acted as he spoke." Later scholars rank Eckhel's scientific importance equally high; in the first century of his birth a mere trick (by Manfredini) with the inscription, systematics, relig. nume. antiq. condi. to distich which Michael Denis dedicated to his dead friend will vindicate its own truth:—

Eckhelium brevis hora tulit, sed diva Moneta
Scripta viri sevee vivere seca jubet.

KARL DOMANIG.

ECLECTICISM (Gr. ἐκλέχεσθαι; Lat. eligere, to select), a philosophical term meaning either a tendency of mind in a thinker to conciliate the different views or positions taken in regard to problems, or a system in philosophy which seeks the solution of its fundamental problems by selecting and uniting what is deemed true in the various philosophical schools. In the first sense, eclecticism is a characteristic of all the great philosophers, with special development in some, such as Leibniz; an element of the integral method of philosophy more or less emphasized in the divers schools. The term eclectics, however, is properly applied to those who accept Eclecticism as the true and fundamental system of philosophy. It is with Eclecticism in this strict sense that we are dealing here.

As a rule, in the history of philosophy, Eclecticism follows a period of scepticism. In presence of conflicting doctrines regarding nature, life, and God, the human mind desires of a system of science and knowledge about these important subjects. Eclecticism then aims at constructing a system broad and vague enough to include, or not to exclude, the principles of the divers schools, though giving at times more importance to those of one school, and apparently sufficient to furnish a basis for the conduct of life in the later period of Greek philosophy, during the two centuries preceding the Christian Era and the three centuries following. Eclecticism is represented among the Epicureans by Aeschyleades of Bithynia; among the Stoics by Boethus, Panetius of Rhodes, (about 180-110 B.C.), Posidonius (about 50 B.C.), and later on by the neo-Cynics, Demetrius Phellinus (about A. D. 150); in the New Academy by Philo of Larissa (about 80 B.C.) and Antiochus of Ascalon (d. 68 B.C.); in the Peripatetic School by Andronicus of Rhodes (about 70 B.C.), the editor and commentator of the works of Aristotle, and later on by Aristocles (about A. D. 180), Alexander of Aphrodisias (about A. D. 200), the physician Galen (A. D. 131-201), Porphyry in the third, and Simplicius in the sixth century of our era. The eclectic school, by its character, the one which was best suited to theEstado of the Romans. With the exception of Lucretius's doctrine, their speculative philosophy was always and altogether eclectic, while Stoicism dominated in their ethical philosophy. Cicero is, in Rome, the best representative of the school. His philosophy is a mixture of the scepticism of the Middle Ages, Stoicism and Peripateticism. The School of the Septuagint, with Quintus Sextius (80 B.C.), Sotion, and Celsus, was partly Stoic and Cynic, partly Pythagorean. Under the empire, Seneca, Epicurus the slave, and the Emperor Marcus Aurelius combined the principles of Stoicism with some doctrines taken from Platonism. The neo-Platonic School of Alexandria, in the second and third centuries after Christ, is considered by some as eclectic; but the designation is not exact. The school borrows, indeed, many of its principles from Pythagoreanism, Stoicism, Peripateticism, and even especially from Platonism; but all are dominated by and interpreted according to certain principles of religious mysticism which make this neo-Platonicism a genuine form of monotheistic system. The same may be said of the Christian writers of this school who take some of their philosophical principles from the dominant systems, but who are guided in their choice as well as in their interpretation by the teaching of Christian revelation.

In modern times Eclecticism has been accepted in Germany by Wolff and his disciples. It has received its most characteristic form in France in the nineteenth century from Victor Cousin (1792-1867) and his school, which is sometimes called the Spiritualistic School. Drawn away from sensationalism by the teaching of Royer Collard, Cousin seeks in the Scottish School a sufficient foundation for the chief metaphysical, moral, and religious truths. Failing in this attempt, he takes up the different doctrines then current; he is successively influenced by Maine de Biran whom he calls "the greatest metaphysician of our time", by the writings of Kant, and by personal intercourse with Schelling and Hegel; finally, he turns to the works of Plato, Plotinus, and Proclus, only to come back to Descartes and Leibniz. He then reaches the conclusion that the successive systems elaborated throughout the foregoing ages contain the full development of human thought; that the actual truth is to be found in a system resulting from the happy fusion, under the guidance of common sense, of the fragmentary thoughts expressed by the different thinkers and schools of all ages. Four great systems, he says, express and summarize the whole development of human speculation: sensism, idealism, scepticism, and mysticism. Each contains a part of the truth; none possesses exclusively the whole truth. Human thought cannot represent any new system of philosophy without neglecting any of the old ones. Not the destruction of all the foregoing, but the reduction of all to one, will put us in possession of the truth.

There is, indeed, something true in Eclecticism. It would be folly for each thinker to deliberately ignore all that has been said and taught before him; and each must find a method within the principle of the period of his own life. The experience and knowledge acquired by past ages is a factor in the development of human thought. The history of philosophy is useful; it places at our disposal the truths already discovered, and by showing us the errors into which philosophy has fallen, it guides us against the same, and against the methods which have caused them. This is the element of value contained in the system. But Eclecticism errs when it substitutes for personal reflection
as the primary source of philosophy a mere fusion of systems, or the history of philosophy for philosophy proper. Eclecticism does not furnish us with the ultimate principles of philosophy or the criterion of certitude. We cannot say that philosophy has reached the highest degree of precision either in its science or in presentation of every problem; nor that it knows all that can be known about nature, man, or God. But even if this were the case, the principles of Eclecticism cannot provide us with a firm, complete, and true system of philosophy. Cousin says that there is some truth in every system; supposing this to be exact, this partial truth has to be derived at first through principles and a rule of certitude which are independent of Eclecticism. When Cousin declares that there is a mingling of truth and error in every system, he evidently assumes a principle superior and antecedent to the very principle of Eclecticism. The eclectic must first separate error from truth, before building into a system the results of his discrimination. But this is possible only on the condition of passing a judgment upon each of these systems and therefore of having, quite apart from history, some rational principle as an ultimate criterion. In a word, Eclecticism is considered as a study of the opinions and theories of others in order to find in them some help and enlightenment, has its place in philosophy; it is a part of philosophical method; but as a doctrine it is altogether inadequate.

G. M. SAUVAGE.

Ecstasy.—Supernatural ecstasy may be defined as a state which, while it lasts, includes two elements: the one, interior and indivisible, when the mind rivets its attention on a religious subject; the other, corporal and visible, when the activity of the senses is suspended, so that not only are external sensations incapable of influencing the soul, but considerable difficulty is experienced in awakening such sensations, and this whether the ecstatic himself desires to do so, or others attempt to quicken the organs into action. That quite a large number of the saints have been granted these gifts is attested by the Sanctoralists; but in these days even free-thinkers are slow to deny historical facts that rest on so solid a basis. They no longer endeavour, as did their predecessors of the eighteenth century, to explain them away as grounded on fraud; several, indeed, abandoning the eclectic theory, current in the nineteenth century, have advocated the psychological explanation, though they exaggerate its force.

False Views on the Question of Ecstasy.— The first three errors here mentioned are psychological in nature; they fail to estimate at its proper value the content of ecstasy; the other false theories spoken of identify this state with certain morbid physical or psychological conditions.

(1) Certain infidel philosophers maintain that during an ecstasy there is a lessening of intellectual power, that at a certain stage there is an annihilation of the faculties. This is the theory of Muries and de Leuba. The arguments for this view are based upon an exaggerated interpretation of certain phrases used by the mystics. Their accounts, however, (those, for instance, of Blessed Angela of Foligno), give the lie to such an explanation, for the mystics state clearly that they experience, not only the fulness, but the superabundance of intelligence, an increase of activity of the highest faculties. Now, in a science that is based on observation, as is mysticism, we are not justified in brushing aside the numerous and consistent testimonies of those who have tested the facts, and putting in their place the creations of the imagination.

(2) The theory of unconsciousness distorts the facts so unscrupulously that some writers have preferred a theory less crude, i. e. the emotional explanation. The ecstatic, it is admitted, is not merely passive, rather, he experiences violent emotions, in consequence of which he loses the use of the senses; and as there is nothing new to occupy his attention, it follows that his mind is taken up by some trifling thought, so trifling, indeed, that these writers deem it unworthy of their attention. This theory classifies with historical data than does the first, since it does not wholly eliminate the activity of the ecstatic; but it denies half the facts emphatically urged by the mystical writers.

(3) It has been said that ecstasy is perhaps a phenomenon wholly natural, such as might well be occasioned by a strong concentration of the mind on a religious subject. But if we are not to rest satisfied with arbitrary conjectures, we must show that similar facts have been observed in spheres of thought other than purely religious. The ancients attributed natural ecasies to three or four sages, such as Archimedes and Socrates, but, as the present writer has proved elsewhere, these stories are founded either on inconclusive arguments or upon false interpretation of the facts (Des grâces d'oraison, c. xxxi).

(4) The rigid condition of the ecstatic's body has given rise to a fourth error. Ecstasy, we are told, is another form of lethargy or catalepsy. But, the loss of consciousness, however, that accompanies these latter states points to a marked difference.

(5) In view of this, some have sought to identify ecstasy with the hypnotic state. Physically, there are usually some points of contrast. Ecstasy is always accompanied by noble attitudes of the body; whereas in hospitals one often marks motions of the body that are convulsive or repelling; barring, of course, any counter-command of the hypnotist. The chief difference, though, is to be found in the soul. The intellectual faculties, in the case of the saints, became keener. The sick in our hospitals, on the contrary, experience during their trances a lessening of their intelligences, while the gain is only a slight representation in the imagination. A single idea, let it be ever so trivial, e.g. that of a flower, or a bird, is strong enough to fasten upon it their profound and undivided attention, by the mere fact of being an abstraction from the field of consciousness; and this precisely the starting-point of all theories that have advanced to explain hypnotic ecstasy. Moreover, the hallucination noticed in the case of these patients consists always of representations of the imagination; they are visual, aural, or tactile; consequently they differ widely from the purely intellectual perceptions which the saints usually enjoy. It is no longer possible, then, to start with the extremely simple hypothesis that the two kinds of phenomena are one and the same.

A comparison of the effects that follow these states will bring out more clearly the essential difference between the two. (a) The neuropath, after an hypnotic trance, is dull, lifeless, and depressed. (b) His will is extremely weak. In this abnormally weak is to be sought the reason why the subject can no longer resist suggestion. These are not cured by the greatest effort of will, lifeless, and helpless, pass their days in idle dreams. (c) The level of their morality is frequently as low as that of their intelligence. From a threefold point of view, then, there is a contrast between their case and that of the saints who have been granted ecasies. (a) The neuropath projects lofty and difficult in the execution; in proof of this assertion we might appeal to the history of the founders of religious orders. (b) Their will-power is second to none in energy; so strong, indeed, as to enable them to break through all opposition, especially that which arises from their own na-
ture. (c) Lastly, the saints keep before them a moral ideal of a lofty character, the need of self-forgetfulness if they would give themselves to the glory of God and the temporal and spiritual welfare of their fellow-men. The hysterical subject of hypnotism, on the contrary, comes near to none of this nobility of life.

(6) An attempt has been made to rank ecstasies with somnambulism, with which have also been classed, but with greater reason, the trances of spirit mediums. The case which most approaches, on the surface, the ecstasies of the saints is that of Helen Smith, of Geneva, whom Professor Fournier studied carefully during the closure of the nineteenth century. Damascus, in the crisis of spontaneous somnambulism she described her visions in word or in writing. At one time she saw the inhabitants of the planet Mars, at another she dwelt among the Arabs or the Hindus of the fourteenth century. In 1864 she had crises lasting a quarter of an hour, during which she painted in oil pictures of Christ and the Madonna, though she was quite unconscious of what she was doing. The ecstasies of the saints were, it was thought, of exactly the same nature. There are, however, some striking differences: (a) From the moral viewpoint the visions of the saints partake of a remarkable change in manner of life, and lead them to the exercise of the most difficult virtues. Helen experiences nothing of the kind. She is a good woman, that is all. (b) Unlike the saints, she remembers nothing of what she has seen. (c) While the vision lasts, the faculties at play are not the same. In the case of the saints, the activity of the imagination is arrested during the culminating periods, and throughout always holds a subsidiary place, while the intellect undergoes a marvellous expansion. In the case of Helen, the imagination alone was at work, and its objects were of the most commonplace character. Not a single elevated thought, simple of visions of houses, animals, or plants—notthing but a mere copy of what we see on earth. Such descriptions serve only as stories to amuse children.

(7) A seventh theory would identify ecstasies with the wild reveries and disordered fancies occasioned by the use of alcohol, ether, chloroform, opium, morphine, or nitrous oxide. In the first place, the physical condition is quite different. No one, for instance, would mistake the exalted attitude of an ecstasis for that of a man under the influence of narcotics. Secondly, the mental perceptions are not the same in character. For if in the Saints the drugs we have described have not lose all consciousness, if he still retains any ideas, they consist of extravagant, incoherent images, whereas the ideas and thoughts of the mystic are throughout coherent and elevated. Finally, the victims of alcohol and of opium, on recovering from their debauch, remain in a state of sottishness. Thought and action are simultaneously lessened; the moral and the social life have equally suffered. The use of narcotics has never enabled a man to lead a purer life or to better himself and others; experience points to the contrary.

The above, then, are false views that have been entertained in the question of ecstasies. Nor should it be a matter of surprise that free-thinkers should have ventured on these explanations. It is but the conclusion that follows logically from the principles with which they start, i.e., there is no such thing as the supernatural. They must, then, at any cost, seek the causes in natural phenomena. (See Contemplation.)

Ecuador, Republic of (La República del Ecuador), an independent state of South America, bounded on the north by Colombia, on the east by Brazil, on the south by Peru, and on the west by the Pacific Ocean. The north-western corner of the State is called the Equator, hence its name. No part of America has been so much looked upon for scientific explorations, specially geographic and physiographic, as the first half of the nineteenth century. One, sent out in 1715 by the French Government for the purpose of measuring the meridian near the Equator, returns the remarkable results, that the 20 degrees north and south of the Equator, the Coasts of Ecuador (1799–1804) forever associates Alexander von Humboldt with the history of the New World.

Area, Physical Features, etc.—Ecuador is the smallest of the three Republics of the South American republics. It forms, approximately, an isosceles triangle wedged between Colombia and Peru. Indenting the southwest coast is the Gulf of Guayaquil within which lies the large Island of Puná. As in the case of other South American republics, the boundaries of Ecuador are ill-defined and subject to modification by treaty. Its area is variously given as from 80,500 to 152,000 sq. miles. It is cut through by volcanic ranges, divided the Caroni River, lying about 90°–92° west long., 10 degrees off the coast, and covering from 2400 to 3000 sq. miles. These islands are at least in number, only one of which (Isabella or Albemarle) is inhabited by some two hundred people. The eastern half of Ecuador forms long, wooded, and traversed by many rivers emptying into the Maranon or Upper Amazon; the western is very mountainous, the high Andes chain dividing the two sections. This mountain range runs nearly due south from the southern boundary of Colombia to the Peruvian frontier. It has a number of high peaks, all the volcanic origin of which is between Chimborazo (20,500 ft.), and many volcanoes. Of the latter, Cotopaxi (19,615 ft.), Tunaygaru (16,690 ft.), and Sungai (17,464 ft.) are still active; Antisana (19,335 ft.), Pichincha (15,918 ft.), etc. have been extinct for a century or more; while Altar, Cotocachi, etc. show traces only of activity in ages past long. The Ecuadorian table-land and higher mountain valleys are temperate, though the temperature is low in the greater altitudes. The year is divided into the dry and the wet season. Under the Equator, however, there is very little difference between the seasons. All the coast valleys and plains are affected by the climate generally unhealthy. Ecuador has but one navigable river, the Guayas, which empties into the Gulf of Guayaquil. The other streams of Western Ecuador are of little importance.

The flora is luxuriant except in high altitudes. Both lower slopes of the Andes are densely wooded. On the coast there is an arid zone of limited extent; the larger portion, however, is very fertile as far as the Peruvian boundary at Tumbez. The inland forests in the South are rich in cinchona bark, and extend nearly to a height of nearly 10,000 feet. Then follows a sub-Andean zone for the next 3200 feet, where cereals thrive in an average temperature of from 55° to 59° F. This is followed by what are called the páramos, cold and stormy wastes, treeless, and exposed to daily snows, which attain an altitude of 15,000 feet above sea-level, and where the tough puna-grass flourishes. On the eastern slope of the Andes dense forests are found again and the cinnamon tree. Animal life is tropical and is found in proportion to the vegetation. As far as known Ecuador is fairly rich in minerals. It is the only South American state, with the exception of Colombia, where emeralds have been found in any quantity (at Montes Azules and Esmeraldas); their location, however, is uncertain.

The population is estimated at 1,272,000, of whom about 400,000 are supposed to be Indians. Exact statistics, however, do not exist. Of the 400,000, one-
half is allowed to the wild forest-tribes of the Eastern section and the other half to the remnants of the diverse sedentary tribes which formerly occupied the table-land and coast. The whole country is divided into fifteen provinces besides the Eastern territory and the islands.

History.—Of the pre-Columbian conditions and languages of the Indians of Ecuador little is known. The coast tribes have almost disappeared and those of the higher regions have adopted Spanish customs. That they differed from the Peruvian Quichua seems likely. The Sea-Quichua were the Caingang and the Purus or Puruaya; a tribe known as the Ngaric is mentioned in the neighbourhood of Quito. They were all sedentary; knew how to work gold, silver, copper, and possibly bronze; and practised the fetichism common to primitive Americans. The coast tribes built their houses of wood and cane, while those of the interior used stone. Some were skilful navigators, some of their vessels being estimated at thirty tons, and propelled by oars and cotton sails.

The Spaniards, led by Francisco Pizarro, first saw the coast of Ecuador in 1533. From Tacna or Atacama they touched Paruro, dispatched a pilot, to the south. In the account of Pizarro we have the earliest description of the Ecuadorian coast people. He sailed south beyond the present limits of Peru, verifying his pilot's report, and in 1528 returned to Spain to prepare for the conquest of Peru. He arrived in the great days of 1531, landing on the south along the shore, established himself, despite the hostility of the natives, on the Island of Pumá. The permanent Spanish occupation of Ecuador, however, began in 1534, from Pura in Peru under Sebastian de Belalcazar. He had a tedious campaign to Quito, in which the Indians resisted by the Cofanes. In 1535 three towns were established: San Francisco de Quito (15 Aug.) at Riohamba, thirteen days later transferred to its present site, Chimbo; and Guayaquil, also originally founded at a place distinct from the one it now occupies. Meanwhile Pedro de Alvarado had headed on the coast with a considerable force from Guatemala. Reaching the central plateau he was confronted by Belalcazar and Diego de Almagro the elder. An amicable agreement was reached, and Gonzalo Pizarro pushed into the cinnamon country, but made little headway. He had to turn back. His lieutenant, Alvarado, however, floated down the Amazon and landed on the Isle of Trinidad, whence he carried to Spain the first information about south-eastern Ecuador.

The second epoch of civil wars in Peru, the uprising of Gonzalo Pizarro against the viceroy Nuñez de la Fara on an end with the defences of the viceroy near Quito, 16 Jan., 1546. Quito became the head-quarters of the Crown's representative, and with this as a basis the independence movement was put down. During the colonial period the Church founded institutions of learning such as the University of Quito and established a printing press at the same place in 1760. Political disturbances were few, but during the sixteenth, seventeenth, and eighteenth centuries volcanic and seismic phenomena were frequent and often disastrous. An attempt was made in 1680 to overthrow Spanish power, and Ecuador, Colombia, and Venezuela, together with the rest of Spanish South America, then engaged in efforts towards independence. In 1820 Guayaquil succeeded in throwing off Spanish control, and the battle of Pichincha (22 May, 1822) finally put an end to the domination of the mother country. Panama and Ecuador, with Colombia and Venezuela, next formed an independent confederacy until 1830, when the union was dissolved and the first Ecuadorian congress met. Since then Ecuador has been torn by internal dissensions and foreign complications, chiefly with Colombia. The opposing political parties are the Conservatives, or Clericals, and the Liberals. Since 1898 the latter have been in power and have to a great extent adopted a policy of secularization in church matters. From 1833 to 1908 Ecuador has had nineteen presidents.

Government, Education, etc.—Ecuador is a constitutional republic. From 1830 to 1883 it had not less than ten constitutions, and that was the last. The executive head is the president, elected with the vice-president directly by the people for a term of four years. The senators (30) and the deputies (41) are also elected by direct vote, the former for four, the latter for two years. Congress meets biennially at Quito, the capital, on 10 August, and is in session for sixty days. The principal cities are: Quito (50,000), Guayaquil (151,000), Cuenca (30,000), Riobamba (18,000), and five of 10,000 or more inhabitants. Guayaquil is the chief seaport. In 1904 Ecuador had 108 miles of railroad and 2545 miles of telegraph, both of which have since been added to. The monetary unit is the sucre, about equal to the peso of other Spanish-American countries, but subject to fluctuation in value. The chief exports are cacao, vegetable ivory, indigo, rubber, and straw hats.

Educational statistics are scanty. There is a university at Quito with two professors and two hundred and sixteen students (1905). Institutions for higher education are found at Guayaquil and Cuenca. The number of secondary schools is 35; primary schools 1688 with 7498 teachers and 63,880 pupils; and 9 high schools and colleges.

Religion.—Soon after the discovery of the country missionaries began their labours in Ecuador, and in 1545 the Bishopric of Quito was erected. Work among the different Indian tribes on the tributaries of the Amazon was difficult, and the Dominican missions were destroyed in 1599 by the savage Jivaros. Later, however, the Dominicans re-established themselves and were assisted by the Jesuits who had been in Quito since 1596. By the close of the seventeenth century Ecuador was well evangelized, but after the expulsion of the Jesuits in 1767, who on the Napo alone had thirty-three missions with 100,000 inhabitants, the Dominicans were unable to keep up the work and the natives fell back into paganism. The revolution destroyed all traces of two hundred years of untiring labours. Since 1848 Ecuador has formed an ecclesiastical province. The population is Catholic except for a small number of foreigners and a few pagan Indians in the East.

Up to 1861 the government was in the hands of the Liberal and largely anti-Catholic party. When Garcia Moreno (q. v.) was elected president (1861—65 and 1869—75), however, he reorganized civil and religious affairs and secured a concordat (20 Nov., 1863) which was concluded with Rome, new dioceses were erected, schools and missions given to the Jesuits, who had been recalled) and others, and in 1874, at the time of the spoliation of the Holy See, ten per cent of the State's income was guaranteed to the pope. Moreno was murdered 6 Aug., 1875, and his death not only put an end to the concordat, but under the new regime which succeeded him a series of persecutions occurred. In 1885, when Bishop Schumacher took charge, nearly all the native clergy were suspended and replaced by Europeans and practically a new hierarchy established. The religious and moral education of the people was likewise in bad condition. The revolution of Alfaro in 1895 was a severe blow to the Church. The orders, among them the Capuchins, Salesians, Missionaries of Steyl, and the various sisterhoods, were all abolished. Schumacher continued and the Church rose, although her mission was not yet accomplished.

The State religion is the Catholic, but other creeds are not interfered with. Since tithes were abolished the State has provided for the maintenance of Catholic worship; it also supports religious educational institutions, such as the three seminaries at Quito and six elsewhere, one in each of the six dioceses. Civil marriage was recognized in 1901, and two years later the

Edda, a title applied to two different collections of old Norse literature, the poetic or "Elder Edda" and the prose or "Younger Edda." Properly speaking the title "Edda" is given to the whole body of the latter work, having been given to the former through a misnomer.

I. The "Younger Edda": the work of the Icelandic historian and statesman Snorri Sturluson (1178-1241), is a treatise on poetry for the guidance of the skalds or Icelandic poets. The title "Edda" is not given to this work in the most important manuscript with which we are possessed of it, the "Upsala Codex," dating from about 1300. The meaning of the word Edda is not certain. The older explanation of "great-grandmother" is now generally discarded, the most commonly accepted rendering being 'poetics' (from Óðhr, 'spirit', 'thought'). Some scholars derive the word from Oddi, the name of a place in southern Iceland, where Snorri received his earliest training. The work itself was intended to supply to the skald all the necessary information concerning mythology, poetic diction, and versification. Besides a formal (preface) of later origin it contains three parts. (1) "Gyftragnarminn" (Gylfi's Deception), an abstract of old Scandinavian mythology in the form of a dialogue between King Gýfi and three gods. Appended to this are the "Bragurærhoður" (Bragi's Sayings), stories about Odín and Thor, related by Bragi, the god of poetry, and the "Sighvataugdr" (Psalms of the Gímr). The "Younger Edda" (Prose Edda) is a collection of poetic paraphrases (konningar) and synonyms (okend hendi), interspersed with mythological and legendary stories. (3) "Háttatal," a panegyric on the Norwegian King Håkon Håkonarson and Jari Skúli, containing one hundred and two strophes, each of which is composed in a different metre. This is followed by a prose commentary written, however, after Snorri's death by an unknown author. The work was unfinished when Snorri died and was subsequently revised and amplified by other writers, notably Sakariyo, Torr, Perto, Yorico (1771), Riobamba (1863). There are also four vicariate Apostolic subject to the Congregation of Extraordinary Ecclesiastical Affairs: Canoels and Maças, Mendes and Gualaquiza, Napo, Zamora.

poems of this kind not found in the "Codex Regius" were edited by Heusler and Ranis, "Édica Minor" (Dortmund, 1903). The best translation into German is the metrical version of Hugo Gering (Leipzig, 1892). The first English version (of the mythological songs only) was made by A. S. Cottle (London, 1797). A complete English version is that of Benj. Thorpe (London, 1855–66). The songs are also translated in Vignolus and Powell’s "Corpus poeticum boreale" (Oxford, 1883), and some songs are also rendered in Magnusson and Morris's "Translation of the Poems of King Olaf" (London, 1906). A new translation by W. H. Carpenter is in preparation (1908).

Arthur F. J. Remy.

Edelinck, the family name of four engravers.—Gerard, b. in Antwerp c. 1640; d. in Paris, 2 April, 1707. Galle instructed him in the rudiments of his art, and from him, in Antwerp, the youth imbibed that vigour and energy characteristic of Rubens' school of engraving, which was later to transform the art in France and impart to it Northern freshness and simplicity. In 1665 Gerard came to Paris, studied with de Poilly, quickly surpassed him, and almost immediately reached the height of his powers, which remained undiminished until his death. In 1671 he received commissions, a pension, the title of engraver to the king, apartments in the Gobelins, and the position of professor of the Gobelins Academy from the monarch whose features he depicted in fourteen engravings. In 1673 he was naturalized; in 1677 he became a Royal Academician; and soon thereafter the order of Chevalier of Saint-Michel was conferred upon him.

Edelinck was one of the greatest masters of pure engraving. He never used etching or dry-point on his plates, and of the four hundred that he produced there was not one that is poor. Edelinck's work was epoch-making: he revolutionized engraving, abandoning lines that crossed to form squares for lozenge forms. Further, he massed his lines and changed their direction, thus avoiding the monotony that had marked work in France. Edelinck had all the merits of his predecessors and, besides, rendered texture, colour, and light and shade as they never before had been rendered. His strokes were clear and bold, and the results beautifully finished, harmonious, and silvery. His proofs were the first to possess the quality called technically by engravers "colour". Sometimes they were slightly "metallic". Reproductions on steel by Edelinck frequently suggested more colour and quality in the originals than the latter possessed. He worked with marvellous facility and concealed his consummation so that he was under an untraught technic. While he did not confine his burin to portraits, it was these which gave him his great fame, for he so depicted all the notable men of his time, in the Church and the Court, and in literature and art, that we, to-day, gain an insight into their very character. The greater part of his work was reproductive, but he sometimes engraved from his own drawings, for he was a superb draughtsman. Edelinck was chosen to engrave Raphael's "Holy Family", Le Brun's "Magdalen", and "Alexander Visiting the Family of Darius", the first named bringing him instant fame. Only two impressions before letters of the "Holy Family" exist. Edelinck's life was one of piety, contentment, and tireless labour; it was made up of teaching engraving to his son and his two brothers and working on his own plates. Death found him engraving the "Alexander Entering the Tent of Darius", a superb plate finished by Pierre Drevet. To his family he left a fortune. Plates wholly his own were signed "Gerard Edelinck", or "Edelinck eques"; but when his compatriot Pitau or Gaspard Edelinck assisted him the signature was "Edelinck". Among his pupils were Gaspard, Jean, and Nicolas Edelinck, Lombard, and Trouvain. His principal works are: "Portrait of Louis XIV", after Le Brun; "Portrait of Rigaudi", after Rigaud; "Portrait of Mme. Hélyot with a Crucifix", after Galliot; "Portrait of Philippe de Champaigne", which the artist thought his best work, after Champa- igne; "Combat of the Four Horse- men", after da Vinci.

Nicolas, son of the preceding, b. in Paris in 1630; d. there in 1730. He studied under his father, Gerard, and to perfect himself subsequently went to Italy. In Venice he produced many plates in the style of his father, whom, however, he never equalled in vigour or quality. He engraved several plates for the Croizat collection. His masterpiece is a "Virgin and Infant" after Correggio.

His works include a "Portrait of his Father", after Tertebat; "Portrait of Cardinal Giulio de’ Medicì", after Raphael; "Portrait of John Dryden", after Kneller.

Jean, b. in Antwerp, c. 1643; d. in Paris, 1680. He was a younger brother and pupil of Gerard, with whom he worked and whose style he imitated. Plates wholly his own are much inferior to those of his celebrated brother, though they have considerable merit. "The Deluge", after A. Veronese, is his masterpiece. He made many engravings of the statues in the gardens of Versailles.

Gaspard-François, b. in Antwerp, 1652; d. in Paris, 1722. Gaspard, the youngest brother of Gerard, who was his teacher and co-worker, was inferior in talent to the other members of the Edelinck family, and did not long follow the career of engraver. Because he used a signature similar to that of Gerard and because his master often helped him with his plates, much of his work is difficult to distinguish from Gerard's.

Leigh Hunt.

Eden. See Paradise, Terrestrial.

Edessius and Frumentius, Tyrian Greeks of the fourth century, probably brothers, who introduced Christianity into Abyssinia; the latter a saint and first Bishop of Axum, styled the Apostle of Abyssinia, d. about 383. When still mere boys they accompanied their uncle Metriopus on a voyage to Abyssinia. When their ship stopped at one of the harbours of the Red Sea, people of the neighbourhood massacred the whole crew, with the exception of Edessius...
and Frumentius, who were taken as slaves to the King of Axum. This occurred about 316. The two boys soon gained the favour of the king, who raised them to positions of trust and shortly before his death gave them their liberty. The widowed queen, however, permitted them to remain in the court and thereby in the education of the young prince Erazanes and in the administration of the kingdom during the prince’s minority. They remained and (especially Frumentius) used their influence to spread Christianity. First they encouraged the Christian merchants, who were temporarily in the country, to practice their faith openly by meeting at places of public worship; later they also converted some of the natives. When the prince came of age Edesus returned to his friends and relatives at Tyre and was ordained priest, but did not return to Abyssinia. Frumentius, on the other hand, seems eager for the conversion of Abyssinia, accompanied Edesus as far as Alexandria, where he requested St. Athanasius to send a bishop and some priests to Abyssinia. St. Athanasius considered Frumentius himself the most suitable person for bishop and consecrated him in 328, according to others between 318–320. Frumentius returned to Abyssinia, erected his episcopal see at Jaffa, baptized King Aziazanas, who had meanwhile succeeded to the throne, built many churches, and spread the Christian Faith throughout Abyssinia. The people called him Abuna (Our Father) or Abba Selama (Father of Peace), titles still given to the head of the Abyssinian Church. In 339 Emperor Constantius addressed a letter to King Aziazanas and his brother Soizanas in which he vainly requested them to substitute the ancient Irian bishop Theophilus for Frumentius. (Athanasius, “Apol. ad Constantium” in P. G., XXV, 631). The Latins celebrate the feast of Frumentius on 27 October, the Greeks on 15 November, and the Copts on 10 December. Abyssinian tradition credits him with the first Ethiopian translation of the New Testament.

Michael Ott.

Edessa, a titular archiepiscopal see in that part of Mesopotamia formerly known as Osrhoene. The name under which Edessa figures in cuneiform inscriptions is unknown; the native name was Orsoe, after some local sarpas, this being the Armenian form for Chosroes; it became in Syriac Ourbai, in Armenian Ourdian, in Arabic Er Roha, commonly Urba or Urfa, its present name. Seleucus Nicater, when he rebuilt the town, 303 B.C., called it Edessa, in memory of the ancient capital of Macedonia of similar name (now Voden). Under Antiochus IV (175–164 B.C.) the town was called Antiochia by colonists from Antioch who had settled there. On the foundation of the Kingdom of Osrhoene Edessa became the capital under the Abgar dynasty. This kingdom was successively held by Iranian or Arabic tribes from North Arabia, and lasted nearly four centuries (132 B.C. to A.D. 244), under thirty-four kings. It was at first more or less under the protectorate of the Parthians, then of the Romans; the latter even occupied Edessa from 115 to 118 under Trajan, and from 216 to 244, when the kingdom was definitely suppressed to form a Roman province. The literary language of the tribes which had founded this kingdom, was Aramaic, whence came the Syriac.

The exact date of the introduction of Christianity into Edessa is not known. It is certain, however, that the community was first made up of the Jewish population of the city. According to an ancient legend, King Abgar V, Ushama, was converted by Addai, who was one of the seventy-two disciples. (For a full account see Abgar.) In fact, however, the first King of Edessa to embrace the Christian Faith was Abgar IX (c. 200). Under him Christianity became the official religion of the kingdom. As for Addai, he was neither one of the seventy-two disciples as the legend asserts, nor was he the Apostle of Addai, as Justinian says (Hist. IV, xvi); but a missionary from Palestine who evangelized Mesopotamia about the middle of the second century, and became the first bishop of Edessa. (See Doctrine of Addai.) He was succeeded by Aggaí, then by Patlout (Palet), who was ordained about 200 by Nersian of the Church of Edesia, until then under that of Jerusalem, was subject to the monarch of Syria. The aforesaid relations with Jerusalem and Antioch caused an important Syriac literary movement at Edessa of which the city long remained the centre. Thence came to us in the second century the famous Peshitta, or Syriac translation of the Old Testament; also Tattian’s Diatessaron, which was compiled about 172 and in common use until St. Rabula (Rabulas), Bishop of Edessa (412–35), forbade its use. Among the illustrious disciples of the School of Edessa special mention is due to Baraneses (154–222), a schoolfellow of Abgar IX, the founder of Christian philosophy, and the bishop of Lira, or Edessa. In the meanwhile Christian priests from Edessa had evangelized Eastern Mesopotamia and Persia, and established the first churches in the kingdom of the Sassanids. Aulaen, Bishop of Edessa, assisted at the Council of Nicea (325). The “Peregrinatio Silvica” (or Ethrius) (ed. Gamurrini, Rome, 1887, p. sqq.) gives an account of the many sanctuaries at Edessa about 388.

When Nisibis was ceded to the Persians in 363, St. Ephrem left his native town for Edessa, where he founded the celebrated School of the Persians. This school, largely attended by the Christian youth of Mesopotamia, and closely watched by St. Rabula, the friend of St. Cyril of Alexandria, on account of its Nestorian tendencies, reached its highest development under Bishop Ibas, famous through the controversy of the Three Chapters (q.v.), was temporarily closed in 457, and finally in 489, by command of Emperor Zeno and Bishop Cyrus, when the teachers and students of the School of Edessa repaired to Nisibis and became the founders and chief writers of the Nestorian Church in Persia (Labourt, Le christianisme dans l’empire perse, Paris, 1904, 130–141). Monophysism prospered at Edessa, even after the Arab conquest.

Rebuilt under the later centuries of Edessa Jacob Baradeus, the real chief of the Syrian Monophysites known after him as Jacobites (q.v.); Stephen Bar Sudalai, monk and pantheist, to whom was owing, in Palestine, the last crisis of Origenism in the sixth century; Jacob, Bishop of Edessa, a fertile writer (q. v.); Theophilus the Maronite, an astronomer, who translated into Syriac verse Homer’s Iliad and Odyssey; the anonymous author of the “Chronicon Edessenseum” (Chronicle of Edessa), compiled in 540; the writer of the story of “The Man of God,” in the fifth century, which gave rise to the legend of St. Addai. The oldest known date of Syrian manuscripts (A.D. 411 and 462), containing Greek patriotic texts, come from Edessa. Rebuilt by Emperor Justinian, and called after him Justinopolis (Evagrius, Hist. Eccl., IV, viii), Edessa was
taken in 609 by the Persians, soon retaken by Heraclius, but captured again by the Arabs in 640. Under Byzantine rule, as metropolis of Osrhoene, it had eleven suffragan sees (Echos d'Orient, 1907, 145). Lequien (Orients chrst., II, 963 sqq.) mentions thirty-five bishops of Edessa, yet his list is incomplete. The Greek hierarchy seems to have disappeared after the eleventh century. Of its Jacobite bishops twenty-nine are mentioned by Lequien (II, 1129 sqq.), many others in the “Revue de l'Orient chrétien” (VI, 195), some in “Zeitschrift der deutschen morgenländischen Gesellschaft” (1909). Moreover, Nestorian bishops are said to have resided at Edessa as early as the sixth century. The Byzantines often tried to retake Edessa, especially under Romanus Lacaenus, who obtained from the inhabitants the “Holy Mandylion,” or ancient portrait of Christ, and solemnly transferred it to Constantinople, 16 August, 944 (see Constantinopolis 944). The Rev. Robert Edgeworth, through conscientious motives resigned his living, embraced the Catholic religion, and, finding life at home intolerable under the penal laws, with his family (all of whom became Catholics) removed to Toulose, then main centre of Nestorianism, to receive his early training for the ecclesiastical state. He was afterwards sent to the seminary of Trence-Trois, Paris, at the suggestion of Bishop Moylan of Cork, to be consecrated as priest in the metropolitan see of Osrhoene (at one time a cure of clergy). After a course of theology at the Sorbonne, Henry Essex Edgeworth was ordained priest, and the capital of France became the theatre of his apostolic labours. The Irish bishops offered him a mitre in Ireland, an honour which he declined with his usual humility. On the removal of her confessor, Madame Elisabeth, sister of the ill-fated Louis XVI, requested the superior of Les Missions Etrangères, where the abbé resided, to recommend her another and he unstintingly selected the Abbé Edgeworth. The Archbishop of Paris approved of the abbé’s choice, and introduced him at court. This he became known to the royal family as a devoted friend. In their fallen fortunes he stood by them at the risk of his life, followed the survivors after the Revolution into exile, and died in their service.

When the Archbishop of Paris was obliged to fly in 1792 in order to save his life, he vested the Abbé Edgeworth with all his powers, making him his grand vicaire, and committed the great diocese to his care. In answer to the urgent entreaties of his friends to seek safety in Ireland or England, at this time, the abbé replied: “Almighty God has baffled my measure, and ties me to this land of horrors by chains I have not the liberty to shake off. The case is this: The wretched master [the king] charges me not to quit this country, as I am the priest whom he intends to prepare him for death. And should the iniquity of that nation commit this last act of guilt, I also prepare myself for death, as I am convinced the popular rage will not allow me to survive an hour after the tragic scene; but I am resigned. Could my life save him I would willingly lay it down, and I should not die in vain” (Letter to Mr. Maffey, priest in London).

On the 22nd last, on the 3rd of January, 1793, he was summoned by the Executive Council to proceed to the Temple prison at the desire of “Louis Capet,” who was condemned to die on the following day. The abbé, having remained in the Temple all night, said Mass in the king’s apartment on the morning of the execution, sat beside him in the carriage on the way to the scaffold.
fold, and, when the axe of the guillotine was about to fall, consigned his beloved master with the noble words: "Son of St. Louis, ascend to heaven." In his graphic and authoritative account of the last moments of Louis XVI (the original of which in French is in the British Museum) the Abbé is silent about this fine apostrophe, which everyone has heard of; but, when asked if he made use of the memorable expression, he replied that, having no recollection of anything that happened to himself at that awful moment, he neither affirmed nor denied having used the words, as he was allowed to leave the scene of the execution unmolested, and so escaped; but soon after his head was demanded in several clubs, so that he was obliged to quit Paris and take refuge at Bayeux, whence at that time he might easily have escaped to England. Three chief considerations, however, bound him to the land of horrors. He had a great diocese committed to his care; he had promised Madame Elisabeth, then in prison, never to desert her, and he could not abandon his mother and sister, still living in Paris. Dressed as an ordinary citizen, and passing under the name now of Essex, now of Edgeworth, and again of Henry, he eluded capture and escaped, until, after a perilous life, in August, 1793, after the death of his mother, and the execution of Madame Elisabeth, he escaped to Portsmouth, and proceeded to London.

Mr. Pitt offered to settle a pension for life on him, but he respectfully declined it. During the three months he spent in London he was lionized by fashionable society. His brother, Usher, who resided at Firmount, and his relatives at Edgeworthstown, proud of his fame and renown, were most anxious to see him in Ireland; and, in fact, he was on the point of revisiting the land of his birth when he was entrapped with confidential despatches for Louis XVI, then at Blankenburg. This changed all his plans. At the earnest entreaty of the exiled king he resolved to remain with him as his chaplain, going afterwards with the royal family to Mittau in Russia, where he spent the remainder of his days, revered and honoured by all with whom he came in contact. The Emperor Paul settled a pension of 500 roubles per annum on him. When Napoleon invaded Russia in 1807 it happened that some French soldiers were taken prisoners, and sent to Mittau. A contagious fever broke out among them, and in attending to their spiritual wants A.D. 1807, never of such an extent, compelled the Abbé to go to the sick bed of her "beloved and revered invalid, her more than friend, who had left kindred and country for her family," to use her own words. He was interred at Mittau. Louis XVIII wrote his epitaph, a copy of which, together with a letter of condolence, was sent by Louis' orders to Mr. Usher Edgeworth, the abbe's brother, residing in Ireland.

Edinburgh, the capital of Scotland, though not its largest city, derives its name from the time (about A.D. 620) when the fortress of Edinburg was raised on a lofty spur of the Pentland Hills, overlooking the Firth of Forth, and established the Anglian dominion in the northern part of the Northumbrian Kingdom. Edinburgh Castle was a royal residence in the reign of Malcolm Canmore, husband of St. Margaret, who died there in 1093. Round the castle the town grew up, and a little lower down the collegiate church of St. Giles, predecessor of the present church bearing that name, was erected in the twelfth century. In 1306 David I., father of St. Margaret, bought the Holyrood, at the foot of the castle hill, 1128; but the town of Edinburgh for several centuries did not extend beyond the ridge sloping eastwards from the castle. In the middle of the fifteenth century Edinburgh became the real capital of Scotland, that is, the seat of the Parliament and the residence of her kings, and the scene of many of the most important provincial councils which regulated the affairs of the Scottish Church. James II. was the first king crowned at Edinburgh instead of in the Abbey of Scone, and he and his successors conferred many privileges on the capital, and did all in their power to develop it and increase its prosperity. The buildings of the city gradually spread outside the ancient walls, all along the sloping ridge which extends from the castle at the top to Holyrood at the bottom; and towards the end of the nineteenth century the New Town was built to the northward, beyond the extensive lake (since drained) which stretched under the castle hill.

During the past hundred years Edinburgh has steadily increased in population and wealth, if not so rapidly as other cities which are greater centres of manufactures and commerce. The unrivalled beauty of its situation, and the social and other advantages which it offers as the capital of the country, as well as the memorable educative facilities afforded by its many splendidly equipped schools and colleges, have always made it exceptionally attractive as a place of residence. Literary taste and culture were long the special characteristics of Edinburgh society, and it still possesses some of the literary charm which won for the city the title of the Modern Athens in the second quarter of the nineteenth century, when Scott, Wilson, Jeffrey, Brougham, and others made it famous by their personality and their genius. Modern facilities of travel and of intercommunication have inevitably given to Edinburgh, as to every centre of population in the kingdom, outside London, a certain note of provincialism; but it has not altogether lost the dignity and charm proper to a capital. The population of Edinburgh is now (1898) 177,000, an increase of more than 100,000 in the past thirty years; and its area is 11,000 acres. It returns four members to Parliament, and is governed by a town council of fifty members, presided over by the lord provost. Printing, brewing, and distilling have long been, and still are, the principal industries of the city. Edinburgh is the seat of the supreme court of Scottish law, which in its external forms as well as in many essential points differs greatly from the law of England. The presidents of the courts are the lord-justice-general and the lord-justice-clerk; and the judges, properly entitled "senators of the college of justice," enjoy the official title of Lord. The supreme courts occupy the Scottish Parliament house, a stately seventeenth-century building; and under the same roof is the Advocates' Library, one of the most extensive and valuable collections of books and manuscripts in the kingdom.

EDINBURGH UNIVERSITY, the only one of the four Scottish universities not founded in Catholic times, was established in 1582 by royal charter granted by James VI., and was speedily enriched by many benefactions from prominent citizens. Its buildings occupy the site of the ancient collegiate church of St. Mary-in-the-Field (the Kirk of the Canongate, the scene of the mysterious murder of Lord Darnley), and have in recent years been greatly extended and embellished. The university comprises the usual faculties of divinity, law, medicine, and arts, and has pro-
duced many eminent men. The Edinburgh medical school has a world-wide reputation, and attracts students from all parts of the empire, as well as many foreigners. No religious tests prevent Catholics from enjoying the full benefit of university education in Edinburgh, but the number of Catholics frequenting the schools is remarkably small. The total number of students frequenting the university is between three and four thousand.

Ecclesiastical History.—Edinburgh is naturally much bound up in its ecclesiastical history with the country at large. In the earliest centuries of its existence, belonging as it did to the Kingdom of Northumbria, Edinburgh was included in the Diocese of Lindisfarne, as we find from the list of churches belonging to that see compiled by Simeon of Durham in the old chronicles.

The early connexion of the city with Lindisfarne is shown by the dedication to St. Cuthbert of its oldest church, founded probably in the ninth century. St. Cuthbert's church was presented to the newly established Abbey of Holyrood by King David; it was the richest church in Edinburgh, and possessed several outlying chapels, such as St. Ninian's, St. Roque's, and St. John Baptist's. When the diocesan system came to be fully established in Scotland, under Malcolm and Margaret and their sons, Edinburgh was included in the metropolitan Diocese of St. Andrews, and continued to be so until the suppression of the ancient hierarchy in the sixteenth century. The archbishop's see, as well as the episcopal residence, was of course in the primate city of St. Andrews, beyond the Firth of Forth; and there was no building known as a cathedral in Edinburgh prior to 1634, when the new Anglican Diocese of Edinburgh was formed out of the ancient archdeaconry of Lothian, and Forbes became the first occupant of the see. The old collegiate church of St. Giles was at this time, and during the revival of Episcopalianism in Scotland, used as the cathedral of the Protestant bishop. As regards the Catholic Church, Edinburgh was the head-quarters of the vicars Apostolic of the Eastern District of Scotland from the time of the foundation of that vicariate in 1828, when the church now known as St. Mary's Catholic Cathedra! had been in existence for some fifteen years. It has no architectural interest, but a spacious chancel was added, and other improvements carried out, in 1891. A cathedral for the Episcopalian body (whose bishop resides in Edinburgh) was erected about 1875, at a cost of over $500,000, from funds left by two charitable ladies. It is a Gothic building of much dignity, and by far the finest ecclesiastical building, either ancient or modern, now existing in Edinburgh. The Presbyterians have some handsome churches, but the grand old church of St. Giles, now in their hands, has been hopelessly vulgarized by the "restorer." A new church built by the Irvingites is adorned within by some fine mural paintings.

The seven Catholic churches which (besides the cathedral) supply the needs of the Catholic population of Edinburgh are of no particular merit architecturally, the most interesting being the latest erected, St. Peter's, which is in the earliest Byzantine style, and forms, with its presbytery, a little group of much originality and charm. The Catholic Archbishop of St. Andrews and Edinburgh (the fourth who has held that office in thirty years) resides in Edinburgh, and has his episcopal seat in St. Mary's Cathedral. St. Andrews (to which the title of Edinburgh was added at the restoration of the hierarchy in 1878) possesses a small Catholic church; but the Catholic population of the primate city is—except for summer visitors—only a handful. In Edinburgh the Catholics are estimated to number about 20,000. In the reign of Queen Anne (1702-14) a list sent in to the privy council of "Popish parents and their children in various districts of Scotland" gives the number of Catholics in Edinburgh as 160, including the Duke and Duchess of Gordon with their family and household, and several other noble families. The majority of the Catholics of Edinburgh to-day are of the poorer classes, and of Irish origin; but the past decade or so has witnessed a considerable number of conversions among the more well-to-do inhabitants of the city. Since the great anti-Catholic tumults of 1779, when the chapels and houses belonging to the insignificant Catholic body were burned by the rioters, the spirit of tolerance has
made progress in the Scottish capital as elsewhere in the kingdom. Catholics are generally respected, and may and do rise to high positions of trust in the commercial, legal, and municipal world.

Something remains to be said of the religious houses which have flourished in Edinburgh in ancient and modern times. The principal and wealthiest monastery in former days was the Abbey of Holyrood, founded by David I for Augustinian canons, who were brought from St. Andrews. The Blackfriars or Dominican monastery was founded by Alexander II in 1230, on a site now occupied by a hospital. The Greyfriars or Franciscan church (of the Observant branch of the order) stood in the Grassmarket until it was destroyed by fire in 1845. The Whitefriars or Carmelites did not settle in Edinburgh until 1518. Their house of Greenside, near the Calton Hill, was transformed at the Disso- lution into a lepers' hospital. Beyond the Carmelite house, nearer Leith, stood the preceptory of St. An-

thony, the only house of that order in Scotland. The collegiate churches in and about Edinburgh included those of St. Giles and St. Mary-in-the-Fields (already mentioned), Trinity Church, Restalrig, Corstorphine, Creighton, and Dalkeith. Trinity church, one of the most exquisite Gothic buildings in Scotland, was destroyed in the nineteenth century by a deplorable act of vandalism, to make room for new railway works. Neither the Benedictine nor Cistercian monks, who had numerous houses in Scotland, were established in Edinburgh. The Cistercian or Bernardine nuns, however, possessed the convent of St. Marie-in-the-wynd (or lane) near a hospital, where the sisters tended the sick. The Dominican nuns had also a convent (called Scionnes or Shenes, from St. Catherine of Siena) in the outskirts of the city. The numerous hospitals in Catholic Edinburgh comprised St. Mary Magdalen's in the Cowgate, founded in 1503 (the chapel remains, and is now used as a medical mission-hall); St. Leonard's, at the foot of Salisbury Crags; St. Mary's, in Leith Wynd, for twelve almsmen (converted into a workhouse by the Edinburgh magistrates in 1619); St. Thomas's, near the water-gate, founded in 1514 by Abbot Crichton of Holyrood for seven almsmen in red gowns; and Ballantyne's Hospital, founded by Robert Ballantyne or Bellenden, Abbot of Holyrood. The two religious orders of men now working in Edinburgh and its seaport of Leith are the Jesuits and the Oblates of Mary Immaculate. The former serve one of the largest churches in the city, and the latter have a house at Leith. There are eight convents of nuns, the oldest being St. Margaret's (Ursuline), founded in 1835, the first since the Reformation. The nuns keep a high-class school and attend several hospitals. St. Catherine's Convent of Mercy has a well-equipped training-

college for teachers as well as a ladies' school. The other convents are those of the Sisters of Charity, Little Sisters of the Poor, Sisters of the Sacred Hearts, Poor Clares, Order of Marie Réparatrice, Helpers of the Holy Souls, and Sisters of the Immaculate Conception.

The other Catholic institutions of the city include a children's refuge, orphanages for boys and girls, home for working boys, home for destitute children, dispensary, and home for penitents.

**Editions of the Bible**—In the present article we understand by editions of the Bible the printed reproductions of its original texts. We are not concerned with copies of the versions of the Bible, whether printed or written; nor do we purpose to consider the manuscript copies of the original text. The written reproductions are described under CODEX ALEXAN-
drinus and similar articles. We also consider BIBLICAL, in the latter part of which article (Vol. IV, pp. 499, 500) will be found an explanation of the critical nomenclature of Bible codices and the symbols by which they are denoted. The translations of the Bible will be treated under the title VERSIONS OF THE BIBLE. Since the original text of the Bible was written in Hebrew or Greek (the original Aramaic portions can for the present purpose be considered as coincident with the Hebrew), our study of its printed reproductions naturally considers first the editions of the Hebrew text, and secondly those of the Greek.

1. EDITIONS OF THE HEBREW TEXT OF THE BIBLE—Roughly speaking, there are three classes of editions of the Hebrew text: 1. The so-called Incunabula (Lat. cunabula, pl., "cradle"); 2. The common editions; 3. The critical editions. The reader will see that this division has an historical as well as a logical basis.

1. The Incunabula.—Technically speaking, the Incunabula are the editions issued before the year 1500. From our present critical standpoint, they are very defective; but since they represent manuscripts now lost, they are important even for critical purposes. The following publications constitute the main body of the Incunabula:

(1) The quarto edition of the Hebrew Psalter with the commentary of Rabbi David Kimchi, printed in 1477, probably at Bologna. Vowels and accents are wanting, except in the first four psalms. The volume is noted for its omissions, abbreviations, and general lack of accuracy.

(2) The folio edition of the Pentateuch, with vowels and accents, containing the Targum of Onkelos and the commentary of Rabbi Samuel Jarchi, printed at Bologna, 1482. This publication is much more perfect and correct than the foregoing.

(3) The so-called Earlier Prophets, i.e. the Books of Josue, Judges, Samuel, and Kings, printed in 1488 at Soncino, near Cremona, in Italy.

(4) The folio edition of the Later Prophets, i.e. Isaia, Jeremias, Ezeciel, and the twelve Minor Prophets, printed soon after the preceding publication, without accents and vowels, but interlined with the text of Kimchi's commentary.

(5) The Psalter and the Megilloth, or "Rolls", i.e. the Canticle of Canticles, Ruth, Lamentations, Ecclesiastes, and Esther, printed in the same year as the preceding publication, at Soncino and Casale, in Italy, in a quarto volume.

(6) Three folio volumes containing the Hagiographa with several rabbinic commentaries, printed at Naples in 1487; the text is accompanied by the vowels, but not by the accents.
(7) A complete Hebrew Bible, in folio, printed in 1488 at Siena, without any commentary. Its text, accompanied by both vowels and accents, is based partly on the previously printed portions of the Hebrew Bible, partly on Hebrew manuscripts, but it lacks many important contents.

(8) A folio containing the Hebrew and Chaldean Pentateuch with Rashi's commentary, printed in 1490 in Isola del Liri.

(9) A most accurate and highly esteemed quarto edition of the Pentateuch, printed at Lisbon in 1491. It was the second and complete edition of the Hebrew text, in quarto, printed in 1494 at Bruges. The editor calls himself Gerson ben Mose of Siconio. The text, which is accompanied by its vowels and accents, exhibits many peculiar readings not found in any other edition. The type is small and indistinct, the proofreading most slovenly; in a word, the edition is utterly defective. Luther based his translation on it.

(11) The foregoing text is repeated in an octavo edition printed at Pisa in 1494.

(12) A folio edition of the Hebrew Bible, printed on parchment, bears no indication of its date or place of printing, but probably appeared in Constantinople about 1500.

(13) To these may be added Seb. Münster's Hebrew-Latin Bible, printed in folio at Basle, 1534 and 1546, since its text is based on that of the 1488 and 1494 editions. Here also belong, for the same reason, the "Biblia Rabbinica Bombergiana," first edition (see below), the editions of R. Stephanus (1539-44, 1548), and the manual editions of Bomberg.

2. Common Editions.—By these we understand editions of the Bible reproduced either from manuscripts or previous printed editions without the aid of critical apparatus and the application of critical principles. While the editions of the Hebrew text thus far enumerated owed their publication to Jewish enterprise, those that follow were, at least in part, due to Christian scholarship. For practical purposes we may divide the common editions into two classes: (1) those not depending on other printed editions (independent editions); (2) those depending, at least partly, on a previously printed text (dependent, or mixed, editions).

(1) Independent editions.—This class of editions comprises the principal edition of the "Biblia Polyglotta Complutensia" and the "Biblia Rabbinica Bombergiana," second edition. Here we can give only a summary of their principal features.

(a) "Biblia Polyglotta Complutensia".—In the year 1502, Cardinal Ximenes engaged several learned scholars to prepare the edition of a polyglot text called variously after the name of its ecclesiastical patron and the place of its publication (Alcalá, in Lat. Complutum). The editors of the Hebrew text were Jewish converts. Ancient manuscripts, estimated at the value of 4000 florins, and probably also the best extant printed copies of the Hebrew text, were placed at their disposal. Thus the cardinal's scholars produced a text quite different from the other printed texts of his time. They marked the vowels, but not the accents. The Polyglot was finished in 1517, but was published only in 1520 or 1522, according to Gregory (Compendium and Text of the New Testament in York, 1907). The pure form of its text was only once reprinted in the so-called "Biblia Polyglotta Vatablii," or "Polyglotta Sanctandreana," or again, "Bertram's Polyglot." (Heidelberg, 1586, 1599, 1616).

(b) "Biblia Rabbinica Bombergiana," second edition.—Daniel Bomberg, of Antwerp, who had established a printing-office for Hebrew and rabbinic literature in Venice, published, in 1518, two important editions of the Hebrew text: (a) an edition for Christian readers, in quarto, which was reprinted in 1521, 1525-26, and 1544; (b) an edition for Jewish readers, edited by the Jewish convert Felix Pratensis. It contained the Targumim, the Massorah, and many Jewish commentaries, but did not satisfy the Jews. Hence Bomberg found it advisable to publish another edition under the editorship of R. Jacob ben Chayim, the most celebrated Jewish scholar of his time. He brought the text into closer agreement with the Masorah, and added several more Jewish commentaries. The work appeared in Venice, in four folio volumes, 1525-26, and was justly regarded as the first Massoretic Bible. It won the approbation of both Jewish and Christian scholars, so that it had to be republished in 1547-49, and 1588; the last edition was brought out under the direction of John de Garis (or de Garis), and using the great merits of the work, it is not wholly free from defects; Ben Chayim paid too much attention to the Massorah and too little to reliable old manuscripts. The principal codex he followed fell afterwards into the hands of de Rossi, who certifies that it is quite defective and has not been carefully edited. Chayim printed it without correcting its most glaring mistakes. The subsequent editions were influenced principally by Ben Chayim's text, and only secondarily by the Complutensian Polyglot. Thus the former text was repeated by Brugsch (Venice, 1620), a slightly modified form, by Justinianni (Venice, 1551, 1552, 1563, 1573), the editors of Geneva (1618), John de Garis (Venice, 1566, 1568, 1582), Plantin (Antwerp, 1566), Hartmann (Frankfort, 1595, 1598), the editors of Wittenberg (1585, 1587), and Tores (Amsterdam, 1618). Long before this, John Buxtorf edited first the Hebrew text in manual form (Basle, 1611), then Chayim's rabbinic Bible in four folio volumes (Base, 1612, 1619). Though he corrected some of Ben Chayim's mistakes, he allowed others to remain and even introduced some new ones. He ought not to have regulated the vocalization of the Targumim according to the vowels in the Chaldean fragments of the Bible, and it was at least inconsistent to change the Massorah according to the Hebrew text, seeing that Ben Chayim, whose text he professed to follow, had modified the Hebrew text according to the Massorah.

(2) Dependent, or Mixed, Editions.—In the editions thus far mentioned the text of one or the other of the two principal forms of the Hebrew Bible was reproduced without any notable change. We have now to consider the attempts made to correct the text either according to the reading of other editions or according to that of ancient manuscripts.

(a) Texts Corrected according to Printed Texts.—The first mixed text of the Hebrew Bible appeared in the Antwerp Polyglot (1569-72); the same text was also repeated in a Paris Polyglot (1629-45), in the London Polyglot (1657), in that of Reineccius (Leipzig, 1750-51), the smaller Plantin editions (Antwerp, 1580, 1582; Burgos, 1581; Leyden, 1613), the manual edition of Reineccius (Leipzig, 1725, 1739, 1756); and in the Vienna Bible (1740). The beautifully printed Bible of Hutter (Hamburg, 1588) presents a peculiarly mixed text. Here may be added the names of a few editors who published a Hebrew text without vowels and without reference to critical accuracy: Plantin (Antwerp, 1573, 8vo and 12mo; Leyden, 1585, 16mo; 1610, 12mo; Hanau, 1610, 24mo; Muenchen, 1610; Amsterdam, 1630, 1639, 8vo); Leusden (1694, 8vo); Marsius (1701, 8vo); Jablonsky (Berlin, 1711, 24mo); Forster (Oxford, 1750, 4to).

(b) Texts Corrected according to Codices and Printed Texts.—The mixture of Chayim's text with that of the Complutensian could not give perfect satisfaction. Every comparison of the mixed text with that of any good manuscript brought to light many discrepancies and suggested the idea that a better Hebrew text might be obtained by the help of good codices. The first attempt to publish a Hebrew text thus corrected was made by John Leusden with the cooperation of the printer Jos. Athias (Amsterdam,
1661, 1667). The editor revised Chayim's text according to the readings of two codices, one of which was said to be about 900 years old. This edition, printed by Athias, was revised by George Nissel according to the readings of Hutter's Bible (Leiden, 1662) and makes no pretense of having consulted any codices, so that his work is noted for its scarcity rather than its critical value. Clodium, too, endeavored to correct Athias's text according to earlier editions, but was not always successful (Frankfort, 1677, 1692, 1716). Jablonsky corrected the second edition of Athias according to the readings of several codices and of the better previous editions, paying special attention to the vowels and accents (Berlin, 1699, 1712); his first edition is commonly regarded as being one of the best. Van der Hoogh corrected the second edition of Athias according to the Masorah and the previous printed editions (Amsterdam and Utrecht, 1705); his attention to the smallest details and the printer's care account for the general favour with which the edition was received. A still more perfect reprint of the edition was published by Props (Amsterdam, 1724). Simonis, too, published corrected and cheap reprints of Van der Hoogh's Bible. Opitz corrected the edition of Athias according to the readings of seventeen of the best previous editions and of several manuscripts (Kiel, 1709; Zöllichau, 1741). He supervised the proof in person, and even the type was remarkable for its size and clearness, so that the edition was considered the most accurate extant. J. H. Leopold published the first Hebrew text with variants (Halle, 1720). He based it on the text of Jablonsky which he compared with twenty-four earlier editions and with five manuscripts preserved in Erfurt. The more important variants he added at the bottom of the page. It has been found that the older printed editions were received more superficially as far as the printed editions were concerned, and there is no good reason for supposing that more care was taken in the comparison of the manuscript text. Still, the edition remains valuable, because it is the first of its kind, and some of its variants deserve attention even today. The Oratorian Father Houbigant tried to produce a text far superior to the commonly received one. Taking Van der Hoogh's text for his basis, he added his own corrections and conjectures in critical notes. His apparatus consisted of a number of manuscripts, the annotations of Chayim, and the Hebrew scholarship of his time. The reputation of his inferences and the rashness of his conjectures did much to create a prejudice against his method, though the merit of his work has been duly appreciated by scholars. His "Notes Critiques" were printed in separate form in Frankfort (1777), after the full edition had appeared in Paris (1753).

Here may be mentioned the work of the Italian Jew, Salomo Norzi. He began in the early years of the eighteenth century to compare Bomberg's text with the best of the printed editions, with a number of good manuscripts of both Bible and Masorah, with the Biblical citations found in the Talmud, the Midrashim, and in other rabbinical writings, and with the critical annotations of the more notable Jewish commentators; the results of his long study he summarized in a Masoreto-critical commentary intended to accompany the text of the Hebrew Bible, which had been rather scantily corrected. The title of the work was to be "Repaire of the Breeke" (Is. lvi, 12), but the author died before he could publish his book. Nearly a century later, a Jewish physician named Raphael Chayim Italia had Norzi's work printed at his own expense under the title "Offering of the Gift" (Munster, 1756). Among the variants of Bomberg not noted by the editor, Norzi's reader have remained unnoticed until Bruns and Dresch drew attention to it. In spite of his best intentions, Norzi at times rather corrupts than corrects the Hebrew text, because he prefers the readings of the Masorah to those of the manuscripts.

3. Critical Editions.—The editions thus far enumerated can hardly be called critical, since their editors either lacked the necessary apparatus or did not consider it prudent to correct the received Hebrew text according to the full light of their textual information. Moreover, on, two classes of scholars have criticized the critical editions of the Hebrew text; some endeavored to restore critically the most correct Massoretic text obtainable; others tried to find the most accurate pre-Massoretic text.

(1) Critical Editions of the Massoretic Text. In order to restore critically the correct Massoretic text, it was necessary first to collect the apparatus. About the middle of the eighteenth century this need was felt very keenly by Benjamin Kennicott, a canon of Christ Church, Oxford, who determined to remedy the evil. Beginning in 1759, he collected either in person or through others as many as 615 Hebrew manuscripts, 82 printed editions, and the Talmud, continuing this preparation until the year 1773. Then he began the printing of the work (Vetus Testamenti Hebr. eum var.lectionibus, 2 volumes, Oxford, 1776-80) based on Van der Hoogh's Hebrew text as edited by Simonis. The variants, with their respective sources, were included in the introduction to each section of the second volume the author gives the history of his enterprise and justifies his methods. He found this necessary because, after the appearance of the first volume, his critics had charged him with lack of care and discernment in the choice of the manuscripts used, of the variants noticed, and in the treatment of the Masorah.

Bernardo de Rossi, professor at Parma, tried to construct an apparatus that should not be open to the exceptions taken against Kennicott's work. The material on which de Rossi worked exceeded that of Ken-nicott by 731 manuscripts, 390 printed editions, and several ancient versions. In his work (Variae lectiones Vetus Testamenti, Volumes, Parma, 1784-88) and its subsequent supplement (Supplementa ad variis. text.lectiones, 1798) he noted the more important variants, gave a brief appreciation of their respective sources and their values, and paid due attention to the Masorah. He follows Van der Hoogh's text as his basis, but considers it known, and so does not print it. All of de Rossi's critics are at one in admiring the laboriousness of his work, but they deny that its importance and value lies in the apparatus rather than in the apparatus itself. Perhaps the most severe critic was the author himself, in his "Dissertatio preliminaris" to vol. IV, gives a fairer opinion of his work than his critics do. It can hardly be denied that de Rossi at least showed what can be done by a study of the manuscripts and of the old editions for the correction of the received Hebrew text.

The apparatus of the textual, or lower, criticism of the Old Testament text (see CRITICISM, BIBLICAL) is not limited to the works of Kennicott and de Rossi; it comprises also the above-mentioned work of Salomo Norzi, re-edited in Vienna, 1813; the writings of Wolf; the publications of the "Comité de l'Oeuvres de la Bibliothèque des Oeuvres du Temple" (1864), and "Massora Magna" (Hanover, 1876); the prophetic "Codex of St. Petersburg", dating back to 916, phototyped by Strack in 1876; all the recently discovered or recently studied codices and fragments, together with the works of the ancient Jewish grammarians and lexicographers.

But even with these means at their command, the editors of the Hebrew text did not at once produce an edition that could be called satisfactory from a critical point of view. The editions of Döderlein-Meiser (Leipzig, 1793) and Jahn (Vienna, 1807) only popularized the variants without showing their value, but utilizing them properly. The edition published under the name of Hahn and prefaced by Rosennmüller (Leipzig, 1834) is anything but critical. The stereotype editions of Hahn (Leipzig, 1839) and Thiele (Leipzig, 1849) remained for many years the best
THE AMERICAN BIBLE SOCIETY.

BOSTON:Published by Order of the Board of Managers, 1875.

COMPLETENSIAN POLYGLOT. DEUT., XXXV, 35-46

UPPER PART: HEBREW, VULGATE, SEPTUAGINT (WITH INTERLINEAR LATIN TRANSLATION)
LOWER PART: CHALDAIC, WITH LATIN TRANSLATION. IN THE LEFT-HAND MARGIN ARE GIVEN HEBREW AND CHALDAIC ROOTS. PHOTOGRAPHED FROM ONE OF TWO COPIES OF ORIGINAL EDITION (500 COPIES) IN THE NEW YORK PUBLIC LIBRARY
manual texts extant. More recently the apparatus has been used to better advantage in the edition of Ginsburg (The New Massoretico-Critical Text of the Hebrew Bible, 1894) and in that of Baer and Deitzsch. The last-named appeared in single books, beginning with the year 1891. The Books of Ecclesiasticus, Numbers, and Deuteronomy are still wanting; both editors are dead, so that their work will have to be completed by other hands.

(2) Critical Editions of the Pre-Massoretic Text.—The editors whose work we have thus far noticed endeavoured to restore as far as possible the text of the Massoretic. However valuable such an edition may be in itself, it cannot pretend to be the last word which textual criticism has to say concerning the Hebrew text of the Old Testament. After all, the Massoretic text attained its fixed form in the early centuries of the Christian Era; before that period there were found many text-forms which differed considerably from the Massoretic, and which nevertheless may represent the original text with fair accuracy. The most ancient and reliable witness for the pre-Massoretic text-form of the Hebrew Bible is found in the Septuagint. But it is practically certain that, even at the time of the New Testament, the original text had suffered considerable corruptions; these can be corrected only by comparing parallel passages of the context, or again by conjectural criticism; a critical edition of this kind presupposes, therefore, a critical edition of the Septuagint text.

Various attempts have been made to restore the pre-Massoretic text of single books of the Old Testament: thus Oelschauer worked at the reconstruction of the Book of Genesis (Beiträge zur Kritik des überlieferten Textes im Buche Genesis, 1870); Wellhausen (Text der Bücher Samuels, 1871), Driver (Notes on the Hebrew Text of the Books of Samuel, 1890), and Klostermann (Die Bücher Samuels und der Könige, 1887) at the correction of the Books of Samuel; Cornill at the correction of the Book of Ezechiel (Das Buch des Propheten Ezechiel, 1886). To these might be added various other publications; e. g., several recent commentaries, some of the works published by Bickell, etc. But all these works concern only part of the Old Testament text. “The Sacred Books of the Old Testament”, edited by Paul Huf (see Critical, Biblical, s. v. Textual), is a series intended to embrace the whole Hebrew text; but its criticism is in many instances questionable; Kittel’s “Biblia Hebraica” (Leipzig, 1905), too, deserves a mention among the critical editions which attempt to restore the pre-Massoretic Hebrew text.

1. Editions of the Greek Text of the Bible.—Before speaking of the Greek text of the New Testament, we shall have to give a brief account of the editions of the Greek books of the Old Testament. They appear partly in separate editions, partly in conjunction with the Septuagint.

1. Separate Editions.—The principal separate editions of the deuterocanonical books appeared at Antwerp, 1566 (Plantin), 1584, and with Latin text taken from Ximenes’ Polyglot, 1612; at Frankfort, 1684; Halle, 1749, 1766 (Kircher); Leipzig, 1757 (Reineccius), 1850, 1857 (Augusti), 1837 (Apel), 1871 (Fritzsche); Oxford, 1842, 1871 (Fritzsche); Florence, 1842; Frankfort and Leipzig, 1691 (partially edited); Book of Tobias, Franeker, 1591 (Drusius), and Freiburg, 1870 (Reusch); Book of Judith, Würzburg, 1887 (Schoel, Commentar); Book of Wisdom, 1566 (Holk); Book of Prayer (Prælectiones eorum de Sine Polygeto); Coburg, 1601 (Pauli); Venice, 1827 (Greek, Latin, and Armenian); Freiburg, 1588 (Reusch); Oxford, 1881 (Deane); Ecclesiasticus, 1551, 55, 68, 70, 89, 90 (Drusius), 1804 (Breternieder); Books of Maccabees, Franeker, 1600 (Drusius); I Mach., Heilholds, 1751, 1754.

2. Editions Joined to the Septuagint.—The history of V.—19

these editions of the deuterocanonical books of the Old Testament is connected with that of the Septuagint editions. The reader will find full information on this question in the article Septuagint.

The newly invented art of printing had flourished for more than half a century before an attempt was made to publish an edition of the Greek New Testament. The Canticles, Magnificat, and Benedictus were printed at Venice, 1486 and 1496, as an appendix to the Greek Psalter: John, i, i, to vi, 58, appeared in Venice, 1495 and 1504, together with the poems of St. Gregory Nazianzen; the beginning of the Fourth Gospel, John, 1, 1–11, was published at Venice, 1495, and at Tübingen, 1511. Not that the reading public of that age did not feel interested in the other parts of the New Testament; but it did not show any desire for the Greek text of the Bible. After the beginning of the sixteenth century the world’s attitude with regard to the Greek text of the New Testament changed considerably. Not counting the publication of codices, mere stereotype reprints of parts of the Testament, the number of editions of the complete Greek text has been estimated at about 550; in other words, since the beginning of the sixteenth century, every year has witnessed the publication of, roughly speaking, two new editions of the complete Greek text. For our present purpose, we will consider the principal editions under the four headings of the Complutensian, the Erasmian, the Received, and the Critical text.

1. The Complutensian Text.—It was the Archbishop of Toledo, Cardinal Tommaso de' Cavalieri, who began at Alcalá, in 1502, the preparation of the edition of the Old Testament in Hebrew, Greek, and Latin, and of the New Testament in Greek and Latin. It has been thus far impossible to ascertain what codices served as the basis of the work called the Complutensian Polyglot. Though Leo X sent from the Vatican Library some manuscripts vererandae vetustatis for the use of the scholars engaged in the work at Alcalá, it is quite certain that the well-known Codex Vaticanus was not among them. It appears that the Greek New Testament text of the Polyglot rests on the readings of a few manuscripts only, belonging to the called Byzantine family (see Criticism, Biblical, s. v. Textual). The charge that the Complutensian text was corrected according to the evidence of the Latin Vulgate, is now generally abandoned, excepting with regard to the New Testament text, which is contained in the fifth or, according to other arrangements, in the last of the six folios of the Polyglot; it was finished 10 January, 1514, and though the rest of the work was ready 10 July, 1517, four months before the great cardinal’s death (8 Nov., 1517), it was not published until Leo X had given his permission propria motu, 22 March, 1520.

The Complutensian text, corrected according to certain readings of the Erasmian and of that of Stephanus, was repeated in the Antwerp Polyglot published, under the auspices of King Philip II, by the Spanish theologian Benedict Arias Montanus and his companions, and printed by the celebrated typographer, Christopher Plantin, of Antwerp, 1559–72. The Greek New Testament text occurs in the fifth and in the last of the eight folios which make up the Antwerp Polyglot; in the fifth by Tyrtus; Codex, 1601 (Pauli); Venice, 1827 (Greek, Latin, and Armenian); Freiburg, 1588 (Reusch); Oxford, 1881 (Deane); Ecclesiasticus, 1551, 55, 68, 70, 89, 90 (Drusius), 1804 (Breternieder); Books of Maccabees, Franeker, 1600 (Drusius); I Mach., Heilholds, 1751, 1754.

2. Editions Joined to the Septuagint.—The history of V.—19.
The eighth volume reappears in a number of editions:
Antwerp, 1573–84 (four editions, Christopher Plantin);
Paris, 1584 (Syriac, Latin, and Greek text; Prevost-
teau); Heidelberg, 1599, 1602 (Comeliin); Lyons,
1590 (Rob. Stephanus); Paris, 1592 (reprinted
in very different editions; Pierre de la Roiie, Sam.
Crispin, James Stoer); Leipzig, 1567 (with the inter-
linear version of Arias Montanus; Kirchenr); Vienna,
1740 (edited by Deibel, published by Kalwoda);
Mainz, 1733 (edited by Goldhagen; published by
Var-

tery).
Lege, 1539 (Rhein.); Nuremberg, 1580. 1600 (Hutter's Poly-

giot, twelve languages); 1602 (the same, four lan-
guages); Amsterdam, 1615 (the same, Welschert);
Geneva, 1628 (Jean de Tournes; one edition gives
only the Greek text, another gives Beza's Latin ver-
sion and a French translation).

2. The Erasmian Text.—On 17 April, 1515, the well-
known humanist, Beatus Rhenanus, invited Desiderius Erasmus, who lived at the time in England, to
to the Greek New Testament which John Froben, a cele-
brated printer of Basle, was anxious to publish before
Pope Leo X should give his permission to put forth
the Complutensian text printed more than a year be-
fore, as had hitherto been done to him, almost bodily the text of the manuscripts that hap-
pended to fall into his hands: the Gospels according
to a manuscript of Basle (Evv. 2); the Book of Acts
and the Epistles according to another manus-
script of Basle (Act. 2); the Apocalypse according
to a manuscript named after Reuchlin in "codex Reuch-
lini" (Apoc. 1). He made a few corrections after
superficially collating some other Basle manuscripts.
Evv. 1 among the rest. Since Reuchlin's manu-
scribed did not contain the end of the Apocalypse, Erasmus transcribed Apoc., xxii, 16–21, from the
Vulgata. The printing began in Sept., 1516, and the
whole New Testament text was finished in the begin-
ing of March, 1516. Under these circumstances satis-
factory work could hardly be expected; Erasmus himself, in a letter to Finkheimer, confesses that the first New Testament edition is "precipitatum verius qua
ter fatum" (1). In 1516 and 1517 (Robertus Stephanus introduced corrections from the Codex
Codex Polyglot); in his third edition, R. Stephanus repeats the fifth Erasmian with variants
from fifteen manuscripts and the Complutensian Poly-
giot (Paris, 1530). This edition is called Regia,
and is the basis of the English Authorized Version
(1611). Stephanus's fourth edition (Geneva, 1551)
was the first to give the Greek text, the latter of which
is for the first time divided into verses, a colo-
dation which was introduced into the Latin Vulgate in 1555,
and then became general. The last edition of R.
Stephanus was reprinted with slight modifications
a great number of times; its principal repetitions were
those supervised by Theodore Beza (Geneva, 1553,
1582, 1599, 1598 in folio; 1565, 1567, 1580, 1590, 1604
in octavo) and the brothers Bonaventure and Abra-
ham Elzevir (Leyden, 1624, 1633, 1641; Amsterdam,
1566, 1662, 1670, 1678). In the preface of the second
Elzevir edition (Leyden, 1639) we read the words:
"The text now given is the same as that published by
the Textus ergo habens; hence this Elzevir text became known as the textus receptus, or the Received Text.

3. The Received Text.—From what has been said it
follows that the Received Text is that of the second
Elzevir edition, which is practically identical with the
third edition of the fourth edition of Rober-
tus Stephanus corrected in about one hundred and
fifty passages according to the readings of the Codex
Claromontanus, the Codex Cantabrigiensis, the Latin,
Syriac, and Arabic versions, and certain critical notes
of Henry Stephanus. In its turn, the fourth edition
of Robertus Stephanus is almost identical with the
fifth Erasmian edition which exhibits the text of five
rather recent manuscripts corrected in about one hun-
dred passages according to the reading of the Complu-
tensian Polyglot. Still, it can hardly be denied that
the readings peculiar to the text can be traced at least
to the sixteenth century. From the six-
tury the Received Text held undisputed sway; its edi-
tions numbered about one hundred and seventy, some of
the more important being the following: (1) The fifth
volume of Brian Walton’s "Biblia Polyglotta" (Lon-
don, 1657) contains the New Testament in Greek,
Syriac, Arabic, Bashite, and Ethiopic; a learned apparatus
has been added in the sixth volume. (2) John W. Ed. ed. the
20. The edition anonymously (Oxford, 1675) with variants
collected "ex plus centum mss. codicibus et antiquis
versionibus". (3) John Mill reprinted the text of
Stephanus, 1550, together with valuable prolegomena
and a critical apparatus (Oxford, 1707), and L. Kuster
published an enlarged and corrected edition of Mill's
work (Amsterdam, 1710). (4) Not to speak of Rich-
ard Bentley's "Proposals for Printing", published in
1720, we must mention Wetstein's edition, the prole-
gomena to which appeared anonymously in 1730, and
were followed by the body of the work in two folios
(Amsterdam, 1751–1752) with an apparatus collected
from codices, versions, readings of the Fathers, printed
editions, and works of Biblical scholars. He also laid
down principles for the use of variants, but did not put
them into practice consistently enough. (5) The
same Wetstein went on with Wetstein's work, as
followed in W. Bowyer's edition of the Greek New
Testament (London, 1763). (6) When the foregoing
scholars had collected an almost unmanageable num-
ber of variants, John Albert Bengel endeavoured to
simplify their use by dividing them into two families,
an Asiatic and an African; besides, he constructed a
Greek text based on the readings of previous editions,
excepting that of the Apocalypse, which was based
also on the readings of manuscripts (Tübingen, 1734).
(7) This edition was enlarged and emended by Burck
(Tübingen, 1763).

4. The Critical Text.—In the last paragraph we have
evenuated a list of editions of the Greek New Testa-
ment which contain, besides the text, a more or less
complete apparatus for the critical reconstruction of
the true reading. We shall now mention a number of
editions in which such a reconstruction was attempted.
(1) Griesbach developed Bengel's method of group-
ing the variants into a formal system. He admitted
